THOUGHTS ABOUT THE CONTRIBUTION OF JEWS TO EUROPEAN LITERATURE IN THE TWELFTY 1820-1939	326

BIOGRAPHIES ON 18 GREAT CULTURAL & INNOVATIVE FIGURES IN 1820-1939 334

Balzac, Mendelssohn, Herzl, Ibsen, Alma Mahler, Karl Marx, Hugo, Gandhi, Garcia Lorca, George Sand, Zola, Tolstoy, Rachel, Verdi, Renoir, Disraeli, Coco Chanel, Sarah Bernhardt

THOUGHTS & QUOTES ON FAVORITE PLAYS 441

Extracts of texts of modern plays in translations and in: French - L'Aiglon by Rostand, in Italian by Pirandello - Six Characters in Search of an Author, in Spanish by Lorca - The House of Bernarda Alba, in Swedish by Strindberg - Miss Julie, in Russian by Chekhov - Three Sisters, in Ladino by Avraam Papo - The Vineyard of Navot, in Catalan by Guimera - Terra Baixa, in Portuguese by Garrett - Frei Luis de Sousa. Rigoletto in Italian, Verdi's opera with Piave's libretto, based on Victor Hugo's play Le Roi S'amuse – analysis and text, Revizor by Nikolai Gogol – analysis, An Enemy of the People by Henrik Ibsen – analysis and text in Norwegian, The Threepenny Opera by Bertolt Brecht – analysis and text in German, Topaze by Marcel Pagnol – Analysis. Finally the analysis of the novel The Great Gatsby by Frances Scott Fitzgerald. Altogether a survey of 11 plays, 2 operas, and a novel. In the next chapters: analysis of 3 novels by Emile Zola – L'argent, La curee, Le ventre de Paris, and a film "Life of Emile Zola", altogether, a survey and analysis of 18 works, mostly plays.

INSPIRATION

I would like to dedicate this book to all my friends and family who inspired me, to [Henri-Claude de Bettignies](#), my academic mentor, one of the most prominent ethicists in the world, to [Henk Van Luijk](#), a dear friend, the best man I have ever known, the most erudite, the kindest man, to [Baron Edmond de Rothschild](#) who believed in me and gave me a full scholarship for my MBA studies at INSEAD, to [Harry Recanati](#), one of the founders of the Israeli and international Discount Bank, he was one of the most ethical businessmen I have ever known, to [Uri Levit](#), the CEO of Poalim Investments, he was one of my best friends but also a colleague with whom I enjoyed working for many years during my career, to [Arieh Avneri](#), who became a symbol with his unabated stamina, his integrity and his ethical leadership. He influenced very much my ethical thought and was for me an admired mentor.

I would like also to thank my directeur de these at CNAM Yvon Pesqueux, Itzhak Gormezano Goren is a close friend who stood by me in the most difficult moments; Itzhak Saporta, Yehuda Kahane, Teddy Weinshall, Dan Shechtman; Shahar Horev, who invited me to write an ethical code and case studies, and train the managers of Sibat at the Israeli MOD; my beloved and intellectual friends who encourage me so much in my endeavors Vicky and David Shlachet; [Georg Heine](#), a true cosmopolitan, whose good heart was legendary and his friendship a treasure; Robert Ferris, Francis Desforges, [Dietmar and Carlita Fuchs](#), Alain Somia, Claudio Gino, Jean-Pierre Lorrain, Aldo Levy, Francois Lepineux, and many others.

Many family members, friends and colleagues have influenced, inspired, assisted and backed me, and I would like to thank them all: my mother, Pauline Simon Cory, who was my ethical inspiration since my early childhood. In her kindness, grace, wisdom and common sense, she gave me a model which I have followed ever since. My father Albert Cory who believed in me all the way. My grandchildren Tomer Cory, Doron Cory, Ophir Cory, Noga Cory, Itai Cory, Noam David Garfunkel, Ido Garfunkel, Yael Garfunkel. Family members Ronny Garfunkel, Nira Cory, Ella Shechtman Cory, Rachel & Eitan Zeiler, Haiim & Nehama Cory, Betty Rosen, David Popliker, Fanny Popliker, Rosalia Cohen. My friends Reuven Maskit, Dalia & David Golan, Shosha Goren, Shuki Schwartz, Meir Heth, Naomi Barsilay, Ora Rubinstein, Galia Sagy, Shlomit Levanon, Meir Tamari, Irit Levit, Zeev Nahari, Avi Bashan, Vera & Uzi Shaham, Alberto & Tali Garfunkel, Dove Izraeli, Izi Lavie, Mike Doron, Dalia & Zvi Aviel, Ziporah Shechtman, Yehoram Gaon, Hashmonai, Isy Lavie, Alex Reed Lajoux...

I thank especially the ten authors who contributed 10 essays, articles and chapters for this book and inspired my work – [Professor Jose Luis Fernandez Fernandez](#), [Professor Raphael Cohen-Almagor](#), [Yehoshua Sobol](#), [The Nobel Prize Organization](#), [Emmanuel Tchividjian](#), [Rachel Bortnick](#), [Liliana Benveniste](#), [Merav Barak](#), [Ruvik Rosenthal](#), [Avraham Bar-Av](#).

But my greatest thanks are to [my wife Ruthy](#), and to my children, [Joseph Cory](#), [Amir Cory](#), and [Shirly Cory Garfunkel](#), who continue to support me. I still need and receive their warm support, and especially of my beloved wife, who is the backbone of our family, [razon de vivir mi vida](#), the Rain Fairy, my muse, helping all of us who are in need. I am lucky to have this support, like Dr. Tomas Stockmann had in En Folkefiende by Henrik Ibsen – the support of his wife Katherine, his two sons Eilif and Morten, and his daughter Petra. I enjoy the support that I received from my students, colleagues, readers and friends, but nothing can compare to the support of my family, of my wife, as it is the most precious present that one can hope for.

INTRODUCTION

“Vita brevis, ars longa”, Ὁ βίος βραχύς, ἡ δὲ τέχνη μακρή”, Life is short, art is eternal

When the guns roar and the missiles fly over our heads, when buildings collapse and the dead pile up on all sides, when a pandemic rages and slays millions all over the world, paralyzes the economy, culture and life, when society disintegrates and the regime is in existential crisis, when incited rioters rave freely in our towns, reminding me of childhood traumas, of the vandals setting fire to entire neighborhoods, butchering and wounding without mercy, almost burning me alive, while I was reading Alice in the Wonderland, about the Queen of Hearts screaming COUPEZ LUI LA TETE – Off with his head; I find myself balm, bibliotherapy, writing catharsis, immersing in culture at its best, as the muses are not silent but speak or rather whisper to my deaf ears: get up, shake off, sail on the wings of the imagination, on the wings of time, to another reality in another place, to the most creative century in culture, innovation, spiritual life, literature, arts, music, theater, cinema, science and inventions, democracy and human rights, write about it and about the cultural paragons, the premieres of the best plays, operas and exhibitions, the fascinating and interesting salons, in order to heal my ailing soul, and to cure the physical & mental pain of my beloved readers.

This book can be read as a phantasm, a voyage into virtual reality, or as solid history based on facts. But instead of diving into troubled waters fighting sea monsters in tedious video games, I plunge in this book in the cultural ambience of Paris in the most innovative cultural twelfty, meeting the best authors, painters, composers, scientists, philosophers, actors, attending the most exhilarating premieres, participating in a pioneering environment, living in Paris, but visiting also other cultural centers - London, New York, Rome, Madrid, Berlin and Moscow.

I try to explore what could have been a life (mine?), in a different time, in a virtual reality, in another place. To explore the most interesting and meaningful cultural past in history – the twelfty from 1820 to 1939, although I am not an archeologist, a historian or a medium. So, I'll do it in the only way I know, a realistic approach, but based on surrealistic assumptions. Some people would say “*si non e vero e ben trovato*” – if it is not true it is a good fairy tale, others would read it with skepticism, wonder or incredibility, everyone according to his own inclination “*ciascuno a suo modo*” – each one in his own way, according to the immortal Luigi Pirandello's play with this name, premiered in Milan on May 22, 1924, in “our” era.

But, continuing with another play by Pirandello, there are not only six characters who came in search of an author, but hundreds of characters, “la crème de la crème” – the paragons of culture, thousands of premieres, asking me just to mention them, in a few words, in the 21st century, where only sophisticated people read them, hear them or play them, let alone remember that there was once an Emile Zola (J'accuse, Dreyfus), a Saint-Saens (The Carnival of the Animals), a Sisley, recollecting the battle of Hugo's (the “guy” from Les Misérables) Hernani at its 1830 premiere in Paris, or even the premiere of Gone with the Wind in Atlanta in 1939 (remembered today only because of the segregation issues at the opening night).

I focused my research on one “century”, and as it is actually [120 years](#), also called “long hundred” or “great hundred”, or even “centoventi” in Italian, hereinafter we'll call this period in this book “[twelfty](#)”, which also means 120. We'll focus mainly in one country, and one city (Paris, France). Indeed, what is my heritage – French culture & language, my mother tongue; Paris - where I studied for my MBA and received my Ph.D.; my Hebrew/Israeli heritage – the

country where I lived for most of my life, my homeland that I love most; my Sephardic/Ladino/Greek/Jewish heritage; my affinities to the English, American, Italian, Russian, German, Scandinavian, Spanish/Portuguese/Latin American cultures; or maybe the Oriental culture, as I was born in Egypt and my father in Turkey? As far as culture is concerned, it is all of them as shown in this book, since I have a mainly European but also a cosmopolitan culture; but in this book I focus in one country, one city, one century/twelfty, which I perceive as the most innovative, as I don't want to say the best. No culture is the best, as I have reached the conclusion that they are "All My Sons" or rather all my fathers, as I am their son, European and non-European languages' cultures, which I still study in my old age.

If I would have to characterize what was so peculiar, so unique, so everlasting in the culture of this era of 1820 to 1939 in France and in Europe it is probably the harmony between the outstanding paragons of culture and the cultural leading events, the extraordinary amount of energy, innovations, cohesion. This was the twelfty of the awakening of conscience, soul, heart of mankind which led to freedom, equality, fraternity, democracy, UN's Universal Declaration of Human Rights, decolonization, welfare state, not immediately, as there was the horrible World War II between that twelfty and the New World from 1945 onwards, but the seeds of this new better world for the masses was sown in this twelfty, by that era's giants.

Giants as Zola, Hugo, Shaw, Faulkner, O'Neill, Pagnol, Tolstoy, Dostoyevsky, Ibsen, Lorca, Pirandello, Brecht, Kafka, Thomas & Heinrich Mann, Balzac, Freud, Einstein, Verdi, Monet, to mention only a few of those who will be mentioned in this book. It focused in France, spread to the UK, US, Germany, Italy, Spain, Norway, Sweden, Russia, Austria, and after this European twelfty, throughout the world – in Japan, Latin America, South Korea, Israel, Australia, Canada, etc., although at a much slower pace, with setbacks, but with a remarkable effervescence. We intend to try to unravel in this book what was the secret of this era, these countries, those people, what was the cause of their creativeness, stamina and harmony!

But on the other hand how this twelfty of 1820-1939 failed, wasted, spoiled, ruined, missed, lost, overlooked the meaning of the immense cultural treasure, the most innovative, greatest, pioneering twelfty in culture, literature, theater, cinema, poetry, novels, classical music, opera, ballet, art, painting, architecture, philosophy, psychology, sociology, economics, political thought, science, technology, fashion, business, democracy, human rights, liberté, égalité, fraternité, freedom, social justice, Unity of Nations, peace, ethics, prosperity, ended up in World War II in 1940-1945, in the disappointment of the United Nations, in populist regimes, the bankruptcy of democracy, the highest corruption levels in decolonized countries, but also in many Western countries, except in the ten most ethical and prosperous in all aspects states – Scandinavia, Netherlands, Switzerland, Singapore, New Zealand, Australia and Canada.

Como me siguen	How they follow me
En fila interminable	In endless line
Todos los yos que he sido!	All the me that I have been!
Como se abre el ante mi	How it opens before me
En infinita fila	In infinite row
Para todos los yos que voy a ser!	For all the me that I will be!
Y que poco que nada soy yo	And that little that nothing is me
Este yo de hoy	This me of today
Que casi es de ayer	That it's almost yesterday
Que va a ser todo de mañana!	That will be all tomorrow!

Juan Ramon Jimenez, "El presente" La realidad invisible, "The present" The invisible reality

THE METHODOLOGY OF THE BOOK

It is amazing how prolific is the French mind, and what gigantic was the French contribution to the world civilization on most of its facets – literature – novels, poetry, drama; art – painting, sculpture, architecture; films – technology, directors, actors; sociology, philosophy, travel, science, humor, history, medicine, transportation, psychology, business, ethics, liberté – égalité – fraternité, humanism, democracy, law, welfare, photography, fashion, French cuisine & wines. Therefore, I have decided to write this book on a life of a virtual intellectual and cultural person, who “lived” in France in the Golden Age of France and French Culture in Literature, Theater, Arts, Music, Films, Humanism, Cultural Salons, Science and Inventions.

I am calling this person, as he needs a name even if he is a virtual person, **Jacque Corot**, and any resemblance to my name Jacques Cory is absolutely coincidental. The reason that I have chosen is that he “is” a distant relative of the French painter Camille **Corot** (1796-1875), who was born, lived and died in Paris, a realistic landscape and portrait painter, his vast output simultaneously references the [Neo-Classical](#) tradition and anticipates the [plein-air](#) innovations of [Impressionism](#). So, Jacque Corot is a precursor of modernism with strong roots in the classical tradition, exactly the genes needed for my virtual protagonist. He “is” also a distant relative of Charles-Émile **Jacque** (1813 - 1894), who was born, lived and died in Paris, a French painter of animals ([animalier](#)) and [engraver](#), who was, with [Jean-François Millet](#), Camille Corot, Theodore Rousseau and Charles-Francois Daubigny, part of the [Barbizon School](#). Jacque also provided the illustrations for numerous books, in particular the [Vicar of Wakefield](#) by [Oliver Goldsmith](#); *The Indian Cottage*, a novella published with [Paul et Virginie](#); *Picturesque Greece* by [Christopher Wordsworth](#); the *Works of Shakespeare*; and *Ancient and Modern Versailles* by [Alexandre de Laborde](#). His sons Émile Jacque (1848–1912) and Frédéric Jacque (1859–1931) were both painters and engravers especially of rural subjects. The son of Frederic, Marcel Jacque (1906-1981) was also a painter, manager of the Rousseau Museum in Barbizon. So, we have here a “dynasty” of painters and cultural people, Parisians and French, attributing their names – Jacque and Corot – to my virtual hero Jacque Corot, in the ideal cultural and geographical background. I like very much Barbizon, Fontainebleau and the forest between them, which I visited frequently while studying at INSEAD in Fontainebleau in 1967 & 1968, with frequent cultural visits to Paris & participating in the [May 1968](#) Paris students “revolution”. So, these are the origins of the name of our protagonist. And one more prosaic reason – to the best of my knowledge no one is named Jacque (without an s) Corot, and nobody could sue me for ‘stealing’ his name...

But CoRoT is on the other hand, “**Convection, Rotation and planetary Transits**” a [space telescope](#) mission which operated from 2006 to 2013. The mission's two objectives were to search for [extrasolar planets](#) with short orbital periods, particularly those of large [terrestrial size](#), and to perform [asteroseismology](#) by measuring [solar-like oscillations](#) in stars. The mission was led by the [French Space Agency \(CNES\)](#) in conjunction with the [European Space Agency \(ESA\)](#) and other international partners. Among the notable discoveries was [CoRoT-7b](#), discovered in 2009 which became the first exoplanet shown to have a rock or metal-dominated composition. **CoRoT-1** is a yellow dwarf main sequence star similar to our Sun. The star is located approximately 2,630 light-years away in the constellation of Monoceros. And these are only 2 examples of the multiple & very important discoveries made by CoRoT. What could be better than a combination of culture in many facets: painting, literature, biology, geography, astronomy, technology, science, with the roots in France...

Jacques Corot would live in the nineteenth century in France, being born on January 1, 1820, a decade before the premiere of Hugo's *Hernani*. He would not have any problem in travelling all over the world, and meet whomever he chooses, but without actually interacting, a kind of one-sided zoom. Or rather "Back to the Past", travelling through time, without having an opportunity to change the course of events. This person would prefer to live as a grown-up, let's say 30 years old, healthy, wealthy, [Forever Young](#), and will remain at this age until he disappears, let's say on December 31, 1939, a few days after the premiere of *Gone with the Wind*, without experiencing the atrocities of World War II, the Holocaust, Hiroshima and Nagasaki. Without experiencing in France the despicable period of collaboration between Petain and Hitler. The last sentence of *Gone with the Wind* was "Tomorrow is another day!", and indeed what an awful day it was, as on the tomorrow of the premiere, the next 6 years 1940-1945 were the worst in human history, as World War II was the [deadliest conflict](#) of human history, marked by [70 to 85 million fatalities](#). Towards the end of this awful time I was born, on 5/6/1944, living in a much less interesting cultural century, but a much safer one.

Is there any reason for picking up 1820 as his first year? Well, if we want to encompass in a century or 120 years my most beloved cultural periods – Romanticism, Realism/Naturalism, Modernism – this is the best year to start at. And Corot would be in good company compared to the 10 prominent people born in 1820 – Friedrich Engels, German sociopolitical philosopher who laid the foundation for Marxism. Anne Bronte, British novelist and poet who is best remembered for *Agnes Grey* and *The Tenant of Wildfell Hall*. Jenny Lind, known as the Swedish Nightingale, a soprano singer who became a member of the Royal Swedish Academy of Music. Florence Nightingale, celebrated British social reformer who is considered the founder of modern nursing, she died in 1910 at the age of 90. Anna Sewell, English novelist, author of *Black Beauty*, a classic of English children's literature. Harriet Tubman, escaped slave who became an abolitionist and Union spy during the Civil War and rescued over 300 slaves using the Underground Railroad. Susan Anthony, suffragette reformer who led protests for women's equality. August Kekule, prominent German chemist who revolutionized chemistry by introducing chemical structure theory in 1857, his notable work was on the structure of benzene. William Loftus, English geologist, explorer and archaeological excavation expert who discovered the ancient city of Uruk, Sumeria in 1849. Fanny Crosby, blind American poet and composer who wrote over 8000 hymns and gospel songs with over 100 million copies printed making her one of the most prolific hymnists.

Living 120 years is not unheard of, even in those years, although living all this period young, wealthy and healthy is an invention existing only in this book, at least for the virtual biography. Jeanne Calment of France born on 21/2/1875 lived to age 122 years and 164 days, Sarah Knauss, US, 1880-1999, 119 years and 97 days. Kane Tanaka, Japan, born 1903, Nabi Tajima, Japan, 1900-2018, Jiroemon Kimura of Japan born on 19/4/1897 lived to age 116 years and 54 days, and my Israeli compatriot Yisrael Kristal born on 15/9/1903 in Russia lived to age 113 years & 330 days. Actually, in 2020, date of the first draft of this book, 50 people lived to be between 115 & 122. So, if they live 120 years why could not also my hero?

Corot would have an agnostic, and intellectual Parisian family, and attend the important "[literary salons](#)", with all the who's who in literature, painting, music, science, etc. from 1820 to 1939. As his is a virtual life, our hero will have to give up the pleasures of some of his senses – French cuisine and wines, French perfumes (not such a sacrifice bearing in mind that in this twelfty people didn't wash too often), French women (he is not a Jihad shahid with 72 virgins in heaven), but will be able as in zoom, films and Internet to see and hear everything, without having the possibility to interfere, or maybe so if he is an hologram, an avatar, etc.

As my hero lives in the 19th century and early 20th century, I don't have the dilemma of locating him or not in Israel, as this country did not exist, nor would I be specific about his religion. I chose Paris as it was in this twelfty from the twenties of the 19th century to the thirties of the 20th century – the center of the world, at least the cultural world, the time of La Belle Époque, the roaring twenties, the who's who in painting, the most modern American authors, it seemed that Paris was a magnet to world's creative imagination, inventions, culture.

In this epoch we would experience an immense progress and change in all the fields – technology, science, architecture, art, literature, transportation, democracy, with the changes from the absolute monarchy of the Bourbons, to Louis-Philippe, the Second Republic, Napoleon III, the Third Republic, rise of socialism, falling down of empires, but also communism in USSR, fascism in Italy, Spain, Nazism in Germany, neo-liberalism in the UK and the US. My hero's interests will be primarily in his fields of interest, meeting prominent people in those fields, but not meeting politicians, unless needed for his research. However, it goes without saying that he would be a Dreyfusard, anti-racist, anti-colonialist, anti-violence unless in legitimate defense, anti-terrorism, anti-slavery, anti-isolationism, democrat in favor of universal suffrage, republican against monarchy, multi-cultural, cosmopolitan, favoring social democrats or humanistic capitalism parties, somewhere in the left/center, he would favor globalization without exploiting weaker nations, without any active involvement in politics, and if he would meet politicians, kings, emperors, he would only ask them – WHY?

First of all he would be able to ask those questions to Napoleon I still living in 1820 in Saint Helena. But more probably he would ask his nephew Napoleon III why has he missed the opportunity to become the best ruler ever – if he would have chosen to remain a democratic leader of France, caring for the welfare of his people, without declaring wars against Russia (the Crimean War), Austro-Hungary (Italian Campaign), Mexico, Algeria, Indochina, Africa, Syria and Lebanon, China, and finally losing to Germany in 1870, as if his own country was not enough, without becoming a despot, causing the death of millions, the subjugation of tens of millions. Not forgetting nevertheless his immense contribution to culture, architecture, modernization of Paris, but also crushing opposition in France. Don't do harm would say an Epicurean, an ethicist, a physician - your ancestors were not aristocrats, why all those airs de grandeur, being an emperor – you want to compete with the corrupted kings and emperors?

The French people made a revolution to get rid of them, and received a worse tyrant. And the same applies to Kaisers of Germany, Tsars of Russia, Emperors of Austro-Hungary, absolute and obsolete kings in Europe, China, and all over the world. And Queen Victoria, the "benevolent" mother, who ruled the "democratic" UK (without universal suffrage, the right of voting to women and many segments of the population), with a neoliberal economy, with extreme poverty, with child labor, with very long working hours: builders worked 64 hours a week in summer and 52 in winter, while domestic servants worked 80 hour weeks, with a horrendous colonialist policy enslaving half the world in Africa & Asia, "Empress" of India... Queen Victoria retained a substantial influence in spite of the so-called democratic government, but even if not - she should have resigned, ashamed of the horrible conditions of her people as opposed to the luxury of her life. The same applies to most of other monarchs who did almost nothing for their citizens, usurping power, while their people starved to death, with an idle aristocracy, who needed them? But the same criticism goes to presidents or prime ministers in totalitarian states in semi-democratic or even in democratic states, with similar social and economic problems, warmonger policies, colonialism, racism, without humanism.

In the nineteenth century, some European intellectual people knew at least 5-8 languages, if not more – French, English, German, Italian, Latin, Greek, Spanish, Russian, and their mother tongue – one of those or any of the 22+ other important European & Mediterranean cultural languages - Dutch, Polish, Irish, Swedish, Norwegian, Danish, Portuguese, Romanian, Czech, Ukrainian, Serbian, Croatian, Bulgarian, Lithuanian, Latvian, Hungarian, Finnish, Turkish, Arabic, Hebrew, Yiddish or Ladino, and similar languages, creoles and dialects. Even in the twentieth century there are many intellectuals who are polyglots and who speak perfectly the languages that I speak only basically. I have learned 50+ languages but I don't master them.

In the twenty first century people know much less languages (until they adopt my recommendations on studying at least 5 languages at school), but they can translate automatically in an eBook texts in foreign languages, and introduce thousands of links to such books, complementing the forms of expressions with videos, films, songs, theater, lectures, photos, paintings, music, philosophy, as I have done in my books. Anyhow, my hero would have mastered in his virtual (and virtuous...) life at least those 30 cultural languages and even 36 (with Mandarin, Japanese, Hindi, Persian, Swahili, Korean), as he is a cosmopolitan and doesn't believe in European supremacy. Speaking many languages is essential in order to understand culture. All this in the tradition of the [Renaissance Men](#), [Encyclopedic Knowledge](#), and [Polymaths](#) of the past. I am not speaking of geniuses as Plato, Aristotle, Kant, Hegel, Bell, and of course Leonardo da Vinci, who were known to have an encyclopedic knowledge and excelled in all fields. I prefer to refer to one "contemporary" [Camille Saint-Saens \(1835-1921\)](#) who was such a polymath. He lived almost exactly as in my hero's life (born 15 years after 1820, dying 18 years before 1939), sharing cultural affinities.

But Jules Cheret's life is even more characteristic of this twelfty as he was born on 31 May 1836, 16 years after 1820, and died on 23 September 1932, 7 years before 1939. [Cheret](#) was a French painter and lithographer, who became a master of [Belle Époque](#) poster art. He has been called the father of the modern poster. Chéret created vivid poster ads for the [cabarets](#), [music halls](#), and theaters such as the [Eldorado](#), the [Olympia](#), the [Folies Bergère](#), [Théâtre de l'Opéra](#), the [Alcazar d'Été](#) and the [Moulin Rouge](#). He created posters and illustrations for the satirical weekly [Le Courrier français](#). His works were influenced by the scenes of frivolity depicted in the works of [Rococo](#) artists such as [Jean-Honoré Fragonard](#) and [Antoine Watteau](#). So much in demand was he, that he expanded his business to providing advertisements for the plays of troupes, festivals, for beverages and liquors, perfumes, soaps, cosmetics and pharmaceutical products. Eventually he became a major advertising force, adding railroad companies and manufacturing businesses to his client list.

The closest centenarians' models of the cultural protagonists in this twelfty are: 1. Juliette Adam who lived 100 years (1836-1936), very similar to the same years as the book's twelfty 1820-1939. She was an author, salonniere & feminist, who influenced Parisian's society. 2. Alexandre Gueniot (1832-1935), a French physician and author who lived from 1855 to 1935 in Paris and was a member of l'Academie de medicine since 1880 and its president since 1906. He is the author of many works in gynecology, on birds and bees, and books as "*Souvenirs de la guerre de 1870 et de la [Commune](#)*", and "Pour vivre cent ans". 3. Henry Richard Gibson (1837-1938) an American attorney and politician, who wrote and edited several books on federal and state law. He represented Tennessee in the US House of Representatives from 1895 to 1905. He worked as a professor of medical jurisprudence at the Tennessee Medical College from 1889 to 1906. In 1907 he published a 368-page epic poem.

My compatriot critics would criticize my writing of a virtual biography of a French person, not even Jewish, meeting Camille Saint-Saens and Victor Hugo, instead of wanting to be a

Zionist in the earlier days of Zionism or a colon in Palestine, also in the nineteenth century. Nevertheless, I have assigned an unproportionate segment of my book to the literatures of my origins – Zionist literature, Jewish – Hebrew, Ladino, Judeo-Arabic and Yiddish literatures, Spanish, Portuguese, Italian, Greek, Turkish and Arabic literatures. I don't expect either any gratitude from French/Europeans on the predilection/superlatives I bestow on their cultures, as they are convinced that they are the most significant, and don't need any reinforcement to that. A nation who contributed to the world in this twelfth - the literature of Emile Zola, the science of Louis Pasteur, the social science of [Emile Durkheim](#) - doesn't need my praise.

My hero Jacques Corot would like to meet the interesting authors and personalities: Ibsen, Strindberg, d'Annunzio, Nietzsche, Twain, Kipling, Conan Doyle, Wilde, Shaw, Jerome, Tagore, Freud, Thomas Mann, Heinrich Mann, Zola, Chekhov, Lorca, Mallarmé, Wells, Gide, Gorky, France, Lawrence, Joyce, James, Kafka, Einstein, Apollinaire, Scott Fitzgerald, Pirandello, Hasek, Tolstoy, Proust, Lewis, O'Casey, Hemingway, Brecht, Woolf, Faulkner, Remarque, Blasco Ibanez, Dos Passos, Somerset Maugham, London, Maupassant, Gilbert and Sullivan, Dostoevsky, Verne, Dumas père et fils, George Eliot, Disraeli, Lewis Carroll, Rimbaud, Flaubert, Marx, Dickens, Hugo, Gautier, Turgenev, Darwin, Baudelaire, Thackeray, Gaskell, Melville, Poe, the sisters Brontë, the brothers Goncourt, Balzac, Andersen, Gogol, Lermontov, Stendhal, Pushkin, Mickiewicz, Musset, Vigny, Goethe, Scott, Manzoni, Heine, Cooper, Machado de Assis, Herzl who wrote *Altneuland*, Shai Agnon after having published some of his stories, Eça de Queiroz, Martí, de Pereda, Galdós, Zorrilla, etc.

And he would want to meet until 1939 at least as youngsters Jean-Paul Sartre, André Malraux, Jean Anouilh, read the first novels - *Climats*, *Les silences du Colonel Bramble*, and biographies by [André Maurois](#), read [Thérèse Desqueyroux](#) by François Mauriac, [Antigone](#) by Jean Cocteau, [Topaze](#) and [Marius](#) by Marcel Pagnol. He would want to meet also political and social authors who were themselves outstanding personalities: first of all the authors on the Dreyfus Affair: Georges Clemenceau who wrote *Des Juges – Affaire Dreyfus*, and also *La mellee sociale*, Jean Jaures who wrote *Les Preuves – L'Affaire Dreyfus*, and also *Vers la republique sociale*, Colonel/General Georges Picquart who wrote *L'Affaire Picquart devant la cour de cassation*, Charles Peguy – one of my favorite authors who wrote *L'Argent* (that I read) and *Cahiers*, and of course Emile Zola – who wrote *L'Affaire Dreyfus – La verite en marche*. Other historical and military authors who became important statesmen and he would like to meet authors/leaders: Winston Churchill who wrote *The River War* and *Savrola*, Charles de Gaulle who wrote *L'ennemi et le vrai ennemi*, Theodor Roosevelt who wrote *The Winning of the West*, Trotsky who wrote *The War and the International*, Rosa Luxemburg who wrote *The Accumulation of Capital*, Gandhi who wrote *Hind Swaraj*, Lenin who wrote *Materialism and Empirio-Criticism & The Development of Capitalism in Russia*, and others.

He would like to meet prominent film directors and actors as [David Wark Griffith](#), [Charles Chaplin](#), [Mack Sennett](#), [Mauritz Stiller](#), [Ernst Lubitsch](#), [Buster Keaton](#), [Douglas Fairbanks](#), [Erich von Stroheim](#), [Greta Garbo](#), [Cecil B. DeMille](#), etc., theater actresses as Rachel and Sarah Bernhard and actors, famous composers and musicians, as Beethoven, Schubert, Weber, Chopin, Liszt, Brahms, Schumann, Grieg, Mendelssohn, Tchaikovsky, Offenbach, Verdi, Puccini, Rossini, Mahler, Gounod, Saint-Saëns, Bizet, Paganini, Debussy, Ravel, Berlioz, Arthur Rubinstein, etc., famous sculptors as Rodin, architects and city planners as Le Corbusier, Gustave Eiffel, and the Baron Haussmann, painters as Delacroix, [Courbet](#), [Honoré Daumier](#), [Claude Monet](#), Manet, [Edgar Degas](#), [Pierre-Auguste Renoir](#), [Camille Pissarro](#), [Pablo Picasso](#), [Toulouse-Lautrec](#), [Gauguin](#), Seurat, Van Gogh, Turner, Jules Cheret, etc. He would like to meet as well the most prominent scientists and inventors of his "generations" –

Einstein, Marie Curie, Niepce, Daguerre, Melies, Becquerel, Foucault, Pasteur, Breguet, Michelin, Bleriot, Renault. He would like to travel all over the world, meet Livingstone in Africa, visit India, Japan, and China, Mexico, Turkey, South America, all Europe and the US, Canada, Philippines, Indonesia, South Africa, Egypt, Morocco, Australia, Nigeria, Palestine.

This is of course just an outline of the virtual biography. Not even a synopsis, it couldn't be historical, as we know already the history, it wouldn't include also amorous intrigues. I wouldn't be too original if I would adopt Tolstoy's opening sentence in *Anna Karenina*, which was the first sentence that I learned in Russian: "Happy families are all alike; every unhappy family is unhappy in its own way". For people who have read it all, what can be new in describing the family problems of Hugo or Zola? So, it should be an intellectual novel, discovering new insights in cultural thoughts & talks of the most interesting persons described above – Ibsen could disclose who was his role model for Thomas Stockman and Churchill could tell about his plans. At least, this book would be a guideline for a cultural life of others.

As an alternative to this virtual biography, which some would call at least unpractical, one can write a novel based on the lives of two or three protagonists living in this twelfty in Paris and interacting with most of the who's who of the cultural life in Paris, French and foreigners, attending the premieres, having one or two salons, a "cultural novel", possibly inventing a new genre, half fiction half documentary. If we want to be surrealistic we could even imagine that like in a Japanese classic film, our soul goes back to heaven where everything is stored, so we can watch all the premieres and hear all the cultural conversations in Paris' salons, or even watch it all from a distant planet discovered by CoRoT, or travel back to the past, or maybe live forever at least virtually and contemplating this twelfty with the hindsight of 2020. All this is of course an excuse to write about the epoch I like most, in the city I love most, the most interesting events for a cultural person like me, with the people who interest me most. The question is: does it interest anybody? Well, it interests me, and I hope that at least a few dozen people will be interested on those topics, maybe a few hundred, so it is worth doing it!

The book actually consists of two main parts: 1. Culture in European Languages in the twelfty 1820-1939, as analyzed through my personal prism, with a unique contribution to understanding this culture in all its facets, putting an emphasis on literature and drama, with a comparative analysis of literature, arts and music, thoughts and quotes on significant literatures, and even a play with 36+ protagonists meeting at a Parisian Salon on 31/12/1899. 2. Attending the Best Premieres of plays, films, operas, classical music, ballets, events in Paris and the world from 1820 to 1939. Even if my hero would not attend all or most of these premieres, it would be exhilarating just to imagine that he could have attended those breakthrough premieres, with the most interesting people in Paris, France and the World. One could find of course all what he wants on the authors, composers, painters, premieres, books or films, on Wikipedia and many other sources, as I have done. I didn't mention the links to most of them, but they are very easy to find. But I have added to this book my personal approach which is holistic and cosmopolitan. However, as my knowledge does not encompass all the book's fields of interest, I have included also guest articles from prominent authors. In the third part of the book I include an Appendix with some interesting chapters, first of all encyclopediac chapters on this epoch, events and prominent cultural people, original essays on interesting topics, as well as data from Wikipedia, Encyclopedia Britannica, etc. on other topics. This book is not an academic book, so it is not written in a rigorous academic style, but rather as a personal voyage into this twelfty's culture. Finally, I include photos & pictures of cultural events, premieres, paintings, posters, salonnières, and of the paragons of science, culture, literature, art, music, theater, films, technology in the most inventive twelfty of all.

CULTURE IN EUROPEAN LANGUAGES IN THE “CENTURY”/TWELFTY 1820-1939

I believe that the most interesting twelfty in culture in European languages was the twelfty of 1820-1939. I admire of course classic Greek and Latin culture, plays, art & philosophy, the Bible in Hebrew, the Talmud in Aramaic, the classic playwrights, authors and poets Shakespeare, Racine, Corneille, Moliere, Cervantes, Dante, Goldoni, Camoens, Lope de Vega, Calderon de la Barca, Schiller, Voltaire, Rousseau & Marivaux. But in this 120-years era, such an outburst of culture in all fields is unprecedented – literature – novels, plays, poetry; art – painting, sculpture, architecture; classical music – symphonies, concerti, vocal; ballets, operas, including operettas & musicals; early films, philosophy, psychology, geography, economics, political science, linguistics, sociology, anthropology, science, biology, evolution, medicine, inventions - trains, airplanes, steamboats, electricity, telephone, gramophone, photography; business, democracy, human rights, welfare, education.

Just to mention a few of the most prominent authors and their books in this twelfty: William Faulkner's [*The Sound and the Fury*](#); Ernest Hemingway's [*A Farewell to Arms*](#); Alfred Döblin's [*Berlin Alexanderplatz*](#); Erich Maria Remarque's [*All Quiet on the Western Front*](#); D. H. Lawrence's [*Lady Chatterley's Lover*](#); Bertholt Brecht's [*The Threepenny Opera*](#); Federico Garcia Lorca's [*Gypsy Ballads*](#); Final instalment of Marcel Proust's [*In Search of Lost Time*](#); Virginia Woolf's [*To the Lighthouse*](#); Arthur Conan Doyle's [*The Case-Book of Sherlock Holmes*](#); Sinclair Lewis's [*Elmer Gantry*](#); Ernest Hemingway's [*The Sun Also Rises*](#); Sean O'Casey's play [*The Plough and the Stars*](#); Franz Kafka's *Das Schloß* ([*The Castle*](#)); F. Scott Fitzgerald's [*The Great Gatsby*](#); W. Somerset Maugham's [*The Painted Veil*](#); Virginia Woolf's [*Mrs. Dalloway*](#); Franz Kafka's *Der Prozeß* ([*The Trial*](#)); Mikhail Bulgakov's [*Heart of a Dog*](#); André Gide's [*The Counterfeiters*](#); John Dos Passos's [*Manhattan Transfer*](#); Thomas Mann's *Der Zauberberg* ([*The Magic Mountain*](#)); Jaroslav Hašek's [*The Good Soldier Švejk*](#); James Joyce's [*Ulysses*](#); T. S. Eliot's [*The Waste Land*](#); Hermann Hesse's [*Siddhartha*](#); Luigi Pirandello's play, [*Six Characters in Search of an Author*](#); F. Scott Fitzgerald's [*This Side of Paradise*](#); D. H. Lawrence's [*Women in Love*](#); Sinclair Lewis's [*Main Street*](#); Sigmund Freud's [*Beyond the Pleasure Principle*](#); W. Somerset Maugham's [*The Moon and Sixpence*](#); Albert Einstein's [*Relativity*](#); James Joyce's [*A Portrait of the Artist as a Young Man*](#); Franz Kafka's [*The Metamorphosis*](#); D. H. Lawrence's [*Sons and Lovers*](#); George Bernard Shaw's [*Pygmalion*](#); Guillaume Apollinaire's [*Alcools*](#); Thomas Mann's [*Death in Venice*](#); Gaston Leroux's [*The Phantom of the Opera*](#); read the 11th edition of [*Encyclopædia Britannica*](#) published, Rabindranath Tagore's [*Raja*](#); and so many others. While learning of the death of [*Leo Tolstoy*](#), [*Henrik Ibsen*](#), [*Anton Chekhov*](#), [*Oscar Wilde*](#), [*Émile Zola*](#), and many other prominent authors.

And even more - Anatole France's *L'île des Pingouins* ([*Penguin Island*](#)); August Strindberg's [*The Ghost Sonata*](#); Maxim Gorky's [*The Mother*](#); Henry James's [*The Golden Bowl*](#); M. R. James's [*Ghost Stories of an Antiquary*](#); Jack London's [*The Sea-Wolf*](#); William Henry Hudson's [*Green Mansions*](#); Władysław Reymont's [*The Peasants*](#); watch Anton Chekhov's play [*The Cherry Orchard*](#) first performed; Henry James's [*The Ambassadors*](#); Jack London's [*The Call of the Wild*](#); André Gide's [*The Immoralist*](#); Maxim Gorky's [*The Lower Depths*](#); [*Henry James' The Wings of the Dove*](#); Arthur Conan Doyle's [*The Hound of the Baskervilles*](#); Leo Tolstoy's [*The*](#)

[*Power of Darkness*](#); Thomas Mann's [*Buddenbrooks*](#); Anton Chekhov's [*Three Sisters*](#); Rudyard Kipling's [*Kim*](#); August Strindberg's [*A Dream Play*](#); L. Frank Baum's [*The Wonderful Wizard of Oz*](#); Joseph Conrad's [*Lord Jim*](#); Theodore Dreiser's [*Sister Carrie*](#); and reading [*The Lady with the Dog*](#) - [Anton Chekhov](#); [*The Interpretation of Dreams*](#) - [Sigmund Freud](#); [*When We Dead Awaken*](#) - [Henrik Ibsen](#); [*Paris*](#) - [Émile Zola](#); [*The War of the Worlds*](#) - [H. G. Wells](#); [*The Turn of the Screw*](#) - [Henry James](#); [*To Damascus*](#) - [August Strindberg](#); [*Uncle Vanya*](#) - [Anton Chekhov](#); [*Dracula*](#) - [Bram Stoker](#); [*Divagations*](#) - [Stéphane Mallarmé](#); [*The Invisible Man*](#) - [H. G. Wells](#); [*The Seagull*](#) - [Anton Chekhov](#); [*Inferno \(Strindberg\)*](#) - [August Strindberg](#); [*The Time Machine*](#) - [H. G. Wells](#); [*Jude the Obscure*](#) - [Thomas Hardy](#); [*Quo Vadis*](#) - [Henryk Sienkiewicz](#); [*The Importance of Being Earnest*](#) - [Oscar Wilde](#); [*The Jungle Books*](#) - [Rudyard Kipling](#); [*The Prisoner of Zenda*](#) - [Anthony Hope](#); [*Pan*](#) - [Knut Hamsun](#); [*The Adventures of Sherlock Holmes*](#) - [Sir Arthur Conan Doyle](#); [*Children of the Ghetto*](#) - [Israel Zangwill](#); [*Gunga Din*](#) - [Rudyard Kipling](#); [*Chitra*](#) - [Rabindranath Tagore](#); [*Diary of a Pilgrimage*](#) - [Jerome K. Jerome](#); [*Tess of the d'Urbervilles*](#) - [Thomas Hardy](#); [*"The Picture of Dorian Gray"*](#) - [Oscar Wilde](#); [*Hedda Gabler*](#) - [Henrik Ibsen](#); [*Hunger*](#) - [Knut Hamsun](#); [*Thus Spoke Zarathustra*](#) - [Friedrich Nietzsche](#); [*The Child of Pleasure*](#) - [Gabriele d'Annunzio](#); [*Three Men in a Boat*](#) - [Jerome K. Jerome](#); [*A Connecticut Yankee in King Arthur's Court*](#) - [Mark Twain](#), and by other prominent authors.

This book covers mainly literature in French, English, German, Spanish, Russian and Italian, but it covers other facets of culture - arts, music, theater, films, also Sciences, with people like [Louis Pasteur](#), who is renowned for his discoveries of the principles of [vaccination](#), [microbial fermentation](#) and [pasteurization](#). He is remembered for his remarkable breakthroughs in the causes and preventions of [diseases](#), and his discoveries have saved countless lives ever since. He reduced mortality from [puerperal fever](#), and created the first vaccines for [rabies](#) and [anthrax](#). His medical discoveries provided direct support for the [germ theory of disease](#) and its application in clinical medicine. He is best known to the general public for his invention of the technique of treating [milk](#) and [wine](#) to stop bacterial contamination, a process now called [pasteurization](#). He is regarded as one of the 3 main founders of [bacteriology](#), with [Ferdinand Cohn](#) & [Robert Koch](#), and is popularly known as the "father of microbiology".

In this part of the book we'll cover extensively Literature, but in order to put in perspective my findings and especially my comparative analysis, I decided to compare them to an objective indicator of excellence – the Nobel prizes. The Nobelists in Spanish, Russian & Italian literatures amount to 23 as compared to the 51 Nobelists in French, English & German literatures. So, if the Nobelists of those 3 literatures are about **45%** of the Nobelists of the 3 “leading” literatures, it probably indicates that those “leading” literatures are at least perceived by professional experts as most significant, or maybe only better known by the Nobel Committees, as it is very dangerous to rate cultures, literatures and authors, and I have proven it in my book which tried to devise a Culture Index. Nevertheless, and completely unrelated and unplanned, probably not by chance or by sheer coincidence, I have arrived to the same conclusion as the Nobel Committees in this book, as I found in my survey that in the era from 1820 to 1939 there were 200 important authors from the literatures in Spanish (80), Russian (70) and Italian (50), as compared to the 420 important authors from the literatures in French (160), English (140) and German (120), which is **47%**! So, “great” minds think alike, and at least in this case I have arrived to the same conclusion as the Swedish Nobel Prize Committees for Literature, which shows that we share the same taste in literature, or at least a same bias in favor of European culture... One should bear in mind that the basis of comparison is not exactly the same as I have compared the literatures in the 1820-1939 era, while the Nobel Committees have awarded the prizes for the whole 20th century and beyond.

LITERATURE

NOBEL PRIZES IN LITERATURE

Year	Picture	Laureate	Country	Language(s)	Genre(s)
1901		Sully Prudhomme (1839 – 1907)	 France	French	poetry, essay
1902		Theodor Mommsen (1817 – 1903)	 Germany	German	history, law
1903		Bjørnstjerne Bjørnson (1832 – 1910)	 Norway	Norwegian	poetry, novel, drama
1904		Frédéric Mistral (1830 – 1914)	 France	Provençal	poetry, philology
1904		José Echegaray (1830 – 1914)	 Spain	Spanish	drama

Year	Picture	Laureate	Country	Language(s)	Genre(s)
1905		Henryk Sienkiewicz (1846 – 1916)	 Poland ( Russian Empire)	Polish	novel
1906		Giosuè Carducci (1835 – 1907)	 Italy	Italian	poetry
1907		Rudyard Kipling (1865 – 1936)	 United Kingdom	English	novel, short story, poetry
1908		Rudolf Christoph Eucken (1846 – 1926)	 Germany	German	philosophy
1909		Selma Lagerlöf (1858 – 1940)	 Sweden	Swedish	novel, short story
1910		Paul von Heyse (1830 – 1914)	 Germany	German	poetry, drama, novel, short story

Year	Picture	Laureate	Country	Language(s)	Genre(s)
1911		Maurice Maeterlinck (1862 – 1949)	 Belgium	French	drama, poetry, essay
1912		Gerhart Hauptmann (1862 – 1949)	 Germany	German	drama, novel
1913		Rabindranath Tagore (1861 – 1941)	 India ( British Empire)	Bengali and English	poetry, novel, drama, short story, music, essay, philosophy, literary criticism, translation
1914					
1915		Romain Rolland (1866 – 1940)	 France	French	novel
1916		Verner von Heidenstam (1859 – 1940)	 Sweden	Swedish	poetry, novel

Year	Picture	Laureate	Country	Language(s)	Genre(s)
1917		Karl Adolph Gjellerup (1857 – 1919)	 Denmark	Danish and German	poetry
1917		Henrik Pontoppidan (1857 – 1943)	 Denmark	Danish	novel
1918					
1919		Carl Spitteler (1845 – 1924)	 Switzerland	German	poetry
1920		Knut Hamsun (1859 – 1952)	 Norway	Norwegian	novel
1921		Anatole France (1844 – 1924)	 France	French	novel, poetry

Year	Picture	Laureate	Country	Language(s)	Genre(s)
1922		Jacinto Benavente (1866 – 1954)	 Spain	Spanish	drama
1923		William Butler Yeats (1865 – 1939)	 Ireland	English	poetry
1924		Władysław Reymont (1867 – 1925)	 Poland	Polish	novel
1925		George Bernard Shaw (1856 – 1950)	 Ireland ^[37]	English	drama, literary criticism
1926		Grazia Deledda (1871 – 1936)	 Italy	Italian	poetry, novel
1927		Henri Bergson (1859 – 1941)	 France	French	philosophy

Year	Picture	Laureate	Country	Language(s)	Genre(s)
1928		Sigrid Undset (1882 – 1949)	 Norway (Born in Denmark)	Norwegian	novel
1929		Thomas Mann (1875 – 1955)	 Germany	German	novel, short story, essay
1930		Sinclair Lewis (1885 – 1951)	 United States	English	novel, short story, drama
1931		Erik Axel Karlfeldt (1864 – 1931)	 Sweden	Swedish	poetry
1932		John Galsworthy (1867 – 1933)	 United Kingdom	English	novel
1933		Ivan Bunin (1870 – 1953)	Stateless (Born in Russian Empire)	Russian	short story, poetry, novel

Year	Picture	Laureate	Country	Language(s)	Genre(s)
1934		Luigi Pirandello (1867 – 1936)	 Italy	Italian	drama, novel, short story
1935					
1936		Eugene O'Neill (1888 – 1953)	 United States	English	drama
1937		Roger Martin du Gard (1881 – 1958)	 France	French	novel
1938		Pearl Buck (1892 – 1973)	 United States	English	novel, biography
1939		Frans Eemil Sillanpää (1888 – 1964)	 Finland	Finnish	novel
1940

2016		Bob Dylan (b. 1941)	 United States	English	poetry, songwriting
2017		Kazuo Ishiguro (b. 1954)	 United Kingdom (born in Japan)	English	novel, screenplay, short story
2018		Olga Tokarczuk (b. 1962)	 Poland	Polish	novel, short story, poetry, essay, screenplay

Year	Picture	Laureate	Country	Language(s)	Genre(s)
2019		Peter Handke (b. 1942)	 <u>Austria</u>	German	novel, short story, drama, translation, screenplay
2020		Louise Glück (b. 1943)	 United States	English	poetry, essay

As Nobel Prizes were awarded until 1990 to 80 authors in our lists, who were active in the twelfty 1820-1939, I decided to give the whole list of Nobel Prizes, and I refer to the specific authors and prizes in the text. 80 Nobel Prizes were awarded to those authors from 28 countries (75 authors in European languages and 5 authors in non-European languages).

CORY'S LIST OF THE BEST AUTHORS IN THE TWELFTY 1820-1939, WITH COMMENTS AND LISTS OF BOOKS

The best literature epoch is in my opinion the “twelfty” of 1820-1939, where we can find illustrious authors, such as Victor Hugo, Emile Zola, Mark Twain, Lev Tolstoy, Henrik Ibsen, Fyodor Dostoyevsky, Anton Chekhov, Gustave Flaubert, August Strindberg, Oscar Wilde, Henry James, Gabriele d'Annunzio, Charles Dickens, George Eliot, Arthur Rimbaud, Emily Dickinson, Charles Baudelaire, Alexandre Dumas, Jules Verne, Balzac, the Bronte sisters, Johan Wolfgang von Goethe, Heinrich Heine, Nikolai Gogol, Alexander Pushkin, Washington Irving, Thomas and Heinrich Mann, Henry James, Andersen, Scott Fitzgerald...

I prefer the twelfty of 1820-1939 (in this book the “century” of 1820-1939 will be called a twelfty as it comprises 120 years), because it gathers most of the authors whom I love and appreciate most, the most modern authors, in a twelfty that was a breakthrough in all fields, in science, technology, democracy, independence of national entities, art – the impressionism, surrealism, expressionism, cubism, abstract – painting, sculpture, architecture, and the painters whom I like most: Renoir, Monet, Manet, Degas, Cezanne, Van Gogh, Pissarro, Sisley, Morisot, Guillaumin, Caillebotte, Cassatt, Seurat, Gauguin, Toulouse-Lautrec, in the 19th century, and in the 20th century – Dali, Chagall, Modigliani, Klimt, Magritte, Max Ernst, de Chirico, Munch, Tanguy, Soutine... and of course modern literature – poetry, novels, plays, biographies, philosophy. Finally, the music that I love most - [Pyotr Ilyich Tchaikovsky](#), [Antonín Dvořák](#), [Gustav Mahler](#), Chopin, Beethoven, Schubert, Weber, Max Bruch, Bizet, Stravinsky, Berlioz, Charles Gounod, Giuseppe Verdi, Giacomo Puccini, Jacques Offenbach, Claude Debussy, Maurice Ravel, Franz Liszt, Johan Strauss the son, Johannes Brahms, Anton Bruckner, Camille Saint-Saens, Nicolai Rimsky-Korsakov, Bedrich Smetana, Edvard Grieg, Jan Sibelius, Aaron Copland, and composers whom I love less but were nevertheless great: Richard Wagner, Bela Bartok, Alban Berg, Sergei Prokofiev. And also the excellent Musicals by Rodgers and Hart, Kurt Weill, Irving Berlin, Cole Porter, George Gershwin, and others...

But this was also a twelfty of some of the worst tragedies in history: the wars between Prussia with Austria and France, wars of independence, colonial wars, First World War, Pandemics, High Inflation, Imperialism, Colonialism, deaths of millions in the Soviet Union and in China, Civil wars in the US, Russia, Germany, France, Fascism, Nazism, Communism, Neoliberal Capitalism, famine, racism, anti-Semitism, diseases, earthquakes, unbridled crime... So, what is preferable to live in the most cultural and intellectual twelfty which was so tragic, or to live in our twelfty – the post-modern century of 1946-2045, in a democratic and educated world, with the highest standard of living ever, but with a rather tedious and boring literature, music and art, yet a century that makes them accessible to most of mankind free of charge in state museums, subsidized concert halls, online books accessible at no cost in Gutenberg Project, communications and Internet practically free of charge, the best healthcare, the highest longevity, the most ethical century in spite of all the scandals, corruption and Recessions.

A century with almost no wars... except of course the Israeli-Arab and Palestinians wars with thousands of casualties on both sides military and civilians, the Arab/Muslim fratricide civil wars between fundamentalists, seculars, Shiites, Sunnis, Christians, Daesh/ISIS, Hamas, Hizballah, Muslim Brothers, with hundreds of thousands of casualties in Algeria, Syria, Libya, Iraq, Afghanistan, Yemen, Sudan, Lebanon...(and yet all the hypocrites in the West, the UN, and the Muslim nations blame Israel only), the fratricide wars in Yugoslavia, the civil wars in Africa, the dictatorships in most of the developing countries, but not in such order of

magnitude as the World Wars. It suffices that a terrorist organization, or a genocide regime takes hold of nuclear weapons thus killing in one war millions of people. A fundamentalist suicide bomber would prefer of course to kill hundreds of thousands than to kill only one person with a knife, ten persons with his gun, a hundred persons with his explosives, thousands in 9/11 tragedy in New York & Washington, tens of thousands in fratricide wars...

In the 40 years which are in the focus of my list (1860-1899) there were the most significant breakthroughs in human history: but also in 1861-1865 – The American Civil War, a tragedy that changed the face of history and enabled the US to become the strongest nation in the world. 1863 – Formation of the International Red Cross, and also London Underground opens. 1866 – Successful transatlantic telegraph cable, and also Alfred Nobel invents dynamite. 1869 – First transcontinental railroad in the US, and also Dmitri Mendeleev created the Periodic Table. Finally, the Suez Canal opens. 1870-1871 – The Franco-Prussian War results in the unifications of Germany and Italy, the collapse of the Second French Empire, and the emergence of a New Imperialism. 1871-1914 – Second Industrial Revolution. 1872 – Yellowstone, the first National Park is created. 1873 – Maxwell's A Treatise of Electricity and Magnetism is published. 1876 – 1879 – 13 million Chinese die of famine in Northern China. 1876-1914 – The massive expansion in population, territory, industry and wealth in the US is referred to as the Gilded Age. 1877 – Great Railroad Strike in the US – the world's first nationwide labour strike. 1877 – Thomas Edison invents the phonograph. 1878 – First commercial telephone exchange in New Haven, Connecticut. 1879 – Thomas Edison tests his first light bulb. 1881 – Wave of pogroms begins in the Russian Empire. 1881 – First electrical power plant and grid in Godalming Britain. 1881-1882 – France establishes free secular education. 1885 – Louis Pasteur creates the first successful vaccine against rabies. 1885 – Singer begins production of the most popular model of sewing machine. 1886 – Karl Benz sells the first commercial automobile. 1888 – Louis le Prince records the Roudhey Garden Scene, the earliest surviving film. 1889 – Eiffel Tower is inaugurated in Paris, and also – Aspirin patented. 1890 – Clement Ader attempted a flight of the Eole, that took off, reaching a height of 20 cm and flew uncontrolled for 50 m. 1892 – John Froelich develops and constructs the first gasoline-petrol-powered tractor. 1893 – New Zealand becomes the first country to enact women's suffrage. 1894 – First commercial film released by Jean Aime Le Roy. 1894 – First gramophone record. 1894-1906 – Dreyfus Affair in France. 1895 – Wilhelm Roentgen identifies x-rays. 1896 – Olympic Games rewind in Athens. 1896 – Henri Becquerel discovers radioactivity, and also – J. J. Thomson identifies the electron. 1899-1900 – Indian famine kills over 1 million people. Those are indeed the most salient or tragic events.

The list of the authors in the twelfty 1820-1939, comprises first of all the authors who wrote most of their works in this period, but also a few authors who wrote only some of their works in this period. This period encompasses in my opinion the most significant, versatile & cosmopolitan literature that mankind has ever produced in human history, at least in most of the European languages. The order in the lists of the authors is not according to their importance and contribution to the world's culture. Some of the authors wrote also before or after the twelfty's lists. We have divided the literatures according to their languages and not their countries, as a literature in a language may encompass literatures in different countries, such as German language (Germany, Austria), English language (UK, US), Spanish language (Spain, Latin America), Portuguese (Portugal, Brazil). We have differentiated the literatures according to their significance. Significant in the meaning of prominent, outstanding, famous, everlasting, prestigious, esteemed, renowned, prolific, influential, leading, well-known. But not in the meaning of important, better, greater, major-league, superior, high ranking. As no culture or literature is better than others, superior, higher ranking, all are important & worthy.

CORY'S LIST OF THE BEST AUTHORS IN TWELFTY 1820-1939

This book is focused on French and Europe, and so we'll start this survey on the French best authors in the most prolific twelfty of 1820 to 1939. From there we'll continue to the other most significant literatures, as defined above, the more significant, the significant, and the other European literatures. In total a list of the 1000 best authors in the twelfty 1820-1939. We'll complement this list with a comprehensive list of the Jewish languages literatures and a non-comprehensive list of five of the Non-European literatures, which is only indicative. We have not ranked the literatures according to their importance as all are important, but according to their significance to culture, to humanity, to posterity, to the life of everyone of us. Authors are however more important, best or superior, and centuries are also more prolific, innovative or pioneering. Men and women are of course equal according to their rights but not according to their achievements, as some of them have achieved better and more results in their lives, and thus the Nobel Prize Committee chooses the best authors each year & throughout the last century & beyond, but doesn't choose of course the best literature.

THE 3 MOST SIGNIFICANT LITERATURES – FRENCH, ENGLISH, GERMAN

1. **FRENCH:** in the years 1860-1899: Emile Zola, Victor Hugo, Guy de Maupassant, Gustave Flaubert, Alexandre Dumas pere, Theophile Gautier, Stephane Mallarme, George Sand, Edmond Rostand, Alexandre Dumas fils, Arthur Rimbaud, Georges Courteline, Georges Feydeau, Paul Verlaine, Charles Baudelaire, Jules Verne, Eugene Labiche, Emile Augier, Henri Meilhac, Ludovic Halevy, Theodore de Banville, Leconte de Lisle, Henri de Reigner, Alfred Jarry, Joris-Karl Huysmans, Anatole France (Nobel 1921), Alphonse Daudet, La comtesse de Segur (children books), Paul Feval, Jules Valles, Prosper Merimee, Jules Barbey d'Aureville, Les Freres de Goncourt (Edmond et Jules), Sully Prudhomme (Nobel 1901), Maurice Maeterlink (Nobel Belgium 1911), Frederic Mistral (Nobel 1904, wrote in Provençal), Victor Cherbuliez (Switzerland), Louis-Honore Frechette (French Canada), Oswald Durand (Haiti, wrote in Haitian), Edouard David (wrote in Picard). **I underline in this book the authors I like most, but it doesn't mean necessarily that they are the best.**

In total 40 authors who wrote in 4 languages: French (37), Provençal (1), Haitian (1), Picard (1), the last three are in the French languages family. They come from 5 countries: France (36), Belgium (1), Switzerland (1), Canada (1), Haiti (1). As I know much more French literature from France and in French, the literature in the other languages and countries is merely indicative, and does not encompass the whole literature of Canada, Haiti or Belgium. However, I have studied the other languages of the French family, I read books in those languages, and in other French family languages, as Gascon, and I try at least to mention the literature in those languages and in other French speaking countries. The 40 last years of the 19th century was maybe the best period ever of the French literature with Giant Novelists as Emile Zola, Victor Hugo, Gustave Flaubert, Alexandre Dumas, Guy de Maupassant, George Sand, Anatole France, Alphonse Daudet, Jules Verne, Giant Poets as Victor Hugo, Arthur Rimbaud, Paul Verlaine, Charles Baudelaire, Stephane Mallarme, Theophile Gautier, Frederic Mistral, and Giant Playwrights as Victor Hugo, Edmond Rostand, Georges Courteline,

Georges Feydeau, Eugene Labiche, Maurice Maeterlink. I prefer this epoch in French literature, painting & music over the whole period of the 20th century. However, if we add to this period the first 4 decades of the 20th century 1900-1939 it comprises most of the best French authors of that century. And if we comprise the best authors of the decades 1820-1859 we come to the conclusion that the best twelfthly ever for French Literature was 1820-1939. It could be also 1830-1929 or 1840-1949, and it doesn't matter if we add or subtract a few years, as this twelfthly or 120 years encompasses the romantic, naturalist & modernist epochs.

If we add to this list the French authors in the years 1900-1939 – the last 40 years of the twelfthly 1820-1939 reviewed in this book, we can find 100 very prominent authors such as: Marcel Proust, Andre Gide (Nobel 1947), Joseph Kessel, Tristan Tzara, Andre Breton, Marcel Pagnol, Paul Eluard, Jean Cocteau, Georges Bernanos, Sait-John Perse (Nobel 1960), Blaise Cendrars, Roland Dorgeles, Francis Carco, Pierre Benoit, Alain-Fournier, Jules Romains, Andre Maurois, Francois Mauriac (Nobel 1952), Sacha Guitry, Georges Duhamel, Jean Giraudoux, Roger Martin du Gard (Nobel 1937), Leon Werth, Guillaume Apollinaire, Jacques Bainville, Max Jacob, Charles Peguy, Claude Simon (Nobel 1985), Louis Artus, Pierre Louys, Paul Valery, Henry Bataille, Paul Fort, Henri Barbusse, Colette, Emile Guillaumin, Paul Claudel, Francis James, Gaston Leroux, Charles Maurras, Hector Malot, Victorien Sardou, Francois Coppee, Octave Mirbeau, Paul Bourget, Rene Bazin, Emile Verhaeren, Jean Moreas, Jules Lemaitre, Gustave Kahn, Henri Bergson (Nobel 1927), Michel Zevaco, Paul Roux, Paul Adam, Maurice Barres, Maurice Leblanc, Jules Renard, Tristan Bernard, Romain Rolland (Nobel 1915), Marcel Schwob, Alain, Andre Malraux, Albert Cohen, Jean-Paul Sartre (Nobel 1964), Henry de Montherlant, Elsa Triolet, Louis Aragon, Marcel Achard, Armand Salacrou, Antoine de Saint-Exupery, Jacques Prevert, Julien Green, Nathalie Sarraute, Marcel Ayme, Louise de Vilmorin, Vercors, Raymond Queneau, Raymond Radiguet, Robert Desnos, Georges Simenon, Marguerite Yourcenar, Raymond Aron, Samuel Beckett (Nobel Ireland 1969), Claude Levi-Strauss, Jean Anouilh, Jean Giono, Henri Troyat, Edmond Jabes, Albert Camus (Nobel 1957), Romain Gary, Simone de Beauvoir, Maurice Dekobra, Eugene Sue, Pierre Loti, Pierre Souvestre, Marcel Allain, etc. And this is just a partial indicative list...

We can add to this list 20 authors from 1820 to 1859, not so many perhaps but they include some of the best French authors of all times: Francois-Rene de Chateaubriand, Pierre-Jean de Beranger, Charles Nodier, Felicite Robert de Lammenais, Henri-Beyle dit Stendhal, Marceline Desbordes-Valmore, Alphonse Lamartine, Alfred comte de Vigny, Honore de Balzac, Alfred de Musset, Charles-Augustin Sainte-Beuve, Gerard de Nerval, Pierre-Joseph Proudhon, Alexis de Tocqueville, Ernest Renan, Hippolyte Taine, Eugene-Francois Vidocq, Theophile Marion Dumersan, Francois Guizot, Theodore Leclercq, and so many others.

14 authors from the above list won the Nobel Prize (**12** French, 1 Belgian in French, 1 Irish in French, 7 in the period 1901-1939, 7 in the period 1940-1985 for authors who were active also before 1940). This is exactly the same number of Nobel Prize laureates - **14** (US – **6**, UK – **5**, Ireland in English – 2, Australia - 1) - who won the Prize in literature in English, 7 in the period 1901-1939 and 7 in the period 1940-1973 for authors who were active also before 1940. **9** authors won the Nobel Prize in literature in German (Germany – **5**, Switzerland in German – 2, Sweden in German – 1, Bulgaria in German – 1), 6 in the period 1901-1939, 3 in the period 1940-1981 for authors who were active before 1940. But if we compare the Nobel Prizes by country and not by language, we see the clear predominance of France: **12**, as compared to US – **6**, UK – **5**, Germany – **5**, Sweden – **6**, twice as much Nobel Prizes than any other country! This is indeed a significant difference by all standards, unparalleled since then.

In total there were **160** excellent authors who wrote in French in this twelfth century. I deal at length in the chapter about French literature on some of the best French authors and books. The French literature in this twelfth century of 1820-1939 is by far the most significant in the world for several reasons. Not because of the number of authors which I have found – **160** as compared to **140** in English and **120** in German. Another book could have reached other results, as this is not an outstanding statistical significance. The main reasons are – that the French literature is almost exclusively the literature of France, while the American, English and Irish in English literatures are quite different and so are the German, Austrian and Swiss German literatures. We see it in the Literature Nobel Prizes which are twice as much in this period than in any other country. Furthermore, almost all the French authors wrote in Paris, while some of them were born elsewhere but almost all of them operated in Paris. So as a country France is by far the most influential, and Paris as a city is by far the most influential, and that is why the center of gravity of the culture in this twelfth century of 1820 to 1939 is France and Paris, as no other country or city can compare to them then. But if we compare the quality of the authors, the chef d'oeuvres that they wrote, they exceed as a group if not individually by far other literatures and authors – Hugo, Zola, Balzac, Proust, Pagnol, Dumas, Maupassant, Chateaubriand, Stendhal, Flaubert, Vigny, Lamartine, Musset, Baudelaire, Gide, Mauriac, Maurois, Camus, Sartre, Rostand, Feydeau, Verne, Rimbaud, Verlaine, Aragon, Duhamel, Anatole France, Cocteau, Giraudoux, Prevert, Bergson, Rolland, Malraux, Anouilh, Camus, Beauvoir, etc. Who can compare with such a team, with such “36 Righteous”, not even the literatures of UK, US, Germany, Austria, Italy, Russia, Spain! This is la crème de la crème of World literature, the most significant ever! This is an extraordinary achievement as France, UK and Germany are very similar in their population and their cultural history, but French literature in this period is much more significant by far than the other literatures. However, Germany was much more prolific in this period in music and UK/US excelled in technology.

2. **ENGLISH:** in the years 1860-1899: Henry James (US), Charles Dickens, Oscar Wilde (Irish), Mark Twain (US), Alfred Lord Tennyson, Emily Dickinson (US), George Eliot, Samuel Butler, Thomas Hardy, Elizabeth Gaskell, Walt Whitman (US), Robert Browning, W.S. Gilbert, Robert Louis Stevenson, Howard Pyle (US), Henry Rider Haggard, Lew Wallace (US), Frances Hodgson Burnett (US), Jerome K. Jerome, Louisa May Alcott (US), Anthony Trollope, Israel Zangwill, Anthony Hope, Nathaniel Hawthorne (US), Harriet Beecher Stowe (US), Henry David Thoreau (US), Lewis Carroll, George Meredith, Herman Melville (US), William Dean Howells (US), Sheridan Le Fanu (Irish), Dante Gabriel Rossetti, B. C. Stephenson, Elizabeth Barrett Browning, John Millington Synge (Irish), Augusta Lady Gregory (Irish), Charles G. D. Roberts (Canada), Miles Franklin (Australia), Katherine Mansfield (New Zealand), Samuel Selvon (in Creolized English, Trinidad). In total 40 authors, 4 of them: James, Dickens, Wilde and Twain, were among the best authors of the English literature, and among the best world authors in all times.

The 40 authors wrote in 2 languages: English (39), Creolized English (1). They come from 6 countries: UK (19), US (13), Irish (4), Canada (1), Australia (1), New Zealand (1), Trinidad (1). As I know much more English, Irish, and American literature the literature from the other countries is merely indicative, and does not encompass the whole literature of Canada, Australia, New Zealand and the Caribbean. I try at least to mention the literature in other English speaking countries. In the last 40 years of the 19th century the authors from England were better and more numerous, but in the 20th century the American authors took the lead. Some would say that the 20th century authors (English, Irish and American) are much better than the whole 19th century authors, but this is arguable - do authors in English excel in

modern style? I personally prefer by far the 20th century literature in English, and especially from the US, however, even in this century the most prolific period was from 1900 to 1939.

If we add to this list the authors in English (American, British and Irish) in the years 1900-1939 – the last 40 years of the twelfth 1820-1939 reviewed in this book, we can find 70 very prominent authors such as: Joseph Conrad, George Bernard Shaw (Nobel Ireland 1925), William Butler Yeats (Nobel Ireland 1923), Edward Thomas, Wilfred Owen, Isaac Rosenberg, Siegfried Sassoon, Sean O'Casey, H.G. Wells, John Galsworthy (Nobel 1932), E.M. Forster, Walter de la Mare, T.S. Eliot (Nobel UK 1948), Dorothy Richardson, D.H. Lawrence, James Joyce, Virginia Woolf, David Jones, James Hanley, Harold Heslop, Aldous Huxley, John Cowper Powys, Graham Greene, W.H. Auden, Stephen Crane, Theodore Dreiser, Upton Sinclair, Sinclair Lewis (Nobel US 1930), Edwin Markham, William Vaughn Moody, Henry Adams, Pauline Hopkins, Sir Winston Churchill (Nobel UK 1953), Maria Cristina Mera, Gertrude Stein, Ezra Pound, Patrick White (Nobel Australia 1971), F. Scott Fitzgerald, Ernest Hemingway (Nobel US 1954), Sherwood Anderson, William Faulkner (Nobel US 1949), John Dos Passos, Tennessee Williams, Arthur Miller, John Steinbeck (Nobel 1962), William Saroyan, Pearl S. Buck (Nobel US 1938), Nathanael West, James Agee, Henry Miller, Margaret Mitchell, Eugene O'Neill (Nobel US 1936), Arthur Conan Doyle, James Hadley Chase, Raymond Chandler, Agatha Christie, Ayn Rand, W. Somerset Maugham, Dylan Thomas, Clifford Odets, Robert Frost, Noel Coward, Arthur Koestler, Isaac Asimov, A. J. Cronin, Bertrand Russell (Nobel UK 1950), Rudyard Kipling (Nobel UK 1907), Anais Nin, Lawrence Durrell, Howard Fast, and so many other excellent authors.

To those authors we add the 30 authors who wrote in English in the first four decades of our twelfth 1820-1859: Percy Bysshe Shelley, John Keats, and George Gordon Byron, 6th Baron Byron, known simply as Lord Byron, all three poets died in the first years of the 1820s; James Fenimore Cooper, Washington Irving, William Cullen Bryant, Edgar Allan Poe, Seba Smith, Benjamin Penhallow Shillaber, Johnson J. Hooper, Thomas Bangs Thorpe, George Washington Harris, James Russel Lowell, Henry Wadsworth Longfellow, Oliver Wendell Holmes Sr., Ralph Waldo Emerson, Sir Walter Scott, the last works by William Wordsworth, Mary Shelley, Samuel Taylor Coleridge, Robert Southey, Felicia Hemans, Letizia Elizabeth Landon, Benjamin Disraeli, Charles Kingsley, John Ruskin, William Makepeace Thackeray, Charlotte Bronte, Emily Bronte, Anne Bronte...

The number of Nobel Prize laureates who wrote in English in 1820-1939 amounts to - **14** (US – **6**, UK – **5**, Ireland in English – **2**, Australia - **1**), **7** in the period 1901-1939 and **7** in the period 1940-1973 for authors who were active also before 1940. There is no predominance of the US laureates compared to the British laureates in twelfth 1820-1939, they are quite equal.

Altogether we have here a list of **140** authors who wrote in English in the twelfth 1820-1939. I deal at length in the chapter about literature in English on some of its best authors & books.

3. GERMAN: in the years 1860-1899: Gerhard Hauptmann (Nobel Germany 1912), Theodor Mommsen (Nobel Germany 1902), Friedrich Nietzsche, Theodor Storm, Theodor Fontane, Gottfried Keller (Switzerland), Conrad Ferdinand Meyer (Switzerland), Detlev von Liliencron, Gustav Freitag, Wilhelm Raabe, Wilhelm Busch, Adalbert Stifter (Austria), Carl Spitteler (Nobel Switzerland 1919), Paul Johann Ludwig Heyse (Nobel Germany 1910), Rudolf Christoff Eucken (Nobel Germany 1908), Leopold von Sacher-Masoch (Austrian), Bertha von Suttner (Nobel Peace Prize, Austrian), Marie von Ebner-Eschenbach (Austrian), Ferdinand von Saar (Austria), Peter Rosegger (Austria), Klaus Groth (in Plattdeutsch,

Germany), Michel Rodange (in Luxembourgish, Luxembourg), Auguste Lustig (in Alsatian, France), Auguste Corrodi (in Schwyzerdutsch, Switzerland). The German authors in the 20th twelfty (and especially in the first 40 years) were by far more numerous and better than the authors in the last 40 years of the 19th century, however, if we compare the whole 19th century to 20th century, some would say that 19th century was better.

In total 24 authors who wrote in 5 languages: German (20), Plattdeutsch (1), Luxembourgish (1), Alsatian (1), Schwyzerdutsch (1). They come from 5 countries: Germany (12), Austria (6), Switzerland (4), France (1), Luxembourg (1). As I know more German and Austrian literature in German, the literature in the other languages and countries is merely indicative, and does not encompass the whole literature in Plattdeutsch/Alsatian/Luxembourgish/Schwyzerdutsch in Switzerland, France, Germany, and Luxembourg. However, I have studied the other languages of the German family, I read books in those languages and in other Germanic languages, as Bavarian, and I try at least to mention the literature in those languages and in other Germanic languages countries.

If we add to this list the authors who wrote in German (German, Austrian, Swiss, Czech...) in the years 1900-1939 – the last 40 years of the twelfty 1820-1939 reviewed in this book, we can find 20 very prominent authors such as: Franz Kafka (Czech), Thomas Mann (Nobel Germany 1929), Bertolt Brecht, Heinrich Mann, Sigmund Freud (Austria), Hans Fallada, Stefan Zweig (Austria), Hannah Arendt, Franz Werfel (Austrian), Arthur Schnitzler (Austrian), Robert Musil (Austrian), Rainer Maria Rilke (Austrian), Erich Maria Remarque, Erich Kaestner, Lion Feuchtwanger, Herman Hesse (Nobel Switzerland 1946), Vicky Baum (Austrian), Hans Habe (lived in Hungary, Austria, France, Switzerland and the US), Max Frisch (Swiss), Elias Canetti (born in Bulgaria, lived also in Germany, Austria, UK and Switzerland, Nobel Bulgaria 1981).

We can add 29 more prominent authors who wrote in those years: Georg Trakl, Werner Bergengruen, Ricarda Huch, Walter von Molo, Friedrich Reck-Malleczewen, Carl von Ossietzky was awarded the Peace Nobel Prize in 1935, Georg Heym, Ernst Juenger, Frank Thiess, Georg Kaiser, Paul Scheerbart, Reinhard Sorge, Walter Hasenclever, Arnolt Bronnen, Jakob van Hoddis, Gottfried Benn, Christa Winsloe, Klaus Mann, Alfred Doeblin, Ernst Toller, August Stramm, Anna Elizabet Weirauch, Erich Ebermayer, Herbert Marcuse, Gertrud Fussenegger, Else Lasker-Schueler, Ernst Wiechert, Reinhold Schneider and Hans Blueher.

I like very much German literature, and I try to read as much as possible in German, with dictionaries or translations. However, I read most of the German books in translation – Kafka, Freud, Fallada, Arendt, Werfel, Rilke, but I read also Thomas Mann, Heinrich Mann, Bertolt Brecht, Lion Feuchtwanger in German with a translation, and I manage to read fluently without translations books in German by Remarque, Stephan Zweig, and Arthur Schnitzler. The German literature in the 20th century is undoubtedly one of the best ever, including the unique Kafka, Brecht, Thomas Mann, Heinrich Mann, Fallada, and the excellent Stefan Zweig, Werfel, Schnitzler (I even saw La Ronde in Paris with the couple Emmanuelle Beart and Daniel Auteuil), Feuchtwanger, Werfel, and my favorite novel writer Remarque. I have quoted and written at length in this book about the plays by Bertolt Brecht that I teach at my business ethics courses, and I have analyzed in my books the Freudian concepts of Business Ethics. I have read biographies on Thomas and Heinrich Mann, Brecht, Freud & many others.

I tried to be objective, but it is amazing that in the first 4 decades of the 20th century, with the fiercest anti-Semitism in history instigated by the German and Austrian Nazi party, more than

half of the best authors who wrote in German were Jewish, the highest percentage of Jewish authors in any of the languages, except Hebrew... Some of the wives of the Christian authors were Jewish as well (as Thomas Mann and Heinrich Mann's wives) and most of the German and Austrian authors had to flee their country when the Nazis took power.

We bring hereafter an article on the Exile Literature.

German Exilliteratur (exile literature) is the name for a category of books in the [German language](#) written by writers of [anti-nazi](#) attitude who fled from [Nazi Germany](#) and its occupied territories between 1933 and 1945. These [dissident](#) authors, many of whom were of [Jewish origin](#) or with [communist](#) sympathies, fled abroad in 1933 after the [Nazi Party](#) came to power in Germany and after Nazi Germany [annexed Austria](#) by the [Anschluss](#) in 1938, abolished the [freedom of press](#) and started to prosecute the authors whose books were [banned](#). Many of the European countries where they found refuge were later occupied by Nazi Germany as well, which caused them again to look for safety elsewhere, by emigrating to the [United States](#) or taking cover in the "[underground](#)". Between 1933 and 1939, prolific centers of German exile writers and publishers emerged in several European cities, like Paris, Amsterdam, Stockholm, Zürich, London, Prague, Moscow as well as across the Atlantic in New York, Los Angeles, and Mexico. Well known for their publications were the publishers [Querido Verlag](#) and [Verlag Allert de Lange](#) in Amsterdam and Oprecht in Zürich. They served the German community outside Germany with critical literature, and their books were also smuggled into Nazi Germany.

The best known exile writers include [Theodor Adorno](#), [Hannah Arendt](#), [Bertolt Brecht](#), [Hermann Broch](#) (Austrian), [Ernst Bloch](#), [Alfred Döblin](#), [Lion Feuchtwanger](#), [Bruno Frank](#), [Oskar Maria Graf](#), [Hermann Hesse](#), [Max Horkheimer](#), [Heinrich Eduard Jacob](#), [Hermann Kesten](#), [Annette Kolb](#), [Siegfried Kracauer](#), [Else Lasker-Schüler](#), [Emil Ludwig](#), [Heinrich Mann](#), [Klaus Mann](#), [Erika Mann](#), [Thomas Mann](#), [Ludwig Marcuse](#), [Robert Musil](#), [Robert Neumann](#), [Erich Maria Remarque](#), [Ludwig Renn](#), [Joseph Roth](#) (Austrian), [Alice Rühle-Gerstel](#) and [Otto Rühle](#), [Nelly Sachs](#) (Nobel Sweden 1966), [Felix Salten](#) (Austrian), [Anna Seghers](#), [Franz Werfel](#), [Bodo Uhse](#), [Max Brod](#) (Czech), and [Arnold Zweig](#). The authors [Walter Benjamin](#), [Walter Hasenclever](#), [Ernst Toller](#), [Kurt Tucholsky](#), [Ernst Weiss](#) (Austrian), and [Stefan Zweig](#) committed suicide in exile. I have read books by many of those authors, and those who were not included in the former lists of the best authors, could be added as well to the list, as Kurt Tucholsky, whose book *Castle Gripsholm* I have read in Interlingua... **Max Brod** was a [German-speaking Czech Jewish](#), later [Israeli](#), author, composer, and journalist. Although he was a prolific writer in his own right, he is most famous as the friend and biographer of [Franz Kafka](#). As Kafka's [literary executor](#), Brod refused to follow the writer's instructions to burn his life's work, and had them published instead. So, we owe him the publication of Kafka's books! Without him world literature would be quite different than what it is, as Kafka had a major contribution to world literature. We could live well if Stefan Zweig would not have existed, but the world literature would be much poorer without Kafka!

Most of the exile writers cited above were probably the best German writers of their epoch, and if we have to draw up a list in excess of the previous best authors, we would include most of them if not all of them. Actually, 26 of them were not included in the other lists. I have not found any of them who do not deserve to be included in the list of the best German authors of the twentieth century. Some of the authors appear in the list of the best authors, such as Thomas Mann, Heinrich Mann, Franz Werfel, Stefan Zweig and Lion Feuchtwanger. What is amazing is that I have tried to find good authors who collaborated with the Nazis and I have

not found any. Maybe I am biased or the researchers are biased. Anyhow, there is an additional category of Inner Emigration – German authors who did not emigrate but remained in Germany during the war without being Nazis, sometimes retiring from their occupations in order not to clash with the government. In this category we find authors as Hans Fallada and Erich Kästner included in the list of best authors and also in the list of the other authors.

A category of his own is the Austrian/British/Jewish/Catholic [Ludwig Wittgenstein](#) (1889-1951), a philosopher who worked primarily in [logic](#), the [philosophy of mathematics](#), the [philosophy of mind](#), and the [philosophy of language](#). From 1929 to 1947, Wittgenstein taught at the [University of Cambridge](#). During his lifetime he published just one slim book, the 75-page [Tractatus Logico-Philosophicus](#) (1921), one article, one book review and a children's dictionary. His voluminous manuscripts were edited and published posthumously. [Philosophical Investigations](#) appeared as a book in 1953, and by the end of the century it was considered an important modern classic. His teacher [Bertrand Russell](#) described Wittgenstein as "the most perfect example I have ever known of genius as traditionally conceived; passionate, profound, intense, and dominating". Wittgenstein, born in [Vienna](#) into one of Europe's richest Jewish families, and Hitler were born just six days apart, though Hitler had been held back a year, while Wittgenstein was moved forward by one, so they ended up two grades apart at the *Realschule*. Monk estimates they were both at the school during the 1904–1905 school year, but says there is no evidence they had anything to do with each other.

Altogether I included 76 important authors who wrote in German in the years 1900-1939.

The 20 important authors who wrote in German in the years 1820-1859 were: [Johann Wolfgang von Goethe](#), [Georg Wilhelm Friedrich Hegel](#), [Friedrich Hölderlin](#), August Schlegel, Friedrich Schlegel, Friedrich Schleiermacher, Ludwig Tieck, Ludwig Uhland, [Arthur Schopenhauer](#), Joseph Freiherr von Eichendorff, Annette von Droste Hülshoff, Adelbert von Chamisso, Eduard Mörike, Karl Gutzkow, Heinrich Laube, Theodor Mundt, Rudolf Wienbarg, Ludwig Boerne, [Heinrich Heine](#), [Georg Büchner](#), Willibald Alexis.

9 authors won the Nobel Prize in literature in German (Germany – 5, Switzerland in German – 2, Sweden in German – 1, Bulgaria in German – 1), 6 in the period 1901-1939, 3 in the period 1940-1981 for authors who were active before 1940. Only half of the authors were German, while the others were Swiss German, or wrote in German although they were Swede or born in Bulgaria. It is worth to mention that the Austrian literature gave us many prominent authors who did not win the Nobel Prize or who were active prior to the 20th century.

The most important authors who wrote in German in 1820 to 1939 amount therefore to **120**.

In total, the best authors in the twelfth's most significant European literatures in French, English & German languages amount to **420 – 160** in French, **140** in English, **120** in German.

THE 3 MORE SIGNIFICANT LITERATURES – SPANISH, RUSSIAN, ITALIAN

4. **SPANISH:** in the years 1860-1899: Jose Maria de Pereda, Jose Zorilla, Miguel de Unamuno, Gustavo Adolfo Becquer, Ramon de Campoamor, Gaspar Nunez de Arce, Juan Valera, Benito Perez Galdos, Leopoldo Alas "Clarín", Armando Palacio Valdes, Marcelino Menendez Y Pelayo, Jose Marti (Cuba), Ruben Dario (Nicaragua), Manuel Gonzalez Prada (Peru), Rosalia de Castro (Galego), Angel Guimera (Catalan), Pachin de Melas (Asturianu), Nikolas Ormaetxea/Orixe (Basque). In total 18 authors in 5 languages: Spanish (14), Galego (1), Catalan (1), Asturianu (1), Basque (1) and in 4 countries: Spain (15), Nicaragua (1), Cuba (1), Peru (1). As I know more Spanish literature, the literature in the other languages is merely indicative, and does not encompass the whole literature in Catalan/Galego/Asturianu/Basque.

However, I have studied the other languages of the Spanish family (except Basque which is not in the Spanish family), I read books in those languages and in other Spanish languages, as Aragonese, and I try at least to mention the literature in those languages. I prefer by far the Spanish and Latin American literature of the 20th century compared to the 19th. I know also much less Latin American literature in the 19th century (and much more in the 20th century), although all of us have heard about the famous Jose Marti. A Cuban/Latin American hero, who was killed in battle against the Spaniards, wrote: "No me entierren en lo oscuro/ A morir como un traidor/ Yo soy bueno y como bueno/ Moriré de cara al sol." ("Do not bury me in darkness / to die like a traitor / I am good, and as a good man / I will die facing the sun.") His belief in the inseparability of Cuban and Latin American sovereignty and the expression thereof in his writings have contributed to the shape of the modern Latin American Identity. His works are a cornerstone of Latin American and political literature and his prolific contributions to the fields of journalism, poetry, and prose are highly acclaimed.

The best 31 Spanish authors in 1900-1939 are: Emilia Pardo Bazan, Vicente Blasco Ibanez, Jose Echegaray (Nobel Spain 1904), Juan Ramon Jimenez (Nobel Spain 1956), Jacinto Benavente y Martínez (Nobel Spain 1922), Pio Baroja, Ramon del Valle-Inclan, Jose Martinez Ruiz, Antonio Machado, Ramiro de Maeztu, Jose Ortega Y Gasset, Ramon Menendez Pidal, Manuel Azana, Eugeni d'Ors, Gabriel Miro, Ramon Perez de Ayala, Ramon Gomez de la Serna, Federico Garcia Lorca, Pedro Salinas, Jorge Guillen, Miguel Hernandez, Vicente Aleixandre (Nobel Spain 1977), Damasco Alonso, Manuel Altolaguirre, Benjamin Jarnes, Rosa Chacel, Fransisco Ayala, Octavio Paz (Nobel Mexico 1990), Salvador de Madariaga, Armando Palacio Valdez, and Jacinto Grau. However, in those years there were 10 excellent Latin American authors as well: Miguel Angel Asturias (Nobel Guatemala 1967), Jorge Luis Borges (Argentina), Roberto Arlt (Argentina), Jose Maria Arguedas (Peru), Delmira Agustini (Uruguay), Romulo Gallegos (Venezuela), Alejo Carpentier (Cuba), Mariano Azuela (Mexico), Pablo Neruda (Nobel Chile 1971), Gabriela Mistral (Nobel Chile 1945). To those we add Narcis Oller who wrote in Catalan, altogether 42. Authors writing in Spanish received 8 Nobel Prizes in this epoch – 4 Spain, 4 Latin America – 2 Chile, 1 Guatemala, 1 Mexico. The Nobel Prizes are divided equally between Spain & Latin America.

The best 15 Spanish authors in 1820-1859 are: Mariano Jose de Larra, Jose de Espronceda, Angel de Saavedra Duke of Rivas, Manuel Jose Quintana, Gertrudis Gomez de Avellaneda, Juan Arola, Nicomedes Pastor Diaz, Carolina Coronado, Serafin Estebanez Calderon, Juan Donoso Cortes, Jaime Balmes, Ramon de Mesonero Romanos, Francisco Martinez de la Rosa, Antonio Garcia Gutierrez, and Juan Eugenio Hertenbusch. To those we can add 5 Argentinian authors: Esteban Echeverria, Juan Maria Gutierrez, Miguel Cane, Jose Marmol and Juan Bautista Alberdi. Altogether 20 authors who wrote in Spanish in Spain & Argentina.

In total, we have **80** important authors who wrote in Spanish in the twelfth 1820-1939.

Spanish literature is one of the best literatures in the world, especially because of its variety. In the list above we find excellent authors from Spain, Argentina, Cuba, Nicaragua, Peru, Mexico, Chile, Venezuela, Guatemala, Uruguay – 9 countries from Latin America and Spain. The Nobel Prize laureates are also double than the Nobelists of Italian and Russian, and almost equal to the Nobelists of German. I have books of all the Spanish best authors whom I have read, and of course my favorite novelist – Vicente Blasco Ibanez. Lorca is one of my favorite playwrights and poets and I have written and quoted at length from his work in this book, as well as from Jimenez, whom I like very much. The other authors whom I have read are good, but not as good as the best authors of French, English and German languages in the 20th century. Lorca wrote masterpieces, but it is hard to say that about the other authors of this list. Yet, I enjoy reading their books, I read them in Spanish fluently, but I have longings to Cervantes. Arthur Miller, Eugene O'Neill, George Bernard Shaw, and Tennessee Williams are as good as Shakespeare. D. H. Lawrence, Sinclair Lewis, Scott Fitzgerald, James Joyce, and Hemingway, are as good as the best novelists of the past. Bertolt Brecht, Thomas and Heinrich Mann are as good as Goethe, and Kafka is far better than all German authors.

The twentieth century was the best century in literature, at least in the English and German literature. Only in French literature the 19th century surpassed the 20th with the best authors in world literature – Balzac, Hugo, Zola, Flaubert, Baudelaire, Vigny, Musset, Lamartine, and to a lesser extent George Sand, Alexandre Dumas pere and Jules Verne, the heroes of my youth. Yet, they are all My Sons (or My Fathers) and I like to read Pablo Neruda and Blasco Ibanez not less than Proust, Brecht or Hemingway. Everyone in his context, his language, and his readers. At those levels of excellence it is presumptuous to compare between authors, it is like comparing between sons, so I retract what I wrote before, all the authors in my lists are excellent, should be read, and if I understand less Spanish or Russian authors, it is probably because I don't have the necessary affinities to appreciate them. Anyway, as Spanish authors received almost the same number of Nobel Prizes than the Germans, and the Nobel Prize committees are probably more objective than me. Anyhow, the twelfth that I have chosen, actually 120 years from 1820 to 1939, is the best ever in all the European languages.

5. RUSSIAN 1860-1899: Lev Tolstoy, Fyodor Dostoyevsky, Anton Chekhov, Ivan Turgenev, Nikolay Leskov, Nikolay Nekrasov, Alexei Konstantinovich Tolstoy, Alexander Ostrovsky, Valery Bryusov, Konstantin Balmont. In total 10 authors, 4 of them: Tolstoy, Dostoyevsky, Chekhov and Turgenev, were the best authors ever of the Russian literature, and among the best world authors in all times. It goes without saying that I prefer by far this period with its leading authors over the authors in the 20th Century, although it was a very prolific century.

The best 12 Russian authors in the decades 1820-1859 were: Alexander Pushkin, Vasily Zhukovsky, Mikhail Lermontov, Yevgeny Baratynsky, Konstantyn Batyushkov, Fyodor Tyutchev, Afanasy Fet, Nikolai Gogol, Ivan Goucharov, Mikhail Saltykov-Shchedrin, Ivan Krylov and Alexander Herzen. In total 22 outstanding Russian authors in the 19th century.

The 48 best authors in the decades 1900-1939 were: Alexander Blok, Sergei Yesenin, Mikhail Kuzmin, Ygor Severyanin, Sasha Chorny, Nikolai Gumilyov, Maximilian Voloshin, Innokenty Annensky, Zinaida Gippius, Anna Akhmatova, Marina Tsvetaeva, Osyp Mandelstam, Boris Pasternak (Nobel 1958), Velimir Khlebnikov, David Burliuk, Aleksei Kruchenykh, Vladimir Mayakovsky, Alexandr Kuprin, Ivan Bunin (Nobel 1933), Leonid Andreyev, Fyodor Sologub, Aleksey Remizov, Yevgeny Zamyatin, Dmitry Merzhkovsky,

Andrei Bely, Maxim Gorky, Alexander Fadeyev, Nikolai Ostrovsky, Daniil Kharms, Isaac Babel, Konstantin Vaginov, Mikhail Bulgakov, Alexander Vvedensky, Nikolay Zabolotsky, Yury Olesha, Andrei Platonov, Mikhail Zoshchenko, Viktor Shklovsky, Yuri Tynyanov, Georgy Ivanov, Vyacheslav Ivanov, Mark Aldanov, Gaito Gazdanov, Vladimir Nabokov, Vasily Grossman, Nikolai Bukharin, Mikhail Sholokhov (Nobel 1965), Alexandr Isayevich Solzhenitsyn (Nobel 1970). **4** Russian authors received Nobel Prizes in Literature.

Altogether there were **70** important Russian authors in the twelfth 1820-1939.

The 20th century was incomparable to the 19th century of Russian literature. With all due respect to Gorky and Pasternak, they cannot compare to Tolstoy, Dostoyevsky and Chekhov, Turgenev, Pushkin and Gogol. Maybe it was due to the Soviet regime, but the Tsars were not liberals either. I read a few books by contemporary Russian authors, in translations as it was not worth the effort to try to read them in Russian, I have tried to read in Russian only the authors whom I like most - Tolstoy, Pushkin and Gogol. The contemporary Russian authors are good, but could not be compared not only to the 19th century Russian literature but also to 20th Century French, English, German literature and some of the others literature. My remark stated before applies also here, and probably if I could read the modern Russian authors in Russian and read more of them (actually, my knowledge of Russian literature is mainly of the 19th century literature, and only superficially the 20th) I would probably appreciate them more.

6. ITALIAN: in 1860-1899: Gabriele D'Annunzio, Giovanni Verga, Antonio Fogazzaro, Edmondo de Amicis, Carlo Collodi, Luigi Capuana, Giovanni Pascoli, Matilde Serao, Salvatore Farina, Giosue Carducci (Nobel 1906), Carlo Favetti (Friulian, Italy), Peider Lansel (Rumantsch, Switzerland), Rinatu Coti (Corsican, France), Gavino Contini (Sardinian, Italy), Nino Martoglio (Sicilian, Italy). In total 15 authors in 6 languages - Italian & regional languages: Italian (10), Friulian (1), Rumantsch (1), Corsican (1), Sardinian (1), Sicilian (1). From 3 countries: Italy (13), Switzerland (1), France (1). This is only an indicative list.

To those authors one can add 25 authors in 1900-1939: Italo Svevo, Luigi Pirandello (Nobel 1934), Federico Tozzi, Grazia Deledda (Nobel 1926), Sibilla Aleramo, Maria Messina, Alberto Moravia, Albade Cespedes, Filippo Marinetti, Salvatore Quasimodo (Nobel 1959), Giuseppe Ungaretti, Umberto Saba, Eugenio Montale (Nobel 1975), Cesare Pavese, Corrado Alvaro, Elio Vittorini, Dino Buzzati, Curzo Malaparte, Carlo Emilio Gadda, Guido Gozzano, Sergio Corazzini, Corrado Govoni, Antonio Baldini, Massimo Bontempelli, Elsa Morante.

The 10 important Italian authors in 1820-1859 were: Giuseppe Mazzini, Silvio Pellico, Giovanni Berchet, Piero Maroncelli, Massimo d'Azeglio, Alessandro Manzoni, Giacomo Leopardi, Ippolito Nievo, Giuseppe Giusti, and Giuseppe Giocchino Belli.

Altogether there were **50** important Italian authors in the 1820-1939 twelfth, **5** of them received the Nobel Prize. I really cannot understand how giant authors as Moravia and Morante did not receive the Nobel Prize, but who am I to question the Nobel considerations?

I prefer by far the Italian literature of the 20th century, and I know it better, as compared to the 19th century. As I know more Italian literature, the literature in the other languages is merely indicative, and does not encompass the whole literature in Friulian/Rumantsch/Corsican/Sardinian/Sicilian. However, I have studied the other languages of the Italian family, I read books in those languages and in other Italian languages, as Veneto, and I try at least to mention the literature in those languages. Italian literature in the

20th century is less known than the other 5 leading literatures – French, English, German, Italian & Russian – yet it is outstanding, and I like to read in Italian Pirandello, Moravia – one of the most modern and best authors of the 20th century, I also enjoyed reading his biography.

How can we know if the French, English and German literatures are more significant than the Spanish, Russian and Italian literatures? We cannot rate the excellence of literatures but we can rate the excellence of authors, at least this is what the Nobel Prize Committee does, and if we add how many authors from each of those literatures received the Nobel Prize we can at least find a quantitative criterion. This is also what I have done in my lists and if I found a larger number of important authors in French literature than in Russian in this twelfth, based on the research that I have conducted and my readings, it probably proves that at least quantitatively the French literature is more significant than the Russian. It applies if there is a large difference as with those two – 160 compared to 70, but if the numbers are close as between the French and English literatures – 160 compared to 140 we cannot state that French literature is more significant than English literature because of that. But when the amounts of authors in French, English and German literatures are significantly higher (160+140+120) than the amount of authors in Spanish, Russian and Italian literatures (80+70+50) it apparently proves that at least quantitatively the former literatures are more significant than the others. However, we'll see in the other European literatures that when the amount of authors amount to 20 each we'll be able to differentiate them only by the excellence/prominence of their authors, how many significant authors were in each language and how they contributed to humanity, as this is the ultimate criterion of significance.

So, there is an objective indicator of excellence – the Nobelists in Spanish, Russian & Italian literatures amount to **23** as compared to the **51** Nobelists in French, English & German literatures. And if the Nobelists of those **3** more significant literatures are about **45%** of the Nobelists of the **3** most significant literatures, it probably indicates that those “leading” literatures are at least perceived by professional experts as more significant, or maybe only better known by the Nobel Committees, as it is very dangerous to rate cultures, literatures and music, and I have proven it in my book which tried to devise a Culture Index. Nevertheless, and completely unrelated and unplanned, probably not by chance or by sheer coincidence, I have arrived to the same conclusion in this book as the Nobel Committees, as I found in my survey that in the twelfth from 1820 to 1939 there were **200** important authors from the more significant literatures in Spanish (80), Russian (70) & Italian (50), as compared to the **420** important authors from the most significant literatures in French (160), English (140) & German (120), which is **47%**! Furthermore, **17** authors received the Nobel Prize in the more significant countries, 8 in Spanish, 5 in Italian, 4 in Russian, in the literatures of the twelfth 1820-1939 (although some of the Nobel Prizes were awarded after 1939 to authors who were active in that twelfth), as compared to **37** authors who received the Nobel Prize in the most significant countries, 14 in French, 14 in English, 9 in German, in the literatures of the twelfth 1820-1939 (although some of the Nobel Prizes were awarded after 1939 to authors who were active in that twelfth). This is a ratio of **46%**, which is almost the same as **45%** and **47%**. So, “great” minds think alike, and at least in this case I have arrived to the same conclusion as the Swedish Nobel Prize Committees for Literature, which shows that we share the same taste in literature, or at least a same bias in favor of European culture... One should bear in mind that the basis of comparison is not exactly the same as I have compared the literatures in the 1820-1939 epoch, while the Nobel Committees have awarded the prizes for the whole 20th century & beyond, but I have checked also the Nobel prizes for the literatures of 1820-1939, & all 3 figures are exactly the same – **45% - 47%**, which is indeed significant.

THE 10 SIGNIFICANT LITERATURES – PORTUGUESE, BRAZILIAN, DUTCH, CZECH, GREEK, POLISH, SWEDISH, NORWEGIAN, DANISH, FINNISH

7. **PORTUGUESE/PORTUGAL/BRAZIL:** 1820-1939 – 40 authors, 20 Portuguese and 20 Brazilians: **Portugal** - Jose Maria de Eca de Queiroz, Fernando Pessoa, Almeida Garrett, Joao de Deus, Antero de Quental, Teofilo Braga, Guerra Junqueiro, Ana Placido, Aquilino Ribeiro, Alexandre Herculano, António Cândido Gonçalves Crespo, Eugénio de Castro e Almeida, António Pereira Nobre, Júlio Dantas, António Pedro Lopes de Mendonça, Joaquim Pedro de Oliveira Martins, José Duarte Ramalho Ortigão, António Gomes Leal, Malheiro Dias, Júlio Dinis, pseudonym of Joaquim Guilherme Gomes Coelho. **Brazil** - Machado de Assis, Jose de Alencar, Euclides da Cunha, Raul Pompeia, Joaquim Manuel de Macedo, Jorge Amado, Manuel Antonio Alvares de Azevedo, Manuel Antonio de Almeida, Mario Andrade, Lucio Cardoso, Antônio Frederico de Castro Alves, Antônio Gonçalves Dias, João Franklin da Silveira Távora, João Simões Lopes Neto, Olavo Brás Martins dos Guimarães Bilac, Domingos José Gonçalves de Magalhães, Viscount of Araguaia, Casimiro José Marques de Abreu, José Bento Renato Monteiro Lobato, Afonso Henriques de Lima Barreto, Augusto de Carvalho Rodrigues dos Anjos. I have read some of those authors from both countries, who wrote excellent novels and poetry. It is quite sad that the excellent works by Portuguese and Brazilian authors are unknown to the world readers. This is of course only an indicative list. I have to deal with the important issue: why we do not include the literatures from Portugal and Brazil in the exclusive list of the more significant literatures. We have in our list 40 important authors as compared to the 50 of Italian literature, it is very close indeed. Nevertheless, 5 Italian authors received the Nobel prizes in this period and none from Portugal and Brazil. Furthermore, if we examine the quality of the everlasting works of the Italian authors in this period as compared to the good works but not masterpieces in Portuguese we have to reach a conclusion that we cannot include literature in Portuguese in the more significant category.

My roots are in Portugal and Spain, Greece and Turkey, Israel and Egypt. I think that all those countries have excellent literatures that unfortunately are not sufficiently known internationally. Yet, in the past the literature of those nations and their cultures were the best in the world – the Jews gave to the world the Bible and the Talmud, the Greeks gave Homer and Euripides, all of them in ancient times, but even today Israel has excellent authors known internationally and Greece has excellent poets. The Arabs gave much more than the Quran, they gave poetry, philosophy, mathematics, and their contribution to the world literature was very important in the Middle Ages. Portugal and Spain contributed very much throughout the centuries to world literature with the novels, poetry & plays which I have read: Camoes, Usque, Eca de Queiros, Machado de Assis, Cervantes, Lope de Vega, Calderon de la Barca, Jose Maria de Pereda, Alarcon, etc. But I kept in touch with modern Portuguese, Spanish, Arab and Greek literature, reading extensively Spanish/Latin American literature in Spanish, but also my beloved Portuguese and Brazilian authors – Fernando Pessoa and Jorge Amado.

8. **DUTCH:** 1820-1939: Piet Paaltjens, Marcellus Emants, Willem Kloos, Louis Couperus, Simon Vestdijk, Henricus Franciscus Caroluszoon (Hendrik) Tollens, P.A. de Genestet, Multatuli (ps. of Eduard Douwes Dekker), Jacques Perk, Albert Verwey, Frederik van Eeden, Lodewijk van Deyssel, Herman Gorter, Hendrik Marsman, Adriaan Roland Holst, Hendrik Conscience (in Flemish, Belgium), Jan van Beers (in Flemish, Belgium), Fedde Schurer (in Frisian, Netherlands), N. P. van Wyk Louw (in Afrikaans, South Africa), Guillermo Rosario (in Papiamentu, Curacao). In total 20 authors in 5 languages: Dutch – 15, Flemish – 2, Frisian – 1, Afrikaans – 1, Papiamentu – 1. From 4 countries: Netherlands – 16, Belgium – 2, South

Africa – 1, Curacao – 1. I must confess that I have not read most of those authors, except the Dutch Simon Vestdijk and Guillermo Rosario in Papiamentu. But I have arrived to this list from researching the subject, finding that the Dutch literature was very good indeed. However, I have not picked the names of the authors at random. I have read material on all of them, sometimes reading extracts of their works. This is of course only an indicative list.

It is amazing how one of the most cultivated people – the Dutch – have not won even one Nobel Prize in Literature in more than a century. Furthermore, if someone (who is not Dutch) has ever heard about Dutch authors the first one that comes in mind is a small girl Anne Frank who wrote a diary like millions of other girls, but because of her tragic fate and good style she managed to be one of the best known authors of the world, of course after she died in 1944 in a concentration camp, as a result of a denunciation that has remained unknown until now. The first book that I read in Dutch was therefore Anne Frank (*Het Achterhuis*), I read also John Grisham's *Het Testament* in a Dutch translation, and only after I was more fluent in the language I have read some of the best authors in Dutch/Flemish – Hugo Claus (who was only 10 when “our” twelfty ends) and Simon Vestdijk. Nevertheless, I have great admiration to the Dutch culture (except for the rather mediocre film industry), its painters, its quality of life, ethics, economy, social and economic justice, ecology, and most of all its excellent people.

8. **CZECH:** 1820-1939: Otokar Brezina, Alois Jirasek, Karel Vaclav Rais, Jaroslav Hasek, Karel Capek (1890-1938), Jaroslav Seifert (Nobel 1984), Stanislav Kostka Neumann, Karel Matej Capek-Chod (1860-1927), Frana Sramek, Frantisek Halas, Karolina Světlá (born Johana Rottová), Růžena Svobodová, Karel Hynek Mácha, Václav Bolemír Nebeský, Vítězslav Hálek, Jan Nepomuk Neruda, Josef Václav Sládek, Jaroslav Vrchlický, Viktor Dyk, Rudolf Medek. In total, 20 authors (1 Nobelist) writing in Czech, apparently good as I have not read most of them, but a worthy survey of the world literature in the 19th and 20th centuries cannot overlook the Czech literature, and we must not forget that one of the best authors in history was a Czech - Franz Kafka who wrote in German in the 20th century. I have read and seen the film *The Good Soldier Svejk* by Hasek, which is one of the best humoristic books of the century. The Czech films are among the best in the world, in spite of the fact that Czech Republic is a rather small state, but the Swedish film industry, and recently the Danish one, have contributed also very much to the film industry. I have great admiration for the Czech people, and as a citizen of another small country, we compare in our literature achievements – only one Nobel Prize in literature. We could be in a worse situation, and after all literature is not the prism of everything. Small nations can excel in other fields (Israel in technology, Czechia in films), be happy in what you have as *You Can't Win Them All*!

10. **GREEK:** 1820-1939: Kostis Palamas, Aristotelis Valaoritis, Emmanuel Rhoides, Nikos Kazantzakis, Odyseeas Elytis (Nobel 1979), Giorgos Seferis (Nobel 1963), Konstantinos Kavafis, Angelos Sikelianos, Lambros Porphyras, Dyonisios Solomos, Alexandros Rizos Rangavis, Yiannis Ritsos, Demetrios Vikelas, Alexandros Papadiamantis, Penelope Delta, Andreas Embirikos, Gregorios Xenopoulos, Demetrios Bernardakis, Andreas Laskaratos, Kostas Karyotakis. In total 20 authors, 2 of them received the Nobel Prize. I read poems of some of the poets in Greek and English, read Kazantzakis, and read articles on Greek literature and biographies. If I may recommend an excellent book it is the Penguin Book of Greek Verse in Greek and English. This book brings Homer's poetry from the Iliad and the Odyssey, Hesiod, Archilochus, Alcaeus, Sappho, Ibycus, Simonides, and many other ancient poets, as well as extracts from the works of the playwrights Aeschylus, Sophocles and Euripides, and the philosophers Plato and Aristotle. This excellent anthology encompasses also poets from the Hellenistic World, the Byzantine Empire, Turkish rule and Modern Greece. Elytis was awarded the Nobel Prize in 1979 and Seferis in 1963. With all due respect

to contemporary Greek literature and poetry, my favorite book is the Odyssey by Homer, I try very hard to read in Ancient Greek Homer and Sophocles, and I have more success with Nikos Kazantzakis and with the poems by Elytis and Seferis, which I have read. So, in spite of the thousands of years that have elapsed since Homer, I try to keep in touch with my Greek ancestors (my grandfather was from Larissa), I have tried to learn Greek, and read modern novels and poetry, but still it is very hard to appreciate Greek works in translations.

11. **POLISH:** 1820-1939 (all the following literatures are for the whole twelfty/120 years of 1820-1939, unless stated otherwise): Jozef Ignacy Kraszewski, Michal Balucki, Eliza Orzeszkowa, Maria Konopnicka, Boleslaw Prus, Gabriela Zapolska, Henrik Sienkiewicz (Nobel Poland 1905), Czeslaw Milosz (Nobel US 1980), Wladyslaw Reymont (Nobel Poland 1924), Adam Mickiewicz, Seweryn Goszczyński, Józef Bohdan Zaleski, Witold Marian Gombrowicz, Narcyza Żmichowska (Gabryella), Edmund Chojecki, Stefan Żeromski, Kazimierz Przerwa-Tetmajer, Władysław Orkan, Bolesław Leśmian, Bruno Jasiński. In total 20 authors, most of them I have not read. 3 authors - Mylosz, Sinkiewicz and Reymont received the Nobel Prize for Literature (2 Poland, 1 US). My knowledge of Polish literature is quite restrained. Polish is the last language that I have learned, and practically I can't read it. I try to read Mickiewicz's Pan Tadeusz, but I got stuck at page 15 although I read it with Polish and English text side by side. He is the neighbor in my library with Arthur Miller, who is one of my favorite authors and I have read almost all his plays and writings, and I perceive him as one of the best authors in all times. I read Quo Vadis (and of course saw the film) by Sienkiewicz, read a few poems, and saw plays by Polish authors. So, my knowledge of Polish literature is quite restrained and I have to rely mainly on the Nobel Prize committee, who has given so many Nobel prizes to Polish authors, to make it a prominent literature. Nevertheless, I have seen dozens of Polish films and I am a great admirer of Polish films and their screenplays, which are among the best in the world. This is of course only an indicative list.

12. **SWEDISH:** August Strindberg (one of the world's, and mine, greatest playwrights of all times), Gustaf Froeding, Selma Lagerlof (Nobel 1909), Par Lagerkvist (Nobel 1951), Verner von Heidenstam (Nobel 1916), Eyvind Johnson (Nobel 1974), Erik Axel Karlfeldt (Nobel 1918), Hyalmar Soederberg, Fredrika Bremer, Abraham Viktor Rydberg, Carl Jonas Love Almqvist, Hjalmar Fredrik Elgérus Bergman, Birger Sjöberg, Ivar Lo-Johansson, Karin Maria Boye, Nils Artur Lundkvist, Harry Martinson (Nobel 1974), Moa Martinson, born Helga Maria Swarts sometimes spelt Swartz, Hjalmar Gullberg, Jan Fridegård. In total 20 authors. Lagerlof, Lagerkvist, Heidenstam, Martinson, Karlfeldt, Johnson – 6 authors were awarded the Nobel Prize for Literature. Swedish literature is known all over the world mainly because of August Strindberg, whose plays were written mostly in the 19th century. I write and quote Strindberg in Swedish, and I have learned Swedish in order to read his plays in Swedish, as well as other books. I am also reading Lagerlof's books. Today, Sweden is one of the most advanced countries in the world, most ethical, one of the richest, an example for us all, obtaining the best ratings in most parameters of quality of life, and excels also in Literature.

13. **NORWEGIAN:** Henrik Ibsen, Alexander Kielland, Jonas Lie, Knut Hamsun (Nobel 1920), Sigrid Undset (Nobel 1928), Bjornstjerne Bjornson (Nobel 1903), Olav Duun, Johan Falkberget, Sigurd Hoel, Tarjei Vesaas, Henrik Arnold Thaulow Wergeland, Peter Asbjørnsen, Ivar Aasen, Johan Bojer, Ingeborg Refling Hagen, Sigbjørn Obstfelder, Emil Boyson, Gunnar Otterbech Larsen, Rolf Kristian Eckersberg Stenersen, Amalie Skram. This is of course only an indicative list. In total 20 authors, with the giant Henrik Ibsen, the best playwright ever (in my opinion), and perceived as the best modern playwright. I taught Ibsen in my courses, especially An Enemy of the People & A Doll's House. Bjornson was awarded

the Nobel in 1903, Undset in 1928, Hamsun in 1920 – altogether 3 authors. I have read several books and plays in Norwegian (with a translation), including by Hamsun. Norwegian literature has given us also one of the best playwrights of all times Henrik Ibsen (died in 1906), whose play [En folkefiende](#) – An Enemy of the People – is the cornerstone of my courses on business ethics, and I learned Norwegian only to be able to read it. I always wonder how my students, who have seldom read or seen plays, catch the gist of the play in its stage or films versions (a film with Steve McQueen as Dr. Thomas Stockmann and the Indian film *Ganashatru* – probably the only word that I know in Hindi meaning An Enemy of the People). The play relates most of the dilemmas of modern business and society ethics in a captivating way, although it tells the story of a small Norwegian town 150 years ago. This is the true test of a masterpiece – its relevance beyond the limits of time and geography. It applies to Ibsen, as well as to Shakespeare, Moliere, Sophocles, Homer, Cervantes, Zola, Hugo, Balzac, Dickens, Tennessee Williams, Dante, Brecht, Arthur Miller, and the Bible...

Ibsen is the father of modern theater, he is the most humane of playwrights, but unfortunately he had to live most of his life in exile, as he was ostracized in his own country. I have read quite all of Ibsen's plays, an excellent biography on Ibsen, and I write at length and quote in this book Ibsen and his plays. I have also seen most of his plays on the stage and in films. Another Norwegian author (but not from our twelfth) whom I admire is actress Liv Ullmann, my favorite actress in the best film ever made Ingmar Bergman's *Scenes from a Marriage*. She wrote an excellent biography *Changing* that I have read, which recalls light-hearted moments from her life with Bergman, as also darker memories of life in Faro island. Ullmann's grandfather was sent to the [Dachau concentration camp](#) during the [Second World War](#) for helping Jewish people escape from the town where he lived in Norway; he died in the camp. Today, Norway is one of the most advanced countries in the world, most ethical, one of the richest, an example for us all, obtaining best ratings in most parameters of quality of life.

4. **DANISH:** [Hans Christian Andersen](#), Georg Brandes, [Jens Peter Jacobsen](#), Johannes Vilhelm Jensen (Nobel 1944), Karl Adolph Gjellerup (Nobel 1917), Henrik Pontoppidan (Nobel 1917), [Karen Blixen/Isak Dinesen](#), Morten Korch, Carl Erik Soya, Tom Kristensen, Nikolaj Frederik Severin Grundtvig, Søren Aabye Kierkegaard, [Holger Drachmann](#), [Herman Bang](#), [Sophus Schandorph](#), Valdemar Rørdam, Kaj Harald Leininger Munk, [Hans Kirk](#), Martin Andersen Nexø, [Jeppe Aakjær](#). In total 20 authors, 3 of them received the Nobel Prize. This is of course only an indicative list. The best Danish author Hans Christian Andersen lived in the 19th century. I manage to read him in Danish with translation, and I have read him in many more languages – French, English, Hebrew, Plattdeutsch, Icelandic..., as Andersen is one of the most translated authors. I am reading a very good historic book *Fru Marie Grubbe* by J. P. Jacobsen. When I study a language as I did with Danish I start reading the writers in this language, but it was far easier for me to read Andersen in Danish than Jacobsen. Today, Denmark is one of the most advanced countries in the world, probably “the perfect country” – paradise on earth, most ethical, one of the richest, an example for us all, with best ratings in most parameters - culture, democracy, gender equality, quality of life.

15. **FINNISH:** Johan Ludvig Runeberg, Finland's national poet, Aleksis Kivi, Minna Canth, Elias Lönnrot - who compiled *Kalevala*, the national epic of Finland, Frans Eemil Sillanpää (Nobel 1939), Eino Leino, Mika Waltari, Yuhani Aho, Aino Kallas, Johannes Linnankoski, Isa Asp, Fredrik Cygnaeus, Julius Leopold Fredrik Krohn, Anni Helmi Krohn also Helmi Setälä, Antti Amatus Aarne, J.F. Cajan, M.A. Castrén, D.E.D. Europaeus, [Johan Jacob Ahrenberg](#), Adolf Ivar Arwidsson. In total, 20 authors and folklorists, 1 Nobel Prize winner. I have not learned Finnish, it is too difficult for me, yet I admire the country and have visited it shortly. I am sure that there are excellent Finnish authors, but as the language is so difficult,

the authors were not translated often. From my enquiries I have found a list of excellent authors whom I have never heard of, except Runeberg and Sillanpaa, maybe because of the problem of a language barrier. This is of course only an indicative list of this great literature.

I think that the authors in this list can compare to many of the authors in literatures written in better-known languages, but I must confess that I have not read any of their writings, and my judgment is based uniquely on articles on those writers. Furthermore, only the best authors are translated while all the others are read only in Finnish. Hebrew suffers from the same problem, and if the Israeli authors would have written in English or French, German or Spanish, they would probably be exposed much more to the world, but even so some of the best Israeli authors were translated into dozens of languages. I can write about this because I have read many books in translations, and after I have learned the language I have read them in the original language, sometimes with a translation. Most of the flavor of the books is lost in translation – in German, Spanish, French, Hebrew, Yiddish, Ladino, Russian, Italian, Portuguese, etc. With one caveat, there are some translators who are excellent authors, who have translated difficult poetry or plays even in rhyme. But it makes months if not years to make a good translation and most of the translators have not the time, the talent, or the reward to make excellent translations. If you pay well to have a good translation of a best seller novel the translation can be good, but who would pay you to make a good translation of a poetry book that would be sold in 200 copies... I refer to this problem at length in this book that describes languages and literatures and their interaction. This problem of exposure applies specially to “difficult” languages as Hungarian, Turkish, Arabic, Chinese, Albanian, Czech, Bulgarian, Greek, Hindi, Hebrew, Japanese, Finnish, Irish Gaelic, Persian, Lithuanian, etc.

If an author as Shai Agnon has a very special style it is almost impossible to translate it, the same applies to Sholom Aleichem whom I have read in Hebrew (boring) and Yiddish (extremely funny). It applies to Don Quijote that I have read in Hebrew and Spanish, but only in Spanish you can grasp Cervantes' peculiar style. It applies of course to German – you can translate Mack the knife's ballad to whatever language, but nothing compares to the acerbity of German (Und der Haifisch, der hat Zähne Und die trägt er im Gesicht Und Macheath, der hat ein Messer Doch das Messer sieht man nicht). I don't know if this problem affects also the Nobel Prize committee and explains why the “difficult” languages have got only one or two prizes. Is it because of the language, of the exposure, or because Hungarian authors are not as good as Swedish authors? Who knows? Probably the Nobel Prize Committees know...

Today, Finland is one of the most advanced countries in the world, most ethical, one of the richest, an example for us all, with best ratings in most parameters of quality of life. I have made this remark to all the Scandinavian countries to emphasize that beyond literature you must appreciate a country by its quality of life. What is better to live in New York and be exposed to the best literature, plays, operas, concerts, or live in Helsinki or Oslo, with a much less known literature, far from the financial center, the cultural center, the academic center. We must therefore introduce the factor of the quality of life, ethics, ecology, peace, with much less crime, bribes, and pollution, and appreciate the country by the integral of all the parameters. I have dealt at length with this problem of excellence in all the parameters in my book "Academic Proof that Ethics Pays", although I have dealt in hundreds of pages of the Appendix of this book, with the cultural implications of devising an objective Culture Rating.

Is it a coincidence that the 11 most ethical countries in the world: Denmark, New Zealand, Finland, Sweden, Norway, Switzerland, Singapore, Netherlands, Luxembourg, Canada and Australia, that have the best quality of life, least pollution, peaceful life with minimal crime and no wars, but that have also "less outstanding" literatures, composers, playwrights, film

industry (except Bergman who made his films in the tiny Swedish island of Faro). It is obvious that the most corrupt countries have all the drawbacks and no one would want to live there. But maybe it is better to live in the second tier of ethical countries, who are not as ethical as the first 11, who have more pollution, less social and economic justice, but still have a reasonable quality of life and an excellent intellectual output in literature, films, music, theater, etc. I refer to Germany (no. 12 in the list of the most ethical countries), UK (no. 14), Japan (no. 15), US (no. 17), Austria (no. 23), France (no. 26), etc. If I was a European I would prefer to live in France rather than in Switzerland and Scandinavia, although those countries are the "perfect" countries, and France has many drawbacks. But France has also the best literature, film industry, music and theater. Those who opt for Germany, the UK, or the US, would prefer those countries. So, what is best? However, living an alternative life in France of the 19th century and the beginning of 20th century with all its wars, social injustice, gender inequality, despicable health conditions, has only one advantage – an exhilarating culture!

The ten literatures that were surveyed above include 20 authors each, altogether 200 authors who wrote outstanding literatures in the twelfth – 1820-1939: Portugal, Brazil - both literatures are in Portuguese but they are completely different literatures; Swedish, Norwegian, Danish - all three languages are very similar yet their literatures are very different; Finnish, Greek, Dutch (including all the Dutch languages), Czech, Polish – all 5 languages are completely different and so are their literatures. Yet, all 10 literatures are important ones and have contributed an outstanding contribution to world's cultures, maybe not so significant as the 6 French, English, Irish, American, German & Austrian literatures, not even as significant as the 4 Spanish, Latin American (in this survey – 9 countries), Russian and Italian literatures, but still very important literatures. Altogether, we have surveyed in the last chapters the 20 significant literatures at least in European languages, if we count Latin American as one entity and not 9-18 countries, all the French speaking countries and regions as one entity, all the regions in Spain as one entity, all the English speaking countries in the Commonwealth as one entity, all German languages as one entity, all Italian languages as one entity. My guideline was materiality – whether a literature is substantially significant or not. And when I mean literature I mean the quality/quantity of their authors.

Thus Brazilian and Portuguese literatures are significant and different, while Argentinean, Cuban and Mexican are not so significant as to be treated separately than as a Latin American literature. Afrikaans, Frisian and Flemish literatures are part of the Dutch literature. New Zealand, Australian and Canadian literatures are part of the English literature, but English, American and Irish in English literatures are significant and different and thus are treated as 3 separate entities. Catalan, Asturianu and Galego are part of the Spanish literatures. Friulian, Sicilian and Sardinian literatures are part of the Italian literature. Plattdeutsch, Swiss German and Luxembourgish are part of the German literature, but the significant and different Austrian literature is a different entity. French Belgian, French Swiss & Haitian literatures are part of the French literature. As I have read literature in almost all the literatures surveyed above – major & minor – and read many articles on this matter, I think that I am entitled to make those differences, although I mention for sake of clarity all those literatures even with one example in order to know that they exist, whether it is a literature in a regional language or a literature in a country speaking the same language as the main literature in that language.

12 OTHER EUROPEAN LITERATURES – ROMANIAN, TURKISH, HUNGARIAN, SERBIAN, CROATIAN, UKRAINIAN (20 EACH), AND IRISH GAELIC, BULGARIAN, ALBANIAN, ARMENIAN, GEORGIAN, LITHUANIAN (10 EACH)

16. **ROMANIAN:** Mihai Eminescu, Vasile Alecsandri, Ion Luca Caragiale, Ion Creanga, Barbu Stefanescu Delavrancea, George Calinescu, Panait Istrati, Costache Negruzzi, Camil Petrescu, Liviu Rebreanu, Nicolae Bălcescu, Dimitrie Bolintineanu, Alec Russo, Nicolae Filimon, Bogdan Petriceicu Hasdeu, Alexandru Odobescu, Grigore Alexandrescu, Alexandru Vlahuță, Alexandru Macedonski, Petre Ispirescu. In total 20 authors from Romania, some I read in Romanian. Mihai Eminescu was born in Botosan, hometown of my wife Ruthy & her mother Fanny. This is of course only an indicative list, as the Romanian literature is prolific.

17. **TURKISH:** Namik Kemal, Tevfik Fikret, Halid Ziya Usakligil, Ahmet Hasim, Yakup Kadri Karaosmanoglu, Resat Nuri Guntekin, Sabahattin Ali, Yunus Nadi Abalioglu, Halide Edib Adivar, Emine Semiye Onasya, Ömer Seyfettin, Mehmet Fuat Köprülü, Cevat Şakir Kabaağaçlı, Peyami Safa, Ahmet Hamdi Tanpınar, Kemal Tahir, Peride Celal Yönsel, Samiha Ayverdi, Sait Faik Abasıyanık, Ahmet Kutsi Tecer. In total 20 authors that I have not read but researched. This is of course only an indicative list & not as prolific as modern literature.

18. **HUNGARIAN:** Endre Ady, János Arany, Mihály Babits, József baron Eötvös de Vásárosnamény, Géza Gárdonyi born Géza Ziegler, Móric Jókay de Ásva, Margit Kaffka, Baron Zsigmond Kemény, Imre Madách, Ferenc Molnár, Sándor Petőfi, Miklós Radnóti, Mihály Vörösmarty, Attila József, Gyula Illyés, Lőrinc Szabó de Gáborjá, Sándor Márai, Dániel Berzseny, Antal Csengery, Zsolt Beöthy. In total 20 authors & it is only a very partial list of the important Hungarian literature. I am familiar only with Ferenc Molnar's works.

19. **SERBIAN:** Janko "Jan" Veselinović, Lazar "Laza" Lazarević, Milovan Glišić, Stevan Sremac, Radoje Domanović, Svetolik Ranković, Veljko M. Milićević, Borisav "Bora" Stanković, Ljubomir Nenadović, Jovan Sterija Popović, Vojislav Ilić, Branislav Nušić, Lazar Komarčić, Milan Rakić, Veljko Petković, Sima Pandurović, Milutin Bojić, Milorad J. Mitrović, Vladimir Stanimirović, Danica Marković. In total 20 authors & it is only a partial list of the important Serbian literature. I am not familiar with any of those authors' works.

20. **CROATIAN:** Ivan Mažuranić, Petar Preradović, Dragutin Rakovac, Ljudevit Farkaš Vukotinović, Antun Nemčić Gostovinski, Matija Mažuranić, Ivan Kukuljević Sakcinski, Antun Mihanović, Adolfo Veber Tkalčević, Mirko Bogović, Dragojla Jarnević, Franjo Marković, Ante Starčević, Josip Eugen Tomić, Antun Gustav Matoš, Dinko Šimunović, Antun "Ante" Kovačić, Silvije Strahimir Kranjčević, Ivo Andrić (Nobel Yugoslavia 1961), Dragutin Domjanić. In total 20 authors, 1 Nobel. It is only a partial indicative list of important Croatian literature. I am not familiar with those authors' works, I have only researched them.

21. **UKRAINIAN:** Ivan Franko, Mikhailo Kotsiubynsky, Lesya Ukrainka, Mykhailo Starytsky, Nikolay Kostomarov (Russian who wrote in Ukrainian and Russian), Ivan Kotliarevsky, Taras Shevchenko, Panas Myrny, Olena Pchilka, Ivan Kulyk, Borys Antonenko-Davydovych, Bohdan Ihor Antonych, Ivan Bahrianyi, Mykola Khvylovy, Olha Yulianivna Kobylanska, Mykola Kulish, Andriy Samiylovych Malyshko, Mykola Platonovych Bazhan, Viktor Petrov with pen names V. Domontovych and Viktor Ber, Yaroslav Olexandrovych Halan. In total 20 authors writing in Ukrainian. Some of them I read in Ukrainian and enjoyed. This is of course only an indicative list of the Ukrainian literature.

22. **IRISH GAELIC:** Peadar Ua Laoghaire, Patrick Padraic Pearse, Mairtin O Cadhain, Tomas O’Crohan, Peig Sayers, Maurice O’Sullivan, Seamus O Grianna, James Hardiman (anthology), Samuel Ferguson (Ogham), Padraic O Conaire. In total 10 authors from Ireland writing in Irish Gaelic. I have read Padraic Pearse in English and enjoyed. Irish authors have contributed much more to world literature but most of them have written in English (above).

23. **BULGARIAN:** Ivan Vazov, Pencho Slaveykov, Aleko Konstantinov, Dimcho Debelyanov, Peyo Yavorov, Hristo Smirnenski, Geo Milev, Krastyo Krastev, Fani Popova-Mutafova, Petko Todorov. In total 10 authors, whom I have not read but researched. 1 author Elias Canetti, born in Bulgaria but educated in Germanic countries and writing in German, received the Nobel Prize in 1981, but he lived in Bulgaria only from 1905 to 1911.

24. **ALBANIAN:** [Naim Frashëri](#) , [Gjergj Fishta](#), Millosh Gjergj Nikolla – Migjeni, [Lasgush Poradeci](#), [Fan Stilian Noli](#) , Mihal Grameno, [Faik Konitza](#), [Ernest Koliqi](#), [Mitrush Kuteli](#), Haki Stërmilli. In total 10 authors and it is just a partial list of the Albanian literature. I am not familiar with any of those authors’ works, and I only researched them in an indicative way.

25. **ARMENIAN:** Khachatur Abovian, Mikayel Nalbandian, Hakob Melik Hakobian, Arpiar Arpiarian, Levon Pashalian, Krikor Zohrab, Hovhannes Tumanyan, Yeghishe Charents, Hovhannes Shiraz, Hagop Baronian. In total 10 authors and it is just a partial list of the Albanian literature. I am not familiar with those authors’ works, and I only researched them.

26. **GEORGIAN:** Nikoloz "Tato" Baratashvili, [Count](#) Alexander Orbeliani, Prince Vakhtang Orbeliani, Prince Dimitri Ivanese dze Kipiani, Prince Grigol Orbeliani, [Prince](#) Ilia Chavchavadze, [Prince](#) Akaki Tsereteli, [Alexander Kazbegi](#) , Prince Raphael Eristavi, Iakob Gogebashvili. In total 10 authors (5 of them princes) and it is just a partial list of the Georgian literature. I am not familiar with those authors’ works, and I have only researched them.

27. **LITHUANIAN:** Simonas Daukantas, [Mikalojus Akelaitis](#), Bishop [Motiejus Valančius](#), Bishop [Antanas Baranauškas](#), Vaclovas Biržiška, [Kazys Binkis](#), Priest Maironis (born Jonas Mačiulis), Vincas Krėvė-Mickevičius, Jurgis Savickis, [Vincas Mykolaitis-Putinas](#). In total 10 authors (3 of them priests) and it is just a partial list of the Lithuanian literature. I am not familiar with any of those authors’ works, and I only researched them in an indicative way.

The 12 literatures above are divided between the 6 more prolific: Romanian, Turkish, Hungarian, Serbian, Croatian, Ukrainian, from which I have included 20 authors each (120 authors in total) and the 6 less prolific, but no less important: Irish Gaelic, Bulgarian, Albanian, Armenian, Georgian, Lithuanian, from which I have included 10 authors each (60 authors in total). The number of authors of those 12 literatures amount therefore to **180** authors. We could survey also 12 additional & even less prolific European literatures, such as [Macedonian literature](#), [Estonian literature](#), [Latvian literature](#), [Belarusian literature](#), [Slovak literature](#), [Maltese literature](#), [Bosnian](#) literature, [Icelandic literature](#) (Halldór Kiljan Laxness received a Nobel Prize in 1955 but was active also in the book’s twelfth), [Moldovan literature](#), [Montenegrin literature](#), [Azerbaijani literature](#), [Slovene literature](#), and many other regional languages, but we have decided to survey, based on materiality, only those 32 European languages literatures – 1. The 3 most significant literatures in French, English, German, which are actually 6 if we count the main literatures within each language – France, UK, US, Ireland, Germany, Austria. 2. The 3 more significant literatures in Spanish, Russian, Italian, which are actually 4 if we count the main literatures within each language – Spain, Latin America (comprising at least 9 countries in this survey with authors writing in Spanish), Russian, Italian. Together with most significant – **10**. 3. The **10** significant literatures - Portuguese/Portugal, Portuguese/Brazil, Dutch/Netherlands, Czech/Czechia, Greek/Greece,

Polish/Poland, Swedish/Sweden, Norwegian/Norway, Danish/Denmark, Finnish/Finland. 4. The **12** other European literatures: Romanian/Romania, Turkish/Turkey, Hungarian/Hungary, Serbian/Serbia, Croatian/Croatia, Ukrainian/Ukraine, Irish Gaelic/Ireland (not including Irish authors who wrote in English), Bulgarian/Bulgaria, Albanian/Albania, Armenian/Armenia, Georgian/Georgia, Lithuanian/Lithuania. In total – **32 European literatures in 1820-1939**.

But our survey included authors from at least **40** more countries or regional languages (altogether authors from **72** countries who wrote in main/different/regional languages): Belgium/Flemish/French, Switzerland/French/German, Canada/French/English, Australia, Haiti, New Zealand, Catalan, Austurian, Picard, Provencal, Frisian, Friulian, Sicilian, Sardinian, Romansh, Corsican, 9 countries in Latin America - Cuba, Argentina, Nicaragua, Chile, Venezuela, Mexico, Peru, Uruguay, Guatemala - and also: Afrikaans/South Africa, Papiamentu/Curacao, Luxembourgish/Luxembourg, Galego, Basque, Trinidad/English, Plattdeutsch, Alsatian, German/Czechia, German/Bulgaria, German/Sweden, French/Ireland. We have added above also links to at least **12** more European literatures which were not surveyed in this book but whose literatures are nevertheless important, amounting to **84**. Finally, we can add additional literatures in European regional and other languages: [Breton literature](#), [Cornish literature](#), [Cypriot literature](#), [Esperanto literature](#), [Jèrriais literature](#), [Manx literature](#), [Scottish literature](#), [Welsh literature](#), and [other regional European languages](#), as well as from other [Latin American countries](#) (as Ecuador, Panama, Bolivia, Costa Rica, Colombia, Dominican Republic, Paraguay, [Puerto Rico](#), US Hispanic), writing in Spanish and other languages, thus amounting to well over **100** literatures by authors writing in European languages in the twelfty 1820-1939 in Europe, Oceania and America, mostly from European descent, not including Jewish languages literatures written mainly by European authors, as well as by African and Asian non European authors writing in European languages who are surveyed in the next chapters of this book. So, this is a very extensive survey, quite unique.

TOTALS OF NOs. OF AUTHORS IN EUROPEAN LANGUAGES BY CLUSTERS

3 Most Significant Literatures – French (**160**), English (**140**), German (**120**) – **420** authors. **14** Nobel Prizes in French literatures (**12** – France, 1 Belgium in French, 1 Ireland in French). **14** Nobel Prizes in English literatures (**6** US, **5** UK, 2 Ireland in English, 1 Australia). **9** Nobel Prizes in German literatures (**5** Germany, 2 Switzerland in German, 1 Sweden in German, 1 Bulgaria in German). **37** Nobel Prizes in the Most Significant Literatures – **12** France, **6** US, **5** UK, **5** Germany, **3** Ireland, **2** Switzerland, **1** Belgium, **1** Sweden in German, **1** Bulgaria in German, **1** Australia. All the authors were active in the twelfth of 1820 to 1939.

3 More Significant Literatures – Spanish (80), Russian (70), Italian (50) – **200** authors. **8** Nobel Prizes in Spanish literatures (4 – Spain, 4 – Latin America: 2 - Chile, 1 – Guatemala, 1 Mexico). **4** Nobel Prizes in Russian literature. **5** Nobel Prizes in Italian literature. **17** Nobel Prizes in the More Significant Literatures – **5** – Italy, **4** – Russia, **4** – Spain, **2** - Chile, **1** – Guatemala, **1** Mexico. All the authors were active in the twelfth of 1820 to 1939.

Cluster of the **10** countries' authors in the **6** Most & More significant literatures – France, UK, US, Ireland, Germany, Austria, Spain, Latin America in Spanish, Russia, Italy – **620** authors. **54** Nobel Prizes – **12** France, **6** US, **5** UK, **5** Germany, **5** Italy, **4** Russia, **4** Spain, **3** Ireland, **2** Switzerland, **2** Chile, **1** Belgium, **1** Guatemala, **1** Mexico, **1** Australia, **1** Bulgaria/German, **1** Sweden/German. All the authors were active in the twelfth of 1820 to 1939.

10 Significant Literatures/Countries – Portuguese/Portugal, Portuguese/Brazil, Dutch, Czech, Greek, Polish, Swedish, Norwegian, Danish, Finnish – **200** authors (20 authors each). **19** Nobel Prizes – **6** Sweden/Swedish, **3** Norway/Norwegian, **3** Denmark/Danish, **3** Polish/2 Poland, 1 US, **2** Greece/Greek, 1 Czechia/Czech, 1 Finland/Finnish, **0** Portuguese, **0** Dutch.

Subtotal of the **16** Most/More/Significant Literatures in **20** areas/countries – **820** authors. **73** Nobel Prizes in **22** countries – **12** France, **7** US, **7** Sweden, **5** UK, **5** Germany, **5** Italy, **4** Russia, **4** Spain, **3** Ireland, **3** Norway, **3** Denmark, **2** Switzerland, **2** Poland, **2** Chile, **2** Greece, **1** Belgium, **1** Guatemala, **1** Mexico, **1** Bulgaria (German), **1** Czechia, **1** Finland, **1** Australia.

12 Other Literatures in Languages/Countries – Romanian, Turkish, Hungarian, Serbian, Croatian/Croatia (1 Nobel Prize Yugoslavia 1961), Ukrainian (20 authors each), Irish Gaelic, Bulgarian, Albanian, Armenian, Georgian, Lithuanian (10 authors each). The number of authors of those 12 literatures amount therefore to **180** important authors in the other European literatures, **1000** authors in total. From literatures mentioned above only with links and no survey, in Iceland/Icelandic literature Halldór Kiljan Laxness received a Nobel Prize in 1955, but was active also in the book's twelfth. In total – **75** Nobel Prizes in **24** countries.

In subsequent years many additional Nobel Prizes were awarded to some of the countries which received Nobel Prizes for the authors active in 1820-1939. I would like to mention here the countries which received for the first time Nobel Prizes for the literatures since 1940 – 1 Turkey (2006), 1 Colombia (1982), 1 Peru (2010), 1 Saint Lucia (1992), 1 Hungary (2002), 2 Austria (2004, 2019), 1 Canada (2013), 1 Trinidad (2001), 1 Belarus (2015), 1 Mauritius (2008), 1 Portugal (1998). In total **11** countries and **12** Nobel Prizes. **5** Nobel Prize laureates in non/European languages from **4** other states: 1 Yiddish/US, born - Poland, 1 Hebrew/Israel, born - Ukraine, 1 India/Bengali, 1 Egypt/Arabic, 1 Japan/Japanese, who were also active in the twelfth 1820-1939, – see in next chapters. In total **80** Nobel Prizes in **28** countries.

TOTAL NO. OF IMPORTANT EUROPEAN AUTHORS IN TWELFTH 1820-1939: 1000

JEWISH LANGUAGES LITERATURES

If we summarize this subsection at the end of the list of the European authors, which includes authors who wrote in Hebrew or Jewish languages (Yiddish, Ladino and Judeo-Arabic) it amounts to **150** authors, even less than the list of French authors. The question is – do we have to include this subsection in the European languages or not? Actually, when observing the origin of the authors we see that almost all of them were either born in Europe or their parents were born in Europe, most of them are Ashkenazi originating from Eastern Europe. Even the Sephardis came from Bulgaria, Greece, Yugoslavia and Turkey. Most Jewish North African authors who wrote in Judeo-Arabic came originally from Spain. Only Iraqis or other Jews who were born in the Middle East are not from Europe, so this sublist is probably a European list, although Hebrew is a Semitic language, which nevertheless is the language of the Bible, the origin of most of the European cultures. It does not mean of course that those literatures are better or not than Non-European literatures, as there is no rating in literatures. The number of authors surveyed in this chapter cannot be compared to the number of authors in other countries, as it is almost the only chapter in which those literatures will be discussed, while other cultures will be surveyed extensively throughout the book. Anyhow, all the lists of authors are only indicative and the reader is invited to read on his own about all literatures. I am much more familiar with those literatures, and that is why the lists are more comprehensive, although the number of authors does not indicate in this case that those literatures are more significant or prominent than others, just that I know them much better. Another issue is the contribution of Jewish authors to European literatures in European languages in the twelfth of 1820-1939, & even more subsequently, their percentage in Nobel Prizes laureates in literature & other categories, their contribution to culture in theater, films, painting, music - classical & musicals, psychology, philosophy, sociology, science, medicine, physics, chemistry, economics, political sciences, inventions, etc., especially in Germany, Austria, France, US, UK, Russia, Italy, etc. This issue is dealt extensively in this book.

28. **YIDDISH:** Yiddish (ייִדיש, ייִדיש, or אידיש, *yidish* or *idish*, pronounced ['(j)ɪdɪʃ], lit. 'Jewish'; in older sources ייִדיש-טײַטש, *Yidish-Taytsh*, lit. 'Judaean-German') is a High German-derived language historically spoken by the Ashkenazi Jews. It originated during the 9th century in Central Europe, providing the nascent Ashkenazi community with a High German-based vernacular fused with elements taken from Hebrew and Aramaic, as well as Slavic languages and traces of Romance languages. Yiddish writing uses the Hebrew alphabet. As of the 1990s, there were around 1.5–2 million Yiddish speakers, mostly Hasidic & Haredi Jews.

1820-1939: Sholem Aleichem (Russian/American), Isaac Mayer Dick (Russian), Abraham Goldfaden (Russian born, Romanian), Mendele Mocher Sforim (Russian), I. L. Peretz (Poland), Isaac Bashevis Singer (Poland/American), S. Ansky (Russian), Jacob Gordin (Russian/American), Sholem Asch (Poland/American), Joseph Opatoshu (Poland/American). 10 authors who wrote in Yiddish and lived in Europe and the US, but also in Israel. 1 Nobel Prize laureate - Bashevis Singer. All of them were active in the twelfth 1820-1939.

Isaac Bashevis Singer (Nobel US 1978), was a Polish-born Jewish-American author. He was a leading figure in the Yiddish literary movement, writing and publishing only in Yiddish, and was awarded the Nobel Prize in Literature in 1978. S. Ansky was a Russian Jewish author, playwright, researcher of Jewish folklore, polemicist, and cultural and political activist. He is best known for his play The Dybbuk or *Between Two Worlds*, written in 1914. Jacob Gordin

was a [Russian](#)-born [American](#) playwright active in the early years of [Yiddish theater](#). He is known for introducing [realism](#) and [naturalism](#) into Yiddish theater. **Shalom Ash**, was a [Polish-Jewish](#) novelist, dramatist, and essayist in the [Yiddish language](#) who settled in the [United States](#). Joseph Opatoshu was a Polish-born [Yiddish](#) novelist and short story writer.

Sholem Aleichem is a giant author, one of the best authors of modern times, whom I like very much to read him in Yiddish. I have read in Yiddish, English and Hebrew some of the works by these authors and seen plays by some of them. **Solomon Naumovich Rabinovich**, better known under his [pen name](#) **Sholem Aleichem** was a leading [Yiddish](#) author and playwright. The musical *Fiddler on the Roof*, based on his stories about [Tevye the Dairyman](#), was the first commercially successful English-language stage production about Jewish life in [Eastern Europe](#). Isaac Mayer Dick's fame rests on his Yiddish novels, a field in which he was the first professional and the founder of a school. As he himself asserted many times, he wrote only for the purpose of spreading knowledge and morality among his readers, and in many cases he permitted this purpose to overshadow the story. Abraham Goldfaden was a [Russian](#)-born [Jewish](#) poet, playwright, stage director and actor in the languages [Yiddish](#) and [Hebrew](#), author of some 40 plays. Goldfaden is considered the father of the Jewish modern theatre. In 1876 he founded in [Romania](#) what is generally credited as the world's first professional [Yiddish-language](#) theater troupe. He was also responsible for the first [Hebrew-language](#) play performed in the United States. **Mendele Mocher Sforim**, originally **Sholem Yankev Abramovich**, was a [Jewish](#) author and one of the founders of modern [Yiddish](#) and [Hebrew literature](#). The Little Man" and the unstaged drama *Di Takse* ("The Tax") both condemned the corruption by which religious taxes This [satiric](#) tendency continued in *Die Klatshe* (*The nag*). His later work became more humane and less satiric, starting with *Fishke* and continuing with the unfinished *Masoes Beniamin Hashlishi* (*The Travels of Benjamin III.*), something of a Jewish *Don Quixote*. **Isaac Leib**, best known as **I. L. Peretz**, was a [Yiddish language](#) author and playwright from [Poland](#). He is perceived together with [Mendele Mokher Seforim](#) and [Sholem Aleichem](#) as one of the three great classical Yiddish writers. Peretz rejected cultural universalism, seeing the world as composed of different [nations](#), each with its own character. He greatly respected the [Hasidic Jews](#) for their mode of being in the world; at the same time, he understood that there was a need to make allowances for human frailty. His [short stories](#) such as "If Not Higher", "The Treasure", and "Beside the Dying" emphasize the importance of sincere piety rather than empty religiosity.

Another list of 10 Yiddish prominent authors include: **Celia Dropkin**, a poet, born in Russia, 1887-1956. **Anna Margolin** ([Yiddish](#): אַננאַ מאַרגאָלין) is the [pen name](#) of **Rosa Harning Lebensboym** (1887–1952) a 20th century [Jewish Russian-American](#), [Yiddish language poet](#). **Kadia Molodowsky** ([Yiddish](#): קאַדיע מאָלאָדאָווסקי — *Kadie Molodovski*; May 10, 1894 in [Byaroza](#) – March 23, 1975 in [Philadelphia](#)) was a Russian-Jewish-born American poet and writer in the [Yiddish language](#), **Hinde Ester Singer Kreytman** (31 March 1891 – 13 June 1954), was a [Yiddish-language](#) novelist and short story writer. She was born in [Biłgoraj](#), [Congress Poland](#) to a rabbinic [Jewish](#) family. Her younger brothers [Israel Joshua Singer](#) and the well-known [Isaac Bashevis Singer](#) subsequently became writers. **Yitzchak Rayz** (1885, [Narayiv](#) - 1943), better known by his pen name Moyshe Nadir ([Yiddish](#): משה נאָדיר; also transliterated "Moishe") was an American [Yiddish language](#) writer and satirist. Rayz was born in the town of Narayev, in [eastern Galicia](#), then [Austro-Hungary](#). He died in 1943, in [Woodstock](#), [New York](#). **Mani Leib** (**Mani Leyb**, [Yiddish](#): מאַנִי לײב; born **Mani Leib Brahinsky**, [Russian](#): Мани Лейб Брагинский; 20 December 1883, [Nezhin](#), [Russian Empire](#) – 4 October 1953, New York) was a [Yiddish-language](#) poet. **I. M. (Isaac Meir) Weissenberg** (1878/1881, [Żelechów](#) - August 13,

1938, [Warsaw](#)) was a [Yiddish](#)-language writer in [Warsaw, Poland](#). A disciple of [I.L. Peretz](#). **Morris Rosenfeld** (**Moshe Jacob Alter**) (December 28, 1862 in [Stare Boksze](#) in Russian [Poland](#), government of [Suwalki](#) – June 22, 1923 in [New York City](#)) was a [Yiddish](#) poet. **Morris Winchevsky** (**Leopold Benzion Novokhovitch**; **Pseudonym**: **Ben Netz** (**Hebrew**: 'Son of Hawk'; 1856–1932) was a prominent [Jewish socialist](#) leader in [London](#) and the [United States](#) in the late 19th century. Born in [Jonava, Lithuania](#) in 1856, Winchevsky later moved to London where, already a well known socialist, he founded the *[Der Poylisher Yidl](#)* (The Little Polish Jew), one of the first [Yiddish](#) daily socialist newspapers; and the *[Arbeter Fraynd](#)*, the first Yiddish-language anarchist newspaper. **David Edelstadt** (May 9, 1866, [Kaluga, Russia](#) – 17 October 1892, [Denver, Colorado](#)) was a [Russian-American anarchist poet](#) in [Yiddish](#). Edelstadt immigrated to Cincinnati. Those 10 authors together with the 10 former better known authors, altogether 20, were active in the twelfty 1820-1939. Actually this is only an indicative list as there wre dozens more authors.

29. **LADINO**: **Judaeo-Spanish** or **Judeo-Spanish** (autonym *djudeoespanyol*, [Hebrew script](#): ג'ודיאוראיספאניול, [Cyrillic](#): judeoespaњол), called **Ladino** by some in recent times, is a [Romance language](#) derived from [Old Spanish](#). Originally spoken in Spain and then after the [Edict of Expulsion](#), spreading through the then-[Ottoman Empire](#) (the [Balkans](#), [Turkey](#), the [Middle East](#) & [North Africa](#)) as well as [France](#), [Italy](#), [Netherlands](#), [Morocco](#) and [England](#), it is today spoken mainly by [Sephardic minorities](#) in more than 30 countries, with most of the surviving speakers residing in [Israel](#). Although it has no official status in any country, it has been acknowledged as a [minority language](#) in [Bosnia & Herzegovina](#), Israel, France, Turkey. It is also formally recognised by the [Royal Spanish Academy](#). Ladino is my mother tongue.

1820-1939: Elia Carmona (Turkey), David Fresco (Turkey), Alexander Ben Guiat (Turkey), [Moshe David Gaon](#) (Bosnia, Israel), [Moshe Attias](#) (Greece, Israel), Rabbis Haim Palachi, Abraham Palachi and Nissim Palacci from Turkey, [Yosef Avraam Papo](#) (Bulgaria), Binyamin Rafael B'Yosef (Israel). 10 authors – 6 from Turkey, 1 Bosnia, 1 Greece, 1 Bulgaria, 1 Israel. The list is only indicative and not comprehensive. All of them were active in 1820-1939.

Elia Carmona, native of Constantinople, was the most prolific known author of original Judeo-Spanish novels (romansos). Carmona also founded and edited, El Gugeton, longest surviving of the satirical Judeo-Spanish newspapers inaugurated after the 1908 Young Turks' revolution. Carmona was one of the greatest Ladino authors and journalists in Ladino. He wrote dozens of novels that were very popular among the Sephardis. His works are perceived as one of the highlights in the Golden Age of Ladino in modern times. **David Fresco** is known mostly as the editor for almost fifty years of the Ladino newspaper in Turkey El Tiempo. David Fresco aligned with prominent anti-Zionist Rabbi [Chaim Nahum](#). Fresco argued in favour of assimilation of the Ottoman Jews into Turkish society and the promotion of the use of Turkish language. He wrote many novels and books in Ladino – El bezero de oro, La ermoza Judia de Espania... & in French - Le Sionisme. **Alexander Ben Guiat** was a Ladino journalist, author, translator, poet, playwright and publisher in Turkey and he is perceived as one of the most prominent authors in Ladino in modern times. He wrote many novels – Los suvenires del meldar, Mis tres kaveyos blankos, El jurnal de un resien kasado, La istoria de mi senior padre, Salvado por su ija, La ermosa viuda, El muerto ke esta vivo, Banios de sangre, La maldision del djidio, La kavesa del brigante, Fuego! **Moshe David Gaon** was an historian, researcher of the history of the Oriental Jews, a Bibliograph, educator, journalist and poet. He was born in Bosnia and settled in Israel/Palestine as a young man. He is the father of the Israeli actor and singer Yehoram Gaon. Gaon published many research books on the Sephardi and Oriental Jews, including the well-known "Oriental Jews in Eretz Israel in the Past and Present". He wrote in many newspapers in Ladino and other languages.

He wrote poetry "Poesias" in Ladino, and the largest bibliography of newspapers in Ladino. **Moshe Attias** was born in Greece and came as a young man to Israel/Palestine. He wrote articles in many newspapers in Ladino and other languages. His most well-known books are *Romansero Sephardi* and *Canzoniero Sephardi*, giving a rich and vivid picture of songs and poems of the Sephardis. **Haim Palachi** ([Hebrew](#): חיים פלאכי [Yiddish](#): חיים פאלאדזשי; Acronym: MaHaRHaF or HaVIF) (January 28, 1788– February 10, 1868) was a [Jewish-Turkish](#) chief rabbi of [Smyrna \(İzmir\)](#) and author in [Ladino](#) and Hebrew. His titles included [Hakham Bashi](#) and [Gaon](#). Palacci began writing at the age of sixteen and wrote more than 70 or 80 religious works, published in Salonica, Istanbul, Jerusalem, and Izmir. Of these, he wrote: 7 works on the Bible, nine essays on the Talmud, 15 books of Midrash and homiletics, moral books, and 24 connected to law, acceptance, Q&A, and other subjects. Some of his works were handwritten. Many remain in print (reprinted) to this day. **Abraham Palacci** (1809 or 1810–January 2, 1898) was a grand rabbi and author (in [Ladino](#) and Hebrew) of Izmir, was the son of grand rabbi [Haim Palachi](#) and brother of grand rabbi [Rahamim Nissim Palacci](#) and rabbi [Joseph Palacci](#). Twenty books by Palacci remain in print; other writings burned in a great fire in Izmir (which also burned his father's manuscripts). **Rahamim Nissim Isaac Palacci** (also "Palaggi," "Palagi," "Falaji," and many variations) (1813–1907) was a rabbi and author in Izmir, Turkey, and descendant of the [Pallache family](#). His works include, among others, *Avot haRosh*, *Yafeh laLev*, *Beautiful Soul*, *Beautiful Eye*. Yosef Avraam Papo, a Ladino playwright was born in Ruschuk, Bulgaria, in 1865. He is known mainly for his classic play: *Vinya de Navot* : drama bibliko en sinko aktos en versos – Navot's Vine, a biblical drama in 5 acts in verse, which I have read. Binyamin Rafael B'Yosef, who lived in Israel/"Palestine" is known for the novels that he wrote, as: *Salvator y Paolina o el korason*.

I have read novels, plays and poetry in Ladino (Rashi and Latin) from the 19th and 20th century. I would like to make an exception to the methodology of this book, as a gesture to my beloved mother Pauline (Simon) Cory and father Albert (Avraham) Cory, who taught me Ladino, sang me kantigas and romansas, and were born in Sephardic families from Greece, Turkey and Egypt. As Ladino is experiencing a renaissance in the last decades, especially in Israel, I would add to the 10 authors mentioned above who were active in 1820 to 1939, 10 more names of authors – in total 20 authors, almost all born in that twelfty but who were active later: [Yitzhak Isaac Levy](#) (anthology), [Yitzhak Navon](#) (Bustan Sefardi), [Yehoram Gaon](#) (From Toledo to Jerusalem), [Matilda Koen Sarano](#) (lejendas, konsejas), [Isaac Moscona](#) (kuentos), [Moshe Shaul](#) (Aki Yerushalaim, Ladino radio programs), [Moshe Ha-Elion](#) (holocaust poetry), [Yitzhak Goren](#) (proverbos), Rachel Bortnick ([Ladinokomunita](#)), [Roz Kohen](#) (dual language). This is of course an indicative list and we could add more authors.

3 of the most famous authors in Ladino in the second half of the 20th century, who contributed to the renaissance of Ladino in Israel and in the world, were born within the twelfty of 1820-1939, but were active decades later – Yitzhak Levy, Yitzhak Navon, Yehoram Gaon.

First of all [Yitzhak Isaac Levy](#) who was born in a small town near Smyrna, hometown of my father, in 1919 and has lived all his life in Jerusalem since 1922. He was an Israeli singer-songwriter, musicologist and composer in Ladino/[Judeo-Spanish](#). He also worked as director of a radio program and was an author of various works on musicology. Isaac Levy composed music for [Biblical](#) verses and hymns written by poets of the golden age of Jewish culture in [Spain](#), such as [Judah Halevi](#), [Ibn Gabirol](#), [Abraham Ibn Ezra](#), and others. In 1954 he founded for the Israeli public radio, [Kol Yisrael](#) ('Voice of Israel'), a series of broadcasts in the [Ladino](#) language. With his wife, [Kohava Levy](#) (born in 1946), Isaac Levy had a daughter, [Yasmin Levy](#) who continues his musical tradition. Kohava Levy is also a singer of

Sephardic songs. In 1963 he was nominated as director of the section of ethnic music of Kol Yisrael. He wrote 3 masterpieces, which are cornerstones on Ladino research:

- *Yitzhak Levy Cante Judeo-Español*. (Yitzhak Levy Sings, Judeo-Spanish) Association Vidas Largas, Paris 1980
- *Chants judéo-espagnols*. (Judeo-Spanish Songs) vol. I, London, World Sephardi Federation, [1959]; vols. II, Jerusalem, author, 1970; vol. III, Jerusalem, author, 1971; vol. IV, Jerusalem, author, 1973. Ver
- *Antología de Liturgia Judeo-Española*. (Anthology of Judeo-Spanish Liturgy) vols. I-VIII, Jerusalem, author-Ministry of Education and Culture, s.a.; vol. IX, id., 1977; vol. X, written by Moshe Giora Elimelekh, Jerusalem, Institute of Studies of Judeo-Spanish Songs, 1980

Yitzhak Levy was a [hazzan](#) (cantor), as well as a pioneer researcher into the long and rich history of the [Ladino](#) music and culture of [Spanish Jewry](#) and its [diaspora](#), being the editor of the Ladino language magazine [Aki Yerushalayim](#). He devoted his [life](#) to the collection and preservation of Sephardic [Jewish songs](#), which had been passed orally from generation to generation for more than five hundred years. He [published](#) four [books](#) of Sephardic romances and ten volumes of [liturgical](#) songs, [recording](#) many of them for the national radio.

Two other prominent writers on the Sephardic heritage are: the former Israeli President and Minister for Education [Yitzhak Navon](#), born in Israel in 1921 and author of two musicals based on Sephardic folklore: [Bustan Sephardi](#)/Sephardic Garden – 1970, and [Sephardic Romancero](#) – 1968. Navon was the author of stories, a TV series on Jerusalem, articles on Ben Gurion. The third one is the Israeli actor and singer [Yehoram Gaon](#), born in Israel in 1939 and author of [From Toledo to Jerusalem](#), where he [traces his Sephardic](#) roots in Ladino with songs and narration. The 3 authors have contributed more than anyone to the revival of the Ladino folklore. I have corresponded with Gaon & Navon & they appreciated my humble contribution to Ladino's renaissance, when I initiated, edited & participated in the translation of the UN Universal Declaration of Human Rights with Ladinokomunita into Ladino.

Wikipedia mentions as the birthplace of Gaon and Navon – Palestine, which is historically true but conceptually wrong. In those times the mandate was called “Palestine – Eretz Israel” or Palestine and people may be mistaken that they were born in Arafat's Palestine, who personally was born in Egypt but called himself a Palestinian. Jews were therefore born in Israel or Eretz Israel as the mandate was the homeland of the Jews, and Arabs were born in Palestine as they still believe that all the mandate's territories are their homeland, encompassing today: Israel – the Jewish homeland, the Palestinian Authority of Fatahland, the Gazza Strip of Hamasland, and the Hashemite Kingdom of Jordan, which was Transjordan. One can read three different versions of this issue on Wikipedia in English, Hebrew & Arabic.

Matilda Koen-Sarano (in [Hebrew](#): מתילדה כהן-סראנו), is an Israeli writer, born in [Milan](#), Italy in 1939 to [Turkish Jewish](#) parents is one of the most widely known writers in the [Ladino language](#). Koen-Sarano was born in [Milan](#) in 1939 to a Sephardic family from Turkey. She made [aliyah](#) in 1960. In the summer of 1979, she participated in the seminar for [Ladino language](#) radio producers held at [Kol Israel](#). This sparked in her the desire to write in this language and of putting the spotlight on everything she lived by the end of her childhood. In order to achieve this, she started interviewing several people from the [Sephardic](#) world to record and keep hundreds of folk tales and traditional stories. She published her first book of Sephardic folk tales, named **Kuentos del Folklor de la Famiya Djudeo-Espanyola** in 1986, in [Jerusalem](#). In April 2009 she published her most recent book, "Kon bayles i kantes,

Sefaradis de dor en dor" (With Dances and Songs, Sephardim from Generation to Generation). Koen-Sarano has taught [Ladino](#) at the [Ben-Gurion University of the Negev](#) since 1996 and a course for Ladino Teachers, organized by The [National Authority for Ladino and its Culture](#), in [Jerusalem](#) since 1998. Also, she writes the Judeo-Spanish News at [Kol Israel](#).

Isaac Moscona wrote several books in Ladino, such as Kuentos – Tales, folklore, sayings, Ladino culture and a Ladino-Bulgarian dictionary. He was born in Plovdiv, Bulgaria in 1904. **Moshe Shaul** was born in Izmir, Turkey in 1929 and lives in Israel since 1949. He managed Kol Israel in Ladino from 1977 to 1994 and has founded the most popular cultural journal in Ladino – Aki Yerushalayim. He initiated the program on Ladino folklore which during 1978-1990 recorded and catalogued 2700 songs in Ladino. He published many books and articles. **Moshe Ha-Elion** (also written Moshe Haelion, Moshe 'Ha-Elion, Moshé Ha-Elion, Moshé 'Ha-Elion, Moshé Haelyon) is a [Holocaust survivor](#) and writer. He was born in [Thessaloniki, Greece](#), on February 26, 1925. He survived [Auschwitz](#), the [death march](#), [Mauthausen](#), [Melk](#), and [Ebensee](#). He is the author of a memoir, מיצרי שאול (Meizarey Sheol), originally written in Hebrew and translated into English as *The Straits of Hell: The chronicle of a Salonikan Jew in the Nazi extermination camps Auschwitz, Mauthausen, Melk, Ebensee*. He wrote three poems in [Ladino](#) based on his experience in the concentration camps and the death march: "La djojenika al lager", "Komo komian el pan", and "En marcha de la muerte", published in Ladino and Hebrew under the title *En los Campos de la Muerte*. Moshe Ha-Elion has translated Homer's *Odyssey* into Ladino. He lives in Israel.

Yitzhak Gormezano Goren (born 1941) is an Egyptian-born [Israeli](#) writer. He was born in [Alexandria](#) but migrated to [Israel](#) as a child. He received an MFA in theater directing from [Brooklyn College](#). He co-founded the [Kedem Stage Theater](#) in [Tel Aviv](#) in 1982, and ran it for three decades. As a writer, Gormezano Goren is known for his 1978 novel *Alexandrian Summer*, which was translated into English by [Yardenne Greenspan](#). He won the [Ramat Gan Prize for Literature](#) and the [Prime Minister's Prize for Hebrew Literary Works](#). He wrote a masterpiece, a four books biography/Quartet on Dona Grazia, and a book on proverbs in Ladino. He participated on several occasions in many Ladino symposiums. **Roz Kohen**, born in 1949 in Istanbul, Turkey, and living in the US, has written many dual languages books in Ladino and English, such as Jewish Istanbul, La vava de Estambul, etc. **Rachel Bortnick**, born in 1938 in Izmir, Turkey, and living in the US. Bortnick has founded [Ladinokomunita](#) in 1999, a cybernetic community of Ladino speakers, where more than 1,400 members from 40 countries in Europe, the US, Latin America, Israel, and other countries, exchange views on Ladino, its culture, Sephardic history, linguistics, even sayings & recipes. The forum has published also a dictionary and a translation into Ladino of the UN Universal Declaration of Human Rights, which she has co-edited with Jacques Cory who has [initiated](#) the contacts with the UN. Bortnick writes in Ladino, for the websites El Amaneser, Sephardic Horizons, [turkisrael.org](#), [eSefarad.com](#). She taught Ladino courses for the Sephardic Brotherhood via Zoom. She was one of 8 people chosen as “balabayes” for the series of Ladino programs called ‘Enkontros de Alhad.’ Her first ‘musafir’/guest was Moshe Shaul.

My humble contribution to Ladino culture was very small, [Jacques Cory](#) (Heritage). I have initiated with the UN, co-edited with Rachel Bortnick, and participated with Ladinokomunita in the Translation of UN's Universal Declaration of Human Rights into Ladino. I have discovered the Old Synagogue of Coria, hometown of our family, [Halapid US En.](#), and have written a book on my [Ladino Heritage](#). My main achievements were in other domains as can be learned from this entry: **Jacques Cory** (Hebrew: יעקב קורי; born June 5, 1944) is a pioneering author in business ethics who lectured in 2004-2014 at INSEAD, Universities of Haifa, Tel Aviv, Technion, Naval Academy, & specialized in international business, turnarounds, M&A in Europe, US & Israel. Cory predicted in a 2009 Book a Doomsday

Depression by 2020, conducted a Research proving Strong Correlation between Prosperity & Ethics in Countries, Initiated The Second Republic of Israel Vision, and published the First Academic Books/Rules on Business Ethics for Minority Shareholders.

30. **JUDEO-ARABIC:** The **Judeo-Arabic dialects** ([Arabic](#): [عربية يهودية](#); [Hebrew](#): [ערבית יהודית](#)) are a continuum of [specifically Jewish varieties of Arabic](#) formerly spoken by the Jews of the [Middle East](#) and [North Africa](#). The term *Judeo-Arabic* can also refer to [Classical Arabic](#) written in the [Hebrew script](#), particularly in the [Middle Ages](#). Many significant Jewish works, including a number of religious writings by [Saadia Gaon](#), [Maimonides](#) and [Judah Halevi](#), were originally written in Judeo-Arabic, as this was the primary [vernacular language](#) of their authors. Like other Jewish languages and dialects, Judeo-Arabic languages contain borrowings from Hebrew and Aramaic. Jews in Arabic, Muslim majority countries wrote—sometimes in their dialects, sometimes in a more classical style—in a mildly adapted [Hebrew alphabet](#) rather than using the [Arabic script](#), often including [consonant](#) dots from the Arabic alphabet to accommodate phonemes that did not exist in the Hebrew alphabet. Some of the most important books of medieval Jewish thought were originally written in medieval Judeo-Arabic, as well as certain [halakhic](#) works and biblical commentaries. Later they were translated into [medieval Hebrew](#) so that they could be read by contemporaries elsewhere in the Jewish world, and by others who were literate in Hebrew. These include: [Saadia Gaon's](#) *Emunoth ve-Deoth* (originally [كتاب الأمانات والاعتقادات](#)), his [tafsir](#) (biblical commentary and translation) and *siddur* (explanatory content, not the prayers themselves). [Solomon ibn Gabirol's](#) *Tikkun Middot ha-Nefesh*. [Bahya ibn Paquda's](#) *Kitab al-Hidāya ilā Fara'id al-Qulūb*, translated by [Judah ben Saul ibn Tibbon](#) as *Chovot HaLevavot*. [Judah Halevi's](#) *Kuzari*. [Maimonides' Commentary on the Mishnah](#), *Sefer Hamitzvot*, *The Guide for the Perplexed*, and many letters and shorter essays. Most communities also had a Bible translation into Judeo-Arabic - a *sharḥ* ("explanation").

List of 30 authors in Judeo-Arabic and Jewish authors in Arabic in the last two centuries:

1. **Mir** (also transliterated as **Me'ir** and **Meer**) **S. Baṣrī** ([Arabic](#): [مير بصري](#); 1911-2006) was an [Iraqi Jewish](#) writer, economist, journalist, and poet. Among many public positions he held, Basri served as the head and central leader of [Baghdad's Jewish community](#). During his career, Basri wrote in a variety of genres, including poetry, biography, periodical, and essay and memoir. Much of his writing is centered on his identity as a [Jew living in the Arab world](#) during the [establishment of Israel](#); themes of patriotism, homeland, [Zionism](#), and religion are common. Basri described himself as being enthralled with Arabic, particularly [Arabic poetry](#), and published much of his work in the language. In early January 1969, Basri, then-Chairman of the [Jewish Council of Iraq](#), was detained for almost two months for interviewing an American who the Iraqi government alleged to be a spy. His detention has been characterized as motivated by [antisemitic efforts](#) to censor the Iraqi Jewish community. In the early 70's Basri, who had originally been unwilling to immigrate from his home country, left Iraq for [Amsterdam](#). From Amsterdam, he immigrated to the UK where he lived until his death in 2006. 2. **Anwar Shā'ul** ([Hebrew](#): [אנואר שאול](#), [Arabic](#): [أنور شاول](#), 1904–1984) was an [Iraqi Jewish](#) journalist, publisher, author, translator, and poet. Shaul was born in [Hillah](#) in 1904 to a second generation Austrian-Iraqi mother and a [Mizrahi](#) father. He originally trained as a lawyer at the [Baghdad Law College](#), graduating in 1931. Shaul served as editor of the Arabic-language Iraqi [Zionist](#) journal, *al-Miṣbāḥ* ([Hebrew](#): [אל-מצבאח](#), [Arabic](#): [المصباح](#)), from 1924 to 1925. In his contributions to the publication, Shaul wrote under the pseudonym Ibn al-Samaw'al (an allusion to the poet, [Samaw'al ibn 'Adiya](#)). From 1929 to 1938, Shaul founded and worked as editor of *Al Hassid* ([Arabic](#): [الحاسد](#), [lit.](#) "The Reaper"), a weekly literary magazine. The publication featured significant political commentary including criticism of European fascism and advocacy for full Iraqi

independence from Britain. Under his leadership, *Al Hassid*, became the foremost Baghdadi weekly. In addition to his publication of periodicals, Shaul published a number of longer works including memoirs, translations of western literature into Arabic, and anthologies of short stories and poems. In 1971, Shaul, who had initially been resistant to leave Iraq, immigrated to Israel. Shaul lived in Israel until his December 1984 death.

3. **Jacob Chemla** (1858 -1938) was a [Tunisian Jewish ceramic artist](#), as well as an author, journalist and translator in [Judeo-Tunisian Arabic](#). In 1878, Chemla began a career in journalism with his brother-in-law, [Messaoud Maarek](#). For over thirty years, until 1925, he helped bring in a period of growth in [Judeo-Tunisian Arabic](#) literature. He published two novels, *Amour et malice* (Love and Malice) in 1912 and *Les Cœurs purs* (The Pure Hearts) in 1923. Chemla translated multiple titles into [Hebrew](#) and [Judeo-Tunisian Arabic](#), including *The Jews of Spain at the Time of the Inquisition* and *The Count of Monte Cristo*, which he originally released as a serial and later in full during the 1880s. 4. **Masoud Maarek**, known also as Ben Amitai (1858-1941) was one of the pioneers of journalism and literature in Judeo-Arabic in Tunisia. He founded the newspaper *AlBustan* in 1888 with Jacob Shemla with a Zionist approach. Maarek published also translated novels into Judeo-Arabic. He wrote also novels (*Beautiful Esther*) & translations such as “*Ahavat Zion*” by Abraham Mapu.

5. **Sasson Somekh** ([Hebrew](#): ששון סומך) (1933 – 18 August 2019) was an Israeli academic, writer and translator. He was [professor emeritus](#) of [Modern Arab Literature](#) at [Tel Aviv University](#). Sasson Somekh was born in [Baghdad](#) to a secular [Jewish](#) family. In 1951, Somekh and his family [immigrated](#) to [Israel](#). He did not know Hebrew at the time, but started learning it in earnest in order to achieve his goal of becoming a translator of Arabic poetry into Hebrew. His first translation was published in 1954 in *Ner*, a journal published by [Ihud](#) ("Unity"), an association dedicated to the advancement of Arab–Jewish reconciliation established by [Judah Magnes](#). Somekh earned a Bachelor's degree in Hebrew Language and History from Tel Aviv University, and a Master's degree in Linguistics of Semitic languages at the [Hebrew University of Jerusalem](#). In 1962–1965, Somekh served as scientific secretary of the [Academy of the Hebrew Language](#). He did his doctorate at [Oxford University](#) in 1966–1968. His subject was the novels of [Naguib Mahfouz](#), concentrating on the [Cairo Trilogy](#). Over the years Mahfouz and Somekh became friends. The thesis supervisor was Egyptian scholar [Mustafa Badawi](#). Upon his return to Israel he became a lecturer in Arabic Literature. He served as chairman of the Arabic Language and Literature department at Tel Aviv University in 1972–1984. In 1980, he became a full professor. Between 1982 and 2003, he held the Helmos Chair for Arabic Literature. In 1996–1998 he was head of the [Israel Academic Center](#) in Cairo. He was a visiting professor at [Princeton University](#), [St Antony's College, Oxford](#), [Annenberg Research Institute, NYU](#) and [Uppsala University](#). In 2004, he received an honorary doctorate from [Ben Gurion University](#). He is among the founders of the Arabic Language Academy in Israel, established in December 2007 in collaboration with several former students. He wrote ten books, many translations from Arabic to Hebrew, among which are four anthologies of modern Arabic poetry, and about 90 articles in academic journals. Over the past 50 years Somekh published hundreds of articles in literary magazines and supplements such as [Iton 77](#), *Halikon* and *Moznayim*. His articles deal mainly with modern Arabic literature and writers, connections between Arabic and Hebrew literature and the [Cairo Geniza](#). He was a regular contributor to the newspaper [Haaretz](#).

6. **Sami Michael** ([Hebrew](#): סמי מיכאל, [Arabic](#): سامي ميخائيل; born August 15, 1926) is an Israeli Hebrew author, having migrated from [Iraq](#) to Israel at the age of 23. Since 2001, Michael has been the President of [The Association for Civil Rights in Israel](#) (ACRI). Michael was among the first in Israel to call for the creation of an independent Palestinian state to exist alongside Israel. In his novels, Michael writes about the aspirations and struggles of both Jews and

Arabs. This new approach in modern Hebrew literature was controversial and has been widely discussed in universities and in the media. Michael was awarded the [EMET Prize](#) in 2007. Michael defines himself not as a [Zionist](#), but as an Israeli in order to make room for the inclusion of all citizens in Israel ([Unbounded Ideas](#)). Michael settled in an Arab quarter of [Haifa](#), [Wadi Nisnas](#). He was invited to work for a newspaper by [Emil Habibi](#). Michael was the only Jew on the editorial board of [Al Ittihad](#) and [Al Jadid](#) (Arabic language newspapers of the communist party), where he worked as an editor for four years. At the same time, he had a weekly column in which he wrote stories and articles under the pseudonym Samir Mareed. His stories, while written in the spirit of "socialist realism", were laced with irony and humor. In 1955, disillusioned with the policies of the USSR, he terminated his affiliation with the communist party, and concluded his work on both papers: "I left the party but not the ideals of socialism." Michael worked as a [hydrologist](#) in the north of Israel (for 25 years). He completed his hydrology studies at [the British Institute](#) (London) and went on to study [Psychology](#) and [Arabic Literature](#) at the [University of Haifa](#). Two cities feature in many of Michael's novels. *Victoria*, *Storm among the Palms*, *A Handful of Fog* and *Aida*, are set in his home town [Baghdad](#), and *Refuge*, *A Trumpet in the Wadi*, *Water Kissing Water*, and *Nabila* are set in [Haifa](#), his adopted city. Michael wrote about his departure from Iraq and arrival in Haifa when he wrote of his first day in Haifa, Israel.

7. **Samir Naqqash** ([Hebrew](#): סמיר נקאש, [Arabic](#): سمير نقاش; b. [Baghdad](#) 1938, d. [Petah Tikva](#) 6 July 2004) was an Israeli novelist, short-story writer, and playwright who immigrated from Iraq at the age of 13. In the 1970s, he studied at the [Hebrew University of Jerusalem](#), and received his degree in [Arabic literature](#). He was well known in the Arab world and among the Iraqi community in Israel, but only one of his works was translated into [Hebrew](#). Naqqash won the Israeli Prime Ministerial Award for Arabic literature. Naqqash often called himself an Arab who believed in Judaism. In the documentary "[Forget Baghdad](#)" (2002), he said that he had not wanted to go to Israel but was taken there in handcuffs by the [Jewish Agency](#). He never felt at home in Israel, and considered himself an Iraqi in exile. He continued to publish and write in Arabic. He saw himself as part of the great tradition of Arabic folklore and literature. He was often criticized for his Arabic sounding first name but he refused to change it. After his death, Iraqi expatriates declared their wish to have him buried in Iraq, reasoning that he has shown more dedication to Iraq than any other expatriate.

8. **Shimon Ballas** - born in 1930 in Baghdad, Iraq, immigrated to Israel in 1950, and died in 2019 in Israel. In the first years of his activities as a writer he wrote in Arabic and his first book "Hamaabara" was written in Arabic but subsequently he translated it into Hebrew and it was published in Hebrew by Am Oved in 1964. A large part of his works were translated into Arabic, and some of his books were translated also in English and French: *The shoes of Tanbours* (New York : Sabra Books, 1970), *La littérature arabe et le conflit au Proche-Orient* (1948-1973), *Outcast* / translated from Hebrew by Ammiel Alcalay and Oz Shelach (San Francisco, Calif. : City Lights, 2007), *Studies in canonical and popular Arabic literature* / S. Ballas & R. Snir, editors (Toronto, Ont. : York Press, 1998). He defined himself as Jew-Arab.

9. **Yoav Hayek** – born in 1936 in Baghdad, Iraq, immigrated to Israel in 1951. In his first years of activities in Israel he wrote and published his works in Arabic in Arab journals and the Israel Broadcast Authority, mainly poetry and prose. He wrote mainly poetry in Hebrew.

10. **Rabbi Shlomo Twena** – 1855-1913, wrote in Judeo-Arabic and was active in the Iraqi Jewish community in India. Hacham Twena was the most learned religious scholar from the Calcutta community. He was born in Baghdad, and trained in the Yeshiva beth Zilka, headed by Rabbi Abdullah Somekh. Somekh's nephew Yeheskel Ben Yehosua Gubbay was a prominent businessman in Bombay related to the Sassoon family. At the request of Gubbay for a rabbi, Somekh chose his student Twena. Twena was sent to Bombay in 1880 and spent

a year and a half and then moved to Calcutta. In 1883 he became known in Calcutta for his religious learning. Hacham Twena was first employed to teach Talmud in J E D Ezra's benevolent institution, and he sold religious articles to support himself. He also performed ritual slaughter of poultry, taught Hebrew and conducted services first at the Neveh Shalome synagogue and later at the Maghen David synagogue. He branched out to establish his own synagogue in Blackburn Lane where he administered primarily to the poor in the community for daily and shabbath services. He preached in Arabic, and ran a printing press to publish his own prolific writings in Arabic and Hebrew, including proverbs and translations. There are several legends about the learned rabbi who died in 1913. It is said that 7 years before he died he became seriously ill and the community was very afraid that he would die. One member of the community said that whatever is left of his one life he would give half those years to Hacham Twena. Seven years later both men died. A scholar and man of great learning, he left behind a library of 400 books. Professor Yitzhak Avishur of Haifa has written a book about Hacham Twena entitled *The Hacham From Baghdad in Calcutta: Hacham Shlomo twena and Works in Hebrew and Judaeo-Arabic Archaeological Center* (Telaviv, 2001).

Other authors & journalists, mainly from Iraq and North Africa: 11. Elyahu Dweik Hacohen, 12. Sliman Yaoshua Ezra Yehuda, 13. Yitzhak Binyamin Yehuda, 14. Saleh Yitzhak Makmal, 15. Elisha Shohat, 16. Rabbi Yosef Haim, 17. Rabbi David Tzemah, 18. Yitzhak Bar Moshe, 19. Mordehai Tabia, 20. Bishi Shamama, 21. Eliahu Almaliah, 22. Daniel Hajaj, 23. Nazhat Katzav, 24. Moshe Baharav Meyuhas, 25. Eliahu Sliman, 26. Rahel Sali, 27. Tawfik Shamush, 28. Ezra Hadad, 29. Meir Hadad, 30. Nassim Rajuan. This is of course an indicative list, at least 20 of them were active in the twelfty 1820-1939 or at least were born in that twelfty, and we could add much more authors, poets, journalists and scholars.

31. **HEBREW:** [Yehuda Burla](#) (Israel), [Hayim Nahman Bialik](#) (Ukraine/"Palestine"), [Shaul Tchernichovsky](#) (Russia/"Palestine"), [Abraham Mapu](#) (Lithuania), [Judah Leib Gordon](#) (Lithuania/"Palestine"), [Eliezer Ben Yehuda](#) (Lithuania/"Palestine"), [Rachel Bluwstein Sela/Rachel](#) (Russia/"Palestine"), [Avraham Shlonsky](#) (Russia/Israel), [Samuel David Luzzatto/Shadal](#) (Italy), [Shai Agnon](#), Shmuel Yosef Agnon, S. Y. Agnon, was a [Nobel Prize laureate](#) (Nobel Israel 1966) writer and was one of the central figures of [modern Hebrew fiction](#). Agnon was born in [Galicia](#), [Austro-Hungarian Empire](#) (today [Ukraine](#)). He later immigrated to [Mandatory Palestine](#), and died in [Jerusalem](#), [Israel](#). His works deal with the conflict between the traditional [Jewish](#) life and language and the [modern world](#). They also attempt to recapture the fading traditions of the European [shtetl](#) (village). All of them were active in 1820-1939, the twelfty of this book, which was the initial period of Hebrew revival.

In total 10 authors who wrote in Hebrew, from 5 countries, but only one of them was born in "Palestine" (after 1948 – Israel) and lived there all his life – Yehuda Burla. Some of them never lived in "Palestine" (Mapu & Luzzatto), all the others were born outside "Palestine" & emigrated to "Palestine", only 2 of them lived long enough to live in Israel after 1948 (Shlonsky and Agnon). 3 of the authors were born in Lithuania, 3 in Russia, 2 in Ukraine, 1 was born in Italy & only 1 - a Sabra born in Israel. 8 of them were Ashkenazi Jews and 2 were Sephardi Jews. All of them were born in the 19th century, some of them lived only in the 19th century and some of them lived part or most of their lives in the 20th century. I studied about all of them, and read for pleasure only some of them, as I prefer by far the Israeli authors who wrote in the second half of the 20th century, as the 19th century authors sound archaic.

As the effervescence of Hebrew/Israeli literature achieved a worldwide fame and excellence only in the second half of the 20th century after achieving independence in 1948, I make here another exception to the methodology of the book, and I add 10 prominent Israeli authors who

wrote in the second part of the 20th century but were all born in the century of 1820-1939: Shamir – 1921, Tammuz – 1919, Amos Oz – 1939, Sobol – 1939, Yehoshua – 1936, Yonatan – 1923, Yizhar – 1916, Bartov – 1926, Gouri – 1923 and Megged – 1920.

1. **Moshe Shamir**, was an [Israeli](#) author, playwright, opinion writer, and public figure. He was a prolific author, publishing in the course of his life more than 25 books. Thus he is best recognized as a novelist and a playwright. He was elected to the Knesset in the legislative elections of 1977. He supported the settling of the West Bank after its capture. 2. **Benjamin Tammuz** was born in [Soviet Russia](#). When he was five years old, he emigrated with his parents to Palestine. He was an [Israeli](#) writer and artist who contributed to [Israeli culture](#) in many disciplines, as a novelist, journalist, critic, painter, and sculptor. While growing up, he became a member of the [Communist](#) underground. As a youth he was a member of the [Canaanite movement](#). 3. **Amos Oz** was an [Israeli](#) writer, [novelist](#), [journalist](#) and intellectual. He is also a [professor](#) of [literature](#) at [Ben-Gurion University](#) in [Beersheba](#). He is regarded as Israel's most famous living author. Oz's work has been published in 42 languages, including [Arabic](#), in 43 countries. He has received many honours and awards, among them the [Legion of Honour](#) of France, the [Goethe Prize](#), the [Prince of Asturias Award in Literature](#), the [Heinrich Heine Prize](#) and the [Israel Prize](#). In 2007, a selection from the Chinese translation of *A Tale of Love and Darkness* was the first work of modern Hebrew literature to appear in an official Chinese textbook. Since 1967, Oz has been a prominent advocate of a [two-state solution](#) to the [Israeli–Palestinian conflict](#). 4. **Joshua Sobol** is an [Israeli](#) playwright, writer, and [director](#). Joshua Sobol was born in [Tel Mond](#), Israel, then Palestine. His mother's family fled the pogroms in Europe in 1922 and his father's family [immigrated](#) from Poland in 1934 to escape the Nazis. Sobol's first play was performed in 1971 by the Municipal Theatre in [Haifa](#), where Sobol worked from 1984 to 1988 as a playwright and later assistant artistic director. The performance of his play *The Jerusalem Syndrome*, in January 1988, led to widespread protests, whereupon Sobol resigned from his post as artistic director. In 1983, after the Haifa production of his play *Weininger's Night* (The Soul of a Jew), he was invited to participate in the official part of the [Edinburgh Festival](#). Between 1983 and 1989 Sobol wrote three related plays: *Ghetto*, *Adam* and *Underground*, which constitute together *The Ghetto triptych*. *Ghetto* became world famous shortly after its premiere in Haifa in May 1984. I was a member of the Board of Directors of the Haifa theater 15 years later. The play won the Israeli David's Harp award for best play. The Israeli opening was followed by [Peter Zadek](#)'s much acclaimed German premiere of the play in July of the same year. The play and the production were chosen by *Theater Heute* as best production and best foreign play of the year. The play has been translated into more than 20 languages and performed by leading theatres in more than 25 countries throughout the world. Joshua Sobol wrote a very favorable review of my play "Nelly Doron/Nelly's Choice" (that can be read in this book), and he is a friend of mine. 5. **Abraham B. Yehoshua** - is an Israeli novelist, essayist, and playwright, published as A. B. Yehoshua. The *New York Times* called him the "Israeli Faulkner." Avraham ("Boolie") Yehoshua was born to a fifth-generation Jerusalem family of [Sephardi](#) origin. His father, Yaakov Yehoshua, was a scholar and author specializing in the history of [Jerusalem](#). His mother, Malka Rosilio, immigrated from Morocco in 1932. Since 1972, he has taught Comparative and Hebrew Literature at the [University of Haifa](#), where he holds the rank of Full Professor. In 1975 he was a writer-in-residence at St. Cross College, Oxford. He has also been a visiting professor at Harvard (1977) the [University of Chicago](#) (1988, 1997, 2000) and [Princeton](#) (1992). Yehoshua is the author of eleven novels, three books of short stories, four plays, and four collections of essays, most recently *Ahizat Moledet* (Homeland Lesson), a book of reflections on identity and literature. His most acclaimed novel, *Mr Mani*, is a multigenerational look at Jewish identity and Israel through five conversations that go

backwards in time to cover over 200 years of Jewish life in Jerusalem and around the Mediterranean basin. It was adapted for television as a five-part multilingual series by director [Ram Loevy](#). As do many of his works, his eighth novel, *Friendly Fire*, explores the nature of dysfunctional family relationships in a drama that here moves back and forth between Israel and Tanzania. His works have been published in translation in 28 countries, and many have been adapted for film, television, theatre, and opera. Yehoshua is an Israeli Peace Movement activist. He attended the signing of the [Geneva Accord](#) and freely airs his political views in essays & interviews. He is a critic of Israeli occupation but also of the Palestinians.

6. [Natan Yonatan](#), born in 1923 and died in 2004, he immigrated to Israel in 1926. Yonatan was a poet, who soon became one of modern Israel's most read and beloved poets. Notwithstanding the subtle complexity of his use of Hebrew's many registers and intertexts, his lyricism lends itself to musical composition. Dozens of his poems have become traditional favorites, set to music by Israel's foremost [songwriters](#) and [composers](#). Yonatan's poems are sung and broadcast for national occasions. 7. [Yizhar Smilansky](#) (Hebrew: יִזְחָר סְמִילָנְסְקִי, 27 September 1916 – 21 August 2006), known by his [pen name S. Yizhar](#) (ס. יִזְחָר), was an Israeli writer and politician. In 1949, he published the novella *Khirbet Khizeh*, in which he described the fictional expulsion of Palestinian Arabs from their fictional village by the [IDF](#) during the [1948 Arab-Israeli War](#). It became a best-seller and in 1964 was included in the Israeli high school curriculum. In 1978, a controversy arose after a dramatization of *Khirbet Khizeh* by director [Ram Loevy](#) was aired on Israeli television. Shapira has lamented that, despite the publishing of Yizhar's novella decades earlier, [Benny Morris](#) was able, when he published *The Birth of the Palestinian Refugee Problem, 1947–1949* in 1988, to announce "himself as the man who had laid bare the original sin of the State of Israel". In the late 1950s, his massive work *Days of Ziklag* appeared, comprising two volumes and more than a thousand pages. This work had a powerful impact on changing the outlook for Hebrew prose on the one hand, and "war literature" on the other. Although Yizhar remained in the public eye as an outstanding polemicist, he broke his decades-long literary silence only in 1992 with the publication of his novel, *Mikdamot* (Preliminaries). This was quickly followed by five additional new volumes of prose, both novels and collections of short stories. His last work, *Gilui Eliahu* (Discovering Elijah, 1999), was set in the period of the [Yom Kippur War](#). 8. **Hanoch Bartov**, 1926-2016 was an Israeli author and journalist. His most famous books that were also translated into English were: *The Brigade* – *Pitzei Bagrut*, *Everyone had six wings*, *An Israeli at the Court of St. James*, *Whose little boy are you?* *Dado*, 48 years 20 days. 9. **Haim Gouri** (1923-2018), was an Israeli poet, novelist, journalist and documentary filmmaker. His poetry was published in: *Flowers of Fire* (1949), *Poems of the Seal* (1954), *Compass Rose* (1960), *Movement to Touch* (1968), *Gehazi Visions* (1974), *The Eagle Line* (1975), etc. His fiction: *The Chocolate Deal* (1965), *The Crazy Book* (1971), *The Interrogation* – *The Story of Reul* (1980). He wrote also a book on the trial of Adolph Eichmann, and made the documentary films: *The 81st Blow* (1974), *The Last Sea* (1980) and *Flames in the Ashes* (1985). 10. **Aharon Megged** (1920-2016), was an Israeli author and playwright. He was born in Poland and immigrated to Israel in 1926. Megged was one of the founders of the *Masa* literary weekly, and served as its editor for fifteen years. He worked as a literary editor for the [Hebrew](#) newspapers *La-merhav* and *Davar*. In 1977/78 he was author-in-residence at the Center for Hebrew Studies affiliated with [Oxford University](#). He made several lecture tours of the United States, and was also author-in-residence at the [University of Iowa](#). He published 35 books. Megged's plays were performed at [Habima](#), [Ha-Ohel](#) and other theaters. His books have been translated into numerous languages and published in the United Kingdom, the United States, [Argentina](#), France, and many other countries.

To complete the overview on Israeli literature in the last decades mostly, we add a list of 40 prominent authors who wrote novels, plays & poetry (amounting to 60): [Nisim Aloni](#), [Yehuda Amichai](#), [Aharon Amir](#), [Eli Amir](#), [Aharon Appelfeld](#), [David Avidan](#), [Haim Be'er](#), [Dahn Ben-Amotz](#), [Netiva Ben-Yehuda](#), [Erez Biton](#), [Orly Castel-Bloom](#), [Leah Goldberg](#), [David Grossman](#), [Shmuel Hasfari](#), [Yoram Kaniuk](#), [Sayed Kashua](#), [Amos Kenan](#), [Etgar Keret](#), [Levin Kipnis](#), [Ephraim Kishon](#), [Hanoach Levin](#), [Savyon Liebrecht](#), [Dahlia Ravikovitch](#), [Yaakov Shabtai](#), [Nathan Shaham](#), [Meir Shalev](#), [Zeruya Shalev](#), [Ronny Someck](#), [Yona Wallach](#), [Miriam Yalan-Shteklis](#), [Natan Zach](#), [Zelda](#), [Igal Mossinsohn](#), [Abba Kovner](#), [Moshe Smilansky](#), [Agi Mishol](#), [Yonatan Ratosh](#), [Alexander Penn](#), [Nurit Zarchi](#), & [Avot Yeshurun](#).

ZIONISM/HISTORY/POLITICAL LITERATURE: The third exception to the methodology of the book is a separate survey of Zionism literature, which complements the Hebrew/Israeli/Ladino/Yiddish/Judeo-Arabic chapters. This is not exactly a literature by language or country, although all of the authors are the precursors of the state of Israel. All of them were active in the twelfth 1820-1939. I made this exception because of the wave of anti-Semitism, anti-Zionism and anti-Israelis in the world, based on fake news and ignorance of the facts, and before someone attacks us they are invited to read the Zionist literature, read the Bible, read Hebrew and Israeli literature, Jewish literature, and also read the masterpieces of a large number of Jewish authors who are part of the world literature in the US, France, UK, Germany, Italy..., who won the Nobel Literature Prize, and then decide what to believe.

[Theodor Herzl](#) (born in Budapest, lived in Austria-Hungary, wrote in German), all the others wrote in Hebrew – [Ahad Haam](#)/Asher Ginsberg (Ukraine/UK/"Palestine"), [Nathan Alterman](#) (Israel), [Yosef Haim Brenner](#) (Russia/"Palestine"), [David Frischmann](#) (Poland), [Aharon David Gordon](#) (Ukraine/"Palestine"), [Joseph Klausner](#) (Lithuania/Israel), [Uri Zvi Greenberg](#) (Ukraine/Israel), [Menahem Begin](#) (Belarus/Israel), [Amnon Shamosh](#) (Syria/Israel), [Yaakov Yehoshua](#) (Israel), [Yitzhaq Shami](#) (Israel), [Zeev Jabotinsky](#) (Russia, "Palestine"), [Menachem Usishkin](#) (Russia/"Palestine"), [David Ben Gurion](#) (Poland/Israel), [Chaim Weizmann](#) (Belarus/Israel), [Abraham Isaac Kook](#) (Latvia/Israel), and I would add also 3 philanthropists who contributed to Education, Science and Literature in Palestine, [Sir Moses Montefiore](#) (Italy/UK), [Baron Edmond Benjamin James de Rothschild](#) (France), and many oriental Jews originating from Iraq and other countries, such as [Sir Ellis Kadoorie](#) (Iraq/China), in total 20 authors. The authors originate from 11 countries: Israel (3), Ukraine (3), Russia (3), Poland (2), Austria (1), Belarus (2), Lithuania (2), Syria (1), Italy (1), France (1), Iraq (1). 15 are Ashkenazis, 5 are Sephardis/Orientals. Most of them were born in the 19th century and operated in "Palestine" prior to the establishment of Israel. Herzl founded Zionism, Ben Gurion and Begin were prime ministers of Israel, some of them wrote poetry, novels, academic researches. I have learned about all of those leaders/authors, read biographies on Herzl and Ben Gurion, read books by Herzl (The Jewish State, several times Altneuland, even in Ladino with Rashi letters translated by Jean Florian and published in the Zionist El Tiempo in Ladino in Saloniki in 1929) and anthologies on Shami, Yehoshua & Shamosh, poetry by Grinberg, Alterman, Jabotinsky, & I was exposed to Ben Gurion & Begin's works/speeches.

I hope that youngsters know at least what I and others from my generation know about Zionism and that those founders of the state and ethos of Israel are not for them just names of streets, parks and schools in Tel Aviv, Jerusalem, and other cities of Israel... And humoristically, I love very much literature, also Hebrew literature of course, and I am a fervent Zionist, and that's why I lived in Tel Aviv (named after the book Altneuland by Herzl) near streets named after most of the Hebrew/Zionist/Yiddish authors in the 19th and 20th centuries mentioned in this book. I lived in Gordon (J. L.) street corner of Ben Yehuda street, 1 minute walk from Mapu street, 2 minutes walk from Frischman, Ben Gurion, A. D. Gordon,

Sholom Aleichem, Mendelei streets, 5 minutes walk from Tchernichovsky, Bialik, Jabotinsky and Usishkin streets, 10 minutes walk from Herzl, I. L. Peretz streets, and not far away from Dick, Ansky, Shlonsky, Rachel, Alterman, Shadal, Ehad Haam, Klausner, Bashevis Singer, Shai Agnon (twice one Shay and one Agnon), Shamir, Burla, Goldfaden, Begin, Rothschild, Montefiore, Grinberg streets (and parks...), and of course those are streets named after authors who died as you don't name streets after authors who are still alive. Furthermore, I lived just around the corner from the street named after my most beloved author– Emile Zola!

In total there were **150** authors in this category of Jewish languages literatures – Yiddish – 20, Ladino – 20, Judeo-Arabic – 30, Hebrew – 60, Zionism – 20. **2** Nobel Prizes – **1** in Yiddish (US, born in Poland) and **1** in Hebrew (Israel, born in Ukraine). We have dealt above if these authors, almost all of them Europeans or sons of Europeans, should be included or not in the category of literatures in European languages, or if Yiddish (Judeo-German), Ladino (Judeo-Spanish), or even Hebrew (language of the Bible, the origin of most of the European cultures) should be treated as European languages in this book or not. Let the reader decide by himself!

LITERATURES IN NON-EUROPEAN LANGUAGES

The list of authors in the literatures in Non-European languages is purely indicative and not comprehensive. Actually, it is probable that in a book dedicated to those literatures – mainly Arabic, Indian, Chinese, Japanese and African – we could reach a number of at least 1000 more authors as we have found in the European literatures. I am not familiar with those literatures and I need not to be as this book surveys mainly the French and European cultures in the twelfth 1820-1939, which could be less prolific in literatures in Non-European languages in this twelfth, as the countries were subjugated by Europe (except Japan).

32. **ARABIC**: 1820-1939: Rifaa al-Tahtawi (Egypt), Francis Marrash (Syria), Taha Hussein (Egypt), Ahmed Shawqi (Egypt), Hafez Ibrahim (Egypt), Khalil Mutran (born in Lebanon, from Palestinian parents, lived in Egypt), Jurji Zaydan (Lebanon), Zaynab Fawwaz (Lebanon/Egypt), Mikhail Naima (Lebanon/US), May Ziade (Lebanon/Palestine/Egypt). In total – 10 authors: 5 Egyptians, 3 Lebanese, 1 Syrian and 1 Palestinian. I have not read any of those authors, unlike the Arab authors of late 20th century, such as Naguib Mahfouz, Tayeb Salih and Elias Khoury, as well as a few poems in Arabic, but I've researched this topic.

The fourth exception to the methodology of the book is with the authors who wrote Arabic mostly in the second half of the 20th century, after the Arab states obtained independence and their literatures experienced a renaissance, with worldwide fame and even a Noble Prize. We have in this category 12 authors from 5 countries: Egypt (3), Palestinians (3), Iraq (3), Lebanon (2), Sudan (1): **Naguib Mahfouz** (born 1911, works since 1938, Nobel Egypt 1988, Egyptian), **Tawfik Al-Hakim** (born 1898, works since 1926, Egyptian), **Elias Khoury** (born 1948, Lebanese), **Mahmoud Darwish** (born 1941, Palestinian), **Tayeb Salih** (born 1929, Sudanese), **Khalil Gibran** (lived 1883-1931, Lebanese), Ibrahim Muhawi (born 1937, Palestinian), Abd Al-Wahhab Al-Bayati (born 1926, Iraqi), Badr Shakir Al-Sayyab (born 1926, Iraqi), Muhammad Husayn Haykal (born 1888, works since 1913, Egyptian), Nazik Al-Malaika (born 1923, Iraqi), Fadwa Tuqan (born 1917, Palestinian). 10 of them were born in the twelfth 1820-1939, thus amounting to 20 the Arab authors who were active or where born in this twelfth. The other two were born shortly after – Darwish in 1941, Khoury in 1948. 4 authors published works in the twelfth. For the sake of objectivity I'm not going to comment on my personal feelings while reading books or poems by Khoury and Darwish, and what I think of the opinions stated by many of those authors. I would expect at least the same level of objectivity from Arab scholars and from critics of Israel, let them at least make the same unbiased research as I have done, learning Arabic, reading works in Arabic & translation, etc. I have not read enough books by authors in Arabic, basically only Naguib Mahfouz, Elias Khoury and Tayeb Salah, as well as a few poems in Arabic, watched a few movies, and read translated texts, so the list of the best authors could be different and longer, as it is based now primarily on reading articles on the topic of Arab literature in the 19th and 20th centuries.

As I am not biased towards European & Mediterranean languages, I have added some authors from Asia & Africa, and we could also add from others. This is of course only an indicative list, because if the purpose of this book was to survey those very important literatures they could amount to hundreds of authors for each country, and not only 20 as I have done, amounting to 80 for Indian, Chinese, Japanese & African literatures, **100** with Arabic above.

33. **INDIAN**: Rabindranath Tagore (Nobel 1913), wrote in **Bengali**, he was awarded the Nobel Prize in literature in 1913. **Assamese**: Lakshminath Bezbaroa. **Hindi**: Jaishankar

Prasad, Suryakant Tripathi 'Nirala', Munshi Premchand, Maithili Sharan Gupt, Vishnu Prabhakar, Harivansh Rai Bachchan. **Gujarati:** Kanaiyalal Maneklal Munshi and Govardhanram Tripathi, A category of his own is Mahatma Gandhi who wrote extensively in Gujarati, as well as in Hindi and English. **Kannada:** D. R. Bendre. **Marathi:** Krushnaji Prabhakar Khadilkar. **Urdu:** Qurratulain Hyder, **Bengali/English:** Michael Madhusudan Dutt, Nissim Ezekiel – a Jewish poet from Mumbai writing in English, Jawaharlal Nehru, the first prime minister of Indian, R. K. Narayan, Mulk Raj Anand, Raja Rao. In total: 20 authors (1 Nobel), almost all of them were active in the twelfty of 1820-1939, who wrote in 8 languages: 6 wrote in Hindi, 3 in Gujarati, 1 in Assamese, 1 in Bengali, 1 in Kannada, 1 in Marathi, 1 in Urdu and 6 in English. I have not read enough books by Indian authors (except of course several times the epic Bhagavad Gita), basically only Rabindranath Tagore and Mahatma Gandhi and I was exposed only to the works/speeches by Nehru, but researched about all the other Indian authors in this list. The list of the best authors could be different, longer & could extend to dozens excellent authors, which were not mentioned in this list.

34. **CHINESE:** Wu Jianren/Wu Woyao, Liu E/Liu O/Tieyun, Zeng Pu, Hu Shih, Chen Duxiu, Chen Sanli, Dai Wangshu, Wen Yiduo, Yan Fu, Lu Xun, Cao Yu, Tian Han, Hong Shen, Ouyang Yuqian, Lie Kim Hok, Shen Zengzhi, Li Boyuan/Li Baojia, Zheng Xiaoxu, Ding Ling, Lao She. In total 20 authors, all of them active in the twelfty 1820-1939. 1 Nobel Prize was awarded to the Chinese author Gao Xingjian, born in 1940, in 2000. He immigrated to France in 1988. The second Nobel Prize was awarded to Mo Yan, born in 1955, in 2012. He lives in China. Both of them were not active in the twelfty 1820-1939 and therefore are not part of the list of 20 authors above. I was not exposed to any of those authors, and I decided on the list after researching this topic, so the list of the best authors could be different and longer. I based the lists of Asian and African authors on reading articles on literature. I don't know also if they wrote in Mandarin or not. The only Chinese author whom I have read (except Mao Zedong & Great Master Confucius) was the modern Gu Long, but I have started to learn Mandarin and know several sayings. I am aware that I took only a glimpse to a completely different world that I hardly know. The number of Chinese authors is much larger.

35. **JAPANESE:** Natsume Soseki, Naoya Shiga, Mori Ogai, Ozaki Koyo, Kyoka Izumi, Ichiyo Higuchi, Fukuzawa Yukichi, Tsubouchi Shoyo, Futabatei Shimei, Koda Rohan, Yasunari Kawabata (Nobel 1968), Junichiro Tanizaki, Unno Juza, Ryunosuke Akutagawa, Takiji Kobayashi, Sakunosuke Oda, Fumiko Hayashi, Tamiki Hara, Kansuke Naka, Yaeko Nogami. In total 20 authors, 1 Noble Prize winner, all of them were active in the twelfty 1820-1939. I was not exposed to any of those authors, and I decided on the list after researching this topic. I have not read enough books by Japanese authors, basically only Haruki Murakami who is modern, so the list of the best authors could be different or longer. I based the lists of Asian and African authors on reading articles on literature, and I have included the Japanese Nobel Prize Winner. I have never even tried to learn Japanese, I have included some Japanese sayings in my books, and of course I like very much Japanese films. I heard many lectures on Japan, its culture, scenery, art and history, and saw many expositions of Japanese art at the Tikotin Museum of Japanese Art in Haifa, Israel, where I live.

36. **AFRICAN LITERATURE:** Ghana – Joseph Ephraim Casely Hayford, wrote in English. South Africa – Herbert Isaac Ernest Dhlomo, wrote in English. Nigeria - Christopher Okigbo, wrote in English. Kenya – Ali Mazrui, wrote in English. Senegal – Mariama Ba, wrote in French. Cameroon – Mongo Beti, wrote in French. Cote d'Ivoire – Veronique Tadjou, wrote in French. Cape Verde - Germano Almeida, wrote in Portuguese. Ethiopia - Birhanu Zerihun, wrote in Amhari. Madagascar – Dox/Jean Verdi Salomon Razakandrainy, wrote in Malagasi.

In total – 10 authors who wrote in 5 languages, all of them were active in the twelfty 1820-1939: English (4), French (3), 1 in Portuguese, 1 in Malagasi, 1 in Amhari. From 10 countries: Ghana, South Africa, Nigeria, Kenya, Senegal, Cameroon, Cote d'Ivoire, Cape Verde, Ethiopia, Madagascar. I made research on all those African authors. The most famous African authors are modern and wrote in the last part of the 20th century, some of them I have read, such as the Nigerian Chimamanda Ngozi Adichie. The list of the best authors could be different or longer, as I have based this entry primarily on articles that I have read about African literature and poetry. I have seen several African films, many on South Africa, and a unique film Hyenas from Senegal in French, the African version of The Visit of the Old Lady by Duerrenmatt, which is the best version, far better & authentic than the Hollywood version, to the delight of my business ethics students, who saw for the first time an African film.

The fifth exception to the methodology of the book is with the African authors who wrote mostly in the second half of the 20th century, after the African states obtained independence and their literatures experienced a renaissance, with worldwide fame and even a Noble Prize. Altogether 20 authors, as with the Japanese, Chinese, Indian & Arabic literatures, amounting to 100 authors from non-European countries in Asia & Africa (except Hebrew – see above).

10 authors from 9 countries (1 Nobel) – Nigeria – 2, Kenya – 1, Senegal – 1, South Africa – 1, Cote d'Ivoire – 1, Chad – 1, D. R. Congo – 1, Ethiopia – 1, Madagascar – 1. Most of the authors write in English (4 in Nigeria, Kenya, South Africa) and French (4 in Senegal, Cote d'Ivoire, Chad, D. R. Congo), the official languages in their countries. However, the Ethiopian writer writes in Amhari and the Madagascar writer writes in Malagasi. **Nigeria** – 1. Chinua Achebe (born 1930), who wrote in English, but lived, operated and wrote about Nigeria. 2. "Wole" Soyinka (born 1934, Nobel Nigeria 1986) is a [Nigerian](#) playwright and poet. He writes in English and was awarded the 1986 [Nobel Prize in Literature](#), the first African to be honored in that category. 2 authors. **Kenya** – 3. Ngũgĩ wa Thiong'o (born 1938) is a [Kenyan writer](#), formerly working in [English](#) and now working in [Gikuyu](#). **Senegal** – 4. Leopold Senghor (born 1906, works since 1935), president of Senegal, member of the Academie Francaise, renown poet who wrote in French. **South Africa** – 5. **Lewis Nkosi** (born 1936) was a [South African](#) writer and essayist, who wrote in English. He was a multifaceted personality, and attempted every literary genre, literary criticism, poetry, drama, and novels. **Cote d'Ivoire** – 6. Ahmadou Kourouma (born 1927) was an [Ivorian](#) novelist who wrote in French. **Chad** – 7. Koulsy Lamko (born 1959) is a [Chadian-born playwright](#), [poet](#), [novelist](#) and university lecturer, who writes in French. Born in Dadouar, Lamko left his country for [Burkina Faso](#) in 1979 due to the beginning of the [civil war](#). **The Democratic Republic of the Congo** (former Kinshasa) – 8. Valentin-Yves Mudimbe (born 1941) is a philosopher, professor, and author of poems, novels, as well as books and articles on African culture and intellectual history, who writes in French. **Ethiopia** – 9. [Haddis Alemayehu](#) (born 1910) was a [Foreign Minister](#) and novelist from [Ethiopia](#). His [Amharic](#) novel *Fəqər əskä Mäqabər* (*Love to the Grave*, 1968) is considered a classic of modern [Ethiopian literature](#). **Madagascar** – 10. Elie Rajaonarison (born 1951) was a poet, artist, professor and civil servant from [Madagascar](#). Considered the standard-bearer for modern [Malagasy poetry](#), Rajaonarison's published poetry anthologies earned him international recognition and have been translated into [French](#) and [English](#). 7 out of the 10 authors were born in the twelfty 1820-1939, and 3 others were born a few years after. 1 of the authors – Senghor – has started his works within this twelfty in 1935. 1 Nobel Prize was awarded to a Nigerian author writing in English who was active after 1940.

Other Asian/World Literature – It would be pretentious on my part to write about modern [Korean literature](#), [Persian literature](#), [Philippine literature](#), [Native American literature](#), [Oceanic](#)

[literature](#), [Indonesian literature](#), [Singaporean literature](#), [Malaysian literature](#), [Vietnamese literature](#), [Thai literature](#), [Burmese literature](#), [Kazakh literature](#), etc. The reader who wants to read about those twelve/more literatures can find many entries on these subjects on Wikipedia, encyclopedias, Internet, etc. But as I have never read a book from those literatures (at least I have read some books from the Chinese, Japanese, African, Arabic, Indian literatures, & I've read many books in regional languages), some of them in the original language – Arabic, English, French - I will not include authors from those countries, and I am aware that I am biased, as there might be excellent authors who deserve to be included in the world literature of the 20th century, but the least that I can do is to give links to all those literatures and let the reader find for himself what suits him and what he prefers.

In total **1250** important authors were surveyed in this book - **1000** authors in European languages, **150** authors in a comprehensive survey of Jewish languages literatures, **100** authors in a non comprehensive indicative survey of literatures in Non-European languages. **5** Nobel Prizes were awarded to authors who were active in those countries in 1820-1939 - 1 Yiddish/US, born in Poland, 1 Hebrew/Israel, born in Ukraine, 1 Arabic/Egypt, 1 Bengali/India. 1 Japanese/Japan. Additional **4** Nobel Prizes were awarded to Japan/UK - 1, Nigeria - 1, and China - 2 (1 to an author who immigrated to France) to authors who were active only since 1940. Altogether **9** Nobel Prizes in **8** countries, 4 countries in Asia, 2 countries in Africa, 1 country in Europe and 1 country in America. 4 of the authors immigrated from the countries in which they were born. But those are Prizes for both periods.

One more word about diversity. [Diversity](#) has become nowadays a positive term, for me it was always positive, and me, my family, my friends, my town, and my country apply diversity. Diversity is [multiculturalism](#), [biodiversity](#), [cosmopolitanism](#), [cultural diversity](#), [diversity politics](#). I am a strong supporter of all those terms in theory and in practice. I may be accused of Europocentrism, though the reader can assess that this book, my indexes, my Ethics Pays book, all my other books, show my endeavors to be as cosmopolitan as possible. Even if I like most European culture – I am not confined to French, English or Spanish culture, as most Europeans do, and I read the literature, write about the cultures, learn the languages, visit the countries, watch films, art and plays, and appreciate most of the European cultures – French, English, Spanish, Italian, Portuguese, German, Austrian, Irish, Dutch, Czech, Belgian, Swedish, Norwegian, Danish, Russian, Polish, Greek, Balkans, Catalan, Provencal, Galician, Frisian, Friulian, Hebrew (it is a European culture, basis of European religion, literature– the Bible), etc... If we examine the diversity considerations in the judgement of the Nobel Prize Literature committee, we find that out of the 112 laureates almost all of them were Europeans/Americans or from European cultures (including the Israeli Shai Agnon born in Ukraine, Nadine Gordimer's parents came from Lithuania and England, and the Afrikaner J. M. Coetzee). Actually the non-Europeans/Americans winners are: 1 Arab, 2 Chinese, 2 Japanese, 2 Indians, 2 Africans, 2 Afro-Americans, 11 – less than 10%, half of them writing in English. And I am not an expert in non-European/American literatures as the diversity minded Nobel Prize committee should be. But I cannot complain, as 22% of the Nobel Prize laureates over the years were Jews, many of them in Literature, too few of them in Peace, while Jews are only 0.2% of the world's population. So one thing is for sure, they are not anti-Semitic, and I don't know if there are Jews in the Swedish Committees

CORY'S LIST OF THE BEST BOOKS IN LITERATURE IN 1860-1899

If some readers would change their habits of reading posts and sending Twitter messages, by learning a new language and read an author whom they have not known, this book will accomplish its mission. We bring now a list of the best works of some authors whom I like most in the late 19th century. In the previous chapter I have surveyed **1000** Europeans important authors who wrote in the twelfty 1820-1939 (**1250** with the Jewish-languages authors and Non-European authors). If I would give here a list of their best books it would amount to tens of thousands of books which is far beyond the scope of this book. Therefore, I have chosen here to give a list of some of the books of some of the authors, in some of the languages, of some of the countries, in some of the years. The full lists of books can be found of course on Wikipedia and in Encyclopedias, and in other lists in this book and its links.

FRENCH: VICTOR HUGO: Les misérables, La légende des siècles, Torquemada, Quatrevingt-treize, L'Année terrible, L'Homme qui rit, Les travailleurs de la mer, William Shakespeare, and also works written prior to 1860 – Odes, Han d'Islande, Cromwell, Burg-Jargal, Hernani, Notre-Dame de Paris, Marion Delorme, Le roi s'amuse, Lucrece Borgia, Marie Tudor, Ruy Blas.

EMILE ZOLA: Les Rougon-Macquart: in French: [*La Fortune des Rougon*](#) (1871), [*La Curée*](#) (1872), [*Le Ventre de Paris*](#) (1873), [*La Conquête de Plassans*](#) (1874), [*La Faute de l'abbé Mouret*](#) (1875), [*Son Excellence Eugène Rougon*](#) (1876), [*L'Assommoir*](#) (1877), [*Une page d'amour*](#) (1878), [*Nana*](#) (1880), [*Pot-Bouille*](#) (1882), [*Au Bonheur des Dames*](#) (1883), [*La Joie de vivre*](#) (1884), [*Germinal*](#) (1885), [*L'Œuvre*](#) (1886), [*La Terre*](#) (1887), [*Le Rêve*](#) (1888), [*La Bête humaine*](#) (1890), [*L'Argent*](#) (1891), [*La Débâcle*](#) (1892), [*Le Docteur Pascal*](#) (1893). BERTHA VON SUTTNER (AUSTRIAN): Suttner, born Countess Kinsky in 1843, was awarded the Nobel Peace Prize in 1905. In 1876 Suttner was the secretary and house keeper to Alfred Nobel in Paris, and Nobel may have made romantic overtures. However, Suttner remained committed to Arthur von Suttner and returned to Vienna to marry him in secrecy. Her works: Inventory of the Soul in 1883 takes a pro-disarmament progressive stand for a world peace due to technological advancement, a possibility also considered by her friend Nobel due to the increasingly deterrent effect of more powerful weapons. In 1889 she

published the pacifist novel: *Die Waffen nieder!* Lay down your arms! Published in 32 editions and translated into 12 languages. She took part in the organization of the First Hague conventions in 1899, she attended a universal peace congress in Boston, organized petitions, funded the German Peace Society, met Emperor Franz Joseph of Austria and President Theodor Roosevelt. Suttner corresponded with Nobel until his death in 1896 and was a major influence in his decision to include a peace prize among the Nobel Prizes. She received the prize in 1905. She died in June 1914 a few weeks before war broke out. Other books by Suttner: *Memoirs*, *When thoughts will soar*, *Ein schlechter Mensch*, *Daniel Dormes*, *High Life*, *Das Maschinenzeitalter*, *Vor den Gewitter*, *Einsam und arm*, *Schah der Qual*, *Marthus Kinder*, *Franzl und Mirzl*, *Eva Siebeck*, *Rand glossen zur Zeitgeschichte*, *die Barbarisierung der Luft*.

PAUL JOHANN LUDWIG HEISE: He was awarded the Nobel Prize for Literature. His works: *Die Einsamen*, *Die Witwe von Pisa*, *Der Letzte Zentaur*, *L'Arrabiata*, *Andrea Delfin*, *Gedichte*, *Beatrice*, *Barbarossa*, *Das Madchen von Treppi*, *Der Weinhuter*, *Ein Ring*, *The dead lake*, *In Paradise*. One of the Nobel Prize judges said that Germany has not had a greater literary genius since Goethe.

RUDOLF CHRISTOFF EUCKEN: He was awarded the Nobel Prize for Literature. A philosopher whose best-known works are: *The problem of human life*, *The struggle for a spiritual content of life*, *The truth of religion*, *Life's basis and life's ideal*, *The fundamentals of a new philosophy of life*, *The meaning and value of life*, *Main currents of modern thought*, *Socialism: an analysis*.

BULGARIAN: IVAN VAZOV: New country, Under our heaven, The empress of Kazalar, Songs of Macedonia, It will not perish, Vagabonds, Borislav, Ivaylo, A newspaperman, Priaporetz and Gusla Bulgaria's Sorrows, Epic of the forgotten, Under the yoke – the most famous Bulgarian novel, Nemli – nedragi, Chichovtzi, Draski I sharki, Videni I chuto, Slivnitza, Luleka mi zamirisa.

PENCHO SLAVEYKOV: Epichevsky Pesni – Epic songs, Olaf van Gelden, Kniga na pesnite, Kurvara pesen, Subrani shuchinenii, Izbrani tvorh, Jibot v dati, Proizvedenya na pendo slaveikov, Knigi, Karwova pesen – song of blood, Stati, Ralitsa, Lily, King David, Preferred sultans, Cis moll, Hearts of hearts, Frima, Rest, Momini salzi – Tears of a young woman, Na ostrova na blazennite – on the island of the blissful. Dream of happiness.

ALEKO KONSTANTINOV: Bay Ganyo – uncle Ganyo is a collective image of many typical Bulgarian features, To Chicago and back, Elections in Svishtov, Different people – different ideals, Correspondence.

PEYO YAVOROV: Poems, Gotse Delchev, White nights – Bezsanitsi, Rebelious dreams – haydushky kopneniya, While following the shades of the clones – Podir semiya na oblatrite, V polite na Vitosha, Kogato gram udari, Kak ehoto zaglahva, Makedoniyia, Hajdushki pesni, Dme hubawi otschi – two beautiful eyes.

DIMCHO DEBELYANOV: Stikhotvorenizia, Suchinenii, Tikha pobeda – izbrana lirika, Na boga noi – svetlii a sin, Chema pasa, Skriti vophi – Stikhove, Sacineija.

ROMANIAN: VASILE ALECSANDRI: Steluta lacrimiora – little tears, Catre Romani – to Romanians, Chisita in Iasi, Miorita, Toma Alimos, Manastirea Argesului, Novac si Corbul, Dvine si Lacramioare, Hora Unirii, Miezul Iernii, Serile la Mincesti, Larna lu gura sorbei, Oaspetii primaverii, Malul siretului, Legende, Despot, Voda, Sanziana si Pepelea, Fantan Blanduziei, Ovidiu, Traiasca regele. Alecsandri was an openly anti-Semite, stating that citizenship should be refused to the Jews, as it would be "a suicide by our people". Well, the Jews emigrated to Israel, France and the US and contributed much to the prosperity and culture of those countries, unlike some of the European countries where the Jews were exterminated in the Holocaust, like most of the family of my wife's father David Popliker, that was murdered in Romania by Romanians, but you cannot generalize, otherwise it would be racism, as was applied to Jews. Anyhow, as in many cases, Alecsandri's anti-Semitism originated from the fact that his grandfather was a Jew from Botoshan (where my wife Ruthy was born), who became very rich, married a Christian and took his wife's name. According to Nazi's law that made Vasile Alecsandri a Jew who would have been murdered. And according to Israeli law he could have received the Israeli citizenship. Plays – Farmazomil din Harlan, Modista si cinovnicul, Iorgu de la Sadagura, Creditorii, Iasii in carnaval, Un ramasag, Piatra din casa, Nunta tarameasca, Chirita in provincie, Cetatea neamtului, Sgarbitul risipitor, Lipitorile satelor, Chirita in voiaj, Boieri si ciocoi, Chirita in balon, Despot voda, Fantana blanduziei. Poetry – Poezii populare, Balade cautice batranesti, Pasteluri. Prose – Istoria um galben, Suvenire din Italia, Iasi in 1844, Un salon din Iasi, Romanii si poezia lor, O primblare la muti, Borsec, Balta-clta, Calatorie in Africa, Satir, Melodile romanesti, Prietenii romanilor, Lamartine, Alecu Russo, Dridri, Vasile Porojan, Margarita, Din album unui bibliofil.

MIHAI EMINESCU: Manuscripts, Luce afarnul – The Vesper, Oda in metru antic, Five Letters/Epistles/Satires. Eminescu was born in Botosan, like my wife Ruthy and Alecsandri's grandfather – so Botosan can be proud of those three (I'm kidding of course...) glorious poets, and how Ruthy fits in? Well, she is "poetry in motion!". Eminescu's most notable poems are: Dorina lacul, Floare albastra, Dorinta – Desire, Seara pe deal – evening on the hill, O, ramai – Oh, linger on, Epigonii, Si daca – And if... Ode in ancient meter, Mai am un singur dor – I have yet one desire, La steama – At star, Fat frumos din lacrima – the tear drop prince, Geniu pustiu – empty genius, Sarmamil Dionis – wretched Dionis, Cezara, Imparat si proletar – Emperor and proletarian. Eminescu demanded strong anti-Jewish legislature on the German model, saying that "The Jew does not deserve any rights anywhere in Europe because he is not working." Well, in the first half of the 20th century most of the best authors in German were Jews – Werfel, Feuchtwanger, Zweig, Kafka... - as well as many of the best composers (Mahler...), best businessmen (Rathenau, Oppenheimer, Warburg, Rothschild...), best scientists (Einstein...), best psychologists (Freud), Nobel Prize Winners (Von Baeyer, Wallach, Willstatter, Haber, Ehrlich, Meyerhof, Landsteiner, Warburg, Loewi, Einstein, Franck, Hertz...). Well, how come that so many Jews excelled in whatever they worked if they were not working, and how many hard-working compatriots of Eminescu got the international fame of those Jews, were awarded the Nobel Prize? When you say psychology you think of Freud, when you say science you think of Einstein, and saying poetry– you think probably of Eminescu, who worked so hard on his poetry! But of course you cannot generalize and the despicable conduct of Eminescu towards the Jews does not reflect on the great Romanian people, who shared for centuries a common successful fate with the Jews.

ION LUCA CARAGIALE: O noapte furtunoasa, Cum Leonida fata cu reactiunea, O scrisoare pierduta, D-ale carnavalului, O soacra, Hatmamil Baltag, Incepeui, 1 Aprile, Napasta, O faclie de paste, In vreme de razboi, Din carnetul unui vechi sufleur, Un artist, Grand Hotel Victoria, Romana, Om cur noroc, Pacat, Norocul culegatorului, O inventil mare, Poveste, Boborul, Noaptea invierii, Baioneta inteligenta, Camita om sucit, La hamil lui manjoala, Dona loturi, Caut casa..., La conac, Monopol, Mama Ion, Partea poetului, Pastrama trufanda, Kir lanulea, Calcul dracului, Moftangii, Natiunea romana, Caldura mare, Justitie, Mitica, Politica.

NIKOLAY KOSTOMAROV (Russian/Ukrainian): Two nationalities – a landmark in the history of Ukrainian national thought. He wrote that Russians are inclined towards autocracy, collectivism and state-building and Ukrainians are inclined towards liberty, poetry, and individualism. Ukrainian ballads, Poems about Kievan Rus and Bohdan Khamelnytsky. His poetry includes vocabulary and elements of traditional Ukrainian folk songs. He wrote historical dramas. But he wrote also prose in Russian: Kudeyar, Chernigorka, Animal rot, A letter to the editor of Kolvko, Russian history in biographies of its main figures in Russia, The Ruin.

GREEK: KOSTIS PALAMAS: Songs of my fatherland, Hymn to Athena, Eyes of my soul. Lambs and Anapaest, The grave, The greetings of the sun-born, Twelve lays of the Gypsy, The king's flute, Yearnings of the lagoon, Satirical exercises, The state and solitude, Altars, Extempona, The 14 verses, The 5 verses, Cowardly and harsh verses, The 3 verse cycle, Passages and greetings, The night of the Phemirs, Evening fire, Death of a youth, The thrice-noble, Novels.

LADINO: ELIA CARMONA (TURKEY): La pasion por la moneda, El poeta enganiado, El esfuenio del chiko, Zak, El mayoral gidio, El capitan corajozo, La ija de la lavandera, El acusado sin culpa, La despraciada Florin, La novia aguna, El celozo marido, El ijo repentido, Cazado por dolor, El bandido, El ijo de guertelano, El riko pasensiozo, El vendedor de leche, Los dos guerfanos, Los sekretos de un ladron, adaptacions of others' plays, and a biography: Komo nacio Elia Carmona, como se engrandeso i como se izo direktor del Djugeton – How Elia Carmona was born, how he grew up, and how he became the manager of the Djugeton, which gives me an idea for the name of this autobiographic book: How Jacques (or Jako in Ladino) Cory was born in Egypt from a Turkish father and a Greek mother, how he grew up in Israel, learned Hebrew and spoke at home Ladino and French, how he became a high-tech manager traveling all over the world, a business ethics PhD and academic teaching thousands of students, an author of a novel, a play, academic books bought by thousands of most renowned universities' libraries, articles, children books, in five languages, how he discovered the synagogue of his hometown Coria in Spain, and how he co-translated the UN Universal Declaration of Human Rights into Ladino.

DAVID FRESCO (TURKEY): Editor of El Tiempo for almost 50 years, the first Ladino newspaper published in Istanbul, published three times a week. Fresco argued in favor of assimilation of the Ottoman Jews into Turkish society, learning also Turkish. He translated books: La ermoza Hulda de Espania, Espania y Yerushalaim, Povre Chikita, a Dictionary.

ALEXANDER BEN GUIAT (TURKEY): Ana Maria o El korason de mujer, Amor sin esperansa, Amor de salvages, El muerte ke esta bivo, En las tenievlas de la noche, Fuego!, Leonidas el matador.

MOSHE DAVID GAON (PALESTINE): Besamim mi Sefarad: meotsar hokhmat Yahadut Sefarad, Poesias, A bibliography of the Ladino Press, Hakhmei Yerushalaim – Articles in Hebrew, Yehudei hamizrah beeretz Israel in Hebrew, Miskiot Levav – Al Meam Loez in Hebrew, Mishpat hakahal – Giluy Daat al Hamatzav bevaad adat haSfaradim be Yerushalaim

in Hebrew. Gaon is the father of the Israeli well-known singer, actor and author Yehoram Gaon.

MOSHE ATTIAS (GREECE/PALESTINE): Romancer Sefaradi in Ladino, Hebrew and Spanish, Kansoniero Sefaradi, Notzat Hazahav shel zipor hapele – 20 stories of the Greek Jews in Hebrew. Books in Hebrew on the Knesset, Sefer Hateudot 1918-1948. Sefer shitot utishbohot shel haShabtayim (in Hebrew with Yaakov Yona). Purim in Saloniki, Piut utehila lesimhat tora, Romances of Sarayevo, Complas de Adonenu, Kriat Shema shel Hamate in Ladino, The romance of Tarkinos and Lucrecia, Sharmes de patria, Shirei alyah vegagauim le Zion bemasoret ha Yehudim ha Sefaradim, Shlosa shirei Zion be Ladino.

HEBREW: HAYIM NAHMAN BIALIK (UKRAINE/PALESTINE): El Hatzipor, Yiddish poems, The book of legends (with Ravnitzky), Lamitnadvim baam, Al Hashhita, Hahnisini tahat knafeh, Children songs, Hamatmid, Metei midmar, Beir haaregah, Habraha, Arie Baal Guf, Hahatsotsra nitbaysha, Aluf batzlut vealuf shum, Shir haavoda vehamlaha, Shabat hamalka, Lo bayom velo balayla, Ahrei moti, Vayehi hayom, Poems, Hatarnegolim vehashual, Sefer hadvarim, Etsbaoni. All the Jewish authors and personalities who were active in Palestine during the time of the British mandate (1918-1948) lived in Palestine with the Arabs. After 1948 the Jews lived in Israel, the Arabs who remained in Israel lived also there, the Arabs who lived in the West Bank lived in Jordan and those in Gaza lived in Egypt. Many Arab authors preferred to be called Palestinians although there was no state of Palestine. After the Oslo agreement there was the Palestinian authority and the Arabs living in the West Bank and Gaza were once again called Palestinians. We should not confuse between the Palestinian people who are Arabs and the Jewish people who lived in Palestine before 1948 but were not part of the Palestinian people.

SHAUL TCHERNICHOVSKY (RUSSIA/PALESTINE): In Endor, Before a statue of Apollo, On blood, To the Sun, The slain of Tirmonye, Ballads of worms, Sonnets, Idylls, Omrim yeshna eretz, Hoy artzi moladeti, Shalosh atonot, Baladot Vermayza, Hezionot umanginot, Shirim leyaldey Israel, Poems, Stories, Bar Kochva, Bat Harav veyma, Hahalil, 33 stories, All poems.

ABRAHAM MAPU (LITHUANIA): Ahavat Zion, Ayit Tzavua, Ashmat Shomron, Amon Pedagogue, Hoze hezionot, Beit Hanan, Hinuh Lanoar, Hatov vehara. In Yiddish: Der hoys franzose Amnon un Tamar.

JUDAH LEIB GORDON (LITHUANIA): The love of David and Mikhal, King Zedekiah in Prison, Judah's parables, David and Barzilai, Osenath, Daughter of Potiphera, From between the Lion's Teeth, From the depths of the sea, Little fables for big children, The point on top of the yod, Kol shirei Yehudah, Kol kitvei Yehuda, Barburim Avusim, Ahoti Ruhama, Hakitsa Ami.

ELIEZER BEN-YEHUDA (LITHUANIA/PALESTINE): Ben-Yehuda came to Palestine in 1881 and his son Ben-Zion, later named Itamar Ben Avi, born in 1882 was the first one in modern era to be educated only in Hebrew. Ben-Yehuda was the author of the first modern Hebrew dictionary and the driving spirit behind the revival of the Hebrew language. His was the first family to speak Hebrew at home. It took more than 20 years before there were ten more families in Jerusalem who spoke only Hebrew at home. Ben-Yehuda was the editor of several Hebrew language newspapers and became the driving spirit behind the establishment of the Committee of the Hebrew Language, later called the Academy of the Hebrew

Language. In 1919 Ben-Yehuda convinced Herbert Samuel, the High Commissioner of Palestine, that Hebrew should be one of the three official languages in Palestine, together with Arabic and English. He encouraged to use Hebrew as the sole language in schools. Other works: Essays and Articles, Ad eimatay dibru Ivrit?, Divrei hayamim livnei Israel beshivatam el admatam, Children's Mikraot.

YEHUDA BURLA (PALESTINE/ISRAEL): Novels on the Sephardic way of life in Palestine/Israel – Luna, Enchanted homeland – Kismei moledet, Without a star – Bli kochav, In darkness striving – Naftulei Adam, Stories – Sipurim, Bat Zion, Singer – Meranenet, Naama, In holyness or love – Bikdusha o ahava, The adventures of Akavia – Alilot Akavia, City tricks – Lahatutei kiriah, Adam, On the horizon – Baofek, At dawn – Im shahar, Women – Nashim, Tom and Mary – Tom ve Mary, In the circles of love – Bemaagalei ahavah, The first swallow – Hasnunit harishona, Yearnings – Kisufim, The journeys of Yehuda Halevi – Ele masaei Yehuda Halevi, Rabb Yehuda Halevi, Sparkles – Reshafim, The dignitary – Baal beamav, Collected Works – Col Kitvei. Two special love stories – Shnei sipurei ahavah meyuهدet, Marching in – Lekol hatseada, In high tide and in low tide – Begeut ubeshefel, Collected Stories – Yalkut Sipurim, The Kingdom of David – Malchut David, Struggle – Maavak, Twists and Turns of Man – Naftulei Adam, His later wife – Ishto hashnia.

RACHEL/RACHEL BLUWSTEIN SELA (RUSSIA/PALESTINE): Rahel is the most famous and loved poetress. Aftergrowth – Safiah, Across from – Mineged, Nevo, Shirat Rahel, Bagina, Ani, Zemer nugue, Balaila ba hamevaser, Pgisha hatsi pgisha, Hahnaa, Hed, El Artzi, Rachel, Kan al pnei haadama, Aviv, Akara, Sefer shiri, Veulai lo hayu hadvarim, Gan naul, Lo paam bakaits, Shay, Rak al atsmi, Begani netaatiha, Al hagoren, Im shahar, Zo hadereh, Hag, Matay.

AVRAHAM SHLONSKY (RUSSIA/ISRAEL): Distress – Dvay, Mimehshahim – From concealing shadows, Poems from the long corridor, Mickey Who?, Me and Tali in Lhana country, Utzli – Gutzli, Avnei beho, Avnei gville, Sufa. Leaba-ima, Bagilgal, Beele hayamim, Lo tirtzah, Shirei hayamim, Yalkut shirim, Sefer hasulamot, Mul hayeshimon, Pirkei Yoman, Masot umaasim. He also made excellent translations from Shakespeare, Chekhov, Pushkin, Gogola.

SAMUEL DAVID LUZZATTO/SHADAL (ITALIAN): Kinnor Naim, Kinah, Oheb ger, Seder tanaim vaamoraim, Bet haozer, Hamishtadel, Vikmal alhakabala, Mebo, Maamar beyesode hadikduk, Commentary on the Pentateuch, Perushe Shadal – Commentary on Jeremiah, Ezekiel, Proverbs and Job. Nahalat Shadal, Yesode hatora, Tal orot, Igrot Shadal, Pninei Shadal. And in Italian – Il giudaismo illustrato, Calendario Ebraico, Discorsi morah agli studenti Israeliti, Opere de Rossi, Lezioni di teologia morale Israelitica, Discorsi storico-religiosi, Autobiografia.

MOSHE SMILANSKY (UKRAINE/ISRAEL): Toldot ahava ahat, Bnei Arav, Tovah, Zihronot, Mehaye haarvim, Haityashvut haklayt, Rehovot, Jewish colonization and the fellah, Haderah, Kitve Moshe Smilansky, Prakim betoldot hayeshuv, Birkat haadama, Hayeshuv haivry, Mishpahat haadamah, Biyeme Elem, Mashal hageula, Jacob the soldier, Bisdot Ukraina, Sipur geulat haadam vahaaretz, Yeoshua Hankin, Sipurei Saba, Baarava, Sipurei Hayeshuv, Bein karme Yehudah, Bahar ubagay, Goalei hakarka, Haverim, Betzel hapardesim, Shemesh aviv, Tkuma veshoa, Misht baaretz, Hevley leida, Hu ahav et hayarden, Al hof hayarkon.

ZIONIST AUTHORS: THEODOR/BENJAMIN ZEEV HERZL (AUSTRIA): Herzl was the father of modern political Zionism, he formed the World Zionist Organization and promoted Jewish immigration to Palestine in an effort to form a Jewish state/Israel. Herzl wrote in German: *Der Judenstaat/The Jews' State*, *Altneuland/Old-New Land*, Short stories, Articles, Essays, Diaries, Philosophical stories, plays. Solon in Lydien, *Das Neue Ghetto*, *Was wird man sagen*, *Wilddiebe*, *Seine Hoheit*, *Muttersohnchen*, *Gretel*, *Unser Katchen*, *Prinzen aus Genieland*, *Die Dame in Schwartz*, *Die Glosse*, *Tabarin*, *Der Fluctling*, *Kompagniearbeit*, *Die Causa Hirschhorn*.

AHAD HAAM/ASHER ZVI HIRSCH GINSBERG (UKRAINE/UK/PALESTINE): Ahad Haam and all the subsequent Zionist authors wrote in Hebrew. Ten essays on Zionism and Judaism. Essays, Letters, Memoirs. Selected essays. Nationalism and the Jewish Ethic. A truth from Eretz Yisrael, *Lo ze haderekh*, Jewish state, Jewish problem, *Shtei rashuyot*, *Al parashat drahim*, *Cohen venavi*, *Hatzi nehama*, *Avar veatid*.

NATHAN ALTERMAN (ISRAEL): Alterman wrote a weekly column *Hatur Hashvuyi* in the Labour Movement "Davar" newspaper in which he dealt on political issues and that is why I've included him in the category of Zionist authors, as his prose and poetry was mostly political. [Nathan Alterman](#) was strongly supportive of workers' struggle. After the 1967 war he was one of the founders of the [Movement for Greater Israel](#), with [Aharon Amir](#), [Haim Gouri](#), [Rachel Yanait Ben-Zvi](#), [Yitzhak Tabenkin](#), [Icchak Cukierman](#), [Zivia Lubetkin](#), [Eliezer Livneh](#), [Moshe Shamir](#), [Shmuel Katz](#), [Zev Vilnay](#), [Uri Zvi Greenberg](#), [Shmuel Yosef Agnon](#), [Isser Harel](#), [Israel Eldad](#), [Dan Tolkovsky](#) and [Avraham Yoffe](#) - most of them prominent Israeli authors and personalities. His works: *Kokhavim bakhuts*, *Simhat anyim*. *Neum tshuva lerav hovel italki*, *Magash hakesef*, *Haefroah haasiri*, *Shirei makot mitsrayim*, *City of the Dove*, *Kineret Kineret*, *Pundak haruhot*, *Mishpat Pitagoras*, *Esther hamalka*, *Hahut hameshulash*, *Pizmonim*, *Ardal hapele*, *Hagigot kaits*.

ZEEV JABOTINSKY (RUSSIA/PALESTINE): *Turkey and the war*, *Samson the Nazarite*, *The Jewish war front*, *The war and the Jew*, *The story of the Jewish legion*, *The battle for Jerusalem*, *Several stories*, *The five*, *The east bank of the Jordan*, *Iron wall*, *Ja brechen in Yiddish*, *Uma vehevra*, *Aspartacus*, *Bederech lemdina*, *Besaar*, *Zihronot ben dori*, *Ktarim Zioniim rishonim*, *Megilat hagdud*, *Mihtavim*, *The play Nehar*, *Speeches A and B*, *Al sifrut veomanut*, *Sipur yamay* – autobiography, *Sipurim*, *Filitonim*, *Reshimot*, *Shirim*, *Haderekh el harevzionism hatzyoni*, *Hazit hamilhama shel am Israel*, *Medina Ivrit* – pitron sheelat hayehudim, *Letikuno shel olam*.

YOSEF HAIM BRENNER (RUSSIA/PALESTINE): Brenner was murdered in Jaffa in May 1921, aged 40, during the Jaffa riots instigated by the Arabs against the Jews. In winter – *Bahoref*, *Around the point* – *Misaviv lanekuda*, *Nerves* – *Atsavim*, *From here and there* – *Mikan umisham*, *Breakdown and berievement* – *Shhol vekishalon*, *Out of the depths* – *Min hametzar*, *Meemek akhor*, *Hegeula vehatmura*, *Al haderekh*.

DAVID FRISCHMANN (POLAND): *Otiyot porhot*, *Baaretz*, *Mikhtavim al dvar hasifrut*, *Ktavim nivharim*, *Ktavim hadashim*, *Yzkor*, *Col kitvei*, *Aharit*, *Yerushalaym*, *Bamidbar*, *Shiva*, *Mikhtavim hadashim*, *Igrot*, *Sipurim veshirim*, *Arbaa sipurim*, *Yalkut Masot*. Translation into Hebrew at the end of the 19th century of works by George Eliot, Pouchkine, Lord Byron, Grimm, Tagore, Nietzsche, Ibsen. He was also an editor of Hebrew press.

AHARON DAVID GORDON (UKRAINE/PALESTINE): Hahinuh hu hadereh, Haadam hamatara, Haavoda, Haadam vehateva, Kitvei A. D. Gordon in 3 volumes, Correspondence, Selected essays and articles, Our tasks ahead. Gordon made a religion of labor Zionism.

JOSEPH KLAUSNER (LITHUANIA/ ISRAEL): Jesus of Nazareth, From Jesus to Paul, The messianic idea in Israel, A history of modern Hebrew Literature, Menahem Ussishkin, Historia shel habayit hasheni, Yahadut veenoshiut, Me Aplatton vead Spinoza. He was among the founders of the Hebrew University of Jerusalem (the best Israeli university, where I learned), teaching there Hebrew Literature and History. He was a founder of the Hebrew Academy and was the Chief Editor of the Hebrew Encyclopaedia. He was the great uncle of Amos Oz.

MENACHEM BEGIN (BELARUS/ISRAEL): The revolt, White Nights, The story of a prisoner in Russia, Bamahteret – In the underground, Hashkafat Haim Vehashkafa Leumit, Mori Zeev Jabotinski.

URI ZVI GREENBERG (UKRAINE/ISRAEL): A great fear and the moon, Manhood on the rise, A vision of one of the legions, House dog, Streets of the river, Anacreon at the Pole of sorrow, In the middle of the world, in the middle of time, A zone of defense and address of the Son-of-Blood, The book of indictment and faith, From the Ruddy and the Blue, At the Hub.

MENACHEM USSISHKIN (RUSSIA/PALESTINE): Geulat hakarka leor hageut hakalkalit baaretz, Dvarim aharonim, Kol haadama – Thoughts and Memories, Sefer Usishkin, Menahem Usishkin – Manhig haam, Vehine eile mitzafon umiyam, Dvarim beytam, Correspondence.

AMNON SHAMOSH (SYRIA/ISRAEL): Michel Ezra Safra and Sons, My Sister the Bride, The Great Confession, The Cedars of Lebanon, With Me from Lebanon, Marrano Mountain, Calamus and Cinnamon, A Kibbutz is a Kibbutz is a Kibbutz, From the Source, Autumn Stories.

YITZHAQ SHAMI (ISRAEL): Vengeance of the Fathers, Hebron Stories, The Barren Wife, Hamamah – A Tale of the Arabian Desert, Ransom, Shami's Stories/Sipurey Shami, Poetry, Articles.

YAAKOV YEHOSHUA (ISRAEL): Childhood in the Old City of Jerusalem, Story of the Sephardic Home in the Jewish Quarter of the Old City of Jerusalem, Jerusalem of Old Days, Tradition and Folklore in the Sephardic Quarters of Jerusalem, Old City of Jerusalem – Works.

DAVID BEN GURION (POLAND/ISRAEL): Likrat haatid – Lesheelat Eretz Israel, Anahnu veshekheinenu, Mishmarot – Prakim leberur dereh tnuat hapoalim batzionut hamitgashemet, Behilahem Israel, Hazon vedereh, Bamaaraha, Al hakomunism vehazionut shel hashomer hatzair, Tsavei hashaa – Hamisha neumim, Netzah Israel, Tsava ubitahon, Mimaanal lean, Mediniut Hutz, Maarehet Sinai, Haemet kodemet lakol, Hapoel haivri vehistadruto, Oman hamelel mul halutzei hahagshama, Dvarim kehevyatam, Pgishot im manhigim Arvim, Mihtavim el Pola veel hayeladim, Iyunim batanah, Medinat Israel hamehudeshtet, Yehud veyeu, Igrot David Ben Gurion, Zihronot, Min hayzavon, Al hahazon hatzioni vehagshamato, Beit Avi, Kohavim vaafar, Ideologia mediniut zionit, Eretz Israel baavar

ubahove, Correspondence, Documents, Bibliography. I have chosen to include in my list of great authors 15 Zionist authors. Out of 300 authors writing or being born in the 19th century, or more accurately out of 700 authors in modern literature it is only about 2% of the modern authors. You can call it my bias, although I have kept a balance between authors writing in Hebrew and Arabic, but Le Monde has included 50% French authors in a list of 100 authors, so it is quite more biased. If I'll not introduce Zionist authors who will do it in a period where Israel, Jews and Zionism is vilified by so many Palestinians, Arabs, Muslims, and anti-Semitic so-called peacelovings in the West. I do believe that Zionism was one of the most important nationalist movements in the 20th century, at least as important as the Irish, Czech, Polish, Arab, Indian, Vietnamese, African and Asian movements.

ARABIC: RIFAA AL-TAHTAWI (EGYPT): A Paris profile, The methodology of Egyptians minds with regards to the marvels of modern literature, The honest guide for education of girls and boys, Tawfik al-Galil, A thorough summary of the biography of Muhammad, Towards a simpler Arabic grammar, Egyptian patriotic lyrics, The stars in the moonlit nights of al-Aziz.

FRANCIS MARRASH (SYRIAN): Ghaba al-haqq – the forest of truth, Rihlat Baris – Journey to Paris, Durr al-sadaf fi gharaib al-sudaf – pearl shells in relating strange coincidences, Mirat al-Hasna – the mirror of the beautiful one, Guide to human liberty, The clear mirror of national principles, Consolation of the anxious and repose of the weary one, Guide to nature, Artistic treasures concerning the symbolic visions of Maymun, The witnessing of the stages of human life. He favors education for women, but only reading, writing, some arithmetics, and grammar.

TAHA HUSSEIN (EGYPT): Complete works of Taha Hussein, The memory of Abu El Alaa, Ibn Khaldun's philosophy, Pioneers of thoughts, In the summer, The days "3 volumes", Hafez and Shawki, Curlev's prayers, From a distance, The prophet's life, Al Hanesh El Sina, The literary life in the Arabian peninsula, Together with Abi El Alaa in his prison, Poetry and Prose, Bewitched palace, Together with El Motamali, The future of culture in Egypt, Moments, The voice of Paris, Sheherazad's Dreams, Tree of misery, Paradise of thorn, El Fitra al Kubra, Spring journey, The paradise of animals, The lost love, From there, Varieties, In the midst, Ali and his sons, The sufferers, Our contemporary literature, Mirror of the Islam, Summer nonsense, On the western drama, Talks, Al Shaikha, Reflections Words, Books and Author.

HAFEZ IBRAHIM (EGYPT): He used to say: "When you educate a woman, you create a nation" – what a brave and far-sighted sentence that should have been adopted by all! Albasoka al-deema fawy al-deema, Ya Saidy wa Emami, Shakrto Jameela Sonekom, Masr tatklam an nafseha – Egypt talks about herself, La kesa anem behe mn kesa, Qol lel raies adama Allah dawlatahu, Fifty poems of Hafez. He also translated Les Misérables into Arabic. His father was Egyptian and his mother a Turk, well, My father was a Turk and my mother was born in Egypt...

KHALIL MUTRAN (BORN IN LEBANON, FROM PALESTINIAN PARENTS, LIVED IN EGYPT): Anthology of his poems, *Diwan-al-khalil*, Translated dramas of Shakespeare and Corneille, Hugo... He was the director of the Egyptian National Theater. He made a long journey through Syria and Palestine after which he claimed himself as a poet of the Arab countries. He was called the poet of Freedom. A rose that died, Nero, Poems – The Pyramids, The martyred foetus, A gift of flowers, Do you remember, The shadow of the statue of Ramses.

JURJI ZAYDAN (LEBANESE): The general history of the world – *Al-Tarikh al-Alamm*, *Tarikh al-Tamaddun el-Islam* – History of Islamic civilization, General history of the Freemasons, History of Greece and Rome, Arabs before Islam, The history of Arabic literature, The generation of the nations, A biography – the life of Jurji Zaydan. Novels – *Al-Mamluk al-Sariid* – the fleeing Mamluk, The captive of the Mahdi pretender, Despotism of the Mamluks, Jihad al-Muhibbin, Egytian Avmansura, Girls of Ghassan, Virgin of Quraish, 17 Ramadan, Battle of Karbala, Al Hajjaj IbnYussuf, Conquest of Andalusia, Charles Martel and Abd-el-Rahman, Abu Muslim Khorasani, Abbasa Sister of Harun al-Rashid, Al-Amin and Al- Mamun, Bride of Farghana, Ahmad ibn Tulun, Abd al-Rahmana al-Nasir, The Ottoman Revolution, Girls of Qairawan, Salah al-Din al-Ayyubli, The pearl tree.

ZAYNAB FAWWAZ (LEBANON/EGYPT): A pioneering Arab woman author. The book of scattered pearls regarding categories of women – a biographical dictionary of 456 women and their achievements. The novel *The happy ending* and the play *al-Hawa wa-al-Wafa* – Love and faithfulness, the first play (1893) written in Arabic by a woman.

MIKHAIL NAIMA (LEBANON, US): The book of Mirdad, *The whisper of the Eyelids* – a collection of poems written in Arabic and English, *Autobiography* – *Seventy/Sabaoon*, referring to the average aged a human being would live. However, he lived until the age of 99, dying in 1988. *Ahadith ma al Shihafah*, *Akaber*, *Abad min Moscow*, *Aba va al Bnunn*, *Abu Bata*, *Al'Anthan*, *Al Bayader*, *Al Ghirbal*, *Al Marahel*, *Al Nur wa al Dijur*, *Al youm al akheer*, *Ayoub*, *Doroub*, *Fi mahel al Jufon*, *Hawanish*, *Kem Ma Kan*, *Karem Ala Dareb Liqae*, *Ma qual wa dall*, *Min wahi al massih*. *Najwa al ghuroub*, *Sawat al Alam*, *Wamadat*, *Ya Ibn Adam*, *Zaad al Maad*.

MAY ZIADE (LEBANON/PALESTINE/EGYPT): *Al bahithat el-badiya* – seeker in the desert, *Sawaneh fatat* – platters of crumbs, *Zulumant wa icharat* – humiliation and rumors, *Kalimat wa icharat* – words and signs, *Al sahaef* – the newspapers, *Ghayat al-hayat* – the meaning of life, *Al musawat* – equality, *Bayna i-jazri wa l-madd* – between the ebb and flow, *Ziadess* was the first published work, *Fleurs de reve* was a volume of poetry in French. She wrote then mostly in French and occasionally in English and Italian. Later she found her literary voice in Arabic. She translated Arthur Conan Doyle from English, Max Muller from German, and French novels. She hosted the most famous literary salon of the Arab world during the 20's and 30's in Cairo. She wrote the biography of one of the leaders of the feminist movement in Egypt – Aicha Teymour. During 19 years May Ziade corresponded extensively with Gibran Khalil Gibran which evolved into a Platonic love although both of them never met. It ended in 1931 when Gibran died and she remained faithful to him never marrying or loving another. Correspondence with Gibran and others, Poetry.

TURKISH: NAMIK KEMAL: Essays on political administrative, social and foreign policy reform, *Vatan*, *Yahut Silistra* – Silistra – the fatherland, *Intibah*, *Cezmi*, *Celalettin Harzem*

[ALI MAZRUI](#) – WROTE IN ENGLISH (KENYA): Islam in Africa's experience, Euro-Jews and Afro-Arabs – the great Semitic divergence in history, The politics of war and culture of violence, Globalization and Civilization, Are they forces in conflict?, A tale of two Africas – Nigeria and South Africa as contrasting visions, Islam – between globalization and counter-terrorism, The African predicament and the American experience – A tale of two Edens, Black reparations in the era of globalization, The Titan of Tanzania – Julius K. Nyerere's legacy, Africa and other civilizations – Conquest and counter conquest, The Anglo-American Commonwealth, On herds and Uhuru-Worship, Towards a Pax Africana, Violence and thought, Protest and Power in Black Africa, The trial of Christopher Okigbo, Africa in world affairs, World culture and the Black experience. **Ali Al'amin Mazrui** (24 February 1933 – 12 October 2014), was an academic professor, and political writer on [African](#) and [Islamic studies](#) and North-South relations. He was born in [Mombasa](#), [Kenya](#). He was an Albert Schweitzer Professor in the Humanities and the Director of the Institute of Global Cultural Studies at [Binghamton University](#) in [Binghamton, New York](#).. Upon completing his education at [Oxford University](#), Mazrui joined [Makerere University](#) ([Kampala](#), [Uganda](#)), where he served as head of the Department of [Political Science](#) and Dean of the Faculty of [Social Sciences](#). He served at Makerere University until 1973, when he was forced into exile by [Idi Amin](#). In 1974, he joined the faculty of the [University of Michigan](#) as professor and later was appointed the Director of the Center for Afroamerican and African Studies (1978–81). In 1989, he was appointed to the faculty of [Binghamton University](#), [State University of New York](#) as the [Albert Schweitzer](#) Professor in the Humanities and the Director of the Institute of Global Cultural Studies (IGCS). Mazrui was a prominent critic of the current world order. He believed the current [capitalist](#) system was deeply exploitative of Africa, and that the West rarely if ever lived up to their liberal ideals and could be described as [global apartheid](#). He has opposed Western interventions in the developing world, such as the [Iraq War](#). He has also

long been opposed to many of the policies of [Israel](#), being one of the first to try to [link the treatment of Palestinians with South Africa's apartheid](#). Especially in recent years, Mazrui has also become a well known commentator on [Islam](#) and [Islamism](#). While rejecting violence and terrorism Mazrui has praised some of the anti-imperialist sentiment that plays an important role in modern Islamic fundamentalism. He has also argued, controversially, that [sharia](#) law is not incompatible with democracy. Yet, he preferred to live in the US for more than half of his life, writing against the Western policy in Africa, while not living in Africa but in the West, and for the Muslim sharia law while not living in a Muslim state but in the secular US.

INDIAN AUTHORS: ASSAMESE: LAKSHMINATH BEZBAROA: Kodom Koli, Podum Koli, Podem Kumvori, Surobhi, Xadhukothaar Kuki, Jumbiri, Kehukoli Junuka, Burhi aair xadhu, Kokadenta aaru nati lora, Baakhor, Barbarnar Buloni, Litkai, Nomal, Paachani, Chikerpati Nikarpati, Joymoti Kunwari, Chekradhwaj Singha, Belimaar, Sri Sri Shankardev, Mor Jihan Sowara, Patralekha Dinalekha, Bhagavvat Katha, Tatwa Katha, Sri Krishnakatha.

MORI OGAI: The dancing girl, Foam on the waves, The courier, Vita sexualis, Young men, The wild geese, The last testament of Okitsu Yagoemon, Sansho the steward, The boat on the Takase River, Shibue Chusai, Kokura Nikki. Ogai was also a poet and a translator.

OZAKI KOYO: The Userer, The Golden Demon, Koujik Yasha, Nikon Taika, Ronshu – Japan Expert Treatise Collection, Tajo Takon, Aobudo Niwin bikuni iro Zange, Makura Kyara, Kokoto – The Heart, Keniysha no enkaku. Koyo was also a poet.

KYOKA IZUMI: Tale of 3 who were blind, Japanese Gothic tales, In light of shadows, Demon pond, Sea God's villa, The castle tower, Pink ume blossoms, Samisen Canal, A song by lantern light, One day in spring, The holy mand of Mount Koya, The night watchman, The operating room, Kanmuri Yazaemo, A living puppet, The golden clock, Another man's wife.

ICHIYO HIGUCHI: Takekurabe – Child's play, On the last day of the year, Nigorie – troubled waters, Wakare-Michi- Separate ways, Jusamya – the 13th night, Yamizakura – flowers at dusk.

FUKUZAWA YUKICHI: English-Japanese dictionary, Sekai Kunizukushi – all countries of the world, Gakumon no susume – & encouragement of learning, Outline of a theory of civilization, Datsup-A Ron – escape from Asia, Essays on family & women, Autobiography, On: Moral conduct, Business, Revenge for the emperor, Japanese manhood. 100 discourses.

TSUBOUCHI SHOYO: The essence of the novel, Portraits of contemporary students, Saikun, A Paulownia Leaf, Maki no Kata, The sinking moon over the lonely castle where the cuckoo cries, The new Urashima, En the Ascetic.

FUTABATEI SHIMEI: Shosetsu Soron, The drifting cloud, An adopted husband, Heibor.

KODA ROHAN: The icon of liberty, The Buddha of Art, The minute storehouse of life, Dewdrops, Love bodhisattva, Encounter with a skull, A sealed letter, The five-storied Pagoda, The Bearded Samurai, Leaving the Hermitage, The Whaller.

SURVEY ON THE MOST/MORE/SIGNIFICANT LITERATURE/ART/MUSIC IN THE ROMANTICISM/REALISM/MODERNISM ERAS

Until now we have dealt on the most significant, more significant and significant literatures in the “twelfty” of 1820-1939, and found that the most significant literatures are the literatures in French, English and German, the more significant literatures are the literatures in Spanish, Russian and Italian, and the significant literatures are the literatures in Portuguese/Portugal and Brazil, Dutch, Czech, Greek, Polish, Swedish, Norwegian, Danish, Finnish. But this is not comprehensive as it does not give a survey on the most/more/significant writers in the three periods’ peaks comprised in those years – Romanticism (1820-1859), Realism/Naturalism (1860-1899), Modernism (1900-1939). Furthermore, it is limited only to literature while culture encompasses at least Art and Music, which are also divided between those categories.

In sake of simplicity and materiality I’ll give the following divisions: 1. Most Significant Literature, Art, Music. 2. More Significant Literature, Art, Music. 3. Significant Literature, Art, Music. In French, English, German, Spanish, Russian, Italian. Altogether – **30** ratings.
12 ratings:

Romanticism most/more/significant literature/art/music – 3 ratings,

Realism most/more/significant literature/art/music – 3 ratings,

Modernism most/more/significant literature/art/music – 3 ratings,

1820-1939 period most/more/significant literature/art/music – 3 ratings.

18 Ratings:

3 French most/more/significant literature/art/music,

3 English most/more/significant literature/art/music,

3 German most/more/significant literature/art/music,

3 Spanish most/more/significant literature/art/music,

3 Russian most/more/significant literature/art/music,

3 Italian most/more/significant literature/art/music.

ROMANTICISM IN LITERATURE, ART AND MUSIC

Romanticism was an artistic, literary, musical and intellectual movement that originated in Europe towards the end of the 18th century, lasted mainly from 1800 to 1890 and reached its peak mainly in 1820-1859. Romanticism was characterized by its emphasis on emotion and individualism as well as glorification of all the past and nature, preferring the medieval rather than the classical. A detailed description of Romanticism is given in our Appendix.

The famous [romantic authors, composers & artists are](#) mentioned in this and previous lists:

From one of the lists: French – [Alexandre Dumas, père](#) (writer, 1802-1870), [Honoré de Balzac](#) (novelist, 1799-1850), [Hector Berlioz](#) (composer, 1803-1869), [Georges Bizet](#) (composer, 1838-1875), [François-René de Chateaubriand](#) (writer, 1768-1848), [Eugène Delacroix](#) (painter, 1798-1863), [Théophile Gautier](#) (poet, 1811-1872), [Théodore Géricault](#) (painter, 1791-1824), [Victor Hugo](#) (poet, novelist, dramatist, 1802-1885), [Alphonse de Lamartine](#) (poet, 1790-1869), [Alfred de Musset](#) (poet, 1810-1857), [Charles Nodier](#), (writer,

1780-1844), leader of the Romanticist movement, [George Sand](#) (novelist, 1804-1876), [Stendhal](#) (novelist, 1783-1842), [Eugène Emmanuel Viollet-le-Duc](#) (architect, 1814-1879), [Alfred de Vigny](#) (poet, 1797-1863), [Charles-Valentin Alkan](#) (composer, 1813-1888), [Antoine-Louis Barye](#) (sculptor, 1795-1875), [Théodore Chassériau](#) (painter, 1819-1856).

English - [William Blake](#) (painting, engraving, poetry, 1757-1827), [George Gordon Byron, 6th Baron Byron](#) (poetry, 1788-1824), [John Clare](#) (poetry, 1793-1864), [Samuel Taylor Coleridge](#) (poetry, philosophy, criticism, German scholar, 1772-1834), [John Constable](#) (painting, 1776-1837), [Thomas de Quincey](#) (essays, criticism, biography, 1785-1859), [Ebenezer Elliot](#) (Poet Activist, 1781-1849), [William Hazlitt](#) (criticism, essays, 1778-1830), [John Keats](#) (poetry, 1795-1821), [Charles Lamb](#) (poetry, essays, 1775-1834), [Mary Shelley](#) (novels, 1797-1851), [Percy Bysshe Shelley](#) (poetry, 1792-1822), [Robert Southey](#) (poetry, biography, 1774-1843), [J. M. W. Turner](#) (painting, 1775-1851), [William Wordsworth](#) (poetry, 1770-1850), [Dorothy Wordsworth](#) (diaries, 1771-1855), [John William Waterhouse](#) (painting, also a [Pre-Raphaelite](#), 1849-1917).

American – [Albert Bierstadt](#) (painter, German-born, 1830-1902), [George Catlin](#) (painter, 1796-1872), [William Cullen Bryant](#) (poet, 1794-1878), [Wilfred Campbell](#) (poet, Canadian, 1860-1918), [James Fenimore Cooper](#) (novelist, 1789-1851), [Emily Dickinson](#) (poet, 1830-1886), [Ralph Waldo Emerson](#) (poet, essayist, 1803-1882), [Louis Moreau Gottschalk](#) (composer, 1829-1869), [Nathaniel Hawthorne](#) (novelist, 1804-1864), [Washington Irving](#) (novelist, satirist, 1783-1859), [Archibald Lampman](#) (poet, Canadian, 1861-1899), [Henry Wadsworth Longfellow](#) (poet, 1807-1882), [James Russell Lowell](#) (writer, 1819-1991), [Edward MacDowell](#) (composer, 1860-1908), [Herman Melville](#) (novelist, 1819-1991), [Edgar Allan Poe](#) (poet, short story writer, 1809-1849), [Charles Sangster](#) (poet, Canadian, 1822-1893), [Henry David Thoreau](#) (poet, essayist, 1817-1862), [John Greenleaf Whittier](#) (poet, 1807-1892).

Irish – [Thomas Davis](#) (poet, political theorist, 1814-1845), [John Field](#) (composer, 1782-1837), [James Clarence Mangan](#) (poet, 1803-1849), [Thomas Moore](#) (poet, 1779-1852), [Padraic Pearse](#) (poet, journalist, revolutionary, 1879-1916), [Oscar Wilde](#) (poet & author, 1854-1900).

German – [Caspar David Friedrich](#) (painter, 1774-1840), [Johannes Brahms](#) (composer, 1833-1897), [Joseph Görres](#) (writer, essayist, 1776-1848), [Jakob Grimm](#) (story collector, linguist, 1785-1863), [Wilhelm Grimm](#) (story collector, linguist, 1786-1859), [Carl Gustav Carus](#) (painter, 1789-1869), [Karl Friedrich Lessing](#) (painter, 1808-1880), [Philipp Otto Runge](#) (painter, 1777-1810), [Adam Müller](#) (literary critic and political theorist, 1779-1829), [Novalis](#) (poet, novelist, 1772-1801), [Joseph von Eichendorff](#) (poet, writer, 1788-1857), [Friedrich Schlegel](#) (poet, theorist, 1772-1829), [August Wilhelm Schlegel](#) (poet, translator, theorist, 1767-1845), [Franz Schubert](#) (composer, 1797-1828), [Robert Schumann](#) (composer, polemicist, 1810-1856), [Ludwig Tieck](#) (novelist, translator, 1773-1853), [Ludwig Uhland](#) (poet, dramatist, 1787-1862), [E.T.A. Hoffmann](#) (writer, composer, 1776-1822), [Adolf von Henselt](#) (composer, 1814-1889), [Zacharias Werner](#) (poet, dramatist, 1768-1823), [Ludwig van Beethoven](#) (composer, 1770-1827), [Johann Wolfgang von Goethe](#) (novelist, poet, scientist, 1749-1832), [Richard Wagner](#) (composer, 1813-1883), [Friedrich Hölderlin](#) (poet, 1770-1843), [Heinrich Heine](#) (poet, 1797-1856), [Friedrich Wilhelm Joseph Schelling](#) (philosopher, 1775-1854), [Johann Gottlieb Fichte](#) (writer, theorist, 1762-1814), [Adrian Ludwig Richter](#) (painter, 1803-1884), [Carl Spitzweg](#) (painter, 1808-1885), [Eberhard Wächter](#) (painter, 1762-1852), [Gerhard von Kügelgen](#) (painter, 1772-1820), [Carl Maria von Weber](#) (composer, 1786-1826), [Felix Mendelssohn](#) (composer, 1809-1847), [Franz Liszt](#) (composer, 1811-1886), [Heinrich von Kleist](#) (poet, dramatist, novelist, 1777-1811),

[Friedrich Schleiermacher](#) (theologian, philosopher, 1768-1834), [Wilhelm Heinrich Wackenroder](#) (writer, 1773-1798). The German Romanticism is especially influential in music, with giants as Beethoven, Schubert and Weber, Schumann, Wagner, Brahms, Mendelssohn, Liszt. And of course some of the best authors as Goethe, Heine & Holderlin.

Spanish – [Mariano Jose de Larra](#) (essayist, 1809-1837), [José de Espronceda](#) (poet, tale writer, 1808-1842), [Jose Zorrilla](#) (playwright, poet, 1817-1893), [Gustavo Adolfo Becquer](#) (poet, tale writer, 1836-1870), [Francisco Goya](#) (painter, 1746-1828), [Antonio María Esquivel](#) (painter, 1806-1857), [Eugenio Lucas Velázquez](#) (painter, 1817-1870), [Federico de Madrazo](#) (painter, 1815-1894).

Russian – [Ivan Aivazovsky](#) (painter, 1817-1900), [Mily Balakirev](#) (composer, 1837-1910), [Alexander Borodin](#) (composer, 1833-1887), [Karl Briullov](#) (painter, 1799-1852), [César Cui](#) (composer, 1835-1918), [Mikhail Glinka](#) (composer, 1804-1857), [Mikhail Lermontov](#) (poet, novelist, 1814-1841), [Modest Mussorgsky](#) (composer, 1839-1881), [Aleksandr Pushkin](#) (poet and novelist, 1799-1837), [Nikolai Rimsky-Korsakov](#) (composer, 1844-1908), [Pyotr Ilyich Tchaikovsky](#) (composer, 1840-1893), [Vasily Zhukovsky](#) (poet, 1783-1852), [Konstantin Batyushkov](#) (poet, 1787-1855), [Orest Kiprensky](#) (painter, 1782-1836), [Vasily Tropinin](#) (painter, 1776-1857), [Sergei Lyapunov](#) (composer, 1859-1924), [Nikolai Medtner](#) (composer, 1880-1951), [Sergei Bortkiewicz](#) (composer, 1877-1952), [Anton Arensky](#) (composer, 1861-1906), [Georgy Catoire](#) (composer, 1861-1926), [Sergei Rachmaninoff](#) (composer, 1873-1943).

Italian – [Alfredo Aleardi](#) (poet, 1812-1878), [Giuseppe Gioacchino Belli](#) (poet, 1791-1863), [Giovanni Berchet](#) (poet, 1783-1851), [Ugo Foscolo](#) (poet, novelist, political theorist, 1778-1827), [Francesco Hayez](#) (painter, 1791-1882), [Giacomo Leopardi](#) (poet, philosopher, 1798-1837), [Alessandro Manzoni](#) (novelist, 1785-1873), [Giuseppe Mazzini](#) (political theorist, 1805-1872), [Giuseppe Parini](#) (poet, satirist, 1729-1799), [Ippolito Pindemonte](#) (poet, 1753-1828), [Carlo Porta](#) (poet, 1775-1821), [Giovanni Prati](#) (poet, political theorist, 1815-1884), [Ferdinando Carulli](#) (1770-1841), [Gaspare Spontini](#) (1774-1851), [Niccolò Paganini](#) (1782-1840), [Gioacchino Rossini](#) (1792-1861), [Gaetano Donizetti](#) (1797-1848), [Vincenzo Bellini](#) (1801-1835).

Portuguese – [Almeida Garrett](#) (writer, poet, dramatician, journalist), [Alexandre Herculano](#) (writer, novelist, poet, journalist, historian), [Camilo Castelo Branco](#) (writer, novelist), [João de Deus](#) (writer, poet), [António Feliciano de Castilho](#) (writer, poet, translator), [Soares dos Passos](#) (writer, poet), [João de Lemos](#) (writer, poet), [José Vianna da Motta](#) (composer and pianist).

Brazilian – [Joaquim Manuel de Macedo](#) (novelist), [José de Alencar](#) (novelist), [Castro Alves](#) (poet), [Gonçalves Dias](#) (poet), [Fagundes Varela](#) (poet), [Casimiro de Abreu](#) (poet), [Álvares de Azevedo](#) (poet, short-story writer), [Bernardo Guimarães](#) (novelist), [Manuel Antônio de Almeida](#) (novelist), [Visconde de Taunay](#) (painting).

Czech – [Karel Hynek Mácha](#) (poetry), [Bedřich Smetana](#) (music), [Ján Kollár](#) (fairy tales), [Antonín Dvořák](#) (music).

Dutch – Hildebrand / [Nicolaas Beets](#) (Theologian, writer and poet), [Willem Bilderdijk](#) (Poet), [Jacob Geel](#) (Scholar, writer and critic), [Multatuli](#) / Eduard Douwes Dekker (Writer).

Norwegian – [Henrik Wergeland](#) (poet), [Edvard Grieg](#) (composer), [Johann Sebastian Welhaven](#) (poet), [Adolph Tidemand](#) (painter), [Hans Gude](#) (painter), [Johan Christian Dahl](#) (painter), [Melissa Daschler](#) (poet).

Polish – [Frédéric Chopin](#) (composer), [Adam Jerzy Czartoryski](#) (writer), [Józef Dunin-Borkowski](#) (poet), [Felicjan Faleński](#) (poet), [Aleksander Fredro](#) (comedy writer), [Konstanty Gaszyński](#) (poet), [Cyprian Godebski](#) (poet), [Seweryn Goszczyński](#) (poet), [Józef Korzeniowski](#) (writer), [Zygmunt Krasiński](#) (poet), [Józef Ignacy Kraszewski](#) (writer), [Joachim Lelewel](#) (philosopher), [Antoni Malczewski](#) (poet), [Piotr Michałowski](#) (painter), [Adam Mickiewicz](#) (poet), [Stanisław Moniuszko](#) (composer), [Anna Mostowska](#) (writer), [Cyprian Kamil Norwid](#) (poet), [Wincenty Pol](#) (poet), [Juliusz Słowacki](#) (poet), [Franciszek Syrokomla](#) (poet), [Andrzej Towiański](#) (philosopher), [Kornel Ujejski](#) (poet), [Henryk Wieniawski](#) (composer).

From Cory's lists (above): French writers: Francois-Rene de Chateaubriand, Pierre-Jean de Beranger, Charles Nodier, Felicite Robert de Lammenais, [Henri-Beyle dit Stendhal](#), Marceline Desbordes-Valmore, [Alphonse Lamartine](#), [Alfred comte de Vigny](#), [Honore de Balzac](#), [Alfred de Musset](#), Charles-Augustin Sainte-Beuve, [Gerard de Nerval](#), Pierre-Joseph Proudhon, Alexis de Tocqueville, Ernest Renan, Hippolyte Taine, Eugene-Francois Vidocq, Theophile Marion Dumersan, Francois Guizot, Theodore Leclercq, and so many others.

Writers in English: the 30 authors who wrote in English in the first four decades of our twelfty 1820-1859: [Percy Bysshe Shelley](#), [John Keats](#), and [George Gordon Byron](#), 6th Baron Byron, known simply as [Lord Byron](#), all three poets died in the first years of the 1820s; [James Fenimore Cooper](#), [Washington Irving](#), [William Cullen Bryant](#), [Edgar Allan Poe](#), [Seba Smith](#), [Benjamin Penhellow Shillaber](#), [Johnson J. Hooper](#), [Thomas Bangs Thorpe](#), [George Washington Harris](#), [James Russel Lowell](#), [Henry Wadsworth Longfellow](#), [Oliver Wendell Holmes Sr.](#), [Ralph Waldo Emerson](#), [Sir Walter Scott](#), the last works by [William Wordsworth](#), [Mary Shelley](#), [Samuel Taylor Coleridge](#), [Robert Southey](#), [Felicia Hemans](#), [Letizia Elizabeth Landon](#), [Benjamin Disraeli](#), [Charles Kingsley](#), [John Ruskin](#), [William Makepeace Thackeray](#), [Charlotte Bronte](#), [Emily Bronte](#), [Anne Bronte](#)...

Writers in German: The 20 important authors who wrote in German in the years 1820-1859 were: [Johann Wolfgang von Goethe](#), [Georg Wilhelm Friedrich Hegel](#), [Friedrich Hoelderlin](#), [August Schlegel](#), [Friedrich Schleiermacher](#), [Ludwig Thieck](#), [Ludwigh Uhland](#), [Arthur Schopenhauer](#), [Joseph Freiherr von Eichendorff](#), [Annette von Droste Huelshoff](#), [Adelbert von Chamisso](#), [Eduard Moerike](#), [Karl Gutzkow](#), [Heinrich Laube](#), [Theodor Mundt](#), [Ludolf Wienbarg](#), [Ludwig Boerne](#), [Heinrich Heine](#), [Georg Buechner](#), [Willibald Alexis](#).

Writers in Spanish: The best 15 Spanish authors in 1820-1859 are: [Mariano Jose de Larra](#), [Jose de Espronceda](#), [Angel de Saavedra Duke of Rivas](#), [Manuel Jose Quintana](#), [Gertrudis Gomez de Avellaneda](#), [Juan Arola](#), [Nicomedes Pastor Diaz](#), [Carolina Coronado](#), [Serafin Estebanez Calderon](#), [Juan Donoso Cortes](#), [Jaime Balmes](#), [Ramon de Mesonero Romanos](#), [Francisco Martinez de la Rosa](#), [Antonio Garcia Gutierrez](#), and [Juan Eugenio Hertenbusch](#). To those we can add 5 Argentinian authors: [Esteban Echeverria](#), [Juan Maria Gutierrez](#), [Miguel Cane](#), [Jose Marmol](#) and [Juan Bautista Alberdi](#). Altogether 20 authors who wrote in Spanish in Spain & Argentina.

Writers in Russian: The best 12 Russian authors in the decades 1820-1859 were: [Alexander Pushkin](#), [Vasily Zhukovsky](#), [Mikhail Lermontov](#), [Yevgeny Baratynsky](#), [Konstantyn](#)

Batyushkov, Fyodor Tyutchev, Afanasy Fet, Nikolai Gogol, Ivan Goucharov, Mikhail Saltykov-Shchedrin, Ivan Krylov and Alexander Herzen.

Writers in Italian: The 10 important Italian authors in 1820-1859 were: Giuseppe Mazzini, Silvio Pellico, Giovanni Berchet, Piero Maroncelli, Massimo d'Azeglio, Alessandro Manzoni, Giacomo Leopardi, Ippolito Nievo, Giuseppe Giusti, and Giuseppe Gioachino Belli.

From another list: Romanticism in English literature began in the 1790s with the publication of the Lyrical Ballads of William Wordsworth and Samuel Taylor Coleridge. Wordsworth's "Preface" to the second edition (1800) of *Lyrical Ballads*, in which he described poetry as "the spontaneous overflow of powerful feelings," became the manifesto of the English Romantic movement in poetry. William Blake was the third principal poet of the movement's early phase in England. The first phase of the Romantic movement in Germany was marked by innovations in both content and literary style and by a preoccupation with the mystical, the subconscious, and the supernatural. A wealth of talents, including Friedrich Hölderlin, the early Johann Wolfgang von Goethe, Jean Paul, Novalis, Ludwig Tieck, A.W. and Friedrich Schlegel, Wilhelm Heinrich Wackenroder, and Friedrich Schelling, belong to this first phase. In Revolutionary France, the vicomte de Chateaubriand and Mme de Staël were the chief initiators of Romanticism, by virtue of their influential historical and theoretical writings.

The second phase of Romanticism, comprising the period from about 1805 to the 1830s, was marked by a quickening of cultural nationalism and a new attention to national origins, as attested by the collection and imitation of native folklore, folk ballads and poetry, folk dance and music, and even previously ignored medieval and Renaissance works. The revived historical appreciation was translated into imaginative writing by Sir Walter Scott, who is often considered to have invented the historical novel. At about this same time English Romantic poetry had reached its zenith in the works of John Keats, Lord Byron, and Percy Bysshe Shelley.

A notable by-product of the Romantic interest in the emotional were works dealing with the supernatural, the weird, and the horrible, as in Mary Shelley's *Frankenstein* and works by C.R. Maturin, the Marquis de Sade, and E.T.A. Hoffmann. The second phase of Romanticism in Germany was dominated by Achim von Arnim, Clemens Brentano, J.J. von Görres, and Joseph von Eichendorff.

By the 1820s Romanticism had broadened to embrace the literatures of almost all of Europe. In this later, second, phase, the movement was less universal in approach and concentrated more on exploring each nation's historical and cultural inheritance and on examining the passions and struggles of exceptional individuals. A brief survey of Romantic or Romantic-influenced writers would have to include Thomas De Quincey, William Hazlitt, and the Brontë sisters in England; Victor Hugo, Alfred de Vigny, Alphonse de Lamartine, Alfred de Musset, Stendhal, Prosper Mérimée, Alexandre Dumas (Dumas Père), and Théophile Gautier in France; Alessandro Manzoni and Giacomo Leopardi in Italy; Aleksandr Pushkin and Mikhail Lermontov in Russia; José de Espronceda and Ángel de Saavedra in Spain; Adam Mickiewicz in Poland; and almost all of the important writers in pre-Civil War America.

In the next generation the great genre of English Romantic landscape painting emerged in the works of J.M.W. Turner and John Constable. These artists emphasized transient and dramatic effects of light, atmosphere, and colour to portray a dynamic natural world capable of evoking awe and grandeur.

Painters: In France the chief early Romantic painters were [Baron Antoine Gros](#), who painted dramatic tableaux of contemporary incidents of the Napoleonic Wars, and [Théodore Géricault](#), whose depictions of individual heroism and suffering in *The Raft of the Medusa* and in his portraits of the insane truly inaugurated the movement around 1820. The greatest French Romantic painter was [Eugène Delacroix](#), who is notable for his free and expressive brushwork, his rich and sensuous use of colour, his dynamic compositions, and his exotic and adventurous subject matter, ranging from North African Arab life to revolutionary politics at home. Paul Delaroche, Théodore Chassériau, and, occasionally, J.-A.-D. Ingres represent the last, more academic phase of Romantic painting in France. In Germany Romantic painting took on symbolic and allegorical overtones, as in the works of P.O. Runge. [Caspar David Friedrich](#), the greatest German Romantic artist, painted eerily silent and stark landscapes that can induce in the beholder a sense of mystery and religious awe.

Romanticism expressed itself in [architecture](#) primarily through imitations of older architectural styles and through eccentric buildings known as “follies.” Medieval [Gothic architecture](#) appealed to the Romantic imagination in England and Germany, and this renewed interest led to the [Gothic Revival](#).

[Music](#)

Musical Romanticism was marked by emphasis on originality and individuality, personal emotional expression, and freedom and experimentation of form. [Ludwig van Beethoven](#) and [Franz Schubert](#) bridged the Classical and Romantic periods, for while their formal musical techniques were basically Classical, their music's intensely personal feeling and their use of programmatic elements provided an important model for 19th-century Romantic composers.

The possibilities for dramatic expressiveness in music were augmented both by the expansion and perfection of the [instrumental](#) repertoire and by the creation of new musical forms, such as the lied, nocturne, intermezzo, capriccio, prelude, and mazurka. The Romantic spirit often found inspiration in poetic texts, legends, and folk tales, and the linking of words and music either programmatically or through such forms as the concert [overture](#) and [incidental music](#) is another distinguishing feature of Romantic music. The principal composers of the first phase of Romanticism were Hector Berlioz, Frédéric Chopin, Felix Mendelssohn, and Franz Liszt. These composers pushed orchestral instruments to their limits of expressiveness, expanded the harmonic vocabulary to exploit the full range of the [chromatic scale](#), and explored the linking of instrumentation and the human voice. The middle phase of musical Romanticism is represented by such figures as Antonín Dvořák, Edvard Grieg, and Pyotr Ilyich Tchaikovsky. Romantic efforts to express a particular nation's distinctiveness through music was manifested in the works of the Czechs Antonín Dvořák and Bedřich Smetana and by various Russian, French, and Scandinavian composers.

Romantic [opera](#) in Germany began with the works of Carl Maria von Weber, while Romantic opera in Italy was developed by the composers Gaetano Donizetti, Vincenzo Bellini, and Gioachino Rossini. The Italian Romantic opera was brought to the height of its development by Giuseppe Verdi. The Romantic opera in Germany culminated in the works of [Richard Wagner](#), who combined and integrated such diverse strands of Romanticism as fervent nationalism; the cult of the hero; exotic sets and costumes; expressive music; and the display of virtuosity in orchestral and vocal settings. The final phase of musical Romanticism is

represented by such late 19th-century and early 20th-century composers as Gustav Mahler, Richard Strauss, Sir Edward Elgar, and Jean Sibelius.

From another list: In visual art and literature, “Romanticism” typically refers to the late eighteenth century and the nineteenth Century. The Scottish poet [James Macpherson](#) influenced the early development of Romanticism with the international success of his Ossian cycle of poems published in 1762, inspiring both [Johann Wolfgang von Goethe](#) and the young [Walter Scott](#).

An early [German](#) influence came from Goethe, whose 1774 novel *The Sorrows of Young Werther* had young men throughout Europe emulating its protagonist, a young artist with a very sensitive and passionate temperament. At that time Germany was a multitude of small separate states, and Goethe's works would have a seminal influence in developing a unifying sense of nationalism. Important writers of early German romanticism were Ludwig Tieck, [Novalis](#) (Heinrich von Ofterdingen, 1799) and [Friedrich Hölderlin](#). Heidelberg later became a center of German romanticism, where writers and poets such as Clemens Brentano, Achim von Arnim, and Joseph von Eichendorff met regularly in literary circles.

Since the Romantics opposed the [Enlightenment](#), they often focused on emotions and dreams as opposed to rationalism. Other important motifs in German Romanticism are traveling, nature and ancient myths. Late German Romanticism (of, for example, [E. T. A. Hoffmann](#)'s *Der Sandmann*—“The Sandman,” 1817; and Eichendorff's *Das Marmorbild*—“The Marble Statue,” 1819) was somewhat darker in its motifs and has some [gothic](#) elements.

Romanticism in [British](#) literature developed in a different form slightly later, mostly associated with the poets [William Wordsworth](#) and [Samuel Taylor Coleridge](#), whose co-authored book *Lyrical Ballads* (1798) sought to reject Augustan poetry in favor of more direct speech derived from folk traditions. Both poets were also involved in [Utopian](#) social thought in the wake of the [French Revolution](#). The poet and painter [William Blake](#) is the most extreme example of the Romantic sensibility in Britain, epitomized by his claim, “I must create a system or be enslaved by another man's.” Blake's artistic work is also strongly influenced by medieval illuminated books. The painters [Joseph Mallord William Turner](#) and [John Constable](#) are also generally associated with Romanticism.

[Lord Byron](#), [Percy Bysshe Shelley](#), [Mary Shelley](#), and [John Keats](#) constitute another phase of Romanticism in Britain. The historian [Thomas Carlyle](#) and the [Pre-Raphaelite Brotherhood](#) represent the last phase of transformation into [Victorian](#) culture. [William Butler Yeats](#), born in 1865, referred to his generation as “the last romantics.”

In predominantly [Roman Catholic](#) countries, Romanticism was less pronounced than in Germany and Britain, and tended to develop later, after the rise of [Napoleon](#). [François-René de Chateaubriand](#) is often called the “Father of French Romanticism.”

In France, the movement is associated with the nineteenth century, particularly in the paintings of Théodore Géricault and [Eugène Delacroix](#), the plays, poems and novels of [Victor Hugo](#) (such as *Les Misérables* and *Ninety-Three*), and the novels of [Stendhal](#). The composer [Hector Berlioz](#) is also important.

In [Russia](#), the principal exponent of Romanticism is [Alexander Pushkin](#). [Mikhail Lermontov](#) attempted to analyze and bring to light the deepest reasons for the Romantic idea of metaphysical discontent with society and self, and was much influenced by [Lord Byron](#). Pushkin's *Eugene Onegin* and Lermontov's Pechorin from *A Hero of Our Time* both were influenced by the "Byronic" pose, the boredom of the superior romantic hero. Both the poets would die in duels of honor. The poet [Fyodor Tyutchev](#) was also an important figure of the movement in Russia, and was heavily influenced by the German Romantics.

Romanticism played an essential role in the national awakening of many Central European peoples lacking their own national states, particularly in [Poland](#), which had recently lost its independence to [Russia](#) when its army crushed the Polish Rebellion under the reactionary [Nicholas I](#). Revival of ancient myths, customs and traditions by Romantic poets and painters helped to distinguish their indigenous cultures from those of the dominant nations (Russians, Germans, Austrians, Turks, etc.). Patriotism, nationalism, revolution and armed struggle for independence also became popular themes in the arts of this period. Arguably, the most distinguished Romantic poet of this part of Europe was [Adam Mickiewicz](#), who developed an idea that Poland was the "Messiah of nations," predestined to suffer just as [Jesus](#) had suffered to save all the people.^[1] In the [United States](#), the romantic gothic makes an early appearance with [Washington Irving's](#) *The Legend of Sleepy Hollow* (1819), followed from 1823 onwards by the fresh *Leatherstocking Tales* of [James Fenimore Cooper](#). They emphasized heroic simplicity and their fervent landscape descriptions of an already-exotic mythicized frontier peopled by "noble savages" was similar to the philosophical theory of [Jean-Jacques Rousseau](#), like Uncas in Cooper's *The Last of the Mohicans*, for example. There also are picturesque elements in Washington Irving's essays and travel books.

[Edgar Allan Poe's](#) tales of the macabre and his balladic poetry were more influential in [France](#) than at home, but the romantic American novel is fully developed in [Nathaniel Hawthorne's](#) atmosphere and melodrama. Later [Transcendentalist](#) writers such as [Henry David Thoreau](#) and [Ralph Waldo Emerson](#) still show elements of its influence, as does the romantic realism of [Walt Whitman](#). But by the 1880s, psychological and social realism was competing with romanticism. The poetry which Americans wrote and read was all romantic or heavily influenced by it until the rise of [modernism](#) in 1920s. This includes Poe and Hawthorne, as well as [Henry Wadsworth Longfellow](#). The poetry of [Emily Dickinson](#)—nearly unread in her own time—and [Herman Melville's](#) novel *Moby-Dick* show the lingering influence of romantic themes, even as they evoked a more realistic and sometimes deeply psychological and philosophical view of the world. As elsewhere ([England](#), [Germany](#), [France](#)), American literary Romanticism had its counterpart in the visual arts, most especially in the exaltation of untamed America found in the paintings of the Hudson River School.

In the twentieth century, Russian-American writer [Ayn Rand](#) called herself a romantic, and thought she might be a bridge from the Romantic era to an eventual esthetic rebirth of the movement. She wrote a book called *The Romantic Manifesto* and called her own approach "Romantic realism."

Music

Romanticism and music

In general, the term “Romanticism” applied to music has come to mean the period roughly from the 1820s until 1910. The contemporary application of “romantic” to [music](#) did not coincide with modern categories. In 1810, [E.T.A. Hoffmann](#) called [Mozart](#), [Haydn](#), and [Beethoven](#) the three “Romantic Composers,” while Ludwig Spohr used the term “good Romantic style” to apply to parts of Beethoven's Fifth Symphony. By the early twentieth century, the sense that there had been a decisive break with the musical past led to the establishment of the nineteenth century as “The Romantic Era,” and as such it is referred to in the standard encyclopedias of music.

In Beethoven, perhaps the first incarnation since the [Renaissance](#) of the artist as hero, the concept of the Romantic musician begins to reveal itself—the man who, after all, morally challenged the Emperor [Napoleon](#) himself by striking him out from the dedication of the Symphony no. 3, the Eroica Symphony. In Beethoven's Fidelio he creates the apotheosis of the “rescue operas” which were another feature of French musical culture during the revolutionary period, in order to hymn the freedom which underlay the thinking of all radical artists in the years of hope after the Congress of Vienna.

Beethoven's use of tonal architecture in such a way as to allow significant expansion of musical forms and structures was immediately recognized as bringing a new dimension to music. The later piano music and string quartets, especially, showed the way to a completely unexplored musical universe. The writer, critic (and composer) Hoffmann was able to write of the supremacy of instrumental music over vocal music in expressiveness, a concept which would previously have been regarded as absurd. Hoffmann himself, as a practitioner both of music and literature, encouraged the notion of music as ‘programmatic’ or telling a story, an idea which new audiences found attractive, however, irritating it was to some composers (for example, [Felix Mendelssohn](#)). New developments in instrumental technology in the early nineteenth century—iron frames for pianos, wound metal strings for string instruments—enabled louder dynamics, more varied tone colors, and the potential for sensational virtuosity. Such developments swelled the length of pieces, introduced programmatic titles, and created new genres such as the free standing overture or tone-poem, the piano fantasy, nocturne and rhapsody, and the virtuoso concerto, which became central to musical Romanticism. In opera a new Romantic atmosphere combining supernatural terror and melodramatic plot in a folkloric context was most successfully achieved by Carl Maria von Weber's *Der Freischütz* (1817, 1821). Enriched timbre and color marked the early orchestration of [Hector Berlioz](#) in France, and the grand operas of Giacomo Meyerbeer. Amongst the radical fringe of what became mockingly characterized (adopting Wagner's own words) as “artists of the future,” Liszt and Wagner each embodied the Romantic cult of the free, inspired, charismatic, perhaps ruthlessly unconventional individual artistic personality.

It is the period of 1815 to 1848, which must be regarded as the true age of Romanticism in music—the age of the last compositions of Beethoven (d. 1827) and [Schubert](#) (d. 1828), of the works of [Schumann](#) (d. 1856) and Chopin (d. 1849), of the early struggles of Berlioz and [Richard Wagner](#), of the great virtuosos such as [Paganini](#) (d. 1840), and the young [Franz Liszt](#) and Sigismond Thalberg. Now that people are able to listen to the work of Mendelssohn (d. 1847) stripped of the Biedermeier reputation unfairly attached to it, he can also be placed in this more appropriate context. After this period, with Chopin and Paganini dead, Liszt

retired from the concert platform at a minor German court, Wagner effectively in exile until he obtained royal patronage in Bavaria, and Berlioz still struggling with the bourgeois liberalism which all but smothered radical artistic endeavor in Europe, Romanticism in music was surely past its prime—giving way, rather, to the period of musical romantics.

Music after 1848

Romantic nationalism—the argument that each nation had a unique individual quality that would be expressed in laws, customs, language, logic, and the arts—found an increasing following after 1848. Some of these ideals, linked to liberal politics, had been exemplified in Beethoven's antipathy to Napoleon's adoption of the title of emperor, and can be traced through to the musical patriotism of Schumann, Verdi, and others. For these composers and their successors the nation itself became a new and worthy theme of music. Some composers sought to produce or take part in a school of music for their own nations, in parallel with the establishment of national literature. Many composers would take inspiration from the poetic nationalism present in their homeland. This is evident in the writings of Richard Wagner, especially after 1850, but can be clearly seen in Russia, where the *Kuchka* (handful) of nationalist composers gathered around [Mily Balakirev](#), including [Modest Mussorgsky](#), [Alexander Borodin](#), and [Nikolai Rimsky-Korsakov](#). These composers were concerned about the enormous influence of German music in [Russia](#), and they largely resented the founding of the conservatoires in [Moscow](#) and Saint Petersburg by the brothers Nikolai and Anton Rubinstein, which they believed would be Trojan horses for German musical culture (however, Russian romantic music is today now closely identified with Anton's favorite pupil, [Pyotr Ilyich Tchaikovsky](#)).

This movement continued forward through into the twentieth century with composers such as [Jean Sibelius](#), although nationalism found a new musical expression in study of folk-song which was to be a key element in the development of [Béla Bartók](#), [Ralph Vaughan Williams](#), and others.

Labels like “Late Romantic” and “Post-Romantic” are sometimes used to link disparate composers of various nationalities, such as [Giacomo Puccini](#), [Jean Sibelius](#), [Richard Strauss](#), Samuel Barber and [Ralph Vaughan Williams](#), all of whom lived into the middle of the twentieth century.

In the following pages I summarized all those lists about Romanticism in Literature, Art and Music, and underlined the important authors/artists/composers according to my preferences. In this survey I examined the most significant cultures in this twelfty - We define by French all the countries with French culture: almost exclusively France, and in France almost exclusively Paris. We define by English all the countries with English culture, mainly Great Britain, United States, Ireland. We define by German all the countries with German culture, mainly Germany, Austria, Switzerland. We define by Spanish all the countries with Spanish culture, mainly Spain and Latin America. We define by Russian all the countries with Russian culture, almost exclusively Russia. We define by Italian all the countries with Italian culture, almost exclusively Italy. As we do not want to encompass more than 30 categories we'll not analyze in this survey, as we have done with literature, the art and music of the: Portuguese, Brazilian, Dutch, Czech, Polish, Greek, Swedish, Norwegian, Danish, Finnish, as well as other European and non European cultures, and I am aware that we overlook giants as Grieg, Sibelius and Dvorak in music, Munch, Mondrian, etc. in art.

French Literature: Alexandre Dumas pere, Honore de Balzac, Theophile Gautier, Francois-Rene de Chateaubriand, Victor Hugo, Alphonse de Lamartine, Alfred de Musset, Charles Nodier, George Sand, Henri-Beyle dit Stendhal, Alfred de Vigny, Pierre-Jean de Beranger, Felicite Robert de Lammenais, Marceline Desbordes-Valmore, Charles-Augustin Sainte-Beuve, Gerard de Nerval, Pierre-Joseph Proudhon, Alexis de Tocqueville, Ernest Renan, Hippolyte Taine, Eugene-Francois Vidocq, Theophile Marion Dumersan, Francois Guizot, Theodor Leclercq, Prosper Merimee. Altogether 12 authors underlined.

French Art (if not mentioned otherwise in all this chapter – painter): Eugene Delacroix, Theodore Gericault, Emmanuel Viollet-le-Duc (architect), Antoine-Louis Barye (sculptor), Theodore Chasseriau, Antoine-Jean Gros, Paul Delaroche, Jean-Auguste-Dominique Ingres. 4 artists underlined.

French Music: Hector Berlioz, Georges Bizet, Charles-Valentin Alkan, Frederic Chopin (he lived the first part of his short life in Poland and the second part in France), Giacomo Meyerbeer. 4 composers underlined

English Literature: Lord George Gordon Byron, John Clare, Samuel Taylor, Thomas de Quincey, Ebenezer Elliot, William Hazlitt, John Keats, Charles Lamb, Mary Shelley, Percy Bisshe Shelley, Robert Southey, William Wordsworth, Dorothy Wordsworth, William Cullen Bryant, Wilfred Campbell, James Fenimore Cooper, Emily Dickinson, Ralph Waldo Emerson, Nathaniel Hawthorne, Washington Irving, Archibald Lampman, Henry Wadsworth Longfellow, James Russell Lowell, Herman Melville, Edgar Allan Poe, Charles Sangster, Henry David Thoreau, John Greeleaf Whittier, Thomas Davis, John Field, James Clarence Mangan, Padraic Pearse (also in Irish Gaelic), Oscar Wilde, Seba Smith, Benjamin Penhellow Shillaber, Johnson J. Hooper, Thomas Bangs Thorpe, George Washington Harris, Oliver Wendell Holmes Sr., Sir Walter Scott, Samuel Taylor Coleridge, Robert Southey, Felicia Hemans, Letizia Elizabeth Landon, Benjamin Disraeli, Charles Kingsley, John Ruskin, William Makepeace Thackeray, Charlotte Bronte, Emily Bronte, Anne Bronte, William Blake, Charles Robert Maturin. Altogether 20 underlined.

English Art: William Blake, John Constable, J.M.W. Turner, John William Waterhouse, Albert Bierstadt, George Catlin. 2 underlined.

English Music: Louis Moreau Gottschalk, Edward MacDowell, Sir William Sterndale Bennett, Sir Charles Hubert Hastings Parry. 1 underlined.

German Literature: Joseph Goerres, Jakob Grimm, Wilhelm Grimm, Adam Mueller, Joseph von Eichendorff, Friedrich Schlegel, August Wilhelm Schlegel, Ludwig Tieck, Ludwig Uhland, ETA Hoffmann, Zacharias Werner, Johan Wolfgang von Goethe, Friedrich Hoelderlin, Heinrich Heine, Friedrich Wilhelm Joseph Schelling, Friedrich Schleiermacher, Georg Wilhelm Friedrich Hegel, Arthur Schopenhauer, Annette von Droste Huelshoff, Adelbert von Chamisso, Eduard Moerike, Karl Gutzkow, Heinrich Laube, Theodor Mundt, Ludolf Wienbarg, Ludwig Boerne, Georg Buechner, Willibald Alexis, Jean Paul, Achim von Arnim, Clemens Brentano. 6 underlined.

German Art: Caspar David Friedrich, Carl Gustav Carus, Karl Friedrich Lessing, Adrian Ludwig Richter, Carl Spitzweg, Eberhard Waechter, Gerhard von Kuegelgen. 3 underlined.

German Music: Johannes Brahms, Franz Schubert, Robert Schumann, Adolf von Henselt, Ludwig van Beethoven, Richard Wagner, Carl Maria von Weber, Felix Mendelssohn, Franz Liszt, Sigismond Thalberg. 8 underlined.

Spanish Literature: Mariano Jose de Larra, Jose de Espronceda, Jose Zorilla, Gustavo Adolfo Becquer, Angel de Saavedra Duke of Rivas, Manuel Jose Quintana, Gertrudis Gomez de Avellaneda, Juan Arola, Nicomedes Pastor Diaz, Carolina Coronado, Serafin Estebanez Calderon, Juan Donoso Cortes, Jaime Balmes, Ramon de Mesonero Romanos, Francisco Martinez de la Rosa, Antonio Garcia Gutierrez, Juan Eugenio Hertenbusch, Esteban Echeverria, Juan Maria Gutierrez, Miguel Cane, Jose Marmol, Juan Bautista Alberdi. 3 underlined.

Spanish Art: Francisco Goya, Antonio Maria Esquivel, Eugenio Lucas Velazquez, Federico de Madrazo. 2 underlined.

Spanish Music: Juan Crisóstomo Jacobo Antonio de Arriaga y Balzola, Francisco Asenjo Barbieri, Ruperto Chapí, Federico Chueca, Tomás Bretón, Pablo Sarasate and Jesús de Monasterio. 3 underlined.

Russian Literature: Mikhail Lermontov, Aleksandr Pushkin, Vasily Zhukovsky, Konstantin Batyushkov, Yevgeny Baratynsky, Fyodor Tyutchev, Afanasy Fet, Nikolai Gogol, Ivan Goucharov, Mikhail Saltykov-Shchedrin, Ivan Krylov, Alexander Herzen. 4 underlined.

Russian Art: Ivan Aivazovsky, Karl Briullov, Orest Kiprensky, Vasily Tropinin. 4 underlined.

Russian Music: Mily Balakirev, Alexander Borodin, Cesar Cui, Mikhail Glinka, Modest Mussorgsky, Nikolai Rimsky-Korsakov, Pyotr Ilyich Tchaikovsky, Sergey Lyapunov, Nikolai Medtner, Sergei Bortkiewicz, Anton Arensky, Georgy Catoire, Sergei Rachmaninoff, Nikolai Rubinstein, Anton Rubinstein. 8 underlined.

Italian Literature: Aleardo Aleardi, Giuseppe Gioacchino Belli, Giovanni Berchet, Ugo Foscolo, Giacomo Leopardi, Alessandro Manzoni, Giuseppe Mazzini, Ippolito Pindemonte, Carlo Porta, Giovanni Prati, Silvio Pellico, Piero Maroncelli, Massimo d'Azeglio, Ippolito Nievo, Giuseppe Giusti, Giuseppe Gioachino Belli. 3 underlined.

Italian Art: Francesco Hayez, Pietro Aldi, Andrea Gastaldi, Giuseppe Molteni, Giovanni Servi, Alfonso Simonetti, Letterio Subba, Scipione Vannutelli, Tranquillo Cremona. 1 underlined.

Italian Music: Ferdinando Carulli, Gaspare Sontini, Niccolò Paganini, Gioachino Rossini, Gaetano Donizetti, Vincenzo Bellini. 4 underlined.

Note – Literature from other countries is surveyed extensively in other chapters and we analyzed there at length the contribution of giants such as Ibsen, Strindberg and Andersen to world literature. But in this survey we have not analyzed music and art from additional countries beside the 6 most prominent ones, in order not to exceed 30 ratings. Furthermore, we have included the Polish Chopin in French music as most of his active years were in France, and the Dutch Van Gogh in French art as most of his active years were in France.

Still, I would like to mention in a few words some romantic composers from other countries – the Czechs Antonin Dvorak, Bedrich Smetana, the Norwegian Edvard Grieg, the Finnish Jean Sibelius. Likewise, in other periods of this book's era we don't analyze the immense contribution of Norwegian Munch and Dutch Mondrian, although the later spent 20 of his most productive years in Paris. But Picasso although Spanish is perceived as a French artist, as the British Sisley, as the Italian Modigliani, and as the Russians Chagall and Soutine.

Analysis of the Results of the Romantic Era

We'll analyze in the following pages the most/more/significant romantic literature/art/music according to the origin of those cultures. We'll start with the analysis of the literatures. But in order to do so we have to decide what prevails – quantity or quality or both? If for example we have more underlined English writers (20) does it mean that it is better than the French literature, as far as romanticism is concerned? But among the 12 French we find the giants which are by far among the best if not **the** best novelists – Balzac, Hugo, Stendhal, the best poets – Vigny, Musset, Lamartine, the most popular – Dumas pere, Sand... On the other hand we have some of **the** best world poets by any standard – Byron, Wordsworth, Keats, Shelley, we have some of the best writers as Poe, Wilde, the Bronte sisters, Thackeray, the most popular – Scott, Cooper. So who prevails? I have stated from the beginning that this survey is finally subjective and gives my preferences. As I perceive myself as a cosmopolitan who can read fluently in the original languages French, English, Spanish, Italian, Portuguese, Hebrew literatures, quite well German literature, and Anna Karenina in Russian with a translation, I think that I am objective enough to state that my preferences are not biased by my fluency in the language, by my prejudices, background, etc., and uniquely by my literary preferences.

Thus in this difficult decision of which is the better Romantic literature I have decided that it is the French not because of its quantity, which is less than the English, but by its quality as Balzac and Hugo are so high above all the others, that even if we decide that the quality of the poets is similar and of the popular writers as well, none of the English writers can compare to the quality and the quantity of Balzac and Hugo's masterpieces, which are the best ever, today as in the 19th century. Furthermore, Balzac is not only a romantic author, he is also a realist/naturalist author, and maybe even more a modern author. He can be compared to Beethoven in music who is romantic, realist and modern, and even if the German music would not have been so prolific in this period only because of him I could perhaps decide that German music is the most significant music in the romantic period. But what about Goethe, the giant novelist, playwright and poet, who wrote autobiography, memoirs, correspondence, was a statesman, wrote literary and aesthetic criticism; and treatises on botany, anatomy, and colour. In addition, nearly 3,000 drawings by him have survived. He is considered the greatest German literary figure of the modern era. Should the German romantic literature only because of him prevail as the best? Possibly, if he didn't have to compete with Balzac and Hugo who were even better. And if we find the right equilibrium between quality and quantity we have to decide that although he is better than any other English writer in the romantic period, simply because of the quantity of the excellent English writers, it prevails as the second best literature in this period, while German literature reaches only the third position. So, we have to find a very delicate equilibrium between quality and quantity, weighing all the factors, the quality of every author, of the best of them, their innovation, immortality, but also the quantity of all the authors, or painters or composers, and decide what are the right ratings.

French Literature: Alexandre Dumas pere, Honore de Balzac, Theophile Gautier, Francois-Rene de Chateaubriand, Victor Hugo, Alphonse de Lamartine, Alfred de Musset, Charles Nodier, George Sand, Henri-Beyle dit Stendhal, Alfred de Vigny, Pierre-Jean de Beranger, Felicite Robert de Lammenais, Marceline Desbordes-Valmore, Charles-Augustin Sainte-Beuve, Gerard de Nerval, Pierre-Joseph Proudhon, Alexis de Tocqueville, Ernest Renan, Hippolyte Taine, Eugene-Francois Vidocq, Theophile Marion Dumersan, Francois Guizot, Theodor Leclercq, Prosper Merimee. Altogether 12 authors underlined.

English Literature: Lord George Gordon Byron, John Clare, Samuel Taylor, Thomas de Quincey, Ebenezer Elliot, William Hazlitt, John Keats, Charles Lamb, Mary Shelley, Percy Bisshe Shelley, Robert Southey, William Wordsworth, Dorothy Wordsworth, William Cullen Bryant, Wilfred Campbell, James Fenimore Cooper, Emily Dickinson, Ralph Waldo Emerson, Nathaniel Hawthorne, Washington Irving, Archibald Lampman, Henry Wadsworth Longfellow, James Russell Lowell, Herman Melville, Edgar Allan Poe, Charles Sangster, Henry David Thoreau, John Greeleaf Whittier, Thomas Davis, John Field, James Clarence Mangan, Padraic Pearse (also in Irish Gaelic), Oscar Wilde, Seba Smith, Benjamin Penhellow Shillaber, Johnson J. Hooper, Thomas Bangs Thorpe, George Washington Harris, Oliver Wendell Holmes Sr., Sir Walter Scott, Samuel Taylor Coleridge, Robert Southey, Felicia Hemans, Letizia Elizabeth Landon, Benjamin Disraeli, Charles Kingsley, John Ruskin, William Makepeace Thackeray, Charlotte Bronte, Emily Bronte, Anne Bronte, William Blake, Charles Robert Maturin. Altogether 20 underlined.

German Literature: Joseph Goerres, Jakob Grimm, Wilhelm Grimm, Adam Mueller, Joseph von Eichendorff, Friedrich Schlegel, August Wilhelm Schlegel, Ludwig Tieck, Ludwig Uhland, ETA Hoffmann, Zacharias Werner, Johan Wolfgang von Goethe, Friedrich Hoelderlin, Heinrich Heine, Friedrich Wilhelm Joseph Schelling, Friedrich Schleiermacher, Georg Wilhelm Friedrich Hegel, Arthur Schopenhauer, Annette von Droste Huelshoff, Adelbert von Chamisso, Eduard Moerike, Karl Gutzkow, Heinrich Laube, Theodor Mundt, Ludolf Wienbarg, Ludwig Boerne, Georg Buechner, Willibald Alexis, Jean Paul, Achim von Arnim, Clemens Brentano. 6 underlined.

Spanish Literature: Mariano Jose de Larra, Jose de Espronceda, Jose Zorilla, Gustavo Adolfo Becquer, Angel de Saavedra Duke of Rivas, Manuel Jose Quintana, Gertrudis Gomez de Avellaneda, Juan Arola, Nicomedes Pastor Diaz, Carolina Coronado, Serafin Estebanez Calderon, Juan Donoso Cortes, Jaime Balmes, Ramon de Mesonero Romanos, Francisco Martinez de la Rosa, Antonio Garcia Gutierrez, Juan Eugenio Hertenbusch, Esteban Echeverria, Juan Maria Gutierrez, Miguel Cane, Jose Marmol, Juan Bautista Alberdi. 3 underlined.

Russian Literature: Mikhail Lermontov, Aleksandr Pushkin, Vasily Zhukovsky, Konstantin Batyushkov, Yevgeny Baratynsky, Fyodor Tyutchev, Afanasy Fet, Nikolai Gogol, Ivan Goucharov, Mikhail Saltykov-Shchedrin, Ivan Krylov, Alexander Herzen. 4 underlined.

Italian Literature: Aleardo Aleardi, Giuseppe Gioacchino Belli, Giovanni Berchet, Ugo Foscolo, Giacomo Leopardi, Alessandro Manzoni, Giuseppe Mazzini, Ippolito Pindemonte, Carlo Porta, Giovanni Prati, Silvio Pellico, Piero Maroncelli, Massimo d'Azeglio, Ippolito Nievo, Giuseppe Giusti, Giuseppe Gioacchino Belli. 3 underlined.

The most significant literature in the Romantic Period is therefore the French literature, the more significant literature is the English literature, the significant literature is the German literature. Right after, are the Russian, Italian & Spanish romantic literatures.

What about the romantic art? Who prevails? Let's examine all the 6 arts in this period:

French Art (if not mentioned otherwise in all this chapter – painter): Eugene Delacroix, Theodore Gericault, Emmanuel Viollet-le-Duc (architect), Antoine-Louis Barye (sculptor), Theodore Chasseriau, Antoine-Jean Gros, Paul Delaroche, Jean-Auguste-Dominique Ingres. 4 artists underlined.

English Art: William Blake, John Constable, J.M.W. Turner, John William Waterhouse, Albert Bierstadt, George Catlin. 2 underlined.

German Art: Caspar David Friedrich, Carl Gustav Carus, Karl Friedrich Lessing, Adrian Ludwig Richter, Carl Spitzweg, Eberhard Waechter, Gerhard von Kuegelgen. 3 underlined.

Spanish Art: Francisco Goya, Antonio Maria Esquivel, Eugenio Lucas Velazquez, Federico de Madrazo. 2 underlined.

Russian Art: Ivan Aivazovsky, Karl Briullov, Orest Kiprensky, Vasily Tropinin. 4 underlined.

Italian Art: Francesco Hayez, Pietro Aldi, Andrea Gastaldi, Giuseppe Molteni, Giovanni Servi, Alfonso Simonetti, Letterio Subba, Scipione Vannutelli, Tranquillo Cremona. 1 underlined.

French art is the most significant in the Romantic Period with giants as Ingres, Gericault, Gros, Delacroix. Spanish art is the more significant with giants and innovators as Goya and Velasquez. English art is significant with giants as Constable and Turner, but only Turner can be perceived as innovator, being a precursor of Impressionism and Modern art. Followed by Russian art, German art and Italian art.

Finally, music, what romantic music prevails? Well, by far the Germans in quality & quantity.

French Music: Hector Berlioz, Georges Bizet, Charles-Valentin Alkan, Frederic Chopin (he lived the first part of his short life in Poland and the second part in France), Giacomo Meyerbeer. 4 composers underlined

English/American Music: Louis Moreau Gottschalk, Edward MacDowell, Sir William Sterndale Bennett, Sir Charles Hubert Hastings Parry. 1 underlined.

German/Austrian Music: Johannes Brahms, Franz Schubert, Robert Schumann, Adolf von Henselt, Ludwig van Beethoven, Richard Wagner, Carl Maria von Weber, Felix Mendelssohn, Franz Liszt, Sigismond Thalberg. 8 underlined.

Spanish Music: Juan Crisóstomo Jacobo Antonio de Arriaga y Balzola, Francisco Asenjo Barbieri, Ruperto Chapí, Federico Chueca, Tomás Bretón, Pablo Sarasate and Jesús de Monasterio. 3 underlined.

Russian Music: Mily Balakirev, Alexander Borodin, Cesar Cui, Mikhail Glinka, Modest Mussorgsky, Nikolai Rimsky-Korsakov, Pyotr Ilyich Tchaikovsky, Sergey Lyapunov, Nikolai Medtner, Sergei Bortkiewicz, Anton Arensky, Georgy Catoire, Sergei Rachmaninoff, Nikolai Rubinstein, Anton Rubinstein. 8 underlined.

Italian Music: Ferdinando Carulli, Gaspare Sontini, Niccolo Paganini, Gioachino Rossini, Gaetano Donizetti, Vincenzo Bellini. 4 underlined.

If we don't have any doubt about the predominance of the German romantic music with the best of the bests – Beethoven, Schubert, Schumann, Brahms, Wagner, Mendelssohn, Liszt, deciding that the German romantic music is the most significant, we don't have either any doubt about the more significant romantic music – the Russian with giants as Tchaikovsky, Rachmaninoff, Mussorgsky, Rimsky-Korsakov, quite numerous, but not as good as the Germans. What about the significant romantic music in the third place? Who is better – the French or the Italian? Chopin, Bizet and Berlioz, la crème de la crème, as opposed to Rossini, Donizetti and Bellini. Here again quality and originality prevails – and French music is more innovative than the Italian in this period, it will change soon, Chopin versus Rossini – no doubt Chopin prevails, as well as Bizet/Carmen and Berlioz – among the most romantic of all. So, French romantic music is significant, and right after Italian, and much less Spanish, and even much less – English. Well, English music was never as prominent as the other musics.

REALISM IN LITERATURE, ART AND MUSIC

Realism, sometimes called **Naturalism**, in the arts, literature and music is generally the attempt to represent subject matter truthfully, without artificiality and avoiding speculative fiction and supernatural elements. Realism has been prevalent at many periods, and can be in large part a matter of technique and training, and the avoidance of stylization. Realist movement that began in France in the 1850s, after the 1848 Revolution, and also social realism, regionalism, or kitchen sink realism. The Realist painters and writers rejected Romanticism, which had come to dominate French literature and art, with roots in the late 18th century. There have been various movements invoking realism in the opera style of verismo, literary realism, theatrical realism. Broadly defined as "the faithful representation of reality", Realism as a literary movement is based on "objective reality." It focuses on showing everyday activities and life, primarily among the middle or lower class society, without romantic idealization or dramatization. It may be regarded as the general attempt to depict subjects as they are considered to exist in third person objective reality, without embellishment or interpretation and "in accordance with secular, empirical rules." The Naturalist/Realist period encompasses the years 1850-1900/1920, with its peak in 1860-1899. A detailed description of Realism/Naturalism is given in our Appendix.

From Cory's Literature Lists above:

1. **FRENCH:** in the years 1860-1899: Emile Zola, Victor Hugo, Guy de Maupassant, Gustave Flaubert, Alexandre Dumas pere, Theophile Gautier, Stephane Mallarme, George Sand, Edmond Rostand, Alexandre Dumas fils, Arthur Rimbaud, Georges Courteline, Georges Feydeau, Paul Verlaine, Charles Baudelaire, Jules Verne, Eugene Labiche, Emile Augier, Henri Meilhac, Ludovic Halevy, Theodore de Banville, Leconte de Lisle, Henri de Reigner,

Alfred Jarry, Joris-Karl Huysmans, Anatole France (Nobel 1921), Alphonse Daudet, La comtesse de Segur (children books), Paul Feval, Jules Valles, Prosper Merimee, Jules Barbey d'Aureville, Les Freres de Goncourt (Edmond et Jules), Sully Prudhomme (Nobel 1901), Maurice Maeterlink (Nobel Belgium 1911), Frederic Mistral (Nobel 1904, wrote in Provençal), Victor Cherbuliez (Switzerland), Louis-Honore Frechette (French Canada), Oswald Durand (Haiti, wrote in Haitian), Edouard David (wrote in Picard). **I underline in this book the authors I like most, but it doesn't mean necessarily that they are the best.**

Here, we encounter our first problem. In my survey of literatures in previous chapters I have divided the writers in 3 periods, not by romanticism/realism/modernism but by 40 years, one third of the era of 1820 to 1939 – 1820-1859, which is also the peak of romanticism, 1860-1899, which is also the peak of realism/naturalism, 1900-1939, which is also the peak of modernism. But, what can we do as some of the periods overlap and romantic authors as Dumas pere, Hugo and Sand were also active in the years 1860-1899? Well, actually 5 authors overlap - Alexandre Dumas pere, Theophile Gautier, George Sand, Victor Hugo, Prosper Merimee – & we'll substract them from our new list of the realism/naturalism period:

1. **FRENCH:** in the years 1860-1899/**net:** Emile Zola, Guy de Maupassant, Gustave Flaubert, Stephane Mallarme, Edmond Rostand, Alexandre Dumas fils, Arthur Rimbaud, Georges Courteline, Georges Feydeau, Paul Verlaine, Charles Baudelaire, Jules Verne, Eugene Labiche, Emile Augier, Henri Meilhac, Ludovic Halevy, Theodore de Banville, Leconte de Lisle, Henri de Reigner, Alfred Jarry, Joris-Karl Huysmans, Anatole France (Nobel 1921), Alphonse Daudet, La comtesse de Segur (children books), Paul Feval, Jules Valles, Jules Barbey d'Aureville, Les Freres de Goncourt (Edmond et Jules), Sully Prudhomme (Nobel 1901), Maurice Maeterlink (Nobel Belgium 1911), Frederic Mistral (Nobel 1904, wrote in Provençal), Victor Cherbuliez (Switzerland), Louis-Honore Frechette (French Canada), Oswald Durand (Haiti, wrote in Haitian), Edouard David (wrote in Picard). **I underline in this book the authors I like most, but it doesn't mean necessarily that they are the best.**

2. **ENGLISH:** in the years 1860-1899: Henry James (US), Charles Dickens, Oscar Wilde (Irish), Mark Twain (US), Alfred Lord Tennyson, Emily Dickinson (US), George Eliot, Samuel Butler, Thomas Hardy, Elizabeth Gaskell, Walt Whitman (US), Robert Browning, W.S. Gilbert, Robert Louis Stevenson, Howard Pyle (US), Henry Rider Haggard, Lew Wallace (US), Frances Hodgson Burnett (US), Jerome K. Jerome, Louisa May Alcott (US), Anthony Trollope, Israel Zangwill, Anthony Hope, Nathaniel Hawthorne (US), Harriet Beecher Stowe (US), Henry David Thoreau (US), Lewis Carroll, George Meredith, Herman Melville (US), William Dean Howells (US), Sheridan Le Fanu (Irish), Dante Gabriel Rossetti, B. C. Stephenson, Elizabeth Barrett Browning, John Millington Synge (Irish), Augusta Lady Gregory (Irish), Charles G. D. Roberts (Canada), Miles Franklin (Australia), Katherine Mansfield (New Zealand), Samuel Selvon (in Creolized English, Trinidad). In total 40 authors, 4 of them: James, Dickens, Wilde and Twain, were among the best authors of the English literature, and among the best world authors in all times.

Actually, only one author - Oscar Wilde (Irish), was in the romantic list, so the net list is:

2. **ENGLISH:** in the years 1860-1899/**net:** Henry James (US), Charles Dickens, Mark Twain (US), Alfred Lord Tennyson, Emily Dickinson (US), George Eliot, Samuel Butler, Thomas Hardy, Elizabeth Gaskell, Walt Whitman (US), Robert Browning, W.S. Gilbert, Robert Louis Stevenson, Howard Pyle (US), Henry Rider Haggard, Lew Wallace (US), Frances Hodgson Burnett (US), Jerome K. Jerome, Louisa May Alcott (US), Anthony Trollope, Israel Zangwill,

Anthony Hope, Nathaniel Hawthorne (US), Harriet Beecher Stowe (US), Henry David Thoreau (US), Lewis Carroll, George Meredith, Herman Melville (US), William Dean Howells (US), Sheridan Le Fanu (Irish), Dante Gabriel Rossetti, B. C. Stephenson, Elizabeth Barrett Browning, John Millington Synge (Irish), Augusta Lady Gregory (Irish), Charles G. D. Roberts (Canada), Miles Franklin (Australia), Katherine Mansfield (New Zealand), Samuel Selvon (in Creolized English, Trinidad).

3. **GERMAN:** in the years 1860-1899: Gerhard Hauptmann (Nobel Germany 1912), Theodor Mommsen (Nobel Germany 1902), Friedrich Nietzsche, Theodor Storm, Theodor Fontane, Gottfried Keller (Switzerland), Conrad Ferdinand Meyer (Switzerland), Detlev von Liliencron, Gustav Freitag, Wilhelm Raabe, Wilhelm Busch, Adalbert Stifter (Austria), Carl Spitteler (Nobel Switzerland 1919), Paul Johann Ludwig Heyse (Nobel Germany 1910), Rudolf Christoff Eucken (Nobel Germany 1908), Leopold von Sacher-Masoch (Austrian), Bertha von Suttner (Nobel Peace Prize, Austrian), Marie von Ebner-Eschenbach (Austrian), Ferdinand von Saar (Austria), Peter Rosegger (Austria), Klaus Groth (in Plattdeutsch, Germany), Michel Rodange (in Luxembourgish, Luxembourg), Auguste Lustig (in Alsatian, France), Auguste Corrodi (in Schwyzerdeutsch, Switzerland). The German authors in the 20th century (and especially in the first 40 years) were by far more numerous and better than the authors in the last 40 years of the 19th century, however, if we compare the whole 19th century to 20th century, some would say that 19th century was better.

In this list there is no redundancy with the romantic authors, so it remains the same.

4. **SPANISH:** in the years 1860-1899: Jose Maria de Pereda, Jose Zorilla, Miguel de Unamuno, Gustavo Adolfo Becquer, Ramon de Campoamor, Gaspar Nunez de Arce, Juan Valera, Benito Perez Galdos, Leopoldo Alas "Clarín", Armando Palacio Valdes, Marcelino Menendez Y Pelayo, Jose Marti (Cuba), Ruben Dario (Nicaragua), Manuel Gonzalez Prada (Peru), Rosalia de Castro (Galego), Angel Guimera (Catalan), Pachin de Melas (Asturianu), Nikolas Ormaetxea/Orixé (Basque). In total 18 authors in 5 languages: Spanish (14), Galego (1), Catalan (1), Asturianu (1), Basque (1) and in 4 countries: Spain (15), Nicaragua (1), Cuba (1), Peru (1). As I know more Spanish literature, the literature in the other languages is merely indicative, and does not encompass the whole literature in Catalan/Galego/Asturianu/Basque.

In this list there is no redundancy with the romantic authors, so it remains the same.

5. **RUSSIAN** 1860-1899: Lev Tolstoy, Fyodor Dostoyevsky, Anton Chekhov, Ivan Turgenev, Nikolay Leskov, Nikolay Nekrasov, Alexei Konstantinovich Tolstoy, Alexander Ostrovsky, Valery Bryusov, Konstantin Balmont. In total 10 authors, 4 of them: Tolstoy, Dostoyevsky, Chekhov and Turgenev, were the best authors ever of the Russian literature, and among the best world authors in all times. It goes without saying that I prefer by far this period with its leading authors over the authors in the 20th Century, although it was a very prolific century.

In this list there is no redundancy with the romantic authors, so it remains the same.

6. **ITALIAN:** in 1860-1899: Gabriele d'Annunzio, Giovanni Verga, Antonio Fogazzaro, Edmondo de Amicis, Carlo Collodi, Luigi Capuana, Giovanni Pascoli, Matilde Serao, Giosue Carducci, Salvatore Farina, Carlo Favetti (Friulian, Italy), Peider Lansel (Rumantsch, Switzerland), Rinatu Coti (Corsican, France), Gavino Contini (Sardinian, Italy), Nino Martoglio (Sicilian, Italy). In total 15 authors in 6 languages - Italian & regional languages:

Italian (10), Friulian (1), Rumantsch (1), Corsican (1), Sardinian (1), Sicilian (1). From 3 countries: Italy (13), Switzerland (1), France (1). This is only an indicative list.

In this list there is no redundancy with the romantic authors, so it remains the same.

From another list:

The achievement of realism in the [theatre](#) was to direct attention to the social and psychological problems of ordinary life. In its dramas, people emerge as victims of forces larger than themselves, as individuals confronted with a rapidly accelerating world. These pioneering playwrights were unafraid to present their characters as ordinary, impotent, and unable to arrive at answers to their predicaments. This type of art represents what we see with our human eyes. [Anton Chekov](#), for instance, used camera works to reproduce an uninflected [slice of life](#), exposing the rhetorical and suasive character of realistic theatricality. Verismo was a post-Romantic operatic tradition associated with Italian composers such as [Pietro Mascagni](#), [Ruggero Leoncavallo](#), [Umberto Giordano](#), [Francesco Cilea](#) and [Giacomo Puccini](#). They sought to bring the naturalism of influential late 19th-century writers such as [Émile Zola](#), [Gustave Flaubert](#), and [Henrik Ibsen](#) into opera. This new style presented true-to-life drama that featured gritty and flawed lower-class protagonists while some described it as a heightened portrayal of a realistic event. Although an account considered [Giuseppe Verdi's](#) *Luisa Miller* and *La Traviata* as the first stirrings of the verismo, peaked in the early 1900s. Verismo also reached Britain where pioneers included the [Victorian-era](#) theatrical partnership of the [dramatist W. S. Gilbert](#) and the composer [Arthur Sullivan](#).

The chief exponents of Realism were [Gustave Courbet](#), [Jean-François Millet](#), [Honoré Daumier](#), and [Jean-Baptiste-Camille Corot](#). [Jules Bastien-Lepage](#) is closely associated with the beginning of *Naturalism*, an artistic style that emerged from the later phase of the Realist movement and heralded the arrival of [Impressionism](#). Realists used unprettified detail depicting the existence of ordinary contemporary life, coinciding in the contemporaneous naturalist literature of [Émile Zola](#), [Honoré de Balzac](#) (**actually Balzac is romantic, realist, naturalist and modern as well** - JC), and [Gustave Flaubert](#).

Courbet was the leading proponent of Realism and he challenged the popular [history painting](#) that was favored at the state-sponsored art academy. His groundbreaking paintings *A Burial at Ornans* and *The Stonebreakers* depicted ordinary people from his native region. Both paintings were done on huge canvases that would typically be used for history paintings. Although Courbet's early works emulated the sophisticated manner of Old Masters such as [Rembrandt](#) and [Titian](#), after 1848 he adopted a boldly inelegant style inspired by [popular prints](#), shop signs, and other work of folk artisans. In *The Stonebreakers*, his first painting to create a controversy, Courbet eschewed the pastoral tradition of representing human subjects in harmony with nature. Rather, he depicted two men juxtaposed against a charmless, stony roadside. The concealment of their faces emphasizes the dehumanizing nature of their monotonous, repetitive labor.

The French Realist movement had stylistic and ideological equivalents in all other Western countries, developing somewhat later. The Realist movement in France was characterized by a spirit of rebellion against powerful official support for history painting. In countries where institutional support of history painting was less dominant, the transition from existing traditions of [genre painting](#) to Realism presented no such schism. An important Realist movement beyond France was the [Peredvizhniki](#) or *Wanderers* group in Russia who formed in the 1860s and organized exhibitions from 1871 included many realists such as genre artist [Vasily Perov](#), [landscape](#) artists [Ivan Shishkin](#), [Alexei Savrasov](#), and [Arkhip Kuindzhi](#),

portraiture [Ivan Kramskoy](#), war artist [Vasily Vereshchagin](#), historical artist [Vasily Surikov](#) and, especially, [Ilya Repin](#), who is considered by many to be the most renowned Russian artist of the 19th century.

Courbet's influence was felt most strongly in Germany, where prominent realists included [Adolph Menzel](#), [Wilhelm Leibl](#), [Wilhelm Trübner](#), and [Max Liebermann](#). Leibl and several other young German painters met Courbet in 1869 when he visited Munich to exhibit his works and demonstrate his manner of painting from nature. In Italy the artists of the [Macchiaioli](#) group painted Realist scenes of rural and urban life. The [Hague School](#) were Realists in the Netherlands whose style and subject matter strongly influenced the early works of [Vincent van Gogh](#). In Britain artists such as the American [James Abbot McNeill Whistler](#), as well as English artists [Ford Madox Brown](#), [Hubert von Herkomer](#) and [Luke Fildes](#) had great success with realist paintings dealing with social issues and depictions of the "real" world.

In the United States, [Winslow Homer](#) and [Thomas Eakins](#) were important Realists and forerunners of the [Ashcan School](#), an early-20th-century art movement largely based in [New York City](#). The Ashcan School included such artists as [George Bellows](#) and [Robert Henri](#), and helped to define [American realism](#) in its tendency to depict the daily life of poorer members of society.

[Ian Watt](#) in *The Rise of the Novel* (1957) saw the novel as originating in the early 18th-century and he argued that the novel's 'novelty' was its 'formal realism': the idea 'that the novel is a full and authentic report of human experience'.^[43] His examples are [novelists Daniel Defoe](#), [Samuel Richardson](#) and [Henry Fielding](#). Watt argued that the novel's concern with realistically described relations between ordinary individuals, ran parallel to the more general development of philosophical realism, middle-class economic individualism and Puritan individualism. He also claims that the form addressed the interests and capacities of the new middle-class reading public and the new book trade evolving in response to them. As tradesmen themselves, Defoe and Richardson had only to 'consult their own standards' to know that their work would appeal to a large audience.

Later in the 19th century [George Eliot's](#) (1819–1880) *Middlemarch: A Study of Provincial Life* (1871–72), described by [novelists Martin Amis](#) and [Julian Barnes](#) as the greatest novel in the English language, is a work of realism.^{[45][46]} Through the voices and opinions of different characters the reader becomes aware of important issues of the day, including the [Reform Bill](#) of 1832, the beginnings of the railways, and the state of contemporary medical science. *Middlemarch* also shows the deeply reactionary mindset within a settled community facing the prospect of what to many is unwelcome social, political and technological change.

While [George Gissing](#) (1857–1903), author of *New Grub Street* (1891), amongst many other works, has traditionally been viewed as a naturalist, mainly influenced by [Émile Zola](#),^[47] Jacob Korg has suggested that [George Eliot](#) was a greater influence.^[48]

Other novelists, such as [Arnold Bennett](#) (1867–1931) and [Anglo-Irishman George Moore](#) (1852–1933), consciously imitated the French realists.^[49] Bennett's most famous works are the *Clayhanger* trilogy (1910–18) and *The Old Wives' Tale* (1908). These books draw on his experience of life in the [Staffordshire Potteries](#), an industrial area encompassing the six towns that now make up [Stoke-on-Trent](#) in [Staffordshire](#), England. George Moore, whose most famous work is *Esther Waters* (1894), was also influenced by the [naturalism](#) of Zola.^[50]

[William Dean Howells](#) (1837–1920) was the first American author to bring a [realist aesthetic](#) to the literature of the United States.^[51] His stories of middle and upper class life set in the 1880s and 1890s are highly regarded among scholars of American fiction.^[citation]

^{needed} His most popular novel, *The Rise of Silas Lapham* (1885), depicts a man who, ironically, falls from materialistic fortune by his own mistakes. Other early American realists include [Samuel Clemens](#) (1835–1910), better known by his pen name of [Mark Twain](#), author of *The Adventures of Huckleberry Finn* (1884), [Stephen Crane](#) (1871–1900), and [Horatio Alger, Jr.](#) (1832–1899).

Twain's style, based on vigorous, realistic, colloquial American speech, gave American writers a new appreciation of their national voice. Twain was the first major author to come from the interior of the country, and he captured its distinctive, humorous slang and iconoclasm. For Twain and other American writers of the late 19th century, realism was not merely a literary technique: It was a way of speaking truth and exploding worn-out conventions. Crane was primarily a journalist who also wrote fiction, essays, poetry, and plays. Crane saw life at its rawest, in slums and on battlefields. His haunting [Civil War](#) novel, *The Red Badge of Courage*, was published to great acclaim in 1895, but he barely had time to bask in the attention before he died, at 28, having neglected his health. He has enjoyed continued success ever since—as a champion of the common man, a realist, and a symbolist. Crane's *Maggie: A Girl of the Streets* (1893), is one of the best, if not the earliest, naturalistic American novel. It is the harrowing story of a poor, sensitive young girl whose uneducated, alcoholic parents utterly fail her. In love, and eager to escape her violent home life, she allows herself to be seduced into living with a young man, who soon deserts her. When her self-righteous mother rejects her, Maggie becomes a prostitute to survive, but soon commits suicide out of despair. Crane's earthy subject matter and his objective, scientific style, devoid of moralizing, earmark *Maggie* as a naturalist work.¹⁵⁴¹ [Horatio Alger Jr.](#) was a prolific 19th-century American [author](#) whose principal output was formulaic [rags-to-riches](#) juvenile novels that followed the adventures of bootblacks, newsboys, peddlers, buskers, and other impoverished children in their rise from humble backgrounds to lives of respectable middle-class security and comfort. His novels, of which *Ragged Dick* is a typical example, were hugely popular in their day.

[Gustave Flaubert](#)'s (1821–1880) acclaimed novels *Madame Bovary* (1857), which reveals the tragic consequences of romanticism on the wife of a provincial doctor, and *Sentimental Education* (1869) represent perhaps the highest stages in the development of French realism. Flaubert also wrote other works in an entirely different style and his romanticism is apparent in the fantastic *The Temptation of Saint Anthony* (final version published 1874) and the baroque and exotic scenes of ancient [Carthage](#) in *Salammbô* (1862).

In [German literature](#), 19th-century realism developed under the name of "Poetic Realism" or "Bourgeois Realism," and major figures include [Theodor Fontane](#), [Gustav Freytag](#), [Gottfried Keller](#), [Wilhelm Raabe](#), [Adalbert Stifter](#), and [Theodor Storm](#).

Later realist writers included [Fyodor Dostoevsky](#), [Leo Tolstoy](#), [Benito Pérez Galdós](#), [Guy de Maupassant](#), [Anton Chekhov](#), [Leopoldo Alas \(Clarín\)](#), [José Maria de Eça de Queiroz](#), [Machado de Assis](#), [Henryk Sienkiewicz](#), [Bolesław Prus](#) and, in a sense, [Émile Zola](#), whose [naturalism](#) is often regarded as an offshoot of realism.

[Theatrical realism](#) was a general [movement](#) in [19th-century theatre](#) from the time period of 1870–1960 that developed a set of dramatic and theatrical [conventions](#) with the aim of bringing a greater fidelity of real life to texts and performances. Part of [a broader artistic movement](#), it shared many stylistic choices with [naturalism](#), including a focus on everyday (middle-class) drama, ordinary speech, and dull settings. Realism and naturalism diverge chiefly on the degree of choice that characters have: while naturalism believes in the overall strength of external forces over internal decisions, realism asserts the power of the individual to choose (see *A Doll's House*).

Russia's first professional playwright, [Aleksey Pisemsky](#), [Fyodor Dostoevsky](#) and [Leo Tolstoy](#) (*The Power of Darkness* (1886)), began a tradition of psychological realism in Russia which culminated with the establishment of the [Moscow Art Theatre](#) by [Constantin Stanislavski](#) and [Vladimir Nemirovich-Danchenko](#). Their ground-breaking productions of the plays of [Anton Chekhov](#) in turn influenced [Maxim Gorky](#) and [Mikhail Bulgakov](#). [Stanislavski](#) went on to develop his '[system](#)', a form of actor training that is particularly suited to psychological realism.

19th-century realism is closely connected to the development of modern drama, which, as Martin Harrison explains, "is usually said to have begun in the early 1870s" with the "middle-period" work of the Norwegian dramatist [Henrik Ibsen](#). Ibsen's realistic drama in prose has been "enormously influential."

In [opera](#), [verismo](#) refers to a post-Romantic Italian tradition that sought to incorporate the naturalism of Émile Zola and Henrik Ibsen. It included realistic – sometimes sordid or violent – depictions of contemporary everyday life, especially the life of the lower classes.

In France in addition to [melodramas](#), popular and bourgeois theater in the mid-century turned to realism in the "well-made" bourgeois farces of [Eugène Marin Labiche](#) and the moral dramas of [Émile Augier](#).

In [opera](#), [verismo](#) ([Italian](#) for "realism", from *vero*, meaning "true") was a post-Romantic operatic tradition associated with Italian composers such as [Pietro Mascagni](#), [Ruggero Leoncavallo](#), [Umberto Giordano](#), [Francesco Cilea](#) and [Giacomo Puccini](#). *Verismo* as an operatic genre had its origins in an [Italian literary movement of the same name](#). This was in turn related to the international literary movement of [naturalism](#) as practised by [Émile Zola](#) and others. Like [naturalism](#), the *verismo* literary movement sought to portray the world with greater [realism](#). In so doing, Italian *verismo* authors such as [Giovanni Verga](#) wrote about subject matter, such as the lives of the poor, that had not generally been seen as a fit subject for literature.

A short story by Verga called *[Cavalleria rusticana](#)* ([Italian](#) for "Rustic Chivalry"), then developed into a play by the same author, became the source for what is usually considered to be the first *verismo* opera: *[Cavalleria rusticana](#)* by Mascagni, which premiered on 17 May 1890 at the Teatro Costanzi in Rome. Thus begun, the operatic genre of *verismo* produced a handful of notable works such as [Pagliacci](#), which premiered at Teatro Dal Verme in Milan on 21 May 1892, and Puccini's *[Tosca](#)* (premiering at the Teatro Costanzi in Rome on 14 January 1900.) The genre peaked in the early 1900s, and lingered into the 1920s.

In terms of subject matter, generally "[v]erismo operas focused not on gods, mythological figures, or kings and queens, but on the average contemporary man and woman and their problems, generally of a sexual, romantic, or violent nature."^[2] However, three of the small handful of *verismo* operas still performed today take historical subjects: Puccini's *[Tosca](#)*, Giordano's *[Andrea Chénier](#)* and Cilea's *[Adriana Lecouvreur](#)*. "Musically, verismo composers consciously strove for the integration of the opera's underlying drama with its music." These composers abandoned the "recitative and set-piece structure" of earlier Italian opera. Instead, the operas were "through-composed," with few breaks in a seamlessly integrated sung text. While *verismo* operas may contain arias that can be sung as stand-alone pieces, they are generally written to arise naturally from their dramatic surroundings, and their structure is variable, being based on text that usually does not follow a regular strophic format.

The most famous composers who created works in the *verismo* style were Giacomo Puccini, Pietro Mascagni, Ruggero Leoncavallo, Umberto Giordano and Francesco Cilea. There were, however, many other *veristi*: [Franco Alfano](#), [Alfredo Catalani](#), [Gustave](#)

[Charpentier](#) (*Louise*), [Eugen d'Albert](#) (*Tiefland*), [Ignatz Waghalter](#) (*Der Teufelsweg* and *Jugend*), [Alberto Franchetti](#), [Franco Leoni](#), [Jules Massenet](#) (*La Navarraise*), [Licinio Refice](#), [Spyridon Samaras](#), [Ermanno Wolf-Ferrari](#) (*I gioielli della Madonna*), and [Riccardo Zandonai](#).

The term *verismo* can cause confusion. In addition to referring to operas written in a realistic style, the term may also be used more broadly to refer to the entire output of the composers of the *giovane scuola* ("young school"), the generation of composers who were active in Italy during the period that the *verismo* style was created.^{[5][6]} One author (Alan Mallach) has proposed the term "plebeian opera" to refer to operas that adhere to the contemporary and realistic subject matter for which the term *verismo* was originally coined. At the same time, Mallach questions the value of using a term such as *verismo*, which is supposedly descriptive of the subject and style of works, simply to identify an entire generation's music-dramatic output. For most of the composers associated with *verismo*, traditionally veristic subjects accounted for only some of their operas. For instance, Mascagni wrote a pastoral comedy (*L'amico Fritz*), a symbolist work set in Japan (*Iris*), and a couple of medieval romances (*Isabeau* and *Parisina*). These works are far from typical *verismo* subject matter, yet they are written in the same general musical style as his more quintessential veristic subjects. In addition, there is disagreement among musicologists as to which operas are *verismo* operas, and which are not. (Non-Italian operas are generally excluded). Giordano's *Andrea Chénier*, Cilea's *Adriana Lecouvreur*, Mascagni's *Cavalleria rusticana*, Leoncavallo's *Pagliacci*, and Puccini's *Tosca* and *Il tabarro* are operas to which the term *verismo* is applied with little or no dispute. The term is sometimes also applied to Puccini's *Madama Butterfly* and *La fanciulla del West*. Because only four *verismo* works not by Puccini continue to appear regularly on stage (the aforementioned *Cavalleria rusticana*, *Pagliacci*, *Andrea Chénier* and *Adriana Lecouvreur*), Puccini's contribution has had lasting significance to the genre.

Some authors have attempted to trace the origins of *verismo* opera to works that preceded *Cavalleria rusticana*, such as [Georges Bizet's](#) *Carmen*, or [Giuseppe Verdi's](#) *La traviata*. [Modest Moussorgsky's](#) *Boris Godunov* should not be ignored as an antecedent of *verismo*, especially because of Moussorgsky's focus on peasants, alongside princes and other aristocracy and church leaders, and his deliberate relating of the natural speech inflexions of the libretto to the rhythms of the sung music, different from, for example, Tchaikovsky's use of Pushkin's verse as a libretto.

Verismo ([Italian](#) for "realism", from *vero*, meaning "true") was an Italian literary movement which peaked between approximately 1875 and the early 1900s. [Giovanni Verga](#) and [Luigi Capuana](#) were its main exponents and the authors of a *verismo* manifesto. Capuana published the novel *Giacinta*, generally regarded as the "manifesto" of Italian *verismo*.^[1] Unlike French naturalism, which was based on [positivistic](#) ideals, Verga and Capuana rejected claims of the scientific nature and social usefulness of the movement.

Literary *verismo* was begun between around 1875 and 1895 by a group of writers – mostly novelists and playwrights. It did not constitute a formal school, but it was still based on specific principles. Its birth was influenced by a positivist climate which put absolute faith in science, empiricism and research and which developed from 1830 until the end of the 19th century. It was also clearly based on [naturalism](#), a literary movement which spread in France in the mid-19th century. Naturalist writers included [Émile Zola](#) and [Guy de Maupassant](#); for them, literature should objectively portray society and humanity like a photograph, strictly representing even the humblest social class in even its most unpleasant aspects, with the authors analysing real modern life like scientists.

Literary *verismo* developed in the fruitful urban cultural life of [Milan](#), which brought together intellectuals from different areas, but tended to portray central and southern Italian life – Sicily is described in the works of Verga, Capuana and [Federico de Roberto](#), Naples in works by [Matilde Serao](#) and [Salvatore di Giacomo](#), Sardinia in the works of [Grazia Deledda](#), Rome in the poems of [Cesare Pascarella](#) and Tuscany in works by [Renato Fucini](#).

The first author to theorize on Italian *verismo* was Capuana, who theorized the "poetry of the real" – thus Verga, at first part of the late Romantic literary movement (he was called the poet of the duchesses and had considerable success), later shifted to *verismo* with his *novellas* *Vita dei campi* and *Novelle rusticane* and finally with the first novel of the 'Ciclo dei Vinti' cycle, *I Malavoglia* in 1881. Sicilian-born, Verga lived in [Florence](#) during the same period as the *verismo* painters – 1865 to 1867 – and his best known story, "*Cavalleria rusticana*", contains certain verbal parallels to the effects achieved on canvas by the [Tuscan](#) landscape school of this era. "Espousing an approach that later put him in the camp of *verismo* (verism), his particular sentence structure and rhythm have some of the qualities of the *macchia*. Like the *Macchiaioli*, he was fascinated by topographical exactitude set in a nationalist framework"— to quote from [Albert Boime](#)'s work, *The Art of the Macchia and the Risorgimento*. Verga and *verismo* differed from naturalism, however, in their desire to introduce the reader's point of view on the matter while not revealing the author's personal opinions.

Literary Naturalism traces back most directly to [Émile Zola](#)'s "The Experimental Novel" (1880), which details Zola's concept of a naturalistic novel,^[4] which traces philosophically to [Auguste Comte](#)'s *positivism*, but also to physiologist [Claude Bernard](#) and historian [Hippolyte Taine](#). Comte had proposed a scientific method that "went beyond empiricism, beyond the passive and detached observation of phenomena". The application of this method "called for a scientist to conduct controlled experiments that would either prove or disprove hypotheses regarding those phenomena". Zola took this scientific method and argued that naturalism in literature should be like controlled experiments in which the characters function as the phenomena. Naturalism began as a branch of *literary realism*, and realism had favored fact, logic, and impersonality over the imaginative, symbolic, and supernatural. [Frank Norris](#), an American journalist and novelist, whose work was predominantly in the naturalist genre, "placed realism, romanticism, and naturalism in a dialectic, in which realism and romanticism were opposing forces", and naturalism was a mixture of the two. Norris's idea of naturalism differs from Zola's in that "it does not mention materialistic determinism or any other philosophic idea".

Apart from Zola and Norris' views on the movement, there are various literary critics who have their own separate views on the matter. As said by Paul Civello, these critics can be grouped into four broad, and often overlapping, groups: early theorists, history-of-idea critics, European influence critics, and recent theorists. The early theorists saw naturalism thematically and in terms of literary technique. The history-of-idea critics understood it as an expression of the central ideas to an era. The European influence critics viewed it in much the same way as Zola. For example, according to theorist Kornelije Kvas, naturalism presents "forms of human experience not spoken of before – the physiological aspect of human behavior, sexuality, poverty – as literary topics worthy of being dealt with." And recent theorists have either re-conceptualized naturalism as a narrative form, or denied its existence entirely.

Some say that naturalism is dead, or that it "may have never lived at all: even in the works of Émile Zola", its founder. "In 1900 an obituary entitled "The Passing of Naturalism" in *The Outlook* officially declared the literary movement deceased", and that Zola's attempt to create

a scientific literature was a failure. This certainly wasn't the first time Zola's novel had been criticized however. After his novel *Thérèse Raquin* (1867) had been sharply criticized for both contents and language, in a foreword for its second edition (1868), in a mixture of pride and defiance, he wrote: "Le groupe d'écrivains naturalistes auquel j'ai l'honneur d'appartenir a assez de courage et d'activité pour produire des oeuvres fortes, portant en elles leur défense", which translates as: "The group of naturalist writers I have the honor to belong to have enough courage and activity to produce strong works, carrying within them their defense."

Naturalism was very popular in its time and was known in different literary traditions in [Western Europe](#). In the [Netherlands](#), there was Cooplandt, [Couperus](#), [Frederik van Eeden](#), etc. In [Germany](#), the most important naturalistic writer was [Theodor Fontane](#), who influenced [Thomas Mann](#). In Belgium, the most important writers were [Cyriel Buysse](#) and [Stijn Streuvels](#).

From another list:

[Painting](#)

[Gustave Courbet](#) was the first artist to self-consciously proclaim and practice the realist aesthetic. After his huge canvas "The Studio" (1854–55; Louvre, Paris) was rejected by the Exposition Universelle of 1855, the artist displayed it and other works under the label "Realism, G. Courbet" in a specially constructed pavilion. Courbet was strongly opposed to idealization in his art, and he urged other artists to instead make the commonplace and contemporary the focus of their art. He viewed the frank portrayal of scenes from everyday life as a truly democratic art. Such paintings as his "[Burial at Ornans](#)" (1849; Louvre) and the "[Stone Breakers](#)" (1849; private collection, Milan), which he had exhibited in the Salon of 1850–51, had already shocked the public and critics by the frank and unadorned factuality with which they depicted humble peasants and labourers. The fact that Courbet did not glorify his peasants but presented them boldly and starkly created a violent reaction in the art world.

The style and subject matter of Courbet's work were built on ground already broken by the painters of the [Barbizon School](#). Théodore Rousseau, Charles-François Daubigny, Jean-François Millet, and others in the early 1830s settled in the French village of Barbizon with the aim of faithfully reproducing the local character of the landscape. Though each Barbizon painter had his own style and specific interests, they all emphasized in their works the simple and ordinary rather than the grandiose and monumental aspects of nature. They turned away from melodramatic picturesqueness and painted solid, detailed forms that were the result of close observation. In such works as "The Winnower" (1848), [Millet](#) was one of the first artists to portray peasant labourers with a grandeur and monumentality hitherto reserved for more important persons.

Another major French artist often associated with the realist tradition, Honoré [Daumier](#), drew satirical caricatures of French society and politics. He found his working-class heroes and heroines and his villainous lawyers (see [photograph](#)) and politicians in the slums and streets of Paris. Like Courbet he was an ardent democrat, and he used his skill as a caricaturist directly in the service of political aims. Daumier used energetic linear style, boldly accentuated realistic detail, and an almost sculptural treatment of form to criticize the immorality and ugliness he saw in French society.

Pictorial realism outside of France was perhaps best-represented in the 19th century in the United States. There, Winslow Homer's powerful and expressive paintings of marine subjects and Thomas Eakins' portraits, boating scenes, and other works are frank, unsentimental, and acutely observed records of contemporary life.

Realism was a distinct current in 20th-century art and usually stemmed either from artists' desire to present more honest, searching, and unidealized views of everyday life or from their attempts to use art as a vehicle for social and political criticism. The rough, sketchy, almost journalistic scenes of seamy urban life by the group of American painters known as [The Eight](#) fall into the former category. The German art movement known as the [Neue Sachlichkeit](#) (New Objectivity), on the other hand, worked in a realist style to express the cynicism and disillusionment of the post-World War I period in Germany. The Depression-era movement known as [Social Realism](#) adopted a similarly harsh and direct realism in its depictions of the injustices and evils of American society during that period.

[Socialist Realism](#), which was the officially sponsored Marxist aesthetic in the Soviet Union from the early 1930s until that country's dissolution in 1991, actually had little to do with realism, though it purported to be a faithful and objective mirror of life. Its "truthfulness" was required to serve the ideology and the propagandistic needs of the state. Socialist Realism generally used techniques of naturalistic idealization to create portraits of dauntless workers and engineers who were strikingly alike in both their heroic positivism and their lack of lifelike credibility.

The novel

In [literature](#), the novelist [Honoré de Balzac](#) was the chief precursor of [realism](#), given his attempt to create a detailed, encyclopaedic portrait of the whole range of French society in his [La comédie humaine](#). But a conscious program of literary realism did not appear until the 1850s, and then it was inspired by the painter Courbet's aesthetic stance. The French journalist [Champfleury](#), who had popularized Courbet's painting style, transferred the latter's theories to literature in *Le Réalisme* (1857). In this influential critical manifesto Champfleury asserted that the hero of a novel should be an ordinary man rather than an exceptional figure. In 1857 [Gustave Flaubert's](#) novel [Madame Bovary](#) was published. This unrelentingly objective portrait of the bourgeois mentality, with its examination of every psychological nuance of an unhappy and adulterous middle-class wife, was both the principal masterpiece of realism and the work that established the movement on the European scene. Flaubert's [L'Éducation sentimentale](#) (1870), with its presentation of a vast panorama of France under Louis-Philippe, was another principal realist work. The brothers [Jules](#) and Edmond [Goncourt](#) were also important realist writers. In their masterpiece, [Germinie Lacerteux](#) (1864), and in other works they covered a variety of social and occupational milieus and frankly described social relations among both the upper and the lower classes.

Realist tenets entered the mainstream of European literature during the 1860s and '70s. Realism's emphasis on detachment, objectivity, and accurate observation, its lucid but restrained criticism of social environment and mores, and the humane understanding that underlay its moral judgments became an integral part of the fabric of the modern novel during the height of that form's development. Charles Dickens, Anthony Trollope, and George Eliot in England, Ivan Turgenev, Leo Tolstoy, and Fyodor Dostoyevsky in Russia, William Dean Howells in the United States, and Gottfried Keller and the early Thomas Mann in Germany all incorporated realist elements in their novels. A significant offshoot of literary realism was

[Naturalism](#) (q.v.), a late 19th- and early 20th-century movement that aimed at an even more faithful and unselective representation of reality. The French novelist [Émile Zola](#) was the leading exponent of Naturalism.

[Theatre](#)

Realism in the theatre was a general movement in the later 19th century that steered theatrical texts and performances toward greater fidelity to real life. The realist dramatists Henrik Ibsen and August Strindberg in Scandinavia and Anton Chekhov and Maksim Gorky in Russia, among others, rejected the complex and artificial plotting of the well-made play and instead treated themes and conflicts belonging to a real, contemporary society. They dispensed with poetic language and extravagant diction, instead using action and dialogue that looked and sounded like everyday behaviour and speech. Realism had no use for the declamatory delivery and the overblown virtuosity of past acting and replaced this style with one demanding natural movements, gestures, and speech. Realist drama also used stage settings that accurately reproduced ordinary surroundings.

[Motion pictures](#)

Like 20th-century drama and literature, the art of cinema has depended heavily on the 19th-century realist tradition for thematic material and often for structure. The nature of film, however, has lent itself to a kind of realism halfway between life and fiction. Such films, called [Neorealism](#) in Italy and sometimes *cinéma vérité* in France, tried to achieve a documentary-like objectivity by using non-actors in leading roles and incorporating segments of actual documentary footage into the story. The post-World War II films of [Roberto Rossellini](#) (such as *Open City* and *Paisan*) and Vittorio De Sica (*The Bicycle Thief*) best exemplify this genre.

Naturalism

Naturalism in literature and the visual arts, late 19th- and early 20th-century movement that was inspired by adaptation of the principles and methods of natural science, especially the Darwinian view of nature, to [literature](#) and art. In literature it extended the tradition of [realism](#), aiming at an even more faithful, unselective representation of reality, a veritable “slice of life,” presented without moral judgment. Naturalism differed from realism in its assumption of scientific determinism, which led naturalistic authors to emphasize man's accidental, physiological nature rather than his moral or rational qualities. Individual characters were seen as helpless products of heredity and environment, motivated by strong instinctual drives from within and harassed by social and economic pressures from without. As such, they had little will or responsibility for their fates, and the prognosis for their “cases” was pessimistic at the outset.

Naturalism originated in France and had its direct theoretical basis in the critical approach of Hippolyte [Taine](#), who announced in his introduction to *Histoire de la littérature anglaise* (1863–64; [History of English Literature](#)) that “there is a cause for ambition, for courage, for truth, as there is for digestion, for muscular movement, for animal heat. Vice and virtue are

products, like vitriol and sugar.” Though the first “scientific” novel was the Goncourt brothers' case history of a servant girl, *Germinie Lacerteux* (1864), the leading exponent of naturalism was [Émile Zola](#), whose essay “Le Roman expérimental” (1880; “The Experimental Novel”) became the literary manifesto of the school. According to Zola, the novelist was no longer to be a mere observer, content to record phenomena, but a detached experimenter who subjects his characters and their passions to a series of tests and who works with emotional and social facts as a chemist works with matter. Upon Zola's example the naturalistic style became widespread and affected to varying degrees most of the major writers of the period. [Guy de Maupassant's](#) popular story “The [Necklace](#)” heralds the introduction of a character who is to be treated like a specimen under a microscope. The early works of Joris-Karl Huysmans, of the German dramatist Gerhart Hauptmann, and of the Portuguese novelist José Maria Eça de Queirós were based on the precepts of naturalism.

The [Théâtre Libre](#) was founded in Paris in 1887 by André Antoine and the [Freie Bühne](#) of Berlin in 1889 by Otto Brahm to present plays dealing with the new themes of naturalism in a naturalistic style with naturalistic staging. A parallel development occurred in the visual arts. [Painters](#), following the lead of the realist painter [Gustave Courbet](#), were choosing themes from contemporary life. Many of them deserted the studio for the open air, finding subjects among the peasants and tradesmen in the street and capturing them as they found them, unpremeditated and unposed. One result of this approach was that their finished canvases had the freshness and immediacy of sketches. Zola, the spokesman for literary naturalism, was also the first to champion Édouard Manet and the Impressionists.

Despite their claim to complete objectivity, the literary naturalists were handicapped by certain biases inherent in their deterministic theories. Though they faithfully reflected nature, it was always a nature “red in tooth and claw.” Their views on heredity gave them a predilection for simple characters dominated by strong, elemental passions. Their views on the overpowering effects of environment led them to select for subjects the most oppressive environments—the slums or the underworld—and they documented these milieus, often in dreary and sordid detail. The drab palette of [Vincent van Gogh's](#) naturalistic painting “The [Potato Eaters](#)” (1885; Rijksmuseum, Amsterdam) was the palette of literary naturalism. Finally, they were unable to suppress an element of romantic protest against the social conditions they described.

As a historical movement, naturalism per se was short-lived; but it contributed to art an enrichment of realism, new areas of subject matter, and a largeness and formlessness that was indeed closer to life than to art. Its multiplicity of impressions conveyed the sense of a world in constant flux, inevitably junglelike, because it teemed with interdependent lives.

In [American literature](#), naturalism had a delayed blooming in the work of Hamlin Garland, Stephen Crane, Frank Norris, and Jack London; and it reached its peak in the art of [Theodore Dreiser](#). [James T. Farrell's](#) “[Studs Lonigan](#)” trilogy (1932–35) is one of the latest expressions of true naturalism.

From another list:

Standard literary histories have long dated the start of the realistic period in American literature at the end of the Civil War. Ostensibly, the pioneering works of realism were such volumes as John W. De Forest's novel, *Miss Ravenel's Conversion from Secession to Loyalty* (1867), and Mark Twain's satirical travelogues, *The Innocents Abroad* (1869)

and *Roughing It* (1872). With the critical recovery in the late twentieth century of women's writings from the mid-1800s, however, the beginning of the realistic period has been pushed back more than an entire generation to such texts as Caroline M. Kirkland's *A New Home, Who'll Follow? or, Glimpses of Western Life* (1839) and Rebecca Harding Davis's *Life in the Iron-Mills* (1861).

In the late twentieth century, too, proponents of poststructuralism assailed the notion of literary realism. How can any literary text replicate or imitate "reality" (whatever that may be?), they ask. Language creates the only reality we know. Any attempt to define the term absolutely is not only presumptuous but doomed. Roland Barthes, for example, has argued that so-called realistic texts are no more based on "reality" than other forms of writing and has indicted as simplistic the epistemological assumptions of those who purport to be realists. In effect, he suggested, the realists merely took reality for granted. Admittedly, it is easier to define what realism was not than what it actually was. (Mary E. Wilkins Freeman told an interviewer in 1890 that she "didn't even know" she was "a realist until [some reviewers] wrote and told me.") Such scholars as Donald Pizer, however, have attempted to recuperate or rehabilitate the terms "realism" and "naturalism." As Pizer writes in *The Cambridge Companion to American Realism and Naturalism* (1995), "Whatever the philosophical, moral, and social baggage that encumbers them, they will have to do." In a functional sense, the terms obviously meant something. What qualities in the writings of the self-described realists seemed innovative? Or, put another way, what was it about those writings that inspired such fierce opposition during the so-called Realism War of the 1880s and 1890s? Influenced by such European writers as Zola, Tolstoy, Guy de Maupassant, and Dostoyevsky, the realists certainly believed they were championing a new brand of fiction.

Howells and the Realism War

While he neither inspired nor founded a school or movement of realists, Howells was at the center of American literary culture for over fifty years. He was the most influential American novelist, editor, and critic of his generation. As editor of the *Atlantic Monthly* for over fifteen years and later as the contributor of the "Editor's Easy Chair" series to *Harper's Monthly*, he befriended and promoted such realists as Henry James, Mark Twain, Mary Freeman, John De Forest, Sarah Orne Jewett, Frank Norris, Charles Chesnutt, Paul Laurence Dunbar, Hamlin Garland, Edith Wharton, Charlotte Perkins Gilman, Abraham Cahan, and Stephen Crane. For Howells, realism was a democratic movement in the arts, a focus on the normal and ordinary, distinct from romanticism or "romanticistic" fiction with its emphasis on more ideal, bizarre, sentimental, fantastic, exotic, melodramatic, or aristocratic topics. *In life*, he declared, the realist "finds nothing insignificant." In *The Rise of Silas Lapham* (1885), for example, Howells remarked on how "a great many novels" fail "as representations of life." The Reverend Mr. Sewell, a Howells spokesman, refers derisively to the "mischief" done by such popular fiction. "The novels might be the greatest possible good to us if they painted life as it is, and human feelings in their true proportion and relation, but for the most part they have been and are altogether noxious." The readers of such slop commit *psychical suicide*. The novelist "who could interpret the common feelings of commonplace people," another character in the novel avers, "would have the answer to 'the riddle of the painful earth' on his tongue." In *The Minister's Charge* (1887), which again features the character of Sewell, Howells realistically rewrote the sentimental juvenile fiction of such authors as Alger and Oliver Optic. Similarly, Basil March, another Howells persona, opines in *A Hazard of New Fortunes* (1890) that

I believe that this popular demand for the matrimony of others comes from our novel-reading. We get to thinking that there is no other happiness or good fortune in life except marriage, and it's offered in fiction as the highest premium for virtue, courage, beauty, learning, and saving human life. We all know it isn't. We know that in reality, marriage is dog-cheap.

Howells was profoundly influenced in the late 1880s by Tolstoy's ideas about nonviolence and economic equality. In 1887 he risked his reputation and livelihood by publicly repudiating the guilty verdicts brought against the Haymarket Square anarchists and what he called the "civic murder" of four of them. His novel *Annie Kilburn* (1889) glossed Tolstoy's *Anna Karenina* (1875–1877), as the identical initials of their respective heroines suggest. As a result, he became an easy target for some parochial critics. The so-called Realism War, waged in reviews and magazines throughout the 1880s and 1890s, pitted the realists, especially Howells, against editors and popular writers who espoused the sentimental or sensational brands of literary romance. For example, the genteel critic Hamilton Wright Mabie alleged in his review of Howells's *Silas Lapham* that realism was nothing more or less than "practical atheism applied to art." These skirmishes often smacked of politics; the controversy over realism began at the height of the debate over the fate of the Haymarket Square anarchists. Also, the war was fought largely along regional lines; the realists were largely easterners or transplanted westerners living in the East, whereas the most outspoken opponents of realism (including Maurice Thompson, author of *Hoosier Mosaics* [1875] and *Alice of Old Vincennes* [1901]; the poet James Whitcomb Riley; and Lew Wallace, author of the historical romances *The Fair God* [1873] and *Ben-Hur* [1880]) often resided in the Old South or the Old Northwest. The Association of Western Writers (later the Western Association of Writers), played a crucial role in the war by offering Thompson, its first president, a forum for his attacks. Over a period of some twenty years, beginning in 1887, Thompson repeatedly complained that Howells had foisted the "raw, nauseous realism of the Russians and the Zola school of France" onto a reading public hungry for "American books of a wholesome and patriotic kind." Realism was little more than decadent "worship of the vulgar, the commonplace and the insignificant." "Some years ago, before there had been so much said about realism in literature," Thompson declared in 1889, "I predicted that realism would in due time be found to mean materialism, socialism, and, at last, anarchy....The progression will be: Realism, sensualism, materialism, socialism, communism, nihilism, absolute anarchy." Thompson and Howells's other opponents often compared realism to mere photography, or worse, cheap Kodak snapshots, lacking the artistry of the painter.

The war, in the end, took its toll on Howells's reputation. By the early twentieth century his brand of realism seemed dull and timid, a movement within the spurned genteel tradition in American letters. Ambrose Bierce defined realism in his *Devil's Dictionary* (1906) as "the art of depicting nature as it is seen by toads." In 1915 Howells wrote James that he had become "comparatively a dead cult with my statues cast down and the grass growing over them in the pale moonlight." Sinclair Lewis famously, or infamously, attacked him by name in his Nobel Prize acceptance speech in 1930: "Mr. Howells was one of the gentlest, sweetest, and most honest of men, but he had the code of a pious old maid whose greatest delight was to have tea at the vicarage."

In addition to Howells, many other novelists of the period defended the aesthetics of realism. In the preface to his novel *The Mammon of Unrighteousness* (1891), for example, H. H. Boyesen asserted that he had "disregarded all romantic traditions, and simply asked myself in every instance, not whether it was amusing, but whether it was to the logic of reality—true in color and tone to the American sky, the American soil, the American character." Henry James implicitly compared realistic fiction to painting in his essay, *The Art of Fiction* (1884).

According to James, the novel should exude an “air of reality,” which is its “supreme virtue,” by “its immense and exquisite correspondence with life....The only reason for the existence of a novel is that it does attempt to represent life. When it relinquishes this attempt, the same attempt that we see on the canvas of a painter, it will have arrived at a very strange pass.” James’s brand of realism was a form of literary portraiture, as may be inferred from several of his titles (including *Portraits of Places* [1883], *The Portrait of a Lady* [1881], *The American Scene* [1907], and *Partial Portraits* [1888]). And in his facetious essay, *Fenimore Cooper’s Literary Offenses* (1895), Mark Twain listed “nineteen rules governing literary art.” Among them: “when the personages of a tale deal in conversation, the talk shall sound like human talk, and be talk such as human beings would be likely to talk in the given circumstances,” and “the personages of a tale shall confine themselves to possibilities and let miracles alone.” Cooper’s romance, *The Deerslayer* (1841), however, was “simply a literary *delirium tremens*.” Similarly, Stephen Crane reminisced that he had

developed all alone a little creed of art which I thought was a good one. Later I discovered that my creed was identical with the one of Howells and Garland, and in this way I became involved in the beautiful war between those who say that...we are the most successful in art when we approach the nearest to nature and truth, and those who...don't say much.

Realism As Literary Practice

The literary landscape in the late nineteenth century featured no organized or monolithic group of realists. As Elizabeth Ammons has suggested, “the most important characteristic of American realism was its racial, ethnic, sexual, and cultural range.” There were, in effect, many “realities” or varieties of realism, including local color or regionalism (for example, the tales of Twain, Jewett, Freeman, Chopin, Bret Harte, James Lane Allen, Rose Terry Cooke, Joel Chandler Harris, Edward Eggleston, and Joseph Kirkland), psychological realism (James, Gilman, Sherwood Anderson), critical realism (Howells), and “veritism” (Garland’s term for realism true to the perceptions of the writer, a protorealism or an overtly politicized form of realism). The various realists did not necessarily appreciate all contributions to the form; Mark Twain wrote Howells that he “would rather be damned to John Bunyan’s heaven than read” James’s *The Bostonians* (1886). Such Native-American storytellers as Zitkala-Sa and Sarah Winnemucca, the Jewish-American writer Anzia Yezierska, the Asian-American author Sui Sin Far, and such African Americans as W. E. B. Du Bois and Charles Chesnutt were also regarded as realists, though obviously their experiences were distinctly different from those of the canonical Anglo-American writers. With their interest in local customs, mores, and dialects, local colorists were local historians in a sense. They identified themselves with the communities they chronicled. Their tales often took the form of the anecdote or character sketch (Harte’s “Tennessee’s Partner” [1869], Freeman’s “A New England Nun” [1891], and Harriet Beecher Stowe’s *Oldtown Folks* [1869], for example). Both Eggleston, the author of *The Hoosier Schoolmaster* (1871), and Kirkland, the author of *Zury: The Meanest Man in Spring County* (1887), turned formally late in their careers to writing local history. Eggleston was even elected president of the American Historical Association in 1900. The difference between literary romance and realism, at least of the local color variety, may be underscored by comparing two of Twain’s novels, *The Adventures of Tom Sawyer* (1876) and *Adventures of Huckleberry Finn* (1884). As Leslie Fiedler has suggested in *Love and Death in the American Novel* (rev. ed., 1966), the two novels retell essentially the same story, the first nostalgically and sentimentally through a soft lens and the second more rigorously, honestly, and truthfully. The two novels are “alternative versions of the same themes” or “the same dream dreamed twice over, the second time as nightmare.” *Huckleberry Finn* is a true book,” Fiedler adds, but *Tom Sawyer* only ‘mostly a true book’ with ‘some stretchers,’ one of which

is its ending.” The contrast is perhaps most apparent in the respective depictions of Twain's hometown of Hannibal, Missouri. The bucolic St. Petersburg of *Tom Sawyer* and the opening chapters of *Huckleberry Finn* are an idealized representation of Hannibal, which is more realistically rendered in the latter work as Bricksville, the dirty little river town where hogs root in the muddy streets and the town drunk is killed in cold blood. Though his masterwork is rarely regarded as an exercise in local color, Twain also carefully recreated in *Huckleberry Finn* the several distinct dialects spoken by his characters. “The shadings have not been done in a hap-hazard fashion, or by guess-work,” he insisted in an explanatory note, “but painstakingly, and with the trustworthy guidance and support of personal familiarity with those several forms of speech.” In the Uncle Julius dialect tales collected in *The Conjure Woman* (1899), moreover, Chesnutt satirized Harris's popular Uncle Remus tales and the plantation tradition they evoked. Local colorists seemed drawn to compiling short story cycles. In addition to Chesnutt's *The Conjure Woman*, examples include Jewett's *The Country of the Pointed Firs* (1896), Garland's *Main-Travelled Roads* (1891), George Washington Cable's *Old Creole Days* (1879), and Kate Chopin's *Bayou Folk* (1894).

James's psychological realism was a more aestheticized form of fiction. By experimenting with refined narrators or “centers of consciousness,” James presumed to recreate the play of their imaginations—in effect, to adapt his brother William's *Principles of Psychology* (1890) to the fictional page. Chapter 42 of *The Portrait of a Lady* (1881), in which Isabel Archer contemplates the state of her marriage to Gilbert Osmond, anticipated the modern stream of consciousness novels of Gertrude Stein, Virginia Woolf, James Joyce, and William Faulkner. In *The Turn of the Screw* (1898), Henry James recounted a ghost story from the point of view of a psychopathological narrator. Particularly in some of his later tales (including *The Beast in the Jungle* [1903]), he described almost no physical behavior, a technique that led to the joking complaint that James “chewed more than he bit off.”

Very few American poets of the period between 1865 and 1915 presumed to be realists in their verse. The major poets—such as Longfellow, Riley, E. C. Stedman, Edwin Markham, Sidney Lanier, Ina Coolbrith, Thomas Wentworth Higginson, William Vaughan Moody, and Thomas Bailey Aldrich—were heirs of the sentimental tradition of British romanticism. Howells and other realists wrote poetry, to be sure, but most of it was utterly conventional and forgettable. Twain parodied sentimental verse in both *Tom Sawyer* and *Huckleberry Finn*, as in Emmeline Grangerford's funeral poetry, but his own poetry was unremarkable. The African-American poet Paul Laurence Dunbar published dialect verse, much as Chesnutt wrote dialect stories, but he was an exception to the rule. Both Crane and Edwin Arlington Robinson penned a brand of naturalistic poetry around the turn of the century. Crane's verse was enigmatic and bitterly ironic, and Robinson wrote such dramatic monologues as *Richard Cory* and *Miniver Cheevy* and the sonnets *Zola* and *Annandale*, the latter a defense of euthanasia.

The forte of the realists, however, was topical fiction. Even James's stories on the international theme (for example, *Daisy Miller* [1879], *The American* [1877], and *The Ambassadors* [1903]) exploited the growth in international travel during the last third of the nineteenth century. (With the development of the steamship, passenger departures from the United States for Europe increased from around 20,000 in 1860 to around 110,000 in 1900.) More to the point, realists often protested conditions, pilloried hypocrisy, or proposed social reforms. Few topics escaped their notice. It was, as Mark Twain and Charles Dudley Warner averred in their collaborative novel, a “gilded age,” not a Golden Age. Among the topics that concerned them were political corruption (Twain and Warner's *The Gilded Age* [1873], Henry Adams's *Democracy* [1880], and Garland's *A Spoil of Office* [1892]); immigration and

integration (Cahan's *The Rise of David Levinsky* [1917], Sui Sin Far's *Mrs. Spring Fragrance* [1912], and Yeziarska's *Hungry Hearts* [1920]); marriage and divorce (Howells's *A Modern Instance* [1882] and Wharton's *The Age of Innocence* [1920]); small-town parochialism or "the revolt from the village" (E. W. Howe's *The Story of a Country Town* [1883], Edgar Lee Masters's *Spoon River Anthology* [1915], Robinson's *The Children of the Night* [1897], Wharton's *Ethan Frome* [1911], Sinclair Lewis's *Main Street* [1920], and Sherwood Anderson's *Winesburg, Ohio* [1919]); military imperialism during the Spanish-American War (Howells's "Editha" [1905] and Twain's *The War Prayer* [1916]); lynchings (Twain's "The United States of Lyncherdom" [1923] and Walter V. T. Clark's *The Ox-Bow Incident* [1940]); urban squalor, prostitution, and the "fallen woman" or "the shame of the cities" (Crane's *Maggie: A Girl of the Streets* [1893]); economic injustice (James's *The Princess Casamassima* [1886], Howells's *A Hazard of New Fortunes* [1890], and Twain's *A Connecticut Yankee in King Arthur's Court*); alcoholism (Howells's *The Landlord at Lion's Head* [1897] and Norris's *McTeague* [1899]); and euthanasia (Wharton's *The Fruit of the Tree* [1907]). Such texts complemented some of the social essays of the period, including Henry Demarest Lloyd's *Wealth against Commonwealth* (1894), Thorstein Veblen's *The Theory of the Leisure Class* (1899), and Jacob Riis's *How the Other Half Lives* (1890). In *Under the Lion's Paw* (1889), Garland specifically endorsed the "single tax" on "unearned increment" advocated by Henry George in his book, *Progress and Poverty* (1879).

Other narratives were devoted to the "woman question" and the contemporary feminist movement, including Chopin's *The Awakening* (1899) and "The Story of an Hour" (1894), James's *The Bostonians*, Howells's *Dr. Breen's Practice* (1881), Freeman's "A New England Nun" (1891) and *The Revolt of 'Mother'* (1890), and Gilman's *The Yellow Wall-Paper* (1892). The latter tale specifically critiqued the rest cure for women suffering from hysteria or neurasthenia prescribed by S. Weir Mitchell, a Philadelphia nerve specialist and part-time novelist.

Realistic fiction published during the final decade of the nineteenth century was often a race-inflected fiction as well. The 1890s, punctuated by the Chinese Exclusionary Act (1892) and the *Plessy v. Ferguson* decision of the Supreme Court (1896) sanctioning "separate but equal" public facilities for blacks and whites, were the nadir of race relations in the United States. The public debate about it notwithstanding, Twain's *Adventures of Huckleberry Finn* was not a race novel, certainly not in the same sense as Howells's *An Imperative Duty* (1891) or Twain's *The Tragedy of Pudd'nhead Wilson* (1894). In the former, a young woman raised to believe she is white discovers that she has a black ancestor. In the latter, two baby boys are switched in their cradles, one of them freeborn and the other a slave but otherwise indistinguishable, with tragic results. In both novels the authors probed the meaning of racial identity. A cluster of other realistic race novels appeared in the early 1890s, among them Anna J. Cooper's *A Voice from the South* (1892) and Frances E. W. Harper's *Iola Leroy; or, Shadows Uplifted* (1892). Chesnutt also published a trio of realistic novels around the turn of the century that pondered the consequences of racial violence: *The House behind the Cedars* (1900); *The Marrow of Tradition* (1901), based on the race riot in Wilmington, North Carolina, in 1898; and *The Colonel's Dream* (1905), about the failure of the New South to secure racial justice.

Despite the early successes of the local colorists Bret Harte and Mark Twain, western American writers were slow to warm to realism. Western literature was epitomized by the sensational, blood-and-thunder of the dime novel westerns that celebrated westward expansion and conquest. As late as 1902, the same year Owen Wister's romanticized bestseller *The Virginian* appeared, Norris complained that rather than a school of western

realists there were “the wretched ‘Deadwood Dicks’ and Buffalo Bills of the yellowbacks” and writers “who lied and tricked and strutted in Pathfinder and Leather-Stocking series.” Still, a brand of western realism emerged in such neglected or unknown works as Mary Hallock Foote's novel *The Led-Horse Claim* (1883), Mary Austin's *Land of Little Rain* (1903), and Andy Adams's *The Log of a Cowboy* (1903), all of which deal with mining, ranching, or other forms of labor. Clarence Gohdes declared in 1951, in fact, that Foote was “more of a realist than either Harte or Clemens in portraying the life of the mining areas....In the history of fiction dealing with the Far West she may claim attention as the first realist of the section.”

American realists contributed to the national literary culture in another way; they belonged to the first generation of true literary professionals in America, as Howells suggested in his essay, *The Man of Letters As a Man of Business* (1893). The realists hired the first literary agents in the early 1880s, contributed to the first newspaper fiction syndicates in the mid-1880s, and lobbied for passage of legislation governing international copyright, finally adopted in 1891. They introduced marketing gimmicks such as subscription sales (Mark Twain was a director of the American Publishing Company of Hartford) and composite novels (such as *The Whole Family* [1908], to which Howells, James, Freeman, and nine other writers each contributed a chapter). Partly as a result of the invention of the Linotype machine, the number of magazines published in the nation increased from about two hundred in 1860 to some eighteen hundred in 1900, with a corresponding increase in the opportunities for literary careers. To be sure, most commercially successful novels were still pitched to middle-class women readers. Howells estimated that some 75 percent of all books sold in the United States were bought by women, and the novelist John W. De Forest similarly declared that women comprised four-fifths of the novel-reading public. The novel, even the realistic novel, usually contained a love interest (*Huckleberry Finn* was a rare and notable exception) if only to spur sales—but it was a love interest often disappointed. Many of the realists also scripted plays, often adaptations of their own stories and novels, because the market for new drama was more lucrative than for fiction. As Harte would write, plays were potentially “vastly more profitable” or lucrative than novels. A “good play” in production ought to pay its author about three thousand dollars per year, he thought. Similarly, James noted privately that he “simply *must* try, and try seriously, to produce half a dozen—a dozen, five dozen—plays for the sake of my pocket, my material future.” In all, Twain, Howells, James, and Harte produced some sixty scripts, though many of them were never produced professionally.

Naturalism As a Literary Theory

In his essay *Le roman expérimental* (The Experimental Novel) (1880), the French novelist Émile Zola developed an elaborate analogy between experimental or empirical fiction and the medical science of the French physician Claude Bernard. According to Zola, the experimental (that is, the naturalistic) novelist simply adopts “the scientific method, which has been in use for a long time.” He “institutes the experiment, that is, sets the characters of a particular story in motion, in order to show that the series of events therein will be those demanded by the determinism of the phenomena under study.” Richard Wright deployed a similar trope in his essay *How Bigger Was Born* (1940), often reprinted as an introduction to his *Native Son* (1940), one of the last American naturalistic novels: “Why should I not, like a scientist in a laboratory, use my imagination and invent test-tube situations, place Bigger in them, and...work out in fictional form a resolution of his fate?” The influence of Zola on American naturalists can hardly be understated. Norris, for example, sometimes signed his letters “the boy Zola,” and Crane wrote that his character Maggie Johnson “blossomed in a mud puddle,” much as Zola's character Nana was “a plant nurtured on a dung heap.”

In a word, the strategies of both realism and naturalism depend upon a quasi-scientific method of detailed observation, but in the case of naturalism the science is rooted in Darwin's theory of evolution. As Malcolm Cowley explained in *'Not Men': A Natural History of American Naturalism* (*Kenyon Review*, Summer 1947), "The Naturalistic writers were all determinists in that they believed in the omnipotence of abstract forces. They were pessimists so far as they believed that men and women were absolutely incapable of shaping their own destinies." Similarly, Lars Åhnebrink, in *The Beginnings of Naturalism in American Fiction* (1950), allowed that the naturalist "portrays life as it is in accordance with the philosophical theory of determinism." Dreiser variously described Carrie Meeber, for example, as "a waif amid forces," "a wisp in the wind," a "wisp on the tide," and he referred in *Sister Carrie* (1900) and *An American Tragedy* in pseudoscientific terms to such body chemicals as "katastates" and "anastates" and to "chemisms" in an attempt to explain all thoughts and emotional responses as mere chemical reactions in the blood.

In the following pages I summarized all those lists about Realism/Naturalism in Literature, Art and Music, and underlined the important authors/artists/composers according to my preferences. In this survey I examined the most significant cultures in this twelfty - We define by French all the countries with French culture: almost exclusively France, and in France almost exclusively Paris. We define by English all the countries with English culture, mainly Great Britain, United States, Ireland. We define by German all the countries with German culture, mainly Germany, Austria, Switzerland. We define by Spanish all the countries with Spanish culture, mainly Spain and Latin America. We define by Russian all the countries with Russian culture, almost exclusively Russia. We define by Italian all the countries with Italian culture, almost exclusively Italy. As we do not want to encompass more than 30 categories we'll not analyze in this survey, as we have done with literature, the art and music of the: Portuguese, Brazilian, Dutch, Czech, Polish, Greek, Swedish, Norwegian, Danish, Finnish, as well as other European and non European cultures, and I am aware that we overlook giants as Grieg, Sibelius and Dvorak in music, Munch, Mondrian, etc. in art.

French Literature: Emile Zola, Guy de Maupassant, Gustave Flaubert, Stephane Mallarme, Edmond Rostand, Alexandre Dumas fils, Arthur Rimbaud, Georges Courteline, Georges Feydeau, Paul Verlaine, Charles Baudelaire, Jules Verne, Eugene Labiche, Emile Augier, Henri Meilhac, Ludovic Halevy, Theodore de Banville, Leconte de Lisle, Henri de Reigner, Alfred Jarry, Joris-Karl Huysmans, Anatole France (Nobel 1921), Alphonse Daudet, La comtesse de Segur (children books), Paul Feval, Jules Valles, Jules Barbey d'Aurevilly, Les Freres de Goncourt (Edmond et Jules), Sully Prudhomme (Nobel 1901), Maurice Maeterlink (Nobel Belgium 1911), Frederic Mistral (Nobel 1904, wrote in Provencal), Victor Cherbuliez (Switzerland), Louis-Honore Frechette (French Canada), Oswald Durand (Haiti, wrote in Haitian), Edouard David (wrote in Picard). **I underline in this book the authors I like most, but it doesn't mean necessarily that they are the best.**

French Art/Realism/Impressionism/Post Impressionism, etc.: Honoré Daumier (1808–1879), painter, lithographer, sculptor, Jean-Baptiste-Camille Corot (1796–1875), painter, Théodore Rousseau (1812–1867), painter, Charles Jacque (1813–1894), painter, Jean-François Millet (1814–1875), painter, Thomas Couture (1815–1879), painter, Jean-Louis-Ernest Meissonier (1815–1891), painter, Charles-François Daubigny (1817–1878), painter, Johan Barthold Jongkind (1819–1891) (Dutch, worked in France), painter, Gustave Courbet (1819–1877), painter, Eugène Fromentin (1820–1876), painter, Nadar (Gaspard Félix Tournachon, called "Nadar") (1820–1910), photographer, Rosa Bonheur (1822–1899),

painter, Alexandre Cabanel (1823–1889), painter, Eugène Boudin (1824–1898), painter, Pierre Puvis de Chavannes (1824–1898), painter, William-Adolphe Bouguereau (1825–1905), painter, Gustave Moreau (1826–1898), painter, Jean-Baptiste Carpeaux (1827–1875), sculptor, Elie Delaunay (1828–1891), painter, Achille Empereur (1829–1898), painter and a friend of Paul Cézanne, Camille Pissarro (1830–1903), painter, Édouard Manet (1832–1883), painter, Gustave Doré (1832–1883), engraver, Edgar Degas (1834–1917), painter, sculptor, Henri Fantin-Latour (1836–1904), painter, Jules Chéret (1836–1932), painter, other media, Paul Cézanne (1839–1906), painter, Odilon Redon (1840–1916), painter, draftsman, lithographer, Auguste Rodin (1840–1917), sculptor, Claude Monet (1840–1926), painter; a founder of French impressionist painting, Pierre-Auguste Renoir (1841–1919), painter, Frédéric Bazille (1841–1870), painter, Berthe Morisot (1841–1895), painter, Henri Rousseau ("Le Douanier Rousseau") (1844–1910), painter, Jean-Joseph Benjamin-Constant (1845–1902), painter, Gustave Caillebotte (1848–1894), painter, Paul Gauguin (1848–1903), painter, sculptor, Vincent van Gogh (1853–1890) (Dutch, worked in France), painter, Georges-Pierre Seurat (1859–1891), painter, Antoine Bourdelle (1861–1929), sculptor, Aristide Maillol (1861–1944), sculptor, Antonio de la Gandara (1861–1917), painter, Paul Signac (1863–1935), painter, Henri Marie de Toulouse-Lautrec (1864–1901), painter, Paul Sérusier (1864–1927), painter, Suzanne Valadon (1865–1938), painter, Pierre Bonnard (1867–1947), painter, Édouard Vuillard (1868–1940), painter, Émile Bernard (1868–1941), painter, Henri Matisse (1869–1954), painter, other media. The problem with this list is not whom to include but whom to exclude, whom to underline or bold, as I have **underlined and bold 45** and could have introduced and underlined much more.

French Music: Charles Gounod (1818–1893), Jacques Offenbach (1819–1880), Édouard Lalo (1823–1892), Camille Saint-Saëns (1835–1921), Léo Delibes (1836–1891), Emmanuel Chabrier (1841–1894), Jules Massenet (1842–1912), Gabriel Fauré (1845–1924), Vincent d'Indy (1851–1931), André Messager (1853–1929), Ernest Chausson (1855–1899), Gustave Charpentier (1860–1956). 10 composers are underlined and bold.

English Literature: Henry James (US), Charles Dickens, Mark Twain/Samuel Clemens (US), Alfred Lord Tennyson, Emily Dickinson (US), George Eliot, Samuel Butler, Thomas Hardy, Elizabeth Gaskell, Walt Whitman (US), Robert Browning, W.S. Gilbert, Robert Louis Stevenson, Howard Pyle (US), Henry Rider Haggard, Lew Wallace (US), Frances Hodgson Burnett (US), Jerome K. Jerome, Louisa May Alcott (US), Anthony Trollope, Israel Zangwill, Anthony Hope, Nathaniel Hawthorne (US), Harriet Beecher Stowe (US), Henry David Thoreau (US), Lewis Carroll, George Meredith, Herman Melville (US), William Dean Howells (US), Sheridan Le Fanu (Irish), Dante Gabriel Rossetti, B. C. Stephenson, Elizabeth Barrett Browning, John Millington Synge (Irish), Augusta Lady Gregory (Irish), Charles G. D. Roberts (Canada), Miles Franklin (Australia), Katherine Mansfield (New Zealand), Samuel Selvon (in Creolized English, Trinidad), George Gissing, Arnold Bennett, George Moore, Horatio Alger Jr., John W. De Forest, Jack London, Hamlin Garland, Frank Norris, James T. Farrell. Altogether 18 writers underlined.

English/American Art: James Abbot McNeill Whistler, Hubert von Herkomer, Luke Fildes, Winslow Homer, Thomas Eakins, George Bellows, Robert Henri, William Holman Hunt (1827–1910), Dante Gabriel Rossetti (1828–1882), John Everett Millais (1828–1896), Ford Madox Brown (1821–1893), John Ruskin (1819–1900), William Morris (1834–1896), William Powell Frith (1819–1909), George Frederic Watts (1817–1904), John Edward Chapman 'Chester' Mathews (1843–1927); Lady Butler (1846–1933); Frank Dadd (1851–1929); Edward Matthew Hale (1852–1924); Charles Edwin Fripp (1854–1906); Richard Caton

Woodville, Jr. (1856-1927); Harry Payne (1858–1927); George Delville Rowlandson (1861-1930); and Edgar Alfred Holloway (1870-1941). Thomas Davidson (1842-1919), Aubrey Beardsley (1872-1898). 8 painters underlined and bold.

English/American Music: English - Arthur Sullivan, Michael Balfe, John Pyke Hullah, Sir Julius Benedict, William Vincent Wallace, Frederic Clay, Ebenezer Prout, Frederic Hymen Cowen, George Alexander Macfarren, Arthur Goring Thomas, Sir Michael Costa, John Liptrot Hatton, Joseph Barnby, William Cusins, Alfred R. Gaul, Sir John Stainer, Sir Hubert Parry, Sir Charles Villiers Stanford, American - John Knowles Paine, George Whitefield Chadwick, Amy Beach, Edward MacDowell, Arthur Foote, Horatio Parker. Altogether 3 composers underlined and bold.

German Literature: Gerhard Hauptmann (Nobel Germany 1912), Theodor Mommsen (Nobel Germany 1902), Friedrich Nietzsche, Theodor Storm, Theodor Fontane, Gottfried Keller (Switzerland), Conrad Ferdinand Meyer (Switzerland), Detlev von Liliencron, Gustav Freitag, Wilhelm Raabe, Wilhelm Busch, Adalbert Stifter (Austria), Carl Spitteler (Nobel Switzerland 1919), Paul Johann Ludwig Heyse (Nobel Germany 1910), Rudolf Christoff Eucken (Nobel Germany 1908), Leopold von Sacher-Masoch (Austrian), Bertha von Suttner (Nobel Peace Prize, Austrian), Marie von Ebner-Eschenbach (Austrian), Ferdinand von Saar (Austria), Peter Rosegger (Austria), Klaus Groth (in Plattdeutsch, Germany), Michel Rodange (in Luxembourgish, Luxembourg), Auguste Lustig (in Alsatian, France), Auguste Corrodi (in Schwyzerdeutsch, Switzerland). 10 authors underlined.

German Art: Adolph Menzel, Wilhelm Leibl, Wilhelm Truebner, Max Liebermann. 3 artists underlined.

German/Austrian Music: Eugen d'Albert, Ignatz Waghalter, Alexander von Zemlinsky, Hugo Wolf, Johann Strauss the Younger, Gustav Mahler. 2 composers underlined, but among the best ever of classical music.

Spanish Literature: Jose Maria de Pereda, Jose Zorilla, Miguel de Unamuno, Gustavo Adolfo Becquer, Ramon de Campoamor, Gaspar Nunez de Arce, Juan Valera, Benito Perez Galdos, Leopoldo Alas "Clarín", Armando Palacio Valdes, Marcelino Menendez Y Pelayo, Jose Marti (Cuba), Ruben Dario (Nicaragua), Manuel Gonzalez Prada (Peru), Rosalía de Castro (Galego), Angel Guimera (Catalan), Pachín de Melas (Asturianu), Nikolas Ormaetxea/Orixe (Basque). 6 authors underlined.

Spanish Art: Francisco Pradilla Ortiz, Cano de la Peña, Antonio Gisbert, José Casado del Alisal. 3 painters underlined and bold.

Spanish Music: Isaac Albeniz, Enrique Granados, Francisco Tarrega. 2 composers underlined.

Russian Literature: Lev Tolstoy, Fyodor Dostoyevsky, Anton Chekhov, Ivan Turgenev, Nikolay Leskov, Nikolay Nekrasov, Alexei Konstantinovich Tolstoy, Alexander Ostrovsky, Valery Bryusov, Konstantin Balmont, Alexey Pisemsky. 6 authors underlined, 3 of them – Tolstoy, Dostoyevsky and Chekhov are among the best of world literature.

Russian Art: Vasily Perov, Ivan Shishkin, Alexei Savrasov, Arkhip Kuindzhi, Ivan Kramskoy, Vasily Vereshchagin, Vasily Surikov, Ilya Repin. 6 painters underlined.

Russian Music: Vladimir Rebikov, Alexander Dargomyzhsky, Semen Hulak-Artemovsky, Alexander Serov, Eduard Naprovnik, Sergey Taneyev. 3 composers underlined.

Italian Literature: Gabriele d'Annunzio, Giovanni Verga, Antonio Fogazzaro, Edmondo de Amicis, Carlo Collodi, Luigi Capuana, Giovanni Pascoli, Matilde Serao, Giosue Carducci, Salvatore Farina, Carlo Favetti (Friulian, Italy), Peider Lansel (Rumantsch, Switzerland), Rinatu Coti (Corsican, France), Gavino Contini (Sardinian, Italy), Nino Martoglio (Sicilian, Italy), Federico de Roberto, Salvatore di Giacomo, Cesare Pascarella, Renato Fucini. 7 authors underlined.

Italian Art: Giovanni Fattori, Silvestro Lega, Telemaco Signorini, Giuseppe Abbati. 2 painters bold and underlined.

Italian Music/Verismo: Pietro Mascagni, Ruggero Leoncavallo, Umberto Giordano, Francesco Cilea, Giacomo Puccini, Giuseppe Verdi, Franco Alfano, Alfredo Catalani, Alberto Franchetti, Franco Leoni, Licinio Refice, Spyridon Samaras, Ermanno Wolf-Ferrari, Riccardo Zandonai. 6 composers underlined, 2 of them among the world best – Verdi and Puccini.

Analysis of the Results of the Realism/Naturalism Era

We'll analyze in the following pages the most/more/significant realism/naturalism literature/art/music, according to the origins of those cultures. We'll start with the analysis of the literatures. We'll judge them according to quantity, quality and innovation.

French Literature: Emile Zola, Guy de Maupassant, Gustave Flaubert, Stephane Mallarme, Edmond Rostand, Alexandre Dumas fils, Arthur Rimbaud, Georges Courteline, Georges Feydeau, Paul Verlaine, Charles Baudelaire, Jules Verne, Eugene Labiche, Emile Augier, Henri Meilhac, Ludovic Halevy, Theodore de Banville, Leconte de Lisle, Henri de Reigner, Alfred Jarry, Joris-Karl Huysmans, Anatole France (Nobel 1921), Alphonse Daudet, La comtesse de Segur (children books), Paul Feval, Jules Valles, Jules Barbey d'Aureville, Les Freres de Goncourt (Edmond et Jules), Sully Prudhomme (Nobel 1901), Maurice Maeterlink (Nobel Belgium 1911), Frederic Mistral (Nobel 1904, wrote in Provençal), Victor Cherbuliez (Switzerland), Louis-Honore Frechette (French Canada), Oswald Durand (Haiti, wrote in Haitian), Edouard David (wrote in Picard). 28 authors are underlined. **I underline in this book the authors I like most, but it doesn't mean necessarily that they are the best.**

English Literature: Henry James (US), Charles Dickens, Mark Twain/Samuel Clemens (US), Alfred Lord Tennyson, Emily Dickinson (US), George Eliot, Samuel Butler, Thomas Hardy, Elizabeth Gaskell, Walt Whitman (US), Robert Browning, W.S. Gilbert, Robert Louis Stevenson, Howard Pyle (US), Henry Rider Haggard, Lew Wallace (US), Frances Hodgson Burnett (US), Jerome K. Jerome, Louisa May Alcott (US), Anthony Trollope, Israel Zangwill, Anthony Hope, Nathaniel Hawthorne (US), Harriet Beecher Stowe (US), Henry David Thoreau (US), Lewis Carroll, George Meredith, Herman Melville (US), William Dean Howells (US), Sheridan Le Fanu (Irish), Dante Gabriel Rossetti, B. C. Stephenson, Elizabeth Barrett Browning, John Millington Synge (Irish), Augusta Lady Gregory (Irish), Charles G. D. Roberts (Canada), Miles Franklin (Australia), Katherine Mansfield (New Zealand), Samuel Selvon (in Creolized English, Trinidad), George Gissing, Arnold Bennett, George Moore,

Horatio Alger Jr., John W. De Forest, Jack London, Hamlin Garland, Frank Norris, James T. Farrell. Altogether 18 writers underlined.

German Literature: Gerhard Hauptmann (Nobel Germany 1912), Theodor Mommsen (Nobel Germany 1902), Friedrich Nietzsche, Theodor Storm, Theodor Fontane, Gottfried Keller (Switzerland), Conrad Ferdinand Meyer (Switzerland), Detlev von Liliencron, Gustav Freitag, Wilhelm Raabe, Wilhelm Busch, Adalbert Stifter (Austria), Carl Spitteler (Nobel Switzerland 1919), Paul Johann Ludwig Heyse (Nobel Germany 1910), Rudolf Christoff Eucken (Nobel Germany 1908), Leopold von Sacher-Masoch (Austrian), Bertha von Suttner (Nobel Peace Prize, Austrian), Marie von Ebner-Eschenbach (Austrian), Ferdinand von Saar (Austria), Peter Rosegger (Austria), Klaus Groth (in Plattdeutsch, Germany), Michel Rodange (in Luxembourgeois, Luxembourg), Auguste Lustig (in Alsatian, France), Auguste Corrodi (in Schwyzerdeutsch, Switzerland). 10 authors underlined.

Spanish Literature: Jose Maria de Pereda, Jose Zorilla, Miguel de Unamuno, Gustavo Adolfo Becquer, Ramon de Campoamor, Gaspar Nunez de Arce, Juan Valera, Benito Perez Galdos, Leopoldo Alas "Clarín", Armando Palacio Valdes, Marcelino Menendez Y Pelayo, Jose Marti (Cuba), Ruben Dario (Nicaragua), Manuel Gonzalez Prada (Peru), Rosalia de Castro (Galego), Angel Guimera (Catalan), Pachin de Melas (Asturianu), Nikolas Ormaetxea/Orixe (Basque). 6 authors underlined.

Russian Literature: Lev Tolstoy, Fyodor Dostoyevsky, Anton Chekhov, Ivan Turgenev, Nikolay Leskov, Nikolay Nekrasov, Alexei Konstantinovich Tolstoy, Alexander Ostrovsky, Valery Bryusov, Konstantin Balmont, Alexey Pisemsky. 6 authors underlined, 3 of them – Tolstoy, Dostoyevsky and Chekhov are among the best of world literature.

Italian Literature: Gabriele d'Annunzio, Giovanni Verga, Antonio Fogazzaro, Edmondo de Amicis, Carlo Collodi, Luigi Capuana, Giovanni Pascoli, Matilde Serao, Giosue Carducci, Salvatore Farina, Carlo Favetti (Friulian, Italy), Peider Lansel (Rumantsch, Switzerland), Rinatu Coti (Corsican, France), Gavino Contini (Sardinian, Italy), Nino Martoglio (Sicilian, Italy), Federico de Roberto, Salvatore di Giacomo, Cesare Pascarella, Renato Fucini. 7 authors underlined.

The most significant literature in the Realism/Naturalism Period is therefore the French literature, the more significant literature is the English literature, the significant literature is the Russian literature, mainly because the quality and innovation of the authors. Right after, are the German, Italian and Spanish literatures.

French Art/Realism/Impressionism/Post Impressionism, etc.: Honoré Daumier (1808–1879), painter, lithographer, sculptor, Jean-Baptiste-Camille Corot (1796–1875), painter, Théodore Rousseau (1812–1867), painter, Charles Jacques (1813–1894), painter, Jean-François Millet (1814–1875), painter, Thomas Couture (1815–1879), painter, Jean-Louis-Ernest Meissonier (1815–1891), painter, Charles-François Daubigny (1817–1878), painter, Johan Barthold Jongkind (1819–1891) (Dutch, worked in France), painter, Gustave Courbet (1819–1877), painter, Eugène Fromentin (1820–1876), painter, Nadar (Gaspard Félix Tournachon, called "Nadar") (1820–1910), photographer, Rosa Bonheur (1822–1899), painter, Alexandre Cabanel (1823–1889), painter, Eugène Boudin (1824–1898), painter, Pierre Puvis de Chavannes (1824–1898), painter, William-Adolphe Bouguereau (1825–

1905), painter, Gustave Moreau (1826–1898), painter, Jean-Baptiste Carpeaux (1827–1875), sculptor, Elie Delaunay (1828–1891), painter, Achille Emperaire (1829–1898), painter and a friend of Paul Cézanne, Camille Pissarro (1830–1903), painter, Édouard Manet (1832–1883), painter, Gustave Doré (1832–1883), engraver, Edgar Degas (1834–1917), painter, sculptor, Henri Fantin-Latour (1836–1904), painter, Jules Chéret (1836–1932), painter, other media, Paul Cézanne (1839–1906), painter, Odilon Redon (1840–1916), painter, draftsman, lithographer, Auguste Rodin (1840–1917), sculptor, Claude Monet (1840–1926), painter; a founder of French impressionist painting, Pierre-Auguste Renoir (1841–1919), painter, Frédéric Bazille (1841–1870), painter, Berthe Morisot (1841–1895), painter, Henri Rousseau ("Le Douanier Rousseau") (1844–1910), painter, Jean-Joseph Benjamin-Constant (1845–1902), painter, Gustave Caillebotte (1848–1894), painter, Paul Gauguin (1848–1903), painter, sculptor, Vincent van Gogh (1853–1890) (Dutch, worked in France), painter, Georges-Pierre Seurat (1859–1891), painter, Antoine Bourdelle (1861–1929), sculptor, Aristide Maillol (1861–1944), sculptor, Antonio de la Gandara (1861–1917), painter, Paul Signac (1863–1935), painter, Henri Marie de Toulouse-Lautrec (1864–1901), painter, Paul Sérusier (1864–1927), painter, Suzanne Valadon (1865–1938), painter, Pierre Bonnard (1867–1947), painter, Édouard Vuillard (1868–1940), painter, Émile Bernard (1868–1941), painter, Henri Matisse (1869–1954), painter, other media. The problem with this list is not whom to include but whom to exclude, whom to underline or bold, as I have **underlined and bold 45** and could have introduced & underlined much more.

English/American Art: James Abbot McNeill Whistler, Hubert von Herkomer, Luke Fildes, Winslow Homer, Thomas Eakins, George Bellows, Robert Henri, William Holman Hunt (1827–1910), Dante Gabriel Rossetti (1828–1882), John Everett Millais (1828–1896), Ford Madox Brown (1821–1893), John Ruskin (1819–1900), William Morris (1834–1896), William Powell Frith (1819–1909), George Frederic Watts (1817–1904), John Edward Chapman 'Chester' Mathews (1843–1927); Lady Butler (1846–1933); Frank Dadd (1851–1929); Edward Matthew Hale (1852–1924); Charles Edwin Fripp (1854–1906); Richard Caton Woodville, Jr. (1856–1927); Harry Payne (1858–1927); George Delville Rowlandson (1861–1930); and Edgar Alfred Holloway (1870–1941). Thomas Davidson (1842–1919), Aubrey Beardsley (1872–1898). 8 painters underlined and bold.

German Art: Adolph Menzel, Wilhelm Leibl, Wilhelm Truebner, Max Liebermann. 3 artists underlined.

Spanish Art: Francisco Pradilla Ortiz, Cano de la Peña, Antonio Gisbert, José Casado del Alisal. 3 painters underlined and bold.

Russian Art: Vasily Perov, Ivan Shishkin, Alexei Savrasov, Arkhip Kuindzhi, Ivan Kramskoy, Vasily Vereshchagin, Vasily Surikov, Ilya Repin. 6 painters underlined.

Italian Art: Giovanni Fattori, Silvestro Lega, Telemaco Signorini, Giuseppe Abbati. 2 painters bold and underlined.

French art is by far the most significant in the naturalism/impressionism/realism period, English/American art is the more significant, Russian art is the significant, followed by German, Spanish and Italian art.

French Music: Charles Gounod (1818–1893), Jacques Offenbach (1819–1880), Édouard Lalo (1823–1892), Camille Saint-Saëns (1835–1921), Léo Delibes (1836–1891),

Emmanuel Chabrier (1841–1894), Jules Massenet (1842–1912), Gabriel Fauré (1845–1924), Vincent d'Indy (1851–1931), André Messager (1853–1929), Ernest Chausson (1855–1899), Gustave Charpentier (1860–1956). 10 composers are underlined and bold.

English/American Music: English - Arthur Sullivan, Michael Balfe, John Pyke Hullah, Sir Julius Benedict, William Vincent Wallace, Frederic Clay, Ebenezer Prout, Frederic Hymen Cowen, George Alexander Macfarren, Arthur Goring Thomas, Sir Michael Costa, John Liptrot Hatton, Joseph Barnby, William Cusins, Alfred R. Gaul, Sir John Stainer, Sir Hubert Parry, Sir Charles Villiers Stanford, American - John Knowles Paine, George Whitefield Chadwick, Amy Beach, Edward MacDowell, Arthur Foote, Horatio Parker. Altogether 3 composers underlined and bold.

German/Austrian Music: Eugen d'Albert, Ignatz Waghalter, Alexander von Zemlinsky, Hugo Wolf, Johann Strauss the Younger, Gustav Mahler. 2 composers underlined, but among the best ever of classical music.

Spanish Music: Isaac Albeniz, Enrique Granados, Francisco Tarrega. 2 composers underlined.

Russian Music: Vladimir Rebikov, Alexander Dargomyzhsky, Semen Hulak-Artemovsky, Alexander Serov, Eduard Naprovnik, Sergey Taneyev. 3 composers underlined.

Italian Music/Verismo: Pietro Mascagni, Ruggero Leoncavallo, Umberto Giordano, Francesco Cilea, Giacomo Puccini, Giuseppe Verdi, Franco Alfano, Alfredo Catalani, Alberto Franchetti, Franco Leoni, Licinio Refice, Spyridon Samaras, Ermanno Wolf-Ferrari, Riccardo Zandonai. 6 composers underlined, 2 of them among the world best – Verdi and Puccini.

Based mainly by the quality and innovation criteria, the Italian music is the most significant in the naturalism/realism/verismo period, the French music is the more significant music, German music is the significant music, followed by Spanish, English and Russian music.

MODERNISM IN LITERATURE, ART AND MUSIC

Modernism is both a philosophical movement and an art movement that arose from broad transformations in Western society during the late 19th and early 20th centuries. The movement reflected a desire for the creation of new forms of art, philosophy, and social organization which reflected the newly emerging industrial world, including features such as urbanization, new technologies, and war. Artists attempted to depart from traditional forms of art, which they considered outdated or obsolete. The poet Ezra Pound's 1934 injunction to "Make it new!" was the touchstone of the movement's approach.

Modernist innovations included abstract art, the stream-of-consciousness novel, montage cinema, atonal and twelve-tone music, and divisionist painting. Modernism explicitly rejected the ideology of realism and made use of the works of the past by the employment of reprise, incorporation, rewriting, recapitulation, revision and parody. Modernism also

rejected the certainty of [Enlightenment](#) thinking, and many modernists also rejected religious belief. A notable characteristic of modernism is [self-consciousness](#) concerning artistic and social traditions, which often led to experimentation with form, along with the use of techniques that drew attention to the processes and materials used in creating works of art.

From Cory's Literature lists above:

French Literature : 100 very prominent authors such as: Marcel Proust, Andre Gide (Nobel 1947), Joseph Kessel, Tristan Tzara, Andre Breton, Marcel Pagnol, Paul Eluard, Jean Cocteau, Georges Bernanos, Sait-John Perse (Nobel 1960), Blaise Cendrars, Roland Dorgeles, Francis Carco, Pierre Benoit, Alain-Fournier, Jules Romains, Andre Maurois, Francois Mauriac (Nobel 1952), Sacha Guitry, Georges Duhamel, Jean Giraudoux, Roger Martin du Gard (Nobel 1937), Leon Werth, Guillaume Apollinaire, Jacques Bainville, Max Jacob, Charles Peguy, Claude Simon (Nobel 1985), Louis Artus, Pierre Louys, Paul Valery, Henry Bataille, Paul Fort, Henri Barbusse, Colette, Emile Guillaumin, Paul Claudel, Francis James, Gaston Leroux, Charles Maurras, Hector Malot, Victorien Sardou, Francois Coppee, Octave Mirbeau, Paul Bourget, Rene Bazin, Emile Verhaeren, Jean Moreas, Jules Lemaitre, Gustave Kahn, Henri Bergson (Nobel 1927), Michel Zevaco, Paul Roux, Paul Adam, Maurice Barres, Maurice Leblanc, Jules Renard, Tristan Bernard, Romain Rolland (Nobel 1915), Marcel Schwob, Alain, Andre Malraux, Albert Cohen, Jean-Paul Sartre (Nobel 1964), Henry de Montherlant, Elsa Triolet, Louis Aragon, Marcel Achard, Armand Salacrou, Antoine de Saint-Exupery, Jacques Prevert, Julien Green, Nathalie Sarraute, Marcel Ayme, Louise de Vilmorin, Vercors, Raymond Queneau, Raymond Radiguet, Robert Desnos, Georges Simenon, Marguerite Yourcenar, Raymond Aron, Samuel Beckett (Nobel Ireland 1969), Claude Levi-Strauss, Jean Anouilh, Jean Giono, Henri Troyat, Edmond Jabes, Albert Camus (Nobel 1957), Romain Gary, Simone de Beauvoir, Maurice Dekobra, Eugene Sue, Pierre Loti, Pierre Souvestre, Marcel Allain. 24 authors underlined, & this is just a partial indicative list...

English Literature : The authors in English (American, British and Irish) in the years 1900-1939 – the last 40 years of the twelfty 1820-1939 reviewed in this book, in this list are the 70 very prominent authors such as: Joseph Conrad, George Bernard Shaw (Nobel Ireland 1925), William Butler Yeats (Nobel Ireland 1923), Edward Thomas, Wilfred Owen, Isaac Rosenberg, Siegfried Sassoon, Sean O'Casey, H.G. Wells, John Galsworthy (Nobel 1932), E.M. Forster, Walter de la Mare, T.S. Eliot (Nobel UK 1948), Dorothy Richardson, D.H. Lawrence, James Joyce, Virginia Woolf, David Jones, James Hanley, Harold Heslop, Aldous Huxley, John Cowper Powys, Graham Greene, W.H. Auden, Stephen Crane, Theodore Dreiser, Upton Sinclair, Sinclair Lewis (Nobel US 1930), Edwin Markham, William Vaughn Moody, Henry Adams, Pauline Hopkins, Sir Winston Churchill (Nobel UK 1953), Maria Cristina Mera, Gertrude Stein, Ezra Pound, Patrick White (Nobel Australia 1971), F. Scott Fitzgerald, Ernest Hemingway (Nobel US 1954), Sherwood Anderson, William Faulkner (Nobel US 1949), John Dos Passos, Tennessee Williams, Arthur Miller, John Steinbeck (Nobel 1962), William Saroyan, Pearl S. Buck (Nobel US 1938), Nathanael West, James Agee, Henry Miller, Margaret Mitchell, Eugene O'Neill (Nobel US 1936), Arthur Conan Doyle, James Hadley Chase, Raymond Chandler, Agatha Christie, Ayn Rand, W. Somerset Maugham, Dylan Thomas, Clifford Odets, Robert Frost, Noel Coward, Arthur Koestler, Isaac Asimov, A. J. Cronin, Bertrand Russell (Nobel UK 1950), Rudyard Kipling (Nobel UK 1907), Anais Nin, Lawrence Durrell, Howard Fast, and so many other excellent authors.

German Literature: The 20 prominent authors who wrote in German (German, Austrian, Swiss, Czech...) in the years 1900-1939 – the last 40 years of the twelfty 1820-1939 reviewed

in this book, are: Franz Kafka (Czech), Thomas Mann (Nobel Germany 1929), Bertolt Brecht, Heinrich Mann, Sigmund Freud (Austria), Hans Fallada, Stefan Zweig (Austria), Hannah Arendt, Franz Werfel (Austrian), Arthur Schnitzler (Austrian), Robert Musil (Austrian), Rainer Maria Rilke (Austrian), Erich Maria Remarque, Erich Kaestner, Lion Feuchtwanger, Herman Hesse (Nobel Switzerland 1946), Vicky Baum (Austrian), Hans Habe (lived in Hungary, Austria, France, Switzerland & the US), Max Frisch (Swiss), Elias Canetti (born in Bulgaria, lived also in Germany, Austria, UK & Switzerland, Nobel 1981).

To them we can add 29 more prominent authors: Georg Trakl, Werner Bergengruen, Ricarda Huch, Walter von Molo, Friedrich Reck-Malleczewen, Carl von Ossietzky was awarded the Peace Nobel Prize in 1935, Georg Heym, Ernst Juenger, Frank Thiess, Georg Kaiser, Paul Scheerbart, Reinhard Sorge, Walter Hasenclever, Arnolt Bronnen, Jakob van Hoddis, Gottfried Benn, Christa Winsloe, Klaus Mann, Alfred Doeblin, Ernst Toller, August Stramm, Anna Elizabet Weirauch, Erich Ebermayer, Herbert Marcuse, Gertrud Fussenegger, Else Lasker-Schueler, Ernst Wiechert, Reinhold Schneider, Hans Blueher, and other prominent authors from the “Exil Literatur”, who fled Germany, mentioned earlier in this book.

Spanish Literature: The best 31 Spanish authors in 1900-1939 are: Emilia Pardo Bazan, Vicente Blasco Ibanez, Jose Echegaray (Nobel Spain 1904), Juan Ramon Jimenez (Nobel Spain 1956), Jacinto Benavente y Martínez (Nobel Spain 1922), Pio Baroja, Ramon del Valle-Inclan, Jose Martinez Ruiz, Antonio Machado, Ramiro de Maeztu, Jose Ortega Y Gasset, Ramon Menendez Pidal, Manuel Azana, Eugeni d’Ors, Gabriel Miro, Ramon Perez de Ayala, Ramon Gomez de la Serna, Federico Garcia Lorca, Pedro Salinas, Jorge Guillen, Miguel Hernandez, Vicente Aleixandre (Nobel Spain 1977), Damasco Alonso, Manuel Altolaguirre, Benjamin Jarnes, Rosa Chacel, Fransisco Ayala, Octavio Paz (Nobel Mexico 1990), Salvador de Madariaga, Armando Palacio Valdez, and Jacinto Grau. However, in those years there were 10 excellent Latin American authors as well: Miguel Angel Asturias (Nobel Guatemala 1967), Jorge Luis Borges (Argentina), Roberto Arlt (Argentina), Jose Maria Arguedas (Peru), Delmira Agustini (Uruguay), Romulo Gallegos (Venezuela), Alejo Carpentier (Cuba), Mariano Azuela (Mexico), Pablo Neruda (Nobel Chile 1971), Gabriela Mistral (Nobel Chile 1945). To those we add Narcis Oller who wrote in Catalan, altogether 42.

Russian Literature: The 48 best authors in 1900-1939 were: Alexander Blok, Sergei Yesenin, Mikhail Kuzmin, Ygor Severyanin, Sasha Chorny, Nikolai Gumilyov, Maximilian Voloshin, Innokenty Annensky, Zinaida Gippius, Anna Akhmatova, Marina Tsvetaeva, Osyp Mandelstam, Boris Pasternak (Nobel 1958), Velimir Khlebnikov, David Burliuk, Aleksei Kruchenykh, Vladimir Mayakovsky, Alexandr Kuprin, Ivan Bunin (Nobel 1933), Leonid Andreyev, Fyodor Sologub, Aleksey Remizov, Yevgeny Zamyatin, Dmitry Merzhkovsky, Andrei Bely, Maxim Gorky, Alexander Fadeyev, Nikolai Ostrovsky, Daniil Kharms, Isaac Babel, Konstantin Vaginov, Mikhail Bulgakov, Alexander Vvedensky, Nikolay Zabolotsky, Yury Olesha, Andrei Platonov, Mikhail Zoshchenko, Viktor Shklovsky, Yuri Tynyanov, Georgy Ivanov, Vyacheslav Ivanov, Mark Aldanov, Gaito Gazdanov, Vladimir Nabokov, Vasily Grossman, Nikolai Bukharin, Mikhail Sholokhov (Nobel 1965), Alexandr Isayevich Solzhenitsyn (Nobel 1970). 4 Russian authors received Nobel Prizes in Literature.

Italian Literature: 25 authors in 1900-1939: Italo Svevo, Luigi Pirandello (Nobel 1934), Federico Tozzi, Grazia Deledda (Nobel 1926), Sibilla Aleramo, Maria Messina, Alberto Moravia, Albade Cespedes, Filippo Marinetti, Salvatore Quasimodo (Nobel 1959), Giuseppe Ungareto, Umberto Saba, Eugenio Montale (Nobel 1975), Cesare Pavese, Corrado Alvaro,

Elio Vittorini, Dino Buzzati, [Curzio Malaparte](#), Carlo Emilio Gadda, Guido Gozzano, Sergio Corazzini, Corrado Govoni, Antonio Baldini, Massimo Bontempelli, [Elsa Morante](#).

From another list:

Modernism is both a [philosophical movement](#) and an [art movement](#) that arose from broad transformations in [Western society](#) during the late 19th and early 20th centuries. The movement reflected a desire for the creation of new forms of art, philosophy, and social organization which reflected the newly emerging [industrial world](#), including features such as [urbanization](#), new technologies, and war. Artists attempted to depart from traditional forms of art, which they considered outdated or obsolete. The poet [Ezra Pound](#)'s 1934 injunction to "Make it new!" was the touchstone of the movement's approach.

Modernist innovations included [abstract art](#), the [stream-of-consciousness](#) novel, [montage cinema](#), [atonal](#) and [twelve-tone](#) music, and [divisionist](#) painting. Modernism explicitly rejected the ideology of [realism](#) and made use of the works of the past by the employment of [reprise](#), [incorporation](#), rewriting, [recapitulation](#), revision and [parody](#).^{[b][c][4]} Modernism also rejected the certainty of [Enlightenment](#) thinking, and many modernists also rejected religious belief. A notable characteristic of modernism is [self-consciousness](#) concerning artistic and social traditions, which often led to experimentation with form, along with the use of techniques that drew attention to the processes and materials used in creating works of art.^[7]

While some scholars see modernism continuing into the 21st century, others see it evolving into [late modernism](#) or [high modernism](#). [Postmodernism](#) is a departure from modernism and rejects its basic assumptions.

Literary [modernism](#), or **modernist literature**, has its origins in the late 19th and early 20th centuries, mainly in Europe and North America. Some philosophers, like [Georg Lukacs](#), theorized that literary modernism had its origins in the philosophy of [Walter Benjamin](#). Modernism is characterized by a [self-conscious](#) break with traditional styles of poetry and verse. Modernists experimented with literary form and expression, adhering to [Ezra Pound](#)'s maxim to "Make it new". The modernist literary movement was driven by a conscious desire to overturn traditional modes of representation and express the new sensibilities of their time. The horrors of the [First World War](#) saw the prevailing assumptions about society reassessed. Thinkers such as [Sigmund Freud](#) and [Karl Marx](#) questioned the rationality of mankind. major precursor of modernism was [Friedrich Nietzsche](#), especially his idea that psychological drives, specifically the "[will to power](#)", were more important than facts, or things. [Henri Bergson](#) (1859–1941), on the other hand, emphasized the difference between scientific clock time and the direct, subjective, human experience of time^[5] His work on time and consciousness "had a great influence on twentieth-century novelists," especially those modernists who used the stream of consciousness technique, such as [Dorothy Richardson](#) for the book *Pointed Roofs* (1915), [James Joyce](#) for *Ulysses* (1922) and [Virginia Woolf](#) (1882–1941) for *Mrs Dalloway* (1925) and *To the Lighthouse* (1927). Also important in Bergson's philosophy was the idea of *élan vital*, the life force, which "brings about the creative evolution of everything" His philosophy also placed a high value on intuition, though without rejecting the importance of the intellect. These various thinkers were united by a distrust of Victorian positivism and certainty. Modernism as a literary movement can be seen also, as a reaction to industrialization, [urbanization](#) and new technologies.

Important literary precursors of Modernism were: [Fyodor Dostoyevsky](#) (1821–81) (*Crime and Punishment* (1866), *The Brothers Karamazov* (1880)); [Walt Whitman](#) (1819–92) (*Leaves of Grass*) (1855–91); [Charles Baudelaire](#) (1821–67) (*Les Fleurs du mal*), [Rimbaud](#) (1854–91) (*Illuminations*, 1874); [August Strindberg](#) (1849–1912), especially his later plays, including the trilogy *To Damascus* 1898–1901, *A Dream Play* (1902), *The Ghost Sonata* (1907). Modernism was already stirring by 1902, with works such as [Joseph Conrad](#)'s (1857–1924) *Heart of Darkness*, while [Alfred Jarry](#)'s (1873–1907) absurdist play, *Ubu Roi* appeared even earlier, in 1896. Among early modernist non-literary landmarks is [Arnold Schoenberg](#)'s atonal ending of *Second String Quartet* in 1908, the Expressionist paintings of [Wassily Kandinsky](#) starting in 1903 and culminating with his first abstract painting and the founding of the Expressionist *Blue Rider* group in *Munich* in 1911, the rise of *fauvism*, and the introduction of *cubism* from the studios of [Henri Matisse](#), [Pablo Picasso](#), [Georges Braque](#) and others between 1900 and 1910. [Sherwood Anderson](#)'s *Winesburg, Ohio* is known as an early work of modernism for its plain-spoken prose style and emphasis on psychological insight into characters. Other early modernist writers, most of them I have read and admired their work, and selected works include:

- [Luigi Pirandello](#) (1867–1936): *The Late Mattia Pascal* (1904), *Six Characters in Search of an Author* (1921);
- [Rainer Maria Rilke](#) (1875–1926): *The Notebooks of Malte Laurids Brigge* (1910), *Sonnets to Orpheus* (1922), *Duino Elegies* (1922);
- [W. B. Yeats](#) (1865–1939): *The Green Helmet* (1910), *Wild Swans at Coole* (1917);
- [Gottfried Benn](#) (1886–1956): *Morgue and other Poems* (1912);
- [Ezra Pound](#) (1885–1972): *Ripostes* (1912), *The Cantos*, published variously over the period 1917–64, *Hugh Selwyn Mauberley* (1920);
- [Guillaume Apollinaire](#) (1880–1918): *Alcools* (1913);
- [Andrei Bely](#) (1880–1934): *Petersburg* (1913);
- [D. H. Lawrence](#) (1885–1930): *Sons and Lovers* (1913), *The Rainbow* (1915);
- [Marcel Proust](#) (1871–1922): *Du côté de chez Swann* (1913), the first volume of *Remembrance of Things Past* (1913–27);
- [Georg Trakl](#) (1887–1914): *Poems* (1913);
- [Franz Kafka](#) (1883–1924): *The Metamorphosis* (1915), *The Trial* (1925), *The Castle* (1926);
- [Grigol Robakidze](#) (1880–1962): *The Snake's Skin* (1926);
- [Dorothy Richardson](#) (1873–1957): *Pointed Roofs* (1915), the first volume of *Pilgrimage* (1915–38; post. 1967);
- [T. S. Eliot](#) (1888–1965): *The Love Song of J. Alfred Prufrock* (1916), *The Waste Land* (1922), *Four Quartets* (1935–42);
- [James Joyce](#) (1882–1941), *A Portrait of the Artist as a Young Man* (1916), *Ulysses* (1922), *Finnegans Wake* (1939);
- [Miroslav Krleža](#) (1893–1981), *Kristofor Kolumbo* (1918), *Michelangelo Buonarroti* (1919), *Povratak Filipa Latinovicza* (1932);
- [Wyndham Lewis](#) (1882–1957): *Tarr* (1918);
- [Eugene O'Neill](#) (1888–1953): *Anna Christie* (1920), *The Emperor Jones* (1920);
- [Karel Čapek](#) (1890–1938): *R.U.R.* (1920);
- [Italo Svevo](#) (1861–1928): *Zeno's Conscience* (1923);

James Joyce was a major modernist writer whose strategies employed in his novel *Ulysses* (1922) for depicting the events during a twenty-four hour period in the life of his protagonist, [Leopold Bloom](#), have come to epitomize modernism's approach to fiction. The term *late*

[modernism](#) is sometimes applied to modernist works published after 1930. Among modernists (or late modernists) still publishing after 1945 were [Wallace Stevens](#), [Gottfried Benn](#), [T. S. Eliot](#), [Anna Akhmatova](#), [William Faulkner](#), [Dorothy Richardson](#), [John Cowper Powys](#), and [Ezra Pound](#). [Basil Bunting](#), born in 1901, published his most important modernist poem *Briggflatts* in 1965. In addition [Hermann Broch](#)'s *The Death of Virgil* was published in 1945 and [Thomas Mann](#)'s *Doctor Faustus* in 1947. [Samuel Beckett](#), who died in 1989, has been described as a "later modernist". Beckett is a writer with roots in the [expressionist](#) tradition of modernism, who produced works from the 1930s until the 1980s, including *Molloy* (1951), *En attendant Godot* (1953), *Happy Days* (1961) and *Rockaby* (1981). The terms [minimalist](#) and [post-modernist](#) have also been applied to his later works. The poets [Charles Olson](#) (1910–1970) and [J. H. Prynne](#) (b. 1936) have been described as late modernists. More recently the term [late modernism](#) has been redefined by at least one critic and used to refer to works written after 1945, rather than 1930. With this usage goes the idea that the ideology of modernism was significantly re-shaped by the events of [World War II](#), especially the [Holocaust](#) and the dropping of the atom bomb.

The term [Theatre of the Absurd](#) is applied to plays written by primarily European [playwrights](#), that express the belief that human existence has no meaning or purpose and therefore all communication breaks down. Logical construction and argument gives way to irrational and illogical speech and to its ultimate conclusion, silence. While there are significant precursors, including [Alfred Jarry](#) (1873–1907), the Theatre of the Absurd is generally seen as beginning in the 1950s with the plays of [Samuel Beckett](#). Critic [Martin Esslin](#) coined the term in his 1960 essay, "Theatre of the Absurd." He related these plays based on a broad theme of the Absurd, similar to the way [Albert Camus](#) uses the term in his 1942 essay, "[The Myth of Sisyphus](#)". The Absurd in these plays takes the form of man's reaction to a world apparently without meaning, and/or man as a puppet controlled or menaced by invisible outside forces. Though the term is applied to a wide range of plays, some characteristics coincide in many of the plays: broad comedy, often similar to [Vaudeville](#), mixed with horrific or tragic images; characters caught in hopeless situations forced to do repetitive or meaningless actions; dialogue full of clichés, wordplay, and nonsense; plots that are cyclical or absurdly expansive; either a parody or dismissal of realism and the concept of the "[well-made play](#)". Playwrights commonly associated with the Theatre of the Absurd include [Samuel Beckett](#) (1906–1989), [Eugène Ionesco](#) (1909–1994), [Jean Genet](#) (1910–1986), [Harold Pinter](#) (1930–2008), [Tom Stoppard](#) (b. 1937), [Friedrich Dürrenmatt](#) (1921–1990), [Alejandro Jodorowsky](#) (b. 1929), [Fernando Arrabal](#) (b. 1932), [Václav Havel](#) (1936–2011) and [Edward Albee](#) (b. 1928). Among those authors I admire most and have also taught their works in my courses on business ethics are: Ionesco (Rhinoceros), Durrenmatt (The Visit of the Old Lady), but I also admire and see often their plays: Albee, Beckett, Pinter and Genet. I often wonder how I can enjoy such various styles of playwrights, including modernist playwrights, as in music and art I enjoy mostly only the 19th century (Beethoven, Mahler, Brahms, Chopin, Mendelssohn, Verdi, Offenbach, Bizet, Impressionism and to a lesser extent Romanticism). In drama I enjoy almost equally to read and see Sophocles, Euripides, Aristophanes, Goldoni, Racine, Corneille, Moliere, Shakespeare, Lorca, Pinter, Beckett, Albee, Durrenmatt, Rostand, Hugo, Jarry, Sobol, Pirandello, Brecht, Anouilh, Chekhov, and Goethe. In literature I enjoy most modern books, novels and poetry, as explained at length in this chapter, but I enjoy very much also Homer, the Bible, Cicero, Vergil, Cervantes, Balzac, Wordsworth, Byron, Goethe, Dante, Thackeray, Jane Austen, Choderlos de Laclos, L'Abbe Prevost, Heine...

The list of modern writers according to Wikipedia includes the following authors:

[Grigol Robakidze](#) (1880–1962), [Anna Akhmatova](#) (1889–1966), [Ryūnosuke Akutagawa](#) (1892–1927), [Gabriele d'Annunzio](#) (1863–1938), [Guillaume Apollinaire](#) (1880–1918), [W. H. Auden](#) (1907–73), [Djuna Barnes](#) (1892–1982), [Samuel Beckett](#) (1906–89), [Gottfried Benn](#) (1886–1956), [Bertolt Brecht](#) (1898–1956), [Alexander Blok](#) (1880–1921), [Menno ter Braak](#) (1902–40), [Hermann Broch](#) (1886–1951), [Jorge Luis Borges](#) (1899–1986), [Basil Bunting](#) (1900–85), [Ivan Cankar](#) (1876–1918), [Mário de Sá-Carneiro](#) (1890–1916), [Constantine P. Cavafy](#) (1863–1933), [Joseph Conrad](#) (1857–1924), [Hart Crane](#) (1899–1932), [E. E. Cummings](#) (1894–1962), [Joaquim Maria Machado de Assis](#) (1839–1908), [Rubén Darío](#) (1867–1916), [Alfred Döblin](#) (1878–1957), [H.D.](#) (Hilda Doolittle) (1886–1961), [T. S. Eliot](#) (1888–1965), [Ralph W. Ellison](#) (1914–1994), [William Faulkner](#) (1897–1962), [Ford Madox Ford](#) (1873–1939), [E. M. Forster](#) (1879–1971), [F. Scott Fitzgerald](#) (1896–1940), [Robert Frost](#) (1874–1963), [Carlo Emilio Gadda](#) (1893–1973), [Knut Hamsun](#) (1859–1952), [Jaroslav Hašek](#) (1883–1923), [Ernest Hemingway](#) (1899–1961), [Hugo von Hofmannsthal](#) (1874–1929), [Max Jacob](#) (1876–1944), [David Jones](#) (1895–1974), [James Joyce](#) (1882–1941), [Franz Kafka](#) (1883–1924), [Georg Kaiser](#) (1878–1945), [Miroslav Krleža](#) (1893–1981), [Federico García Lorca](#) (1898–1936), [Clarice Lispector](#) (1920–1977), [Mina Loy](#) (1882–1966), [Leopoldo Lugones](#) (1874–1938), [Hugh MacDiarmid](#) (1892–1976), [Osip Mandelstam](#) (1891–1938), [Thomas Mann](#) (1875–1955), [Katherine Mansfield](#) (1888–1923), [José Martí](#) (1853–1895), [Robert Musil](#) (1880–1942), [Marianne Moore](#) (1887–1972), [Vladimir Nabokov](#) (1899–1977), [Pablo Neruda](#) (1904–1973), [Yone Noguchi](#) (1875–1947), [Aldo Palazzeschi](#) (1885–1974), [John Dos Passos](#) (1896–1970), [Boris Pasternak](#) (1890–1960), [Fernando Pessoa](#) (1888–1935), [Luigi Pirandello](#) (1867–1936), [Katherine Anne Porter](#) (1890–1980), [Ezra Pound](#) (1885–1972), [John Cowper Powys](#) (1872–1963), [Marcel Proust](#) (1871–1922), [Klaus Rifbjerg](#) (1931–2015), [Victor Serge](#) (1890–1947), [Gertrude Stein](#) (1874–1946), [Wallace Stevens](#) (1875–1955), [Italo Svevo](#) (1861–1928), [Dylan Thomas](#) (1914–1953), [Ernst Toller](#) (1893–1939), [Federigo Tozzi](#) (1883–1920), [Paul Valéry](#) (1871–1945), [Jakob Wassermann](#) (1873–1934), [Robert Walser](#) (1878–1956), [Nathanael West](#) (1903–1940), [William C. Williams](#) (1883–1963), [Frank Wedekind](#) (1864–1918), [Virginia Woolf](#) (1882–1941), [Lu Xun](#) (1881–1936)

From another list:

Introduction

in the arts, a radical break with the past and the concurrent search for new forms of expression. Modernism fostered a period of experimentation in the arts from the late 19th to the mid-20th century, particularly in the years following World War I.

In an era characterized by [industrialization](#), rapid [social change](#), and advances in [science](#) and the [social sciences](#) (e.g., Freudian theory), Modernists felt a growing alienation incompatible with Victorian morality, optimism, and convention. New ideas in psychology, philosophy, and political theory kindled a search for new modes of expression.

Modernism in literature

The Modernist impulse is fueled in various literatures by industrialization and [urbanization](#) and by the search for an authentic response to a much-changed world. Although prewar works

by [Henry James](#), [Joseph Conrad](#), and other writers are considered Modernist, Modernism as a literary movement is typically associated with the period after World War I. The enormity of the war had undermined humankind's faith in the foundations of Western society and culture, and postwar Modernist literature reflected a sense of disillusionment and fragmentation. A primary theme of [T.S. Eliot](#)'s long poem *[The Waste Land](#)* (1922), a seminal Modernist work, is the search for redemption and renewal in a sterile and spiritually empty landscape. With its fragmentary images and obscure allusions, the poem is typical of Modernism in requiring the reader to take an active role in interpreting the text.

The publication of the Irish writer [James Joyce](#)'s *[Ulysses](#)* in 1922 was a landmark event in the development of Modernist literature. Dense, lengthy, and controversial, the novel details the events of one day in the life of three Dubliners through a technique known as [stream of consciousness](#), which commonly ignores orderly sentence structure and incorporates fragments of thought in an attempt to capture the flow of characters' mental processes. Portions of the book were considered obscene, and *Ulysses* was banned for many years in English-speaking countries. Other European and American Modernist authors whose works rejected chronological and narrative continuity include [Virginia Woolf](#), [Marcel Proust](#), [Gertrude Stein](#), and [William Faulkner](#).

The term Modernism is also used to refer to literary movements other than the European and American movement of the early to mid-20th century. In Latin American literature, [Modernismo](#) arose in the late 19th century in the works of [Manuel Gutiérrez Nájera](#) and [José Martí](#). The movement, which continued into the early 20th century, reached its peak in the poetry of [Rubén Darío](#). (See also [American literature](#); [Latin American literature](#).)

Modernism in other arts and architecture

Composers, including [Arnold Schoenberg](#), [Igor Stravinsky](#), and [Anton Webern](#), sought new solutions within new forms and used as-yet-untried approaches to tonality. In dance a rebellion against both balletic and interpretive traditions had its roots in the work of [Émile Jaques-Delcroze](#), [Rudolf Laban](#), and [Loie Fuller](#). Each of them examined a specific aspect of dance—such as the elements of the human form in motion or the impact of theatrical context—and helped bring about the era of modern dance. In the visual arts the roots of Modernism are often traced back to painter [Édouard Manet](#), who, beginning in the 1860s, broke away from inherited notions of [perspective](#), modeling, and subject matter. The [avant-garde](#) movements that followed—including [Impressionism](#), [Post-Impressionism](#), [Cubism](#), [Futurism](#), [Expressionism](#), [Constructivism](#), [de Stijl](#), and [Abstract Expressionism](#)—are generally defined as Modernist.

Over the span of these movements, artists increasingly focused on the intrinsic qualities of their media—e.g., line, form, and colour—and moved away from inherited notions of art. By the beginning of the 20th century, architects also had increasingly abandoned past styles and conventions in favour of a form of architecture based on essential functional concerns. They were helped by advances in building technologies such as the steel frame and the curtain wall. In the period after World War I these tendencies became codified as the [International style](#), which utilized simple geometric shapes and unadorned facades and which abandoned any use of historical reference; the steel-and-glass buildings of [Ludwig Mies van der Rohe](#) and [Le](#)

[Corbusier](#) embodied this style. In the mid-to-late 20th century this style manifested itself in clean-lined, unadorned glass skyscrapers and mass housing projects.

The birth of postmodernism

In the late 20th century a reaction against Modernism set in. Architecture saw a return to traditional materials and forms and sometimes to the use of decoration for the sake of decoration itself, as in the work of [Michael Graves](#) and, after the 1970s, that of [Philip Johnson](#). In literature, irony and self-awareness became the postmodern fashion and the blurring of fiction and nonfiction a favoured method. Such writers as [Kurt Vonnegut](#), [Thomas Pynchon](#), and [Angela Carter](#) employed a postmodern approach in their work.

From another list:

Modernism, here limited to aesthetic modernism (see also modernity), describes a series of sometimes radical movements in art, architecture, photography, [music](#), literature, and the applied arts which emerged in the three decades before 1914. Modernism has philosophical antecedents that can be traced to the eighteenth-century [Enlightenment](#) but is rooted in the changes in Western society at the end of the nineteenth and beginning of the twentieth centuries.

Modernism encompasses the works of artists who rebelled against nineteenth-century academic and historicist traditions, believing that earlier aesthetic conventions were becoming outdated. Modernist movements, such as [Cubism](#) in the arts, [Atonality](#) in music, and Symbolism in poetry, directly and indirectly explored the new economic, social, and political aspects of an emerging fully industrialized world.

Modernist art reflected the deracinated experience of life in which tradition, community, collective identity, and faith were eroding. In the twentieth century, the mechanized mass slaughter of the [First World War](#) was a watershed event that fueled modernist distrust of reason and further sundered complacent views of the steady moral improvement of human society and belief in progress.

Initially an avant garde movement confined to an intellectual minority, modernism achieved mainstream acceptance and exerted a pervasive influence on culture and popular entertainment in the course of the twentieth century. The modernist view of truth as a subjective, often intuitive claim has contributed to the elevation of individualism and [moral relativism](#) as guiding personal ethics and contributed to far-reaching transformations regarding the spiritual significance of human life.

From the 1870s onward, the ideas that [history](#) and [civilization](#) were inherently progressive and that progress was always good came under increasing attack. Arguments arose that not merely were the values of the artist and those of [society](#) different, but that society was antithetical to progress, and could not move forward in its present form. [Philosophers](#) called into question the previous optimism.

Two of the most disruptive thinkers of the period were, in [biology](#), [Charles Darwin](#) and, in political science, [Karl Marx](#). Darwin's theory of evolution by [natural selection](#) undermined religious certainty and the sense of human uniqueness, which had far-reaching implications in the arts. The notion that [human beings](#) were driven by the same impulses as "lower animals" proved to be difficult to reconcile with the idea of an ennobling spirituality. Marx seemed to present a political version of the same proposition: that problems with the economic order were not transient, the result of specific wrong doers or temporary conditions, but were fundamentally contradictions within the "capitalist" system. [Naturalism](#) in the visual arts and literature reflected a largely [materialist](#) notion of human life and society.

Separately, in the arts and letters, two ideas originating in [France](#) would have particular impact. The first was [Impressionism](#), a school of painting that initially focused on work done, not in studios, but outdoors (*en plein air*). Impressionist paintings demonstrated that human beings do not see objects, but instead see light, itself. The second school was [Symbolism](#), marked by a belief that language is expressly symbolic in its nature, and that poetry and writing should follow connections that the sheer sound and texture of the words create.

At the same time, social, political, religious, and economic forces were at work that would become the basis to argue for a radically different kind of art and thinking. In religion, biblical scholars argued that the biblical writers were not conveying God's literal word, but were strongly influenced by their times, societies, and audiences. Historians and archaeologists further challenged the factual basis of the Bible and differentiated an evidence-based perspective of the past with the worldview of the ancients, including the biblical authors, who uncritically accepted oral and mythological traditions.

Chief among the physical influences on the development of modernism was steam-powered industrialization, which produced buildings that combined art and engineering, and in new industrial materials such as cast iron to produce bridges and skyscrapers—or the [Eiffel Tower](#), which broke all previous limitations on how tall man-made objects could be—resulting in a radically different urban environment.

The possibilities created by scientific examination of subjects, together with the miseries of industrial urban life, brought changes that would shake a European civilization, which had previously regarded itself as having a continuous and progressive line of development from the [Renaissance](#). With the [telegraph](#) offering instantaneous communication at a distance, the experience of time itself was altered.

The breadth of the changes can be sensed in how many modern disciplines are described as being "classical" in their pre-twentieth-century form, including physics, economics, and arts such as [ballet](#), theater, or architecture.

The roots of Modernism emerged in the middle of the nineteenth century; and rather locally, in [France](#), with [Charles Baudelaire](#) in literature and [Édouard Manet](#) in painting, and perhaps with [Gustave Flaubert](#), too, in prose fiction. (It was a while later, and not so locally, that Modernism appeared in music and architecture). The "avant-garde" was what Modernism was called at first, and the term remained to describe movements which identify themselves as attempting to overthrow some aspect of tradition or the status quo.

In the 1890s, a strand of thinking began to assert that it was necessary to push aside previous norms entirely, instead of merely revising past knowledge in light of current techniques. The

growing movement in art paralleled such developments as Einstein's Theory of Relativity in physics; the increasing integration of the internal combustion engine and industrialization; and the increased role of the [social sciences](#) in public policy. It was argued that, if the nature of reality itself was in question, and if restrictions which had been in place around human activity were falling, then art, too, would have to radically change. Thus, in the first 15 years of the twentieth century a series of writers, thinkers, and artists made the break with traditional means of organizing literature, painting, and music.

[Sigmund Freud](#) offered a view of subjective states involving an [unconscious mind](#) full of primal impulses and counterbalancing self-imposed restrictions, a view that [Carl Jung](#) would combine with a belief in natural essence to stipulate a [collective unconscious](#) that was full of basic typologies that the conscious mind fought or embraced. Jung's view suggested that people's impulses towards breaking social norms were not the product of childishness or ignorance, but were instead essential to the nature of the human animal, the ideas of Darwin having already introduced the concept of "man, the animal" to the public mind.

[Friedrich Nietzsche](#) championed a philosophy in which forces, specifically the 'Will to power', were more important than facts or things. Similarly, the writings of [Henri Bergson](#) championed the vital "life force" over static conceptions of reality. What united all these writers was a [romantic](#) distrust of the Victorian positivism and certainty. Instead they championed, or, in the case of Freud, attempted to explain, irrational thought processes through the lens of rationality and holism. This was connected with the century-long trend to thinking in terms of holistic ideas, which would include an increased interest in the occult, and "the vital force."

Out of this collision of ideals derived from [Romanticism](#), and an attempt to find a way for knowledge to explain that which was as yet unknown, came the first wave of works, which, while their authors considered them extensions of existing trends in art, broke the implicit contract that artists were the interpreters and representatives of bourgeois culture and ideas. These "modernist" landmarks include [Arnold Schoenberg](#)'s atonal ending to his Second String Quartet in 1908; the Abstract-Expressionist paintings of [Wassily Kandinsky](#) starting in 1903 and culminating with the founding of the Blue Rider group in [Munich](#); and the rise of [Cubism](#) from the work of [Picasso](#) and [Georges Braque](#) in 1908.

Powerfully influential in this wave of modernity were the theories of Freud, who argued that the mind had a basic and fundamental structure, and that subjective experience was based on the interplay of the parts of the mind. All subjective reality was based, according to Freud's ideas, on the play of basic drives and instincts, through which the outside world was perceived. This represented a break with the past, in that previously it was believed that external and absolute reality could impress itself on an individual, as, for example, in [John Locke](#)'s [tabula rasa](#) doctrine.

This wave of the Modern Movement broke with the past in the first decade of the twentieth century, and tried to redefine various art forms in a radical manner. Leading lights within the literary wing of this trend included Basil Bunting, [Jean Cocteau](#), [Joseph Conrad](#), [T. S. Eliot](#), [William Faulkner](#), Max Jacob, [James Joyce](#), [Franz Kafka](#), [D. H. Lawrence](#), Federico García Lorca, [Marianne Moore](#), [Ezra Pound](#), [Marcel Proust](#), [Gertrude Stein](#), [Wallace Stevens](#), [Virginia Woolf](#), and [W. B. Yeats](#) among others.

Composers such as [Schoenberg](#), [Stravinsky](#), and [George Antheil](#) represent Modernism in [music](#). Artists such as [Gustav Klimt](#), [Picasso](#), Matisse, [Mondrian](#), and the movements Les Fauves, [Cubism](#) and the [Surrealists](#) represent various strains of Modernism in the visual arts, while architects and designers such as Le Corbusier, Walter Gropius, and Mies van der Rohe brought modernist ideas into everyday [urban](#) life. Several figures outside of artistic Modernism were influenced by artistic ideas; for example, [John Maynard Keynes](#) was friends with Woolf and other writers of the Bloomsbury group.

The explosion of Modernism: 1910-1930

On the eve of [World War I](#) a growing tension and unease with the social order, seen in the Russian Revolution of 1905 and the agitation of "radical" parties, also manifested itself in artistic works in every medium which radically simplified or rejected previous practice. In 1913, famed [Russian composer Igor Stravinsky](#), working for [Sergei Diaghilev](#) and the Ballets Russes, composed *Rite of Spring* for a ballet, choreographed by [Vaslav Nijinsky](#) that depicted human sacrifice, and young painters such as [Pablo Picasso](#) and [Henri Matisse](#) were causing a shock with their rejection of traditional perspective as the means of structuring paintings—a step that none of the [Impressionists](#), not even [Cézanne](#), had taken.

These developments began to give a new meaning to what was termed 'Modernism'. It embraced disruption, rejecting or moving beyond simple [Realism](#) in literature and art, and rejecting or dramatically altering tonality in [music](#). This set Modernists apart from nineteenth-century artists, who had tended to believe in "progress." Writers like [Dickens](#) and [Tolstoy](#), painters like [Turner](#), and musicians like [Brahms](#) were not 'radicals' or 'Bohemians', but were instead valued members of society who produced art that added to society, even if it was, at times, critiquing less desirable aspects of it. Modernism, while it was still "progressive" increasingly saw traditional forms and traditional social arrangements as hindering progress, and therefore the artist was recast as a revolutionary, overthrowing rather than enlightening.

Futurism exemplifies this trend. In 1909, F.T. Marinetti's first manifesto was published in the Parisian newspaper *Le Figaro*; soon afterward a group of painters (Giacomo Balla, Umberto Boccioni, Carlo Carrà, Luigi Russolo, and Gino Severini) co-signed the Futurist Manifesto. Modeled on the famous "Communist Manifesto" of the previous century, such manifestos put forward ideas that were meant to provoke and to gather followers. Strongly influenced by Bergson and Nietzsche, Futurism was part of the general trend of Modernist rationalization of disruption.

Modernist philosophy and art were still viewed as being only a part of the larger social movement. Artists such as Klimt and [Cézanne](#), and composers such as [Mahler](#) and [Richard Strauss](#) were "the terrible moderns"—other radical avant-garde artists were more heard of than heard. Polemics in favor of geometric or purely abstract painting were largely confined to 'little magazines' (like *The New Age* in the United Kingdom) with tiny circulations. Modernist primitivism and [pessimism](#) were controversial but were not seen as representative of the Edwardian mainstream, which was more inclined towards a Victorian faith in progress and liberal optimism.

However, [World War I](#) and its subsequent events were the cataclysmic upheavals that late nineteenth-century artists such as Brahms had worried about, and avant-gardists had anticipated. First, the failure of the previous status quo seemed self-evident to a generation that had seen millions die fighting over scraps of earth—prior to the war, it had been argued

that no one would fight such a war, since the cost was too high. Second, the birth of a machine age changed the conditions of life—machine warfare became a touchstone of the ultimate reality. Finally, the immensely traumatic nature of the experience dashed basic assumptions: Realism seemed to be bankrupt when faced with the fundamentally fantastic nature of trench warfare, as exemplified by books such as Erich Maria Remarque's *All Quiet on the Western Front*. Moreover, the view that mankind was making slow and steady moral progress came to seem ridiculous in the face of the senseless slaughter of the Great War. The First World War at once fused the harshly mechanical geometric rationality of technology with the nightmarish irrationality of myth.

Thus in the 1920s, Modernism, which had been a minority taste before the war, came to define the age. Modernism was seen in Europe in such critical movements as [Dada](#), and then in constructive movements such as [Surrealism](#), as well as in smaller movements of the Bloomsbury Group. Each of these "modernisms," as some observers labeled them at the time, stressed new methods to produce new results. Again, Impressionism was a precursor: breaking with the idea of national schools, artists and writers and adopting ideas of international movements. Surrealism, [Cubism](#), [Bauhaus](#), and [Leninism](#) are all examples of movements that rapidly found adherents far beyond their original geographic base.

Exhibitions, theater, cinema, books, and buildings all served to cement in the public view the perception that the world was changing. Hostile reaction often followed, as paintings were spat upon, riots organized at the opening of works, and political figures denounced modernism as unwholesome and immoral. At the same time, the 1920s were known as the "Jazz Age," and the public showed considerable enthusiasm for [cars](#), air travel, the [telephone](#), and other technological advances.

By 1930, Modernism had won a place in the establishment, including the political and artistic establishment, although by this time Modernism itself had changed. There was a general reaction in the 1920s against the pre-1918 Modernism, which emphasized its continuity with a past while rebelling against it, and against the aspects of that period which seemed excessively mannered, irrational, and emotional. The post-World-War period, at first, veered either to systematization or nihilism and had, as perhaps its most paradigmatic movement, [Dada](#).

While some writers attacked the madness of the new Modernism, others described it as soulless and mechanistic. Among Modernists there were disputes about the importance of the public, the relationship of art to audience, and the role of art in society. Modernism comprised a series of sometimes-contradictory responses to the situation as it was understood, and the attempt to wrestle universal principles from it. In the end science and scientific rationality, often taking models from the eighteenth century [Enlightenment](#), came to be seen as the source of logic and stability, while the basic primitive sexual and unconscious drives, along with the seemingly counter-intuitive workings of the new machine age, were taken as the basic emotional substance. From these two poles, no matter how seemingly incompatible, Modernists began to fashion a complete worldview that could encompass every aspect of life, and express "everything from a scream to a chuckle."

Modernism's second generation: 1930-1945

By 1930, Modernism had entered popular culture. With the increasing urbanization of populations, it was beginning to be looked to as the source for ideas to deal with the

challenges of the day. As Modernism gained traction in academia, it was developing a self-conscious theory of its own importance. Popular culture, which was not derived from high culture but instead from its own realities (particularly mass production), fueled much Modernist innovation. Modern ideas in art appeared in commercials and logos, the famous London Underground logo being an early example of the need for clear, easily recognizable and memorable visual symbols.

Another strong influence at this time was [Marxism](#). After the generally primitivistic/irrationalist aspect of pre-World-War-One Modernism, which for many Modernists precluded any attachment to merely political solutions, and the Neo-Classicism of the 1920s, as represented most famously by [T. S. Eliot](#) and Igor Stravinsky—which rejected popular solutions to modern problems—the rise of [Fascism](#), the Great Depression, and the march to war helped to radicalize a generation. The Russian Revolution was the catalyst to fuse political radicalism and utopianism with more expressly political stances. [Bertolt Brecht](#), [W. H. Auden](#), [Andre Breton](#), [Louis Aragon](#), and the philosophers Gramsci and Walter Benjamin are perhaps the most famous exemplars of this Modernist Marxism. This move to the radical left, however, was neither universal nor definitional, and there is no particular reason to associate Modernism, fundamentally, with 'the left'. Modernists explicitly of "the right" include [Wyndham Lewis](#), [William Butler Yeats](#), T. S. Eliot, [Ezra Pound](#), the Dutch author Menno ter Braak, and many others.

One of the most visible changes of this period is the adoption of objects of modern production into daily life. Electricity, the telephone, the automobile—and the need to work with them, repair them, and live with them—created the need for new forms of manners, and social life. The kind of disruptive moment which only a few knew in the 1880s became a common occurrence as telecommunications became increasingly ubiquitous. The speed of communication reserved for the stockbrokers of 1890 became part of family life.

Modernism in social organization would produce inquiries into sex and the basic bondings of the nuclear, rather than extended, family. The Freudian tensions of infantile sexuality and the raising of children became more intense, because people had fewer children, and therefore a more specific relationship with each child: the theoretical, again, became the practical and even popular. In the arts as well as popular culture sexuality lost its mooring to marriage and family and increasingly came to be regarded as a self-oriented biological imperative. Explicit depictions of sex in literature, theater, film, and other visual arts often denigrated traditional or religious conceptions of sex and the implicit relationship between sex and procreation.

Modernism's goals

Many modernists believed that by rejecting tradition they could discover radically new ways of making art. [Arnold Schoenberg](#) believed that by rejecting traditional tonal harmony, the hierarchical system of organizing works of music which had guided music-making for at least a century and a half, and perhaps longer, he had discovered a wholly new way of organizing sound, based on the use of 12-note rows. This led to what is known as serial music by the post-war period.

Abstract artists, taking as their examples from the Impressionists, as well as [Paul Cézanne](#) and [Edvard Munch](#), began with the assumption that [color](#) and [shape](#) formed the essential characteristics of art, not the depiction of the natural world. [Wassily Kandinsky](#), [Piet Mondrian](#), and [Kazimir Malevich](#) all believed in redefining art as the arrangement of pure

color. The use of photography, which had rendered much of the representational function of visual art obsolete, strongly affected this aspect of Modernism. However, these artists also believed that by rejecting the depiction of material objects they helped art move from a [materialist](#) to a spiritualist phase of development.

Other Modernists, especially those involved in design, had more pragmatic views. Modernist architects and designers believed that new [technology](#) rendered old styles of building obsolete. Le Corbusier thought that buildings should function as "[machines](#) for living in," analogous to [cars](#), which he saw as machines for traveling in. Just as cars had replaced the [horse](#), so Modernist design should reject the old styles and structures inherited from [Ancient Greece](#) or from the [Middle Ages](#). Following this machine aesthetic, Modernist designers typically reject decorative motifs in design, preferring to emphasize the materials used and pure geometrical forms. The [skyscraper](#), such as Ludwig Mies van der Rohe's Seagram Building in [New York](#) (1956–1958), became the archetypal Modernist building.

Modernist design of houses and furniture also typically emphasized simplicity and clarity of form, open-plan interiors, and the absence of clutter. Modernism reversed the nineteenth-century relationship of public and private: in the nineteenth century, public buildings were horizontally expansive for a variety of technical reasons, and private buildings emphasized verticality—to fit more private space on more and more limited land.

In other arts, such pragmatic considerations were less important. In literature and visual art, some Modernists sought to defy expectations mainly in order to make their art more vivid, or to force the audience to take the trouble to question their own preconceptions. This aspect of Modernism has often seemed a reaction to consumer culture, which developed in Europe and North America in the late-nineteenth century. Whereas most manufacturers try to make products that will be marketable by appealing to preferences and prejudices, High Modernists rejected such consumerist attitudes in order to undermine conventional thinking.

Many Modernists saw themselves as apolitical. Others, such as [T. S. Eliot](#), rejected mass popular culture from a conservative position. Indeed, one could argue that Modernism in literature and art functioned to sustain an [elite](#) culture which excluded the majority of the population.

Modernism's reception and controversy

The most controversial aspect of the Modern movement was, and remains, its rejection of tradition. Modernism's stress on freedom of expression, experimentation, radicalism, and primitivism disregards conventional expectations. In many art forms this often meant startling and alienating audiences with bizarre and unpredictable effects: the strange and disturbing combinations of motifs in [Surrealism](#), the use of extreme dissonance and [atonality](#) in Modernist music, and depictions of nonconventional sexuality in many media. In literature Modernism often involved the rejection of intelligible plots or characterization in novels, or the creation of poetry that defied clear interpretation.

The [Soviet Communist](#) government rejected Modernism after the rise of [Stalin](#) on the grounds of alleged elitism, although it had previously endorsed Futurism and [Constructivism](#); and the Nazi government in [Germany](#) deemed it narcissistic and nonsensical, as well as "Jewish" and "Negro." The Nazis exhibited Modernist paintings alongside works by the mentally ill in an exhibition entitled [Degenerate art](#).

Modernism flourished mainly in consumer/capitalist societies, despite the fact that its proponents often rejected consumerism itself. However, High Modernism began to merge with consumer culture after [World War II](#), especially during the 1960s. In [Britain](#), a youth sub-culture even called itself "moderns," though usually shortened to Mods, following such representative music groups as The Who and The Kinks. [Bob Dylan](#), [The Rolling Stones](#), and [Pink Floyd](#) combined popular musical traditions with Modernist verse, adopting literary devices derived from Eliot, Apollinaire, and others. [The Beatles](#) developed along similar lines, creating various Modernist musical effects on several albums, while musicians such as [Frank Zappa](#), Syd Barrett, and Captain Beefheart proved even more experimental. Modernist devices also started to appear in popular cinema, and later on in music videos. Modernist design also began to enter the mainstream of popular culture, as simplified and stylized forms became popular, often associated with dreams of a space age high-tech future.

This merging of consumer and high versions of Modernist culture led to a radical transformation of the meaning of "modernism." Firstly, it implied that a movement based on the rejection of tradition had become a tradition of its own. Secondly, it demonstrated that the distinction between elite Modernist and mass-consumerist culture had lost its precision. Some writers declared that Modernism had become so institutionalized that it was now "post avant-garde," indicating that it had lost its power as a revolutionary movement. Many have interpreted this transformation as the beginning of the phase that became known as [Post-Modernism](#). For others, such as, for example, art critic Robert Hughes, Post-Modernism represents an extension of Modernism.

"Anti-Modern" or "counter-Modern" movements seek to emphasize [holism](#), connection, and spirituality as being remedies or antidotes to Modernism. Such movements see Modernism as reductionist, and therefore subject to the failure to see systemic and emergent effects. Many Modernists came to this viewpoint; for example, [Paul Hindemith](#) in his late turn towards mysticism. Writers such as Paul H. Ray and Sherry Ruth Anderson, in *The Cultural Creatives*, Fredrick Turner in *A Culture of Hope*, and Lester Brown in *Plan B*, have articulated a critique of the basic idea of Modernism itself—that individual creative expression should conform to the realities of technology. Instead, they argue, individual creativity should make everyday life more emotionally acceptable.

In some fields, the effects of Modernism have remained stronger and more persistent than in others. Visual art has made the most complete break with its past. Most major capital cities have museums devoted to 'Modern Art' as distinct from post-[Renaissance](#) art (*circa* 1400 to *circa* 1900). Examples include the [Museum of Modern Art](#) in [New York](#), the Tate Modern in [London](#), and the Centre Pompidou in [Paris](#). These galleries make no distinction between Modernist and Post-Modernist phases, seeing both as developments within 'Modern Art.'

Analysis of the Results of the Modern Era

We'll analyze in the following pages the most/more/significant modern literature/art/music according to the origins of those cultures. We'll start with the analysis of the literatures and take into consideration factors of quality, quantity and innovation in rating those cultures.

French Literature : 100 very prominent authors such as: Marcel Proust, Andre Gide (Nobel 1947), Joseph Kessel, Tristan Tzara, Andre Breton, Marcel Pagnol, Paul Eluard, Jean Cocteau, Georges Bernanos, Sait-John Perse (Nobel 1960), Blaise Cendrars, Roland Dorgeles, Francis Carco, Pierre Benoit, Alain-Fournier, Jules Romains, Andre Maurois, Francois Mauriac (Nobel 1952), Sacha Guitry, Georges Duhamel, Jean Giraudoux, Roger Martin du Gard (Nobel 1937), Leon Werth, Guillaume Apollinaire, Jacques Bainville, Max Jacob, Charles Peguy, Claude Simon (Nobel 1985), Louis Artus, Pierre Louys, Paul Valery, Henry Bataille, Paul Fort, Henri Barbusse, Colette, Emile Guillaumin, Paul Claudel, Francis James, Gaston Leroux, Charles Maurras, Hector Malot, Victorien Sardou, Francois Coppee, Octave Mirbeau, Paul Bourget, Rene Bazin, Emile Verhaeren, Jean Moreas, Jules Lemaitre, Gustave Kahn, Henri Bergson (Nobel 1927), Michel Zevaco, Paul Roux, Paul Adam, Maurice Barres, Maurice Leblanc, Jules Renard, Tristan Bernard, Romain Rolland (Nobel 1915), Marcel Schwob, Alain, Andre Malraux, Albert Cohen, Jean-Paul Sartre (Nobel 1964), Henry de Montherlant, Elsa Triolet, Louis Aragon, Marcel Achard, Armand Salacrou, Antoine de Saint-Exupery, Jacques Prevert, Julien Green, Nathalie Sarraute, Marcel Ayme, Louise de Vilmorin, Vercors, Raymond Queneau, Raymond Radiguet, Robert Desnos, Georges Simenon, Marguerite Yourcenar, Raymond Aron, Samuel Beckett (Nobel Ireland 1969), Claude Levi-Strauss, Jean Anouilh, Jean Giono, Henri Troyat, Edmond Jabes, Albert Camus (Nobel 1957), Romain Gary, Simone de Beauvoir, Maurice Dekobra, Eugene Sue, Pierre Loti, Pierre Souvestre, Marcel Allain. 50 authors underlined, & this is just a partial indicative list...

English Literature : The authors in English (American, British and Irish) in the years 1900-1939 – the last 40 years of the twelfty 1820-1939 reviewed in this book, in this list are the 70 very prominent authors such as: Joseph Conrad, George Bernard Shaw (Nobel Ireland 1925), William Butler Yeats (Nobel Ireland 1923), Edward Thomas, Wilfred Owen, Isaac Rosenberg, Siegfried Sassoon, Sean O'Casey, H.G. Wells, John Galsworthy (Nobel 1932), E.M. Forster, Walter de la Mare, T.S. Eliot (Nobel UK 1948), Dorothy Richardson, D.H. Lawrence, James Joyce, Virginia Woolf, David Jones, James Hanley, Harold Heslop, Aldous Huxley, John Cowper Powys, Graham Greene, W.H. Auden, Stephen Crane, Theodore Dreiser, Upton Sinclair, Sinclair Lewis (Nobel US 1930), Edwin Markham, William Vaughn Moody, Henry Adams, Pauline Hopkins, Sir Winston Churchill (Nobel UK 1953), Maria Cristina Mera, Gertrude Stein, Ezra Pound, Patrick White (Nobel Australia 1971), F. Scott Fitzgerald, Ernest Hemingway (Nobel US 1954), Sherwood Anderson, William Faulkner (Nobel US 1949), John Dos Passos, Tennessee Williams, Arthur Miller, John Steinbeck (Nobel 1962), William Saroyan, Pearl S. Buck (Nobel US 1938), Nathanael West, James Agee, Henry Miller, Margaret Mitchell, Eugene O'Neill (Nobel US 1936), Arthur Conan Doyle, James Hadley Chase, Raymond Chandler, Agatha Christie, Ayn Rand, W. Somerset Maugham, Dylan Thomas, Clifford Odets, Robert Frost, Noel Coward, Arthur Koestler, Isaac Asimov, A. J. Cronin, Bertrand Russell (Nobel UK 1950), Rudyard Kipling (Nobel UK 1907), Anais Nin, Lawrence Durrell, Howard Fast, 31 of them are underlined.

German Literature: The 20 prominent authors who wrote in German (German, Austrian, Swiss, Czech...) in the years 1900-1939 – the last 40 years of the twelfty 1820-1939 reviewed in this book, are: Franz Kafka (Czech), Thomas Mann (Nobel Germany 1929), Bertolt Brecht, Heinrich Mann, Sigmund Freud (Austria), Hans Fallada, Stefan Zweig (Austria), Hannah Arendt, Franz Werfel (Austrian), Arthur Schnitzler (Austrian), Robert Musil (Austrian), Rainer Maria Rilke (Austrian), Erich Maria Remarque, Erich Kaestner, Lion Feuchtwanger, Herman Hesse (Nobel Switzerland 1946), Vicky Baum (Austrian), Hans Habe (lived in Hungary, Austria, France, Switzerland & the US), Max Frisch (Swiss), Elias Canetti (born in Bulgaria, lived also in Germany, Austria, UK & Switzerland, Nobel 1981).

To them we can add 29 more prominent authors: Georg Trakl, Werner Bergengruen, Ricarda Huch, Walter von Molo, Friedrich Reck-Malleczewen, Carl von Ossietzky was awarded the Peace Nobel Prize in 1935, Georg Heym, Ernst Juenger, Frank Thiess, Georg Kaiser, Paul Scheerbart, Reinhard Sorge, Walter Hasenclever, Arnolt Bronnen, Jakob van Hoddis, Gottfried Benn, Christa Winsloe, Klaus Mann, Alfred Doeblin, Ernst Toller, August Stramm, Anna Elizabet Weirauch, Erich Ebermayer, Herbert Marcuse, Gertrud Fussenegger, Else Lasker-Schueler, Ernst Wiechert, Reinhold Schneider, Hans Blueher, and other prominent authors from the “Exil Literatur”, who fled Germany, mentioned earlier in this book. Altogether there are 18 underlined authors, much less than the French & the English authors.

Spanish Literature: The best 31 Spanish authors in 1900-1939 are: Emilia Pardo Bazan, Vicente Blasco Ibanez, Jose Echegaray (Nobel Spain 1904), Juan Ramon Jimenez (Nobel Spain 1956), Jacinto Benavente y Martínez (Nobel Spain 1922), Pio Baroja, Ramon del Valle-Inclan, Jose Martinez Ruiz, Antonio Machado, Ramiro de Maeztu, Jose Ortega Y Gasset, Ramon Menendez Pidal, Manuel Azana, Eugeni d’Ors, Gabriel Miro, Ramon Perez de Ayala, Ramon Gomez de la Serna, Federico Garcia Lorca, Pedro Salinas, Jorge Guillen, Miguel Hernandez, Vicente Aleixandre (Nobel Spain 1977), Damasco Alonso, Manuel Altolaguirre, Benjamin Jarnes, Rosa Chacel, Fransisco Ayala, Octavio Paz (Nobel Mexico 1990), Salvador de Madariaga, Armando Palacio Valdez, and Jacinto Grau. However, in those years there were 10 excellent Latin American authors as well: Miguel Angel Asturias (Nobel Guatemala 1967), Jorge Luis Borges (Argentina), Roberto Arlt (Argentina), Jose Maria Arguedas (Peru), Delmira Agustini (Uruguay), Romulo Gallegos (Venezuela), Alejo Carpentier (Cuba), Mariano Azuela (Mexico), Pablo Neruda (Nobel Chile 1971), Gabriela Mistral (Nobel Chile 1945). To those we add Narcis Oller who wrote in Catalan, altogether 42, 12 are underlined.

Russian Literature: The 48 best authors in 1900-1939 were: Alexander Blok, Sergei Yesenin, Mikhail Kuzmin, Ygor Severyanin, Sasha Chorny, Nikolai Gumilyov, Maximilian Voloshin, Innokenty Annensky, Zinaida Gippius, Anna Akhmatova, Marina Tsvetaeva, Osyp Mandelstam, Boris Pasternak (Nobel 1958), Velimir Khlebnikov, David Burliuk, Aleksei Kruchenykh, Vladimir Mayakovsky, Alexandr Kuprin, Ivan Bunin (Nobel 1933), Leonid Andreyev, Fyodor Sologub, Aleksey Remizov, Yevgeny Zamyatin, Dmitry Merzhkovsky, Andrei Bely, Maxim Gorky, Alexander Fadeyev, Nikolai Ostrovsky, Daniil Kharms, Isaac Babel, Konstantin Vaginov, Mikhail Bulgakov, Alexander Vvedensky, Nikolay Zabolotsky, Yury Olesha, Andrei Platonov, Mikhail Zoshchenko, Viktor Shklovsky, Yuri Tynyanov, Georgy Ivanov, Vyacheslav Ivanov, Mark Aldanov, Gaito Gazdanov, Vladimir Nabokov, Vasily Grossman, Nikolai Bukharin, Mikhail Sholokhov (Nobel 1965), Alexandr Isayevich Solzhenitsyn (Nobel 1970). 4 Russian authors received Nobel Prizes, 7 writers are underlined.

Italian Literature: 25 authors, 7 are underlined: Italo Svevo, Luigi Pirandello (Nobel 1934), Federico Tozzi, Grazia Deledda (Nobel 1926), Sibilla Aleramo, Maria Messina, Alberto Moravia, Albade Cespedes, Filippo Marinetti, Salvatore Quasimodo (Nobel 1959), Giuseppe Ungareto, Umberto Saba, Eugenio Montale (Nobel 1975), Cesare Pavese, Corrado Alvaro, Elio Vittorini, Dino Buzzati, Curzio Malaparte, Carlo Emilio Gadda, Guido Gozzano, Sergio Corazzini, Corrado Govoni, Antonio Baldini, Massimo Bontempelli, Elsa Morante.

The most significant literature in the Modern Period is therefore the French literature, the more significant literature is the English literature, the significant literature is the German literature. Right after, are the Spanish, Russian and Italian literatures.

Rating of the art in the Modern period:

French Art: Georges Rouault (1871–1958), painter, Léon Printemps (1871–1945), painter, František Kupka (1871–1957) (Czech, worked in France), painter, Henri-Charles Manguin (1874–1943), painter, Louis Mathieu Verdilhan (1875–1928), painter, Albert Marquet (1875–1947), painter, Jacques Villon (1875–1963), painter, Constantin Brâncuși (1876–1957) (French, born in Romania), sculptor, Maurice de Vlaminck (1876–1958) (Flemish, worked in France), painter, Raymond Duchamp-Villon (1876–1918), sculptor, Raoul Dufy (1877–1953), painter, Jeanne Baudot (1877–1957), painter, Jean Crotti (1878–1958) (Swiss), painter, Louis Marcoussis (Louis Markus) (1878–1941 or 1883–1941) (Polish, worked in France), painter, Francis Picabia (1879–1953), painter, André Derain (1880–1954), painter, Joseph Hémard (1880–1961), illustrator, Pablo Picasso (1881–1973), born in Spain, Albert Gleizes (1881–1952), painter, writer, theorist, Henri Le Fauconnier (1881–1946), painter, Jacob Macznik (1905–1945), painter, Fernand Léger (1881–1955), painter, Georges Braque (1882–1963), painter, Auguste Chabaud (1882–1955), painter, Auguste Herbin (1882–1960), painter, Jean Metzinger (1883–1956), painter, engraver, poet, writer, theorist, Marie Laurencin (1883–1956), painter, Maurice Utrillo (1883–1955), painter, Georges Ribemont-Dessaignes (1884–1974), painter, Jacques Maroger (1884–1962), painter, Amedeo Modigliani (1884–1920), painter, born in Italy, painter, André Dunoyer de Segonzac (1884–1974), painter, Raymond Wintz (1884–1956), painter, Robert Delaunay (1885–1941), Pierre Brissaud (1885–1964), painter, Roger de La Fresnaye (1885–1925), painter, Robert Antoine Pinchon (1886–1943), Amédée Ozenfant (1886–1956), painter, Jean (Hans) Arp (1886–1966), painter, sculptor, Marc Chagall (1887–1985) (born in Belarus), painter, Marcel Duchamp (1887–1968), painter, sculptor, other media, Juan Gris (1887–1927), born in Spain, painter, Suzanne Duchamp-Crotti (1889–1963), painter, Ossip Zadkine (1890–1967) (Russian born), sculptor, Jacques Lipchitz (1891–1973) (born in Lithuania), sculptor, Max Ernst (1891–1976) (German born), painter, sculptor, Louis Favre (1892–1956), painter, creator of lithographs, Bram van Velde (1892–1981) (Dutch, worked in France), painter, Chaïm Soutine (1894–1943) (born in Belarus), painter, Jacques Henri Lartigue (1894–1986), photographer, Jean Maurice Rothschild (1902–1998), furniture artist, interior designer, muralist, Gen Paul (1895–1975), painter, engraver, Albert Gilles (1895–1979), metal embosser, working with copper, André Masson (1896–1987), painter, René Iché (1897–1954), sculptor, painter, Jean Fautrier (1898–1964), painter, Georges Gimel (1898–1962), painter, engraver, sculptor, Henri Michaux (1899–1984) (Belgian), painter, Brassai (Gyula Halasz) (1899–1984) (born in Hungary), photographer, Yves Tanguy (1900–1955), painter. 25 artists underlined and bold.

English/American Art: English: Walter Sickert (1860–1942), Philip Wilson Steer (1860–1942), Paul Nash (1889–1946), Henry Tonks (1862–1937), Harold Gilman (1876–1919), Spencer Gore (1878–1914), David Bomberg (1890–1957), Stanley Spencer (1891–1959), Mark Gertler (1891–1939), Wyndham Lewis (1882–1957), Henry Moore (1898–1986), Barbara Hepworth (1903–1975), L. S. Lowry (1887–1976). American: Robert Henri, Everett Shinn, George Benjamin Luks, William Glackens, John Sloan, John Marin, Marsden Hartley, Alfred Henry Maurer, Arthur B. Carles, Arthur Dove, Henrietta Shore, Stuart Davis, Wilhelmina Weber, Stanton MacDonald-Wright, Morgan Russell, Patrick Henry Bruce, Andrew Dasburg, Georgia O'Keeffe, Gerald Murphy, Grant Wood, Reginald Marsh, Guy Pène du Bois, Charles Sheeler, Charles Demuth, Ralston Crawford, Edward Hopper, Walter Ufer, Bert Geer Phillips, E. Irving Couse, William Henry Jackson, Marsden Hartley, Andrew Dasburg, Romare Bearden, Jacob Lawrence, Charles Alston, Augusta

Savage, Archibald Motley, Lois Mailou Jones, Palmer Hayden, Sargent Johnson, Thomas Hart Benton, John Steuart Curry, Grant Wood, Maxine Albro, Ben Shahn, Joseph Stella, Reginald Marsh, Isaac Soyer, Raphael Soyer, Spencer Baird Nichols and Jack Levine, Milton Avery, Joseph Cornell. 10 artists are underlined.

German/Austrian Art: German: Fritz Bleyl (1880–1966), Erich Heckel (1883–1970), Ernst Ludwig Kirchner (1880–1938), Karl Schmidt-Rottluff (1884–1976), Max Pechstein, Emil Nolde (1867–1956), Franz Marc, August Macke, Alexej von Jawlensky, Marianne von Werefkin, George Grosz, Otto Dix, Max Beckmann, Kurt Schwitters, Hannah Höch, Paul Klee, Lyonel Feininger, Christian Schad, Rudolf Schlichter, Georg Scholz, Elfriede Lohse-Wächtler, Karl Hubbuch, Anton Räderscheidt, Georg Schrimpf, Alexander Kanoldt, Carl Grossberg. Austrian: Gustav Klimt, Carl Moll, Koloman Moser, Ernst Stöhr, Max Kurzweil, Otto Wagner, Egon Schiele, Oskar Kokoschka. 18 artists underlined and bold.

Spanish/Latin American Art: Spain: Salvador Dalí, Joan Miró, Ignacio Zuloaga, José Gutiérrez Solana, Julio González, Pablo Gargallo. Latin America: Joaquín Torres García, Manuel Rendón, Diego Rivera, David Alfaro Siqueiros, José Clemente Orozco, Rufino Tamayo, José Venturelli, Pedro Nel Gómez, Santiago Martínez Delgado, Gabriel Bracho, José Vela Zanetti, Oswaldo Guayasamín, Frida Kahlo. 6 underlined and bold artists.

Russian Art: El Lissitzky, Kazimir Malevich, Wassily Kandinsky, Vladimir Tatlin, Alexander Rodchenko, Pavel Filonov, Aleksandra Ekster, David Burliuk, Alexander Archipenko. 4 artists bold and underlined, and of course March Chagall who lived in France.

Italian Art: Giorgio de Chirico, Giacomo Manzù, Marino Marini, Lucio Fontana, Umberto Boccioni, Carlo Carrà, Luigi Russolo, Giacomo Balla, Gino Severini, Anselmo Bucci, Leonardo Dudreville, Achille Funi, Gian Emilio Malerba, Piero Marussig, Ubaldo Oppi, Mario Sironi and the art critic Margherita Sarfatti. 5 artists bold and underlined.

French Art in the modern period, where Paris was the center of modern art, is the most significant, German/Austrian art is the more significant modern art, Spanish/Latin American art is the significant art because of its innovation, followed by English/American Art, Russian Art and Italian Art. All of them are important arts.

Rating of the classical music in the modern period of 1900-1939:

French Music: Claude Debussy, Maurice Ravel, Albert Roussel, Joseph Canteloube, Darius Milhaud, Francis Poulenc, Olivier Messiaen, Paul Dukas. 5 underlined composers.

English/American Music: Frederick Delliuss, Scott Joplin, Ralph Vaughan Williams, Gustav Holst, Charles Ives, Ernest Bloch, George Gershwin, Aaron Copland, William Walton, Leroy Anderson, Samuel Barber. 10 underlined composers.

German/Austrian Music: Richard Strauss, Arnold Schoenberg, Anton Webern, Max Reger, Fritz Kreisler, Robert Stolz, Alban Berg, Arthur Honegger, Paul Hindemith, Carl Orff, Erich Wolfgang Korngold, Kurt Weill. 9 underlined composers.

Spanish/Latin American Music: Manuel de Falla, Joaquin Rodrigo, Joaquin Turina, Ernesto Lecuona. 4 underlined composers.

Russian Music: Alexander Glazunov, Igor Stravinsky, Alexander Scriabin, Sergei Prokofiev, Dmitri Shostakovich. 5 underlined composers.

Italian Music: Ferruccio Busoni, Ernesto de Curtis, Ottorino Respighi, Mario Castelnuovo-Tedesco. 3 underlined composers.

English/American music is the most significant music in the modern period, German/Austrian music is the more significant music, Russian music is the significant music. Followed by French music, Spanish music and Italian music.

Analysis of the Results of the Total Period of 1820-1939

The rating of the cultures is according to their achievements: the most significant are rated 1, the more significant are rated 2, the significant are rated 3, followed by 4, 5, and 6. Therefore, the lower is the total – the better is the result. We'll figure the ratings for all the categories. French culture is predominantly from France in French, English culture is predominantly from the UK, US and Ireland in English, German is predominantly from Germany, Austria and Switzerland in German, Spanish is predominantly from Spain and Latin America in Spanish, Russian is predominantly from Russia in Russian, Italian is predominantly from Italy in Italian. Ratings for other cultures/languages were given above only about Literature.

LITERATURE

CULTURES	ROMANTIC	REALISM	MODERN	TOTAL
French	1(1)	1(1)	1(1)	3(1)
English	2(1)	2(1)	2(1)	6(2)
German	3(1)	4(3)	3(1)	10(3)
Spanish	6(2)	6(2)	4(1)	16(5)
Russian	4(2)	3(1)	5(3)	12(4)
Italian	5(1)	5(1)	6(3)	16(5)

French is the most significant literature in the Romantic era, English is the more significant literature, German is the significant literature, followed by Russian, Italian & finally Spanish.

French is the most significant literature in the Realism era, English is the more significant literature, Russian is the significant literature, followed by German, Italian & finally Spanish.

French is the most significant literature in the Modern era, English is the more significant literature, German is the significant literature, followed by Spanish, Russian and Italian.

French is the most significant literature in the whole period of 1820-1939, English is the more significant literature, German is the significant literature, followed by Russian and then with the same ranking: Spanish and Italian.

French literature was the most significant, with the best rating, in all the 3 eras – Romantic, Realism, Modern. English literature was the more significant in all the 3 eras – Romantic, Realism, Modern. German literature was the most significant among the 3 eras of German literature in the Modern era and equally in the Romantic era. German literature was significant in the Realism era. Spanish literature was the most significant among the 3 eras of Spanish literature in the Modern era, followed equally by the Romantic and Realism eras with the more significant literatures. Russian literature was the most significant in the Realism era, was the more significant in the Romantic era, and significant in the Modern era. Italian literature was the most significant literature equally in the Romantic and Realism eras, followed by the significant literature in the Modern era, among Italian literatures in the eras.

ART

CULTURES	ROMANTIC	REALISM	MODERN	TOTAL
French	1(1)	1(1)	1(1)	3(1)
English	3(2)	2(1)	4(3)	9(2)
German	5(3)	4(2)	2(1)	11(4)
Spanish	2(1)	5(3)	3(2)	10(3)
Russian	4(2)	3(1)	5(3)	12(5)
Italian	6(1)	6(1)	6(1)	18(6)

French is the most significant art in the Romantic era. Spanish is the more significant art, English is the significant art, followed by Russian, German & Italian art in the Romantic era.

French is the most significant art in the Realism era. English is the more significant art, Russian is the significant art, followed by German, Spanish & Italian art in the Realism era.

French is the most significant art in the Modern era. German is the more significant art, Spanish is the significant art, followed by English, Russian and Italian art in the Modern era.

French is the most significant art in the whole period of 1820 to 1939. English is the more significant art. Spanish is the significant art, followed by German, Russian & Italian art.

French art is the most significant art, with best rating, in the 3 eras of French art – Romantic, Realism & Modern. English Realism is the most significant art of the 3 eras in English art, the more significant art is in the Romantic era, and the significant art is in the Modern era. German Modern is the most significant art of the 3 eras in German art, the more significant art is in the Realism era, and the significant art is in the Romantic era. Spanish Romantic art is the most significant art of the 3 eras in Spanish art, Modernism art is the more significant, Realism art is the significant art. Russian Realism art is the most significant art of the 3 eras in Russian art, Romantic art is the more significant, Modern art is the significant art. Italian art is the most significant art in the 3 eras of Italian art – Romantic, Realism & Modern.

MUSIC

CULTURES	ROMANTIC	REALISM	MODERN	TOTAL
French	3(2)	2(1)	4(3)	9(2)
English	6(3)	5(2)	1(1)	12(5)

German	1(1)	3(3)	2(2)	6(1)
Spanish	5(2)	4(1)	5(2)	14(6)
Russian	2(1)	6(3)	3(2)	11(3)
Italian	4(2)	1(1)	6(3)	11(3)

German is the most significant music in the Romantic era, Russian is the more significant music, French is the significant music, then come Italian, Spanish & English Romantic music.

Italian is the most significant music in the Realism era, French is the more significant music, German is the significant music, followed by Spanish, English & Russian Realism music.

English is the most significant music in the Modern era. German is the more significant music. Russian is the significant music, followed by French, Spanish & Italian Modern music.

German is the most significant music in the whole period of 1820-1939, French is the more significant music, Italian and Russian are the significant music, followed by English & Italian.

French Realism music is the most significant music in the 3 eras of French music – Romantic, Realism & Modern. French Romantic music is the more significant music, French Modern music is the significant music. English Modern music is the most significant music in the 3 eras of English music, English Realism is the more significant music. English Romantic is the significant music. German Romantic music is the most significant music in the 3 eras of German music, German Modern music is the more significant music, German Realism music is the significant music. Spanish Realism music is the most significant music in the 3 eras of Spanish music. Spanish Romantic and Modern music are the more significant music. Russian Romantic music is the most significant music in the 3 eras of Russian music. Russian Modern music is the more significant music. Russian Realism music is the significant music. Italian Realism music is the most significant music in the 3 eras of Italian music. Italian Romantic music is the more significant music. Italian Modern music is the significant music.

CULTURE (LITERATURE+ART+MUSIC) IN PERIOD 1820-1939 BY ERAS

CULTURES	ROMANTIC	REALISM	MODERN	TOTAL
French	5(2)	4(1)	6(3)	15(1)
English	11(3)	9(2)	7(1)	27(2)
German	9(2)	11(3)	7(1)	27(2)
Spanish	13(2)	15(3)	12(1)	40(5)
Russian	10(1)	12(2)	13(3)	35(4)
Italian	15(2)	12(1)	18(3)	45(6)

French is by far the most significant culture in the Romantic era, twice as much as the next one. German is the more significant culture in the Romantic era. Russian is the significant culture in the Romantic era. Followed by the English, Spanish and Italian Romantic cultures.

French is by far the most significant culture in the Realism era, twice as much as the next one. English is the more significant culture in the Realism era. German is the significant culture in the Realism era. Russian and Italian come together next, and finally the Spanish culture.

French is the most significant culture in the Modern era. Right after the English and German cultures are the more significant. But those three are twice as much cultural than the Spanish culture in the 4th place, followed closely by Russian, and one third less by Italian culture.

In the whole period of 1820-1939 the French culture is by far the most significant culture, twice as much as the more significant cultures at the same ranking – English and German. Russian culture is in the fourth place, followed by Spanish and finally by Italian culture.

Once again – those results are just indicative, based on my judgement and research, and not “scientific”, as nobody can rate cultures by quantity or quality. Nevertheless, I have tried humbly to find common denominators to culture, but of course Literature, Art and Music are only a part of the culture of those countries, I have compared only 6 cultures, not even all or most of the European cultures (I have done it only with Literature), but this survey is a good indication on a relative comparison of the main cultures of Europe in Literature, Art & Music.

CULTURE IN THE PERIOD 1820-1939 BY LITERATURE, ART, MUSIC

CULTURES	LITERATURE	ART	MUSIC	TOTAL
French	3(1)	3(1)	9(3)	15(1)
English	6(1)	9(2)	12(3)	27(2)
German	10(2)	11(3)	6(1)	27(2)
Spanish	16(3)	10(1)	14(2)	40(5)
Russian	12(2)	12(2)	11(1)	35(4)
Italian	16(2)	18(3)	11(1)	45(6)

French is by far the most significant literature in the period 1820-1939, twice better than the more significant literature – English, which is 40% better than the significant literature – German. In the 4th place is the Russian literature, and finally together – Spanish & Italian. Just to get an idea of the relative positioning of the literatures. The French literature is 3 times better than the German, 4 times better than Russian, and 5 times better than Spanish & Italian.

French is by far the most significant art in the period 1820-1939, 3 times better than the more significant art – English. Followed closely by the significant art – Spanish. And right after – German art, followed closely by Russian art, and far below, one third, is the Italian art. French art is 3.5-4 better than the Spanish, German & Russian art, and 6 times better than Italian art.

German music is the most significant music in the period 1820-1939, one third better than the more significant music – French. The significant music is at the same ranking – Russian and Italian. Followed in the 5th place by English music and finally by Spanish music.

In the whole period of 1820-1939 the French culture is by far the most significant culture, twice as much as the more significant cultures at the same ranking – English and German. Russian culture is in the fourth place, followed by Spanish and finally by Italian culture.

French Literature and Art are both by far the most significant, 3 times more, as compared to French Music, which is the significant French culture. The French excel especially in Literature and Art. English Literature is the most significant culture, as compared to the more significant segment culture – English Art, and the significant culture – English Music. The English excel most in Literature, as compared to Art and Music. German Music is by far the

most significant culture, as compared to the more significant German Literature, and the significant German Art. German Music excel especially as compared to Literature and Art. Spanish Art is the most significant, Spanish Music is the more significant, Spanish Literature is the significant, Spanish Art excels relatively to the other segments of Spanish culture. Russian Music is the most significant of the Russian segments of culture, but followed immediately by the more significant Russian Literature and Art in the same ranking.

Basically, Russian 3 segments of culture are at the same level of excellence, in the 4th place, compared to the other European cultures. Italian Music is the most significant segment of culture, by far better than the more significant Italian Literature, followed by the significant Italian Art. Italian Art was by far the best Art in the Renaissance period and even subsequently, you can't win them all... German were the best in Music at least since Bach, Spanish excelled relatively in Art, Russian were good in the last couple of centuries, English Literature was always very good since Shakespeare, followed by Art, especially English Art in the 19th century and American Art in the 20th century. English music was not the best, but improved drastically, especially American Music in the Modern era. The French were always excellent, in Literature from the classics Moliere, Racine and Corneille to Balzac, Hugo and Zola in the 19th century, and in Modern times – Sartre, Proust and Camus. They excelled also in Art since the 18th century, but especially in the 19th and early 20th century, becoming the world capital of Art. In Music they excelled relatively less, but were still second best, right after the Germans, and slightly better than the Italian and Russian. Overall, French culture is by far the best culture, at least in the period 1820-1939, in Literature, Art and Music, but they also excelled in most of the other aspects of culture at least until 1939 – innovation, science, technology, philosophy, social sciences, democracy, medicine, theater, cinema, fashion, etc.

THOUGHTS & QUOTES ON 12 LITERATURES

THOUGHTS & QUOTES ON LITERATURE IN ENGLISH

Most of the works surveyed in this chapter were written in the twelfth of 1820-1939, except Shakespeare's dilemmas in *The Merchant of Venice* and *Julius Caesar*, that are actual forever:

In 1962, one of the youngest students at the Hebrew University of Jerusalem - not yet 18, I read almost all the plays by Shakespeare bought with my meager budget, while my student friends went to parties and had fun. Other Economics students' friends - the nerds - learned Economics day and night receiving the highest grades, but I preferred to attend classes in the humanities – English Poetry and Shakespeare Plays (*Richard the Second*), Comedies (Aristophanes, Gogol and Moliere), Art (Italian Renaissance), Philosophy (Logics), Spanish (Cervantes), German (Goethe), and reading one by one all the classics of world literature according to a detailed list.

I like all American and English literature, modern and classic, medieval and romantic: Virginia Woolf and Jane Austen, George Eliot and Henry James. Scott Fitzgerald's *The Great Gatsby* is probably the best modern novel, and an integral part of Cory's courses on business ethics. I enjoy most reading Lawrence (I couldn't stop reading *Sons and Lovers* and *Women in Love*, not counting *Lady Chatterley's Lover* that was one of the first books read as a teenager), Hemingway (*A Farewell to Arms* and *For Whom the Bell Tolls* are my favorites), Sinclair Lewis (*Babbitt* and *Main Street* were a revelation). I enjoy reading John Dos Passos (*The 42nd Parallel*), but also Charles Dickens, and good best sellers as Tai Pan, *Exodus*, *Advice and Consent*, etc. See also a chapter describing the ethical dilemmas of *All My Sons* with the English Text in Plays.

We cannot discuss English literature without referring to Shakespeare, who is one of my favorite playwrights. At the age of 18 when most of my friends dated girls I spent my nights as a true intellectual nerd reading almost all the plays by Shakespeare and attending courses on his plays and English poetry at the University of Jerusalem. We bring here from one of my favorite plays [Julius Caesar](#), the [most dramatic](#) scene [where Brutus](#) which [I like most](#) and [have read](#) also a [biography on](#) him, [explains why](#) he, Cassius, and others made a revolution against Julius Caesar.

(Brutus) "If then that friend demand why Brutus rose against Caesar,
This is my answer: Not that I loved Caesar less, but that I loved Rome more.
Had you rather Caesar were living, and die all slaves,
Than that Caesar were dead, to live all free men?
As Caesar loved me, I weep for him;
As he was fortunate, I rejoice at it;
As he was valiant, I honour him;
But, as he was ambitious, I slew him.
There is tears for his love; joy for his fortune;
Honour for his valour; and death for his ambition.
Who is here so base that would be a bondman?"

If any, speak; for him I have offended.”
(Shakespeare, Julius Caesar, Act III, Scene II, p.834)

I deal at length in this book about anti-Semitism and I chose to teach [The Merchant of Venice](#) in most of my business ethics courses. Many say that the play and Shakespeare were anti-Semitic, but I think the opposite, they relate to anti-Semitism and those who truly understand the play perceive Shylock as the true hero of the play, while most of the others are the true rascals. One of the best known cases that illustrates anti-Semitism is the controversial case of Shylock, the Jew of Venice, who insisted on preferring justice over mercy, by getting the pound of flesh that he asked for as a collateral. This is the case of an individual who feels persecuted by the community and wants to avenge himself. This is the case of a person who knows that if he is satisfied in the short term he is going to lose in the long term. This is the case of the businessman who has his own truth, which is opposed to the [loyalty that](#) he owes to the Duke of Venice. And Shylock exposes his point of view in the well-known dialogue with Salarino, that has become a 'classic':

“I am a Jew. Hath not a Jew eyes? hath not a Jew hands, organs, dimensions, senses, affections, passions? fed with the same food, hurt with the same weapons, subject to the same diseases, healed by the same means, warmed and cooled by the same winter and summer, as a Christian is? If you prick us, do we not bleed? if you tickle us do we not laugh? if you poison us, do we not die? and if you wrong us, shall we not revenge?”

(Shakespeare, The Merchant of Venice, Act III, Scene I, p. 203-4)

Shakespeare's plays are the most sophisticated plays as they raise fundamental issues about the conduct of men and women, not giving always answers, letting the reader or viewer to decide by himself what is the right answer, creating protagonists who are multi faceted and not black and white as in most of the melodramas. I have analyzed at length the Merchant of Venice in my courses and books and I bring here some of my thoughts on the play which I share with my readers. The play conveys the dilemma between law and ethics, what is more important? Obedience to an immoral law: slavery laws, racial discrimination, apartheid, totalitarian laws - communist, Nazi, aristocratic laws of Louis XVI, French occupation laws in 1940, British laws in the American colonies prior to the revolution, etc. It raises the issues: Is The Merchant of Venice an anti-Semitic play? Can it be played by geniuses like Laurence Olivier who shows Shylock as a tragic hero, similar to Oedipus, more aristocratic than the Duke of Venice, Antonio and Bassanio? Does the play still perpetuate the pejorative ideas about Jews in business?

Bassanio, a young Venetian and close friend to Antonio, the Merchant of Venice, needs money in order to woo a beautiful and wealthy heiress Portia. Antonio wants to give him 3,000 ducats but cannot do it as all of his ships are tied at sea. They approach Shylock, a moneylender Jew, for a loan. Shylock hates Antonio because he lends money without interests thus ruining his business, he mocks and despises him and spat on him, but he proposes that if Antonio is unable to repay the loan at the specified date he can take a pound of Antonio's flesh from wherever he pleases. Antonio is surprised by the generosity of Shylock and signs the agreement. Bassanio succeeds to woo Portia, but Antonio's ships are reported lost at sea. As he is unable to repay the loan, Shylock asks at the court of the Duke of Venice to exercise the bond. Bassanio, married to the rich Portia, offers Shylock 6,000 ducats but he refuses and asks for justice. The Duke refers the case to Balthazar (the disguised Portia), supposedly a young doctor of the law. Portia asks Shylock to show Christian mercy

but he still refuses. At the moment that Shylock is about to cut Antonio with his knife, Portia points out a flaw in the contract - the bond only allows Shylock to remove the flesh, not blood of Antonio. If Shylock were to shed Christian blood, his lands and goods will be forfeited under Venetian laws. The Duke pardons Shylock's life, who is forced to convert to Christianity, half of his wealth is given to the government and half of it is to be bequeathed to Jessica, Shylock's daughter who ran away and married a Christian - Lorenzo.

The main dilemmas of the play: Are Bassanio and Antonio more ethical than Shylock? Are their motives to take the loan ethical? The "close" connection between the motives of the protagonists of the play and the invisible hand of Adam Smith. Is the economy driven uniquely by rational forces, or by sentiments? Sentimental motives in the business world: hate, envy, racism, love, compassion, friendship. The pound of flesh as a parable of deals that you shouldn't do in any case: transactions with doubtful people, with the Mafia, with people you don't trust, with unethical people... Did Antonio take all the necessary precautions before taking the loan? Unnecessary risks, "it won't happen to me!", unfounded overconfidence? What kind of businessman is Shylock: sensible, balanced, wants to liquidate competition (Antonio), racist, tragic, comic, lunatic, obsessed, rational, irrational, "typically Jewish", vindictive, shark, street fighter, unethical, ethical, respectful of laws? What lessons can we draw from the play: go in the golden mean as advocated by Aristotle, don't do business with Jews as still advocated by certain Christian textbooks (in bibliography), don't take unnecessary risks, don't be a guarantor for reckless friends, don't take loans. Why does society see the reckless Bassanio and the careless Antonio as positive figures and the industrious Shylock as negative? What would happen if Bassanio and Antonio were Jews and Shylock Christian? Who prospers more in the business world: Shylock the ant or Bassanio the grasshopper? Who is the winner who takes it all?

Is Shylock right in not belonging to the elites and not mingling socially with his business partners? What is the importance in business to belong to the same milieu, going to the same parties, operas and dinners, playing golf together? Is it ethical to honor commitments only towards "old buddies", our people, our kind? Antonio and Shylock quote frequently the Bible, but who is more attached to biblical principles (an eye for an eye), or should we differentiate between the New and the Old Testament? Antonio thinks of Shylock as Satan but doesn't hesitate to do business with him. Is it possible to deal with Satan, what happens to those who do so (figuratively)? Maybe he does it because he feels secured that if worse comes to worse his friend the duke of Venice and his buddies will rescue him and he will not need to reimburse the loan. Antonio asks Shylock not to do business with him as a friend but as an enemy. What happens today in the business world, is business made friendly, based on trust or not? Why does Antonio perceive the bond of a pound of flesh as a generous offer made by a Jew? Who outsmarts whom with the pound of flesh: Antonio or Shylock? Is it ethical? Ethics is very ambiguous in this play.

What are the ethical considerations in Jessica's theft of Shylock's jewels and in giving the money to Lorenzo who is willing to forgive her Judaism in return to her money? How does Shylock behave towards the stakeholders: Jessica his daughter, his servant, his clients, his colleagues, the authorities? What are the ethics of the whistleblower (Jessica) who discloses to her father's enemies Shylock's intentions? What do we think of Jessica? Does Shylock change his decision on requesting the pound of flesh after Jessica runs away with Antonio's friend Lorenzo? What is the meaning of Shylock's famous words: "I am a Jew. Hath not a Jew eyes?..." Does it reinforce the belief that all businessmen behave in the same manner or on the contrary that business conduct varies according to temperament, religion, country, gender?

What is the impact of shaky health conditions, personal catastrophes, childhood traumas etc. on business conduct? Does it make people tougher or softer, how does it affect Shylock? What is the real reason of the inflexibility of Shylock towards Antonio: his Christianity, the insults he received, his friendship with Lorenzo, insolvency, or a cool business consideration? Does Shylock apply Milton Friedman's theories of maximizing profits without making other considerations, including ethical ones? Why does he decline Bassanio's generous offers of reimbursement of the loan and he insists on observing the contractual terms with the bond? Is the Duke of Venice objective and impartial towards Shylock in the trial? When are the rulers and judges truly impartial today?

Shylock who dared to sue Antonio, who belongs to the elites, not only didn't receive his money back but had to pay half of his wealth to Antonio as fine and become a Christian. Can we cite other examples that the underdogs or minority shareholders or poor stakeholders had to pay fines for daring to sue the mighty tycoons and how the judge treated their pleas as nuisance? Is there a universal ethics? Or ethics specific to Jews, Christians, Muslims, Venetians, Americans, British, French or Israelis? The issue of Ethics towards the weak parties, the minorities, the underdogs. If they don't participate as consenting victims with their aggressors those say of them that they have a harsh Jewish heart. Shylock justifies his harshness by saying that the Venetians are harsh also to their slaves. Is it a justified excuse? Everybody does it, so can I? Is Shylock the strong or the weak party in the play? What are the pros and cons. Bending of the law on behalf of the strong parties and to the detriment of the weak ones in the play (Portia in the trial), with the legalistic hair-splitting of lawyers who can convince consenting judges that the criminals are benefactor to the victims. Are the judges in the modern business world really impartial as they are supposed to be? Are they impressed with the first rate lawyers representing the tycoons and despising towards the third rate lawyers representing the weak parties? The issue of double standards towards the Jews or the weak parties who are asked to show Christian mercy toward the strong parties. What would happen if the situation was opposite, would the Duke of Venice ask Antonio to show mercy towards Shylock if he was not able to reimburse his loan?

Shakespeare unties the drama in a manner that favors ethics as being stronger than law, morals being stronger than a given promise. But Shakespeare's ethics is quite equivocal, as it is applied against a Jew, who is treated by the Duke as a stranger. Would the same ethics be implemented if the situation was opposite, and Shylock was a poor Jew who owed money to Antonio, the Merchant of Venice, a Christian originating from an ancient Venetian family? Would we ask Antonio to conduct himself ethically toward a poor Jew in order to prove Christian mercy toward him? The issue of double standards is emphasized here in the most acerbic manner, because in order to conduct ourselves ethically we should apply our ethics first of all toward the weak, the poor, the strangers, the minority shareholders, who do not have in most cases the possibility to confront the mighty in court, as justice and law are unfortunately apart in too many cases.

True ethics is revealed only when you do not have a sympathizing Duke of Venice and a collaborating population on your side... Clemency toward the mighty at the expense of the weak is the height of hypocrisy, and unfortunately this is what is practiced in many cases where the mighty and rich are brought to justice. If a poor thief steals a few hundred dollars he is sentenced to jail for many years, but if an Israeli financial tycoon is found guilty of manipulating the price of the shares of his bank, causing the Israeli minority shareholders and the state of Israel billions of dollars in losses, he is not even sent to jail, as we have learned from recent history. So, we should inlay in golden characters the speech of Portia, who

appears at the court disguised as a jurist doctor, and hang it on the walls of all the board rooms in modern companies to be applied for stakeholders and minority shareholders, on the walls of all the government ministries, as it has to be applied first of all to the poor, the underprivileged, as mercy only towards the mighty when they are caught is unforgivable and is the peak of hypocrisy, as Portia was in fact.

“But mercy is above this sceptred sway,
It is enthroned in the hearts of kings,
It is an attribute to God himself,
And earthly power doth then show likest God’s
When mercy seasons justice. Therefore, Jew,
Though justice be thy plea, consider this,
That in the course of justice none of us
Should see salvation: we do pray for mercy,
And that same prayer doth teach us all to render
The deeds of mercy.”
(Shakespeare, *The Merchant of Venice*, Act IV, Scene I, p. 211)

One of the most important books of the 20th century is [‘The Great Gatsby’](#) by F. Scott Fitzgerald (1925). Tom Buchanan, the capitalist tycoon who comes from a very rich American family, perceives Gatsby as a nouveau riche, a newcomer, who on top of this was the lover of his wife Daisy. He causes the death of Gatsby and after that washes his hands and his conscience, without any scruples, as those inferior creatures that do not belong to our clan do not matter. The author concludes: “I couldn’t forgive him or like him, but I saw that what he had done was, to him, entirely justified. It was all very careless and confused. They were careless people, Tom and Daisy – they smashed up things and creatures and then retreated into their money or their vast carelessness, or whatever it was that kept them together, and let other people clean up the mess they had made... I shook hands with him; it seemed silly not to for I felt suddenly as though I were talking to a child. Then he went into the jewelry store to buy a pearl necklace – or perhaps only a pair of cuff buttons – rid of my provincial squeamishness forever... Gatsby believed in the green light, the orgiastic future that year by year recedes before us. It eluded us then, but that’s no matter – to-morrow we will run faster, stretch out our arms farther... And one fine morning - So we beat on, boats against the current, borne back ceaselessly into the past.” (Scott Fitzgerald, *The Great Gatsby*, p.107)

As long as the world will continue to treat the Buchanans as spoiled children who are not responsible for their actions, it will be impossible to change fundamentally the situation. But we should blame those who forgive them - usually because of cowardice. We hesitate to condemn the mighty. And we continue to shout at the donkey, as we are too afraid to confront the lion, the wolf or the fox. We cannot hope that the Buchanans of this world will all of a sudden be overcome by remorse. They will always continue to retreat in their wealth and appease their conscience by buying a pearl necklace. Therefore, it is necessary to fight and not condescend their immoral conduct, exactly as we condemn crimes performed by highway robbers. There is no difference between a bank robbery and a stakeholder or minority shareholder wrongdoing. And we have to define as theft every unethical act, even if the law cannot punish it. We could always sanction ethical crimes publicly, as this book and my other books advocate.

It is difficult for me to say what English literature I like most – American, British or Irish – it is like asking me to choose what child I like most – Joseph, Amir or Shirly. Furthermore, as I

like very much most of European literature – French, Spanish, Russian, German, Italian... - and to a lesser extent world literature, the question is completely superfluous as the good authors are "All My Sons", as much as the theater fans that I encounter in New York, Paris or London are "All My Brothers". We are all members of the same family – the intellectuals, who has no boundaries as we live in the same nation, the same people, we share the same values, we don't look alike, we speak different languages, we may be white, black, or yellow, but we belong all to the same community, and above all we love each other. But, still I feel closer to Sinclair Lewis when I read *Babbitt* or *Main Street*, to Joshua Sobol when I see his plays, to Emile Zola when I read his novels. I try to find the right balance between the classics and the moderns, literature in the ten languages I read fluently, in the languages which I have learned recently. And now that I have retired finding the right balance between writing books, reading books, watching films and plays, visiting foreign countries, and of course spending precious time with my wife, children and grandchildren. I have my priorities – when I worked work was the first priority, now writing books is the first priority, but even when I don't write or work, I divide my time proportionately between all the languages, literatures, festivals, theater, films, music and art. It was much simpler in my youth when I read one book at a time, studied one language at a time. Anyhow, I like most literature about the middle class which is my class, about non conformism which is my motto, although I live as a bourgeois with a standard family, in a wealthy neighborhood, with normal friends (almost all of them live with their same wife/husband for almost 50 years...), much like the French "communistes de salon", who had communist ideas but would never liked to live in a communist country like the Soviet Union. So, am I a "nonconformist" if I live like a conformist but think as a nonconformist? I think that the answer is affirmative, as thru all my life I acted in the important issues as a nonconformist: At the age of 11 I rebelled against my teachers, headmaster and the ministry of education when I decided not to study metalworking and for two years I didn't attend school. At the age of 15 I became an intellectual reading classical books and hearing classical music instead of going to parties, where I was not invited. At the university I read classics, learned languages, and attended courses of Shakespeare, philosophy, drama, art... instead of focusing my studies on Economics and Political Sciences, where I was a mediocre student. In my business career I worked in high tech when nobody did, raised money at a Nasdaq IPO – one of the first Israeli company to do so, having allegiance first of all to my employees and not to my management, which was completely unorthodox. I always found the right path of success in the middle way between business and ethics, which "cost" me a lot. I chose to make an academic career when all my friends continued to make a lot of money in business, reducing my income by more than 90%, writing a dissertation on ethics to minority shareholders, the first in the world to write a dissertation, write academic books, and teach this subject at universities. Even now, when I write this book, I could be like all my friends who play golf and go to the beach, and instead I am staying at home for months writing a book that will be read only by a few if at all. So, am I a nonconformist or not? Anyhow, I read with great pleasure the books about this issue, the middle class, and ethical values, by Sinclair Lewis, Alberto Moravia (*Il conformista*), and Emile Zola (*Les Rougon-Macquart*), Balzac, Sobol, Lawrence, Cervantes...

Babbitt, first published in 1922, is a novel by Sinclair Lewis. Largely a satire of American culture, society, and behavior, it critiques the vacuity of middle-class American life and its pressure toward conformity. An immediate and controversial bestseller, *Babbitt* was influential in the decision to award Lewis the Nobel Prize in literature in 1930. The word "Babbitt" entered the English language as a "person and especially a business or professional man who conforms unthinkingly to prevailing middle-class standards". Babbitt, the conformist, feels lonely and finds the cure for his loneliness in an attractive new client, Tanis

Judique. He opens up to her about everything that happened with Paul and Zilla, and Tanis proves to be a sympathetic listener. In time, Babbitt begins to rebel against all of the standards he formerly held: he jumps into liberal politics with famous socialist litigator Seneca Doane; conducts an extramarital affair with Tanis; goes on various vacations; and cavorts around Zenith with would-be Bohemians and flappers. But each effort ends up disillusioning him to the concept of rebellion. On his excursions with Tanis and her group of friends, "the Bunch," he learns that even the Bohemians have rigid standards for their subculture. When Virgil Gunch and others discover Babbitt's activities with Seneca Doane and Tanis Judique, Virgil tries to convince Babbitt to return to conformity and join their newly founded "Good Citizens' League." Babbitt refuses. His former friends then ostracize him, boycotting Babbitt's real estate ventures and shunning him publicly in clubs.

Babbitt slowly becomes aware that his forays into nonconformity are not only futile but also destructive of the life and the friends he once loved. Yet he continues with them – even after Myra suspects Babbitt's affair, though she has no proof or specific knowledge. Unrelated to these events, Myra falls seriously ill with acute appendicitis. Babbitt, in a near-epiphany, rushes home and relinquishes all rebellion in order to care for his wife. During her long recovery, they spend a lot of time together, rekindling their intimacy. In short time, his old friends and colleagues welcome Babbitt back into the fold. The consequence of his disgruntled philosophical wanderings being met with practical events of life, he reverts into dispassionate conformity by the end; however, Babbitt never quite loses hold of the sentimentality, empathy, and hope for a meaningful life that he had developed. In the final scene, all has been righted in his life and he is back on a traditional track. He is awakened in the night to find that his son Ted and Eunice, the daughter of his neighbor, have not returned from a party. In the morning his wife informs him that the two have been discovered in the house, having been married that night. While an assemblage of friends and family gather to denounce this development, Babbitt excuses himself and Ted to be alone. He offers his approval of the marriage stating that though he does not agree he admires the fact that Ted has chosen to lead his life by his own terms and not that of conformity. We bring here extracts from the memorable last chapter of the novel Babbitt.

THE Good Citizens' League had spread through the country, but nowhere was it so effective and well esteemed as in cities of the type of Zenith, commercial cities of a few hundred thousand inhabitants, most of which—though not all—lay inland, against a background of cornfields and mines and of small towns which depended upon them for mortgage-loans, table-manners, art, social philosophy and millinery.

To the League belonged most of the prosperous citizens of Zenith. They were not all of the kind who called themselves "Regular Guys." Besides these hearty fellows, these salesmen of prosperity, there were the aristocrats, that is, the men who were richer or had been rich for more generations: the presidents of banks and of factories, the land-owners, the corporation lawyers, the fashionable doctors, and the few young-old men who worked not at all but, reluctantly remaining in Zenith, collected luster-ware and first editions as though they were back in Paris. All of them agreed that the working-classes must be kept in their place; and all of them perceived that American Democracy did not imply any equality of wealth, but did demand a wholesome sameness of thought, dress, painting, morals, and vocabulary.

In this they were like the ruling-class of any other country, particularly of Great Britain, but they differed in being more vigorous and in actually trying to produce the accepted standards which all classes, everywhere, desire, but usually despair of realizing.

The longest struggle of the Good Citizens' League was against the Open Shop—which was secretly a struggle against all union labor. Accompanying it was an Americanization

Movement, with evening classes in English and history and economics, and daily articles in the newspapers, so that newly arrived foreigners might learn that the true-blue and one hundred per cent. American way of settling labor-troubles was for workmen to trust and love their employers.

The League was more than generous in approving other organizations which agreed with its aims. It helped the Y.M. C.A. to raise a two-hundred-thousand-dollar fund for a new building. Babbitt, Vergil Gunch, Sidney Finkelstein, and even Charles McKelvey told the spectators at movie theaters how great an influence for manly Christianity the "good old Y." had been in their own lives; and the hoar and mighty Colonel Rutherford Snow, owner of the Advocate-Times, was photographed clasping the hand of Sheldon Smeeth of the Y.M.C.A. It is true that afterward, when Smeeth lisped, "You must come to one of our prayer-meetings," the ferocious Colonel bellowed, "What the hell would I do that for? I've got a bar of my own," but this did not appear in the public prints.

The League was of value to the American Legion at a time when certain of the lesser and looser newspapers were criticizing that organization of veterans of the Great War. One evening a number of young men raided the Zenith Socialist Headquarters, burned its records, beat the office staff, and agreeably dumped desks out of the window. All of the newspapers save the Advocate-Times and the Evening Advocate attributed this valuable but perhaps hasty direct-action to the American Legion. Then a flying squadron from the Good Citizens' League called on the unfair papers and explained that no ex-soldier could possibly do such a thing, and the editors saw the light, and retained their advertising. When Zenith's lone Conscientious Objector came home from prison and was righteously run out of town, the newspapers referred to the perpetrators as an "unidentified mob."

II

In all the activities and triumphs of the Good Citizens' League Babbitt took part, and completely won back to self-respect, placidity, and the affection of his friends. But he began to protest, "Gosh, I've done my share in cleaning up the city. I want to tend to business. Think I'll just kind of slacken up on this G.C.L. stuff now."

He had returned to the church as he had returned to the Boosters' Club. He had even endured the lavish greeting which Sheldon Smeeth gave him. He was worried lest during his late discontent he had imperiled his salvation. He was not quite sure there was a Heaven to be attained, but Dr. John Jennison Drew said there was, and Babbitt was not going to take a chance.

...

"Dad, I can't stand it any more. Maybe it's all right for some fellows. Maybe I'll want to go back some day. But me, I want to get into mechanics. I think I'd get to be a good inventor. There's a fellow that would give me twenty dollars a week in a factory right now."

"Well—" Babbitt crossed the floor, slowly, ponderously, seeming a little old. "I've always wanted you to have a college degree." He meditatively stamped across the floor again. "But I've never—Now, for heaven's sake, don't repeat this to your mother, or she'd remove what little hair I've got left, but practically, I've never done a single thing I've wanted to in my whole life! I don't know 's I've accomplished anything except just get along. I figure out I've made about a quarter of an inch out of a possible hundred rods. Well, maybe you'll carry things on further. I don't know. But I do get a kind of sneaking pleasure out of the fact that you knew what you wanted to do and did it. Well, those folks in there will try to bully you, and tame you down. Tell 'em to go to the devil! I'll back you. Take your factory job, if you want to. Don't be scared of the family. No, nor all of Zenith. Nor of yourself, the way I've been. Go ahead, old man! The world is yours!"

Arms about each other's shoulders, the Babbitt men marched into the living-room and faced the swooping family.

From Shakespeare and American literature back to English literature to two of my favorite authors – Lawrence and Henry James. [*Women in Love*](#) is a novel by British author [D. H. Lawrence](#) published in 1920. It is a sequel to his earlier novel [*The Rainbow*](#) (1915), and follows the continuing loves and lives of the Brangwen sisters, Gudrun and Ursula. Gudrun Brangwen, an artist, pursues a destructive relationship with Gerald Crich, an industrialist. Lawrence contrasts [this pair](#) with [the love](#) that develops [between Ursula](#) and Rupert Birkin, an alienated intellectual who articulates many opinions associated with the author. The emotional relationships thus established are given further depth and tension by an intense psychological and physical attraction between Gerald and Rupert. The novel ranges over the whole of British society before the time of the [First World War](#) and eventually ends high up in the snows of the [Tyrolean Alps](#). We bring here an extract from the book with its sombre scenery and plot.

They were passing between blocks of miners' dwellings. In the back yards of several dwellings, a miner could be seen washing himself in the open on this hot evening, naked down to the loins, his great trousers of moleskin slipping almost away. Miners already cleaned were sitting on their heels, with their backs near the walls, talking and silent in pure physical well-being, tired, and taking physical rest. Their voices sounded out with strong intonation, and the broad dialect was curiously caressing to the blood. It seemed to envelop Gudrun in a labourer's caress, there was in the whole atmosphere a resonance of physical men, a glamorous thickness of labour and maleness, surcharged in the air. But it was universal in the district, and therefore unnoticed by the inhabitants. To Gudrun, however, it was potent and half-repulsive. She could never tell why Beldover was so utterly different from London and the south, why one's whole feelings were different, why one seemed to live in another sphere. Now she realised that this was the world of powerful, underworld men who spent most of their time in the darkness. In their voices she could hear the voluptuous resonance of darkness, the strong, dangerous underworld, mindless, inhuman. They sounded also like strange machines, heavy, oiled. The voluptuousness was like that of machinery, cold and iron. It was the same every evening when she came home, she seemed to move through a wave of disruptive force, that was given off from the presence of thousands of vigorous, underworld, half-automatised colliers, and which went to the brain and the heart, awaking a fatal desire, and a fatal callousness.

There came over her a nostalgia for the place. She hated it, she knew how utterly cut off it was, how hideous and how sickeningly mindless. Sometimes she beat her wings like a new Daphne, turning not into a tree but a machine. And yet, she was overcome by the nostalgia. She struggled to get more and more into accord with the atmosphere of the place, she craved to get her satisfaction of it. She felt herself drawn out at evening into the main street of the town, that was uncreated and ugly, and yet surcharged with this same potent atmosphere of intense, dark callousness. There were always miners about. They moved with their strange, distorted dignity, a certain beauty, and unnatural stillness in their bearing, a look of abstraction and half resignation in their pale, often gaunt faces. They belonged to another world, they had a strange glamour, their voices were full of an intolerable deep resonance, like a machine's burring, a music more maddening than the siren's long ago. She found herself, with the rest of the common women, drawn out on Friday evenings to the little market. Friday was pay-day for the colliers, and Friday night was market night. Every woman was abroad, every man was out, shopping with his wife, or gathering with his pals. The

pavements were dark for miles around with people coming in, the little market-place on the crown of the hill, and the main street of Beldover were black with thickly-crowded men and women.

It was dark, the market-place was hot with kerosene flares, which threw a ruddy light on the grave faces of the purchasing wives, and on the pale abstract faces of the men. The air was full of the sound of criers and of people talking, thick streams of people moved on the pavements towards the solid crowd of the market. The shops were blazing and packed with women, in the streets were men, mostly men, miners of all ages. Money was spent with almost lavish freedom. The carts that came could not pass through. They had to wait, the driver calling and shouting, till the dense crowd would make way. Everywhere, young fellows from the outlying districts were making conversation with the girls, standing in the road and at the corners. The doors of the public-houses were open and full of light, men passed in and out in a continual stream, everywhere men were calling out to one another, or crossing to meet one another, or standing in little gangs and circles, discussing, endlessly discussing. The sense of talk, buzzing, jarring, half-secret, the endless mining and political wrangling, vibrated in the air like discordant machinery. And it was their voices which affected Gudrun almost to swooning. They aroused a strange, nostalgic ache of desire, something almost demoniacal, never to be fulfilled.

The Portrait of a Lady is a novel by [Henry James](#), the American/British author, whose books I have read with great delight. This novel is one of James's most popular long novels, and is regarded by critics as one of his finest. *The Portrait of a Lady* is the story of a spirited young American woman, Isabel Archer, who in "affronting her destiny", finds it overwhelming. She inherits a large [amount of money](#) and [subsequently becomes](#) the victim of [Machiavellian](#) scheming by two American expatriates. Like many of James's novels, it is set in Europe, mostly England and Italy. Generally regarded [as the masterpiece](#) of James's early period, this novel reflects James's [continuing interest](#) in the [differences between](#) the [New World](#) and the [Old](#), often to the detriment of the former. It also treats in a profound way the themes of personal freedom, responsibility, and betrayal. From this book I bring an extract of Chapter 42, one of the finest.

Such a resolution, however, brought her this evening but little peace, for her soul was haunted with terrors which crowded to the foreground of thought as quickly as a place was made for them. What had suddenly set them into livelier motion she hardly knew, unless it were the strange impression she had received in the afternoon of her husband's being in more direct communication with Madame Merle than she suspected. That impression came back to her from time to time, and now she wondered it had never come before. Besides this, her short interview with Osmond half an hour ago was a striking example of his faculty for making everything wither that he touched, spoiling everything for her that he looked at. It was very well to undertake to give him a proof of loyalty; the real fact was that the knowledge of his expecting a thing raised a presumption against it. It was as if he had had the evil eye; as if his presence were a blight and his favour a misfortune. Was the fault in himself, or only in the deep mistrust she had conceived for him? This mistrust was now the clearest result of their short married life; a gulf had opened between them over which they looked at each other with eyes that were on either side a declaration of the deception suffered. It was a strange opposition, of the like of which she had never dreamed—an opposition in which the vital principle of the one was a thing of contempt to the other. It was not her fault—she had practised no deception; she had only admired and believed. She had taken all the first steps in the purest confidence, and then she had suddenly found the infinite vista of a multiplied life to

be a dark, narrow alley with a dead wall at the end. Instead of leading to the high places of happiness, from which the world would seem to lie below one, so that one could look down with a sense of exaltation and advantage, and judge and choose and pity, it led rather downward and earthward, into realms of restriction and depression where the sound of other lives, easier and freer, was heard as from above, and where it served to deepen the feeling of failure. It was her deep distrust of her husband—this was what darkened the world. That is a sentiment easily indicated, but not so easily explained, and so composite in its character that much time and still more suffering had been needed to bring it to its actual perfection. Suffering, with Isabel, was an active condition; it was not a chill, a stupor, a despair; it was a passion of thought, of speculation, of response to every pressure. She flattered herself that she had kept her failing faith to herself, however,—that no one suspected it but Osmond. Oh, he knew it, and there were times when she thought he enjoyed it. It had come gradually—it was not till the first year of their life together, so admirably intimate at first, had closed that she had taken the alarm. Then the shadows had begun to gather; it was as if Osmond deliberately, almost malignantly, had put the lights out one by one. The dusk at first was vague and thin, and she could still see her way in it. But it steadily deepened, and if now and again it had occasionally lifted there were certain corners of her prospect that were impenetrably black. These shadows were not an emanation from her own mind: she was very sure of that; she had done her best to be just and temperate, to see only the truth. They were a part, they were a kind of creation and consequence, of her husband's very presence. They were not his misdeeds, his turpitudes; she accused him of nothing—that is but of one thing, which was *not* a crime. She knew of no wrong he had done; he was not violent, he was not cruel: she simply believed he hated her. That was all she accused him of, and the miserable part of it was precisely that it was not a crime, for against a crime she might have found redress. He had discovered that she was so different, that she was not what he had believed she would prove to be. He had thought at first he could change her, and she had done her best to be what he would like. But she was, after all, herself—she couldn't help that; and now there was no use pretending, wearing a mask or a dress, for he knew her and had made up his mind. She was not afraid of him; she had no apprehension he would hurt her; for the ill-will he bore her was not of that sort. He would if possible never give her a pretext, never put himself in the wrong. Isabel, scanning the future with dry, fixed eyes, saw that he would have the better of her there. She would give him many pretexts, she would often put herself in the wrong. There were times when she almost pitied him; for if she had not deceived him in intention she understood how completely she must have done so in fact. She had effaced herself when he first knew her; she had made herself small, pretending there was less of her than there really was. It was because she had been under the extraordinary charm that he, on his side, had taken pains to put forth. He was not changed; he had not disguised himself, during the year of his courtship, any more than she. But she had seen only half his nature then, as one saw the disk of the moon when it was partly masked by the shadow of the earth. She saw the full moon now—she saw the whole man. She had kept still, as it were, so that he should have a free field, and yet in spite of this she had mistaken a part for the whole.

And finally, Charles Dickens, whom I have read mainly in my youth and who probably gave me together with Emile Zola my social consciousness. One of Dickens' finest books is [*A Tale of Two Cities*](#) (1859), a cosmopolitan novel by [Charles Dickens](#), set in [London](#) and [Paris](#) before and during the [French Revolution](#). The novel depicts the plight of the French peasantry demoralised by the French [aristocracy](#) in the years leading up to the revolution, the corresponding brutality demonstrated by the revolutionaries toward the former [aristocrats](#) in the early years of the revolution, and many unflattering social parallels with life in London during the same period. It follows the lives of several characters through these events. *A Tale*

of Two Cities was published in weekly installments from April 1859 to November 1859 in [Dickens's new](#) literary [periodical](#) titled *All the Year Round*. [With sales of](#) about 200 million copies, *A Tale of Two Cities* is the biggest selling novel in history. Everyone knows the first chapter which has become a classic:

*It was the best of times,
it was the worst of times,
it was the age of wisdom,
it was the age of foolishness,
it was the epoch of belief,
it was the epoch of incredulity,
it was the season of Light,
it was the season of Darkness,
it was the spring of hope,
it was the winter of despair,*

we had everything before us, we had nothing before us, we were all going direct to Heaven, we were all going direct the other way—in short, the period was so far like the present period, that some of its noisiest authorities insisted on its being received, for good or for evil, in the superlative degree of comparison only.

There were a king with a large jaw and a queen with a plain face, on the throne of England; there were a king with a large jaw and a queen with a fair face, on the throne of France. In both countries it was clearer than crystal to the lords of the State preserves of loaves and fishes, that things in general were settled for ever.

It was the year of Our Lord one thousand seven hundred and seventy-five. Spiritual revelations were conceded to England at that favoured period, as at this. Mrs. Southcott had recently attained her five-and-twentieth blessed birthday, of whom a prophetic private in the Life Guards had heralded the sublime appearance by announcing that arrangements were made for the swallowing up of London and Westminster. Even the Cock-lane ghost had been laid only a round dozen of years, after rapping out its messages, as the spirits of this very year last past (supernaturally deficient in originality) rapped out theirs. Mere messages in the earthly order of events had lately come to the English Crown and People, from a congress of British subjects in America: which, strange to relate, have proved more important to the human race than any communications yet received through any of the chickens of the Cock-lane brood.

France, less favoured on the whole as to matters spiritual than her sister of the shield and trident, rolled with exceeding smoothness down hill, making paper money and spending it. Under the guidance of her Christian pastors, she entertained herself, besides, with such humane achievements as sentencing a youth to have his hands cut off, his tongue torn out with pincers, and his body burned alive, because he had not kneeled down in the rain to do honour to a dirty procession of monks which passed within his view, at a distance of some fifty or sixty yards. It is likely enough that, rooted in the woods of France and Norway, there were growing trees, when that sufferer was put to death, already marked by the Woodman, Fate, to come down and be sawn into boards, to make a certain movable framework with a sack and a knife in it, terrible in history. It is likely enough that in the rough outhouses of some tillers of the heavy lands adjacent to Paris, there were sheltered from the weather that very day, rude carts, bespattered with rustic mire, snuffed about by pigs, and roosted in by poultry, which the Farmer, Death, had already set apart to be his tumbrils of the Revolution. But that Woodman and that Farmer, though they work unceasingly, work silently, and no one heard them as they went about with muffled tread: the rather, forasmuch as to entertain any suspicion that they were awake, was to be atheistical and traitorous.

In England, there was scarcely an amount of order and protection to justify much national boasting. Daring burglaries by armed men, and highway robberies, took place in the capital itself every night; families were publicly cautioned not to go out of town without removing their furniture to upholsterers' warehouses for security; the highwayman in the dark was a City tradesman in the light, and, being recognised and challenged by his fellow-tradesman whom he stopped in his character of "the Captain," gallantly shot him through the head and rode away; the mail was waylaid by seven robbers, and the guard shot three dead, and then got shot dead himself by the other four, "in consequence of the failure of his ammunition:" after which the mail was robbed in peace; that magnificent potentate, the Lord Mayor of London, was made to stand and deliver on Turnham Green, by one highwayman, who despoiled the illustrious creature in sight of all his retinue; prisoners in London gaols fought battles with their turnkeys, and the majesty of the law fired blunderbusses in among them, loaded with rounds of shot and ball; thieves snipped off diamond crosses from the necks of noble lords at Court drawing-rooms; musketeers went into St. Giles's, to search for contraband goods, and the mob fired on the musketeers, and the musketeers fired on the mob, and nobody thought any of these occurrences much out of the common way. In the midst of them, the hangman, ever busy and ever worse than useless, was in constant requisition; now, stringing up long rows of miscellaneous criminals; now, hanging a housebreaker on Saturday who had been taken on Tuesday; now, burning people in the hand at Newgate by the dozen, and now burning pamphlets at the door of Westminster Hall; to-day, taking the life of an atrocious murderer, and to-morrow of a wretched pilferer who had robbed a farmer's boy of sixpence.

All these things, and a thousand like them, came to pass in and close upon the dear old year one thousand seven hundred and seventy-five. Environed by them, while the Woodman and the Farmer worked unheeded, those two of the large jaws, and those other two of the plain and the fair faces, trod with stir enough, and carried their divine rights with a high hand. Thus did the year one thousand seven hundred and seventy-five conduct their Greatnesses, and myriads of small creatures—the creatures of this chronicle among the rest—along the roads that lay before them.

[Ulysses](#) by [James Joyce](#) is [still an enigma](#) for me, having read it twice, I still don't understand it, although I like very much books written with stream of consciousness, like Proust's and Sartre's books. Possibly, it is because you must be extremely fluent in the language in order to enjoy the book, and I am almost 100% fluent only in French and Hebrew. [Ulysses](#) chronicles the peripatetic appointments and encounters of [Leopold Bloom](#) in [Dublin](#) in the course of an ordinary day, 16 June 1904. I was born exactly 40 years later. [Ulysses](#) is the [Latinised](#) name of [Odysseus](#), the hero of [Homer's](#) epic poem [Odyssey](#), and the novel establishes a series of parallels between its characters and events and those of the poem (e.g., the correspondence of [Leopold Bloom](#) to [Odysseus](#), [Molly Bloom](#) to [Penelope](#), and [Stephen Dedalus](#) to [Telemachus](#)). In [Finnegans Wake](#) Joyce invented a unique polyglot-language or [idioglossia](#) solely for the purpose of this work. This language is composed of composite words from some sixty to seventy world languages, combined to form [puns](#), or [portmanteau](#) words and phrases intended to convey several layers of meaning at once. This is probably the most difficult book in English literature.

We bring here a "short" description by Joyce of... water, that no one else ever wrote similarly:

“What in water did Bloom, waterlover, drawer of water, watercarrier, returning to the range, admire?

Its universality: its democratic equality and constancy to its nature in seeking its own level: its vastness in the ocean of Mercator's projection: its unplumbed profundity in the Sundam trench of the Pacific exceeding 8000 fathoms: the restlessness of its waves and surface particles visiting in turn all points of its seaboard: the independence of its units: the variability of states of sea: its hydrostatic quiescence in calm: its hydrokinetic turgidity in neap and spring tides: its subsidence after devastation: its sterility in the circumpolar icecaps, arctic and antarctic: its climatic and commercial significance: its preponderance of 3 to 1 over the dry land of the globe: its indisputable hegemony extending in square leagues over all the region below the subequatorial tropic of Capricorn: the multisecular stability of its primeval basin: its luteofulvous bed: its capacity to dissolve and hold in solution all soluble substances including millions of tons of the most precious metals: its slow erosions of peninsulas and islands, its persistent formation of homothetic islands, peninsulas and downwardtending promontories: its alluvial deposits: its weight and volume and density: its imperturbability in lagoons and highland tarns: its gradation of colours in the torrid and temperate and frigid zones: its vehicular ramifications in continental lakecontained streams and confluent oceanflowing rivers with their tributaries and transoceanic currents, gulfstream, north and south equatorial courses: its violence in seaquakes, waterspouts, Artesian wells, eruptions, torrents, eddies, freshets, spates, groundswells, watersheds, waterpartings, geysers, cataracts, whirlpools, maelstroms, inundations, deluges, cloudbursts: its vast circumterrestrial ahorizontal curve: its secrecy in springs and latent humidity, revealed by rhabdomantic or hygrometric instruments and exemplified by the well by the hole in the wall at Ashtown gate, saturation of air, distillation of dew: the simplicity of its composition, two constituent parts of hydrogen with one constituent part of oxygen: its healing virtues: its buoyancy in the waters of the Dead Sea: its persevering penetrativeness in runnels, gullies, inadequate dams, leaks on shipboard: its properties for cleansing, quenching thirst and fire, nourishing vegetation: its infallibility as paradigm and paragon: its metamorphoses as vapour, mist, cloud, rain, sleet, snow, hail: its strength in rigid hydrants: its variety of forms in loughs and bays and gulfs and bights and guts and lagoons and atolls and archipelagos and sounds and fjords and minches and tidal estuaries and arms of sea: its solidity in glaciers, icebergs, icefloes: its docility in working hydraulic millwheels, turbines, dynamos, electric power stations, bleachworks, tanneries, scutchmills: its utility in canals, rivers, if navigable, floating and graving docks: its potentiality derivable from harnessed tides or watercourses falling from level to level: its submarine fauna and flora (anacoustic, photophobe), numerically, if not literally, the inhabitants of the globe: its ubiquity as constituting 90 percent of the human body: the noxiousness of its effluvia in lacustrine marshes, pestilential fens, faded flowerwater, stagnant pools in the waning moon.” James Joyce, *Ulysses*, 1922, written with stream of consciousness.

After describing water, Joyce describes sand, also very "shortly" in another of his masterpieces.

“What must it be, then, to bear the manifold tortures of hell forever? Forever! For all eternity! Not for a year or an age but forever. Try to imagine the awful meaning of this. You have often seen the sand on the seashore. How fine are its tiny grains! And how many of those tiny grains go to make up the small handful which a child grasps in its play. Now imagine a mountain of that sand, a million miles high, reaching from the earth to the farthest heavens, and a million miles broad, extending to remotest space, and a million miles in thickness, and imagine such an enormous mass of countless particles of sand multiplied as often as there are

leaves in the forest, drops of water in the mighty ocean, feathers on birds, scales on fish, hairs on animals, atoms in the vast expanse of air. And imagine that at the end of every million years a little bird came to that mountain and carried away in its beak a tiny grain of that sand. How many millions upon millions of centuries would pass before that bird had carried away even a square foot of that mountain, how many eons upon eons of ages before it had carried away all. Yet at the end of that immense stretch time not even one instant of eternity could be said to have ended. At the end of all those billions and trillions of years eternity would have scarcely begun. And if that mountain rose again after it had been carried all away again grain by grain, and if it so rose and sank as many times as there are stars in the sky, atoms in the air, drops of water in the sea, leaves on the trees, feathers upon birds, scales upon fish, hairs upon animals – at the end of all those innumerable risings and sinkings of that immeasurably vast mountain not even one single instant of eternity could be said to have ended; even then, at the end of such a period, after that eon of time, there mere thought of which makes our very brain reel dizzily, eternity would have scarcely begun." James Joyce, *A Portrait of the Artist as a Young Man*, 1916.

Finally, water again, in another masterpiece, this time almost incomprehensible, yet moving.

"Anna was, Livia is, Plurabelle's to be. Northmen's thing made southfolk's place but how multy plurators made each one in per-son? Latin me that, my trinity scholard, out of eure sanscreed into oure eryl! Hircus Civis Eblanensis! He had buckgoat paps on him, soft ones for orphans. Ho, Lord! Twins of his bosom. Lord save us! And ho! Hey? What all men. Hot? His tittering daugh-ters of. Whawk? Can't hear with the waters of. The chittering waters of. Flitter-ing bats, fieldmice bawk talk. Ho! Are you not gone ahome? What Thom Malone? Can't hear with bawk of bats, all thim liffe-ying waters of. Ho, talk save us! My foos won't moos. I feel as old as yonder elm. A tale told of Shaun or Shem? All Livia's daughter- sons. Dark hawks hear us. Night! Night! My ho head halls. I feel as heavy as yonder stone. Tell me of John or Shaun? Who wereShem and Shaun the living sons or daughters of? Night now! Tell me, tell me, tell me, elm! Night night! Telmetale of stem or stone. Beside the rivering waters of, hitherandthithering waters of. Night!" James Joyce, *Finnegans Wake*, 1939, his last book finished shortly before his death.

Sarcastically, I maintain that there are many affinities between me and James Joyce, who is perceived as the best author of the XXth Century. First of all, both books on Ulysses were written with stream of consciousness, as I have written the synopsis of my play/novel in 24 hours on 60 pages, while the protagonists dictated me what they wanted to do and what to write, in a stream of consciousness, with all the dialogues already present in the synopsis. In the next 18 days I only made final touches to my work and typed it. Both authors base their novels on the Odyssey – Ulysses – Leopold Bloom – is the modern counterpart of Ulysses, like Uly Doron (the Israeli Ulysses) is. Both are tolerant, humanistic, detest violence, and live through an Odyssey in Dublin/Tel Aviv. Furthermore, both are even Jewish. Molly Bloom is Penelope and so is the Israeli Nelly. While Penelope is eternally faithful, Molly is not, having an affair with her manager, after ten years of her celibacy within the marriage. And so is Nelly, who after being faithful to her husband for 20 years, is having an affair with Uly's former manager. Both women are also Jewish, as Molly was born in Gibraltar, the daughter of Lunita Laredo, a Gibraltarian of Spanish Jewish descent, and of course Nelly is also Sephardic, but was born in Larissa, Greece.

Finally, I chose the name of my Diary – A portrait of the idealist as a young man, after Joyce's "diary" – A portrait of the artist as a young man. And if this not enough, Joyce invented a unique polyglot-language for his final book *Finnegans Wake* composed of composite words from some sixty to seventy languages, in a similar way that I use in this book texts from more than 120 languages (Anything you can do I can do better... Annie Get Your Gun), as both are polyglots and use the following languages in their texts – English, French, German, Romansh, Serbian, Croatian, Spanish, Russian, Danish, Dutch, Swedish, Icelandic, Norwegian, Italian of course as Joyce lived in Italy, Greek, Latin, Hebrew. As a matter of fact, the only language that I don't use in my book and Joyce uses is Irish Gaelic, but this is because Joyce was Irish. Well, after all, it maybe incorrect to state that I read twice *Ulysses* and did not understand it, as subconsciously it probably affected my writing in my novel, play, diary, as well as in this book.

But, as a matter of fact you can find in my library many books, plays and dictionaries in all the languages that I have learned, but also in languages that I haven't learned. And so, I once bought a long time ago a dual language book of stories by the Irish writer Padraic Pearse. I thought that I would understand the language but was completely mistaken as it is totally different from the languages that I know or want to learn. I wish to pay tribute to Irish literature that most of it was written in English – to Padraic Pearse, William Butler Yeats, John Millington Synge, but especially to some of my preferred writers who write in English – George Bernard Shaw, Oscar Wilde, Samuel Beckett, Sean O'Casey, and of course James Joyce. My favorite plays by Samuel Beckett [are Waiting for Godot](#), *Endgame*, *Happy Days*. Sean O'Casey: *Juno and the Paycock*, *Within the Gates*, *Red Roses for Me*, *Cock-a-Doodle- Dandy*, *The Shadow of a Gunman*, *The Plough and the Stars*, *The Silver Tassie*, *Purple Dust*, *Hall of Healing*. Oscar Wilde – *A Woman of No Importance*, *Lady Windermere's Fan*, *An Ideal Husband*, *The Importance of Being Earnest*, *Salome*. George Bernard Shaw – *Man and Superman*, *Arms and the Man*, *Candida*, *The Man of Destiny*, *You Never Can Tell*. All my preferred Irish playwrights wrote about social issues, siding the underprivileged, telling the truth about the rich and mighty, hypocrisy, aristocrats and working class. I have seen on stage most of Oscar Wilde's plays, some of George Bernard Shaw's plays, and as far as I recall none of Sean O'Casey's plays although those are the plays that I enjoyed most reading as they dealt with the most important issues that I care about.

Don Juan in Hell by George Bernard Shaw is probably the best philosophical discourse in a play, which exceeds by far all attempts of Goethe in *Faust*. I don't need action in a play or in a film, and of course not in a book. And as such *Man and Superman* with its third act *Don Juan in Hell* is a masterpiece. *Don Juan in Hell* lasts an hour and a half on stage and with the other three acts of *Man and Superman* it lasts like an opera by Wagner. Unfortunately I have only read several times the play, although I noticed that there were many performances of the two parts of the play, that I did not see. That is why I'll bring here only a few lines on the play from Wikipedia and an extract of the play. *Man and Superman* is a four-act [drama](#) written by [George Bernard Shaw](#) in [1903](#). The series was written in response to calls for Shaw to write a play based on the [Don Juan](#) theme. *Man and Superman* opened at [The Royal Court Theatre](#) in London on 23 May 1905, but omitted the third act. A part of the act, *Don Juan in Hell* (Act 3, Scene 2), was performed when the drama was staged on 4 June 1907 at the Royal Court. The play was not performed in its entirety until 1915, when the Travelling Repertory Company played it at the [Lyceum Theatre](#), [Edinburgh](#). The plot of the play is as follows: Mr. Whitefield has recently died, and his [will](#) indicates that his daughter Ann should be left in the care of two men, Roebuck Ramsden and Jack Tanner. Ramsden, a venerable old man,

distrusts Jack Tanner, an eloquent youth with revolutionary ideas, saying "He is prodigiously fluent of speech, restless, excitable (mark the snorting nostril and the restless blue eye, just the thirty-secondth of an inch too wide open), possibly a little mad". In spite of what Ramsden says, Ann accepts Tanner as her [guardian](#), though Tanner doesn't want the position at all. She also challenges Tanner's revolutionary beliefs with her own ideas. Despite Tanner's professed dedication to [anarchy](#), he is unable to disarm Ann's charm, and she ultimately persuades him to marry her, choosing him over her more persistent suitor, a young man named Octavius Robinson. *Don Juan in Hell* consists of a philosophical debate between Don Juan (played by the same actor who plays Jack Tanner), and the [Devil](#), with Doña Ana (Ann) and the [Statue](#) of Don Gonzalo, Ana's father (Roebuck Ramsden) looking on. This third act is often performed separately as a play in its own right, most famously during the 1950s in a concert version, featuring [Charles Boyer](#) as Don Juan, [Charles Laughton](#) as the Devil, [Cedric Hardwicke](#) as the Commander and [Agnes Moorehead](#) as Doña Ana. This version was also released as a [spoken word album](#) on [LP](#), the complete performance recording is now available on the internet. In 1974–75, [Kurt Kasznar](#), [Myrna Loy](#), [Edward Mulhare](#) and [Ricardo Montalban](#) toured nationwide in [John Houseman](#)'s reprise of the production, playing 158 cities in six months.

Although *Man and Superman* can be performed as a light [comedy of manners](#), Shaw intended the drama to be something much deeper, as suggested by the title, which comes from [Friedrich Nietzsche](#)'s philosophical ideas about the "[Übermensch](#)". The plot centres on John Tanner, author of "The Revolutionist's Handbook and Pocket Companion", which is published with the play as a 58-page appendix. Both in the play and in the "Handbook" Shaw takes Nietzsche's theme that mankind is evolving, through [natural selection](#), towards "superman" and develops the argument to suggest that the prime mover in selection is the woman — Tanner is a confirmed bachelor despite the pursuits of Ann Whitefield and her persistent efforts to entice him to marry her. Ann is referred to as "the [Life Force](#)" and represents Shaw's view that in every culture, it is the women who force the men to marry them rather than the men who take the initiative. We bring here an extract from Don Juan in Hell, in the third act of Shaw's *Man and Superman*.

THE DEVIL. [nettled] Well, you've no capacity for enjoyment. Will that satisfy you?

DON JUAN. It is a somewhat less insufferable form of cant than the other. But if you'll allow me, I'll take refuge, as usual, in solitude.

THE DEVIL. Why not take refuge in Heaven? That's the proper place for you. [To Ana] Come, Senora! could you not persuade him for his own good to try a change of air?

ANA. But can he go to Heaven if he wants to?

THE DEVIL. What's to prevent him?

ANA. Can anybody—can I go to Heaven if I want to?

THE DEVIL. [rather contemptuously] Certainly, if your taste lies that way.

ANA. But why doesn't everybody go to Heaven, then?

THE STATUE. [chuckling] I can tell you that, my dear. It's because heaven is the most angelically dull place in all creation: that's why.

THE DEVIL. His excellency the Commander puts it with military bluntness; but the strain of living in Heaven is intolerable. There is a notion that I was turned out of it; but as a matter of fact nothing could have induced me to stay there. I simply left it and organized this place.

THE STATUE. I don't wonder at it. Nobody could stand an eternity of heaven.

THE DEVIL. Oh, it suits some people. Let us be just, Commander: it is a question of temperament. I don't admire the heavenly temperament: I don't understand it: I don't know

that I particularly want to understand it; but it takes all sorts to make a universe. There is no accounting for tastes: there are people who like it. I think Don Juan would like it.

DON JUAN. But—pardon my frankness—could you really go back there if you desired to; or are the grapes sour?

THE DEVIL. Back there! I often go back there. Have you never read the book of Job? Have you any canonical authority for assuming that there is any barrier between our circle and the other one?

ANA. But surely there is a great gulf fixed.

THE DEVIL. Dear lady: a parable must not be taken literally. The gulf is the difference between the angelic and the diabolic temperament. What more impassable gulf could you have? Think of what you have seen on earth. There is no physical gulf between the philosopher's class room and the bull ring; but the bull fighters do not come to the class room for all that. Have you ever been in the country where I have the largest following—England? There they have great racecourses, and also concert rooms where they play the classical compositions of his Excellency's friend Mozart. Those who go to the racecourses can stay away from them and go to the classical concerts instead if they like: there is no law against it; for Englishmen never will be slaves: they are free to do whatever the Government and public opinion allows them to do. And the classical concert is admitted to be a higher, more cultivated, poetic, intellectual, ennobling place than the racecourse. But do the lovers of racing desert their sport and flock to the concert room? Not they. They would suffer there all the weariness the Commander has suffered in heaven. There is the great gulf of the parable between the two places. A mere physical gulf they could bridge; or at least I could bridge it for them (the earth is full of Devil's Bridges); but the gulf of dislike is impassable and eternal. And that is the only gulf that separates my friends here from those who are invidiously called the blest.

ANA. I shall go to heaven at once.

THE STATUE. My child; one word of warning first. Let me complete my friend Lucifer's similitude of the classical concert. At every one of those concerts in England you will find rows of weary people who are there, not because they really like classical music, but because they think they ought to like it. Well, there is the same thing in heaven. A number of people sit there in glory, not because they are happy, but because they think they owe it to their position to be in heaven. They are almost all English.

THE DEVIL. Yes: the Southerners give it up and join me just as you have done. But the English really do not seem to know when they are thoroughly miserable. An Englishman thinks he is moral when he is only uncomfortable.

THE STATUE. In short, my daughter, if you go to Heaven without being naturally qualified for it, you will not enjoy yourself there.

ANA. And who dares say that I am not naturally qualified for it? The most distinguished princes of the Church have never questioned it. I owe it to myself to leave this place at once.

THE DEVIL. [offended] As you please, Senora. I should have expected better taste from you.

ANA. Father: I shall expect you to come with me. You cannot stay here. What will people say?

THE STATUE. People! Why, the best people are here—princes of the church and all. So few go to Heaven, and so many come here, that the blest, once called a heavenly host, are a continually dwindling minority. The saints, the fathers, the elect of long ago are the cranks, the faddists, the outsiders of to-day.

THE DEVIL. It is true. From the beginning of my career I knew that I should win in the long run by sheer weight of public opinion, in spite of the long campaign of misrepresentation and calumny against me. At bottom the universe is a constitutional one; and with such a majority as mine I cannot be kept permanently out of office.

DON JUAN. I think, Ana, you had better stay here.

ANA. [jealously] You do not want me to go with you.

DON JUAN. Surely you do not want to enter Heaven in the company of a reprobate like me.

ANA. All souls are equally precious. You repent, do you not?

DON JUAN. My dear Ana, you are silly. Do you suppose heaven is like earth, where people persuade themselves that what is done can be undone by repentance; that what is spoken can be unspoken by withdrawing it; that what is true can be annihilated by a general agreement to give it the lie? No: heaven is the home of the masters of reality: that is why I am going thither.

ANA. Thank you: I am going to heaven for happiness. I have had quite enough of reality on earth.

DON JUAN. Then you must stay here; for hell is the home of the unreal and of the seekers for happiness. It is the only refuge from heaven, which is, as I tell you, the home of the masters of reality, and from earth, which is the home of the slaves of reality. The earth is a nursery in which men and women play at being heroes and heroines, saints and sinners; but they are dragged down from their fool's paradise by their bodies: hunger and cold and thirst, age and decay and disease, death above all, make them slaves of reality: thrice a day meals must be eaten and digested: thrice a century a new generation must be engendered: ages of faith, of romance, and of science are all driven at last to have but one prayer, "Make me a healthy animal." But here you escape the tyranny of the flesh; for here you are not an animal at all: you are a ghost, an appearance, an illusion, a convention, deathless, ageless: in a word, bodiless. There are no social questions here, no political questions, no religious questions, best of all, perhaps, no sanitary questions. Here you call your appearance beauty, your emotions love, your sentiments heroism, your aspirations virtue, just as you did on earth; but here there are no hard facts to contradict you, no ironic contrast of your needs with your pretensions, no human comedy, nothing but a perpetual romance, a universal melodrama. As our German friend put it in his poem, "the poetically nonsensical here is good sense; and the Eternal Feminine draws us ever upward and on"—without getting us a step farther. And yet you want to leave this paradise!

ANA. But if Hell be so beautiful as this, how glorious must heaven be!

The Devil, the Statue, and Don Juan all begin to speak at once in violent protest; then stop, abashed.

DON JUAN. I beg your pardon.

THE DEVIL. Not at all. I interrupted you.

THE STATUE. You were going to say something.

DON JUAN. After you, gentlemen.

THE DEVIL. [to Don Juan] You have been so eloquent on the advantages of my dominions that I leave you to do equal justice to the drawbacks of the alternative establishment.

DON JUAN. In Heaven, as I picture it, dear lady, you live and work instead of playing and pretending. You face things as they are; you escape nothing but glamor; and your steadfastness and your peril are your glory. If the play still goes on here and on earth, and all the world is a stage, Heaven is at least behind the scenes. But Heaven cannot be described by

metaphor. Thither I shall go presently, because there I hope to escape at last from lies and from the tedious, vulgar pursuit of happiness, to spend my eons in contemplation—

We give here from the Internet an excellent review on the Irish Sean O'Casey's life and plays:

Sean O'Casey, a child of the Dublin slums, was born in 1880 to a Protestant family. He had a grim childhood of poverty, poor eyesight, and ill health. Sean O'Casey was an idealist with a strong sense of justice that marked his life and work. Early in his adult life he was caught up in the fervour of the Gaelic League and in the amateur theatre movement. O'Casey claimed he found his "faith" in the socialist ideals of Jim Larkin's crusade for the Irish working class. (The general strike of 1913 began the first demands for Irish liberation.) In his early forties, while continuing to support himself as a labourer, he wrote, in quick succession three realistic plays about the slums of Dublin. *The Shadow of a Gunman*, *Juno and the Paycock*, and *The Plough and the Stars* were performed at the Abbey Theatre in 1923, 1924, and 1926 respectively. The first takes up the terrors of the Black and Tans in Dublin. The second has a Civil War theme, and the last is focused on the Irish Citizen Army and the Easter Rising. These plays provoked public outcry mainly because of O'Casey's consistent refusal to glorify the violence of the nationalist movement, instead mocking the heroics of war and presenting the theme that dead heroes were far outnumbered by dead innocent people. Frank O'Connor, in *A Short History of Irish Literature: A Backward Look*, says that what unifies these plays and sets them apart from O'Casey's later works is "the bitter recognition that while the men dream, drink, drivel, dress up and go play-acting, some woman with as much brains and far more industry sacrifices herself to keep the little spark of human life from going out altogether." O'Casey followed these plays of realism with *The Silver Tassie*, which was submitted to the Abbey Theatre in 1927. It was a play considered more symbolic and expressionistic than the previous Abbey plays. While three acts were in typical lively O'Casey style, the second act included chants and dance movement.

Most of his plays which followed, filled with symbolism and fantasy, were infused with the evangelical view that became the theme of the rest of O'Casey's life. These plays include *Within the Gates*, *The Star Turns Red*, *Purple Dust*, *Red Roses for Me*, *Oak Leaves and Lavender*, and *Cock A Doodle Dandy*. With the exception of *Within the Gates*, none of the later plays had the critical acclaim or success that were given his earlier work. O'Casey's alleged communism represents another aspect of his life and work which calls for interpretation. Brooks Atkinson, in his Introduction to *The Sean O'Casey Reader*, presents a balanced view of O'Casey's professed allegiance. Like other aspects of O'Casey's creativity, Atkinson saw him as an original in his thinking, for O'Casey saw Keats, Shelley, Dickens, Whitman, even Jesus Christ as Communists. "Any man who is honest and gives all he can to the community is a Communist," O'Casey said. His only humourless play, *The Star Turns Red*, put on by a leftist group in London in 1940, was his salute to Communism. As Atkinson points out, despite O'Casey's public comments, his play, and his articles for "The London Daily Worker," the author's "Communism had a flamboyant style. But it must have perplexed orthodox Communists. As usual, he made his own rules and preserved his personal independence." O'Casey's finest writing after his self-imposed exile from Ireland in 1926 is considered to be his six volumes of autobiography: *I Knock at the Door*, *Pictures in the Hallway*, *Drums Under the Window*, *Inishfallen Fare Thee Well*, *Rose and Crown*, and *Sunset and Evening Star*. They were written as stream of consciousness works and in a brilliantly subjective style and voice of the third person named Johnny Casside.

David Krause, author of *Sean O'Casey and His World*, says of the autobiography: "Like the voluble characters in his plays, O'Casey can be profligate and exuberant with words, playing with their sounds and meanings, indulging in the Joycean game of puns, parodies, malapropisms and comic invective." Brooks Atkinson remarks that Sean O'Casey "wrote the most glorious English of his era - the English nearest in colour and strength to the Elizabethan. . . He had the moral courage of an idealist. I think God had reason to be proud of Sean O'Casey." - <http://www.irish-society.org/home/hedgemaster-archives-2/people/o-casey-sean>

Most of the Irish writers didn't write in Irish Gaelic, a Goidelic language spoken only by 140,000 native speakers but by one million as a second language. **Irish** (*Gaeilge*), sometimes referred to as **Gaelic** or **Irish Gaelic**, is a [Goidelic language](#) of the [Indo-European languages family](#), originating in [Ireland](#) and historically spoken by the [Irish people](#). Irish is spoken as a [first language](#) by a small minority of Irish people, and as a [second language](#) by a rather larger group. Irish enjoys [constitutional](#) status as the [national and first official language](#) of the [Republic of Ireland](#), and is an officially recognised [minority language in Northern Ireland](#). It is also among official [languages of the European Union](#). The public body [Foras na Gaeilge](#) is responsible for the promotion of the language throughout the island of Ireland. Irish was the predominant language of the Irish people for most of their recorded history, and they brought it with them to other regions, notably [Scotland](#) and the [Isle of Man](#), where through earlier branching from [Middle Irish](#) it gave rise to [Scottish Gaelic](#) and [Manx](#) respectively. It has [the oldest vernacular literature](#) – the speech of the common people - in Western Europe, dating from the 4th century.

The fate of the language was influenced by the increasing power of the English state in Ireland. Elizabethan officials viewed the use of Irish unfavourably, as being a threat to all things English in Ireland. Its decline began under English rule in the 17th century. In the latter part of the 19th century, there was a dramatic decrease in the number of speakers, beginning after the [Great Famine](#) of 1845–52 (when Ireland lost 20–25% of its population either to emigration or death). Irish-speaking areas were hit especially hard. By the end of British rule, the language was spoken by less than 15% of the national population. Since then, Irish speakers have been in the minority. This is now the case even in areas officially designated as the [Gaeltacht](#). Efforts have been made by the state, individuals and organisations to preserve, promote and revive the language, but with mixed results. I'll quote here the last lines of Pearse's beautiful and captivating short story *An Bhean Chaointe* – *The Keening Woman* in Irish people's "mother tongue", and by that I comply completely to James Joyce writings, as I have now in my book on top of the other 200 languages Irish Gaelic as well. It goes without saying that James Joyce wouldn't boycott Jews or Israelis, as some of his compatriots do unfortunately, as for sure he loved and appreciated Jews, maybe because he met them and did not emit an opinion biased by a Nazi anti-Semitic propaganda as the BDS pile of lies does, and unaware people in Ireland, the UK and Scandinavia believe it.

'An rugadh riamh ar an bhfear dubh?' arsa mo dheirfiur.

'Was the stranger ever caught?'

'Ni rugadh, muis', arsa m'athair. 'Is beag an baol a bhi air.'

'No, he was in no danger.'

'Ciarbh e an fear dubh, meas tu a dheaide?' arsa mise.

'Who do you think the stranger was?'

'Creidim i lathair De,' arsa m'athair, 'gur pilear o Chaislean Bhaile Atha Cliath a bhi ann. Chonaic Cuimin O Niadh fear an-chosuile leis at tabhairt fianaise in aghaidh buachalla eile i dTuaim bliain ina dhiaidh sin.'

'I believe before God', my father said, 'that he was a peeler from Dublin Castle. Cuimin O Niadh saw a man very like him giving evidence against another boy in Tuam a year afterwards.'

'A dheaide', arsa Seainin go hobann, 'nuair a bheas mise im fhear, maroidh me an fea dubh sin.'

'Daddy,' Sean said suddenly, when I'm a man, I'll kill that stranger.'

'Sabhala Dia sinn', adeir mo mhathair.

Leag m'athair a lamh ar chloigeann Sheainin.

My father laid his hand on Sean's head.

'B'fheidir, a mhaicin,' ar seisean, 'go mbeadh muid uilig ag baint 'teaili-ho' as an arm dubh sul rachas cre orainn!'

'Maybe we'll all be taking 'tally-ho' out of the black soldiers, before we die!' he said.

'Ta se in am Paidrin,' adeir mo mhathair.

'It's time for the Rosary,' said my mother.

After typing the original text and the translation, we observe that Irish is not so stranger to other languages and that we can understand some of the text. We'll start with the omission. The translator has forgotten to translate the sentence: 'Sabhala Dia sinn', adeir mo mhathair. First of all, it's a sentence said by the mother, as in the last sentence we find "adeir mo mhathair", exactly like in the omitted sentence. So, this sentence ends with "said my mother". She said to her son Sean who wants to kill the stranger: God save us/Que Dieu nous garde/אלוהים ישמור/Auzubillah. How do I know it? First of all – intuition and then context. Sabhala must be "save", Dia is God, sinn is us. Why Dia is God, first of all because it is written in capital letter and also because in other sentences De is God. And we must not confuse sin with one n and sinn with two n... So, this is a short course in Irish Gaelic, which today is the first time that I read it carefully.

Poetry delivers the most salient facets of a people, especially a suffering people like the Irish, the Haitians, poems in Ladino and Yiddish... Therefore, we have chosen to bring here a poem in Irish Gaelic from an anonymous poet. The end of old ways, a feature of the bardic laments of the 18th century, is also to be found in the early 19th century poem *Caoine Cill Chais* (*The Lament for Kilcash*). In this verse the anonymous poet laments that the castle of Cill Chais stands empty, its woods are cut down and its old splendours departed. (Flood and Flood 1999:85-93):

Cad a dhéanfaimid feasta gan adhmaid,
 tá deireadh na gcoillte ar lár;
 níl trácht ar Chill Chais ná a teaghlach,

is ní bainfear a cling go bráth;
 an áit úd ina gcónaíodh an deighbhean
 a fuair gradam is meidhir thar mná,
 bhíodh iarlaí ag tarraing thar toinn ann,
 is an tAifreann binn á rá.

*What shall we do from now on without timber?
 The last of the woods is gone.
 No more of Kilcash and its household
 And its bells will not ring again.
 The place where that great lady lived
 Who received esteem and love above all others
 Earls came from overseas to visit there
 And Mass was sweetly read.*

Antoine O Raifteiri (1779-1835) was an Irish language poet who is often called the last of the wandering bards. We bring here three of his most renowned poems, out of admiration for the Irish people, its poets, authors and especially its playwrights. I am sure that the respect is mutual... Ó Raifteiri's most enduring poems include *Eanach Dhuin* and *Cill Aodain* which are still learned by Irish schoolchildren. Another well-known poem of O Raifteiri is **Mise Raifteiri an File**.

"Eanach Dhúin"	English Translation
Má fhaighimse sláinte is fada bheidh trácht	If my health is spared I'll be long relating
Ar an méid a bádh as Eanach Cuain.	Of the number who drowned from Anach Cuain.
'S mo thua 'márach gach athair 's máthair	And the keening after of mother and father
Bean is páiste 'tá á sileadh súl!	And child by the harbour, the mournful croon!
A Rí na nGrást a cheap neamh is páthas,	King of Graces, who died to save us,
Nar bheag an tábhacht dúinn beirt no triúr,	T'were a small affair but for one or two,
Ach lá chomh breá leis gan gaoth ná báisteach	But a boat-load bravely in calm day sailing
Lán a bháid acu scuab ar shiúl.	Without storm or rain to be swept to doom.
Nár mhór an t-íonadh ós comhair na ndaoine	What wild despair was on all the faces
Á bhfeicáil sínte ar chúl a gcinn,	To see them there in the light of day,
Screadadh 'gus caoineadh a scanródh daoine,	In every place there was lamentation,

Gruaig á cíoradh 's an chreach á roinnt.

And tearing of hair as the wreck was shared.

Bhí buachaillí óg ann tíocht an fhómhair,

And boys there lying when crops were ripening,

Á síneadh chrochar, is a dtabhairt go cill.

From the strength of life they were borne to

'S gurb é gléas a bpósta a bhí dá clay dtoramh

In their wedding clothes for their wake they robed them

'S a Rí na Glóire nár mhór an feall.

O King of Glory, man's hope is in vain.

"Cill Aodáin"

English translation

Anois teacht an earraigh

Now coming of the Spring

beidh an lá ag dul chun síneadh,

the day will be lengthening,

Is tar éis na féil Bríde

and after St. Bridget's Day

ardóidh mé mo sheol.

I shall raise my sail.

Ó chuir mé i mo cheann é

Since I put it into my head

ní chónóidh mé choíche

I shall never stay put

Go seasfaidh mé síos

until I shall stand down

i lár Chontae Mhaigh Eo.

in the center of County Mayo.

I gClár Chlainne Mhuiris

In Claremorris' family

A bheas mé an chéad oíche,

I will be the first night,

Is i mballa taobh thíos de

and in the wall on the side below it

A thosaigh mé ag ól.

I will begin to drink.

Go Coillte Mách rachaidh

to Kiltimagh (Magh's Woods) I shall go

Go ndéanfaidh cuairt mhíosa ann

until I shall make a month's visit there

I bhfogas dhá mhíle

two miles close

Do Bhéal an Átha Mhóir

to Aghamore.

"Mise Raifteirí an File"

English Translation

Mise Raifteirí, an file,	I am Raftery, the poet,
lán dóchais is grá	full of hope and love
le súile gan solas,	With eyes without light,
ciúineas gan crá	silence without torment.
Dul siar ar m'aistear,	Going back on my journey,
le solas mo chroí	with the light of my heart
Fann agus tuirseach,	Weak and tired,
go deireadh mo shlí	until the end of my way.
Feach anois mé	Look at me now,
m'aghaidh le bhalla,	facing the wall
Ag seinm ceoil	Playing music,
do phocaí folamh.	For empty pockets.

After paying tribute to the English people, the Irish people, I'll bring here a short poem in Welsh language, Cymraeg, spoken fluently by only 320,000 Welsh. It was written by Tomos Prys (1564-1634), a Welsh poet. Many details survive about Tomos's life, recorded in his poems, of which more than two hundred are extant. A poem written by Tomos at Plas Iolyn in his later life:

<i>Traetha fy mod, lle nodant</i>	Now I live quietly
<i>I'm plwy gyda'm gwraig a'm plant</i>	With my dear wife and family
<i>Ag a'm bryd, dros ennyd aeth</i>	And for a while at least I till
<i>Is mynydd ar ysmonaeth</i>	My fields below the neighbouring hill.

Finally, a few words about the Scots, not about their language as brought out in extracts and links in this book, but about my visit to Scotland, and the excellent education that my father Albert received at the Boy School of the Church of Scotland Mission in Smyrna. On 28th June, 1921, he received at the end of Session 1920-1921 (he was 15.5 years old) a prize – the book *The Voyage of the Blue Vega* by W. Gordon Stables awarded to Albert Cori (all the Cori family had an i ending, like in Coria, like the Italian segment of the family and even like his brother and parents, but Albert decided to Anglicize his family name with a y ending changing his name to Cory). His grades were: 2nd in Scripture History and Geography, 1st in

English, Grammar, Calligraphy, Composition, French and Hebrew, with a Perfect Attendance. And this reminds me of a story that he told me about this school: when he was a younger, the pupils were required to pray every morning with closed eyes – every one to his God, as in this school studied pupils from many religions. But, as my father had a competitor for the first grades – this pupil reported him to the headmaster that he didn't close his eyes during the prayer. The headmaster punished my father but he punished the tell-tale twice as much – first of all for informing out of spite, but even more because he kept his eyes opened during the prayer, otherwise how could he have seen the event? There were once excellent educators, fair, dedicated, wise, strict, erudite, even in the cosmopolitan Smyrna, they were Scots in the case of my father, French in the case of my mother, both of them received their education at Church schools, where have those teachers vanished?

I [visited](#) extensively [England](#) – [London](#), Oxford, Cambridge, Windsor, Stonehenge, [Windermere](#), but also [made short](#) visits to Wales and [planned a long](#) trip to Scotland with my family. This was the first time (1978) that my wife Ruthy and the two kids Yossi aged 7 and Amir aged 4 went abroad and after staying a week in London, we took a train to Edinburgh, well, we thought we did. I read that the train to Edinburgh departs from platform 3 at 8.30 in the morning, so we came with all the suitcases early enough to take good seats. We arrived at 8.15 and found good places, but the train left at 8.20. That is strange, I thought, we know that the English are punctual (Phileas Fogg), but how come that the train leaves ten minutes before time? I went to the conductor who told me that the train is an express train headed south. I was astonished, all my plans were shattered, what will I do with my family who traveled for the first time abroad, how will we catch the organized tour to Scotland? Man tracht und Gott lacht, l'homme propose et Dieu dispose – man plans and God laughs... Everything was planned so meticulously... This was one of my worst days, but we finally got to Edinburgh and took the tour of the day after, but alas we traveled in a bus full of smoking people, the children got sick, we saw a loch and then another loch and all the lochs seemed alike, it was raining, it was cold, it was hell, so ultimately we left the tour after one day, lost the money, and traveled south to Windermere, which was one of our best decisions. So, il faut faire contre mauvaise fortune bon coeur, you should adapt to the circumstances and always have a fallback plan. Thanks to the Internet wonders, we found a Scottish folk group named "[The Corries](#)", probably from Cory's Scottish relatives, who sing for their Israeli cousins "The Corys" melodious [Scottish folk songs](#), to compensate them for their initial bad impression on their beautiful country. My visits to other English speaking countries, [Canada](#), [US](#), [Australia](#), [Singapore](#), [New Zealand](#), [South Africa](#), [Africa](#)... appear also in this book.

We finish by quoting one of my beloved poems: I wandered lonely as a cloud, by William Wordsworth, which I learned at school. When I visited with my family the Lake District, we fell in love with [Windermere](#), stayed there for a few days, and all the while, I thought of this poem:

I WANDERED lonely as a cloud
 That floats on high o'er vales and hills,
 When all at once I saw a crowd,
 A host, of golden daffodils;
 Beside the lake, beneath the trees,
 Fluttering and dancing in the breeze.

Continuous as the stars that shine
 And twinkle on the milky way,
 They stretched in never-ending line

Along the margin of a bay: 10
 Ten thousand saw I at a glance,
 Tossing their heads in sprightly dance.

The waves beside them danced; but they
 Out-did the sparkling waves in glee:
 A poet could not but be gay,
 In such a jocund company:
 I gazed--and gazed--but little thought
 What wealth the show to me had brought:

For oft, when on my couch I lie 20
 In vacant or in pensive mood,
 They flash upon that inward eye
 Which is the bliss of solitude;
 And then my heart with pleasure fills,
 And dances with the daffodils

And as a Postscript for a true cosmopolitan book, we bring here the final verses of Oscar Wilde's *The Ballad of Reading Gaol* in English and in... Esperanto – *La Balado de Prizono Reding*:

In Reading gaol by Reading town	Ce Reding, en Prizono Reding,
There is a pit of shame,	Pri honto kav' atestas;
And in it lies a wretched man	Mizera homo en gi kusas,
Eaten by teeth of flame,	Flamdentoj lin digestas;
In a burning winding-sheet he lies,	Lin volvas brula tuko, tombe
And his grave has got no name.	Neniu nomo estas.

And there, till Christ call forth the dead,	Gis Krist' mortintojn vekos, pace
In silence let him lie:	Atendu li la tagon:
No need to waste the foolish tear,	Malsagan larmon ne malsparu,
Or have the windy sigh:	same suspirosvagon;
The man had killed the thing he loved,	I' amajon murdis li kaj donis
And so he had to die.	Per sia viv' la pagon.

And all men kill the thing they love,	L' amajon murdas ciu homo;
By all let this be heard,	Auskultu! Per okulo
Some do it with a bitter look,	Amara kelkaj, kelkaj dume
Some with a flattering word,	Per flato kaj simulo;
The coward does it with a kiss,	Perkise faras gin poltrono,
The brave man with a sword!	Perglave kuraglo.

And also the final lines of *The Picture of Dorian Gray* by Oscar Wilde, one of my favorite books, that I have read, seen on screen, on stage, and that I always find new layers when reading it.

It was an unjust mirror, this mirror of his soul that he was looking at. Vanity? Curiosity? Hypocrisy? Had there been nothing more in his renunciation than that? There had been something more. At least he thought so. But who could tell? And this murder,--was it to dog

him all his life? Was he never to get rid of the past? Was he really to confess? No. There was only one bit of evidence left against him. The picture itself,--that was evidence.

He would destroy it. Why had he kept it so long? It had given him pleasure once to watch it changing and growing old. Of late he had felt no such pleasure. It had kept him awake at night. When he had been away, he had been filled with terror lest other eyes should look upon it. It had brought melancholy across his passions. Its mere memory had marred many moments of joy. It had been like conscience to him. Yes, it had been conscience. He would destroy it. He looked round, and saw the knife that had stabbed Basil Hallward. He had cleaned it many times, till there was no stain left upon it. It was bright, and glistened. As it had killed the painter, so it would kill the painter's work, and all that that meant. It would kill the past, and when that was dead he would be free. He seized it, and stabbed the canvas with it, ripping the thing right up from top to bottom. There was a cry heard, and a crash. The cry was so horrible in its agony that the frightened servants woke, and crept out of their rooms. Two gentlemen, who were passing in the Square below, stopped, and looked up at the great house. They walked on till they met a policeman, and brought him back. The man rang the bell several times, but there was no answer. The house was all dark, except for a light in one of the top windows. After a time, he went away, and stood in the portico of the next house and watched.

"Whose house is that, constable?" asked the elder of the two gentlemen.

"Mr. Dorian Gray's, sir," answered the policeman.

They looked at each other, as they walked away, and sneered. One of them was Sir Henry Ashton's uncle. Inside, in the servants' part of the house, the half-clad domestics were talking in low whispers to each other. Old Mrs. Leaf was crying, and wringing her hands. Francis was as pale as death. After about a quarter of an hour, he got the coachman and one of the footmen and crept up-stairs. They knocked, but there was no reply. They called out. Everything was still. Finally, after vainly trying to force the door, they got on the roof, and dropped down on to the balcony. The windows yielded easily: the bolts were old.

When they entered, they found hanging upon the wall a splendid portrait of their master as they had last seen him, in all the wonder of his exquisite youth and beauty. Lying on the floor was a dead man, in evening dress, with a knife in his heart. He was withered, wrinkled, and loathsome of visage. It was not till they had examined the rings that they recognized who it was.

THOUGHTS & QUOTES ON GERMAN & HEINE

When I started to learn German, I did it primarily in order to read the classics. But, soon enough I understood that it had also very positive implications for my business career, as I studied Economics. When I was an Israeli candidate at Insead in 1967, I had the unique advantage to be fluent in all the three languages of Insead – German, French and English. If I would not have learned German I probably would not have been admitted to Insead, surely not with a full scholarship as I received. I read Goetz, but after a 5 weeks seminar at the Goethe Institute in West Berlin (with visits to East Berlin, which made me relinquish all my socialist ideologies), I was also fluent in Business German and understood quite well the courses in German at Insead, speaking with my German friends in German. Later, in my business career, I continued to take advantage of the language, while reading from time to time the classics in German. After I left business in order to teach business ethics, I started to forget the language, as a language is not like riding a bicycle – if you don't practice it you forget it. But, nevertheless, when I was in Berlin in 2010 for 10 days, I went every night to the theater, and I enjoyed most seeing one of my favorite plays - Die Dreigroschenoper by Brecht and Weill, which I used as background for my lecture the day after at the headquarters of Transparency International (see description of the event with German Text of Mack the Knife's Ballad in Plays). Die Dreigroschenoper is an excellent example of how you can lose most of the flavor of the play by translating it, [Lotte Lenya singing in German](#) cannot be compared to [any other performance](#), even Louis Armstrong.

Well, this is how I remember what the reasons for learning German were. But thanks to Freud we can analyze also how the subconscious works, and reading once again my diary I found the "true?" reason of why I decided to learn German, and I inserted this paragraph in my unpublished Diary: "Today Benny told me once again why I shouldn't choose to study Economics. He said that I will never have a career as a diplomat because I am "black" (oriental, born in Egypt). Many new immigrants came as grownups to Israel and couldn't assimilate in the Israeli environment. I think that I have succeeded to assimilate. The day that I'll be convinced that Benny and the others were right and I would not be able to succeed because I am "black" would be an awful day for me. Nevertheless, I have to study German at the university. I am determined! I am afraid only of one thing – from racism. It is possible that because I am Sephardic I would be exposed to obstacles. It is bad. I can change everything, but I cannot change my place of birth. My motto is: persevere with obstinacy and diligence and you will succeed!! **This is almost the only instance in the four years of the diary and towards its end that the issue of my origins comes out. I didn't choose a diplomatic career and that's why it is impossible to confirm the prejudice, but German helped me a lot in my work and studies.**" So, what is true and false?

Have I decided to study German because "if you can't beat them join them"? Have I forsaken my origins in order to become or at least behave like an Ashkenazi Jew? Was that the reason why I almost never had a Sephardic or Oriental girlfriend? Was that the reason why almost all my friends are from European origin? Is that the reason why I try so hard to be called a European, with a Europocentrist orientation? That I don't like Arabic music and like only a few Israeli oriental songs? But, I never concealed the fact that I am Sephardic and proud of my origins, but to be true almost all my Sephardic activities started at the age of 50 or more, and Sephardic Jews are from Spanish or Portuguese, i.e. European origins anyhow. I do not think that I have anything in common with the Egyptians, although I was born there, but always felt there a stranger, a European, and that's why the Egyptians treated us badly as

well... Yet, I support warmly the struggle for the recognition of oriental culture in Israel, I read with great interest the three books of the Oriental Prose and Poetry Anthology, I abhor racism in all its facets – against Orientals, Ethiopians, Arabs, Sephardim, Russian new immigrants in Israel, but here again – all these happened at the age of 50 or more, as part of my ethical activities, after I had my ethical "illumination" in the late nineties. I heard many racial comments and jokes in my career but reacted to them only at an advanced age, and wrote a case study on the topic of racism in business only in my book published in 2008 at the age of 64 (when I'm 64 – the Beatles...). This book's purpose is to tell the truth – conscious or unconscious, and I try to do it at my best!

I still remember some poems that I learned in my German courses, one of them by Heinrich Heine. I recited it by heart at a dinner in the Reichstag to the Berliner host of the Insead group who visited Berlin for the annual reunion in 2010. This humorous poem deals with the sadness of sunset, a young woman cries, but she is told that the sun comes back from the other side.

[Das Fräulein stand am Meere](#)

Und seufzte lang und bang,
Es rührte sie so sehre
Der Sonnenuntergang.

Mein Fräulein! sein Sie munter,
Das ist ein altes Stück;
Hier vorne geht sie unter
Und kehrt von hinten zurück.

A mistress stood by the sea
sighing long and anxiously.
She was so deeply stirred
By the setting sun

My Fräulein!, be gay,
This is an old play;
ahead of you it sets
And from behind it returns.

I am fascinated by Heine's life and achievement and especially by his Jewish background that although he converted did not cease the anti-Semitic attacks on him until he had to spend the second half of his life in Paris as an expatriate. **Christian Johann Heinrich Heine** (13 December 1797 – 17 February 1856) was a [German poet, journalist, essayist](#), and [literary critic](#). He is best known outside Germany for his early [lyric poetry](#), which was set to music in the form of [Lieder](#) (art songs) by [composers](#) such as [Robert Schumann](#) and [Franz Schubert](#). Heine's later verse and prose are distinguished by their satirical wit and irony. He is considered part of the [Young Germany](#) movement. His radical political views led to many of his works being banned by German authorities. Heine spent the last 25 years of his life as an expatriate in Paris. Heine's writings were abhorred by the Nazis and one of its political mouthpieces, the [Völkischer Beobachter](#) made noteworthy efforts to attack him in their periodical. Within the pantheon of the "Jewish cultural intelligentsia" chosen for "anti-Semitic demonization," perhaps nobody was the recipient of more National Socialist vitriol than Heinrich Heine. When a memorial to Heine was completed in 1926, the paper lamented that Hamburg had erected a "Jewish Monument to Heine and Damascus...one in which *Alljuda* ruled!". Editors for the [Völkischer Beobachter](#) referred to Heine's writing as degenerate on multiple occasions as did the infamous Nazi [Alfred Rosenberg](#). Correspondingly, during the rise of the [Third Reich](#), Heine's [writings were banned and burned](#). Among the thousands of books [burned](#) on Berlin's [Opernplatz](#) in 1933, following the [Nazi](#) raid on the [Institut für Sexualwissenschaft](#), were works by Heinrich Heine. To commemorate the terrible event, one of the most famous lines of Heine's 1821 play *Almansor* was engraved in the ground at the site: "Das war ein Vorspiel nur, dort wo man Bücher verbrennt, verbrennt man auch am Ende Menschen." ("That was but a prelude; where they burn books, they will ultimately burn people as well."). And everybody knows what happened subsequently in the Third Reich.

In 1834, 99 years before [Adolf Hitler](#) and the [Nazi Party](#) seized power in Germany, Heine wrote in his work "The History of Religion and Philosophy in Germany": "Christianity – and that is its greatest merit – has somewhat mitigated that brutal Germanic love of war, but it could not destroy it. Should that subduing talisman, the cross, be shattered, the frenzied madness of the ancient warriors, that insane Berserk rage of which Nordic bards have spoken and sung so often, will once more burst into flame. This talisman is fragile, and the day will come when it will collapse miserably. Then the ancient stony gods will rise from the forgotten debris and rub the dust of a thousand years from their eyes, and finally [Thor](#) with his giant hammer will jump up and smash the Gothic cathedrals. (...) "Do not smile at my advice – the advice of a dreamer who warns you against Kantians, Fichteans, and philosophers of nature. Do not smile at the visionary who anticipates the same revolution in the realm of the visible as has taken place in the spiritual. Thought precedes action as lightning precedes thunder. German thunder is of true Germanic character; it is not very nimble, but rumbles along ponderously. Yet, it will come and when you hear a crashing such as never before has been heard in the world's history, then you know that the German thunderbolt has fallen at last. At that uproar the eagles of the air will drop dead, and lions in the remotest deserts of Africa will hide in their royal dens. A play will be performed in Germany which will make the French Revolution look like an innocent idyll."

Many composers have set Heine's works to music. They include [Robert Schumann](#) (especially his Lieder cycle [Dichterliebe](#)), [Friedrich Silcher](#) (who wrote a popular setting of "[Die Lorelei](#)", one of Heine's best known poems), [Franz Schubert](#), [Felix Mendelssohn](#), [Fanny Mendelssohn](#), [Johannes Brahms](#), [Hugo Wolf](#), [Richard Strauss](#), [Pyotr Ilyich Tchaikovsky](#), [Edward MacDowell](#), [Clara Schumann](#) and [Richard Wagner](#); and in the 20th century [Nikolai Medtner](#), [Hans Werner Henze](#), [Carl Orff](#), [Lord Berners](#), [Paul Lincke](#), [Yehezkel Braun](#), [Marcel Tyberg](#)^[69] and [Friedrich Baumfelder](#) (who wrote another setting of "Die Lorelei", as well as "Die blauen Frühlingsaugen" and "Wir wuchsen in demselben Thal" in his *Zwei Lieder*). We bring here Heine's famous poem Die Lorelei (on the site which I visited in Germany), translated into Latin and English.

Heinrich Heine, 1822 (1799-1856)

Tr. Frank 1998

1. Ich weiß nicht, was soll es velit,	1. Ignoro, quid id sibi	1. I cannot determine the meaning
bedeuten,	Tristissimus cur sim,	Of sorrow that fills my breast:
Daß ich so traurig bin,	Antiqui aevi fabellam	A fable of old, through it
Ein Märchen aus uralten Zeiten,	Cur saepe voverim.	streaming,
Das kommt mir nicht aus dem Vesperascit et frigescit,	Allows my mind no rest.	
Sinn.	Et Rhenus leniter it,	The air is cool in the gloaming
Die Luft ist kühl und es dunkelt,	Cacumen montis	And gently flows the Rhine.
Und ruhig fließt der Rhein; lucescit,	The crest of the mountain is	
Der Gipfel des Berges funkelt, Dum Phoebus occidit.	gleaming	
Im Abendsonnenschein.	In fading rays of sunshine.	

2. Die schönste Jungfrau sitzet montis	2. Sedet in summo	2. The loveliest maiden is sitting
Dort oben wunderbar, Virgo pulcherrima,	Up there, so wondrously fair;	
Ihr gold'nes Geschmeide blitzet, Auro nitet gemma	Her golden jewelry is glist'ning;	
Sie kämmt ihr goldenes Haar, frontis,	She combs her golden hair.	
Sie kämmt es mit goldenem Se pectit auricoma.	She combs with a gilded comb,	
Kamme,	preening,	
Und singt ein Lied dabei; Carmen canens procul,	Aureolo pectine pectit,	And sings a song, passing time.
	It has a most wondrous, appealing	

Das hat eine wundersame, Mirandum id habet And pow'rful melodic rhyme.
Gewalt'ge Melodei. modum

Nec non virilem simul. 3. The boatman aboard his small
3. Den Schiffer im kleinen skiff, -
Schiffe, 3. In cymba navitam Enraptured with a wild ache,
Ergreift es mit wildem Weh; mille Has no eye for the jagged cliff, -
Er schaut nicht die Felsenriffe, Angores feri tenent, His thoughts on the heights fear
Er schaut nur hinauf in die Höh'. Non videt scopulos forsake.
Ich glaube, die Wellen ille, I think that the waves will devour
verschlingen Ocli non si sursum Both boat and man, by and by,
Am Ende Schiffer und Kahn, vident. And that, with her dulcet-voiced
Und das hat mit ihrem Singen, Opinor undas devorare power
Die Loreley getan. Nautam cum navicula, Was done by the Loreley.
Effecit solo canendo
Lurleia id dea.

And one of the loveliest folk songs that even Elvis Prestley sung when he was in Germany, a song of longing, the departure of the beloved, who will come back and wed his sweetheart.

[Muss i denn, muss i denn zum Stadtele hinaus, Stadtele hinaus, Und du mein Schatz bleibst hier?](#)

1. Muß i' denn, muß i' denn	1. Got to go, got to go,
Zum Städtele hinaus,	Got to leave this town,
Städtele hinaus	Leave this town
Und du mein Schatz bleibst hier	And you, my dear, stay here.
Wenn i' komm', wenn i' komm',	When I'm back, when I'm back
Wenn i' wiederum, wiederum komm',	When I'm back again, back again,
Kehr i' ei' mei' Schatz bei dir	On your doorstep I'll appear.
: Kann i' glei' net allweil bei dir sei'	: Tho' I can't be with you all the time
Han' i' doch mei' Freud' an dir	My thoughts are with you, my dear
Wenn i' komm', wenn i' komm',	When I'm back, when I'm back
Wenn i' wiederum, wiederum komm',	When I'm back again, back again,
Kehr i' ei' mei' Schatz bei dir.	On your doorstep I'll appear.

I visited most of Germany, besides residing in Berlin twice in aggregate a couple of months – one of the most beautiful cities in the world, the scenery, the gardens, the architecture, the museums, the theaters. I visited several times on business Frankfurt and Munich, and visited Koeln, Schwarzwald, Baden Baden, Heidelberg, Hamburg, Dresden, Freiburg, Luebeck, etc. I visited Switzerland several times, alone for attending two excellent seminars of a fortnight each in International Finance and International Marketing at IMD, and also with my wife and my daughter, visiting Geneve, Lausanne, Zurich, Lugano, Zermatt, Mont Blanc, Bern, Basel, Lucerne... In Basel, I saw graffiti with an anti-Semite content. I went to the police and complained demanding that the graffiti should be removed instantly. The policeman probably thought that I was crazy, but he wrote down the complaint. When we hired [a cottage in Grindelwald](#), by far the most beautiful site that I have ever seen, we went often to the supermarket, but we made once a terrible mistake and haven't returned the shopping cart to the exact location where we took it. We were almost lynched, and probably that it is the sole [drawback of the Swiss](#), that they are so perfect that they don't have any patience for people who are not so perfect as they are. When I was in Grindelwald on vacation, I received a phone call from Uri Levit, a friend and CEO of Poalim Investments, one of the largest investments

companies in Israel. He asked me if I could come for a day to Paris for negotiations with a French company on a joint venture. I answered that I am with my wife and daughter on vacation, but if they would come to Bern, nearby, I could spare a day for the negotiations. So, the French managers had to travel all the way from Paris to Bern for the negotiations, don't knowing probably what the reason was for this ordeal. But, I kept my principles not to spoil my vacations with business, and Ruthy and Shirley were grateful for it as they barely saw me in Israel.

I had also business in Switzerland, and was asked by an American high tech company and owner, with whom I worked also in Italy, England, Germany, France, US, and Israel, to negotiate and sign a joint venture agreement with a Swiss company from Lugano. When I started to inquire about the company and its owner – es schmeckt nicht – I smelled a rat, and I asked a large American firm to check on this CEO. I found that he has indeed conned the previous company with whom he worked. Many businessmen in my situation wouldn't have any scruples, would not have investigated the Swiss company, as I was not asked to do so by the American company. I had a lot to lose, as I was supposed to travel every month for a week and manage the joint venture, earning a substantial amount of money for months or years. But I preferred to divulge my findings, albeit the American owner was not pleased by it as he wanted very much to make the joint venture, but as his company was public he couldn't afford to disregard my findings that were given to him in writing with the report on the firm. So, unethical conduct happens with the best families, even with the perfect and ethical Swiss people.

Nevertheless, I bring here a story of a visit to the Rhone Glacier of Ruthy, Shirley and me. Inside the Glacier we found a couple of men who were disguised to bears, they told us that if we want to take a photo with them it would cost us a substantial amount and it will be sent by mail to our Israeli address. Ruthy asked me: "How can we be sure that they'll send the picture to Israel after we pay them now", and the bear answered her in Hebrew (he was an Israeli student): "Madam, this is Switzerland not Israel"... I made also with Ruthy a visit of [ten days to Vienna](#), Prague and Budapest. We enjoyed visiting those beautiful cities, went to the theater in Prague and Budapest, not understanding a word, but in order to enjoy the theater you have to enjoy the ambience. 20 years later we also visited Tallinn, capital of Estonia, on a Baltic cruise, and enjoyed the visit. In Vienna we had an Insead reunion, where we had a rehearsal of Waltz dancing before the ball that was held at a sumptuous hall. It didn't improve much my dancing, as I sing and dance so well that I was asked several times to appear on Broadway... We visited Schoenbrunn, and I thought all the time about L'Aiglon, Napoleon II, who died at this palace in 1832, and of Edmond Rostand's play that was the earliest memory I had as a child. So, from Cairo where I saw the play L'Aiglon, via Insead that was located initially at Fontainebleau's Napoleon palace, to the Schoenbrunn palace in Vienna where Napoleon's son died, a loop was closed – who thought that the poor kid Cory would have made such a voyage on the footsteps of Napoleon and his son...

THOUGHTS & QUOTES ON HERZL & LADINO

Sir [Moses Montefiore](#), famous for his intervention in favor of Jews around the world, including the attempt to rescue [Edgardo Mortara](#), established a colony for Jews in Palestine. In 1854, his friend [Judah Touro](#) bequeathed money to fund Jewish residential settlement in Palestine. Montefiore was appointed executor of his will, and used the funds for a variety of projects, including building in 1860 the first Jewish residential settlement and almshouse outside of the old walled city of Jerusalem—today known as [Mishkenot Sha'ananim](#). [Laurence Oliphant](#) failed in a like attempt to bring to Palestine the Jewish proletariat of Poland, Lithuania, Romania, and the Turkish Empire (1879 and 1882). In the 1890s, [Theodor Herzl](#) infused Zionism with a new ideology and practical urgency, leading to the First Zionist Congress at [Basel](#) in 1897, which created the World Zionist Organization (WZO). Herzl's [aim](#) was to initiate necessary preparatory steps for the attainment of a Jewish state. Herzl's attempts to reach a political agreement with the Ottoman rulers of Palestine were unsuccessful and other governmental support was sought. The WZO supported small-scale settlement in Palestine and focused on strengthening Jewish feeling and consciousness and on building a worldwide federation.

We can find in the Jewish Virtual Library a short biography of Herzl. As Herzl wrote extensively on social and economic justice issues, mainly in *Altneuland*, I introduced this book in my courses on this subject, and I view Herzl as the precursor not only of Israel but also of the Third Way between capitalism and socialism, that today is very popular among some scholars as Joseph Stiglitz. Theodor (Binyamin Ze'ev) Herzl was the visionary behind modern Zionism and the reinstitution of a Jewish homeland. Herzl (born May 2, 1860; died July 3, 1904) was born in [Budapest](#) in 1860. He was educated in the spirit of the German-Jewish Enlightenment, and learned to appreciate secular culture. In 1878 the family moved to [Vienna](#), and in 1884 Herzl was awarded a doctorate of law from the University of Vienna. He became a writer, playwright and journalist. The Paris correspondent of the influential liberal Vienna newspaper *Neue Freie Presse* was none other than Theodor Herzl. Herzl first encountered the [anti-Semitism](#) that would shape his life and the fate of the Jews in the twentieth century while studying at the University of Vienna (1882). Later, during his stay in Paris as a journalist, he was brought face-to-face with the problem. At the time, he regarded the Jewish problem as a social issue and wrote a drama, *The Ghetto* (1894), in which assimilation and conversion are rejected as solutions. He hoped that *The Ghetto* would lead to debate and ultimately to a solution, based on mutual tolerance and respect between [Christians and Jews](#). In 1894, [Captain Alfred Dreyfus](#), a Jewish officer in the French army, was unjustly accused of treason, mainly because of the prevailing [anti-Semitic](#) atmosphere. Herzl witnessed mobs shouting “Death to the Jews” in France, the home of the French Revolution, and resolved that there was only one solution: the mass immigration of Jews to a land of their own. Thus, the Dreyfus Case became one of the determinants in the genesis of [Political Zionism](#). So, as the Chinese say – every crisis can lead to new opportunities.

Herzl concluded that [anti-Semitism](#) was a stable and immutable factor in human society, which assimilation did not solve. He mulled over the idea of Jewish sovereignty, and, despite ridicule from Jewish leaders, published [Der Judenstaat \(The Jewish State, 1896\)](#). Herzl argued that the essence of the Jewish problem was not individual but national. He declared that the Jews could gain acceptance in the world only if they ceased being a national anomaly. The Jews are one people, he said, and their plight could be transformed into a positive force by the establishment of a Jewish state with the consent of the great powers. He

saw the Jewish question as an international political question to be dealt with in the arena of international politics. Herzl proposed a practical program for collecting funds from Jews around the world by a company to be owned by stockholders, which would work toward the practical realization of this goal. (This organization, when it was eventually formed, was called the Zionist Organization.) He saw the future state as a model social state, basing his ideas on the European model of the time, of a modern enlightened society. It would be neutral and peace-seeking, and of a secular nature.

In his Zionist novel, *Altneuland* (Old New Land, 1902), Herzl pictured the future Jewish state as a socialist utopia. He envisioned a new society that was to rise in the Land of Israel on a cooperative basis utilizing science and technology in the development of the Land. He included detailed ideas about how he saw the future state's political structure, immigration, fundraising, diplomatic relations, social laws and relations between religion and the state. In *Altneuland*, the Jewish state was foreseen as a pluralist, advanced society, a "light unto the nations." This book had a great impact on the Jews of the time and became a symbol of the Zionist vision in the Land of Israel. Herzl's ideas were met with enthusiasm by the Jewish masses in Eastern Europe, although Jewish leaders were less ardent. Herzl appealed to wealthy Jews such as Baron Hirsch and [Baron Rothschild](#), to join the national Zionist movement, but in vain. He then appealed to the people, and the result was the convening of the [First Zionist Congress](#) in Basle, Switzerland, on August 29th, 1897. What is less known is that the Zionist movement was received warmly also among Sephardic Jews, and *Altneuland* was translated very soon into Ladino.

The Congress was the first interterritorial gathering of Jews on a national and secular basis. Here the delegates adopted the Basle Program, the program of the Zionist movement, and declared, "Zionism seeks to establish a home for the Jewish people in Palestine secured under public law." At the Congress the [World Zionist Organization](#) was established as the political arm of the Jewish people, and Herzl was elected its first president. Herzl convened six [Zionist Congresses](#) between 1897 and 1902. It was here that the tools for Zionist activism were forged: *Otzar Hityashvut Hayehudim*, the [Jewish National Fund](#) and the movement's newspaper *Die Welt*. After the First Zionist Congress, the movement met yearly at an international [Zionist Congress](#). In 1936, the center of the Zionist movement was transferred to [Jerusalem](#).

Herzl saw the need for encouragement by the great powers of the aims of the Jewish people in the Land. Thus, he traveled to the Land of Israel and [Istanbul](#) in 1898 to meet with Kaiser Wilhelm II of [Germany](#) and the Sultan of the [Ottoman Empire](#). The meeting with Wilhelm was a failure - the monarch dismissed Herzl's political entreaties with snide anti-Semitic remarks. When these efforts proved fruitless, he turned to [Great Britain](#), and met with Joseph Chamberlain, the British colonial secretary and others. The only concrete offer he received from the British was the proposal of a Jewish autonomous region in east Africa, in Uganda. In 1899, in an essay entitled "The Family Affliction" written for *The American Hebrew*, Herzl wrote, "Anyone who wants to work in behalf of the Jews needs - to use a popular phrase - a strong stomach." The 1903 Kishinev pogrom and the difficult state of Russian Jewry, witnessed firsthand by Herzl during a visit to Russia, had a profound effect on him. He requested that the Russian government assist the Zionist Movement to transfer Jews from Russia to Eretz Yisrael.

At the Sixth Zionist Congress (1903), Herzl proposed the British [Uganda Program](#) as a temporary refuge for Jews in Russia in immediate danger. While Herzl made it clear that this program would not affect the ultimate aim of Zionism, a Jewish entity in the Land of Israel, the proposal aroused a storm at the Congress and nearly led to a split in the Zionist

movement. The [Uganda Program](#) was finally rejected by the Zionist movement at the [Seventh Zionist Congress](#) in 1905. Herzl died in [Vienna](#) in 1904, of pneumonia and a weak heart overworked by his incessant efforts on behalf of Zionism. By then the movement had found its place on the world political map. In 1949, Herzl's remains were brought to Israel and reinterred on [Mount Herzl](#) in Jerusalem. Herzl's books [Der Judenstaat](#) ("[The Jewish State](#)") and [Altneuland](#) ("Old New Land"), his plays and articles have been published frequently and translated into many languages. His name has been commemorated in the Herzl Forests at Ben Shemen and Hulda, the world's first Hebrew gymnasium — "Herzliya" — which was established in [Tel Aviv](#), the town of [Herzliya](#) in the Sharon and neighborhoods and streets in many Israeli towns and cities. Herzl coined the phrase "If you will, it is no fairytale," which became the motto of the Zionist movement. Although at the time no one could have imagined it, Zionism led, only fifty years later, to the establishment of the independent State of Israel. Herzl was 44-years-old when he died in the summer of 1904, on the 20th of Tammuz in the Jewish calendar.

I wanted to read once again *Altneuland* (The Old New Land) by Theodor Herzl, the book that our Founding Father wrote with his vision about the old new land of the Jews. I have read several times *Der Judenstaat* – the Jewish State, but I wanted to enjoy once more the Utopia of *Altneuland*. I could read it in German as it was written initially in this language, in Hebrew as it has become a classic in Israel, in English, French, Spanish or in many of the other languages of the Jewish diaspora. But I chose to read it in Ladino from a rare book written a hundred years ago in Rashi letters in Saloniki, Greece. My father Albert and many of the Sephardic Jews read Herzl's books and were converted to Zionism, settling in Palestine and since 1948 in Israel.

Herzl's last literary work, *Altneuland* (in English: [The Old New Land](#), 1902), is a [novel](#) ([full text in English translation](#)) devoted to Zionism. Herzl occupied his free time for three years in writing what he believed might be accomplished by 1923. Though the form is that of a romance, It is less a novel than a serious forecast of what could be done within one generation. The keynotes of the story are love of [Zion](#) and insistence upon the fact that the suggested changes in life are not utopian but to be brought about simply by grouping all the best efforts and ideals of every race and nation. Each such effort is quoted and referred to in such a manner as to show that *Altneuland*, though blossoming through the skill of the Jew, will in reality be the product of the benevolent efforts of all the members of the human family. Herzl envisioned a Jewish state that combined modern Jewish culture with the best of the European heritage. Thus a "Palace of Peace" would be built in Jerusalem to arbitrate international disputes, and at the same time the [Temple](#) would be rebuilt on [modern](#) principles. Herzl did not envision the Jewish inhabitants of the state as being [religious](#), but there was respect for religion in the public sphere. He also assumed that many languages would be spoken, and that [Hebrew](#) would not be the main tongue. Proponents of a Jewish cultural rebirth, such as [Ahad Ha'am](#), were critical of *Altneuland*.

In *Altneuland*, Herzl did not foresee any conflict between [Jews](#) and [Arabs](#). One of the main characters in *Altneuland* is a Haifa engineer, Reshid Bey, who is one of the leaders of the "New Society". He is very grateful to his Jewish neighbors for improving the economic condition of Israel and sees no cause for conflict. All non-Jews have equal rights, and an attempt by a fanatical rabbi to disenfranchise the non-Jewish citizens of their rights fails in the election which is the center of the main political plot of the novel. Herzl saw clearly what the Palestinians and Arabs fail to see until now, that the Jews contributed to the welfare of Israel much more than any other Arab state contributed to their welfare. The Israeli

Arabs/Palestinians thrive in Israel in spite of all the problems much more than in any other Arab state, economically and politically.

Herzl also envisioned the future Jewish state to be a "third way" between capitalism and socialism, with a developed welfare program and public ownership of the main natural resources. Industry, agriculture and trade were organized on a cooperative basis. Along with many other progressive Jews of the day, such as [Emma Lazarus](#), [Louis Brandeis](#), [Albert Einstein](#), and [Franz Oppenheimer](#), Herzl desired to enact the land reforms proposed by the American political economist [Henry George](#). Specifically, they called for a [land value tax](#). He called his mixed economic model "Mutualism", a term derived from French [utopian socialist](#) thinking. Women would have [equal voting rights](#)—as they had in the Zionist movement from the Second Zionist Congress onwards. In fact Israel adopted many mutualist precepts – the Kibbutz, cooperatives... In *Altneuland*, Herzl outlined his vision for a new Jewish state in the [Land of Israel](#). He summed up his vision of an open society: "It is founded on the ideas which are a common product of all civilized nations. ... It would be immoral if we would exclude anyone, whatever his origin, his descent, or his religion, from participating in our achievements. For we stand on the shoulders of other civilized peoples. ... What we owe we owe to the preparatory work of other peoples. Therefore, we have to repay our debt. There is only one way to do it, the highest tolerance. Our motto must therefore be, now and ever: 'Man, you are my brother.'"

In his novel, Herzl wrote about an electoral campaign in the new state. He directed his wrath against the nationalist party, which wished to make the Jews a privileged class in Israel. Herzl regarded that as a betrayal of Zion, for Zion was identical to him with humanitarianism and tolerance—and that this was true in politics as well as religion. Herzl wrote: "Matters of faith were once and for all excluded from public influence. ... Whether anyone sought religious devotion in the synagogue, in the church, in the mosque, in the art museum, or in a philharmonic concert, did not concern society. That was his [own] private affair." *Altneuland* was written both for Jews and non-Jews: Herzl wanted to win over non-Jewish opinion for Zionism. When he was still thinking of [Argentina](#) as a possible venue for massive Jewish immigration, he wrote in his diary: "When we occupy the land, we shall bring immediate benefits to the state that receives us. We must expropriate gently the private property on the estates assigned to us. We shall try to spirit the penniless population across the border by procuring employment for it in the transit countries, while denying it any employment in our country. The property owners will come over to our side. Both the process of expropriation and the removal of the poor must be carried out discretely and circumspectly ... It goes without saying that we shall respectfully tolerate persons of other faiths and protect their property, their honor, and their freedom with the harshest means of coercion. This is another area in which we shall set the entire world a wonderful example ... Should there be many such immovable owners in individual areas [who would not sell their property to us], we shall simply leave them there and develop our commerce in the direction of other areas which belong to us". Do we have in Israel a "third way society" or a neoliberal capitalistic regime? Are we a wonderful example to the entire world or a society that is boycotted by more and more states and peoples? Are we a country with the highest tolerance to others or a quasi-theocratic state ruled by ultra-orthodox and ultra-right parties? Where have the mutualists precepts vanished, the welfare state disappeared, most of Herzl's vision sunk into oblivion? I leave to the reader to answer those questions by himself, as sic transit gloria mundi?

Altneuland tells the story of Friedrich Löwenberg, a young [Jewish](#) Viennese intellectual, who, tired with European decadence, joins an Americanized [Prussian](#) aristocrat named Kingscourt

as they retire to a remote [Pacific](#) island (it is specifically mentioned as being part of the [Cook Islands](#), near [Raratonga](#), which may explain why this country and other Pacific tiny states support vehemently Israel...). Stopping in [Jaffa](#) on their way to the Pacific, they find [Palestine](#) a backward, destitute and sparsely populated land, as it appeared to Herzl on his visit in 1898. Löwenberg and Kingscourt spend the following twenty years on the island, cut off from civilization. As they pass through Palestine on their way back to Europe, they discover a land drastically transformed, showcasing a free, open and [cosmopolitan modern](#) society, and boasting a thriving [cooperative](#) industry based on state-of-the-art technology. In the two decades that have passed, European Jews have rediscovered and re-inhabited their *Altneuland*, reclaiming their own destiny in the [Land of Israel](#). Herzl's novel depicts his blueprint for the realization of Jewish national emancipation, as put forward in his book *Der Judenstaat* (The Jewish State) published in 1896. Both ideological and utopian, it presents a model society which was to adopt a [liberal](#) and [egalitarian](#) social model, resembling a modern welfare state. Herzl called his model "Mutualism" and it is based on a mixed economy, with public ownership of the land and natural resources, agricultural cooperatives, [state welfare](#), while at the same time encouraging [private entrepreneurship](#). A true modernist, Herzl rejected the European [class system](#), yet remained loyal to Europe's cultural heritage. Rather than imagining the Jews in *Altneuland* speaking exclusively [Hebrew](#), the society is multi-lingual – with German, Hebrew and Yiddish being the main languages and reproducing European customs, going to the opera and enjoying the theatre. I share of course Herzl's vision, as I think that Israel has to be a cosmopolitan multi-lingual very cultural 'third way' society, quite opposite to the present situation. While Jerusalem is the capital, with the seat of parliament ("Congress") and the Jewish Academy, the country's industrial center is the modern city of [Haifa](#). In the actual Israel, this role was to be taken by [Tel Aviv](#), a city which did not yet exist at the time of writing and whose name was inspired by the book itself.

Herzl saw the potential of Haifa Bay for constructing a modern deep-water port. However, in reality it would be the [British Empire](#) rather than the Zionists which would realise that potential and make considerable strategic use of it during the [Second World War](#). Though Israel would eventually inherit the Haifa port and city, by 1948 the central role of Tel Aviv (*Altneuland* in Hebrew) was established, with Haifa – though a major Israeli city – relegated to a secondary position. As envisioned by Herzl, "All the way from Acco to Mount Carmel stretched what seemed to be one great park". In Israel of today the very same area became a giant industrial zone, reckoned the most heavily polluted part of the country, and Haifa where I live has the highest rate of cancers in Israel. The final sentences of *Altneuland* emphasize what was the basis of this old new state, according to the main protagonists of the novel. We bring it here in English and in Ladino in Hebrew/Rashi letters as it was written about a hundred years ago in the Feuilleton *El Tiempo* of Saloniki, Greece, and translated into Ladino (from which language?) by Jean Florian. My humble contribution was in transcribing the Rashi writing into Latin writing:

At last Friedrich put a question, and every man answered it after his fashion.

אין איסטאי איסטאדו די אלמה, פרידריק ליב'ניברג סוליב'אנטו אונה קיסטיין אלה קואלה טודוס לוס איסטטיינים ריספונדיירן אונז דיספואיס די אוטרו קאדה אונז אסו מאנירה. לה קואסטיין אדריסאדה אירה לה סיגואינט:
En este estado de alma, Friedrich Loewenberg solevanto una kuestion ala kuela todos los asistentes respondieron uno despues de otro kada uno asu manera. La kuestion adresada era la siguiente:

"We see a new and happy form of human society here," he said. "What created it?"

- נוזוטרוס ב'ימוס אקי אונה פ'ורמה נואיב'ה, מאס ב'ינטורוזה, די לה ב'ידה אין קומון די לוס אומבריס, קיין קריאו איסטו?

- Nosotros vimos aki una forma nueva, mas venturosa, de la vida en komun de los ombres, ken kreo esto?

"Necessity!" said Littwak the elder.

איל ב'ייז'ו ליטב'אק ריספונדייו: איל אפריטו.

El viejo Littwak respondio: El apreto.

"The reunited people!" said Steineck the architect.

איל ארשיטיקטה שטאייניק ריספונדייו: איל פואיב'לו אאונאדו!

El arshitekta Steineck respondio: El pueblo aunado!

"The new means of transportation!" said Kingscourt.

קינגסקורט דישו: לוס נואיב'וס מיזוס די קומוניקאסיון!

Kingscourt disho: Los nuevos mezos de komunikasion!

"Knowledge!" said Dr. Marcus.

איל דוקטור מארקוס דישו: איל סאב'יר!

El doktor Marcus disho: El saver!

"Will Power!" said Joe Levy.

יוסף לוי דישו: לה ב'ולונטאד!

Joseph Levy disho: La voluntad!

"The Forces of Nature!" said Professor Steineck.

איל פרופ'סור שאטייניק דישו: לאס פ'ואירסאס די לה נאטורה.

El Profesor Steineck disho: Las fuersas de la natura.

"Mutual Toleration!" said the Reverend Mr. Hopkins.

איל פרידיקאדור אינגלס אופ'קינס דישו: לה טולירנסיה מוטואלה!

El Predikador ingles disho: La toleransia mutuala!

"Self-Confidence!" said Reschid Bey.

ראשיד ביי דישו: לה קונפ'יאנסה אין סי!

Reshid Bey disho: La konfiensa en si!

"Love and Pain!" said David Littwak.

דוד ליטב'אק דישו: איל אמור אי לה סופ'ריאנסה!

David Littwak disho: El amor i la sufriensa!

But the venerable Rabbi Samuel arose and proclaimed: "God!"

מה איל ב'ייז'ו רבי שמואל סי ליב'אנטו סולאנילמינטי אי דישו: איל דייו!

Ma el viejo Rabbi Shmuel se levanto solanelmente i disho: El Dio!

And the Feuilleton El Tiempo invites the readers of Altneuland – Vieja Nueva Tiera – at the end of the novel, to read on next Sunday the new novel – La Mujer ke Mata... – The woman who kills – el mas sensasonial de los romansos – the most sensational novel.

Finally, I would like to end this chapter with a personal note, emphasizing more than anything else how Ladino is a sentimental link to tradition for all the Sephardic Jews. I had a friend, one of the most ethical and best men that I have ever met – Harry Recanati. He came from a very wealthy family, the Recanatis, originating from the Italian town Recanati, moving to Saloniki in the Ottoman Empire/Greece, and then to Israel. His father Leon Recanati founded the Discount Bank in Israel, one of the three largest banks, with Bank Hapoalim (Bank of the Workers) and Bank Leumi (National Bank). Discount bank hired mostly Sephardic Jews and its clientele was mainly Sephardic. Harry, as the eldest son, managed the Bank after his father died quite young. He told me and wrote in his book "Recanati, father and son" that he had to leave the management in view of an ethical conflict with his brothers on how to run the bank. The Israel Discount Bank added the international merchant banks of Ralli Brothers to its portfolio of private banks, and Harry Recanati left when the other Directors chose to [list](#) the banking group publicly on the [Tel Aviv Stock Exchange](#), in 1970. The Israel Discount Bank became insolvent in 1983 and was controversially [nationalised](#) by the Treasury of the Government of Israel. Harry Recanati had retained ownership of the Swiss [private bank](#) of Ralli Brothers (Bankers) S.A. which he later sold to [Security Pacific Bank](#) of [California](#), using the proceeds to found a number of public museums. These Ralli Museums are free, non-profit galleries, of contemporary Latin-American art. We used to meet in his apartment in the Caesarea Ralli Museum whenever he came to Israel (he lived in the Ralli Museums all over the world), and to mourn for the lack of ethics in Israel. He read my ethical academic books and novel (which had many Sephardic motives) and I read his book, the first book on ethics in banking that was written in Israel. Both of us spoke Ladino.

When Harry was almost ninety he had a stroke and he was brought to his apartment in the Rally Museum of Caesarea, where nurses took care of him day and night. The manager of the Museum, a remarkable and very talented woman, told me that Harry cannot communicate and does not understand what is told to him. I told her that nevertheless I want to visit him with my wife (he also met before my son Yossi who is an architect, as he was very interested in architecture). We came one morning, and noticed that indeed he could not communicate with any of the persons who were there, nurses, the manager and friends. I started to talk to him in Ladino, like we used to before. I told him: "Kerido Harry, saves ke otrun poko avemos Pesah i vamos a meldar la Agada kon toda nuestra familia. Te akodras komo kantavas en Ladino kuando estavas chiko kon tu papa i tu mama i toda tu familia? Es pekado ke no puedes estar kon nosotros, ma vamos a pensar a ti kuando vamos a kantar (i kanti): **"Este es el pan de la afriision ke komieron muestros padres en tierra de Ayifto. Todo el ken tiene ambre venga i koma. Todo el ken tiene de menester venga i paskue. Este anyo aki, a el anyo ke viene en tierra de Yisrael. Este anyo aki, siervos, a el anyo ke viene en tierra de Yisrael ijos fo-o-o-ros..."** When Harry heard me singing the famous Pesah song "ha lahma anyaa" in Ladino, as he used to sing when he was a kid, he burst out crying and large drops of tears came down his cheeks...

In English: "Dear Harry, you know that in a short while we'll have Pesah/Passover and we'll read the Agada with all our family. You remember how you used to sing in Ladino when you were a kid with your father and your mother and all your family? It is unfortunate that you'll not be able to be with us but we'll think about you when we'll sing (and I sang): This is the bread of affliction which our ancestors ate in Egypt. Let all who are hungry come and eat of it; all in need come and celebrate Passover. This year we observe it here; next year may we be in the Land of Israel. This year we are slaves in exile; next year may we be free men in the Land of Israel." In Aramaic: "A lakhma anya di ahalu avatana beara demitsrayim, kol dikhfin yeteh veyehol, kol ditsrikh yeteh veyifsakh, ashata aha leshana abaa beara deyisrael, ashata

avdeh, leshana abaa beara deyisrael beneh horin." Written in Aramaic alphabet and translated into Hebrew:

ARAMAIC - "הָא לְחֵמָא עֲנָא דִּי אָכְלוּ אֲבֵהֶתְנָא בְּאַרְעָא דְּמִצְרַיִם . כָּל דְּכַפִּין יִיתִי וְיִיכֹל . כָּל דְּצָרִיךְ יִיתִי וְיִפְסַח .
 הָשְׁתָּא הָכָא . לְשָׁנָה הַבָּאָה בְּאַרְעָא דְּיִשְׂרָאֵל . הָשְׁתָּא עֲבָדִי לְשָׁנָה הַבָּאָה בְּנֵי חוֹרִין . " HEBREW - "זהו לחם העוני
 שאכלו אבותינו בארץ מצרים. כל הרעב יבוא ויאכל, כל הצריך יבוא ויפסח (מלשון [קורבן פסח](#)). השנה (אנו) כאן,
 לשנה הבאה בארץ [ישראל](#), השנה (אנו) עבדים, לשנה הבאה בני חורין."

THOUGHTS & QUOTES ON ITALIAN CULTURE

The first book I have read in Italian in 1965 was *Sei personaggi in cerca d'autore* by Luigi Pirandello. [La Forza del Destino](#), The Power of Fate, by Verdi, my favorite composer, could be the leitmotif of my [affinities with Italy](#). My father, Albert, was born in Izmir, Smyrna, which was a cosmopolitan city, with most of its population non-Turkish: Greeks, Armenians and Jews. The Turks had welcomed warmly the Sephardic Jews and Marranos after 1492, and the Jews have kept their Spanish language and customs, not assimilating with the Turks. In 1922, my father, Albert aged 16, left Smyrna for Milano, where a large part of his family resided. For six months he sold in the streets *Corriere della Sera*, on one night singing with his Fascist friends:

[Giovinezza, giovinezza](#)
primavera di bellezza,
nel fascismo è la salvezza
della nostra libertà.

Youth, youth
Spring of beauty,
In fascism, salvation
Of our freedom.

Freedom and fascism don't go so well together, as we know, except in the song. And, on the other night Albert joined his Communist friends (at the age of 16 all looked similar), singing:

First verse:
Avanti o popolo, alla riscossa,
[Bandiera rossa, Bandiera rossa.](#)
Avanti o popolo, alla riscossa,
Bandiera rossa trionferà.

Refrain:
Bandiera rossa la trionferà
Bandiera rossa la trionferà
Bandiera rossa la trionferà
Evviva il comunismo e la libertà.

Literal Translation:
Forward people, to the rescue,
the Red Flag, the Red Flag.
Forward people, to the rescue,
the Red Flag will triumph.

The Red Flag will triumph,
the Red Flag will triumph,
the Red Flag will triumph,
Long live communism and freedom.

Freedom and communism don't go so well together, as we know, except in the song. Why fascists, communists, and neoliberals like Milton Friedman (in his famous book: *Capitalism and Freedom*), preach so much about freedom, while in practice they do exactly the opposite? (more on neoliberal totalitarian approach - read Naomi Klein's *The Shock Doctrine*). Anyhow, at the age of 16 Albert didn't mind so much about freedom, which did not exist in the Ottoman Empire either. Unfortunately or fortunately, after six months, the police arrested him and he was told: *Ritorna a tu paese straniero...* Go back to your country, stranger! He left for Cairo, where he met my mother Pauline, they married, and that is how I was born, in another cosmopolitan city - Cairo, where there were hundreds of thousands of Europeans – Italians, Greeks, Armenians, Jews, English and French. So, Jacques and Albert, could sympathize with the old gypsy in the French song of Dalida, another Egyptian/Italian/French: *Je viens d'un pays qui n'existe plus*, I come from a country that doesn't exist anymore, as Turkey is now 99% Moslem, and Egypt doesn't have foreigners anymore. *La Forza del Destino*, Albert could have been killed in Smyrna if he would have stayed there during the war between Greece and Turkey in 1922, or in Milano, staying there through World War II, like all his uncles who died in the Holocaust. Dozens of my relatives died in the Holocaust, mostly Italians, but also Greeks from Rhodes and other places.

We encounter in our life set-backs or even tragedies and we think that it is the end of the world, how unlucky we are. That is what my father probably thought when he was deported from "paradise – Italy". He wanted so much to be an European, being born in a European city Smyrna with a majority of Europeans, educated in English at the Scots Mission School, speaking at home French and Ladino – two European languages, longing for Spain the lost fatherland. If he could have stayed in the modern Milano in Italy it would have been the peak of his wishes, but he was expelled from paradise, and had to compromise in living in another Middle Eastern country. But God or fate were smiling to him, as this move changed his life, he was saved from a certain death by the German Nazis and their collaborators the Italian Fascists, and when he left the Egyptian "purgatorium" in 1953 it was almost at the last moment, emigrating at last to the country of his dreams, being such a fervent Zionist – Israel. So, I thank God/chance for this sequence of events as I had the luck to be born to the sweetest woman on earth – Pauline my mother, and the luck to live in Israel, which is my fatherland and which I prefer to all the other countries in the world.

So, I was born in Cairo, after my father made the right decisions or had the right intuition or luck, but my father made another cardinal decision in 1953 when he decided to leave Cairo for Israel. All the Jews who remained in Cairo were expelled a few years later. While leaving Egypt, the authorities stamped in our laissez-passer – with no right to return, and I read recently that in a debate at the Egyptian Parliament (nowadays, **after** the peace agreement) some MPs offered the Jewish born in Egypt the right of return, if and when Israel would collapse, the Palestinian refugees will return to their homeland, and the Jews would be expelled to their native countries – Ruthy to Romania, Jacques to Egypt, and their Israeli born children to "hell" as one of the Palestinian leaders has suggested in an interview in 2015. But, after a long discussion, the Egyptian Parliament has decided that even then the Jews born in Egypt, a few thousands still living as almost all the Jews were expelled in 1956, would not have the right to return...

I enjoyed most Italian opera, and especially Rigoletto by Piave and Verdi, my favorite composer. But, during my military service in Tel Aviv, I couldn't afford to go to the opera, so I borrowed the records of the opera from the library of the US Embassy, near the flat where I lived. They told me that I can keep them indefinitely as no one ever asked for them. I borrowed also books from the British Institute, the Centre Culturel Francais, etc., as I couldn't afford to buy books in foreign languages as well. So, I heard Rigoletto every free moment with the libretto until I knew the opera by heart. After that, I invited my dates to hear Rigoletto in my flat, as I couldn't afford to go to concerts, and women were delighted (not all of them, of course, but just the intellectual) to have a cultural evening hearing opera with my explanations. We'll stop here, *Si non e vero e ben trovato...* Anyhow, from those evenings I remembered the most famous arias – [Questa o quella](#), [Pari siamo](#), [Caro nome](#), [Parmi veder le lagrime](#), [Cortigiani](#), and of course *La donna e mobile*. The last aria was especially effective, as my dates tried very hard to convince me that *la donna no e mobile*, the woman is not fickle. So, here it is, in Italian and English:

[La donna è mobile](#)

Qual piuma al vento,
Muta d'accento
E di pensiero.

Sempre un amabile,
Leggiadro viso,
In pianto o in riso,

[Woman is flighty](#)

Like a feather in the wind,
She changes her voice
And her mind.

Always sweet,
Pretty face,
In tears or in laughter,

È menzognero.

She is always lying.

È sempre misero
Chi a lei s'affida,
Chi le confida
Mal cauto il cuore!

Always miserable
Is he who trusts her,
He who confides in her
His unwary heart!

Pur mai non sentesi
Felice appieno
Chi su quel seno
Non liba amore!

Yet one never feels
Fully happy
Who on that bosom
Does not drink love!

And from such tragic themes, we come back to my early childhood, when my mother Pauline used to sing me nursery rhymes in Italian: clap your little hands/your father is arriving soon/he'll bring you biscuits/and you (name of the baby) will eat them. I continued the tradition, that possibly started with my grandmother singing the rhymes to my mother after learning them from their Italian neighbours in Cairo, sang it to my children and then to my grandchildren. But I taught my children also whole Arias from Rigoletto, so they were "fluent" in Italian anyhow. Anyhow, when Shirly my daughter travelled with her family to Sicily, she sang the rhymes to her baby and a young mother who sat by her side started talking to her in Italian being sure that she was an Italian (she also looks Italian). She was moved to tears when Shirly told her the story of how she learned the rhymes. After 100 years the rhymes have returned finally to Italy.

Batti, batti le manine

che adesso arriva papà
ti porta i biscottini

e (Paula/Jakito/Yossika/Amirush/Shushki/Tomeriko/Doroni/Ofifi/Nogush/Itaiush/Noam-Dudi-Budi/Idodo/Yaeli) li mangerà!

Apologies that the lullabies that I heard in Cairo were not in Arabic, but surfing on the Internet, I found a little bit late at the age of 70 a quite sad [Arabic lullaby](#), Yalla Tnam – Let's go to sleep, sung by the famous Christian Lebanese singer Fairuz. It sounds very nice and it reminded me of the rendition by Season 2 winner of the Israeli version of "The Voice," [Lina Makhoul](#), of a Fairuz song, in Arabic, that thrilled most of the audience as well as the judges of the TV talent show. Well, an Arab singer winning an Israeli talent show, fits quite well an Apartheid country...

I visited Italy several times – on business, tourism and lecturing. I visited and enjoyed Roma, Napoli, Sorrento, Capri, Milano, Firenze, Venezia, Vatican, Stresa and the Lakes, the paintings, sculptures, architecture, churches, cathedrals, scenery, fountains, the people and language. I bought many Italian books and read the best Italian novels and plays. I like Italian films, old and new, I gave lectures in Stresa, I have many Italian friends as we share many things in common. When I flew to Milan in 2001 to participate in an Israeli-EU symposium in Stresa, an Italian friend came to the airport specially to give me the keys to his apartment in Milano, urging me to spend a week there after the symposium. I thought whom of my good friends would do such a gesture? Well, my Greek friend invited me also for Christmas to stay a week with his family, I also enjoyed the hospitality of the Spanish in Coria and elsewhere, the trip to Portugal was the best ever due mainly to the fantastic ambience and excellent

guide, so something is quite good with the Southern Europeans, although they don't obtain high scores in Transparency International's ethical ranking, that they are called pejoratively PIGS (Portugal, Italy, Greece, Spain) because of their credit deficiencies, and that the only time that we were robbed was in Rome when a motorcyclist snatched Ruthy's handbag, with all our money, passports and credit cards. Ruthy was dejected, but I insisted that we proceed with our plans as scheduled, going an hour later to the theater seeing *Little Shop of Horrors* in Italian, and the day after to an organized tour to the beautiful Capri, Napoli and Sorrento. There is another strong point in favor of the so-called PIGS countries – my family comes from those states: Spain (Coria), Portugal (after 1492), Italy (part of my family until the Holocaust), Greece (my grandfather from Larissa), and as much as my ethical aspirations are North European, I should not forget that my roots are from the more corrupt Southern countries and Israel. And as Jesus said in [John 8:7](#) - "Let any one of you who is without sin be the first to throw a stone at her." Don't be too righteous, [nobody is perfect](#)...

We have to beware from succumbing to generalizations as society is much more complex than its prejudices. It is true that my friends from southern countries behaved hospitably but so did my French friends inviting me to reside in their homes in Paris, sending me plenty of articles and books that assisted me so much in writing my PhD dissertation, the friendly and generous conduct of the Frenchman Professor de Bettignies and Dutch Professor Van Luijk, assistance from my British, Scandinavian, German, Swiss and Belgian friends. So, was I lucky that I had such good friends, without any relevance to the nationality of my friends? As, ultimately, there are good people, ethical people throughout the world, and I behaved as a true friend towards my friends as well and towards most of the people with whom I was in contact – my subordinates whom I promoted and encouraged and most of them became Vice Presidents or CEOs, the hospitality that I showed to my friends inviting a German friend and his Spanish wife to the Seder with all my family, singing in Ladino/Spanish and Yiddish/German the Haggadah, assisting my students in Israel and abroad and treating them kindly as my own family...

I believe that you have to take life as a package deal – the honey and the sting, good and bad, and even when you think that the situation is desperate (when we were conned by our best Israeli and American – not Italian and Greek – friends, making us lose most of our savings), or when you fall and break your shoulder, you lose your hearing, eyes and orthopedic surgery are unsuccessful, and you get on your savings interests of 0.1 percent, although you planned your pension with a rate of 5% – you should look at the bright side of things, and find a new direction – in business, in ethics, in teaching, as a self-employed businessman, in community working, or writing this book... Actually, many friends boast that they always succeeded in their surgical procedures, their investments, in their jobs, with women, they are very lucky in whatever they do. I have always apprehension about the evil eye/malocchio (everybody knows that I am not superstitious, hamsa hamsa), so I don't boast about my successes, but once when it was too much, I answered that I used 99% of my luck allotment when Ruthy and me fell in love and married, so I don't have any luck left for the other events. But, as a matter of fact, I feel myself very lucky with my family – wife, children and grandchildren. I was quite lucky as well with my career when I achieved more than I have ever planned as an executive, consultant, in academics, and also in achievements that I have not planned as writing more than ten books that were purchased by thousands of the best universities' libraries, teaching and educating thousands of students, lecturing to audiences of hundreds with a great success, writing important articles and essays, and being perceived as one of the most influential ethical persons in Israel.

I may be unlucky in my investments, but still I earned much more money than I ever dreamed of, living in a beautiful house (I don't desire a better one), and I never lacked money for any wishes that I (and Ruthy) had. I was not so successful with my friends, but after I've learned my lessons, I have now excellent friends that wish us well and share our ethical views. I received recently the highest ethical prize in Israel and I invited some friends. Almost all of them came to the ceremony (36, or the Lamed Vav – 36 in Hebrew numerology – Justs, while those who couldn't come had excellent reasons – meeting with the Israeli President, traveling abroad, etc.). Even with health problems – I may have broken my shoulder, but it was the first time, at the age of 69, that I ever broke something. And if I can't hear well and had to resign from my teaching career – I still lectured during ten years from the age of 60 (!) to 70. Many people whom I know are multi millionaires, but they are very unsuccessful with their wives and children, or have very serious health problems, or don't have true friends. However, some of them are very ethical and lucky in all their endeavors – esteemed professors, successful businessmen, with fantastic families, plenty of friends, and very rich on top of that – while others are ethical crooks causing damages of hundreds of millions to shareholders, making the lives of their employees miserable, and above the law, and still are very rich, with a reasonable family life, successful in business, and appreciated by society as benefactors, even perceived wrongly as being very ethical... You have to be content in your fate and in your life - lucky and unlucky (I live in a terror/war zone, but still I could be born in Syria, Yemen, Sudan, or remained in Egypt, and anyhow after 9/11 in New York/Washington and 13/11 in Paris – who is safe anyhow?), look at the bright side of things, think positive, be ethical with a clean conscience, and be moderate in whatever you do!

Italy has contributed to the world invaluable presents – first of all one of the happiest, most intelligent, hearty, hospitable people in the world, the best paintings and sculptures, some of the best novels, films, and plays, the best songs, operas, and music, one of the most beautiful sceneries in the world, a remarkable history – ancient and modern, a thriving economy, the most melodious language, a religion that in its finest moments was humane and contributed to society so much, a healthy attitude to life looking at the bright side of things... In my worst moments I did not resort to Zola, Beethoven, Shakespeare, Tolstoy or Brecht. I was moved to tears when hearing the aria of Rigoletto: [Cortigiani, vil razza](#) dannata/per qual prezzo vendeste il mio bene?/A voi nulla per l'oro sconviene! – Courtiers, you damned vile race,/ for how much did you sell what is mine?/There is much you wouldn't do for gold! All the lackeys of the big bosses and tycoons that would sell their mother for a few bucks did not hesitate to take from their friend what I owned, as Gordon Gekko says in "Wall Street" – If you need a friend get a dog! But, all the time I had hope that things would sort out, and here again I was moved to tears form another aria - Vincero (Nessun Dorma) from Puccini's Turandot (also seen at the Sydney Opera House). Yes, I'll win in spite of all the hardships, in spite of all the mighty evil-minded that I fought, at dawn I'll win, as the darkest hours are just before dawn, night will vanish, "stars" will fade and indeed many of them faded, and in my terminology I've won ultimately. The best opera singers have sung this aria, one of the best is [Pavarotti](#), but also great are the three tenors: [Pavarotti, Carreras and Domingo](#), [Aretha Franklin](#), [Beniamino Gigli](#), [Franco Corelli](#), and many others.

Dilegua, o notte!
Tramontate, stelle!
Tramontate, stelle!
All'alba vincerò!
Vincerò! Vincerò!

Vanish, o night!
Fade, you stars!
Fade, you stars!
At dawn, I will win!
I will win! I will win!

THOUGHTS & QUOTES ON SPANISH ORIGINS

The first book I have read in Spanish in 1964 was: [Don Quijote de la Mancha](#) by [Miguel de Cervantes](#). I read the book twice in Spanish and prior to then also in Hebrew, when I was a teenager. Just for curiosity I looked at a famous book's website on 500 Great Books for Teens and I saw there books as Life of Pi by Yann Martel, Homecoming by Cynthia Voigt, The Da Vinci Code by Dan Brown, but I didn't find my favorite authors when I was a teenager – Cervantes, Hugo, Zola, Shakespeare (except Romeo and Juliet paired with West Side Story...), not even less "difficult" books by Charles Dickens, Mark Twain, Jules Verne, Alexandre Dumas. So, at least my book will honor the immortal Cervantes (and other great authors throughout the book) with one of the most brilliant extract on morals and virtue – the dialogue between Sancho Panza and Don Quijote. And this reminds me of a funny story – one of my book was edited about ten times, whatever one editor did the other undid until the final edition was much inferior than the original one, but one of the editor excelled, when she told me that the name of Sancho Panza is Sancho Poncho. Well, she found to whom to say that, I thought, and I answered her that Sancho's name was indeed Panza, but she complained that I am not cooperative, I argued on every thing, and anyhow it was her responsibility as an editor to make corrections. After a lengthy discussion I had to fax a photocopy of the Spanish original, which of course I have at home in order to convince her that I was right. But, I think that she still maintains (e pur si muove) that Cervantes was mistaken, as Poncho is so Spanish... (actually, Indian from South America), while the truth is that Sancho was called Panza (belly in Spanish) because he was fat... Long live ignorance!

As psychology is at the basis of ethical conduct in business, we cannot understand the conduct of the businessmen without analyzing in depth their character and motives. But is it practical to base the ethical principles on philosophical, religious or literary bases? Do we not incur the risk to be treated as Don Quixote, who was completely subjugated by his ideals? Can we be practical, succeed in business and retain however the ideological and literary bases? Would the environment of the businessmen treat us with respect, commiseration, alienation or envy? This is the basic dilemma of many businessmen who try to reconcile the ideal and the reality without becoming a Don Quixote.

“Cervantes condemns the books of chivalry, as embodied in his character Don Quixote, as both fantastical and dangerous. The chivalric hero may seduce people into believing that the improbable can be achieved with ease. Cervantes’ character, Don Quixote, shows that this is not the case. Here is a hero possessed of fine qualities of both character and intellect who sallies forth in the name of justice and human betterment. Nonetheless, while being inspired by high ideals, his efforts are futile because he pays little or no attention to the means necessary for achieving these ends, and he fails to gain requisite knowledge of the circumstance and conditions necessary to properly understand human actions. Cervantes seems to be saying that when idealistic theory is divorced from practice, however noble the theory and good the intentions, requisite skill, judgment, and discretion will be lacking and the human good will not be advanced. (Business Ethics Quarterly, January 1998, Klein, Don Quixote and the Problem of Idealism and Realism in Business Ethics, p. 44)

“So far our Don Quixote scenario could provide a cautionary tale for business ethics. Some businesspeople with a good deal of practical experience have looked askance at the sallies of philosophical bookish knights armed with their (e.g. deontological and/or utilitarian) moral theories which they learned ‘living in the books’. They might argue that there is something comic in some philosophers’ attempts to solve the morally complex problems of business by

applying moral theories to overly simplified 'case studies'. (Business Ethics Quarterly, January 1998, Klein, Don Quixote and the Problem of Idealism and Realism in Business Ethics, p. 45)

The environment of the ethical businessmen or people in general can treat them as courageous, crazy or impertinent, as is maintained by Sancho Panza or as virtuous but calumniated as maintained by Don Quixote:

“En lo que toca – prosiguió Sancho – a la valentia, cortesía, hazanías y asunto de vuestra merced, hay diferentes opiniones: unos dicen: ‘Loco, pero gracioso’; otros, ‘Valiente, pero desgraciado’; otros, ‘Cortes, pero impertinente’; y por aquí van discutiendo en tantas cosas, que ni a vuestras merced ni a mí nos dejan hueso sano.

Mira, Sancho – dijo don Quijote – donde quiera que esta la virtud en eminente grado, es perseguida. Pocos o ninguno de los famosos varones que pasaron dejó de ser calumniado de la malicia.” (Cervantes, Don Quijote de la Mancha II, p. 43)

“In what pertains, continued Sancho, to courage, courtesy, exploits, and business of your grace, there are diverging opinions: the ones say: ‘Crazy, but gracious’; the others, ‘Courageous, but unhappy’, others, ‘Courteous, but impertinent’ and from there they discuss so many things, that neither to your grace neither to me they leave a whole bone.

- Look there, Sancho – said don Quijote – in the place where virtue exists at a large degree, it is persecuted. A few or none of the respectable and famous men who have existed have escaped from the calumny of malice.”

And Peters and Waterman reinforce the importance of the moral element in our life by affirming: “We desperately need meaning in our lives and will sacrifice a great deal to institutions that will provide meaning for us.” (Peters and Waterman, In Search of Excellence, p. 56) And they continue: “an effective leader must be the master of two ends of the spectrum: ideas at the highest level of abstraction and actions at the most mundane level of details.” (same, p. 287) And thus, like Don Quixote, the leader has to possess a vision: “Attention to ideas – pathfinding and soaring visions – would seem to suggest rare, imposing men writing on stone tablets.” (same, p.287)

My ties with Spain – history, travel, literature, [music](#), [folklore](#), [religion](#), [people](#), heritage, transcendental..., can be [summarized by](#) (link to Calle de la sinagoga de Coria) the [wonderful](#) (link to Cory's article in Ladino) [experience](#) (link to article in Ladino & Spanish) [of discovering](#) (link to Coria) the [synagogue](#) (links to photos Coria Sinagoga) of [Coria](#) (link on the Juderia of Coria), narrated in [an article written by Cory](#) (link to Cory's article in Spanish) in [5 languages](#) (another link to Spanish) and [published all over the world](#) (links to photos Coria Judios):

"This story can be read on a realistic or a surrealistic level. Some people will say "if it is not true it is a good fairy tale", others will read it with scepticism, wonder or incredulity. I am not an archeologist, an historian or a medium. I am a businessman, with a doctorate in business

ethics. I teach courses in various universities, wrote academic books, articles, a website, but also a novel, a play and some poems. Every one according to his inclinations...

On August 10th 1998, I wrote a letter to the mayor of Coria in Spain, notifying him that I intended to visit his town, as it is a tradition that my family name originates probably from the town of Coria. I wrote him that my mother tongue was Ladino, but that I had also studied Spanish. I added that I live in Israel, was born in Egypt, from parents and grandparents originating from Greece and Turkey, and that I had visited Spain many times on business.

On August 20th 1998, the mayor of Coria wrote me: "Greetings to Don Jacobo Cory, and being aware of the interest that he has in our town I am pleased to invite and welcome him, in view of the importance of the enterprise that brings him to visit our country. Jose Maria Alvarez Pereira takes this opportunity to express him his personal respect." The same day, I received an email from Juan Pedro Moreno, the archeologist responsible of the Service of Historic and Cultural Consultancy for the town council of Coria, who wrote me: "The motive of his visit seems to me very interesting and exciting. Mr. Mayor has transmitted to me his intention to visit us. Coria, keeps in its historic memory the name of the Synagogue street, and there are two possible locations. We hope to see him soon in our/his town, he will be well received." On the 24th of August 1998 I wrote him that: "I would like very much to visit with him his town and see the locations of the synagogue and the Jewish quarter. Who knows, it might be that with my DNA I would be able after 500 years to assist him in finding the exact location where my ancestors lived. It is very important for the tourism of his town... He sees that I am already a local patriot and I hope to contribute something to the economy of our town..."

On the 8th of October I visited the old synagogue of Castelo de Vide on the Portuguese side of border. I noticed there how the synagogue was built, and on the 9th of October I traveled with my wife Ruthy to Coria where we were received by Juan Pedro Moreno. Moreno showed me three possible sites of the synagogue but I discarded the first two ones (DNA, intuition or luck?) When we arrived to the third site, Moreno told me that there is here a problem as the old lady who lives there, is unwilling to open for anybody. Suddenly, the old lady (Mrs. Castaniera), who resembled exactly to my mother, opened the door and came to us. I introduced myself, told her that I come from Israel, my name is Cory, and the origin of our family is from Coria. We are trying to find out where the synagogue is and we would like her to let us visit her house. She smiled and invited us to get in. Moreno was astonished. When we entered the house, I saw that the house was built exactly like the synagogue of Castelo de Vide. But the porch was square and not in arch as with the synagogue of Vide. When I asked her why, she told me that she heard from her family, who lived in the same house for centuries, that the original porch was in arch but it was destroyed during the earthquake of 1755. We went down to the basement and she showed us ancient books, but the oldest one was from 1500, after the Jews were expelled from Spain in 1492. She told Moreno that she agreed that excavations would be made in her house to discover the traces of the synagogue.

Moreno gave me a book "Coria and the Sierra de Gata" and wrote: "For our Jewish friends, let this book be another step for the encounter of two cultures that never should have been separated." In 1999 the house of Mrs. Castaniera was sold to a private owner and until 2011 no excavations have been made, but Moreno told me in 2011 that looking into the archives of Coria he proved a few years ago that this house was effectively the site of the synagogue. It is impossible to visit the synagogue as private people live there. I read on the Internet that the Jewish community of Coria dated back to the XIIth century. In the Jewish quarter lived approximately 46 families with the professions of turner, tailor, goldsmith, tax collectors, etc.

When the Jews were expelled from Spain, some of them settled in Portugal where they were converted later to Christianity, as Yuda de Alba. Truly, those are the facts.

I presume that the Jews from Coria (with my ancestors probably) fled to Portugal in 1492, as Coria was near the border of Portugal that received Jews until 1497. They thought that they will return soon to Spain and left the synagogue to the care of one of the families, who changed her name, as many Marranos, with names of trees – Castaniera, the chestnut tree, the ancestors of the lady who still lived there in 1998. They took with them all the books in Hebrew and because of that there were not any book in the house anterior to 1500. The Jews of Portugal were forced to convert to Christianity, but many of them fled later on with the assistance of Dona Gracia Mendes and others to Turkey, Greece and Italy, where my family lived until they emigrated to Egypt, Israel, France or Brazil. Mrs. Castaniera, who knew probably that her house was the synagogue, being a Marrana, decided on her old age to enable excavations and transform the house to its initial function of a synagogue. Her likeness to my mother was not an optical illusion as we have pictures with her, but many Sephardic Jewish women resemble until nowadays to Spanish women, as they married with Sephardic men for 500 years. The sympathy that the lady showed us, opening her house to a Jewish Israeli while she did not want to open it to her fellow town's people, proved probably that she knew something of her Jewish ancestry. But who knows how things happen, why have I decided to visit Coria, why the archeologist asked me to assist him to find the synagogue, why the old lady decided to open her house to us, how a descendant from Coria coming from Israel discovered the synagogue after 500 years? Is it a witchcraft, a negligible incident, a logic story? Who can know it?

Como me siguen

En fila interminable

Todos los yos que he sido!

Como se abre el ante mi

En infinita fila

Para todos los yos que voy a ser!

Y que poco, que nada soy yo

Este yo, de hoy

Que casi es de ayer,

Que va a ser todo de mañana!

([Juan Ramon Jimenez](#), La realidad invisible, El presente)"

Other works by Jimenez - [Platero y yo](#), [Estoy triste y mis ojos no lloran](#).

One of the poems I love most is [Federico Garcia Lorca's](#) Llanto por (Lament for) Ignacio Sanchez Mejias/La cogida y la muerte (the goring and the death)/A las cinco de la tarde – At five in the afternoon. **Federico García Lorca** (5 June 1898 – 19 August 1936) was a Spanish poet, playwright, and theatre director. García Lorca achieved international recognition as an emblematic member of the [Generation of '27](#). He was executed by [Nationalist](#) forces at the beginning of the [Spanish Civil War](#). His body has never been found. The affinities I have with

Lorca go beyond the fact that both of us were born on the same day – 5 June. At the [Residencia de Estudiantes](#) in Madrid García Lorca befriended [Luis Buñuel](#) and [Salvador Dalí](#), whom I like very much, and many other creative artists who were, or would become, influential across Spain. He was taken under the wing of the poet [Juan Ramón Jiménez](#), cited earlier. Growing estrangement between García Lorca and his closest friends reached its climax when [surrealists](#) Dalí and [Luis Buñuel](#) collaborated on their 1929 film [Un Chien Andalou](#) (*An Andalusian Dog*). García Lorca interpreted it, perhaps erroneously, as a vicious attack upon himself. García Lorca wrote three of the best-known plays, which I like most, the *Rural Trilogy* of [Bodas de Sangre](#) (*Blood Wedding*), [Yerma](#) and [La Casa de Bernarda Alba](#) (*The House of Bernarda Alba*), which all rebelled against the norms of bourgeois Spanish society. I read Ian Gibson's *The Assassination of Federico Garcia Lorca*, which is one of the best biographies that I have ever read. The poem *La cogida y la muerte* was inspired by the death of the bullfighter [Ignacio Sanchez Mejias](#). I appreciate poetry not by the rhymes, the sophistication or the subject, but by the emotion that it arouses in you. And by this criterion, [At five in the afternoon](#) grasps you, making you feel that you were present at the event, although I am reluctant to bullfights. To the best of my knowledge there are no precedents to images that sound so right especially in Spanish as: *Lo demás era muerte y sólo muerte, Ya luchan la paloma y el leopardo, Las campanas de arsénico y el humo, la muerte puso huevos en la herida, El cuarto se irisaba de agonía, Las heridas quemaban como soles ...* And of course the repetition of 30 times *a las cinco de la tarde!*

LA COGIDA Y LA MUERTE

A las cinco de la tarde.
Eran las cinco en punto de la tarde.
Un niño trajo la blanca sábana
a las cinco de la tarde.
Una espuerta de cal ya prevenida
a las cinco de la tarde.
Lo demás era muerte y sólo muerte
a las cinco de la tarde.

El viento se llevó los algodones
a las cinco de la tarde.
Y el óxido sembró cristal y níquel
a las cinco de la tarde.
Ya luchan la paloma y el leopardo
a las cinco de la tarde.
Y un muslo con un asta desolada
a las cinco de la tarde.
Comenzaron los sonos de bordón
a las cinco de la tarde.
Las campanas de arsénico y el humo
a las cinco de la tarde.
En las esquinas grupos de silencio
a las cinco de la tarde.
¡Y el toro solo corazón arriba!
a las cinco de la tarde.
Cuando el sudor de nieve fue llegando
a las cinco de la tarde

THE GORING AND THE DEATH

At five in the afternoon.
It was exactly five in the afternoon.
A boy brought the white sheet
at five in the afternoon.
A frail of lime ready prepared
at five in the afternoon.
The rest was death, and death alone.
at five in the afternoon.

The wind carried away the cottonwool
at five in the afternoon.
And the oxide scattered crystal and nickel
at five in the afternoon.
Now the dove and the leopard wrestle
at five in the afternoon.
And a thigh with a desolated horn
at five in the afternoon.
The bass-string struck up
at five in the afternoon.
Arsenic bells and smoke
at five in the afternoon.
Groups of silence in the corners
at five in the afternoon.
And the bull alone with a high heart!
at five in the afternoon.
When the sweat of snow was coming
at five in the afternoon

cuando la plaza se cubrió de yodo
a las cinco de la tarde,
 la muerte puso huevos en la herida
a las cinco de la tarde.
A las cinco de la tarde.
A las cinco en Punto de la tarde.

when the bull ring was covered with iodine
at five in the afternoon,
 death laid eggs in the wound
at five in the afternoon.
At five in the afternoon.
 At five o'clock in the afternoon.

Un ataúd con ruedas es la cama
a las cinco de la tarde.
 Huesos y flautas suenan en su oído
a las cinco de la tarde.
 El toro ya mugía por su frente
a las cinco de la tarde.
 El cuarto se irisaba de agonía
a las cinco de la tarde.
 A lo lejos ya viene la gangrena
a las cinco de la tarde.
 Trompa de lirio por las verdes ingles
a las cinco de la tarde.
 Las heridas quemaban como soles
a las cinco de la tarde,
 y el gentío rompía las ventanas
a las cinco de la tarde.
 A las cinco de la tarde.
 ¡Ay, qué terribles cinco de la tarde!
 ¡Eran las cinco en todos los relojes!
 ¡Eran las cinco en sombra de la tarde!

A coffin on wheels is his bed
at five in the afternoon.
 Bones and flutes resound in his ears
at five in the afternoon.
 Now the bull was bellowing through his forehead
at five in the afternoon.
 The room was iridescent with agony
at five in the afternoon.
 In the distance the gangrene now comes
at five in the afternoon.
 Horn of the lily through green groins
at five in the afternoon.
 The wounds were burning like suns
at five in the afternoon,
 and the people smashing windows
at five in the afternoon.
 At five in the afternoon.
 Ah, that fatal five in the afternoon!
 It was five by all the clocks!
 It was five in the shade of the afternoon!

You probably need a lot of Chutzpah in order to introduce in a business ethics academic book published by Kluwer and Springer – two of the largest academic publishers - a tango by the [Argentinian Discepolo – Cambalache – The Junk Shop](#), relating to the corruption in the XXth century (I was not aware of course that in the XXIst century it will be much worse...). But, probably this made the book so popular that it is held by more than a thousand universities and national libraries all over the world, and is quoted many times in the entry Business Ethics of Wikipedia, and in many other websites. Probably, this is the only example in the academic history that a tango was introduced, but Cory's academic books were also the first ones in history to deal with business ethics to minority shareholders, who are being wronged by the billions!

"Que el mundo fue y sera una porqueria, ya lo se...
 (En el quiniento seis y en el dos mil tambien.)
 Que siempre ha habido chorros, maquiavelos y estafaos,
 Contentos y amargaos, valores y doble...
 Pero que el siglo veinte es un despliegue
 De maldad insolente, ya no hay quien lo niegue.
 Vivimos revolcaos en un merengue
 Y en un mismos lodo todos manoseaos...

Hoy resulta que es lo mismo ser derecho que traidor...!
 Ignorante, sabio o chorro, generoso o estafador!...

Todo es igual. Nada es mejor.
 Lo mismo un burro que un gran profesor.
 No hay aplazaos ni escalafon,
 Los inmorales nos han igualao.
 Si uno vive en la impostura y otro roba en su ambicion,
 Da lo mismo que si es cura,
 Colchonero, rey de bastos, caradura o polizon..."

(Enrique Santos Discepolo, Tango, Cambalache/The Junk Shop, 1934)

"The world was and will be a filthy place, I know it...
 (It was in 506 as it will be in the year 2000.)
 As there have always been diabolical villains and crooks,
 The contented and the disgruntled, honorable men and swindlers...
 Because the twentieth century is a display
 Of insolent wickedness, nobody can deny it.
 We live wallowed in debauchery
 All floundering in the same mud...

Nowadays there is no difference in being honest or a traitor...!
 Ignorant, wise, tramp, generous or crook.
 All is the same. No-one is better.
 No difference, dolts as great professors.
 No putting it off, no getting on with it either;
 We are on the same footing with the corrupt.
 Some men may be living out a lie, others are ripping off everyone;
 We are all in the same boat; the priest,
 The mattress-maker, the card-shark, the cheeky, the good-for-nothing..."

Doing business in Spain is always a pleasure, and touring the country is even better. My wife and me toured Spain with a car from north to south, starting with a week in Catalonia, Barcelona, Figueres, Bessalu, the fantastic architecture, scenery, museums, paintings and sculptures, hearing for the first time Catalan, and after finding the similarities with Spanish, learning the language and reading books. Visit of Jewish and Catholic sites, palaces and museums, in Madrid, Toledo, Sevilla, Granada, Cordoba, Malaga, and other cities and towns. The tour was from Parador to Parador, and the best hotel that we resided in was Granada's Parador at the Alhambra Palace. I thought that I was already there in the past, everything seemed familiar, and the people so similar to the Sephardic people I knew. We visited Spain also after the trip to Provence, visiting the Spanish Pyrenees, Andorra, Barcelona and Montserrat, and before that – we visited Coria and Caceres, during our trip to Portugal and Spain. Spain is probably the country which is the most minded to tourism, doing their utmost to make your stay pleasant, in Spain, as in Palma de Mallorca, where we received the best service from a moderate price hotel. What a difference from other countries where they do their utmost to make an extra buck at the expense of the tourist while giving him the minimum service, the smallest room, the worst food. If you are allergic to lactose, the Spanish would find ways to offer you an excellent meal with this constraint, while in New York for example they will tell you that there is no lactose while effectively it has, not caring what will happen to your health after you leave the restaurant. Every country has its pros and cons, and I enjoy visiting all over Europe – France, England, Netherlands, Scandinavia, Greece, the

Balkans, Italy, Portugal, Germany, Switzerland, but most of all I enjoy visiting Spain (but as a city nothing compares to Paris), where I feel at home.

Tango is fine, but one could get the impression from reading this chapter that this was the sole contribution of South America to humanity. Actually, this continent has a fantastic literature that I enjoy reading, not always liking the obvious. I didn't enjoy at all reading *Cien años de soledad* by Gabriel Garcia Marquez. As I read fluently Spanish I enjoy also reading best sellers as Isabel Allende's *Hija de la fortuna* and *Novia que te vea* by Rosa Nisan, but most of all I enjoyed reading *Elogio de la madrastra*, *La tía Julia y el escribidor*, *Pantaleón y las visitadoras* by Mario Vargas Llosa. He is one of the most hilarious authors that I have ever read, now that I think about it the authors in Spanish that I like the most are masters of humor as Cervantes and Vargas Llosa. I bring here the beginning of the first chapter of *La tía Julia y el escribidor* in Spanish, where the author tells that he was very young, living in Miraflores with his grandparents, studying Law and dreaming of becoming an author. He worked as the manager of informations of Radio Panamericana, that consisted only of reading the interesting news in the press for the radio: "En ese tiempo remoto, yo era muy joven y vivía con mis abuelos en una quinta de paredes blancas de la calle Ocharán, en Miraflores. Estudiaba en San Marcos, Derecho, creo, resignado a ganarme más tarde la vida con una profesión liberal, aunque, en el fondo, me hubiera gustado más llegar a ser un escritor. Tenía un trabajo de título pomposo, sueldo modesto, apropiaciones ilícitas y horario elástico: director de Informaciones de Radio Panamericana. Consistía en recortar las noticias interesantes que aparecían en los diarios y maquillarlas un poco para que se leyeran en los boletines. La redacción a mis órdenes era un muchacho de pelos engomados y amante de las catástrofes llamado Pascual. Había boletines cada hora, de un minuto, salvo los de mediodía y de las nueve, que eran de quince, pero nosotros preparábamos varios a la vez, de modo que yo andaba mucho en la calle, tomando cafecitos en la Colmena, alguna vez en clases, o en las oficinas de Radio Central, más animadas que las de mi trabajo."

THOUGHTS & QUOTES ON PORTUGUESE

The first book I have read in Portuguese was: *Dona flor e seus dois maridos* by [Jorge Amado](#). When you study a new language you are carried on the wings of the muses to a new country, and reading a book, a play or a poem, you feel submerged by the new atmosphere. With Portuguese you benefit from two atmospheres – from Brazil and Portugal. And indeed, you cannot find two greater opposites than the Brazilian and Portuguese literature. *Dona Flor* or *Jubiaba* are completely opposite to *O crime do padre Amaro*, but we shouldn't be surprised as *Samba* and *Fado* are also opposites, as we can see from the links in the Music chapter of this book. *Dona Flor* is first of all extremely funny to read, but there is much more than humor, you can get in a nutshell the gist of Brazilian's ambience and carnival right away from the first page as brought here. *Vadinho*, *Dona Flor*'s first husband, died (on page 1 of the book...) one Sunday of Carnival, in the morning, when dressed like a Bahian woman, he was dancing the samba, with the greatest enthusiasm, in the *Dois de Julho* Square, not far from his home... When *Vadinho*, the liveliest of the lot, saw the group coming he chose a partner a heavily rouged Romanian, a big one for she was a mass of golden sequins, and announced: "Here I come, my Russian from *Tororo*". The English translation is accurate but it is incomparable to the Brazilian original – as "fantasiado de baiana" is definitely not equivalent to "when dressed like a Bahian woman"...

Vadinho o primeiro marido de Dona Flor, morreu num domingo de carnaval, pela manhã, quando, fantasiado de baiana, sambava num bloco, na maior animação, no Largo Dois de Julho, não longe de sua casa. Não pertencia ao bloco, acabara de nele misturar-se, em companhia de mais quatro amigos, todos com traje de baiana, e vinham de um bar no Cabeça onde o uísque corraera farto à custa de um certo Moysés Alves, fazendeiro de cacau, rico e perdulário. O bloco conduzia uma pequena e afinada orquestra de violões e flautas; ao cavaquinho, Carlinhos Mascarenhas, magricela celebrado nos castelos, Ah! um cavaquinho divino. Vestiam-se os rapazes de ciganos e as moças de camponesas Húngaras ou romenas; jamais, porém, húngara ou romena ou mesmo búlgara ou eslovaca rebolou como rebolavam elas, cabrochas na flor da idade e da faceirice. Vadinho, o mais animado de todos, ao ver o bloco despontar na esquina e ao ouvir o ponteadado do esquelético Mascarenhas no cavaquinho sublime, adiantou-se rápido, postou-se ante a romena carregada na cor, uma grandona, monumental como uma igreja - e era a Igreja de São Francisco, pois se cobria com um desparrame de lantejoulas doiradas -, anunciou:
- Lá vou eu, minha russa do *Tororo*...

I didn't know until recently that I had Portuguese ancestry. I knew that probably my family came from Coria in Spain, but only when I visited the town and assisted the town's archeologist to discover the ancient synagogue, I learned that as Coria is very near Portugal, the Jews from Coria when they were expelled from Spain in 1492 opted to go to Portugal, which received the Jews willingly. Only five years later, in 1497, the Portuguese king decided to convert by force all the Jews to Christianity, without giving them the choice to leave the country. So, probably, my ancestors were Marranos/Conversos/Anusim and left Portugal only dozens of years later, with the help of Dona Gracia Mendes who assisted them in fleeing to Italy, Greece and Turkey, where my ancestors settled. Apparently, my antecedents are Spanish (Coria), Portuguese (Marranos), Italian (uncles/part of my family), Greek (mother), Turkish (father), and Israelis (country of residence and of course of my Jewish ancestors). I was born in Egypt, my culture was primarily French, my business environment is American, my wife is Romanian, her father was born in a town now in Ukraine, my professional mentality is German, my socioeconomic ideals are Scandinavian, and my grandchildren have

also antecedents from Iraq, Argentina, Lithuania, Russia, Poland, etc. In short, quite a cosmopolitan mix, making me a man of the world!

My wife and me enjoyed very much a tour of a couple of weeks in Portugal, we had a fantastic guide, a descendant of the family of Jeanne d'Arc, and we visited all Portugal from north to south. What a fantastic country, so interesting, so beautiful, the people were very nice, and I noticed for the first time that I can understand Portuguese quite well. The tourists were French, American, Italian, Argentinian and Brazilian, so – the guide who spoke perfectly all those languages started to explain about every site in English, then in French, afterwards in Italian, in Spanish, and finally... in Portuguese for the Brazilians. By the end of the explanations in the first four languages that I knew also very well I knew by heart all the descriptions of the site, and when the guide spoke at last in Portuguese I noticed that I understand perfectly what she was telling. I couldn't speak Portuguese of course, because for a Spanish/Italian speaker it is quite difficult to pronounce the words in the right accent, but I could understand. Before that, I have visited Brazil only for a few days in Rio and visited my family in Sao Paulo (my aunts, uncles, and cousins) with whom I spoke of course in French as they came from Egypt (it sounds funny, but it is true), and was not exposed to Portuguese, as the tours in Rio were in English. I enjoyed Rio, as one of the most beautiful cities that I have ever seen, the scenery looked exotic and sensual, the Brazilians seemed happy, but I didn't feel there at home as I felt in Portugal, where the only thing missing in my visit there was perhaps to find like in Coria – [uma casa portuguesa](#) - a Portuguese home, maybe the home of my ancestors in the beautiful town of [Castelo de Vide](#), which is opposite to [Coria](#) and has a synagogue very similar to the synagogue of Coria.

Uma Casa Portuguesa

Numa casa portuguesa fica bem,
pão e vinho sobre a mesa.
E se à porta humildemente bate alguém,
door
senta-se à mesa co'a gente.
Fica bem esta franqueza, fica bem,
que o povo nunca desmente.
A alegria da pobreza
está nesta grande riqueza
de dar, e ficar contente.

Quatro paredes caiadas,
um cheirinho à alecrim,
um cacho de uvas doiradas,
duas rosas num jardim,
um São José de azulejo,
mais o sol da primavera...
uma promessa de beijos...
dois braços à minha espera...
É uma casa portuguesa, com certeza!
É, com certeza, uma casa portuguesa!

A Portuguese house

In a Portuguese home, it looks good
to have bread and wine on the table.
And if someone humbly knocks at the
door
we invite them to sit at the table with us.
This frankness looks good, so good ,
the frankness which people never deny.
The joy of poverty
is this great richness
of being generous and feeling happy.

Four whitewashed walls,
a sweet smell of rosemary,
a bunch of golden grapes
two roses in a garden,
a statue of St. Joseph in ceramics,
and the sun of the spring in addition ...
a promise of finding kisses...
two open arms waiting for me...
This is a Portuguese home, certainly!
This is, surely, a Portuguese home!

Samuel Usque, the author of the most well-known Portuguese book about the sorrows of the Portuguese Jews – Consolation for the Tribulations of Israel, published his book in Ferrara, in 1553, with the assistance of Dona Gracia Mendes, the richest woman in the world at this time,

and he dedicated it to this Lady, who probably assisted also my ancestors to flee Portugal and settle in Italy, Greece and Turkey. Usque was born in Lisbon in 1500, was a Portuguese marrano, as my ancestors. Usque wrote in prose inspired by the Bible's text, the holy literature and the classics, in order to tell the story of the Jewish people, persecuted and tortured by the Inquisition in Portugal and Spain, and expressed the hope to return to the Holiland, which was practically unknown. The book is perceived as a masterpiece of the Portuguese and Jewish literature.

rosos mâtimentos contentes fostentas teus filhos.
E tu guerreira sabia e temperada Europa, de
emgenhosas poliçias, soberbos e marauilhosos
triunfos çeuada, e num terreste paraíso conuer-
tida, cõ desmedido viço de tuas cheas tetas,
mimosamente mamã tuas creaturas: de maneira
que todos os q cria em si cada hũa e hũa

At my birthday, a friend who liked very much Brazilian music, sang to me in Portuguese one of the songs I like the most – A Felicidade, about the sadness of quarta-feira, the day after the Carnival, which is probably [the sadest day in Brazil](#). I joined her, as I knew by heart the words, [this was filmed](#), but as I am not yet Vinicius de Moraes, Tom Jobim, or Gal Costa, I decided not to put this outstanding performance on YouTube, unless the public requests it explicitly. The Carnival in Rio de Janeiro is the most famous festival in the world, held before Lent every year, considered the biggest carnival with two million people per day on the streets. The first festivals of Rio date back to 1723. The typical Rio carnival parade is filled with revelers, floats and adornments from numerous [samba schools](#) which are located in Rio (more than 200 approximately, divided into 5 leagues/ divisions). A [samba school](#) is composed of a collaboration of local neighbours that want to attend carnival together, with some kind of regional, geographical common background. There is a special order that every school has to follow with their parade entries. Each school begins with the "comissão de

frente" ("Front Commission" in English), that is the group of people from the school that appear first. Made of ten to fifteen people, the "comissão de frente" introduces the school and sets the mood and style of their presentation. These people have choreographed dances in fancy costumes that usually tell a short story. Following the "comissão de frente" is the first float of the samba school, called 'abre-alas'. Incorporated into every aspect of the Rio carnival are dancing and music. The most famous dance is carnival samba, a Brazilian dance with African influences. The samba remains a popular dance not only in carnival but in the ghettos outside of the main cities. These villages keep alive the historical aspect of the dance without the influence of the western cultures.

A Felicidade /Happiness/Vinicius de Moraes

Tristeza não tem fim

Felicidade sim

Sadness has no end

Happiness yes

A felicidade é como a gota

De orvalho numa pétala de flor

Brilha tranquila

Depois de leve oscila

E cai como uma lágrima de amor

Happiness is like a drop

Of dew on a flower petal

Shines quietly

After light oscillates

And falls like a tear of love

A felicidade do pobre parece

A grande ilusão do carnaval

A gente trabalha o ano inteiro

Por um momento de sonho

Pra fazer a fantasia

De rei ou de pirata ou jardineira

Pra tudo se acabar na quarta-feira

Wednesday

Happiness of the poor seems

The great illusion of Carnival

We work all year

For a dream moment

To make the fantasy

Of king or pirate or gardener

For everything was finished in

Tristeza não tem fim

Felicidade sim

Sadness has no end

Happiness yes

A felicidade é como a pluma

Que o vento vai levando pelo ar

Voa tão leve

Mas tem a vida breve

Precisa que haja vento sem parar

stopping

Happiness is like a feather

That the wind lifts into the air

Flying so light

But life is short

It needs to have the wind without

A minha felicidade está sonhando

Nos olhos da minha namorada

É como esta noite, passando, passando

Em busca da madrugada

Falem baixo, por favor

Pra que ela acorde alegre com o dia

Oferecendo beijos de amor

My happiness is dreaming

In the eyes of my lover

It is like tonight, passing, passing

In search of the dawn

Keep it down, please

For her to wake up happy as the day

Offering kisses of love

Tristeza não tem fim

Felicidade sim

Sadness has no end

Happiness yes

And happiness is a subject that I refer to it very often in my book. I knew once a woman who was Brazilian and all her life pursued happiness, enjoying life, always optimistic, never complaining. That woman, let's call her Gabriela, had plenty of friends, every night went out, played cards, went to nightclubs, danced and lived fully. She had a relative with the same name Gabriela in Israel. She admonished her often for her lavish life, as she had no friends, almost never went out, and lived a very frugal life. The Brazilian used to answer her "we live only once" and indeed she died quite young at the age of 60. Her husband married again shortly after and lived happily for another 20 years. The Israeli died at the age of 86. Well, you can ask what is better, to live in a carnival for 3 days or to live in quarta-feira much longer, but this is another question. Happiness and joy is a question of attitude. I know a man, let's call him Naguib, who lives in Beirut and he is very happy, always telling his friends "Carpe Diem". As he comes from the Middle East he probably knows what is *malocchio/mauvais oeil/ain ara/the evil eye*. I appreciate his good humor especially because he lives in Beirut, the Hell on Earth (like Syria, Yemen, Iraq and Afghanistan...) and he is still happy, while I would be afraid from the *malocchio*. If Naguib lives in hell we in Israel live in purgatorium (Paradise is Switzerland and New Zealand), and the funny thing is that the Israelis are no. 11 in the world in the survey on happiness. Freud would say that we are masochists, but honestly I believe that it is because an Israeli can never admit that he has made a wrong choice. If he has a car, it is the best in the world. If he works somewhere it is better than Google. His wife is Sophia Loren (today?) and his country is the best in the world. I, personally, because of my mother's upbringing, believe in *malocchio* and never admit that I am happy, always complaining about something: money, health, tycoons, or politics. It is called in Ladino - *viven los yoradores* - but the Ashkenazis have excelled in that to perfection, always complain and you'll live happily but never enjoy it. So, I would say *Lacrimo/Deploro Diem*. I would refer now to the Happiness Index and analyze it.

Happiness Index (rank) – 2010-2012. The World Happiness Report is a measure of happiness published by the UN Sustainable Development Solutions Network. The report outlined the state of world happiness, causes of happiness and misery, and policy implications. The index is based on economics, psychology, survey analysis, national statistics, progress, mental illness, objective benefits of happiness, the importance of ethics, policy implications, subjective well-being and the Human Development Report. Six key variables explain three-quarters of the variation in annual national average scores over time and among countries: real GDP per capita, healthy life expectancy, having someone to count on, perceived freedom to make life choices, freedom from corruption, and generosity. The scale runs from 0 to 10, while 10 is perfect happiness, and the highest ratio ranks no. 1. I don't fully agree with it, but that's what we have, so we'll stick to it.

The term "gross national happiness" was coined in 1972 by Bhutan's king who opened Bhutan to the age of modernization. He used this phrase to signal his commitment to building an economy that would serve Bhutan's unique culture based on Buddhist spiritual values. The message originally was that happiness is more important than economic development. Through the contribution of many western and eastern scholars the concept developed into a full socioeconomic development framework. Bhutan is the only country in the world that has a "GNH", Gross National Happiness. It measures people's quality of life and makes sure that material and spiritual development happen together. Bhutan has done an amazing job of finding this balance. Bhutan is ranked as the happiest country in all of Asia and the eighth happiest country in the world according to Business Week. In the following paragraphs we analyze the World Happiness Report, measuring happiness and published by the UN. The index is based on economics, psychology, national statistics, progress, ethics, subjective well-

being and the Human Development Report. And who is missing from this report? Surprise, surprise - Bhutan!

But, long before the king of Bhutan, Aristotle wrote in his book "Ethics" that "man aspires to be happy in the sense of eudaimonia, happiness, as the summum bonum of his existence. Happiness is not identical to pleasure, and the ethical man will aspire to live a happy life but not necessarily a pleasurable life. Happiness is not the end of each action, but it is nevertheless the supreme goal of life." (Cory Jacques, *Activist Business Ethics*, p. 63, Springer, 2005). So, if happiness is the sense of life, one would think that the happiest countries in the world are the best countries, even if in the other parameters they don't perform so well. But, in our case, the most ethical countries manage to be the happiest, and the most democratic, and the richest, and the most peaceful, and the most equal and ethical! Quite an achievement, proving once again that Ethics Pays.

The 13 happiest countries in the world include 9 of the 11 most ethical countries – Denmark, Norway, Switzerland, Netherlands, Sweden, Canada, Finland, Australia and New Zealand. And who are the additional 4 happy countries? Austria, ranking 23 in Transparency International/TI's index and one of the richest countries, Iceland – the fifth Scandinavian country (all the 5 Scandinavian countries are comprised in the 9 most happy countries) and no. 12 in TI's index. Israel, ranking 37 in TI's index, and among the last countries in the Global Peace Index, but one of the most advanced countries in the world. Costa Rica, ranking 47 in TI's index and having an average GDP PPP per capita of \$13,000. If we analyze the 30 happiest countries down to no. 30 – Singapore (TI – 7) – we find as a rule that the most ethical countries are also the happiest – 22 out of the 26 most ethical countries - are part of the 30 happiest countries of the world.

But, in addition to Israel and Costa Rica which are quite ethical, we find in the list of the 30 happiest countries - corrupt countries like Mexico (TI – 103), Panama (TI – 94), Venezuela (TI – 161!) , Argentina (TI – 107), Oman (TI – 64) and Brazil (TI – 69). All of them, except Oman, are Latin American countries, and we wonder if it has something to do with the happy mentality of those states, living in a "Carnival". Speaking of mentality, is this the reason that 3 of the most ethical countries - the Far Eastern states of Singapore, Hong Kong and Japan, rank rather low in the happiness index: no. 30, 64 and 43 respectively? Or maybe there are other reasons as well?

In this index we notice, as in most of the other indices, that the least happy countries are also the most corrupt: Togo, Central African Republic, Burundi, Tanzania, Guinea, Syria, Madagascar, Afghanistan, Yemen, Chad, Cambodia, Sri Lanka, Niger, Nepal, Liberia, Mali., but we find also among the least happy countries states that are ethical like Botswana (TI – 31) or quite unethical as Rwanda (TI – 55), Bulgaria and Senegal (TI – 69), Georgia (TI– 50). So, in most of the cases ethics and a good conscience bring also happiness and wealth, while corruption brings misery and poverty, or as Marcel Pagnol's *Topaze* taught his young students: *L'argent ne fait pas le bonheur* – Money doesn't bring happiness. But, because of your state of mind, you can reach happiness without being rich, as we see in the Buddhist Bhutan and the happy Latin American countries, and you can be quite unhappy even if you live in a rich country as Japan. In those cases ethics doesn't influence too much happiness, but as a rule - ethics causes also happiness.

It is not a sheer coincidence that the poorest countries and most corrupt Latin American countries rank very high in the happiness index. In the list of the 100 most unhappy states we find only four Latin American countries: Haiti (80% poverty), Dominican Republic (34%), Honduras (65%) and Nicaragua (46%) – one would tend to conclude that with such high rates

of poverty you cannot be happy regardless of your state of mind. But if we examine the 55 happiest countries we find there most of the very poor, unequal and unethical Latin American countries – Peru (31%), Paraguay (35%), Bolivia (51%), El Salvador (36%), Ecuador (29%), Guatemala (54%), Suriname (70%, how can you be happy with such a huge level of poverty, squeezed in the happiness rank of 40 between the rich South Korea and Czech Republic?), Colombia (32%), Argentina (30%), Brazil (I can't understand how it is only 21%, but it is still perceived as one of the countries with the highest number of poor people), Venezuela (32%) and Mexico (48%).

In the same bracket of about \$7,000 GDP PPP per capita we find Guatemala (TI – 115, poverty – 54%), El Salvador (TI – 80, poverty – 36%) and Bhutan (TI – 30, poverty – 23%) that are ranking among the 55 happiest countries in the world, while Swaziland (TI – 69, poverty – 69%) ranks 100, Morocco (TI – 80, poverty – 15%) ranks 99, Armenia (TI – 94, poverty – 34%) ranks 128 and Georgia (TI – 50, poverty – 10%) ranks 134, in the list of the most unhappy countries of the world. So, is it a question of mentality or of ethics after all, can we find a clear correlation?

We found in this book that at the extremes – the happiest countries are also the most ethical and the richest, while the most unhappy countries are also the most corrupt and the poorest. But between the extremes we find cases that are not as clearcut as in the extremes. It is worthwhile to mention that China ranks 93 in the happiness index compared to 111 for India, as the poverty overcomes probably the mentality, and the theocratic state of Iran ranks 115 even below the much poorer India, as religion doesn't make the Iranians so happy after all, and I will not consider what is promised to all the Shahids when they reach paradise after killing the foes... Poverty affects very much happiness – Egypt (130), Liberia (133), Congo Brazaville (129) and Sudan (124) - most of the 40 least happy countries are very poor African states, while most of the European and Anglo-Saxon states are very happy, except Bulgaria (144), Hungary and the former Yugoslavian states, maybe because they still live in the trauma of communism or war.

We refer to Bhutan in the analysis of World Happiness, but many people should ask themselves what do they prefer – to live in a country like Bhutan, one of the happiest countries in the world, ranked by TI as no. 30 in the corruption perception index (close to France – 26), with a GDP per capita of only \$7,000 (but with a GDP growth rate of 6%), and an Internet penetration rate of only 30%, or to live in a modern country like South Korea, one of the richest countries in the world, with a GDP PPP per capita of \$35K, with an Internet penetration rate of 85%, ranked 41 in the world happiness report and 43 in TI's ethical report? What is better, a high degree of happiness or a high degree of development? Can we combine both of them? We saw above that the answer is absolutely – Yes! The 11 most ethical countries in the world are also the most modern and the happiest as well, especially the Scandinavian countries who win all the trophies. Like the Swedish Abba song "the winner takes it all", Sweden, Norway, Denmark and Finland – the Scandinavian countries are the best in almost all parameters: they are not only the most ethical, happiest, richest, most democratic, with the highest equality in income and gender, but they are also the most modern, most competitive and with the highest efficiency records.

And we'll finish this chapter on happiness with some proverbs I liked most on this subject:

“Happiness is when what you think, what you say, and what you do are in harmony.”

— [Mahatma Gandhi](#)

“For every minute you are angry you lose sixty seconds of happiness.”

— [Ralph Waldo Emerson](#)

“Love is that condition in which the happiness of another person is essential to your own.”

— [Robert A. Heinlein](#), *[Stranger in a Strange Land](#)*

“Folks are usually about as happy as they make their minds up to be.”

— [Abraham Lincoln](#)

“Happiness in intelligent people is the rarest thing I know.”

— [Ernest Hemingway](#), *[The Garden of Eden](#)*

“They say a person needs just three things to be truly happy in this world: someone to love, something to do, and something to hope for.”

— [Tom Bodett](#)

THOUGHTS & QUOTES ON FRENCH LITERATURE

Emile Zola is by far the best author in world's literature, but I am completely biased, having read all his books several times, and he wrote more than 20. Zola encompasses all fields of literature, he is of course a naturalist author, but his books are very different in style and content. Zola was primarily the most humane writer, not only defending the cause of Alfred Dreyfus, but describing all types of women and men and all strata of society with love and compassion. Victor Hugo and Alexandre Dumas are also among the most humane writers, and I was moved to tears when visiting the Pantheon in Paris I discovered that my three most favorite authors are buried in the same room. My love for French literature, art, films, plays, music, language, (but not cuisine and wine), and for the city of Paris, is physical and intellectual, emotional and rational.

My mother tongue was French, but I visited Paris only at the age of 23. I learned with my friends – Armenians, French, Jews, Copts, Greeks and Italians – at the French Lycee in Cairo, about my "ancestors" the Gauls, with exactly the same curriculum as all the French children in France, with the same children songs, books and fairy tales. I lived in the east, but my heart was in the west, in France, the beloved "motherland", although our family didn't have a French passport. As my father was a Zionist, it became very dangerous for him to remain in Egypt after the nationalist revolution in 1952 that was aimed primarily against the Europeans, the French and the British, and of course the Jews, who were perceived as a fifth column. In January 1952, most of the European Cairo was burned by the Shabab rioters who almost burned alive my family, as they killed and wounded hundreds of Europeans. The smell of burning continued to haunt me, then aged 7. I didn't play the lyre but read when Cairo was burning Alice in the Wonderland, and every time that the queen said "coupez lui la tete", another building was being burned. Well, actually, it is quite too much to ask this child to study Arabic and love his Egyptian motherland.

This book is an ode to a cosmopolitan world, the world of my childhood in Cairo, where my school friends, all of them dressed in white aprons, were: Yves Roger Machart, Gilbert Boudot (who once in a while gave me a "tape amicale"), Joseph Vidal, Edwin Nathan, Albert Ancona, Gilbert Misrahi, Benjamin Ruben, Tony Sevy, Vivian Moreno, Jojo Harari, Claude Hayat, Fayez Biktache, Willy Molho, Hamouda Osam, Roland Goldenberg, Andre Palacci, Maxie Bernard, Icham Badraoui, Andre Guigui, Andre Levy, Samy Chame, Chawki Said, Jean Somekh, Isaac Moreno, Hussein Chaaraoui. Jews, Arabs, French, Italians, and a French teacher – Mlle. Croquelois (eater of laws...). A world, that I thought is harmonious and secure, where all were friends - Jews and Arabs, but that existed only due to the English bayonets and a corrupt king.

At the age of 11, I had to fight the Israeli ministry of education, my school headmaster, teachers and pupils, who decided that the new immigrants had to cease their studies and become metalworkers. All the pupils learned for the remaining years of their primary education metalwork, but I rebelled with the backing of my parents, as I wanted to be a diplomat and not a worker. I was ostracized, hated, beaten, ridiculed, but I didn't give up, practically not going to school for two years, and studying on my own the curriculum. My consolation was in reading the French classics – Racine, Corneille, Moliere, Hugo, Dumas, Maupassant, Gide, Flaubert, Sand, Maurois, Mauriac, Aragon, Verne, Romain Rolland, Voltaire, Malraux, Balzac, Proust, Sartre, and especially Zola, at the age of 11 to 13... from the huge library of my family. I dreamed that one day I'll visit Paris and study there. This was

my solace, those books gave me the moral justification to fight back the system, to feel superior to my "oppressors". This was my bibliotherapy, long before it became an academic term, those were the roots of my intellectual personality, of my love to France and French culture, and also of my cosmopolitan background. See the story of my earliest memory at a performance of L'Aiglon by the Comedie Francaise in Cairo, with a detailed description of the event, and extract of the French text of the play in Plays.

My recollections as a child are primarily of the children songs that my mother taught me, first of all [Frere Jacques](#) – Brother Jack/John (as I was myself Jacques), but also – ainsi font font font, [sur le pont d'Avignon](#) and many others. When I visited Avignon and stayed there for five days seeing every night a play at the festival in French, Spanish & German, I took my group, who was visiting with me for [a couple of weeks Provence](#) and the Pyrenees, to the Avignon bridge, and all my friends danced with me and repeated the gestures of how the men, women, etc. danced.

Frere Jacques, Frere Jacques,
Dormez-vous? Dormez-vous?
Sonnez les matines, sonnez les matines
Ding dang dong, ding dang dong.

English version

Are you sleeping, are you sleeping?
Brother John, Brother John?
Morning bells are ringing, morning bells are ringing
Ding dang dong, ding dang dong.

Ainsi font, font, font,
Les petites marionnettes,
Ainsi font, font, font,
Trois p'tits tours et puis s'en vont.

(Refrain :)

Sur le pont d'Avignon,
L'on y danse, l'on y danse,
Sur le pont d'Avignon
L'on y danse tous en rond.

1.

Les belles dames font comme ça
Et puis encore comme ça.
(Au refrain)

2.

Les messieurs font comme ça
Et puis encore comme ça.
(Au refrain)

It is indeed a marvelous story – how the Jews from the Balkan, Turkey and Israel had so many roots in so many cultures – they sang and spoke Ladino that they took with them from

Spain in 1492, the men spoke sometimes the local language - Bulgarian, Greek, Turkish or Arabic, but French at the end of the 19th century became the lingua franca of all the Eastern Jews, children studied at French schools – secular as the Lycee or religious as Saint Vincent de Paul, where my mother Pauline studied. She received an excellent education from the nuns who didn't try to convert her, and school was free as she came from a very poor family. When I was visiting Jerusalem I saw a school of Saint Vincent de Paul, I entered the school and asked to see the Mere Superieure. She didn't understand at first what this Israeli student is looking for in a convent where Arab pupils were studying. But I told her that I came to thank the Order of Saint Vincent de Paul personally for the excellent education that my mother received. If my mother wouldn't be educated by you, I would never have succeeded to be such a good student, I said. The nun was much moved and took me for a visit to the classes, and I imagined my mother sitting on one of the chairs learning French poetry or history. Pauline, my mother, was the most estranged woman in the world – living in her 86 years – 43 in Egypt without knowing Arabic except for a few words needed to buy groceries, and 43 years in Israel, with a very limited knowledge of Hebrew just enough to speak with her grandchildren. But she was fluent in Italian (from her friends), Greek (from her father born in Larissa), English from school, and of course French and Ladino – her mother tongues. Pauline has never visited the countries where those languages were spoken – Spain, France (except for a week on the way to Israel), Italy, Greece or England, she was the ultimate cosmopolitan and her homeland was the cosmos – more exactly the European cosmos, and even not Israel that became the homeland of her children and of her Zionist husband Albert, the country of her Jewish ancestors, whose descendants have at last come back home.

I visited Paris dozens of times: For business – working for Elbit as VP Sales where we had a subsidiary there, as a free lancer working for an American company and many other companies, promoting business of my own during a couple of years in 1994-1996, visiting Paris every month or so. For studies - I stayed a year at the nearby Fontainebleau for my MBA studies at Insead, with frequent visits to Paris, inter alia in May 1968 to participate in the Students Revolution, and I made many trips to Paris for my PhD dissertation, first at Universite de Paris and then at CNAM. For tourism - with my wife, my son, my daughter, in Paris, Bretagne, Normandie, les chateaux de la Loire, Provence, Lyon, Cote d'Azur, Monaco, Pyrenees, Grenoble, Marseille, etc. I feel in Paris and France at home, loving the city, going for long walks – guided or by myself, visiting many times most of the museums, going every night to the theater, sometimes to three plays in a row, to cinema, loving so much to walk on the Champs Elysees and the nearby, at Christmas, not going ever on shopping, almost not going to coffee shops, fancy restaurants, pubs, night clubs, discotheques (only once to Regine), not drinking wine or alcoholic beverages, fruits de mer, fish. I adhered only to the cultural France although I am aware of its other facets. And as Josephine Baker sings, I have two loves – my country and Paris: [J'ai deux amours](#) mon pays et Paris, I like to be [sous le ciel de Paris](#) – under Paris' sky like Juliette Greco, and I love Paris a sensual love – [Paris je t'aime d'amour](#), as Maurice Chevalier does.

I was an habitue de la maison, staying frequently at the same small hotel for twenty years – on business, studies or tourism, bringing there my family, my colleagues, my friends, staying there in aggregate months – I knew the owner, manager, all the employees at the front desk, kitchen, cleaning – and paying a modest sum of a hundred dollars or euros per night for most of the years. It was very convenient for me, as the hotel was located in the 8th arrondissement, near all the places I attended by foot, metro or taxi. All of a sudden the owner decided that he is no more a small family hotel of 20 rooms, but a boutique hotel, he made some minor changes, and charged 400 euros – and the more he charged the more tourists came, until I decided that I can no more afford staying at the same hotel. This is how you can succumb to

the maximization of profits, positioning yourself as a boutique hotel, and finding "suckers" who buy it and are willing to pay any price for a room that normally cost a hundred euros at most. You can be sure that the owner did not increase accordingly the salaries of the employees. But no matter which hotel I resided, I love Paris and am never tired from staying there, as it is the most beautiful, interesting, cultural city in the world, and I am content that I spent so much time there. While I had mixed feelings with most of other countries, France and Paris were always good and hospitable for me.

I would like to quote from the Wikipedia a few lines on Marcel Pagnol and Emile Zola, my favorite authors originating from Provence and living in Paris, the two sites in France which I like most.

Marcel Pagnol; 28 February 1895 – 18 April 1974) was a [French novelist](#), [playwright](#), and [filmmaker](#). In 1946, he became the first filmmaker elected to the [Académie française](#). Pagnol is generally regarded as one of France's greatest 20th-century writers and is notable for the fact that he excelled and was popular in almost every medium--memoir, novel, drama and film.

Marcel Pagnol was born on 28 February 1895 in [Aubagne](#), [Bouches-du-Rhône département](#), in southern [France](#) near [Marseille](#), the eldest son of schoolteacher Joseph Pagnol and seamstress Augustine Lansot. Marcel Pagnol grew up in Marseille with his younger brothers Paul and René, and younger sister Germaine. In July 1904, the family rented the *Bastide Neuve*, – a house in the sleepy Provençal village of [La Treille](#) – for the summer holidays, the first of many spent in the hilly countryside between Aubagne and Marseille. About the same time, Augustine's health, which had never been robust, began to noticeably decline and on 16 June 1910 she succumbed to a chest infection ("*mal de poitrine*") and died, aged 36. Joseph remarried in 1912.¹ In 1913, at the age of 18, Marcel passed his [baccalaureate](#) in philosophy and started studying literature at the University in Aix-en-Provence. When [World War I](#) broke out, he was called up into the infantry at Nice but in January 1915 he was discharged because of his poor constitution ("*faiblesse de constitution*"). In 1916, he married Simone Colin in Marseille and in November graduated in English. He became an English teacher, teaching in local colleges and at a [lycée](#) in Marseille.

In 1922, he moved to [Paris](#), where he taught English until 1927, when he decided instead to devote his life to playwriting. During this time, he belonged to a group of young writers, in collaboration with one of whom, [Paul Nivoix](#), he wrote the play, *Merchants of Glory*, which was produced in 1924. This was followed, in 1928, by *Topaze*, a satire based on ambition. Exiled in Paris, he returned nostalgically to his Provençal roots, taking this as his setting for his play, *Marius*, which later became the first of his works to be adapted into a film in 1931. Separated from Simone Collin since 1926 (though not divorced until 1941), he formed a relationship with the young English dancer Kitty Murphy: their son, Jacques Pagnol, was born in 1930.

In 1926, on a visit to London, Pagnol attended a screening of one of the first talking films and he was so impressed that he decided to devote his efforts to cinema. He contacted Paramount Picture studios and suggested adapting his play *Marius* for cinema. This was directed by [Alexander Korda](#) and released on 10 October 1931. It became one of the first successful French-language talking films. In 1932 Pagnol founded his own film production studios in the countryside near Marseille. Over the next decade Pagnol produced his own films, taking many different roles in the production – financier, director, script writer, studio head, and

foreign-language script translator – and employing the greatest French actors of the period. On 4 April 1946, Pagnol was elected to the [Académie française](#), taking his seat in March 1947, the first filmmaker to receive this honour. In his films, Pagnol transfers his playwriting talents onto the big screen. His editing style is somberly reserved, placing emphasis on the content of an image. As a pictorial naturalist, Pagnol relies on film as art to convey a deeper meaning rather than solely as a tool to tell a story. Pagnol also took great care in the type of actors he employed, hiring local actors to appear in his films to highlight their unique accents and culture. Like his plays, Pagnol's films emphasize dialogue and musicality. The themes of many of Pagnol's films revolve around the acute observation of social rituals. Using interchangeable symbols and recurring character roles, such as proud fathers and rebellious children, Pagnol illuminates the provincial life of the lower class. Notably, Pagnol also frequently compares women and land, showing both can be barren or fertile. Above all, Pagnol uses all this to illustrate the importance of human bonds and their renewal.

In 1945, Pagnol remarried, to actress [Jacqueline Pagnol](#). They had two children together, Frédéric (born 1946) and Estelle (born 1949). Estelle died at the age of two. Pagnol was so devastated that he fled the south and returned to live in Paris. He went back to writing plays, but after his next piece was badly received he decided to change his job once more and began writing a series of autobiographical novels – [Souvenirs d'enfance](#) – based on his childhood experiences. In 1957, the first two novels in the series, [La Gloire de mon père](#) and [Le château de ma mère](#) were published to instant acclaim. The third *Le Temps des secrets* was published in 1959; though the fourth [Le Temps des Amours](#) was to remain unfinished and was not published until 1977, after his death. In the meantime, Pagnol turned to a second series, [L'Eau des Collines](#) – [Jean de Florette](#) and [Manon des Sources](#) – which focused on the machinations of Provençal peasant life at the turn of the twentieth century and were published in 1962. Pagnol adapted his own film *Manon des Sources*, with his wife, Jacqueline, in the title role, into two novels, [Jean de Florette](#) and [Manon des Sources](#), collectively titled [L'Eau des Collines](#). Marcel Pagnol died in [Paris](#) on 18 April 1974. He is buried in Marseille at the cemetery *La Treille*, along with his mother, father, brothers, and wife. In the Provençal chapter and in the Appendix one can find as well an analysis and quotes on Pagnol's works.

Émile Édouard Charles Antoine Zola; 2 April 1840 – 29 September 1902) was a French writer, the most well-known practitioner of the literary school of [naturalism](#) and an important contributor to the development of [theatrical naturalism](#). He was a major figure in the political liberalization of France and in the exoneration of the falsely accused and convicted army officer [Alfred Dreyfus](#), which is encapsulated in the renowned newspaper headline [J'accuse](#). Zola was nominated for the first and second [Nobel Prize in Literature](#) in 1901 and 1902. Zola was born in Paris in 1840. His father, François Zola (originally Francesco Zola), was an [Italian](#) engineer, born in [Venice](#) in 1795, and his mother, Émilie Aubert, was French. The family moved to [Aix-en-Provence](#) in the southeast when Émile was three years old. Four years later, in 1847, his father died, leaving his mother on a meager pension. In 1858, the Zolas moved to Paris, where Émile's childhood friend [Paul Cézanne](#) soon joined him. Zola started to write in the [romantic](#) style. His widowed mother had planned a law career for Émile, but he failed his [Baccalauréat](#) examination.

Before his breakthrough as a writer, Zola worked as a clerk in a shipping firm and then in the sales department for a publisher ([Hachette](#)). He also wrote literary and art reviews for newspapers. As a political journalist, Zola did not hide his dislike of [Napoleon III](#), who had successfully run for the office of President under the constitution of the [French Second Republic](#), only to misuse this position as a springboard for the [coup d'état that made him](#)

[emperor](#). In 1862 Zola was naturalized as a French citizen. In 1864 he met Éléonore-Alexandrine Meley, who called herself Gabrielle, a seamstress, who may have also worked as a prostitute. He married her on the 31 May 1870. She stayed with him all his life and was instrumental in promoting his work. The marriage remained childless. Alexandrine Zola did have a child before she met Zola that she gave up, because she was unable to take care of it. When she confessed of this to Zola after their marriage, they went looking for the girl, but she had died a short time after birth. In 1888 she hired Jeanne Rozerot, a seamstress who was to live with them in their home in Medan. Zola fell in love with Jeanne and fathered two children with her, Denise in 1889 and Jacques in 1891. After Jeanne left Medan for Paris, Zola continued to support and visit her and their children. In November 1891 Alexandrine discovered the affair, bringing the marriage to the brink of divorce however after the conflict had been somewhat resolved Zola was able to take an increasingly active role in the lives of the children. After his death, the children were given his name as their lawful surname. In 1888 he took up photography and obtained a near professional level of expertise.

During his early years, Zola wrote numerous short stories and essays, four plays and three novels. Among his early books was *Contes à Ninon*, published in 1864. With the publication of his sordid autobiographical novel *La Confession de Claude* (1865) attracting police attention, Hachette fired him. His novel *Les Mystères de Marseille* appeared as a serial in 1867. After his first major novel, *Thérèse Raquin* (1867), Zola started the series called Les Rougon Macquart, about a family under the [Second Empire](#). In Paris Zola maintained his friendship with [Cézanne](#) who painted a portrait of him with another friend from Aix-en-Provence, writer [Paul Alexis](#), entitled *Paul Alexis reading to Zola*. More than half of Zola's novels were part of this set of 20 collectively known as [Les Rougon-Macquart](#). Unlike [Balzac](#) who in the midst of his literary career resynthesized his work into *La Comédie Humaine*, Zola from the start at the age of 28 had thought of the complete layout of the series. Set in France's Second Empire, the series traces the "environmental" influences of violence, alcohol and prostitution which became more prevalent during the second wave of the [Industrial Revolution](#). The series examines two branches of a family: the respectable (that is, legitimate) Rougons and the disreputable (illegitimate) Macquarts for five generations.

As he described his plans for the series, "I want to portray, at the outset of a century of liberty and truth, a family that cannot restrain itself in its rush to possess all the good things that progress is making available and is derailed by its own momentum, the fatal convulsions that accompany the birth of a new world." Although Zola and Cézanne were friends from childhood, they experienced a falling out later in life over Zola's fictionalized depiction of Cézanne and the [Bohemian](#) life of painters in his novel *L'Œuvre* (*The Masterpiece*, 1886). From 1877 with the publication of *L'Assommoir*, Émile Zola became wealthy; he was better paid than [Victor Hugo](#), for example. He became a figurehead among the literary bourgeoisie and organized cultural dinners with [Guy de Maupassant](#), [Joris-Karl Huysmans](#) and other writers at his luxurious villa (worth 300,000 francs) in Medan near Paris after 1880. *Germinal* in 1885, then the three 'cities', *Lourdes* in 1894, *Rome* in 1896 and *Paris* in 1897, established Zola as a successful author. The self-proclaimed leader of French naturalism, Zola's works inspired operas such as those of [Gustave Charpentier](#), notably *Louise* in the 1890s. His works, inspired by the concepts of [heredity](#) ([Claude Bernard](#)), social [Manicheanism](#) and idealistic socialism, resonate with those of [Nadar](#), [Manet](#) and subsequently [Flaubert](#). In the chapter on Provencal I write at length on Zola's role in the Dreyfus affair as well as on his premature death and what ensued subsequently.

I visited Provence and South West France in 2014 (Avignon, Aix-en-Provence, Albi, Marseille, Nîmes, Carpentras, Orange, Roussillon, Cassis, Calanques, Isle-sur-la-Sorgue, Fontaine de Vaucluse, Pont du Gard, Les Baux, Arles, Camargue, Aigues Mortes, Saintes Maries de la Mer, Carcassonne, Toulouse, Montpellier, and previously Cannes, Nice, Monte Carlo, Monaco), after I have learned the language, read texts in this language, as Mireille/Mireio by Frederic Mistral, many novels, plays and poetry. Provençal is related to other languages spoken in the region – Occitan, Gascon, Limousin, Auvergnat, Nicard. [Frederic Mistral](#) (1830-1914) was a French writer and lexicographer of the [Provençal language](#). He received in 1904 [the Nobel Prize](#) in Literature, "in recognition of the fresh originality and [true inspiration](#) of his poetic production, which faithfully reflects the natural scenery and native spirit of his people, and, in addition, his significant work as a [Provençal philologist](#)". Mistral is [the most revered](#) writer in [modern Provençal](#)/Occitan literature. I have read his delightful masterpiece Mireio with the French translation Mireille, and I bring here the [opening verses](#) and translation, [and in Mireio](#) on Wikipedia – you can [click in order](#) to read the full text in Occitan and in English.

*Cante uno chato de Prouvènço,
Dins lis amour de sa jouvènço,
strayed,*

*A través de la Crau, vers la mar, dins li bla,
Umble escoulan dóu grand Oumèro,
iéu la vole segui. Coume ero
Ren qu'uno chato de la terro,
En foro de la Crau se n'es gaire parla.*

I sing the love of a Provençal maid;
How through the wheat-fields of La Crau she

Following the fate that drew her to the sea.
Unknown beyond remote La Crau was she;
And I, who tell the rustic tale of her,
Would rather be Homer's humble follower.

*Emai soun front noun lusguèsse
Que de jouinesso, emai n'aguèsse
Ni diadèmo d'or ni mantèu de Damas,
Vole qu'en glori fugue aussado
Coume un rèino, e caressado
Pèr nosto lengo mespresado,
Car cantan que pèr vautre, o pastre e gènt di mas.*

What though youth's aureole was her only cro
And never gold she wore nor damask gown?
I'll build her up a throne out of my song,
And hail her queen in our despised tongue.
Mine be the simple speech that ye all know,
Shepherds and farmer-folk of lone La Crau.

Mistral's most important work *Mirèio* (*Mireille*) was published in 1859, after eight years of effort. *Mirèio*, a long poem in Provençal consisting of twelve songs, tells of the thwarted love of Vincent and Mireille, two young Provençal people of different social backgrounds. The name Mireille (*Mirèio* in Provence) is a doublet of the word *meraviho* which means wonder. Mistral used the occasion not only to promote his language but also to share the culture of an area, speaking about, among other things, Saintes-Maries-de-la-Mer, where according to legend the dragon, Tarasque, was driven out, and of the famous and ancient Venus of Arles. He prefaced the poem with a short notice about Provençal pronunciation. The poem tells how Mireille's parents wish her to marry a Provençal landowner, but she falls in love with a poor basket maker named Vincent, who loves her as well. After rejecting three rich suitors, a desperate Mireille, driven by the refusal of her parents to let her marry Vincent, runs off to Saintes-Maries-de-la-Mer to pray to the patrons of Provence to change her parents' minds. Having forgotten to bring a hat, she falls victim to the heat, dying in Vincent's arms under the gaze of her parents.

Mistral dedicated his book to [Alphonse de Lamartine](#) as follows: To you, I dedicate Mireille: It is [my heart and my soul](#); It is the flower of my years; It is bunch of grapes from La Crau,

leaves and all, a peasant's offering Lamartine wrote enthusiastically: "I will tell you good news today! A great epic poet is born ... A true Homeric poet in our time; ... Yes, your epic poem is a masterpiece; ... the perfume of your book will not evaporate in a thousand years." *Mirèio* was translated into some fifteen European languages, including into French by Mistral himself. In 1863, [Charles Gounod](#) made it into an opera, *Mireille*, and we bring [the full opera](#) here. [We bring](#) also the film *Malaterra* in Provencal with French subtitles: [part 1](#), [part 2](#), [part 3](#), [part 4](#), [part 5](#).

Provence is the country of the painters who were born or operated there – Paul Cezanne, Henri Matisse, Vincent Van Gogh. But it is best known throughout the world (besides its scenery and cuisine) because of the [masterpieces of Emile Zola](#) who lived in Aix-en-Provence from the age [of 3 to 18](#), and wrote his masterpiece about a family from Provence - Les Rougon-Macquart, originating from Plassans, a town inspired by Aix-en-Provence. While most of the 20 books of this masterpiece (I have read all of them a couple of times and some of them several times) are not located in Provence, some of them are and most of the characters originate from Provence. In my courses and books I focus, inter alia, on Aristide Saccard, the protagonist of *L'argent/Money*, his true name is Aristide Rougon, born in Plassans. We follow his career as a speculator and unethical businessman, model of many speculators of today in banking and real estate, in five books: *La fortune des Rougon*, *La curee*, *La joie de vivre*, *L'argent* and *Docteur Pascal*. He never pays for his schemes and those who pay for them are the small minority shareholders. The books of Les Rougon-Macquart that are located in Provence are: *La fortune des Rougon*, *La conquete de Plassans*, *La faute de l'abbe Mouret*, and *Le docteur Pascal*. In those books especially, but also in the other books that happen elsewhere in France with the main protagonists originating from Provence, one can find the character of the people of Provence, with their good and bad habits, the scenery of Provence, and the history of Provence in the nineteenth century and prior to that.

[The Fortune of the Rougons](#) (French: [La Fortune des Rougon](#)), originally published in 1871, is the first novel in [Émile Zola's](#) monumental twenty-volume series [Les Rougon-Macquart](#). The novel is [partly an origin story](#), with a huge cast of characters swarming around - many of whom become the central figures of later novels in the series - and partly an account of the December 1851 coup d'état that created the French [Second Empire](#) under [Napoleon III](#) as experienced in a large provincial town in southern France. The title refers not only to the "fortune" chased by protagonists Pierre and Felicité Rougon, but also to the fortunes of the various disparate family members Zola introduces, whose lives are of central importance to later books in the series.

After a stirring opening on the eve of the coup d'état, involving an idealistic young village couple joining up with the republican militia in the middle of the night, Zola then spends the next few chapters going back in time to pre-Revolutionary Provence, and proceeds to lay the foundations for the entire Rougon-Macquart cycle, committing himself to what would become the next twenty-two years of his life's work. The fictional town of Plassans (loosely based on the real city of [Aix-en-Provence](#), where Zola grew up) is established as the setting for the novel and described in intimate detail, and then we are introduced to the eccentric heroine Adelaide Fouque, later known as "Tante Dide", who becomes the common ancestor for both the Rougon and Macquart families. Her legitimate son from her short marriage to her late husband, a labourer named Rougon who worked on Dide's land, is forced to grow up alongside two illegitimate children — a boy and a girl — from Dide's later romance with the smuggler, poacher and alcoholic Macquart, while the ageing Dide slides further and further into a state of mental illness and borderline senile dementia. From this premise, the next

nineteen novels all get their central protagonists and to a certain extent their themes. This is an unprecedented masterpiece! The narrative continues along double lines, following both "branches" of the family. We see Pierre Rougon (the legitimate son) in his attempts to disinherit his Macquart half-siblings, his marriage to Felicité Puech, the voraciously ambitious daughter of a local merchant, and their continued failure to establish the fortune, fame and renown they seek, despite their greed and relatively comfortable lifestyles. Approaching old age, the Rougon couple finally admit defeat and settle, crushed, into their lower middle class destinies, until by a remarkable stroke of luck their eldest son Eugène reports from Paris that he has some news that they might find interesting. Eugène has become one of the closest allies of the future Emperor Napoleon III and informs his parents that a coup is imminent. Having been effectively given insider information about which side to back in the coming revolution, the Rougons then make a series of seemingly bold moves to show their loyal and steadfast support for Napoleon III, winning the admiration of the most influential people in the town, mostly royalists who are themselves afraid of showing too much commitment for fear of backing the "wrong horse" and losing their standing and fortune.

The narrative then switches over to the Macquart side of the family, whose grim working-class struggles to survive are juxtaposed keenly with the Rougons' seemingly trivial quest for greater wealth and influence in genteel drawing-room society. Descended from a drunken ne'er-do-well and a madwoman, Zola effectively predestines the Macquarts to lives of toil and misery. Zola's theories of heredity, laid out in the original preface to this novel, were a cornerstone of his entire philosophy and a major reason for his embarking on the mammoth Rougon-Macquart project in the first place in order to illustrate them. Largely discredited nowadays, and wrongfully so, the theories are largely "present but unseen" in most of the novels in the Rougon-Macquart cycle, allowing those books to be enjoyed without the overshadowing effect of Zola's somewhat suspect scientific ideas. Due to the original story nature of *La Fortune des Rougon*, the theories are placed much more to the fore, and can appear somewhat heavy-handed as a result.

A third branch of the family, the Mourets, descended from Macquart and Dide's daughter, are then introduced before the novel's focus is brought back to the "present", the night of the coup, via a quite brilliantly told love story. The idealistic but naïve Silvère Mouret falls madly in love with the innocent Miette Chantegreil, and after a long courtship they decide to join up with the republicans to fight the coup. The rest of the novel then picks up from where the opening chapter left off, and from then on is basically a dual narrative telling the story of the old Rougon couple and their increasingly Machiavellian machinations to get themselves into a position of fortune and respect in Plassans, juxtaposed with Silvère and Miette's continuing love story and the doomed republican militia's disastrous attempt to take the town back. Eventually, the Rougons exploit their half-brother Antoine Macquart into inadvertently helping crush the republican threat, and they achieve their life's ambition, fortune and favour. For Silvère and Miette, who committed themselves so completely to a doomed cause, there can be no such happy ending and Zola wisely leaves their half of the story at a bleak dead end, remaining the objective author.

[*La Conquête de Plassans*](#) (1874) is [the fourth novel](#) in Émile Zola's twenty-volume series Les Rougon-Macquart. In many ways a sequel to the first novel in the cycle, *La Fortune des Rougon* (1871), this novel is again centred on the fictional Provençal town of Plassans and its plot revolves around a sinister cleric's attempt at political intrigue with disastrous consequences for some of the townsfolk. At the start of the novel, the home life of Francois

Mouret and his wife and cousin Marthe (née Rougon) is portrayed as a generally pleasant and relaxed existence. Francois is slightly compulsive in his behaviour and Marthe clearly suffers from some sort of mental illness, which Zola intended to portray as a genetic consequence of the Rougon-Macquart family's tangled ancestry. Their three children include the eldest son Octave, an intelligent but feckless ladies' man (featured as the principal character of two later novels in the cycle, [*Pot-Bouille*](#) (1882) and [*Au Bonheur des Dames*](#) (1883), but here little more than a footnote), as well as the quiet and introverted younger son Serge and the mentally-handicapped daughter Desirée.

Their home lives are shattered by the arrival of a strange cleric, Abbé Faujas, and his mother, who rent a room in the Mourets' house. Slowly, it transpires that the mysterious stranger has arrived to try and win influence in the town for outside political forces (which never manifest themselves) through a series of Machiavellian intrigues, plots, slanders and insinuations; in the process of doing so, he proceeds to unravel the Mourets' lives to such an extent that the bewildered Francois is unwillingly and unnecessarily committed to a mental institution, while poor Marthe becomes obsessively religious, though whether her devotion is to God or Faujas becomes increasingly unclear. In Mouret's absence, and Marthe's indifference, Faujas unscrupulous sister Olympe and brother in law Trouche take over the Mouret's house, and live high at their expense. The reaction of the townsfolk to Faujas' outside influence is fascinatingly drawn by Zola, and the tactics of the groups who are in "resistance" to Abbé Faujas' clever machinations are very keenly observed. The narrative is kept up at a tremendous pace and builds to a quite astonishing climax of violence & horror as Zola ends the novel in an apocalyptic fury.

[*La Faute de l'Abbé Mouret*](#) (1875), [*Abbe Mouret's Transgression*](#), is the [fifth novel](#) in Émile Zola's [twenty-volume](#) series *Les Rougon-Macquart*. Viciously [anticlerical](#) in tone, it follows on from the horrific events at the end of *La Conquête de Plassans*, focussing this time on a remote Provençal backwater village. The plot centres on the neurotic young priest Serge Mouret, first seen in *La Conquête de Plassans*, as he takes his orders and becomes the parish priest for the disinterested village of Artauds. The inbred villagers have no interest in religion and Serge is portrayed giving several wildly enthusiastic Masses to his completely empty, near-derelict church. Serge not only seems unperturbed by this state of affairs but actually appears to have positively sought it out especially, for it gives him time to contemplate religious affairs and to fully experience the fervour of his faith. Eventually he has a complete nervous breakdown and collapses into a near-comatose state, whereupon his distant relative, the unconventional doctor Pascal Rougon (the central character of the last novel in the series, 1893's *Le Docteur Pascal*), places him in the care of the inhabitants of a nearby derelict stately home, Le Paradou.

The novel then takes a complete new direction in terms of both tone and style, as Serge — suffering from amnesia and total long-term memory loss, with no idea who or where he is beyond his first name — is doted upon by Albine, the whimsical, innocent and entirely uneducated girl who has been left to grow up practically alone and wild in the vast, sprawling, overgrown grounds of Le Paradou. The two of them live a life of idyllic bliss with many Biblical parallels, and over the course of a number of months, they fall deeply in love with one another; however, at the moment they consummate their relationship, they are discovered by Serge's monstrous former monseigneur and his memory is instantly returned to him. Wracked with guilt at his unwitting sins, Serge is plunged into a deeper religious fervour than ever before, and poor Albine is left bewildered at the loss of her soulmate. As with many of Zola's earlier works, the novel then builds to a horrible climax. Unusually for Zola, the novel

contains very few characters and locations, and the level of realist observation compared to outright fantasy is most uncharacteristic; however, the novel remains extraordinarily powerful and readable, and is considered one of Zola's most linguistically inventive and well-crafted works.

[Doctor Pascal](#) (orig. French [Le Docteur Pascal](#)) is the [twentieth and final](#) novel of the Rougon-Macquart series by Émile Zola, first published in June 1893 by Charpentier. Zola's plan for the Rougon-Macquart novels was to show how heredity and environment worked on the members of one family over the course of the Second Empire. He wraps up his heredity theories in this novel. *Le docteur Pascal* is furthermore essentially a story about science *versus* faith. The novel begins in 1872, after the fall of the Second Empire and the end of the reign of Emperor Napoleon III. The title character, Pascal Rougon (b. 1813), is the son of Pierre and Félicité Rougon, whose rise to power in the fictional town of Plassans is detailed in the first novel of the series *La fortune des Rougon*. Pascal, a physician in Plassans for 30 years, has spent his life cataloging and chronicling the lives of his family based on his theories of heredity. Pascal believes that everyone's physical and mental health and development can be classified based on the interplay between innateness (reproduction of characteristics based in difference) and heredity (reproduction based in similarity). Using his own family as a case study, Pascal classifies the 30 descendants of his grandmother Adelaïde Fouque (Tante Dide) based on this model.

Pascal has developed a serum he hopes will cure hereditary and nervous diseases (including consumption) and improve if not prolong life. His niece Clotilde sees Pascal's work as denying the omnipotence of God and as a prideful attempt to comprehend the unknowable. She encourages him to destroy his work, but he refuses. (Like other members of the family, Pascal is somewhat obsessive in the pursuit of his passion.) Pascal explains his goal as a scientist as laying the groundwork for happiness and peace by seeking and uncovering the truth, which he believes lies in the science of heredity. After he shows her the Rougon-Macquart family tree and demonstrates his refusal to sugarcoat the family's acts, Clotilde begins to agree with him. Her love for him solidifies her faith in his theories and his lifelong work. Clotilde and Pascal eventually begin a romance, much to the chagrin of his mother Félicité. (She is less concerned about the incestuous nature of the relationship than by the fact that the two are living together out of wedlock.) Félicité wants to keep the family secrets buried at any cost, including several family skeletons living nearby: her alcoholic brother-in-law Antoine Macquart and her centenarian mother-in-law Tante Dide. When Clotilde's brother Maxime asks Clotilde to come to [Paris](#), Félicité sees this as an opportunity to control Pascal and access his papers to destroy them. Pascal suffers a series of heart attacks, and Clotilde is not able to return from Paris before he dies. Félicité immediately burns all of Pascal's scholarly work and the documents she considers incriminating. The novel, and the entire 20-novel series, concludes with the birth of Pascal and Clotilde's son and the hope placed on him for the future of the family. I strongly recommend to read all the 20 books of Zola's Les Rougon-Macquart, which is the peak of world's literature.

Emile Zola is known throughout the world more as the writer of J'accuse – I accuse, the famous article that he wrote in the newspaper L'aurore, where he denounced the unjust persecution of Capitaine [Alfred Dreyfus](#) who was condemned unjustly for treason and sent to the Devil's Island in French Guyana, mainly because he was Jewish and it was easier to choose a Jew as a scapegoat while the French army did not want to sentence the real traitor Esterhazy. It is not a coincidence that Zola chose to defend Dreyfus and it has to do with his origins, coming from Provence, which was much more liberal than other parts of France,

having an Italian father, and living a large part of his life in poverty, thus not feeling obliged to defend the establishment – political, military and religious. He suffered a lot because of his courageous move, he had to flee to London (Hugo also fled from France during the reign of Napoleon III) as he did not want to be arrested for libel, half of French population hated him and thought of him as a traitor (well, this half or most of it did not appreciate either his novels which were naturalists and offended their beliefs), and he was probably murdered in 1902. Zola died on 29 September 1902 of [carbon monoxide poisoning](#) caused by an improperly [ventilated chimney](#). His funeral on 5 October was attended by thousands, according to *The New York Times*. Dreyfus initially had promised not to attend the funeral but was given permission by Mme Zola and attended.

His enemies were blamed for his death because of previous attempts on his life, but nothing could be proved at the time. Expressions of sympathy arrived from everywhere in France; for a week the vestibule of his house was crowded with notable writers, scientists, artists, and politicians who came to inscribe their names in the registers. On the other hand, Zola's enemies used the opportunity to celebrate in malicious glee. Writing in *L'Intransigeant*, [Henri Rochefort](#) claimed Zola had committed suicide, having discovered Dreyfus to be guilty. Nothing surprises me on the part of anti-Semitic writers and leaders, who are convinced that the Holocaust was a Jewish invention, that the Jews are to blame for all the evils of history, and that the world is divided in two: the Arians (true French, British, WASPs, or Germans), and the others - the sympathisers of the Jews, the Blacks, the Muslims, who are bought by Jewish/Arab money). In 1953, an investigation ("Zola a-t-il été assassiné?") published by the journalist Jean Borel in the newspaper *Libération* raises the idea that the death of Zola might be a murder rather than an accident. It is based on the revelation of the Norman pharmacist Pierre Hacquin who was told by the chimney sweeper Henri Buronfosse that the latter intentionally blocked the chimney of the apartment of Émile Zola in Paris ("Hacquin, je vais vous dire comment Zola est mort. [...] Zola a été asphyxié volontairement. C'est nous qui avons bouché la cheminée de son appartement.").

[Zola was initially](#) buried in the Cimetière de Montmartre in Paris, but on 4 June 1908, just five years and nine months after his death, his remains were relocated to the [Panthéon](#), where he shares a crypt with [Victor Hugo](#) and [Alexandre Dumas](#). I had a most pleasant surprise when I found in my visit to the Pantheon that the three authors I admire the most – Zola, Hugo, and Dumas share a same crypt. We can say on the three of them what Anatole France said at Zola's funeral: « Il fut un moment de la conscience humaine », actually the three of them were a moment of human conscience, but to this glorious status we have to add, as true cosmopolitans, such prominent personalities, who contributed most to humanity: Henrik Ibsen, George Bernard Shaw, Arthur Miller, Shakespeare, Cervantes, Moliere, Brecht, Sartre, Joshua Sobol, Dickens, Gandhi, Ben Gurion, Franklin D. Roosevelt, Winston Churchill, Tolstoy, Marcel Pagnol, Muhammad Yunus, Verdi, Beethoven, Lorca, Martin Luther King, Joseph Stiglitz, Naomi Klein.

I have written many chapters in my books about Zola's contribution to human conscience, to the oppressed, the underprivileged, describing what motivates the rich and mighty in their schemes against the minority shareholders, as if he was a modern writer with a brilliant knowledge of business and economics. I strongly support whistleblowers as essential to eradicate wrongdoings that otherwise would remain in the dark, like the crimes of Brecht's Mack the Knife, like the crimes of Zola's Aristide Saccard, like the crimes of Pagnol's Cesar. There will always be cases where it will be argued that it is impossible to divulge a case as it is a state secret or a professional secret whose disclosure could endanger the company or the

state. The most renowned case of a disclosure of a crime by act of conscience is probably the case of Colonel Picquart. One needs to have extreme courage in order to denounce his superiors, and bring against him the French army, the government and the majority of Frenchmen. But Picquart, imperturbable, testifies at the trial of Zola, after the latter wrote his famous 'J'accuse', where he accused the French authorities of concealing the truth about the innocence of Captain Dreyfus: "Pendant plus d'une heure, il expose, d'une voix tranquille, comment il a decouvert la trahison d'Esterhazy, les manoeuvres dont il a ete la victime et sa tristesse d'etre ecarte de l'armee. Les revisionnistes lui font une ovation. Apres quoi il est confronte avec ses anciens subordonnes, qui, tous partisans de Henry, l'accablent." (Troyat, Zola, p.274) "For more than an hour, he exposes, in a quiet voice, how he has discovered the treason of Esterhazy, the maneuvers that he was victim of and his sadness to be dismissed from the army. The revisionists make him an ovation. After that he is confronted with his old subordinates, whom, all colleagues of Henry, scorn him."

But Zola does not glorify the poor or underprivileged and condemn always the rich and mighty, he shows cases where petit bourgeois, honest people rival with the crimes of the unscrupulous rich, as he shows cases that the rich contribute to the welfare of society and are honest and benevolent. When we mention the word personification, we incorporate all its meanings, even in the negative sense of minority shareholders, who sometimes while being simple and honest men act more rapaciously than the worse of the majority shareholders. The Internet in many cases reveals this rapacity, this vulgarity, this egoism, which puts a question mark on the essential dilemma of this book. Is it worthwhile to safeguard the rights of minority shareholders or stakeholders if on the average they are just as unethical as the executives and majority shareholders? Emile Zola describes in his book 'Le Ventre de Paris' - 'The Belly of Paris' the conduct of Lisa Quenu-Macquart who finds herself in an ethical dilemma that would make a good case study on ethics. Florent, her husband's brother, has fled from the Devil's Island where he was imprisoned because of subversive conduct toward the regime of Napoleon III. He has the right of his part of the inheritance and she decides to give it to him, by fundamental honesty. She wants to give him the money, but Florent insists that she keep it in her butcher shop. "Vous avez tort, dit-elle, comme pour conclure. J'ai fait ce que je devais faire. Maintenant, ce sera comme vous voudrez... Moi, voyez-vous, je n'aurais pas vecu en paix. Les mauvaises pensees me derangent trop." (Zola, *Le Ventre de Paris*, p. 106) "You are wrong, she said, as to conclude. I have done what I had to do. Now, it will be as you wish... You see, I would have never lived in peace. Malicious thoughts disturb me too much."

Lisa is the epitome of honesty; her conscience does not reproach her of anything; she does not owe a penny, is not part of any skullduggery; she buys and sells good meat, she does not charge more than her competition... The dishonest people are people like Saccard her cousin the financier, the hero of *L'Argent*, the speculators, those who despoil the poor people. She is a proud 'minority shareholder' who despises the 'majority shareholders', the mighty. "C'est bon pour nos cousins, les Saccard, ce que tu dis-la. Ils font semblant de ne pas meme savoir que je suis à Paris; mais je suis plus fiere qu'eux, je me moque pas mal de leurs millions. On dit que Saccard trafique dans les demolitions, qu'il vole tout le monde. Ca ne m'etonne pas, il partait pour ça. Il aime l'argent a se rouler dessus, pour le jeter ensuite par les fenetres, comme un imbécile... Qu'on mette en cause les hommes de sa trempe, qui réalisent des fortunes trop grosses, je le comprends. Moi, si tu veux le savoir, je n'estime pas Saccard... Mais nous, nous qui vivons tranquilles, qui mettront quinze ans a amasser une aisance, nous qui ne nous occupons pas de politique, dont tout le souci est d'élever notre fille et de mener à bien notre barque! allons donc, tu veux rire, nous sommes d'honnêtes gens!" (same, p. 238-9)

"It is good for our cousins, the Saccard, what you say here. They pretend to ignore that I am in Paris; but I am prouder than them, I don't care about their millions. They say that Saccard speculates in real estate, that he steals from everybody. It doesn't surprise me; he started like that. He likes money to roll with it on the ground, in order to throw it afterwards from the windows, like a fool... I understand that people of his kind who earn exorbitant fortunes have questionable conduct. For myself, if you want to know it, I don't estimate Saccard... But we who live quietly, who will need fifteen years to achieve an easy life, we who are not preoccupied by politics, whose only concern is to raise our daughter and row our boat properly! Come on, you are kidding, we are honest people!"

And it is this honest woman, who ultimately finds the political discussions of Florent despicable, who cannot stand the smell of fish that Florent brings to the table as it prevents her from eating, she – who probably has the smell of pork from her butcher shop. She thinks that Florent eats too much but he doesn't enjoy it. He cannot even get fatter, the miserable, as he is eaten up by his malice. The honest lamb Florent has become a wolf in the imagination of Lisa, when she sees that she can profit from the inheritance. "Elle s'était approchée de la fenêtre. Elle vit Florent qui traversait la rue Rambuteau, pour se rendre à la poissonnerie. L'arrivage de la marée débordait, ce matin-là; les mannes avaient de grandes moires d'argent, les criées grondaient. Lisa suivit les épaules pointues de son beau-frère entrant dans les odeurs fortes des Halles, l'échine pliée, avec cette nausée de l'estomac qui lui montait aux tempes; et le regard dont elle l'accompagnait était celui d'une combattante, d'une femme résolue au triomphe." (same, p. 242-3) "She approached the window. She saw Florent cross Rambuteau Street and reach the fish shop. The tide overflowed this morning; the mannas glistened like silver, the fishmongers' auctions were at their peak. Lisa followed the pointed shoulders of her brother-in-law entering the Halles, his back curved, with a nausea of the stomach that reached his temples; and the look with which she accompanied him was a look of a warrior, a woman resolute to win." [Is Zola misogynist?](#) Lisa, Gervaise, Nana, Renee, Therese Raquin, Severine, Adelaide, are to say the least not so positive characters. Critics find Zola misogynist, who tries to prove "scientifically" the negative aspects of women, nervous, irritable, unfaithful, women who betray their husbands, prostitutes who take advantage of their lovers, committing crimes. But Denise, Catherine, Angelique, Clotilde, and many others are positive figures, although not in modern terms, as they are not enough feminists.

Florent was condemned because of his smell of fish, of his 'malice', but really because these excuses gave her the legitimacy to steal his part of the inheritance that she coveted without admitting it, as she was honest. Exactly like those who condemned Captain Dreyfus to exile to the same Devil's Island where Florent was imprisoned, because of his Jewish smell, his treason, his innocence. And Zola, who 20 years later condemns the honorable and honest men who have judged Dreyfus in 'J'accuse'; blames Lisa of her treachery and honest people of their covetousness, after the policemen take Florent to prison. "Les bandes de lard entrevues, les moities de cochon pendues contre les marbres, mettaient la des rondeurs de ventre, tout un triomphe du ventre, tandis que Lisa, immobile, avec sa carrure digne, donnait aux Halles le bonjour matinal, de ses grands yeux de forte mangeuse. Puis toutes deux se penchèrent. La belle Mme Lebigre et la belle Mme Quenu échangèrent un salut d'amitié. Et Claude, qui avait certainement oublié de dîner la veille, pris de colère à les voir si bien portantes, si comme il faut, avec leurs grosses gorges, serra sa ceinture, en grondant d'une voix fâchée: 'Quels gredins que les honnêtes gens!'" (same, p. 424) "The packs of bacon, the half porks hanged over the marble, put over there roundness of bellies, a whole triumph of bellies, while Lisa, motionless, with her imposing dignity, gave to the Halles the good morning, with her large eyes. Then both of them stooped over. The beautiful Mme. Lebigre and the beautiful Mme.

Quenu said a friendly hello to each other. And Claude, who certainly has forgotten to dine yesterday, furious to see them so healthy, decent, with their large bosoms, gripped his belt, while growling in an angry voice: 'What scoundrels are the honest people!' " So, honesty is not everything, ultimately...

The most Provencal of all the French authors, although he wrote in French as Zola and not in Provencal, is [Marcel Pagnol](#), one of the best authors of world literature, probably the most humane who excelled in his plays ([Marius](#), [Fanny](#), [Cesar](#), [Topaze – Acte 1](#), [Acte 2](#), [3. Les marchands de gloire](#), [Jazz](#), [Judah](#), [Jofroi](#)...), his novels ([Jean de Florette](#), [Manon des sources](#), [La gloire de mon père](#), [Le château de ma mere](#), [Le temps des secrets](#), [Le temps des amours](#)...), and his films ([La femme du boulanger](#), [Topaze](#), [Marius](#), [Fanny](#), [Cesar](#), [Manon des sources](#), [Ugolin](#), [La belle meuniere](#), [La fille du puisatier](#)...). Pagnol was one of the first writers who dared to show Judah as a positive person and not as a traitor. He loved all his protagonists, even the evil ones, as he could not hate anybody. Pagnol was one of the playwrights who understood most human nature. I have read almost all his books, plays and screenplays – about 30, as I have also read about 30 novels by Emile Zola, the 20 of the Rougon-Macquart and novels wrote before and after. These are two examples of my method of reading, where if I like a playwright, a novelist or a poet, I read almost all his work in order to understand him the best. Thus, I have read almost all the works by Arthur Miller, Tennessee Williams, Jean Anouilh, Joshua Sobol, Eugene O'Neill, Henrik Ibsen, William Shakespeare, Honore de Balzac, Albert Cohen, Benjamin Tammuz, Shai Agnon, Jean-Paul Sartre, Henry James, Franz Kafka, Racine, Moliere, and most of their biographies. From Pagnol's works I taught and wrote about Topaze, Jean de Florette, Manon des sources. I write extensively about Zola in this book's Appendix (L'argent), and about Pagnol's humor in the chapter about Humor. We bring here a short essay about Pagnol's Jean de Florette, which happens in Provence, and can be seen on film in the masterpieces Jean de Florette and Manon, that were produced after Pagnol's death, but Pagnol has made also his version of the films, long before Berri's films in 1986, which give a more modern approach:

Jean de Florette by Marcel Pagnol

Jean de Florette, 1986, 122 minutes, Director Claude Berri, with Yves Montand, Daniel Auteuil, Gerard Depardieu

Manon des Sources by Marcel Pagnol

Manon des Sources 1986, 113 minutes, Director Claude Berri, with Emmanuele Beart, Daniel Auteuil, Yves Montand

Jean de Florette (L'Eau des Collines of Marcel Pagnol) has come to settle at Bastides Blanches in Provence, in the property of his deceased mother, which was coveted by Cesar Soubeyran, the Papet - the Father or rather the Godfather, and his nephew, Ugolin. Cesar was the richest landowner in the region and the Bastidians feared them or had their interests to remain in good terms with them. The property had a spring, which was known by the Bastidians, and was blocked by the Soubeyran in order to discourage Jean de Florette from cultivating his land. Nobody told Jean about the existence of the spring, even those who learned that it was blocked by the Soubeyran, as Jean was an 'outsider', to whom nobody has to disclose anything as 'you don't mess with others' business'. The 'insider information' is therefore not disclosed to those who are not insiders, part of the majority, mighty, although Jean had the right to know because the spring was in his property. Cesar sends his nephew to befriend Jean in order to get information on his whereabouts, but he himself does not want to know him, as criminals prefer not to personify their victims, because 'nothing is personal'. The criminal remains anonymous.

Since the victim is also anonymous, Cesar can keep his objectivity, and he tells off Ugolin who knows Jean and has scruples over him. Cesar even manages to prevent Jean from befriending the Bastidians, who lose the last scruples they could have toward Jean, whom they do not know. Pamphile, one of the only Bastidians who wants to tell Jean about the spring, is prevented from doing so by his wife Amelie, who gives him the 'classical' arguments to dissuade him: "La premiere fois qu'il est venu au village, il a essaye de tuer Cabridan a coups de boules... ne t'occupe pas des affaires des autres. Tu as besoin d'avoir des clients... C'est pas un bossu de Crespin qui te donnera du travail. Justement, dit-elle le Papet est venu. Il veut que tu lui refasses la mangeoire de son mulet." (Pagnol, Oeuvres Completes III, Jean de Florette, p.822) "The first time that he came to the village, he tried to kill Cabridan with bowls... do not mess up with others' business. You need to have clients... It is not a hunchback from Crespin who will give you work. By the way, she said, the Papet has come. He wants you to mend the manger of his mule." Anything goes: calumny, as it is Jean himself who received the bowls on his hump; Omerta – don't speak and don't mess with other people's business; intimidation, your livelihood can be endangered; xenophobia – as Jean is from Crespin, he is not one of ours...; and finally corruption, as the Papet buys his silence by giving work to Pamphile. Well, solidarity is fine as long as it does not hinder the business interests, as we see throughout the two parts of the novel.

The story is well known, Jean dies while trying to dig another well, Cesar and Ugolin buy at a bargain price the property from the widow. After having 'rediscovered' the spring on the property, they cultivate carnations, which need a lot of water, and get even richer. When the widow's and Jean's daughter Manon learns later on that the Soubeyran and all the village knew that the spring existed and it was blocked, she decides to avenge herself by obstructing the spring that gives water to the whole village. In so doing, many villagers are ruined, and the property of the Soubeyran is also devastated. In a splendid confrontation with the Papet and the villagers, they learn from Manon that the Papet has concealed from them that Jean was the son of Florette, who was born in the village of the Bastides. I was inspired by this confrontation in my novel.

"(Manon) 'Oui, c'était Florette Camoins, qui était née dans la ferme où son fils est mort!'

'Oyayaie!' dit Pamphile, consterne, 'personne ici ne l'a jamais su!'

(Manon) 'Le vieux voleur, la-bas, l'a toujours su, et Ugolin aussi le savait...'

(Le Papet) 'Qu'est-ce que ça change?'

Pour eux 'ça changeait tout'. Avoir abandonné à son triste sort un paysan amateur venu de Crespin, c'était en somme de bonne guerre, mais la victime, c'était le fils de Florette des Bastides; non pas un locataire ou un acheteur étranger, mais le propriétaire d'un bien de famille, acquis par un héritage maternel." (Pagnol, Oeuvres Complètes III, Manon des Sources, p. 1028)

"(Manon) 'Yes, it was Florette Camoins, who was born in the farm where her son has died!'

'Oyayaie!' said Pamphile, with consternation, 'nobody here knew it!'

(Manon) 'The old thief, over there, has known it all the time and Ugolin also knew it...'

(Le Papet) 'How does it change anything?'

For them 'it changed everything'. To have left to his sad fate an amateur farmer who came from Crespin, was ultimately a good fight, but the victim, was the son of Florette from the Bastides; not a tenant or a foreign buyer, but the owner of a family wealth, acquired by a maternal inheritance." Toward the end of the second part of the book (Manon des Sources), Cesar learns that Jean was his son whom he had with Florette, who was not able to reveal it to him as he was posted far away in the army and her letter got lost. Cesar dies from the shock of

knowing that he caused the death of his own son... It reminds us of Arthur Miller's end of the play *All My Sons*.

Marcel Pagnol depicts in the most salient way the comic and tragic facets of Provence, his characters are so vivid, so funny, so tragic. When I visited Provence for the first time in 2014 (not counting short stays in Marseille in 1953... and on the Riviera), I felt that I know the places, the people, all Pagnol's characters came to my mind. I have seen several times the plays and films of Pagnol and enjoy them every time more. *Jean de Florette/Manon* was in my main course and I saw it probably 40 times with my students (17 times at the Naval Academy...), and I was moved to tears every time that Jean (Depardieu) and Manon (Beart) suffered as victims of the inexorable infamous Ugolin (Auteuil) and Cesar (Montand), played so masterly by three of the best French actors, and by the beautiful Beart, who on the last scene unveils to the people of the town the schemes of Ugolin and Cesar, causing their (justified?) death after they have caused her father's death. We hear French in a Provencal accent, and my students who don't speak French were moved by the film, even that they read the translation. Once they even tried to "embarrass" me by asking how come that I call Manon – Mano (in French you don't pronounce the last n), and Ugolin calls her Manon (pronouncing the final n)? I answered them that in Provencal you pronounce the final n, as in Spanish (Provence is very close to Spain) *Jamon* as opposed to *Jambon*. Although the players didn't speak Provencal their French was with a Provencal accent.

I would like to quote here five (out of 50) most beloved authors – Victor Hugo, Alexandre Dumas, Honore de Balzac, Jean-Paul Sartre, Marcel Proust. I'll start with [Les Misérables](#) by Victor Hugo, [which I read](#) several times, [saw the films](#) and [even the](#) musical.

Victor Marie Hugo; 26 February 1802 – 22 May 1885) was a French poet, novelist, and dramatist of the [Romantic movement](#). He is considered one of the greatest and best known French writers. In France, Hugo's literary fame comes first from his [poetry](#) but also rests upon his novels and his dramatic achievements. Among many volumes of poetry, [Les Contemplations](#) and [La Légende des siècles](#) stand particularly high in critical esteem. Outside France, his best-known works are the acclaimed novels [Les Misérables](#), 1862, and *Notre-Dame de Paris*, 1831 (known in English as [The Hunchback of Notre-Dame](#)). He also produced more than 4,000 drawings, which have since been admired for their beauty, and earned widespread respect as a campaigner for social causes such as the abolition of [the death penalty](#). Though a committed [royalist](#) when he was young, Hugo's views changed as the decades passed, and he became a passionate supporter of [republicanism](#); his work touches upon most of the political and social issues and artistic trends of his time. He was buried in the [Panthéon](#). His legacy has been honored in many ways, including his portrait being placed on [francs](#).

Victor Hugo's first mature work of fiction appeared in 1829, and reflected the acute social conscience that would infuse his later work. *Le Dernier jour d'un condamné* ([The Last Day of a Condemned Man](#)) would have a profound influence on later writers such as [Albert Camus](#), [Charles Dickens](#), and [Fyodor Dostoevsky](#). [Claude Gueux](#), a documentary short story about a real-life murderer who had been executed in France, appeared in 1834, and was later considered by Hugo himself to be a precursor to his great work on social injustice, [Les Misérables](#). Hugo became the figurehead of the romantic literary movement with the plays *Cromwell* (1827) and *Hernani* (1830). Hugo's novel *Notre-Dame de Paris* ([The Hunchback of](#)

[*Notre-Dame*](#)) was published in 1831 and quickly translated into other languages across Europe. One of the effects of the novel was to shame the City of Paris into restoring the much-neglected [Cathedral of Notre Dame](#), which was attracting thousands of tourists who had read the popular novel. The book also inspired a renewed appreciation for pre-Renaissance buildings, which thereafter began to be actively preserved.

Hugo began planning a major novel about social misery and injustice as early as the 1830s, but it would take a full 17 years for [*Les Misérables*](#) to be realized and finally published in 1862. Hugo was acutely aware of the quality of the novel and publication of the work went to the highest bidder. The Belgian publishing house Lacroix and Verboeckhoven undertook a marketing campaign unusual for the time, issuing press releases about the work a full six months before the launch. It also initially published only the first part of the novel ("Fantine"), which was launched simultaneously in major cities. Installments of the book sold out within hours, and had enormous impact on French society. Beginning in 1815 and culminating in the 1832 [June Rebellion](#) in [Paris](#), the novel follows the lives and interactions of several characters, particularly the struggles of ex-convict [Jean Valjean](#) and his experience of redemption. Examining the nature of law and grace, the novel elaborates upon the [history of France](#), the architecture and urban design of Paris, politics, [moral philosophy](#), [antimonarchism](#), justice, religion, and the types and nature of [romantic](#) and familial love. *Les Misérables* has been popularized through numerous adaptations for the stage, television, and film, including [a musical](#) and a [film adaptation](#) of that musical. The appearance of the novel was highly anticipated and advertised. Critical reactions were diverse, but most of them were negative. Commercially, the work was a great success globally. We bring here an extract of *Les Misérables*. We [chose to](#) bring here Tome 5, [livre premier](#), chapitre 6 [in French](#) and English, on the Paris barricades in 1848.

[Chapitre VI](#) Marius hagard, Javert laconique

Disons ce qui se passait dans la pensée de Marius. Qu'on se souvienne de sa situation d'âme. Nous venons de le rappeler, tout n'était plus pour lui que vision. Son appréciation était trouble. Marius, insistons-y, était sous l'ombre des grandes ailes ténébreuses ouvertes sur les agonisants. Il se sentait entré dans le tombeau, il lui semblait qu'il était déjà de l'autre côté de la muraille, et il ne voyait plus les faces des vivants qu'avec les yeux d'un mort. Comment M. Fauchelevent était-il là? Pourquoi y était-il? Qu'y venait-il faire? Marius ne s'adressa point toutes ces questions. D'ailleurs, notre désespoir ayant cela de particulier qu'il enveloppe autrui comme nous-mêmes, il lui semblait logique que tout le monde vînt mourir.

Seulement il songea à Cosette avec un serrement de cœur. Du reste M. Fauchelevent ne lui parla pas, ne le regarda pas, et n'eut pas même l'air d'entendre lorsque Marius éleva la voix pour dire: Je le connais. Quant à Marius, cette attitude de M. Fauchelevent le soulageait, et si l'on pouvait employer un tel mot pour de telles impressions, nous dirions, lui plaisait. Il s'était toujours senti une impossibilité absolue d'adresser la parole à cet homme énigmatique qui était à la fois pour lui équivoque et imposant. Il y avait en outre très longtemps qu'il ne l'avait vu; ce qui, pour la nature timide et réservée de Marius, augmentait encore l'impossibilité.

Les cinq hommes désignés sortirent de la barricade par la ruelle Mondétour; ils ressemblaient parfaitement à des gardes nationaux. Un d'eux s'en alla en pleurant. Avant de partir, ils embrassèrent ceux qui restaient. Quand les cinq hommes renvoyés à la vie furent partis, Enjolras pensa au condamné à mort. Il entra dans la salle basse. Javert, lié au pilier, songeait. —Te faut-il quelque chose? lui demanda Enjolras. Javert répondit:

—Quand me tuerez-vous?

—Attends. Nous avons besoin de toutes nos cartouches en ce moment.

—Alors, donnez-moi à boire, dit Javert.

Enjolras lui présenta lui-même un verre d'eau, et, comme Javert était garrotté, il l'aida à boire.

—Est-ce là tout? reprit Enjolras.

—Je suis mal à ce poteau, répondit Javert. Vous n'êtes pas tendres de m'avoir laissé passer la nuit là. Liez-moi comme il vous plaira, mais vous pouvez bien me coucher sur une table comme l'autre. Et d'un mouvement de tête il désignait le cadavre de M. Mabeuf. Il y avait, on s'en souvient, au fond de la salle une grande et longue table sur laquelle on avait fondu des balles et fait des cartouches. Toutes les cartouches étant faites et toute la poudre étant employée, cette table était libre.

Sur l'ordre d'Enjolras, quatre insurgés délièrent Javert du poteau. Tandis qu'on le déliait, un cinquième lui tenait une bayonnette appuyée sur la poitrine. On lui laissa les mains attachées derrière le dos, on lui mit aux pieds une corde à fouet mince et solide qui lui permettait de faire des pas de quinze pouces comme à ceux qui vont monter à l'échafaud, et on le fit marcher jusqu'à la table au fond de la salle où on l'étendit, étroitement lié par le milieu du corps. Pour plus de sûreté, au moyen d'une corde fixée au cou, on ajouta au système de ligatures qui lui rendaient toute évasion impossible cette espèce de lien, appelé dans les prisons martingale, qui part de la nuque, se bifurque sur l'estomac, et vient rejoindre les mains après avoir passé entre les jambes.

Pendant qu'on garrottait Javert, un homme, sur le seuil de la porte, le considérait avec une attention singulière. L'ombre que faisait cet homme fit tourner la tête à Javert. Il leva les yeux et reconnut Jean Valjean. Il ne tressaillit même pas, abaissa fièrement la paupière, et se borna à dire: C'est tout simple.

CHAPTER VI—MARIUS HAGGARD, JAVERT LACONIC

Let us narrate what was passing in Marius' thoughts.

Let the reader recall the state of his soul. We have just recalled it, everything was a vision to him now. His judgment was disturbed. Marius, let us insist on this point, was under the shadow of the great, dark wings which are spread over those in the death agony. He felt that he had entered the tomb, it seemed to him that he was already on the other side of the wall, and he no longer beheld the faces of the living except with the eyes of one dead. How did M. Fauchelevent come there? Why was he there? What had he come there to do? Marius did not address all these questions to himself. Besides, since our despair has this peculiarity, that it envelops others as well as ourselves, it seemed logical to him that all the world should come thither to die.

Only, he thought of Cosette with a pang at his heart. However, M. Fauchelevent did not speak to him, did not look at him, and had not even the air of hearing him, when Marius raised his voice to say: "I know him." As far as Marius was concerned, this attitude of M. Fauchelevent was comforting, and, if such a word can be used for such impressions, we should say that it

pleased him. He had always felt the absolute impossibility of addressing that enigmatical man, who was, in his eyes, both equivocal and imposing. Moreover, it had been a long time since he had seen him; and this still further augmented the impossibility for Marius' timid and reserved nature.

The five chosen men left the barricade by way of Mondetour lane; they bore a perfect resemblance to members of the National Guard. One of them wept as he took his leave. Before setting out, they embraced those who remained. When the five men sent back to life had taken their departure, Enjolras thought of the man who had been condemned to death. He entered the tap-room. Javert, still bound to the post, was engaged in meditation.

"Do you want anything?" Enjolras asked him.

Javert replied: "When are you going to kill me?"

"Wait. We need all our cartridges just at present."

"Then give me a drink," said Javert.

Enjolras himself offered him a glass of water, and, as Javert was pinioned, he helped him to drink.

"Is that all?" inquired Enjolras.

"I am uncomfortable against this post," replied Javert. "You are not tender to have left me to pass the night here. Bind me as you please, but you surely might lay me out on a table like that other man." And with a motion of the head, he indicated the body of M. Mabeuf.

There was, as the reader will remember, a long, broad table at the end of the room, on which they had been running bullets and making cartridges. All the cartridges having been made, and all the powder used, this table was free. At Enjolras' command, four insurgents unbound Javert from the post. While they were loosing him, a fifth held a bayonet against his breast. Leaving his arms tied behind his back, they placed about his feet a slender but stout whip-cord, as is done to men on the point of mounting the scaffold, which allowed him to take steps about fifteen inches in length, and made him walk to the table at the end of the room, where they laid him down, closely bound about the middle of the body. By way of further security, and by means of a rope fastened to his neck, they added to the system of ligatures which rendered every attempt at escape impossible, that sort of bond which is called in prisons a martingale, which, starting at the neck, forks on the stomach, and meets the hands, after passing between the legs.

While they were binding Javert, a man standing on the threshold was surveying him with singular attention. The shadow cast by this man made Javert turn his head. He raised his eyes, and recognized Jean Valjean. He did not even start, but dropped his lids proudly and confined himself to the remark: "It is perfectly simple."

[Alexandre Dumas](#) was one of the most loved authors, undoubtedly the author of my childhood. I read many of his books several times and above all I liked Les trois mousquetaires - [The Three Musketeers](#), followed by [Twenty Years After](#), and finally by [The Vicomte de Bragelonne](#) – ten volumes that I knew almost by heart. His novels have been

translated into nearly 100 languages. In addition, they have inspired more than 200 motion pictures. Dumas is therefore very cosmopolitan, one of the most cosmopolitan authors. Prolific in several genres, Dumas began his career by writing plays, which were successfully produced from the first. He also wrote numerous magazine [articles](#) and travel books; his published works totaled 100,000 pages. In the 1840s, Dumas founded the Théâtre Historique in Paris.

Dumas' father (general [Thomas-Alexandre Davy de la Pailleterie](#)) was born in [Saint-Domingue](#) (present-day [Haiti](#)) to a French nobleman and an enslaved African woman. At age 14, Thomas-Alexandre was taken by his father to France, where he was educated in a military academy and entered the military for what he made as an illustrious career. His father's aristocratic rank helped young Alexandre acquire work with [Louis-Philippe, Duke of Orléans](#). He later began working as a writer, finding early success. Decades later, in the election of [Louis-Napoléon Bonaparte](#) in 1851, Dumas fell from favor, and left France for Belgium, where he stayed for several years. Upon leaving Belgium, Dumas moved to Russia for a few years, before going to Italy. In 1861 he founded and published the newspaper, *L'Indépendante*, which supported the Italian unification effort. In 1864 he returned to Paris.

Though married, in the tradition of Frenchmen of higher social class, Dumas had numerous affairs (allegedly as many as forty). He was known to have at least four illegitimate or "natural" children, including a boy named [Alexandre Dumas](#) after him. This son became a successful novelist and playwright, and was known as Alexandre Dumas, *fils* (son), while the elder Dumas became conventionally known in French as Alexandre Dumas, *père* (father). Among his affairs, in 1866 Dumas had one with [Adah Isaacs Menken](#), an American actress then less than half his age and at the height of her career. Twentieth-century scholars have found that Dumas fathered another three "natural" children.

With all due respect to the Three Musketeers, the novel I like most is [The Count of Monte Cristo](#), as it [encompasses social, historical and moral issues that are relevant even today](#). *The Count of Monte Cristo* (French: *Le Comte de Monte-Cristo*) is an [adventure novel](#) by French author [Alexandre Dumas](#) (*père*) [completed in](#) 1844. [It is one of the author's most popular and translated works, along with The Three Musketeers](#). Like many of his novels, it is expanded from plot outlines suggested by his collaborating [ghostwriter](#) [Auguste Maquet](#). The story takes place in [France](#), [Italy](#), and islands in the [Mediterranean](#) during the historical events of 1815–1839: the era of the [Bourbon Restoration](#) through the reign of [Louis-Philippe of France](#). It begins just before the [Hundred Days](#) period (when [Napoleon](#) returned to power after his exile). The historical setting is a fundamental element of the book, an adventure story primarily concerned with themes of hope, justice, vengeance, mercy, and forgiveness. It centres around a man who is wrongfully imprisoned, escapes from jail, acquires a fortune, and sets about getting revenge on those responsible for his imprisonment. However, his plans have devastating consequences for the innocent as well as the guilty. It is also a story that involves romance, loyalty, betrayal, and selfishness, shown throughout the story as characters slowly reveal their true inner nature.

The book is considered a [literary classic](#) today. According to [Luc Sante](#), "*The Count of Monte Cristo* has become a fixture of Western civilization's literature, as inescapable and immediately identifiable as [Mickey Mouse](#), [Noah's flood](#), and the story of [Little Red Riding Hood](#)." [George Saintsbury](#) stated: "*Monte Cristo* is said to have been at its first appearance, and for some time subsequently, the most popular book in Europe. Perhaps no novel within a given number of years had so many readers and penetrated into so many different countries."

This popularity has extended into modern times as well. The book was "translated into virtually all modern languages and has never been out of print in most of them. There have been at least twenty-nine motion pictures based on it ... as well as several television series, and many movies [have] worked the name 'Monte Cristo' into their titles." The title *Monte Cristo* lives on in a "famous gold mine, a line of luxury Cuban cigars, a sandwich, and any number of bars and casinos—it even lurks in the name of the street-corner hustle three-card monte."

The issue that fascinates me most in this book is condensed in one sentence: « Et maintenant, dit l'homme inconnu, adieu bonté, humanité, reconnaissance... Adieu à tous les sentiments qui épanouissent le coeur !.. Je me suis substitué à la Providence pour récompenser les bons... que le Dieu vengeur me cède sa place pour punir les méchants ! » Monte Cristo sums up his motives by saying in the middle of this monumental book: "And now, said the unknown, farewell kindness, humanity, gratitude... Farewell to all the feelings that expand the heart!... I have been Heaven's substitute to recompense the good ... now the God of vengeance yields to me his power to punish the wicked!" I think that I have recompensed by far all the good people, all those who helped me, all those who deserved to be recompensed as they were rightly motivated, my friends, my family, acquaintances, my employees, financially, praising them, showing them my gratitude. However, I was not rewarded in most of the cases for my good deeds, neither I expected any rewards, as ingratitude rules the world. But, Providence or coincidence, worked on my behalf and I was rewarded by people to whom I have never done any good actions, as the Baron Edmond de Rothschild, Henri-Claude de Bettignies, Henk Van Luijk (true noble men).

I almost never punished the wicked, not by cowardice, sometimes because it was impossible, always never prayed for vengeance. I prayed for success, to overcome the wrongdoings done to me, but I've never prayed or acted in a vengeance mode. I tried my best to disclose the wrongdoings and point the finger to the wicked, more in order to avoid the perpetuation of wickedness to others than out of vengeance. Sometimes it cost my opponents a very high price of millions (don't worry, they gained much more from their schemes), or they lost a client or did not get a job, but in general all the crooks were compensated much more than what they lost, in jobs, goodwill or money. Often, awful things occurred to them or their relatives, death, diseases, but it was not a result of my prayers as I never prayed for their destruction and I don't believe in God anyhow, and awful things occurred also to friends who were kind hearted and never wronged anybody – so, one can attribute to coincidence what happened to some of my opponents, rather than Providence, and the most wicked were not even touched and they continue to prosper rich from their schemes, healthy as ever, with longevity.

Neither have I forgiven those who wronged me – I am not Jesus and don't have an obligation or an inclination for forgiveness. I can forgive the people that I love and have wronged me and I expect them to forgive me as well. A family is an institution based on love and forgiveness. But in business, academics, or politics it is a different story. To the best of my knowledge I've never wronged substantially or deliberately anybody, I have fired employees rarely and always because they deserved so (but maybe they think otherwise), in litigation I sued or was sued very few times and here again the issues could have been not so clearcut (except in one case when I defended the company's wrongdoing to a client although my responsibility was minimal, but as all the "rats" ran away from the sinking boat, I remained alone to defend my company and we lost rightly so the case). I cannot say that I never thought of vengeance, but I declined to consider it seriously for several reasons: first of all as I saw

what were the ramifications of the revenge of Monte Cristo on those responsible for his imprisonment, as his plans had devastating consequences for the innocent as well as the guilty. The intellectual man who reads a lot draws lessons for the future from all the classics that he reads or watches – novels, plays, films, philosophy, history – and he avoids making the same mistakes as Monte Cristo, Julius Caesar, King Lear, Jean de Florette or Dr. Stockmann. But also from a deliberate choice to act only ethically and it is very difficult to get revenge ethically from unethical people backed by the richest tycoons, the most powerful politicians, with the lenience of the judges towards the rich.

And if you resort to the same methods as the crooks, as Topaz did, it ruins your character and you become a wolf in a country of wolves. Furthermore, the wicked will always win in an unethical contest as they are much more fluent in all the unethical techniques, so it is a lose lose situation anyhow. It goes without saying that it cost a lot in money, attention, efforts (even heart attacks as in Wall Street), you don't think positive and you cannot get over it, you remain embittered, unsocial, revengeful, ostracized, you have to think positive and move to your next position in life rather than getting stuck with your thoughts of revenge, whether in business, in marriage, in friendship or politics. Finally, I made once a list how many people wronged me substantially. In one of the cases – when I lost because of a scheme most of my savings I started with two, but then I thought what about the lawyers who gave them bad counsels as it is always good to collaborate with the rich and wrong than with the poor and right, the employees who participated in the plunder as they were afraid to lose their jobs or just enjoyed wronging their best friend, the government officials who backed the crooks and got rewarded, the banks, the auditors, in short I arrived to a list of 20 and this was only on one of the cases – so is it feasible to get revenge from 20 instead of 2, are they truly wrong although they did not instigate the scheme, could they not cooperate in the scheme and retain their job or their client? So, instead of seeking revenge I decided to cleanse myself by studying business ethics, writing the first dissertation and academic books on ethics to minority shareholders, and warn the others not to make the same mistakes as I did and discern schemes from their earliest stages.

So, instead of seeking revenge and ask the God of vengeance to yield to me his power, I decided to adopt the last couple of words of the book – *Attendre et esperer* – wait and hope, wait and hope for social and economic justice, for business ethics prevailing in business, for the just being rewarded and the wicked being ostracized instead of the other way round as it is now. That is why, we bring here the final pages of the novel in English and the last page in French too.

Valentine seized the count's hand, and in her irresistible impulse of joy carried it to her lips.

"Oh, thank me again!" said the count; "tell me till you are weary, that I have restored you to happiness; you do not know how much I require this assurance."

"Oh, yes, yes, I thank you with all my heart," said Valentine; "and if you doubt the sincerity of my gratitude, oh, then, ask Haidee! ask my beloved sister Haidee, who ever since our departure from France, has caused me to wait patiently for this happy day, while talking to me of you."

"You then love Haidee?" asked Monte Cristo with an emotion he in vain endeavored to dissimulate.

"Oh, yes, with all my soul."

"Well, then, listen, Valentine," said the count; "I have a favor to ask of you."

"Of me? Oh, am I happy enough for that?"

"Yes; you have called Haidee your sister,—let her become so indeed, Valentine; render her all the gratitude you fancy that you owe to me; protect her, for" (the count's voice was thick with emotion) "henceforth she will be alone in the world."

"Alone in the world!" repeated a voice behind the count, "and why?"

Monte Cristo turned around; Haidee was standing pale, motionless, looking at the count with an expression of fearful amazement.

"Because to-morrow, Haidee, you will be free; you will then assume your proper position in society, for I will not allow my destiny to overshadow yours. Daughter of a prince, I restore to you the riches and name of your father."

Haidee became pale, and lifting her transparent hands to heaven, exclaimed in a voice stifled with tears, "Then you leave me, my lord?"

"Haidee, Haidee, you are young and beautiful; forget even my name, and be happy."

"It is well," said Haidee; "your order shall be executed, my lord; I will forget even your name, and be happy." And she stepped back to retire.

"Oh, heavens," exclaimed Valentine, who was supporting the head of Morrel on her shoulder, "do you not see how pale she is? Do you not see how she suffers?"

Haidee answered with a heartrending expression, "Why should he understand this, my sister? He is my master, and I am his slave; he has the right to notice nothing."

The count shuddered at the tones of a voice which penetrated the inmost recesses of his heart; his eyes met those of the young girl and he could not bear their brilliancy. "Oh, heavens," exclaimed Monte Cristo, "can my suspicions be correct? Haidee, would it please you not to leave me?"

"I am young," gently replied Haidee; "I love the life you have made so sweet to me, and I should be sorry to die."

"You mean, then, that if I leave you, Haidee"—

"I should die; yes, my lord."

"Do you then love me?"

"Oh, Valentine, he asks if I love him. Valentine, tell him if you love Maximilian." The count felt his heart dilate and throb; he opened his arms, and Haidee, uttering a cry, sprang into them. "Oh, yes," she cried, "I do love you! I love you as one loves a father, brother, husband! I love you as my life, for you are the best, the noblest of created beings!"

"Let it be, then, as you wish, sweet angel; God has sustained me in my struggle with my enemies, and has given me this reward; he will not let me end my triumph in suffering; I wished to punish myself, but he has pardoned me. Love me then, Haidee! Who knows? perhaps your love will make me forget all that I do not wish to remember."

"What do you mean, my lord?"

"I mean that one word from you has enlightened me more than twenty years of slow experience; I have but you in the world, Haidee; through you I again take hold on life, through you I shall suffer, through you rejoice."

"Do you hear him, Valentine?" exclaimed Haidee; "he says that through *me* he will suffer—through me, who would yield my life for his." The count withdrew for a moment. "Have I discovered the truth?" he said; "but whether it be for recompense or punishment, I accept my fate. Come, Haidee, come!" and throwing his arm around the young girl's waist, he pressed the hand of Valentine, and disappeared.

An hour had nearly passed, during which Valentine, breathless and motionless, watched steadfastly over Morrel. At length she felt his heart beat, a faint breath played upon his lips, a

slight shudder, announcing the return of life, passed through the young man's frame. At length his eyes opened, but they were at first fixed and expressionless; then sight returned, and with it feeling and grief. "Oh," he cried, in an accent of despair, "the count has deceived me; I am yet living;" and extending his hand towards the table, he seized a knife.

"Dearest," exclaimed Valentine, with her adorable smile, "awake, and look at me!" Morrel uttered a loud exclamation, and frantic, doubtful, dazzled, as though by a celestial vision, he fell upon his knees.

The next morning at daybreak, Valentine and Morrel were walking arm-in-arm on the sea-shore, Valentine relating how Monte Cristo had appeared in her room, explained everything, revealed the crime, and, finally, how he had saved her life by enabling her to simulate death. They had found the door of the grotto opened, and gone forth; on the azure dome of heaven still glittered a few remaining stars. Morrel soon perceived a man standing among the rocks, apparently awaiting a sign from them to advance, and pointed him out to Valentine. "Ah, it is Jacopo," she said, "the captain of the yacht;" and she beckoned him towards them.

"Do you wish to speak to us?" asked Morrel.

"I have a letter to give you from the count."

"From the count!" murmured the two young people.

"Yes; read it." Morrel opened the letter, and read:—

"My Dear Maximilian,—

"There is a felucca for you at anchor. Jacopo will carry you to Leghorn, where Monsieur Noirtier awaits his granddaughter, whom he wishes to bless before you lead her to the altar. All that is in this grotto, my friend, my house in the Champs Elysees, and my chateau at Treport, are the marriage gifts bestowed by Edmond Dantes upon the son of his old master, Morrel. Mademoiselle de Villefort will share them with you; for I entreat her to give to the poor the immense fortune reverting to her from her father, now a madman, and her brother who died last September with his mother. Tell the angel who will watch over your future destiny, Morrel, to pray sometimes for a man, who like Satan thought himself for an instant equal to God, but who now acknowledges with Christian humility that God alone possesses supreme power and infinite wisdom. Perhaps those prayers may soften the remorse he feels in his heart. As for you, Morrel, this is the secret of my conduct towards you. There is neither happiness nor misery in the world; there is only the comparison of one state with another, nothing more. He who has felt the deepest grief is best able to experience supreme happiness. We must have felt what it is to die, Morrel, that we may appreciate the enjoyments of living.

"Live, then, and be happy, beloved children of my heart, and never forget that until the day when God shall deign to reveal the future to man, all human wisdom is summed up in these two words,—*Wait and hope.*'—Your friend,

"Edmond Dantes, *Count of Monte Cristo.*"

During the perusal of this letter, which informed Valentine for the first time of the madness of her father and the death of her brother, she became pale, a heavy sigh escaped from her bosom, and tears, not the less painful because they were silent, ran down her cheeks; her happiness cost her very dear. Morrel looked around uneasily. "But," he said, "the count's generosity is too overwhelming; Valentine will be satisfied with my humble fortune. Where is the count, friend? Lead me to him." Jacopo pointed towards the horizon. "What do you mean?" asked Valentine. "Where is the count?—where is Haidee?"

"Look!" said Jacopo.

The eyes of both were fixed upon the spot indicated by the sailor, and on the blue line separating the sky from the Mediterranean Sea, they perceived a large white sail. "Gone," said Morrel; "gone!—adieu, my friend—adieu, my father!"

"Gone," murmured Valentine; "adieu, my sweet Haidee—adieu, my sister!"

"Who can say whether we shall ever see them again?" said Morrel with tearful eyes.

"Darling," replied Valentine, "has not the count just told us that all human wisdom is summed up in two words?—'*Wait and hope* (Fac et spera).'"

And in French, the last page of the novel:

Morrel ouvrit la lettre et lut :

« Mon cher Maximilien,

« Il y a une felouque pour vous à l'ancre. Jacopo vous conduira à Livourne, où monsieur Noirtier attend sa petite-fille, qu'il veut bénir avant qu'elle vous suive à l'autel. Tout ce qui est dans cette grotte, mon ami, ma maison des Champs-Élysées et mon petit château du Tréport sont le présent de nocces que fait Edmond Dantès au fils de son patron Morrel. Mademoiselle de Villefort voudra bien en prendre la moitié, car je la supplie de donner aux pauvres de Paris toute la fortune qui lui revient du côté de son père, devenu fou, et du côté de son frère, décédé en septembre dernier avec sa belle-mère.

« Dites à l'ange qui va veiller sur votre vie, Morrel, de prier quelquefois pour un homme qui, pareil à Satan, s'est cru un instant l'égal de Dieu, et qui a reconnu, avec toute l'humilité d'un chrétien, qu'aux mains de Dieu seul sont la suprême puissance et la sagesse infinie. Ces prières adouciront peut-être le remords qu'il emporte au fond de son cœur.

« Quant à vous, Morrel, voici tout le secret de ma conduite envers vous : il n'y a ni bonheur ni malheur en ce monde, il y a la comparaison d'un état à un autre, voilà tout. Celui-là seul qui a éprouvé l'extrême infortune est apte à ressentir l'extrême félicité. Il faut avoir voulu mourir, Maximilien, pour savoir combien il est bon de vivre.

« Vivez donc et soyez heureux, enfants chéris de mon cœur, et n'oubliez jamais que, jusqu'au jour où Dieu daignera dévoiler l'avenir à l'homme, toute la sagesse humaine sera dans ces deux mots :

« *Attendre et espérer !*

« Votre ami,

« EDMOND DANTES,

« *Comte de Monte-Cristo.* »

Pendant la lecture de cette lettre, qui lui apprenait la folie de son père et la mort de son frère, mort et folie qu'elle ignorait, Valentine pâlit, un douloureux soupir s'échappa de sa poitrine, et des larmes, qui n'en étaient pas moins poignantes pour être silencieuses, roulèrent sur ses joues ; son bonheur lui coûtait bien cher.

Morrel regarda autour de lui avec inquiétude.

— Mais, dit-il, en vérité le comte exagère sa générosité ; Valentine se contentera de ma modeste fortune. Où est le comte, mon ami ? conduisez-moi vers lui.

Jacopo étendit la main vers l'horizon.

— Quoi ! que voulez-vous dire ? demanda Valentine : Où est le comte ? où est Haydée ?

— Regardez, dit Jacopo.

Les yeux des deux jeunes gens se fixèrent sur la ligne indiquée par le marin, et, sur la ligne d'un bleu foncé qui séparait à l'horizon le ciel de la Méditerranée, ils aperçurent une voile blanche, grande comme l'aile d'un goéland.

— Parti ! s'écria Morrel ; parti ! Adieu, mon ami, mon père !

— Partie ! murmura Valentine. Adieu, mon amie ! adieu, ma sœur !

— Qui sait si nous les reverrons jamais ? fit Morrel en essuyant une larme.

— Mon ami, dit Valentine, le comte ne vient-il pas de nous dire que l'humaine sagesse était tout entière dans ces deux mots :

— *Attendre et espérer !*

We dealt at length of Zola's involvement in the Dreyfus affair and everybody knows of his contribution towards the elimination of anti-Semitism in France. What is less known is Alexandre Dumas' Jewish involvement. He had an affair with Adah Isaacs Menken considered somewhat scandalous as he was more than twice her age. **Adah Isaacs Menken** (June 15, 1835 – August 10, 1868), was an [American actress](#), [painter](#) and [poet](#), the highest earning actress of her time. She was best known for her performance in the melodrama [Mazeppa](#), with a climax that featured her apparently nude and riding a horse on stage. After great success for a few years with the play in New York and [San Francisco](#), she appeared in a production in [London](#) and [Paris](#), from 1864-66. In 1865 she wrote that her birth name was Dolores Adios Los Fierres, and that she was the daughter of a French woman from New Orleans and a Jewish man from Spain. She met and in 1856 married the man more generally considered her first husband, Alexander Isaac Menken, a musician who was from a prominent [Reform Jewish family](#) in [Cincinnati, Ohio](#). By most accounts, the actress converted to [Judaism](#) after marrying her first husband, Alexander Isaac Menken, in 1856 in [Livingston, Texas](#). He was a theatrical musician, whose father was a businessman in Cincinnati, Ohio. He managed her bookings as an actress for a few years. When they moved to Cincinnati and Ada met his family, she seriously studied and converted to Judaism. Alex Menken separated from and later [divorced](#) Adah; she remained committed to Judaism the rest of her life.

But, Dumas has also a Jewish great-grandson Alexandre Lippmann. **Alexandre Lippmann** (11 June 1881 – 23 February 1960) was a French [épée fencer](#). He won five medals, including two [gold medals](#), at three different Olympic Games: a team gold and an individual silver in 1908, a team bronze and individual silver in 1920, and a team gold in 1924. Lippmann was Jewish and was inducted into the [International Jewish Sports Hall of Fame](#) in 1984. Lippmann

was also a genre painter. Through his mother, Marie-Alexandrine-Henriette Dumas, he was the great-grandson of French writer [Alexandre Dumas](#). In Hebrew we write about the predilection of finding a Jewish connection to every event and celebrity. Thus, Christopher Columbus, Cervantes, and many others are of Jewish descent and if not - have a Jewish connection. My father even thought that Charlie Chaplin and Yves Montand were Jews, as well as dozens others. I didn't know about the Jewish connection of Alexandre Dumas and I was curious to learn about it, but I'll refer no more to such curiosities in this book, and try to maintain a universal approach.

Honore de Balzac is one of my favorite authors and I have read most of his novels. I have learned about life much more from Balzac's novels than from my own experience. If I am a good person and have a humane approach on society and economics, it is due primarily to the reading of Balzac, Hugo and Zola's novels. Balzac probably understood in the most perfect way human nature which has not changed since Homer. *Le pere Goriot* is one of the best novels that I have ever read, I have seen it on stage, in films... and in life with two many examples of parents who loved too much their children who became monsters of ingratitude and selfishness. Baba, Rosalia Cohen, my wife Ruthy's grandmother used to say in Yiddish that too much honey stinks, and Ruthy and me raised our children with love, care, but also discipline. We saw how friends belittled themselves with their relations to their husband, wife, children, bosses and employees. I learned from *Goriot* that you have to love your wife, children and grandchildren more than yourself, yet you must love yourself enough as not to belittle yourself. I feel that *Goriot*, *Jean Valjean*, *Monte Cristo*, *Aristide Saccard*, *Jean de Florette*, *Gervaise*, *Rastignac*, *Topaze*, *King Lear*, *Hamlet* are real persons, not less historic and alive than most of the hisotrical personalities. Furthermore, I feel that I experience the joy of creation of Balzac, Proust, Zola, D. H. Lawrence, Agnon, Moravia, Cervantes, Tolstoy, or Sinclair Lewis, as if it was me who wrote their masterpieces. Evenmore in plays, where we can see their protagonists coming alive on stage and films – Arthur Miller's *The Crucible*, *Death of a Salesman*, *All My Sons*, Ionesco's *Beranger* and Jean, Pagnol's *Marius*, *Cesar* and *Fanny*, his mother, his father, and *Le Papet*. I am a friend of Hugo, Dumas and Balzac, of *Goriot*, *d'Artagnan*, and *Esmeralda*. They are All My Sons/Fathers.

Honoré de Balzac: 20 May 1799 – 18 August 1850, who died at the age of 51, was a French novelist and playwright. His [magnum opus](#) was a [sequence](#) of short stories and novels collectively entitled [La Comédie Humaine](#), which presents a panorama of French life in the years after the 1815 Fall of [Napoleon Bonaparte](#). Owing to his keen observation of detail and unfiltered representation of society, Balzac is regarded as one of the founders of [realism](#) in [European literature](#). He is renowned for his multifaceted characters, who are morally ambiguous. His writing influenced many subsequent novelists such as [Marcel Proust](#), [Émile Zola](#), [Charles Dickens](#), [Anthony Trollope](#), [Edgar Allan Poe](#), [Eça de Queirós](#), [Fyodor Dostoyevsky](#), [Oscar Wilde](#), [Gustave Flaubert](#), [Benito Pérez Galdós](#), [Marie Corelli](#), [Henry James](#), [William Faulkner](#), [Jack Kerouac](#), and [Italo Calvino](#), most of the authors I read and liked very much, and [philosophers](#) such as [Karl Marx](#). Many of Balzac's works have been made into or have inspired films, and they are a continuing source of inspiration for writers, filmmakers and critics.

Before and during his career as a writer, Balzac attempted to be a publisher, printer, businessman, critic, and politician; he failed in all of these efforts. *La Comédie Humaine* reflects his real-life difficulties, and includes scenes from his own experience. Balzac had health problems throughout his life, possibly brought on by scant attention to proper nutrition,

strict nightly rest, or daily heart-healthy exercise. His relationship with his family was often strained by financial and personal difficulties, and he ended several friendships over critical reviews. In 1850 Balzac married [Ewelina Hańska](#), a Polish aristocrat and his longtime love; he died in Paris five months later. In 1833 Balzac released [Eugénie Grandet](#), his first best-seller. The tale of a young lady who inherits her father's miserliness, it also became the most critically acclaimed book of his career. The writing is simple, yet the individuals are dynamic and complex.

[Le Père Goriot](#) (*Old Father Goriot*, 1835) was his next success, in which Balzac transposes the story of [King Lear](#) to 1820s Paris in order to rage at a society bereft of all love save the love of money. The centrality of a father in this novel matches Balzac's own position—not only as mentor to his troubled young secretary, Jules Sandeau, but also the fact that he had fathered a child, [Marie-Caroline Du Fresnay](#), with his otherwise-married lover, [Maria Du Fresnay](#), who had been his source of inspiration for [Eugénie Grandet](#). In 1836 Balzac took the helm of the *Chronique de Paris*, a weekly magazine of society and politics. He tried to enforce strict impartiality in its pages and a reasoned assessment of various ideologies. As Rogers notes, "Balzac was interested in any social, political, or economic theory, whether from the right or the left." The magazine failed, but in 1840 he founded the *Revue Parisienne*. It produced 3 issues.

These dismal business efforts—and his misadventures in [Sardinia](#)—provided an appropriate milieu in which to set the two-volume [Illusions perdues](#) (*Lost Illusions*, 1843). The novel concerns Lucien de Rubempré, a young poet trying to make a name for himself, who becomes trapped in the morass of society's darkest contradictions. Lucien's journalistic work is informed by Balzac's own failed ventures in the field. [Splendeurs et misères des courtisanes](#) (*The Harlot High and Low*, 1847) continues Lucien's story. He is trapped by the Abbé Herrera ([Vautrin](#)) in a convoluted and disastrous plan to regain social status. The book undergoes a massive temporal rift; the first part (of four) covers a span of six years, while the final two sections focus on just three days. [Le Cousin Pons](#) (1847) and [La Cousine Bette](#) (1848) tell the story of *Les Parents Pauvres* (*The Poor Relations*). The conniving and wrangling over wills and inheritances reflect the expertise gained by the author as a young law clerk. Balzac's health was deteriorating by this point, making the completion of this pair of books a significant accomplishment.

Many of his novels were initially serialized, like those of [Dickens](#). Their length was not predetermined. *Illusions Perdues* extends to a thousand pages after starting inauspiciously in a small-town print shop, whereas [La Fille aux yeux d'or](#) (*The Girl with the Golden Eyes*, 1835) opens with a broad panorama of Paris but becomes a closely plotted novella of only fifty pages. Balzac's work habits are legendary—he did not work quickly, but toiled with an incredible focus and dedication. His preferred method was to eat a light meal at five or six in the afternoon, then sleep until midnight. He then rose and wrote for many hours, fueled by innumerable cups of black coffee. He would often work for fifteen hours or more at a stretch; he claimed to have once worked for 48 hours with only three hours of rest in the middle. When I see students who can focus only 8 minutes, I think – sic transit gloria mundi – where have vanished the working habits of Balzac and Zola who wrote dozens of masterpieces. I can say humbly that even I come to my desk at 8 in the morning and work consecutively until 8 in the evening and nothing can disturb me, least of all my cellular phone, unless of course my mother in law comes to read me the latest news in the Romanian newspaper, my wife misses me and comes to chat or just lie on the sofa looking at me working when I am very busy, and my son who is living in Palo Alto phones me in the afternoon almost every day for half an

hour on his way to work. Now, that I have retired, I have relaxed my discipline and find time to play with my grandchildren, but yet I can achieve much more than most of my friends who have a divided attention, while I can focus at best.

Le Père Goriot, *Old Goriot* or *Father Goriot*, is an 1835 novel by French novelist and playwright [Honoré de Balzac](#), included in the *Scènes de la vie privée* section of his [novel sequence](#) *La Comédie humaine*. Set in Paris in 1819, it follows the intertwined lives of three characters: the elderly doting Goriot; a mysterious criminal-in-hiding named [Vautrin](#); and a naive law student named [Eugène de Rastignac](#). Originally published in [serial](#) form during the winter of 1834/35, *Le Père Goriot* is widely considered Balzac's most important novel. It marks the first serious use by the author of characters who had appeared in other books, a technique that distinguishes Balzac's fiction. The novel is also noted as an example of his [realist](#) style, using minute details to create character and [subtext](#). The novel takes place during the [Bourbon Restoration](#), which brought profound changes to French society; the struggle by individuals to secure a higher social status is a major theme in the book. The city of Paris also impresses itself on the characters – especially young Rastignac, who grew up in the provinces of southern France. Balzac analyzes, through Goriot and others, the nature of family and marriage, providing a pessimistic view of these institutions. The novel was released to mixed reviews. Some critics praised the author for his complex characters and attention to detail; others condemned him for his many depictions of corruption and greed. A favorite of Balzac's, the book quickly won widespread popularity and has often been adapted for film and the stage. It gave rise to the French expression "[Rastignac](#)", a social climber willing to use any means to better his situation.

French society two hundred years ago is almost identical to Israel society of today, to the European and American society in the second half of the 20th century, as we say in Aramic – סדנא דארעא חד הוא – it is the same everywhere. I know too many people who are are social climbers, wanting to achieve a higher social status, without any scruples, too many Rastignacs, Goriot's and Vautrins, and of course too many women who behave as the daughters of Goriot. From the masterpiece of Le Pere Goriot, we bring here the last pages in English and French.

Bianchon made a sign to his friend to follow his example, knelt down and pressed his arms under the sick man, and Rastignac on the other side did the same, so that Sylvie, standing in readiness, might draw the sheet from beneath and replace it with the one that she had brought. Those tears, no doubt, had misled Goriot; for he gathered up all his remaining strength in a last effort, stretched out his hands, groped for the students' heads, and as his fingers caught convulsively at their hair, they heard a faint whisper:

"Ah! my angels!"

Two words, two inarticulate murmurs, shaped into words by the soul which fled forth with them as they left his lips.

"Poor dear!" cried Sylvie, melted by that exclamation; the expression of the great love raised for the last time to a sublime height by that most ghastly and involuntary of lies.

The father's last breath must have been a sigh of joy, and in that sigh his whole life was summed up; he was cheated even at the last. They laid Father Goriot upon his wretched bed with reverent hands. Thenceforward there was no expression on his face, only the painful traces of the struggle between life and death that was going on in the machine; for that kind of cerebral consciousness that distinguishes between pleasure and pain in a human being was extinguished; it was only a question of time—and the mechanism itself would be destroyed.

"He will lie like this for several hours, and die so quietly at last, that we shall not know when he goes; there will be no rattle in the throat. The brain must be completely suffused."

As he spoke there was a footstep on the staircase, and a young woman hastened up, panting for breath.

"She has come too late," said Rastignac.

But it was not Delphine; it was Therese, her waiting-woman, who stood in the doorway.

"Monsieur Eugene," she said, "monsieur and madame have had a terrible scene about some money that Madame (poor thing!) wanted for her father. She fainted, and the doctor came, and she had to be bled, calling out all the while, 'My father is dying; I want to see papa!' It was heartbreaking to hear her——"

"That will do, Therese. If she came now, it would be trouble thrown away. M. Goriot cannot recognize any one now."

"Poor, dear gentleman, is he as bad at that?" said Therese.

"You don't want me now, I must go and look after my dinner; it is half-past four," remarked Sylvie. The next instant she all but collided with Mme. de Restaud on the landing outside.

There was something awful and appalling in the sudden apparition of the Countess. She saw the bed of death by the dim light of the single candle, and her tears flowed at the sight of her father's passive features, from which the life had almost ebbed. Bianchon with thoughtful tact left the room.

"I could not escape soon enough," she said to Rastignac.

The student bowed sadly in reply. Mme. de Restaud took her father's hand and kissed it.

"Forgive me, father! You used to say that my voice would call you back from the grave; ah! come back for one moment to bless your penitent daughter. Do you hear me? Oh! this is fearful! No one on earth will ever bless me henceforth; every one hates me; no one loves me but you in all the world. My own children will hate me. Take me with you, father; I will love you, I will take care of you. He does not hear me ... I am mad..."

She fell on her knees, and gazed wildly at the human wreck before her.

"My cup of misery is full," she said, turning her eyes upon Eugene. "M. de Trailles has fled, leaving enormous debts behind him, and I have found out that he was deceiving me. My husband will never forgive me, and I have left my fortune in his hands. I have lost all my illusions. Alas! I have forsaken the one heart that loved me (she pointed to her father as she spoke), and for whom? I have held his kindness cheap, and slighted his affection; many and many a time I have given him pain, ungrateful wretch that I am!"

"He knew it," said Rastignac.

Just then Goriot's eyelids unclosed; it was only a muscular contraction, but the Countess' sudden start of reviving hope was no less dreadful than the dying eyes.

"Is it possible that he can hear me?" cried the Countess. "No," she answered herself, and sat down beside the bed. As Mme. de Restaud seemed to wish to sit by her father, Eugene went down to take a little food. The boarders were already assembled.

"Well," remarked the painter, as he joined them, "it seems that there is to be a death-orama upstairs."

"Charles, I think you might find something less painful to joke about," said Eugene.

"So we may not laugh here?" returned the painter. "What harm does it do? Bianchon said that the old man was quite insensible."

"Well, then," said the *employe* from the Museum, "he will die as he has lived."

"My father is dead!" shrieked the Countess.

The terrible cry brought Sylvie, Rastignac, and Bianchon; Mme. de Restaud had fainted away. When she recovered they carried her downstairs, and put her into the cab that stood waiting at the door. Eugene sent Therese with her, and bade the maid take the Countess to Mme. de Nucingen.

Bianchon came down to them.

"Yes, he is dead," he said.

"Come, sit down to dinner, gentlemen," said Mme. Vauquer, "or the soup will be cold."

The two students sat down together.

"What is the next thing to be done?" Eugene asked of Bianchon.

"I have closed his eyes and composed his limbs," said Bianchon. "When the certificate has been officially registered at the Mayor's office, we will sew him in his winding sheet and bury him somewhere. What do you think we ought to do?"

"He will not smell at his bread like this any more," said the painter, mimicking the old man's little trick.

"Oh, hang it all!" cried the tutor, "let Father Goriot drop, and let us have something else for a change. He is a standing dish, and we have had him with every sauce this hour or more. It is one of the privileges of the good city of Paris that anybody may be born, or live, or die there without attracting any attention whatsoever. Let us profit by the advantages of civilization. There are fifty or sixty deaths every day; if you have a mind to do it, you can sit down at any time and wail over whole hecatombs of dead in Paris. Father Goriot has gone off the hooks, has he? So much the better for him. If you venerate his memory, keep it to yourselves, and let the rest of us feed in peace."

"Oh, to be sure," said the widow, "it is all the better for him that he is dead. It looks as though he had had trouble enough, poor soul, while he was alive."

And this was all the funeral oration delivered over him who had been for Eugene the type and embodiment of Fatherhood.

The fifteen lodgers began to talk as usual. When Bianchon and Eugene had satisfied their hunger, the rattle of spoons and forks, the boisterous conversation, the expressions on the faces that bespoke various degrees of want of feeling, gluttony, or indifference, everything about them made them shiver with loathing. They went out to find a priest to watch that night with the dead. It was necessary to measure their last pious cares by the scanty sum of money that remained. Before nine o'clock that evening the body was laid out on the bare sacking of the bedstead in the desolate room; a lighted candle stood on either side, and the priest watched at the foot. Rastignac made inquiries of this latter as to the expenses of the funeral, and wrote to the Baron de Nucingen and the Comte de Restaud, entreating both gentlemen to authorize their man of business to defray the charges of laying their father-in-law in the grave. He sent Christophe with the letters; then he went to bed, tired out, and slept.

Next day Bianchon and Rastignac were obliged to take the certificate to the registrar themselves, and by twelve o'clock the formalities were completed. Two hours went by, no word came from the Count nor from the Baron; nobody appeared to act for them, and Rastignac had already been obliged to pay the priest. Sylvie asked ten francs for sewing the old man in his winding-sheet and making him ready for the grave, and Eugene and Bianchon calculated that they had scarcely sufficient to pay for the funeral, if nothing was forthcoming from the dead man's family. So it was the medical student who laid him in a pauper's coffin, despatched from Bianchon's hospital, whence he obtained it at a cheaper rate.

"Let us play those wretches a trick," said he. "Go to the cemetery, buy a grave for five years at Pere-Lachaise, and arrange with the Church and the undertaker to have a third-class

funeral. If the daughters and their husbands decline to repay you, you can carve this on the headstone—'*Here lies M. Goriot, father of the Comtesse de Restaud and the Baronne de Nucingen, interred at the expense of two students.*'"

Eugene took part of his friend's advice, but only after he had gone in person first to M. and Mme. de Nucingen, and then to M. and Mme. de Restaud—a fruitless errand. He went no further than the doorstep in either house. The servants had received strict orders to admit no one.

"Monsieur and Madame can see no visitors. They have just lost their father, and are in deep grief over their loss."

Eugene's Parisian experience told him that it was idle to press the point. Something clutched strangely at his heart when he saw that it was impossible to reach Delphine.

"Sell some of your ornaments," he wrote hastily in the porter's room, "so that your father may be decently laid in his last resting-place."

He sealed the note, and begged the porter to give it to Therese for her mistress; but the man took it to the Baron de Nucingen, who flung the note into the fire. Eugene, having finished his errands, returned to the lodging-house about three o'clock. In spite of himself, the tears came into his eyes. The coffin, in its scanty covering of black cloth, was standing there on the pavement before the gate, on two chairs. A withered sprig of hyssop was soaking in the holy water bowl of silver-plated copper; there was not a soul in the street, not a passer-by had stopped to sprinkle the coffin; there was not even an attempt at a black drapery over the wicket. It was a pauper who lay there; no one made a pretence of mourning for him; he had neither friends nor kindred—there was no one to follow him to the grave.

Bianchon's duties compelled him to be at the hospital, but he had left a few lines for Eugene, telling his friend about the arrangements he had made for the burial service. The house student's note told Rastignac that a mass was beyond their means, that the ordinary office for the dead was cheaper, and must suffice, and that he had sent word to the undertaker by Christophe. Eugene had scarcely finished reading Bianchon's scrawl, when he looked up and saw the little circular gold locket that contained the hair of Goriot's two daughters in Mme. Vauquer's hands.

"How dared you take it?" he asked.

"Good Lord! is that to be buried along with him?" retorted Sylvie. "It is gold."

"Of course it shall!" Eugene answered indignantly; "he shall at any rate take one thing that may represent his daughters into the grave with him."

When the hearse came, Eugene had the coffin carried into the house again, unscrewed the lid, and reverently laid on the old man's breast the token that recalled the days when Delphine and Anastasie were innocent little maidens, before they began "to think for themselves," as he had moaned out in his agony.

Rastignac and Christophe and the two undertaker's men were the only followers of the funeral. The Church of Saint-Etienne du Mont was only a little distance from the Rue Nueve-Sainte-Genevieve. When the coffin had been deposited in a low, dark, little chapel, the law student looked round in vain for Goriot's two daughters or their husbands. Christophe was his only fellow-mourner; Christophe, who appeared to think it was his duty to attend the funeral of the man who had put him in the way of such handsome tips. As they waited there in the chapel for the two priests, the chorister, and the beadle, Rastignac grasped Christophe's hand. He could not utter a word just then.

"Yes, Monsieur Eugene," said Christophe, "he was a good and worthy man, who never said one word louder than another; he never did any one any harm, and gave nobody any trouble."

The two priests, the chorister, and the beadle came, and said and did as much as could be expected for seventy francs in an age when religion cannot afford to say prayers for nothing.

The ecclesiastics chanted a psalm, the *Libera nos* and the *De profundis*. The whole service lasted about twenty minutes. There was but one mourning coach, which the priest and chorister agreed to share with Eugene and Christophe.

"There is no one else to follow us," remarked the priest, "so we may as well go quickly, and so save time; it is half-past five."

But just as the coffin was put in the hearse, two empty carriages, with the armorial bearings of the Comte de Restaud and the Baron de Nucingen, arrived and followed in the procession to Pere-Lachaise. At six o'clock Goriot's coffin was lowered into the grave, his daughters' servants standing round the while. The ecclesiastic recited the short prayer that the students could afford to pay for, and then both priest and lackeys disappeared at once. The two grave diggers flung in several spadefuls of earth, and then stopped and asked Rastignac for their fee. Eugene felt in vain in his pocket, and was obliged to borrow five francs of Christophe. This thing, so trifling in itself, gave Rastignac a terrible pang of distress. It was growing dusk, the damp twilight fretted his nerves; he gazed down into the grave and the tears he shed were drawn from him by the sacred emotion, a single-hearted sorrow. When such tears fall on earth, their radiance reaches heaven. And with that tear that fell on Father Goriot's grave, Eugene Rastignac's youth ended. He folded his arms and gazed at the clouded sky; and Christophe, after a glance at him, turned and went—Rastignac was left alone.

He went a few paces further, to the highest point of the cemetery, and looked out over Paris and the windings of the Seine; the lamps were beginning to shine on either side of the river. His eyes turned almost eagerly to the space between the column of the Place Vendome and the cupola of the Invalides; there lay the shining world that he had wished to reach. He glanced over that humming hive, seeming to draw a foretaste of its honey, and said magniloquently:

"Henceforth there is war between us."

And by way of throwing down the glove to Society, Rastignac went to dine with Mme. de Nucingen.

Les deux prêtres, l'enfant de chœur et le bedeau vinrent et donnèrent tout ce qu'on peut avoir pour soixante-dix francs dans une époque où la religion n'est pas assez riche pour prier gratis. Les gens du clergé chantèrent un psaume, le *Libera*, le *De profundis*. Le service dura vingt minutes. Il n'y avait qu'une seule voiture de deuil pour un prêtre et un enfant de chœur, qui consentirent à recevoir avec eux Eugène et Christophe.

- Il n'y a point de suite, dit le prêtre, nous pourrions aller vite, afin de ne pas nous attarder, il est cinq heures et demie.

Cependant, au moment où le corps fut placé dans le corbillard, deux voitures armoriées, mais vides, celle du comte de Restaud et celle du baron de Nucingen, se présentèrent et suivirent le convoi jusqu'au Père-Lachaise. A six heures, le corps du père Goriot fut descendu dans sa fosse, autour de laquelle étaient les gens de ses filles, qui disparurent avec le clergé aussitôt que fut dite la courte prière due au bonhomme pour l'argent de l'étudiant. Quand les deux fossoyeurs eurent jeté quelques pelletées de terre sur la bière pour la cacher, ils se relevèrent, et l'un d'eux, s'adressant à Rastignac, lui demanda leur pourboire. Eugène fouilla dans sa poche et n'y trouva rien, il fut forcé d'emprunter vingt sous à Christophe. Ce fait, si

léger en lui-même, détermina chez Rastignac un accès d'horrible tristesse. Le jour tombait, un humide crépuscule agaçait les nerfs, il regarda la tombe et y ensevelit sa dernière larme de jeune homme, cette larme arrachée par les saintes émotions d'un coeur pur, une de ces larmes qui, de la terre où elles tombent, rejaillissent jusque dans les cieux. Il se croisa les bras, contempla les nuages, et, le voyant ainsi, Christophe le quitta.

Rastignac, resté seul, fit quelques pas vers le haut du cimetière et vit Paris tortueusement couché le long des deux rives de la Seine où commençaient à briller les lumières. Ses yeux s'attachèrent presque avidement entre la colonne de la place Vendôme et le dôme des Invalides, là où vivait ce beau monde dans lequel il avait voulu pénétrer. Il lança sur cette ruche bourdonnante un regard qui semblait par avance en pomper le miel, et dit ces mots grandioses: "A nous deux maintenant!"

Et pour premier acte du défi qu'il portait à la Société, Rastignac alla dîner chez madame de Nucingen.

Jean-Paul Sartre: 21 June 1905 – 15 April 1980) was a French philosopher, playwright, novelist, political activist, biographer, and [literary critic](#). He was one of the key figures in the philosophy of [existentialism](#) and [phenomenology](#), and one of the leading figures in [20th-century French philosophy](#) and [Marxism](#). His work has also influenced [sociology](#), [critical theory](#), [post-colonial theory](#), and [literary studies](#), and continues to influence these disciplines. Sartre has also been noted for his open relationship with the prominent feminist theorist [Simone de Beauvoir](#). He was awarded the 1964 [Nobel Prize in Literature](#) but refused it, saying that he always declined official honours and that "a writer should not allow himself to be turned into an institution". Sartre wrote successfully in a number of literary modes and made major contributions to literary criticism and literary biography. His plays are richly symbolic and serve as a means of conveying his philosophy. The best-known, *Huis-clos* ([No Exit](#)), contains the famous line "L'enfer, c'est les autres", usually translated as "Hell is other people." Aside from the impact of *Nausea*, Sartre's major work of fiction was [The Roads to Freedom](#) trilogy which charts the progression of how World War II affected Sartre's ideas. In this way, *Roads to Freedom* presents a less theoretical and more practical approach to [existentialism](#). Despite their similarities as polemicists, novelists, adapters, and playwrights, Sartre's literary work has been counterposed, often pejoratively, to that of Camus in the popular imagination. In 1948 the [Roman Catholic Church](#) placed Sartre's oeuvre on the [Index Librorum Prohibitorum \(List of Prohibited Books\)](#).

The Age of Reason ([French](#): *L'âge de raison*) is a 1945 novel by [Jean-Paul Sartre](#). It is the first part of the trilogy [The Roads to Freedom](#). The novel, set in the bohemian [Paris](#) of the late 1930s, focuses on three days in the life of a philosophy teacher named Mathieu who is seeking money to pay for an [abortion](#) for his mistress, Marcelle. Sartre analyses the motives of various characters and their actions and takes into account the perceptions of others to give the reader a comprehensive picture of the main character. *The Age of Reason* is concerned with Sartre's conception of [freedom](#) as the ultimate aim of human existence. This work seeks to illustrate the [existentialist](#) notion of ultimate freedom through presenting a detailed account of the characters' psychologies as they are forced to make significant decisions in their lives. As the novel progresses, character narratives espouse Sartre's view of what it means to be free and how one operates within the framework of society with this philosophy. This novel is a fictional reprise of some of the main themes in his major philosophical study [Being and Nothingness](#). One of the notions is that ultimately a person's freedom is unassailable as it is

fundamentally part of the nothingness that is the imagination and so cannot be taken away or destroyed.

The Reprieve ([French](#): *Le sursis*) is a 1945 novel by [Jean-Paul Sartre](#). It is the second part in the trilogy [The Roads to Freedom](#). It concerns life in [France](#) during the eight days before the signing of the [Munich Agreement](#) and the subsequent takeover of [Czechoslovakia](#) in September 1938. Written in a stream of consciousness style it is probably one of the best books that I have ever read, the most modern undoubtedly, which captivates you and leaves you *A bout de souffle/Breathless*. If I would have to choose what were the defining moments that fashioned my hawkish attitude to life it would be probably three moments: 1. January 1952 when at the age of 7 the Egyptian shabab/so called nationalists almost burned us alive in Cairo, 2. June 1967 when the Arab nations declared an extermination war against Israel after Israel withdrew from Sinai ten years before and without having any so-called occupied territories, 3. Reading *Le sursis/The reprieve* by Sartre depicting in the most vivid way what is the result of the defeatist policy of Chamberlain and Daladier. But they had the opposite effect on others who became pacifists.

Troubled Sleep ([French](#): *La mort dans l'âme*) is a 1949 novel by [Jean-Paul Sartre](#). The book was originally translated as *Iron in the Soul*. It is the third part in the trilogy [Les chemins de la liberté](#) (*The Roads to Freedom*). "The third novel in Sartre's monumental Roads to Freedom series, *Troubled Sleep* powerfully depicts the fall of France in 1940, and the anguished feelings of a group of Frenchmen whose pre-war apathy gives way to a consciousness of the dignity of individual resistance - to the German occupation and to fate in general - and solidarity with people similarly oppressed." The trilogy is one of the best books that I have ever read, but you need to be in an excellent mood to read it, as otherwise you might get a *Nausea*, feel that there is *No Exit* in your depression, and think that your life is more *Nothingness* than *Being*. However, it transposes you to France of the late thirties, and you feel the despair not in your brain but in your guts. Unlike Balzac & Zola who appeal to your brains, Sartre & Camus appeal to your entrails.

I have translated this extract as I couldn't find on Internet an extract of the English translation of *Le Sursis*, and it summarizes my attitude towards liberty which is the value I need most, maybe because in my early childhood I was a [Dhimmi](#) – a second rate citizen in a Muslim state subject to humiliation, persecution, and fear. "At the middle of Pont-Neuf, he stopped, and started laughing: this freedom, I have searched it very far; but it was so near that I could not see it, that I cannot touch it, this was only me. I am my freedom. He had hoped that one day he would be overcome by joy, pierced all the way by the lightning. But there was no lightning nor joy: only this destitution, this emptiness full of vertigo in front of him, this agony that his own transparency unabled him forever to see himself... I am nothing, I have nothing. As inseparable from the world as light and yet exiled, as light, surfing on the surface of the stones and the water, when nothing ever would catch me or burry me. Outside. Outside. Outside the world, outside the past, outside myself: freedom is exile and I am condemned to be free."

Au milieu du Pont-Neuf, il s'arrêta, il se mit à rire : cette liberté, je l'ai cherché bien loin ; elle était si proche que je ne pouvais la voir, que je ne peux pas la toucher, elle n'était que moi. Je suis ma liberté. Il avait espéré qu'un jour il serait comblé de joie, percé de part en part par la foudre. Mais il n'y avait ni foudre ni joie : seulement ce dénuement, ce vide saisi de vertige devant lui-même, cette angoisse que sa propre transparence empêchait à tout jamais de se voir. (...) Je ne suis rien, je n'ai rien. Aussi inséparable du monde que la lumière et pourtant

exilé, comme la lumière, glissant à la surface des pierres et de l'eau, sans que rien, jamais ne m'accroche ou ne m'ensable. Dehors. Dehors. Hors du monde, hors du passé, hors de moi-même : la liberté c'est l'exil et je suis condamné à être libre.

This is what I answer to my European friends who are astonished how can I live with my family in a war and terror stricken country and offer me to live as a free man in Europe (well, I don't envy my Jewish friends in France or England today, and who is more afraid the Christians or the Muslims of France is another story). This is why I have chosen my Ethical mission and before that my free-lancer career, being free from the tycoons in comparison to most of my friends who are "slave" to their organizations. I feel sometimes as an exile in my own country, living out of the world, out of the past and the present, out of myself even, as I am condemned to be free and I cannot behave differently. This is also what I teach to my students from the final lines of Ionesco's *Rhinoceros*, the unforgettable monologue, when Berenger declares that he will "put up a fight against the lot of them. I'm the last man left, and I'm staying that way until the end. I'm not capitulating!" Beranger decides to abide only to humanism and not becoming a rhinoceros.

This is what I recommend to all the politically-correct Europeans who find justifications to terrorism and condemn Israel, while receiving millions of refugees from countries where there was never freedom, refusing to assimilate into the European way of life, giving equal rights to women, letting them dress however they want, being totally loyal to their new country, and whenever there is a contradiction between the country's law and their religion they should obey the law of the country that was generous enough to receive them. As Jesus said (Matthew 22:20-21): " ²⁰ And he saith unto them, Whose is this image and superscription? ²¹ They say unto him, Caesar's. Then saith he unto them, Render therefore unto Caesar the things which are Caesar's; and unto God the things that are God's." And the Jewish faith says: דינא דמלכותא דינא – the law of the land is the binding law. **Dina d'malkhuta dina** (alternative spelling: **Dina de-malkhuta dina**) (**Aramaic**: דִּינָא דְּמַלְכוּתָא דִּינָא, "the law of the land is the law"), is the [halakhic rule](#) that the law of the country is binding, and, in certain cases, is to be preferred to Jewish law. The concept of dina de-malkhuta dina is similar to the concept of [conflict of laws](#) in other legal systems. It appears in at least twenty-five places in the [Shulkhan Arukh](#). This is what the Jews did, what the Polish, Spanish, Portuguese, and most of the African and Arab refugees did, and none of those peace-loving refugees has ever become a terrorist. And whoever disagrees may return to his homeland where he can practice his religion freely, but also being murdered as hundreds of thousands in Syria, Algeria, Yemen, Lebanon, Iraq and Afghanistan, or living in extreme poverty without work, or living in an Islamic state as in Iran, fearing for their lives and welfare.

Marcel Proust is also a completely different story and author. In this short survey of the most loved French authors, we can see how every one is completely different from the others, yet I love them all, as they are All My Friends – Hugo, Zola, Dumas, Balzac, Sartre, Proust. Proust brings us to a new reality or dream – to our subconscious, to times past, which are similar to times present. While Hugo, Zola and Balzac painted huge frescoes like Michelangelo, Proust is like Vermeer the painter of miniatures, of feelings, of sotto voce, soft tones. In this style, he was quite unique. I enjoy most the last book of *A la recherche du temps perdu* – *Le temps retrouve*.

Marcel Proust; 10 July 1871 – 18 November 1922) was a French novelist, critic, and essayist best known for his monumental novel *À la recherche du temps perdu* ([In Search of Lost Time](#); earlier translated as *Remembrance of Things Past*), published in seven parts between 1913 and

1927. He is considered by many to be one of the greatest authors of all time. Begun in 1909, *À la recherche du temps perdu* consists of seven volumes totaling around 3,200 pages (about 4,300 in The Modern Library's translation) and featuring more than 2,000 characters. [Graham Greene](#) called Proust the "greatest novelist of the 20th century", and [W. Somerset Maugham](#) called the novel the "greatest fiction to date". Proust died before he was able to complete his revision of the drafts and proofs of the final volumes, the last three of which were published posthumously and edited by his brother, Robert. Proust died at the age of 51, exactly like Balzac, another giant.

The novel began to take shape in 1909. Proust continued to work on it until his final illness in the autumn of 1922 forced him to break off. Proust established the structure early on, but even after volumes were initially finished he kept adding new material and edited one volume after another for publication. The last three of the seven volumes contain oversights and fragmentary or unpolished passages, as they existed only in draft form at the death of the author; the publication of these parts was overseen by his brother Robert. The work was published in France between 1913 and 1927. Proust paid for the publication of the first volume (by the Grasset publishing house) after it had been turned down by leading editors who had been offered the manuscript in longhand. Many of its ideas, [motifs](#) and scenes are foreshadowed in Proust's [unfinished](#) novel, *Jean Santeuil* (1896–99), though the perspective and treatment there are different, and in his unfinished hybrid of philosophical essay and story, *Contre Sainte-Beuve* (1908–09). The novel had great influence on twentieth-century literature; some writers have sought to emulate it, others to parody it. In the centenary year of *Du côté de chez Swann*, [Edmund White](#) pronounced *À la recherche du temps perdu* "the most respected novel of the twentieth century."

Volume 7 – Time Regained

The Narrator is staying with Gilberte at her home near Combray. They go for walks, on one of which he is stunned to learn the Méséglise way and the Guermantes way are actually linked. Gilberte also tells him she was attracted to him when young, and had made a suggestive gesture to him as he watched her. Also, it was Lea she was walking with the evening he had planned to reconcile with her. He considers Saint-Loup's nature and reads an account of the Verdurins' salon, deciding he has no talent for writing. The scene shifts to a night in 1916, during [World War I](#), when the Narrator has returned to Paris from a stay in a [sanatorium](#) and is walking the streets during a blackout. He reflects on the changed norms of art and society, with the Verdurins now highly esteemed. He recounts a 1914 visit from Saint-Loup, who was trying to enlist secretly. He recalls descriptions of the fighting he subsequently received from Saint-Loup and Gilberte, whose home was threatened. He describes a call paid on him a few days previously by Saint-Loup; they discussed military strategy. Now on the dark street, the Narrator encounters Charlus, who has completely surrendered to his impulses. Charlus reviews Morel's betrayals and his own temptation to seek vengeance; critiques Brichot's new fame as a writer, which has ostracized him from the Verdurins; and admits his general sympathy with Germany. The last part of the conversation draws a crowd of suspicious onlookers. After parting the Narrator seeks refuge in what appears to be hotel, where he sees someone who looks familiar leaving. Inside, he discovers it to be a male brothel, and spies Charlus using the services. The proprietor turns out to be Jupien, who expresses a perverse pride in his business. A few days later, news comes that Saint-Loup has been killed in combat. The Narrator pieces together that Saint-Loup had visited Jupien's brothel, and ponders what might have been had he lived.

Years later, again in Paris, the Narrator goes to a party at the house of the Prince de Guermantes. On the way he sees Charlus, now a mere shell of his former self, being helped by Jupien. The paving stones at the Guermantes house inspire another incident of involuntary memory for the Narrator, quickly followed by two more. Inside, while waiting in the library, he discerns their meaning: by putting him in contact with both the past and present, the impressions allow him to gain a vantage point outside time, affording a glimpse of the true nature of things. He realizes his whole life has prepared him for the mission of describing events as fully revealed, and (finally) resolves to begin writing. Entering the party, he is shocked at the disguises old age has given to the people he knew, and at the changes in society. Legrandin is now an invert, but is no longer a snob. Bloch is a respected writer and vital figure in society. Morel has reformed and become a respected citizen. Mme de Forcheville is the mistress of M. de Guermantes. Mme Verdurin has married the Prince de Guermantes after both their spouses died. Rachel is the star of the party, abetted by Mme de Guermantes, whose social position has been eroded by her affinity for theater. Gilberte introduces her daughter to the Narrator; he is struck by the way the daughter encapsulates both the Méséglise and Guermantes ways within herself. He is spurred to writing, with help from Françoise and despite signs of approaching death. He realizes that every person carries within them the accumulated baggage of their past, and concludes that to be accurate he must describe how everyone occupies an immense range "in Time". At my advanced age, I often feel as the narrator going to a party at the house of the Prince de Guermantes, shocked at the disguises old age has given to the people I knew, and at the changes in society. I no longer recognize my friends who have become so old, while I remained so young, but when I look at myself in the mirror I notice that I am as old as my friends, but I refuse to admit it, as I still feel young and what counts after all is your feeling, your stamina, your ambition to move mountains.

We bring here the last pages of [Le temps retrouve/Time regained](#) in English and in French. As with most of the authors whom I love, I feel that they wrote what I intended to write. As Proust's narrator I am indifferent to criticisms of my work, those who pronounce upon my work after my death could think what they please of it. But I differ from him in his conception of death and illness – I don't hate death, I look at it as an inevitable event that will come when it will come, sooner or later, with or without disease – or death ease. Until death I intend to work at full speed, enjoying life, my family, culture – active and passive, writing, reading, watching as much as I can, even if my hearing is impaired, I have other senses that I can use, hoping that they at least will not be affected. I had a friend Zvi Aviel who was blind, yet he enjoyed life and counted on his marvelous wife Dalia, who was his eyes, his heart and his soul until he passed away. What a fantastic palette those 6 giant French authors are: Hugo, Zola, Dumas, Sartre, Pagnol, Proust – one can read them and reread them during a lifetime, they have written so many masterpieces, given so much joy, they are so interesting, so educating, they were translated to most languages of the world, and have become the pillars of the Western civilization. At the end of the French literature chapter, I just want to thank them for rendering my life much better, for being there when I felt depressed, being for me bibliotherapy, influencing my whole life– to be a better man!

The organisation of my memory, of my preoccupations, was linked to my work perhaps because, while the letters I received were forgotten an instant later, the idea of my work was continuously in my mind, in a state of perpetual becoming. But it too had become importunate. My work was like a son whose dying mother must still unceasingly labour in the intervals of inoculations and cuppings. She may love him still but she only realises it through

the excess of her care of him. And my powers as a writer were no longer equal to the egoistical exactions of the work. Since the day on the staircase, nothing in the world, no happiness, whether it came from friendships, from the progress of my work or from hope of fame, reached me except as pale sunlight that had lost its power to warm me, to give me life or any desire whatever and yet was too brilliant in its paleness for my weary eyes which closed as I turned towards the wall. As much as I could tell from the movement of my lips, I might have had a very slight smile in the corner of my mouth when a lady wrote me: "I was surprised not to get an answer to my letter," Nevertheless, that reminded me and I answered it. I wanted to try, so as not to be thought ungrateful, to be as considerate to others as they to me. And I was crushed by imposing these super-human fatigue's on my dying body.

This idea of death installed itself in me definitively as love does. Not that I loved death, I hated it. But I dare say I had thought of it from time to time as one does of a woman one does not yet love and now the thought of it adhered to the deepest layer of my brain so thoroughly that I could not think of anything without its first traversing the death zone and even if I thought of nothing and remained quite still, the idea of death kept me company as incessantly as the idea of myself. I do not think that the day when I became moribund, it was the accompanying factors such as the impossibility of going downstairs, of remembering a name, of getting up, which had by unconscious reasoning given me the idea that I was already all but dead, but rather that it had all come together, that the great mirror of the spirit reflected a new reality. And yet I did not see how I could pass straight from my present ills to death without some warning. But then I thought of others and how people die every day without it seeming strange to us that there should be no hiatus between their illness and their death. I thought even that it was only because I saw them from the inside (far more than through deceitful hope) that certain ailments did not seem to me necessarily fatal, taken one at a time, although I thought I was going to die, just like those who certain that their time has come, are nevertheless easily persuaded that their not being able to pronounce certain words has nothing to do with apoplexy or heart failure but is due to the tongue being tired, to a nerve condition akin to stammering, owing to the exhaustion consequent on indigestion.

In my case it was not the farewell of a dying man to his wife that I had to write, it was something longer and addressed to more than one person. Long to write! At best I might attempt to sleep during the day-time. If I worked it would only be at night but it would need many nights perhaps a hundred, perhaps a thousand. And I should be harassed by the anxiety of not knowing whether the Master of my destiny, less indulgent than the Sultan Sheriar, would, some morning when I stopped work, grant a reprieve until the next evening. Not that I had the ambition to reproduce in any fashion the *Thousand and One Nights*, anymore than the *Mémoires of Saint-Simon*, they too written by night, nor any of the books I had so much loved and which superstitiously attached to them in my childish simplicity as I was to my later loves, I could not, without horror, imagine different from what they were. As Elstir said of Chardin, one can only recreate what one loves by

repudiating it. Doubtless my books, like my fleshly being, would, some day, die. But one must resign oneself to death. One accepts the thought that one will die in ten years and one's books in a hundred. Eternal duration is no more promised to works than to men. It might perhaps be a book as long as the *Thousand and One Nights* but very different. It is true that when one loves a work one would like to do something like it but one must sacrifice one's temporal love and not think of one's taste but of a truth which does not ask what our preferences are and forbids us to think of them. And it is only by obeying truth that one may some day encounter what one has abandoned and having forgotten the *Arabian Nights* or the *Mémoires of Saint-Simon* have written their counterpart in another period. But had I still time? Was it not too late?

In any case, if I had still the strength to accomplish my work, the circumstances, which had to-day in the course of the *Princesse de Guermantes'* reception simultaneously given me the idea of it and the fear of not being able to carry it out, would specifically indicate its form of which I had a presentiment formerly in Combray church during a period which had so much influence upon me, a form which, normally, is invisible, the form of Time. I should endeavour to render that Time-dimension by transcribing life in a way very different from that conveyed by our lying senses. Certainly, our senses lead us into other errors, many episodes in this narrative had proved to me that they falsify the real aspect of life. But I might, if it were needful, to secure the more accurate interpretation I proposed, be able to leave the locality of sounds unchanged, to refrain from detaching them from the source the intelligence assigns to them, although making the rain patter in one's room or fall in torrents into the cup from which we are drinking is, in itself, no more disconcerting than when as they often have, artists paint a sail or a peak near to or far away from us, according as the laws of perspective, variation in colour and ocular illusion make them appear, while our reason tells us that these objects are situated at enormous distances from us.

I might, although the error would be more serious, continue the fashion of putting features into the face of a passing woman, when instead of nose and cheeks and chin there was nothing there but an empty space in which our desire was reflected. And, a far more important matter, if I had not the leisure to prepare the hundred masks suitable to a single face, were it only as the eyes see it and in the sense in which they read its features, according as those eyes hope or fear or, on the other hand, as love and habit which conceal changes of age for many years, see them, indeed, even if I did not undertake, in spite of my liaison with Albertine proving that without it everything is fictitious and false, to represent people not from outside but from within ourselves where their smallest acts may entail fatal consequences, and to vary the moral atmosphere according to the different impressions on our sensibility or according to our serene sureness that an object is insignificant whereas the mere shadow of danger multiplies its size in a moment, if I could not introduce these changes and many others (the need for which, if one means to portray the truth has constantly been shown in the course of this narrative) into the transcription of a universe which had to be completely redesigned, at all events I should not fail to depict therein man, as

having the extension, not of his body but of his years, as being forced to the cumulatively heavy task which finally crushes him, of dragging them with him wherever he goes. Moreover, everybody feels that we are occupying an unceasingly increasing place in Time, and this universality could only rejoice me since it is the truth, a truth suspected by each one of us which it was my business to try to elucidate. Not only does everyone feel that we occupy a place in Time but the most simple person measures that place approximately as he might measure the place we occupy in space. Doubtless we often make mistakes in this measurement but that one should believe it possible to do it proves that one conceives of age as something measurable.

And often I asked myself not only whether there was still time but whether I was in a condition to accomplish my work. Illness which had rendered me a service by making me die to the world (for if the grain does not die when it is sown, it remains barren but if it dies it will bear much fruit), was now perhaps going to save me from idleness as idleness had preserved me from facility. Illness had undermined my strength and, as I had long noticed, had sapped the power of my memory when I ceased to love Albertine. And was not the recreation of the memory of impressions it was afterwards necessary to fathom, to illuminate, to transform into intellectual equivalents, one of the conditions, almost the essential condition, of a work of art such as I had conceived just now in the library? Ah, if I only still had the powers that were intact on the evening I had evoked when I happened to notice François le Champi. My grandmother's lingering death and the decline of my will and of my health dated from that evening of my mother's abdication. It was all settled at the moment when, unable to await the morning to press my lips upon my mother's face, I had taken my resolution, I had jumped out of bed and had stood in my nightshirt by the window through which the moonlight shone, until I heard M. Swann go away. My parents had accompanied him, I had heard the door open, the sound of bell and closing door. At that very moment, in the Prince de Guermantes' mansion, I heard the sound of my parents' footsteps and the metallic, shrill, fresh echo of the little bell which announced M. Swann's departure and the coming of my mother up the stairs; I heard it now, its very self, though its peal rang out in the far distant past. Then thinking of all the events which intervened between the instant when I had heard it and the Guermantes' reception I was terrified to think that it was indeed that bell which rang within me still, without my being able to abate its shrill sound, since, no longer remembering how the clanging used to stop, in order to learn, I had to listen to it and I was compelled to close my ears to the conversations of the masks around me. To get to hear it close I had again to plunge into myself. So that ringing must always be there and with it, between it and the present, all that indefinable past unrolled itself which I did not know I had within me. When it rang I already existed and since, in order that I should hear it still, there could be no discontinuity, I could have had no instant of repose or of non-existence, of non-thinking, of non-consciousness, since that former instant clung to me, for I could recover it, return to it, merely by

plunging more deeply into myself. It was that notion of the embodiment of Time, the inseparableness from us of the past that I now had the intention of bringing strongly into relief in my work. And it is because they thus contain the past that human bodies can so much hurt those who love them, because they contain so many memories, so many joys and desires effaced within them but so cruel for him who contemplates and prolongs in the order of time the beloved body of which he is jealous, jealous to the point of wishing its destruction. For after death Time leaves the body and memories—indifferent and pale—are obliterated in her who exists no longer and soon will be in him they still torture, memories which perish with the desire of the living body. I had a feeling of intense fatigue when I realised that all this span of time had not only been lived, thought, secreted by me uninterruptedly, that it was my life, that it was myself, but more still because I had at every moment to keep it attached to myself, that it bore me up, that I was poised on its dizzy summit, that I could not move without taking it with me.

The day on which I heard the distant, far-away sound of the bell in the Combray garden was a land-mark in that enormous dimension which I did not know I possessed. I was giddy at seeing so many years below and in me as though I were leagues high.

I now understood why the Duc de Guermantes, whom I admired when he was seated because he had aged so little although he had so many more years under him than I, had tottered when he got up and wanted to stand erect—like those old Archbishops surrounded by acolytes, whose only solid part is their metal cross—and had moved, trembling like a leaf on the hardly approachable summit of his eighty-three years, as though men were perched upon living stilts which keep on growing, reaching the height of church-towers, until walking becomes difficult and dangerous and, at last, they fall. I was terrified that my own were already so high beneath me and I did not think I was strong enough to retain for long a past that went back so far and that I bore within me so painfully. If at least, time enough were allotted to me to accomplish my work, I would not fail to mark it with the seal of Time, the idea of which imposed itself upon me with so much force to-day, and I would therein describe men, if need be, as monsters occupying a place in Time infinitely more important than the restricted one reserved for them in space, a place, on the contrary, prolonged immeasurably since, simultaneously touching widely separated years and the distant periods they have lived through—between which so many days have ranged themselves—they stand like giants immersed in Time.

Je venais de comprendre pourquoi le duc de Guermantes, dont j'avais admiré, en le regardant assis sur une chaise, combien il avait peu vieilli bien qu'il eût tellement plus d'années que moi au-dessous de lui, dès qu'il s'était levé et avait voulu se tenir debout avait vacillé sur des jambes flageolantes comme celles de ces vieux archevêques sur lesquels il n'y a de solide que leur croix métallique et vers lesquels s'empressent les jeunes séminaristes, et ne s'était avancé qu'en tremblant comme une feuille, sur le sommet peu praticable de quatre-vingt-trois années, comme si les hommes étaient juchés sur de vivantes échasses grandissant sans cesse, parfois plus hautes que des clochers, finissant par leur rendre la marche difficile et périlleuse, et d'où

tout d'un coup ils tombent. Je m'effrayais que les miennes fussent déjà si hautes sous mes pas, il ne me semblait pas que j'aurais encore la force de maintenir longtemps attaché à moi ce passé qui descendait déjà si loin, et que je portais si douloureusement en moi! Si du moins il m'était laissé assez de temps pour accomplir mon œuvre, je ne manquerais pas de la marquer au sceau de ce Temps dont l'idée s'imposait à moi avec tant de force aujourd'hui, et j'y décrirais les hommes, cela dût-il les faire ressembler à des êtres monstrueux, comme occupant dans le Temps une place autrement considérable que celle si restreinte qui leur est réservée dans l'espace, une place, au contraire, prolongée sans mesure, puisqu'ils touchent simultanément, comme des géants, plongés dans les années, à des époques vécues par eux, si distantes, - entre lesquelles tant de jours sont venus se placer - dans le Temps.

THOUGHTS & QUOTES ON ARABIC LITERATURE

After learning all those languages, which had a common ground with the languages that I already knew, this was not enough, and I decided to jump into deep water and learn languages that I always wanted to learn but I didn't have the time to do it. I started with [Arabic](#), a language that I should have known long ago. First of all, I was born in Egypt and lived there 9 years, I learned at the Lycee French school one hour of [Arabic](#) every day, I had graduated from high school with a grade of 9 in Arabic, at Insead a Syrian friend taught me Arabic, and yet I didn't know the language, which is very similar to Hebrew, the language that I know best. So, I learned spoken and literary Arabic, and after "graduating" in my teach yourself books, I started to read Naguib Mahfouz, the Egyptian Nobel Prize writer – Midaq Alley, but I am still in page 80, the book is excellent but I have a very difficult time in understanding the language. I read large segments of the Quran in English for my PhD dissertation on Business Ethics, as I wanted to prove that all the main religions have in common the same business ethics precepts. I wrote in my book on the Muslim business ethics precepts and introduced them to my curriculum, to the delight of my Arab students who were not aware of this part of the Quran. After learning again Arabic, I bought the [Quran](#) with an English translation and started to read it in Arabic. As I read in parallel many books I succeeded to read it until page 26, not so bad, taking into consideration the difficulty of the text. Here is the [Fatihah/Opening](#), that is quoted in all the Muslim mosques, the text and a compilation of 13 different reciters in a clip of mosques and celestial photos.

- ١ بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ
- 1 In the name of God, the Gracious, the Merciful.
- ٢ الْحَمْدُ لِلَّهِ رَبِّ الْعَالَمِينَ
- 2 Praise be to God, Lord of the Worlds.
- ٣ الرَّحْمَنِ الرَّحِيمِ
- 3 The Most Gracious, the Most Merciful.
- ٤ مُلِكِ يَوْمِ الدِّينِ
- 4 Master of the Day of Judgment.
- ٥ إِيَّاكَ نَعْبُدُ وَإِيَّاكَ نَسْتَعِينُ
- 5 It is You we worship, and upon You we call for help.
- ٦ اهْدِنَا الصِّرَاطَ الْمُسْتَقِيمَ
- 6 Guide us to the straight path.
- ٧ صِرَاطَ الَّذِينَ أَنْعَمْتَ عَلَيْهِمْ غَيْرِ الْمَغْضُوبِ عَلَيْهِمْ وَلَا الضَّالِّينَ
- 7 The path of those You have blessed, not of those against whom there is anger, nor of those who are misguided

Surah 1

*Bismillaah ar-Rahman ar-Raheem
 Al hamdu lillaahi rabbil 'alameen
 Ar-Rahman ar-Raheem Maaliki yaumid Deen
 Iyyaaka na'abudu wa iyyaaka nasta'een
 Ihdinas siraatal mustaqeem
 Siraatal ladheena an 'amta' alaihim
 Ghairil maghduubi 'alaihim waladaaleen
 Aameen*

In the name of God, the infinitely Compassionate and Merciful.
 Praise be to God, Lord of all the worlds.
 The Compassionate, the Merciful. Ruler on the Day of Reckoning.
 You alone do we worship, and You alone do we ask for help.
 Guide us on the straight path,
 the path of those who have received your grace;
 not the path of those who have brought down wrath, nor of those who wander astray.
 Amen.

Translated by Kabir Helminski

And from the Quran we quote one of the best Arabic books which I am reading – [Midaq Alley](#) by my compatriot [Naguib Mahfouz](#), who won the Nobel Prize of Literature in 1988. Mahfouz espoused Egyptian nationalism in many of his works, and expressed sympathies for the post-World-War era Wafd Party. He was also attracted to socialist and democratic ideals early on in his youth. The influence of socialist ideals is strongly reflected in his first two novels, *Al-Khalili* and *New Cairo*, and also in many of his latter works. Parallel to his sympathy for socialism and democracy was his antipathy towards Islamic extremism as expressed by the Muslim Brotherhood in Egypt. He strongly criticized radical Islam in his works and contrasted between the merits of socialism and the demerits of Islamic extremism in his first two novels. He perceived Islamism as critically delineated and rejected it as unsuitable for all times. In his memoirs, he purportedly stated that of all the forces active in Egyptian politics during his youth, he most despised the Muslim Brotherhood. Mahfouz did not shrink from controversy outside of his work. As a consequence of his outspoken support for Sadat's Camp David peace treaty with Israel in 1978, his books were banned in many Arab countries until after he won the Nobel Prize. Like many Egyptian writers and intellectuals, Mahfouz was on an Islamic fundamentalist "death list". He defended [Salman Rushdie](#) after Ayatollah [Ruhollah Khomeini](#) condemned Rushdie to death in 1989, but also criticized his *The Satanic Verses* as "insulting" to Islam. Mahfouz believed in freedom of expression and, although he did not personally agree with Rushdie's work, he did not believe that there should be a *fatwa* condemning him to death for it. In 1989, after Ayatollah Ruhollah Khomeini's *fatwa* calling for Salman Rushdie and his publishers to be killed, Mahfouz called Khomeini a terrorist. Shortly after Mahfouz joined 80 other intellectuals in declaring that "no blasphemy harms Islam and Muslims so much as the call for murdering a writer." From this Wikipedia survey on Mahfouz we can learn that those who tend to paint all Arabs as fundamentalists and anti-democratic overlook a large segment of the population. However, it is unthinkable that most of the Egyptian intelligentsia condemned him for supporting the peace process with Israel. Out of fear from the fundamentalists or out of super nationalism the majority is often silent and the extremists have their way and this maybe the worst enemy of Arab liberal society, and only a writer of the stature of Mahfouz can dare to express his opinions. This conduct despairs the peace camp in Israel, as they see that even if there is peace and all the territories are restituted Israel does not gain anything from the peace process, and even if the Egyptian or Jordanian governments intend to maintain a cold peace, still it is at the mercy of a fundamentalist coup that may ruin peace as it almost happened in Egypt.

We bring here the first page of the book in Arabic (from the book in my library) and in English:

- ١ -

تنطق شواهد كثيرة بأن زقاق المدق كان من تحف العهود الغابرة ، وأنه تألق يوما في تاريخ القاهرة المعزية كالكوكب الدرى . أى القاهرة أعنى ؟ .. الفاطمية ؟ .. المماليك ؟ السلاطين ؟ ، علم ذلك عند الله وعند علماء الآثار ، ولكنه على أية حال أثر ، وأثر نفيس . كيف لا وطريقه المبلط بصفائح الحجارة ينحدر مباشرة إلى الصنادقية ، تلك العطفة التاريخية ، وقهوته المعروفة بقهوة كرشة تزدان جدرانها بتهاويل الأرابيسك ، هذا إلى قدم باد ، وتهدم وتخلخل ، وروائح قوية من طب الزمان القديم الذى صار مع كروور الزمن عطرارة اليوم والغد .. !

ومع أن هذا الزقاق يكاد يعيش فى شبه عزلة عما يحديق به من مسارب الدنيا ، إلا أنه على رغم ذلك يضحج بحياته الخاصة ، حياة تتصل فى أعماقها بمجذور الحياة الشاملة ، وتحفظ — إلى ذلك — بقدر من أسرار العالم المنطوى .

* * *

آذنت الشمس بالمغيب ، والتف زقاق المدق فى غلالة سمراء من شفق الغروب ، زاد من سمرتها عمقا أنه منحصر بين جدران ثلاثة كالصيدلة له باب على الصنادقية ، ثم يصعد صعودا فى غير انتظام ، تحف بجانب منه دكان وقهوة وفرن ، وتحف بالجانب الآخر دكان ووكالة ، ثم ينتهى سريعا — كما انتهى مجده الغابر — بيتين متلاصقين ، يتكون كلاهما من طوابق ثلاثة .

سكنت حياة النهار ، وسرى ديب حياة المساء ، همسة هنا وهمسة هناك : يارب يا معين . يارزاق يا كريم . حسن الختام يارب . كل شىء بأمره . مساء الخير يا جماعة .. تفضلوا جاء وقت السمر . اصبح يا عم كامل وأغلق الدكان .

1. Many things combine to show that Midaq Alley is one of the gems of times gone by and that it once shone forth like a flashing star in the history of Cairo. Which Cairo do I mean? That of the Fatimids, the Mamlukes, or the Sultans? Only God and the archaeologists know the answer to that, but in any case, the alley is certainly an ancient relic and a precious one. How could it be otherwise with its stone-paved surface leading directly to the historic Sanadiqiya Street. And then there is its cafe known as Kirsha's. Its walls decorated with multicolored arabesques, now crumbling, give off strong odors from the medicines of olden times, smells which have now become the spices and folk cures of today and tomorrow . . . Although Midaq Alley lives in almost complete isolation from all surrounding activity, it clamors with a distinctive and personal life of its own. Fundamentally and basically, its roots connect with life as a whole and yet, at the same time, it retains a number of the secrets of a world now past.

The sun began to set and Midaq Alley was veiled in the brown hues of the glow. The darkness was all the greater because it was enclosed like a trap between three walls. It rose unevenly from Sanadiqiya Street. One of its sides consisted of a shop, a cafe, and a bakery, the other of another shop and an office. It ends abruptly, just as its ancient glory did, with two adjoining houses, each of three stories.

The noises of daytime life had quieted now and those of the evening began to be heard, a whisper here and a whisper there: "Good evening, everyone." "Come on in; it's time for the evening get-together." "Wake up, Uncle Kamil, and close your shop!" "Change the water in the hookah, Sanker!" "Put out the oven, Jaada!" "This hashish hurts my chest." "If we've been suffering terrors of blackouts and air raids for five years it's only due to our own wickedness!"

[Midaq Alley](#) is the English Translation of [Zuqāq al-Midaq](#) by [Naguib Mahfouz](#), released in English in 1966. [The story is about](#) Midaq Alley, a teeming back street in [Cairo](#) which is a microcosm of the world. Mahfouz plays on the cultural setting. The novel is introduced with description of the Arabic culture. It centers around the list of characters described below. The novel takes place in the 1940s and represents standing on the threshold of a modern era in Cairo and the rest of the nation as a whole. Each character is expressed like a caricature in which one quality or trait is over-emphasized. Mahfouz is not satirizing the individual character – he is satirizing the character type: Kirsha, a café owner who illegally sells and uses hashish and has a predilection for young boys. Mrs. Kirsha, infamous for her temper. Uncle Kamil, good-hearted, bachelor sweets-seller, famously bloated and sleepy. Abbas, a young, kindly barber who wants to get married. Salim Alwan, the wealthy businessman who is embittered after surviving a heart attack. Sheikh Darwish, the old poet and former English teacher, who left his former life to roam the streets. Radwan Hussainy, a landlord who beats his wife and failed his al-Azhar exams, yet is revered for his high degree of education and devotion to God. He has lost all of his children. Hussain Kirsha, son of the café owner who works for the British. He marries a woman of lower class and returns home with her and her brother. Saniya Afify, widowed landlady who desires to remarry. Umm Hamida, the neighborhood matchmaker and bath attendant; Hamida's foster mother. Hamida, a beautiful young woman who dreams of a better life and has a distinctly self-centered personality, but is easily persuaded by wealth or power.

But in order to speed up my understanding of Arabic, I tried lighter texts. So, I tried "Alamir Aszair" – [the Little Prince](#) in Arabic, and *The Woman in Black* in Arabic, and it was much easier. The Little Prince is the book that after the Bible was translated into almost every language. I read it of course in French when I was a kid, and since then I have read it in English, Hebrew, Alsatian, and many other languages. Actually, I started to read it, at least parts of it, in dozens of languages, [there is a website in all those languages](#), and even [a website with a few sentences in hundreds of languages](#) – 230 to be exact, and I could understand at least 130 languages and dialects. I also tried to understand sentences of the Bible, or the book of Ruth, as well as prayers, and I have succeeded to understand [255+ languages and dialects](#). The easiest way for me to check if I understand a language or not is to read the United Nations' Declaration of Human Rights, there – out of the 444 languages including Ladino, [I can understand more than 70 languages](#). I have to clarify what I mean by understanding – if I read a text in Bulgarian or Icelandic, I wouldn't understand much, but if I read it with a translation, I can follow the text.

THOUGHTS & QUOTES ON RUSSIAN CULTURE

I decided to learn [Russian](#) for the second time (the first one was in 1967), I graduated from the teach yourself "university" with all the discs and accessories, and I started immediately to read [Tolstoy's Anna Karenina](#), but there I got stuck at page 52. The problem is that with the difficult languages – Arabic, Russian and Greek, I can read a page or two in an hour, even with a translation, because the alphabet is so different and the language is so far from the languages I already know. Still, I learned by heart [Anna Karenina](#)'s first sentence and I boast with it to every Russian born Israeli that I meet, but unfortunately most of the young students don't know the sentence, not because of my awful accent but because they never read the book. Finally, I discovered that the old doorman at college knew the sentence!

English: "Happy families are all alike; every unhappy family is unhappy in its own way"

Russian: "Все счастливые семьи похожи друг на друга, каждая несчастливая семья несчастлива по-своему." *vse-schastlivie-semi-pahozhi-drug-na-druga-kazhdaya-neschastlivaya-semya-neschastliva-pa-svoemu-l-n-tolstoj*

Anna Karenina ([Russian](#): «Анна Каренина»; Russian pronunciation: [ˈanːə kəˈrʲenʲinə]) is a novel by the Russian writer [Leo Tolstoy](#), published in book form in 1878. Widely regarded as a pinnacle in realist fiction, Tolstoy considered *Anna Karenina* his first true novel, when he came to consider *War and Peace* to be more than a novel. [Fyodor Dostoyevsky](#) declared it "flawless as a work of art." His opinion was shared by [Vladimir Nabokov](#), who especially admired "the flawless magic of Tolstoy's style," and by [William Faulkner](#), who described the novel as, "the best ever written." The novel continues to enjoy popularity, as demonstrated by a recent poll of 125 contemporary authors by [J. Peder Zane](#), published in 2007 in "The Top Ten" in *Time*, which declared that *Anna Karenina* is the "greatest novel ever written."

[Anna Karenina is the](#) tragic story of a married aristocrat/socialite and her affair with the affluent [Count Vronsky](#). The [story starts](#) when [she arrives](#) in the [midst of a family](#) broken up by her [brother's unbridled](#) womanizing—[something that](#) prefigures [her own later](#) situation, though she would [experience less](#) tolerance [by others](#). A bachelor, Vronsky is [eager to marry](#) her if she would agree to leave her husband Karenin, a senior government official, but she is vulnerable to the pressures of Russian social norms, the moral laws of the Russian Orthodox Church, her own insecurities, and Karenin's indecision. Although Vronsky and Anna go to Italy, where they can be together, they have trouble making friends. Back in Russia, she is shunned, becoming further isolated and anxious, while Vronsky pursues his social life. Despite Vronsky's reassurances, she grows increasingly possessive and paranoid about his imagined infidelity, fearing loss of control.

A parallel story within the novel is that of Konstantin Levin, a wealthy country landowner who wants to marry Princess Kitty, sister to Dolly and sister-in-law to Anna's brother Oblonsky. Konstantin has to propose twice before Kitty accepts. The novel details Konstantin's difficulties managing his estate, his eventual marriage, and his personal issues, until the birth of his first child. The novel explores a diverse range of topics throughout its approximately thousand pages. Some of these topics include an evaluation of the feudal system that existed in Russia at the time—politics, not only in the Russian government but also at the level of the individual characters and families, religion, morality, gender and social class. In short, a masterpiece!

I read of course Anna Karenina in its English translation long before I studied Russian and got stuck at page 52. It was quite frustrating to read such a novel at a speed of one page an hour, even if it is in the original language, so I looked at the Russian reading only as an exercise of learning the language, and counted on that that I already knew the story from reading the novel and seeing many films based on the novel. Yet, I don't share the common axiom that Anna was a victim of society, the conduct of Vronsky was based on his love for Anna, and they are positive heroes. I don't reckon any extenuating circumstances for their conduct, which I blame totally, as I see Anna Karenina as a selfish carefree woman, who is willing to abandon her boy for her lover. A woman or a man has a duty to their children and they have to put their welfare on top of any other consideration. I fully concur with Karenin's behavior, as Anna knew what he is (a cold fish) and should have waited for true love if she was so romantic in order to marry. Vronsky's conduct is despicable and he is to blame from the start, he is bad, careless, conceited, ignorant.

What happens to Anna is justified – the social ostracism, her husband's decision to take away her boy from her custody, as this is the best for the boy, and I don't feel compassion for her when she [commits suicide](#). I feel complete sympathy with Levin and with Kitty (after she falls in love with Levin, while I condemn her of course for her love to Vronsky). I felt very moved by their love and by the ordeal that Levin had to pursue until love prevailed. It goes without saying that I believe that all marriages have to be based on love and not on pecuniary considerations. I saw many affinities between Levin and Kitty and between our marriage, as *les gens heureux n'ont pas d'histoire*, happy families are all alike, *vse-schastlivie-semi-pahozhi-drug-na-druga*, etc. All the marriages that I know of that were based on pecuniary considerations have failed, they have divorced or have hell in their marriage. So, how come that I blame Anna to go after her heart and leave her boy? Because I believe that you have to be responsible for your choices, and if you have a boy you should devote yourself totally to him. What is Karenin's blame – does he hit her, does he conduct badly to his boy, is he a miser? On the contrary, he may be cold hearted, but he loves very much Anna in his way, and he loves very much his boy, they live in a very high standard of living, Anna can do whatever she likes (within social norms), he works very hard. He is a very positive citizen, quite opposite to the careless Vronsky and to the libertine Anna.

We bring here the text of the first page of the book in Russian and its translation into English:

Все счастливые семьи похожи друг на друга, каждая несчастливая семья несчастлива по-своему.

Все смешалось в доме Облонских. Жена узнала, что муж был в связи с бывшею в их доме француженкою-гувернанткой, и объявила мужу, что не может жить с ним в одном доме. Положение это продолжалось уже третий день и мучительно чувствовалось и самими супругами, и всеми членами семьи, и домочадцами. Все члены семьи и домочадцы чувствовали, что нет смысла в их сожительстве и что на каждом постоялом дворе случайно сошедшиеся люди более связаны между собой, чем они, члены семьи и домочадцы Облонских. Жена не выходила из своих комнат, мужа третий день не было дома. Дети бегали по всему дому, как потерянные; англичанка поссорилась с экономкой и написала записку приятельнице, прося приискать ей новое место; повар ушел вчера со двора, во время самого обеда; черная кухарка и кучер просили расчета. На третий день после ссоры князь Степан Аркадьич Облонский — Стива, как его звали в свете, — в обычный час, то есть в восемь часов утра, проснулся не в спальне жены, а в своем кабинете, на сафьянном диване. Он повернул свое полное, выхоленное тело на

пружинах дивана, как бы желая опять заснуть надолго, с другой стороны крепко обнял подушку и прижался к ней щекой; но вдруг вскочил, сел на диван и открыл глаза.

«Да, да, как это было? — думал он, вспоминая сон. — Да, как это было? Да! Алабин давал обед в Дармштадте; нет, не в Дармштадте, а что-то американское. Да, но там Дармштадт был в Америке. Да, Алабин давал обед на стеклянных столах, да, — и столы пели: *Il mio tesoro*¹ и не *Il mio tesoro*, а что-то лучше, и какие-то маленькие графинчики, и они же женщины», — вспоминал он

Happy families are all alike; every unhappy family is unhappy in its own way.

Everything was in confusion in the Oblonskys' house. The wife had discovered that the husband was carrying on an intrigue with a French girl, who had been a governess in their family, and she had announced to her husband that she could not go on living in the same house with him. This position of affairs had now lasted three days, and not only the husband and wife themselves, but all the members of their family and household, were painfully conscious of it. Every person in the house felt that there was so sense in their living together, and that the stray people brought together by chance in any inn had more in common with one another than they, the members of the family and household of the Oblonskys. The wife did not leave her own room, the husband had not been at home for three days. The children ran wild all over the house; the English governess quarreled with the housekeeper, and wrote to a friend asking her to look out for a new situation for her; the man-cook had walked of the day before just at dinner-time; the kitchen-maid, and the coachman had given warning.

Three days after the quarrel, Prince Stepan Arkadyevitch Oblonsky--Stiva, as he was called in the fashionable world--woke up at his usual hour, that is, at eight o'clock in the morning, not in his wife's bedroom, but on the leather-covered sofa in his study. He turned over his stout, well-cared-for person on the springy sofa, as though he would sink into a long sleep again; he vigorously embraced the pillow on the other side and buried his face in it; but all at once he jumped up, sat up on the sofa, and opened his eyes. "Yes, yes, how was it now?" he thought, going over his dream. "Now, how was it? To be sure! Alabin was giving a dinner at Darmstadt; no, not Darmstadt, but something American. Yes, but then, Darmstadt was in America. Yes, Alabin was giving a dinner on glass tables, and the tables sang, *Il mio tesoro*--not *Il mio tesoro* though, but something better, and there were some sort of little decanters on the table, and they were women, too," he remembered.

So, I read the Anthology of Russian Stories and there I was more successful because the stories are shorter and I managed to read until page 91 – Pushkin's *The Stationmaster* and Gogol's *The Nose*. Yet, when I visited Russia for the first time in a cruise to St Petersburg in 2014, the city and the language looked so familiar that I thought I am at home. Well, there are more than a million Russian Israelis and the language is heard at every street corner in Israel. Furthermore, most of the earlier Israeli folk songs have Russian melodies with Hebrew lyrics, as the first settlers were Russians and they brought with them their culture and folklore. There are many Russian words in Hebrew and of course in its slang. As a matter of fact, every Jew who came from one of the 100 countries of the Diaspora brought with him something of his culture, his language and his mentality, from Iraq, Egypt, Yemen, Morocco, Iran, India, Ethiopia, Russia, Poland, Germany, France, England, US, Argentina, Brazil, Italy, Greece, Turkey, Hungary, Romania, Bulgaria, South Africa, Australia, Canada, etc. The hit parade of the Israeli radio when I was young had songs from England, US, Mexico, Brazil, Spain, France, Argentina, Italy, Greece, Portugal, most of the intellectual Jews spoke at least five languages, but nowadays I am very sorry that the young generation speaks only Hebrew and English. They don't read the classics anymore, of course not in their original language. They

are excellent in High Tech, but have a very limited scope of interests. Where have all the cosmopolitans vanished? In Europe, I found in the young generation many intellectuals, who spoke fluently at least 3 languages, but not in other countries and not in Israel, sic transit gloria mundi... (sorry, is it Chinese?)

The Russian "teachers" in the Teach Yourself books were kind enough to teach the Russian learners also children songs, as the following ["May there always be sunshine", Пусть Всегда Будет Солнце](#), (1962), which is one of the most beautiful children songs ever written.

May There Always Be Sunshine (Pust vseгда budet solntse)

Music: Arkadiy Ostrovskiy, Lyrics: Lev Oshanin / T.Botting

**Bright blue the sky,
Sun up on high -
That was the little boy's picture.
He drew for you,
Wrote for you, too
Just to make clear what he drew.**

**Chorus (twice):
May there always be sunshine,
May there always be blue skies,
May there always be mommy,
May there always be me!**

**My little friend,
Listen, my friend,
Peace is the dream of the people.
Hearts old and young
Never have done
Singing the song you have sung.**

Chorus

**Soldier lad, stay!
Hear what we say -
War would make all of us losers.
Peace is our prize,
Millions of eyes
Anxiously gaze at the skies.**

Chorus

**Down with all war!
We want no more.**

**People stand up for you children.
Sing everyone -
Peace must be won,
Dark clouds must not hide the sun.**

Chorus

**Солнечный круг,
Небо вокруг –
Это рисунок мальчишки.
Нарисовал он на листке
И подписал в уголке:**

**Припев:
Пусть всегда будет солнце!
Пусть всегда будет небо!
Пусть всегда будет мама!
Пусть всегда буду я!**

**Милый мой друг,
Добрый мой друг,
Людам так хочется мира.
И в тридцать пять сердце опять
Не устаёт повторять:**

Припев.

**Тише солдат,
Слышишь, солдат!
Люди пугаются взрывов.
Тысячи глаз в небо глядят,
Губы упрямо твердят:**

Припев.

**Против беды,
Против войны
Встанем за наших мальчишек.
Солнце навек! Счастье навек! –
Так повелел человек.**

Припев.

Many Russian songs were adapted from Russian to Hebrew, French or English. We bring here the famous song [Those were the days](#), sung by [Mary Hopkin](#) with Lyrics in English and Russian. The song was adapted from Russian by [Eugene Raskin](#). The original song in Russian was composed by Boris Fomin, with Lyrics by Konstantin Podrevskii, and was called: "Dorogoi dlinnoyu" ("[Дорогой длинною](#)", lit. "By the long road"). It deals with reminiscence upon youth and romantic idealism. The song was recorded in over 20 languages, including Japanese, Spanish, German, Italian, French, Hebrew... On Christmas 1975, the President of

[Equatorial Guinea](#), [Francisco Macías Nguema](#), had 150 alleged coup plotters executed in the national stadium while Hopkin's 'Those Were the Days' was played over the PA system.

Слова К.Подревского

Ехали на тройке с бубенцами,
А вдали мелькали огоньки...
Эх, когда бы мне теперь за вами,
Душу бы развеять от тоски!

English text by Gene Raskin

Once upon a time there was a tavern,
Where we used to raise a glass or two.
Remember how we laughed away the hours,
And dreamed of all the great things we would do.

Припев:

Дорогой длинною,
Погодой лунною,
Да с песней той,
Что вдале летит звеня,
И с той старинною,
Да с семиструнною,
Что по ночам
Так мучила меня.

Refrain:

Those were the days my friend,
We'd thought they'd never end,
We'd sing and dance for-ever and a day,
We'd live the life we choose,
We'd fight and never lose,
For we were young and sure to have our way.
Lalala lah lala, lalala lah lala
Those were the days, oh yes, those were the days.

Да, выходит, пели мы задаром,
Понапрасну ночь за ночью жгли.
Если мы покончили со старым,
Так и ночи эти отошли!

Припев:

Then the busy years when rushing by us.
We lost our starry notions on the way.
If by chance I'd see you in the tavern,
We'd smile at one another and we'd say:

Refrain:

В даль родную новыми путями
Нам отныне ехать суждено!
Ехали на тройке с бубенцами,
Да теперь проехали давно!

Припев:

Just tonight I stood before the tavern,
Nothing seemed the way it used to be.
In the glass I saw a strange reflection,
Was that lonely person really me.

Refrain:

Through the door there came familiar laughter.
I saw your face and heard you call my name.
Oh, my friend, we're older but no wiser,
For in our hearts the dreams are still the same.

Refrain:

A famous adaptation from Russian to French was the popular French song *Le Galerien* – the Galley Slave, wrote in 1942 by the author Maurice Druon (who was wrote also the lyrics of the French Partisans song), while Leo Poll adapted the music of an old song of Russian prisoners. We bring here the unforgettable interpretation by [Les Compagnons](#) de la Chanson, and the [original song in Russian](#). The song tells the confession of a galley slave who regrets that he didn't here the advices of his mother and he has become as his father a galley slave. The refrain starts with those words: *J'ai pas tué, j'ai pas volé Mais j'ai pas cru ma mère* – I have not killed, I have not robbed, but I didn't believe my mother. The leitmotiv in the Russian song is as follows:

Помню, помню, помню я (Pomniou, pomniou, pomniou ia) I remember, I remember, I remember

Как меня мать любила, (Kak menia mat liubila) As my mother loved me,

И не раз, и не два (I ne raz, i ne dva) And not only once, and not only twice
Она мне так говорила (Ona mne tak govorila) She spoke to me as this

Je m'souviens, ma mère m'aimait
 Et je suis aux galères,
 Je m'souviens ma mère disait
 Mais je n'ai pas cru ma mère
 Ne traîne pas dans les ruisseaux
 T'bats pas comme un sauvage
 T'amuses pas comme les oiseaux
 Elle me disait d'être sage

Toujours, toujours elle disait
 T'en vas pas chez les filles
 Fais donc pas toujours ce qui t'plait
 Dans les prisons y a des grilles
 J'ai pas tué, j'ai pas volé
 Mais j'ai cru Madeleine
 J'ai pas tué, j'ai pas volé
 J'avais pas lui faire de peine

J'ai pas tué, j'ai pas volé
 J'avais courir la chance
 J'ai pas tué, j'ai pas volé
 J'avais qu'à chaque jour soit dimanche
 Je m'souviens ma mère pleurait
 Dès que je passais la porte
 Je m'souviens comme elle pleurait
 Elle voulait pas que je sorte

Un jour les soldats du roi
 T'emmenaient aux galères
 Tu t'en iras trois par trois
 Comme ils ont emmené ton père
 Tu auras la tête rasée
 On te mettra des chaînes
 T'en auras les reins brisés
 Et moi j'en mourrai de peine

J'ai pas tué, j'ai pas volé
 Mais j'ai pas cru ma mère
 Et je m'souviens qu'elle m'aimait
 Pendant que je rame aux galères.

Finally, the [Hebrew song](#) Ruthy, like my wife's name, a [Hebrew folk](#) song, an adaptation of Russian folk song **Вот мчится тройка почтовая**. The Hebrew words written by Haim Hefer tell about longing to a girl who waits for me in a distant shore. When I'll meet her I'll know what is the meaning of love, she will laugh and the wind will move her hair. Well, this describes exactly my longing to my girl Ruthy who waited for me at a distant shore of Naharya, she taught me what is love, with her laugh and unkempt hair. We bring the song [in Chinese](#), one [more in Chinese](#), [in Russian](#), [one more](#) in Russian, [and one more](#), one [more also](#), [a Russian choir](#), [another choir](#), [with an orchestra](#), by a [Romanian singer](#) like my Ruthy who was born in Romania, [a cartoon](#), in [metal version](#), [with balalaikas](#), [and even more](#). With [Russian subtitles](#), [in a film](#) 100 years old (1915), a [karaoke version](#). In Hebrew - [Nehama Hendel](#), [Arik Lavie](#), [Dudu Zakay](#), [Arik Einstein](#) – in memoriam, [Lehakat Hel Hayam](#), etc.

A Russian friend told me when we found a complaint box, called "tear box", in a former communist country of the Balkans, what an awful history those boxes had in the Stalinist Soviet Union, where at one time there were a hundred millions complaints, almost everyone complaining on the others, mostly anonymously, that they were against the regime, that they spoke against Stalin, that they were Zionists wanting to emigrate to Israel, (my forefathers in Spain and Portugal suffered probably from similar informers to the Inquisition), and every complaint was scrutinized, and were the basis for sending people to Siberia, sometimes also because they dared to complain overtly like Solzhenitsyn... Nowadays, when you complaint in a neoliberal regime like US, you are not sent to Siberia as in the USSR, just sent to hell...

THOUGHTS & QUOTES ON GREEK CULTURE

One of the last languages that I learned, also for the second or third time was [Greek](#). I have a lot in common with Greece, I like the country, the people, the mentality, my grandfather was Greek, born in Larissa, and my mother spoke fluently Greek and was a Greek citizen although born in Cairo. My most favorite book is the Odyssey, and my novel is based on Homer's classic. I like Greek tragedies and comedies very much and I even studied [Aristophanes](#) at the university. So, after learning [Greek](#), I attacked [Zorba the Greek](#) and [there I got stuck](#) at page 52 (curiously enough, like in Anna Karenina). I tried to read Zola's Nana and Merimee's Carmen in Greek, thinking that the [translation](#) from French will make it [easier to read](#). I tried even to read Homer's [Odyssey](#) in ancient [Greek](#) and was very glad that at least I can follow the text with the translation. It doesn't matter if I understand much or not, what is important is the process of learning new languages, making gymnastics to the brain, feeling young.

I visited several times Greece – beautiful Athens, the islands – Rodos, Corfu, Kos, Crete, etc., Salonika... When I visited with my wife Athens, I wrote to my Insead friend Georg Heine that we shall reside at the hotel, but Georg came to fetch us from the airport and insisted that we would be their guests for Christmas' week. We stayed in Plaka in his private house and he gave us the penthouse room, we ate together with his family the Christmas dinner, he took us to visit the Acropolis, the Agora and all the interesting sites of Athens, we went to see a play in Greek where his beautiful wife who was the best actress in Greece acted, he took us to the premiere of Dalaras where we sat in the front row as they were the guests of honor, we went to see Haris Alexiou, made a cruise in the islands next to Athens, and spent with Georg the perfect host one of the best vacations ever, but alas he unfortunately died a few years later. We also visited Cyprus, where we felt at home, like in Greece and Israel. We took a tour to Nicosia and went along the wall that divides the city in two with the Turkish state, reminding me of the wall that divided Jerusalem when I was a student and the wall that divided Berlin when I studied in West Berlin German at the Goethe Institute, making visits to East Berlin.

I like very much modern Greek poetry that I try to read both in Greek and English. I'll bring here one of my favorite poems – Ithaca, by one of the best poets of our twelfth century – C. Kavafis, who lived between 1863-1933. The translation by Thegeby. I find in this poem a consolation that even if I've not accomplished all what I planned, I am satisfied with what I have done, as what matters after all is the journey, making it ethically, with integrity, with passion, being of significance to my family, my country and humankind in general, achieving a very successful 30 years in international business, 10 years in lecturing at the best universities in Israel and at INSEAD, 10 years in writing more than twenty important books, and I continue my journey.

I am not afraid of Poseidon, I fought with courage tycoons and corrupted businessmen and CEOs, I published books, essays and articles that changed the way thousands of people thought. I paid the price, I endangered my life, I lost money, positions and jobs, but I couldn't do otherwise, as I had to do it my way, as Ulysses did thousands years ago. I even wrote a novel and plays, case studies and academic books, describing my journey, with no fear at all from Cyclops, Laestrygonians, betrayed by my allies who changed sides allured by corruption, knowing that the journey will be long, but I have visited with joy, curiosity and delight harbors and capitals, met outstanding people that I couldn't meet before, receiving a PhD in Business Ethics from one of the best universities in Europe. I didn't acquire "beautiful merchandise" in my journey but I acquired a vision, a backbone, a spiritual identity, a purpose in life – to make a better life for my country, the world economy, for human society.

Ithaca was always on my mind, my destination was to arrive there. More than 20 years have elapsed since I started my ethical journey, and unlike Ulysses/Odysseus I have not arrived yet to Ithaca. But fortunately Penelope is with me, my children are with me, and they give me the strength and stamina to continue my journey. And I don't feel old, I continue to create, to influence people, tens, hundreds or thousands, it doesn't matter, what matters is the journey. Ithaca did not give me wealth, it gave me a splendid journey, without her I would not have set out. And if I find her poor, Ithaca has not deceived me, as I have acquired such wisdom, so much experience, that I will have already realized what Ithaca means – personal redemption.

Ιθάκη

Σα βγεις στον πηγαιμό για την Ιθάκη,
να εύχεται νάναι μακρύς ο δρόμος,
γεμάτος περιπέτειες, γεμάτος γνώσεις.
Τους Λαιστρυγόνες και τους Κύκλωπας,
τον θυμωμένο Ποσειδώνα μη φοβάσαι,
τέτοια στον δρόμο σου ποτέ σου δεν θα βρεις,
αν μεν' η σκέψις σου υψηλή, αν εκλεκτή
συγκίνησις το πνεύμα και το σώμα σου αγγίζει.
Τους Λαιστρυγόνες και τους Κύκλωπας,
τον άγριο Ποσειδώνα δεν θα συναντήσεις,
αν δεν τους κουβανείς μες στην ψυχή σου,
αν η ψυχή σου δεν τους στήνει εμπρός σου.

Να εύχεται νάναι μακρύς ο δρόμος.
Πολλά τα καλοκαιρινά πρωϊά να είναι
που με τι ευχαρίστησι, με τι χαρά
θα μπαίνεις σε λιμένας πρωτοειδωμένους,
να σταματήσεις σ' εμπορεία Φοινικικά,
και τες καλές πραγμάτειες ν' αποκτήσεις,
σεντέφια και κοράλλια, κεχριμπάρια κ' έβενους,
και ηδονικά μυρωδικά κάθε λογής,
όσο μπορείς πιο άφθονα ηδονικά μυρωδικά,
σε πόλεις Αιγυπτιακές πολλές να πας,
να μάθεις και να μάθεις απ' τους σπουδασμένους.

Πάντα στον νου σου νάχεις την Ιθάκη.
Το φθάσιμον εκεί ειν' ο προορισμός σου.
Αλλά μη βιάζεις το ταξίδι διόλου.
Καλλίτερα χρόνια πολλά να διαρκέσει
και γέρος πια ν' αράξεις στο νησί,
πλούσιος με όσα κέρδισες στο δρόμο,
μη προσδοκώντας πλούτη να σε δώσει η Ιθάκη.

Η Ιθάκη σ'έδωσε τ' ωραίο ταξίδι.
Χωρίς αυτήν δεν θάβγαινες στον δρόμο.
Αλλά δεν έχει να σε δώσει πια.

Κι αν πτωχική την βρεις, η Ιθάκη δε σε γέλασε.
 Έτσι σοφός που έγινες, με τόση πείρα,
 ήδη θα το κατάλαβες οι Ιθάκες τι σημαίνουν

Ithaca

When you set out for Ithaca
 Hope your journey will be long
 Filled with adventure, filled with knowledge.
 The laestrygones and the cyclopeses,
 And wrathful Poseidon do not fear.
 You'll never encounter them on the road,
 Unless your mind is clear and you decide
 To grab it with your spirit and your body
 And you don't meet the wild Poseidon
 The laestrygones and the cyclopeses
 unless you embrace them in your soul,
 Unless your soul confronts them

Hope your journey will be long
 With many summer mornings
 Full of pleasure, full of joy
 The first time coming into port
 To stop at Phoenician trading places
 And buy the finest samples of their wares
 Mother of pearl and coral, amber and ebony
 And hedonistic herbs of every kind.
 But you need yet more hedonistic herbs
 To many Egyptian cities you'll go
 To study and learn from their wise men

Keep always in mind the getting to Ithaca.
 The arrival there is remaining your goal.
 But do not do violence to the journey.
 Better take many years
 And be old by the time you get to the island
 rich with all that you gained on the road
 Don't expect Ithaca to provide you with that

Ithaca gave you the wonderful journey
 Without it you never would get on the path
 She does not owe you more than that

And if you find her poor, Ithaca didn't make sport of you.
 So wise you've become, so experienced
 That already you know what these Ithacas mean

Out of [the Odyssey](#), in English [and Greek](#) from Ulysses' [journey to the](#) underworld, we read how he met the ghost of Theban Teiresias, who asks him why he had come to visit the dead:

Then came also the ghost of Theban Teiresias, with his golden sceptre in his hand. He knew me and said, 'Ulysses, noble son of Laertes, why, poor man, have you left the light of day and come down to visit the dead in this sad place? Stand back from the trench and withdraw your sword that I may drink of the blood and answer your questions truly.'

So I drew back, and sheathed my sword, whereon when he had drank of the blood he began with his prophecy.

'You want to know,' said he, 'about your return home, but heaven will make this hard for you. I do not think that you will escape the eye of Neptune, who still nurses his bitter grudge against you for having blinded his son. Still, after much suffering you may get home if you can restrain yourself and your companions when your ship reaches the Thrinacian island, where you will find the sheep and cattle belonging to the sun, who sees and gives ear to everything. If you leave these flocks unharmed and think of nothing but of getting home, you may yet after much hardship reach Ithaca; but if you harm them, then I forewarn you of the destruction both of your ship and of your men. Even though you may yourself escape, you will return in bad plight after losing all your men in another man's ship, and you will find trouble in your house, which will be overrun by high-handed people, who are devouring your substance under the pretext of paying court and making presents to your wife.

Ἦλθε δ' ἐπὶ ψυχῇ Θηβαίου Τειρεσίαο, χρύσειον σκῆπτρον ἔχων, ἐμὲ δ' ἔγνω καὶ προσέειπε· [διογενὲς Λαερτιάδη, πολυμήχαν' Ὀδυσσεῦ,] τίπτ' αὖτ', ὦ δύστηνε, λιπὼν φάος ἡελίοιο ἦλυθες, ὄφρα ἴδῃ νέκυας καὶ ἀτερπέα χῶρον; ἀλλ' ἀποχάζεο βόθρου, ἄπισχε δὲ φάσγανον ὀξύ, αἵματος ὄφρα πῖω καὶ τοι νημερτέα εἶπω.

ὥς φάτ', ἐγὼ δ' ἀναχασσάμενος ξίφος ἀργυρόηλον κουλεῶ ἐγκατέπηξ'. ὁ δ' ἐπεὶ πῖεν αἶμα κελαϊνόν, καὶ τότε δὴ μ' ἐπέεσσι προσηύδα μάντις ἀμύμων·

νόστον δίζηαι μελιδέα, φαίδιμ' Ὀδυσσεῦ· τὸν δέ τοι ἀργαλέον θήσει θεός. οὐ γὰρ οἷω λήσειν ἐννοσίγαιον, ὃ τοι κότον ἐνθετο θυμῷ, χῳόμενος ὅτι οἱ υἱὸν φίλον ἐξαλάωσας. ἀλλ' ἔτι μὲν κε καὶ ὥς, κακὰ περ πάσχοντες, ἴκοισθε, αἶ κ' ἐθέλης σὸν θυμὸν ἐρυκακέειν καὶ ἐταίρων, ὅπποτε κεν πρῶτον πελάσης εὐεργέα νῆα Θρινακίῃ νήσῳ, προφυγῶν ἰοειδέα πόντον, βοσκομένας δ' εὖρητε βόας καὶ ἴφια μῆλα Ἥελιου, ὃς πάντ' ἐφορᾷ καὶ πάντ' ἐπακούει. τὰς εἰ μὲν κ' ἀσινέας ἐάας νόστου τε μέδῃαι, καὶ κεν ἔτ' εἰς Ἰθάκην, κακὰ περ πάσχοντες, ἴκοισθε· εἰ δέ κε σίνηαι, τότε τοι τεκμαίρομ' ὄλεθρον νηϊ τε καὶ ἐτάροισ'. αὐτὸς δ' εἰ πέρ κεν ἀλύξης, ὃψὲ κακῶς νεῖαι, ὀλέσας ἄπο πάντας ἐταίρους, νηὸς ἐπ' ἀλλοτρίης· δήεις δ' ἐν πῆματα οἴκῳ, ἄνδρας ὑπερφιάλους, οἳ τοι βίοτον κατέδουσι μνώμενοι ἀντιθέην ἄλοχον καὶ ἔδνα διδόντες.

THOUGHTS & QUOTES ON HEBREW LITERATURE

One could get the false impression that I, Jacques Cory, Yaakov Cory in Hebrew, am a citizen of the world, a cosmopolitan, with no roots in Israel, loving France, being a Europocentrist, wanting to assimilate in Europe and to forget my Jewish roots. But, I fell in love with Israel, when I settled there, if not at the age of 9, surely at the age of 13, when at last I was among Sabra friends born in Israel, who admired my intellect and were not jealous of my scholar achievements as during my primary school education, in an environment that despised culture, when Cowboys books were the most sophisticated intellectual achievements of the kids. I went at the age of 13 to a youth movement (socialist, of learning and working kids...) and felt there an integral part of society. The army was also a very important melting pot, but the most important decision of my life was taken on June 5, 1967, on my 23rd birthday. I terminated my BA studies in Economics and Political Sciences in 1964/5 at the age of 20, when I started to work as an Economist officer at the Israeli army until February 1967. By then, Israel was in the middle of a recession, and having found no work, although I earned a lot in temporary works, I applied for work to Omega in Bienne, Switzerland, where I was received (Israel didn't offer me work but Switzerland did...). I was frustrated that after my military service and BA, I had no work in Israel.

I had to start my work in mid June and had purchased a ticket for a ship sailing from Haifa on June 5, 1967, my birthday. A few days before this date, started the tension between Egypt and Israel, after the Egyptian broke all the agreements, leading to the [Six-Day War](#), starting on June 5, 1967. I phoned my reserve unit and they told me that I can leave Israel, as I am not needed. So, I had to decide, am I going to leave Israel, maybe forever, when the country is being attacked by the Egyptians, Syrians and Jordans, or am I staying in my homeland, although I was not needed and could leave. If I would have leaved, I could have become a Swiss citizen, as I had many affinities with French Swiss. But I decided to remain in my country that maybe didn't need me right away but they would need me in the near future.

And, indeed, I was called to duty, right after the war for a month, and in the meantime I received a notification that I was admitted to the MBA studies at Insead with a full scholarship. In August I left for Berlin and later for Paris, visiting for the first time Paris. In France, I encountered for the first time anti-Semitism, which shocked me, as I had the impression that the French had all the qualities and no drawbacks. At a Rotary meeting right after I came to France, I was asked how the Jews dared to conquer East Jerusalem, which is holy to the Christians and Muslims (they forgot to mention that the Jews were there first, and built the Temple, but who remembers David and Salomon?). I answered them that the Arabs started the war as they did also in 1948, but when they lose they call the Israelis aggressors, and the situation now is far better for the Christians than it was before. Ultimately, they befriended me, as they were not accustomed to receive blunt answers by the French Jews who were too "apologetic"...

I dated at Fontainebleau a young woman aged 18 who studied at a Catholic school in her last year of high school. One evening when we were in my room she said that she has to return home to prepare a composition on the superiority of Christianity over Judaism. I told her that I will write for her the composition as I am an expert on the matter. I dictated her all the "usual" lies about the Jews, we killed Jesus, we refuse to recognise the Messiah, we like too much money, we are presumptuous, misers, we have a double allegiance to France and Israel, in short all the lies that I have heard in the past few months. I didn't go too far as to say that

we drink the blood of young Christian boys in Passover, as I wanted the composition to sound genuine. My girlfriend was hilarious, she laughed a lot, as she of course was pro-Semite, otherwise she wouldn't have dated me. Well, she received the first prize! It became the joke of all her class to whom she told the truth that the composition was written by her Jewish boyfriend. The nuns of course didn't know about that and praised her for the excellent "balanced and objective" composition. Her composition was submitted to the Paris contest where all the religious schools contested. The first prize was a scholarship and the second prize was a week of a religious seminar in a convent. Guess what? She received the second prize, the Catholic management found that the composition was too old-school Catholic and didn't match the new doctrines of the Pope. She wanted to kill me, as because of me she had to attend the religious seminar, and told me that this was the problem with the Jews – they excel too much even when they write an anti-Semitic composition!

After encountering many more revelations of anti-Semitism, I came to the conclusion that I had only one homeland and I decided to return to Israel right after graduation and not find a lucrative job there, as others did. But, once again, fate intervened at the crossroads between cosmopolitanism and nationalism. Cosmopolitan is derived from the Greek κοσμοπολίτης, or *kosmopolitês*, formed from "κόσμος", *kosmos*, i.e. "world", "universe", or "cosmos", and *πολίτης*, "*politês*", i.e. "citizen" or "[one] of a city". Contemporary usage defines the term as "citizen of the world". In April 1969, I worked at IAI, Israel Aircraft Industries, when the company decided to purchase two aerospace companies in Belgium - Sabca and Cobelda. As I worked for the VP who was responsible of the purchasing it was decided that I will relocate to Belgium and supervise the merger. Afterall, this is what I learned at Insead, Belgium was part of the Common Market, French was my mother tongue, I was the perfect candidate for the job. The departure was imminent, I said goodbye to my parents and friends (I didn't have at the moment a girlfriend), I wrote to my Belgian friends that I was coming; the suitcases were ready, the flight ticket, the passport... But, at the last moment, a couple of days before my departure, the deal was cancelled because of the embargo, and I remained in Israel. A week later I met at a party a young woman Ruthy, we fell in love immediately, le coup de foudre, and three months later we were married. Only then, I felt at last fully assimilated in the Israeli culture, Ruthy was the opposite of a cosmopolitan, she was not a Sabra, but having come to Israel at the age of three, she was 100% Israeli, she had never left Israel (only in 1978 she travelled abroad for the first time), and I at last felt completely Israeli. Ruthy was convinced that Israel is the only answer for the Jews who want to avoid anti-Semitism, her Romanian parents were almost murdered in the holocaust, as most of her family were, and I came to the same conclusion. I started to read, for my pleasure (not for my literature courses), Israeli literature, liking most Agnon, Shamir and Tammuz, going to the theater to see Israeli plays, still feeling a bit cosmopolitan but with Israeli roots, as there is no contradiction between the two, that complement each other in harmony.

And of course, there is the Bible. I have studied the Bible in Ancient Hebrew and understand it almost perfectly. I am an atheist but have a great respect and admiration for religion, much less for ultra-orthodox religious people of all faiths. I read many books, wrote and taught extensively, on business ethics in Christianity, Judaism, Islam, Buddhism, and other religions, based on the [Golden Rule: Do unto others as you would have them do unto you](#). In the Hebrew original in the Bible – (ויקרא י"ט:י"ח) **וְאָהַבְתָּ לְרֵעֶךָ כָּמוֹךָ** – love your friend as yourself. Or in Chinese/Mandarin: chi so pu yu wu shih yu jen 己所不欲，勿施于人. Alternatively, One should not treat others in ways that one would not like to be treated. In the original, in Aramaic: dealeikha sani lehaverha lo taavid – (שבת לא א) דעליך סני לחברך לא תעביד. As I am Aristotelian in my belief – advocate of the middle way, the mean between extremes, the "golden mean", nothing in excess, harmony, in short – I believe in moderation

and not on extreme conduct. If you substitute Ethics/Justice/Middle Way/Harmony/Humanism instead of God, you found the gist of the Bible, happiness and peace. Actually, God was probably invented by the prophets in order to convince men and women to conduct righteously, as most of the people have to fear the wrath of God in order to be ethical, and even so, they "buy" forgiveness by donating to the church, mosque or synagogue, in order to be forgiven by God. Today, the unethical tycoons, even if they are not religious, donate to charity, to universities, hospitals, public buildings, culture, or sports activities, and society forgives them that they got rich by unethical means. Well, not all of them donate, and not all of those who donate are unethical, like Warren Buffett, one of the most ethical businessmen, who donates back to society almost all what he has.

I like to read from time to time the Bible, and the chapter I like the most is Psalm 92, that summarizes my belief that people should live with a clean conscience, based on a humanistic approach to life, faith in Ethics, harmonious and holistic conduct, admiration of a moderate and wise existence, justice for the righteous and the wicked – the righteous flourish like the palm tree, they still bear fruit in old age, and though the wicked sprout like grass, evildoers shall be scattered. To declare that Lord/ethics/justice is upright, he is my rock, with no unrighteousness. Those who want to hear this psalm in Hebrew can hear it on this Hebrew link: [האזנה לפרק זה](#)

◀ Psalm 92 ▶

English Standard Version - How Great Are Your Works

A Psalm. A Song for the Sabbath.

- 1It is good to give thanks to the Lord,
to sing praises to your name, O Most High;
- 2to declare your steadfast love in the morning,
and your faithfulness by night,
- 3to the music of the lute and the harp,
to the melody of the lyre.
- 4For you, O Lord, have made me glad by your work;
at the works of your hands I sing for joy.
- 5How great are your works, O Lord!
Your thoughts are very deep!
- 6The stupid man cannot know;
the fool cannot understand this:
- 7that though the wicked sprout like grass
and all evildoers flourish,
they are doomed to destruction forever;
- 8 but you, O Lord, are on high forever.
- 9For behold, your enemies, O Lord,
for behold, your enemies shall perish;
all evildoers shall be scattered.
- 10But you have exalted my horn like that of the wild ox;
you have poured over me fresh oil.
- 11My eyes have seen the downfall of my enemies;

my ears have heard the doom of my evil assailants.

12 The righteous flourish like the palm tree
and grow like a cedar in Lebanon.

13 They are planted in the house of the Lord;
they flourish in the courts of our God.

14 They still bear fruit in old age;
they are ever full of sap and green,

15 to declare that the Lord is upright;
he is my rock, and there is no unrighteousness in him.

תהילים פרק צב

א מְזֻמּוֹר שִׁיר, לַיּוֹם הַשַּׁבָּת.
ב טוֹב, לְהַדוֹת לַיהוָה; וּלְזַמֵּר לְשִׁמְךָ עָלֶיךָ.
ג לְהַגִּיד בְּבֵקֶר חֲסִידֶךָ; וְאִמְוִנְתֶּךָ, בְּלִילוֹת.
ד עָלֶי-עֵשׂוֹר, וְעָלֶי-נָבֶל; עָלֶי הַגִּיּוֹן בְּכִנּוֹר.
ה כִּי שִׁמְחִתֶּנִּי יְהוָה בְּפִעֲלֶךָ; בְּמַעֲשֵׂי יָדֶיךָ אֲרַנֶּה.
ו מִה-נִּדְלוּ מַעֲשֵׂיךָ יְהוָה; מְאֹד, עֲמָקוֹ מִחֲשָׁבְתֶיךָ.
ז אִישׁ-בָּעַר, לֹא יָדַע; וְכִסִּיל, לֹא-יָבִין אֶת-זֹאת.
ח בְּפֶרֶחַ רִשְׁעִים, כָּמוֹ עֵשֶׁב, וַיִּצְיָאוּ, כָּל-פֹּעַלֵי אָוֶן: לְהַשְׁמָדֵם עַד־עַד.
ט וְאַתָּה מְרוֹם--לְעֵלִים יְהוָה.
י כִּי הִנֵּה אֲנִיכֶךָ, יְהוָה--כִּי-הִנֵּה אֲנִיכֶךָ יֹאבְדוּ:
יִתְפָּרְדוּ, כָּל-פֹּעַלֵי אָוֶן.
יא וְתִתֶּם כְּרִאִים קִרְנִי; בְּלַתִּי, בְּשִׁמּוֹן רַעְנָן.
יב וְתִבְט עֵינִי, בְּשׁוֹרֵי:
בְּקָמִים עָלֶי מְרַעִים--תִּשְׁמַעְנָה אָזְנִי.
יג צַדִּיק, כְּתִמֵּר יִפְרַח; כְּאֶרֶז בְּלִבְנוֹן יִשְׁגָּה.
יד שְׁתוּלִים, בְּבֵית יְהוָה; בְּחִצְרוֹת אֱלֹהֵינוּ יִפְרִיחוּ.
טו עוֹד, יִנוּבוּן בְּשִׁיבָה; דְּשָׁנִים וְרַעְנָנִים יִהְיוּ.
טז לְהַגִּיד, כִּי-נֶשֶׁר יְהוָה; צוּרִי, וְלֹא-עֶלְתָה (עוֹלָתָה) בּוֹ.

I visited most of Israel – I studied for three years at the Hebrew University of Jerusalem, I worked for nine years in Tel Aviv, but most of the time I lived in Haifa, where I prefer to live, with my family, my parents lived there, and Ruthy's parents lived in the nearby town of Nahariya. I live on Mount Carmel in a cottage with a fantastic view of Mount Carmel, the woods and the sea. I stayed several times at Eilat, visiting a few times Beer Sheba, Nazareth, Tiberias, Safed, the Golan Heights, and only once the touristic sites of the West Bank. Some people say that I visit more foreign countries than my own country, but this is common to many of my friends, who are cosmopolitan as I am. When you study so many languages, read so many literatures, visit so many countries, you are bound to read less Hebrew books and tour less your own country. When walking on the walls of Carcassonne I was criticized that I have not walked yet on the walls of Jerusalem, and I really don't want to divulge if I have ever visited the Knesset, Israeli parliament, while I visited the American Congress, the British Parliament, the French Assemblée Nationale, the Romanian Parliament, and the German Reichstag, where I dined with the group of INSEAD alumnis. Yet, I feel a 100% Israeli, as can be seen in this book, I support the Israeli government attitude in the Palestinian conflict although I differ sometimes with the tactics, but I never criticize Israel when visiting abroad. I feel that I have found the right balance and harmony between my cosmopolitan and Israeli

identities, as the Golden Rule and Aristotelian middle way were always and still are the motto of my life.

One of the criteriae of the essence of being an Israeli is probably the community singing, or the folklore dances. I participated every month during 14 years in a community singing organized by Effi Netzer who sang accompanied with his accordion, with me, my wife and friends, and with 400 more people, Israeli songs, and in the second part of the evening we heard Israeli singers singing Israeli songs and cosmopolitan songs – French chansons of Edith Piaff, Yves Montand, Gilbert Beaud, Jacques Brel, Beatle songs, South American – Peruvian Indian, Brazilian sambas, Mexican mariachis, Argentinian tangos, Cuban salsa, American Country songs, Spirituals, Italian songs – Napolitan, San Remo, Eurovision songs, Irish songs (Israelis don't boycott Irish music...), Abba songs, Frank Sinatra and oldies songs, Greek songs, Musical songs, and even Opera arias and Oriental songs. The Israeli songs were songs of the repertoires of the best Israeli singers, poets, and composers: [Chava Alberstein](#), [Naomi Shemer](#), [Nurit Hirsh](#), [Ehud Manor](#), [Yehudit Ravitz](#), [Arik Einstein](#), [Nathan Alterman](#), [Ofra Haza](#), [Uzi Hitman](#), [Effi Netzer](#), [Ilanit](#), [Rita](#), and links to more Israeli singers and performers in other parts of this book.

So, am I a good citizen? Should a good citizen support all what the government does, or should he criticize what he thinks is wrong, while strictly obeying the law even if he differs to many of the laws? I have remained in Israel throughout all my life, except for ten years – 9 when I was a kid in Cairo, but even then my allegiance as my father's was to Israel and not to Egypt, and one at Fontainebleau, France, where I studied for my MBA, and although I could have settled before and after Insead outside Israel I remained in the country and gave my children an uninterrupted Israeli education of 12 years at the Reali School of Haifa, one of the best schools in Israel. I also served as an economist at the Army in the reserves (as a Major) until I was 50.

Who is a true Israeli? A citizen who lives all his life in Israel, without traveling abroad and speaks only Hebrew? Or a citizen who comes to live in Israel at the age of 80 only because it is one of the few countries in the world who don't have inheritance taxes? A settler who settles in Judea and Samaria returning to the sites where his forefathers lived? Or a human rights watch member who denounces every move where the army and settlers oppress the Arab population? A high tech engineer who lives in Los Angeles, receives the American nationality, but all his friends are also from the Israeli diaspora? Or an army officer who was wounded by the Palestinians in one of the retaliations campaigns against the launching of thousands of rockets from mosques and schools aimed to kill thousands of innocent civilians in synagogues and kindergartens? The answer is very ambiguous and much more complex than defining who is a true Frenchman, Italian or German. Israel is a unique country where the main common denominator of the population is the ethnic/religious roots, and even that applies only to less than 80% of the population. There are wide gaps between religious/ultraorthodox/secular, Jews and Arabs, Sephardic/Oriental/Ashkenazis, left/center/right/religious/Arab parties, rich/middle class/poor, doves/hawks, Sabras (born in Israel)/immigrants, new immigrants from Russia/Ethiopia/western countries, and the gaps in many cases are increasing (especially in social classes). My activities focus in narrowing the gaps and reaching an harmonious balance.

Israel is the land of the Jewish people, the [Israeli Declaration of Independence](#) identifies Israel as a "Jewish State". Paragraph 13 of the Declaration provides that the State of Israel would *be based on freedom, justice and peace as envisaged by the prophets of Israel; it will ensure complete equality of social and political rights to all its inhabitants irrespective of religion,*

race or sex. I believe that the right definition of the state should be: the land of the Jewish people **and** of all its citizens. "Jewish people" as opposed to only all its citizens (like the US or Australia), because the purpose of the foundation of the state was and is to give a homeland to all the Jews. "and of all its citizens" because we have in Israel minorities of Arabs, Druzes, Russian Christians, African refugees, etc., who are not Jewish yet Israel is their land also. According to the law, Israel is also a democracy, with equal rights to all. But the definition of a democracy according to me is a system that achieves the maximum welfare to all the population.

I fully adhere to the Israeli Declaration of Independence, and to most of the ensuing laws although I differ but obey to some of the laws, especially on religious matters - I think that the country should be secular and should not finance religious schools, economic matters - the taxation laws which are antisocial and neoliberal, and welfare laws that have privatized most of the government responsibilities to society. I criticize in my books and articles, on my website and in my courses and lectures, many of the social and economic, political and ethical foundations of Israel and I have issued a platform of a Movement of the Second Republic of Israel, aimed to restart most of the Israeli foundations based on the Declaration of Independence.

The movement operates outside the political system focusing on social, economic and governmental justice, integrity, equality, sustainability, and the quality of life of all the citizens. The movement unites all the segments of the population – hawks and doves, settlers/pioneers and "peace now" adherents, Jews and Arabs, religious and seculars, men and women, rich/middle class/poor, Israelis living in the periphery and the center, businessmen, academics, intelligentsia/workers. Israel should increase the percentage of the middle class from 27% to 50% like in Sweden, should reduce the percentage of poors by more than half to less than 10% like in Canada, Norway and Switzerland, should eliminate the gaps between the segments of the population and especially Jews and Arabs, Ultraorthodox and seculars, focusing on ethics and integrity, eradication of corruption and bribes, abolishing the neoliberal system, with a humane capitalist system operating for the welfare of all the stakeholders of society, with a presidential government system and a government of experts, abolishing the illicit ties between business and government and banning the employment of government officials in the private sector and in parallel increasing substantially (like in Singapore) the salaries of the public sector employees, separation of religion and government (like in France), free education at all levels, decreasing substantially crime (including white collar crime), returning to basics – an equal society condemning wrongdoing and advocating modesty, cooperation instead of cut-throat competition, involvement in the community, finding the Middle Way in all activities including the economic regime, with adequate regulation, striving to increase the intellectual level of the youth as opposed to decadent reality programs. In short, through this holistic approach Israel and all societies would find the adequate budgets to implement all these reforms, returning the power to the people as opposed to the tycoons and oligarchy who rule de facto the economy, with a progressive taxing system, strong penalties to haircuts and ethical wrongdoing, heavy sentences to all those who ruin the environment, and strong incentives to an ethical conduct of the people.

And now, we bring a short survey on Hebrew literature of the authors I like most – Shai Agnon, Moshe Shamir, Amos Oz, Benjamin Tammuz and Haim Nahman Bialik. First – Shai Agnon. **Shmuel Yosef Agnon** ([Hebrew](#): שמואל יוסף עגנון) (July 17, 1888 – February 17, 1970) was a [Nobel Prize laureate](#) writer and was one of the central figures of [modern Hebrew fiction](#). In Hebrew, he is known by the [acronym](#) **Shai Agnon** (ש"י עגנון). In English, his works are published under the name **S. Y. Agnon**. Agnon was born in [Galicia](#), [Austro-Hungarian](#)

[Empire](#) (today [Ukraine](#)). He later immigrated to [Mandatory Palestine](#), and died in [Jerusalem, Israel](#).

His works deal with the conflict between the traditional [Jewish](#) life and language and the [modern world](#). They also attempt to recapture the fading traditions of the European [shtetl](#) (village). In a wider context, he also contributed to broadening the characteristic conception of the [narrator](#)'s role in literature. Agnon shared the Nobel Prize with the poet [Nelly Sachs](#) in 1966. The communities he passed through in his life are reflected in his works:

- Galicia: in the books [The Bridal Canopy](#), *A City and the Fullness Thereof* and *A Guest for the Night*.
- Germany: in the stories "Fernheim", "Thus Far" and "Between Two Cities".
- Jaffa: in the stories "Oath of Allegiance", "Tmol Shilshom" and "The Dune".
- Jerusalem: "Tehilla", "Tmol Shilshom", "Ido ve-Inam" and "Shira".

Nitza Ben-Dov writes about Agnon's use of allusiveness, free-association and imaginative dream-sequences, and discusses how seemingly inconsequential events and thoughts determine the lives of his characters. Some of Agnon's works, such as *The Bridal Canopy*, *And the Crooked Shall Be Made Straight*, and *The Doctor's Divorce*, have been adapted for [theatre](#). A play based on Agnon's letters to his wife, "Esterlein Yakirati", was performed at the [Khan Theater](#) in Jerusalem. Agnon wrote many short stories, but I like most his novels and novellas:

- [The Bridal Canopy](#) (1931), translated from *Hakhnāsāt kallāh*. An epic describing Galician Judaism at the start of the 19th century. The story of a poor but devout Galician Jew, Reb Yudel, who wanders the countryside with his companion, Nuta, during the early 19th century, in search of bridegrooms for his three daughters.
- [In the Heart of the Seas](#), *a story of a journey to the land of Israel* (1933), translated from *Bi-levav yamim*. A short novel about a group of ten men who travel from Eastern Europe to Jerusalem.
- [A Simple Story](#) (1935), translated from *Sipur pashut*. A short novel about a young man, his search for a bride, and the lessons of marriage.
- [A Guest for the Night](#) (1938), translated from *Ore'ah Noteh Lalun*. A novel about the decline of eastern European Jewry. The narrator visits his old hometown and discovers that great changes have occurred since World War I.
- *Betrothed* (1943), translated from *Shevuat Emunim*. A short novel.
- [Only Yesterday](#) (1945), translated from *Temol shilshom*. An epic novel set in the Second Aliyah period. It follows the story of the narrator from Galicia to Jaffa to Jerusalem.
- *Edo and Enam* (1950). A short novel.
- *To This Day* (1952), translated from *Ad henah*. A tale of a young writer stranded in Berlin during World War I.
- *Shira* (1971). A novel set in Jerusalem in the 1930s and 1940s. Manfred Herbst, a middle-aged professor suffering from boredom, spends his days prowling the streets searching for Shira, the beguiling nurse he met when his wife was giving birth to their third child. Against the background of 1930s Jerusalem, Herbst wages war against the encroachment of age.

ONLY YESTERDAY: Seduced by Zionist slogans, young Isaac Kumer imagines the Land of Israel filled with the financial, social, and erotic opportunities that were denied him, the son of

an impoverished shopkeeper, in Poland. Once there, he cannot find the agricultural work he anticipated. Instead Isaac happens upon house-painting jobs as he moves from secular, Zionist Jaffa, where the ideological fervor and sexual freedom are alien to him, to ultra-orthodox, anti-Zionist Jerusalem. While some of his Zionist friends turn capitalist, becoming successful merchants, his own life remains adrift and impoverished in a land torn between idealism and practicality, a place that is at once homeland and diaspora. Eventually he marries a religious woman in Jerusalem, after his worldly girlfriend in Jaffa rejects him. Led astray by circumstances, Isaac always ends up in the place opposite of where he wants to be, but why? The text soars to Surrealist-Kafkaesque dimensions when, in a playful mode, Isaac drips paint on a stray dog, writing "Crazy Dog" on his back. Causing panic wherever he roams, the dog takes over the story, until, after enduring persecution for so long without "understanding" why, he really does go mad and bites Isaac. The dog has been interpreted as everything from the embodiment of Exile to a daemonic force, and becomes an unforgettable character in a book about the death of God, the deception of discourse, the power of suppressed eroticism, and the destiny of a people depicted in all its darkness and promise.

AND FROM SHIRA: When Henrietta realized she was alone with her husband, she took his hand and said, "Don't be annoyed that I'm troubling you to take Shira to dinner. You don't know what a wonderful woman she is. . . . Now, my darling, get ready for the nurse. Don't you want to see Sarah?" "Sarah? Who's Sarah?" Henrietta said, "Didn't we agree to call our new daughter Sarah?" . . . The nurse Shira was back. . . . She wore a midlength gray dress and a silver filigree necklace, which set off her face. . . . One more striking thing: on her lovely, small feet she wore shoes made by a skilled craftsman, which lent special elegance to her bearing. . . . When they were outside, Shira said, "Actually, I would rather not go to a restaurant. . . . Let's walk a little, so I can clear my head." . . . Herbst lowered his eyes. . . . He saw her small feet in the slippers she had waved at him the night before. He remembered the night's events, how he had slipped them off and exposed her feet, how she had put the slippers back on and he had slipped them off again, how her feet had wriggled, stockingless, bare, lovelier than any feet in the world.

Another quote from Shira, where Agnon explains as Herbst what he thinks about politicians:

"...החכמים מושכים ידיהם מהנהגת העולם, מפני שהם יודעים שיש חכמים מהם ורוצים שיתנהג העולם על ידי חכמים גמורים, בתוך כך קופצים הטפשים והרשעים ובאים ונוטלים את העולם לידיהם ומנהגים את העולם לפי זדונם וכפי טפשותם. מעתה היאך נותנים החכמים לעולם שיאבד על ידי השוטים והרשעים, אלא שמתוך שהחכמים חכמים ומוסיפים חכמה, כל שנראה להם אתמול כחכמה שלמה רואים אותו היום שאינו חכמה ואינם עומדים על דעתם ואינם תוקעים עצמם לשום דבר מפני החכמה שמוליכה את החכמים ממעלה למעלה. לא כן הטפשים. כל דבר שנתנו בו עיניהם הרי הם מחזיקים בו ואינם מניחים ממנו, שאם יניחו ידיהם ממנו אין להם מה יעשו בעולם. לפיכך כל ימיהם תחבולות ובלבד שיחזיקו את העולם בידיהם."

I'll try to translate this quote from Agnon's Shira: "The wise people are not inclined to rule the world as they know that there are people who are wiser and they want that the world will be ruled by totally wise people. In this gap jump the fools and the wicked who come and grasp the world in their hands and rule the world wickedly and foolishly. Now how can the wise people allow the world to be lost by the fools and wicked, because the wise become wiser, and what they thought yesterday was a complete wisdom they see today that it is not wisdom and they do not insist on their opinions and they don't push themselves into anything as the wisdom leads the wise people higher and higher. Not so the foolish. Everything that they want they hold it and do not let it go, because if they do so they'll not know what to do in this world. Therefore, all their lives are ruse enabling them to hold the world in their hands."

Moshe Shamir is from another generation, born in Israel, fighting in 1948, and writing many masterpieces of the young nation Israel. **Moshe Shamir** ([Hebrew](#): משה שמיר; September 15, 1921 – August 20, 2004) was an [Israeli](#) author, playwright, opinion writer, and public figure. Shamir was born in [Safed](#). He went to the Tel Nordau School and graduated from the [Herzliya Hebrew High School](#) in [Tel Aviv](#). In the [Israeli War of Independence](#) he served in [Palmach](#). He began his political career as a member of the movement [Hashomer Hatzair](#), in which he filled a leadership role. He was one of the editors of their official newspaper *Al Ha-Homa* from 1939 to 1941. From 1944 to 1946 he was a member of [kibbutz Mishmar HaEmek](#). He was founder and editor of the [Israel Defense Forces](#) official newspaper *Bamahane* ("In the Camp") from 1947 to 1950. During the 1950s he was a member of the editorial board of the newspaper *Maariv* and the editor of its literature section. Shamir began writing stories at a young age. They immediately attracted attention, and not only for his literary ability. He was always engaged with political problems, always arousing opposition. The first opposition came from Meir Yairi, leader of the left-wing movement to which Shamir belonged, concerning what was perceived as "ideological aberration" in his stories. In hindsight it is difficult to understand what the fuss was about. The stories seem completely innocent and certainly are not hostile or injurious to the kibbutz movement. However, the anger that was aroused against Shamir was so strong that he decided to leave his kibbutz in 1947 for ideological reasons. Shamir's first story, in 1940, dealt with [Abraham](#) and the [binding of Isaac](#). The story was published in the youth movement newspaper *Al Ha-Homa*.

In his 1947 novel *He Walked Through the Fields*, which became the first play performed in the established State of Israel, the hero is a native-born Israeli, a "Sabra". The book won the [Ussishkin](#) Prize. It was adapted as a movie directed by Yosef Milo, who also directed its theatrical debut. In 1947, he became the chief editor of the [Haganah](#) (later [Israel Defense Forces](#)) newspaper *Bamahane*. He edited it until he was dismissed at the request of [David Ben-Gurion](#) for publishing an article about a celebration of the disbanding of [Palmach](#). Thereafter he continually aroused scandals, more than any other Hebrew author of our time. The hero of *With His Own Hands: Elik's Story* (1951) is his brother Elik who fell in the War of Independence. The book became an icon of that war. *Alik's Story* was translated into English, adapted into radio plays, and even merited an adaptation for television. It is one of the greatest Israeli bestsellers of all time, selling to date over 150,000 copies. It became part of the program of study in schools.

Under the Sun (1950) and *That You Are Naked* (1959) are autobiographical pieces based on his life in the thirties and forties. Shamir wrote additional books about the members of his family: *With His Own Heart* about his father, and *Not Far From the Tree* about his family history. Besides *The King of Flesh and Blood*, his most translated book was a children's book, *The Fifth Wheel* (1961). It is about the adventures of a kibbutznik, dispatched to bring a tractor from the port, who at every step meets various and sundry obstacles and adventures.

[Joseph Klausner](#) was critical of *The King of Flesh and Blood*, whose central character is the Hasmonean king [Alexander Jannæus](#). [Menachem Begin](#) recalled Klausner's words in a later day when Moshe Shamir, as a member of the [Knesset](#), crossed the political lines from left to right to oppose the [Israel-Egypt Peace Treaty](#). As the prime minister at the time, Begin spoke out against Shamir in the Knesset, indicating that Shamir's objections showed a lack of awareness of the historic moves taking place. He said to Shamir (in Hebrew): Certainly you recall that, in his day, the late Prof. Joseph Klausner wrote, when you published your book *The King of Flesh and Blood*, these words: "There may sometimes be a writer who is not a historian, but to such an extent?" And now I say: "There may sometimes be a politician who

does not recognize the rustling wings of history, but to such an extent?" Moshe Shamir also wrote poetry. However, most of his trade was in prose. He was a prolific author, publishing in the course of his life more than 25 books. Thus he is best recognized as a novelist and playwright. He died at the age of 83.

We bring here an extract in Hebrew from the book: The king of flesh and blood:

משבא ינאי להוליך את שלומית לסעודה עטוי היה בסדין של בוך לבן, ואין עליו דבר זולת חרב החבויה בין קפליו. לעומתו היתה שלומית מפוארת בשיראים של מלכות ומעוטרת בחפצי חן. הוליכה ואמר לה: "כיון ששמעו שמעה של סעודה טובה – נתלקטו גרגרניה של ירושלים ובאו, ברוב עם הדרת מלך." נכנסה לטרקלין וראתה שדחה סעודתה מפני סעודתו. שולחנות היו ערוכים, ועליהם כנוסים בני אדם רבים. הללו נתרוממו עכשיו באחת וקמו על רגליהם, לתת כבוד למלך וכוהן גדול. עמדו ולא זזו כל אימת שהוליך את שלומית על פניהם, והוסיפו לעמוד בשעה שבא עמה למקומה והושיבה. כיון שישב ישבו, ונשתררה דממה כבדה בחללו של טרקלין. אף על פי שהיו עיניה תקועות לפנים בלא ניע, ואף על פי שקצת הקשיבה לברכתו של כוהן גדול, נתונה היתה דעתה למנות מי בבאים. חידה הוא לה אותו מלך שאין כוחו לבני אדם וסופו כונס עם רב. אפשר שלא כנס את הרבים אלא בשביל להימלט מן המעטים. הנה ישב אבשלום אחיו לשמאלו. כמדומה לא נתראו פנים זה ג' ירחים, ואף על פי כן אין הוא מפנה עליו את מבטו, אבשלום ציפיתו אמורה בפניו. ביקשה בעיניה את בן שטח אחיה ומצאתהו שהוא דחוק ליד אחד השולחנות, אף כי נראה מרווח ביו דוחקיו.

ינאי, כמדומה, ביקש לעשות פומבי ליומו החדש, וכנגד תפארת בני אדם שעשויה ירושלים לכנוס למקום אחד העמיד תפארת כליו ומשמשי ומזונותיו שהוא עשוי לכנוס לשעה אחת. ניכר שלא גמר בלבו על דבר כל אותה תכונה אלא בשעה שיצא מעליה. בני אדם עוד היו מתכנסים ובאים, והעבדים היו חוזרים ומשפיעים על כל שולחן משוב בי מבשלו של מלך. ככל שרבו הבאים מעטו בתוכם שהיו ידועים לשלומית. כמה וכמה מהם ניכרו בקלסתר עכו"ם שלהם, וכמסתבר: משרי צבאו החדשים של ינאי. כשם שמיהר לאבד כן מיהר לקנות. בריות שארמון החשמונאים לא היה מורגל בשכמותם סבבו על השולחנות – סוחרים, מוכסנים וסתם בני נכר, בעלי שיירות ובעלי שליחיות.

נכנסו ובאו עבדים שנשאו את אדונם, והיה זה אלעזר בן פתורה, שהבהילו ינאי ממשכבו. שלח כנגדם ינאי את העומד עליו, והלה מיהר וזימנם למושב של כבוד. ראתה שלומית כן ומיד שלחה אף היא את העומד עליה, והלה מיהר וזימן את שמעון בן שטח למושב של כבוד. התבוננה כיצד מקשיב שמעון לנאמר לו, כיצד הוא מתרומם ממקומו, נפטר מעל שכניו ופוסע בשופי אל מקומו בראש. רק משקרב מאוד ראהו ינאי והטיל מבטו החריף בשלומית, אך שוב לא היתה תקנה לדבר. שמעון ניגש אליו ובירכו במאור פנים, והשיבו ינאי ברכה וזימנו שישב בינו ולמלכה. ישב שמעון ונתן ברכתו לשלומית. אותה שעה הקיש המקיש בחניתו וההמולה הפכה דממה של קשב. קם ינאי ואמר:

"בשעה זו של שמחות", פתח ינאי והתבונן לעבריו, אחת הנה ואחת הנה, "בשעה זו של בשורות טובות, ראוי לנו שנצטרף שמחה לשמחה."

נתן מבטו בשלומית, וידעה כי אליה הוא מכוון. ביקשה לכבוש פניה ולא נשמעו לה. באה לה גאוותה ונשאה סנטרה כנגדו. ראתהו מלוא עמידתו, שעה שהוסיף ואמר בה שאר דבריו:

"על דבר בני יוחנן אשר ילדה לי, תינתן למלכה לשלומית בית שאן העיר, והכפרים, וכל נחלאות המלך אשר בגבולה, וכל המסים והמכסים הבאים ממנה – מתנת המלך לנחלת עולם, לה נפשה, להנאתה ולשמחת לבה." קסם על שפתי מלך, וראתה שלומית שהיא נקסמת ונכבשת שוב לשגינותיו של זה, כאילו אפשר לו ללבה שמתנות יקנהו. אכן, לא מתנתו קנתה אלא שכרון רוחו להפליא. בדומה לה נכבשו כל האחרים. ניכרה חכמתו של מלך, שהניח לעמו שימתין לו; בשביל שלא יבוא לפניו ניצוח אלא יבוא לפניו נוצח. היתה מנענעת ראשה לכאן ולכאן ואינה רואה מי הם שמשלחים בה ברכותיהם ושאוונם. פתאום נדמו ושוב היה ינאי מדבר.

I think that The King of Flesh and Blood is the best book of Moshe Shamir, whose central character is the Hasmonean king [Alexander Jannæus](#). The historic accuracy of the book may be disputed by our best historian Joseph Klausner, but it really does not matter as Shamir has succeeded in transposing us to the times of the [Hashmonean Dynasty](#). **Alexander**

Jannai/Yannai; [Hebrew](#): אֶלְכָסְנָדֶר יָנַי) was king of [Judea](#) from 103 BC to 76 BC. The son of [John Hyrcanus](#), he inherited the throne from his brother [Aristobulus I](#), and appears to have married his brother's widow, *Shlomtzion* or "Shelomit", also known as [Salome Alexandra](#), according to the Biblical law of [Yibbum](#) ("levirate marriage"), although [Josephus](#) is inexplicit on that point. Since Alexander Jannaeus was a high priest, he was technically breaking Jewish law according to the [laws in Leviticus](#). The laws in Leviticus state that a Jewish high priest is forbidden to marry a widow. I'll translate the last page of the extract from Shamir's book:

"Yannai stood up and said: "In this time of joys," he started looking around once and again, "In this time of good news, it is becoming to add a happy occasion to another one". He looked at Shlomit, and she knew that he meant her. She tried to look aside but her face did not obey her. She looked at him with pride, noticed his stature, while he continued saying to her: "As a tribute for my son Yohanan that she gave me, the queen Shlomit will receive the town of Beit Shean, the villages, and all the lands belonging to the king in the vicinity, and all the taxes and duties received will be a present of the king forever, to her, to her pleasure and joyful heart." Charm was on the king's lips, and Shlomit noticed that she was charmed and captivated once again by his follies, as if her heart could be won by presents. Indeed, not his present captivated her but his wonderful spirit. In the same token all the others were captivated. The king's wisdom was blatant, while he let his people wait for him; not coming to them vanquished but coming to them victorious. She moved her head here and there and she did not noticed who were those who conveyed to her their blessings and noises. Suddenly there was quiet and Yannai spoke again."

Amos Oz is from the third generation. **Amos Oz** ([Hebrew](#): עַמּוֹס עֹז; born May 4, 1939, birth name **Amos Klausner**) is an Israeli writer, [novelist](#), [journalist](#) and intellectual. He is also a [professor](#) of [literature](#) at [Ben-Gurion University](#) in [Beersheba](#). He is regarded as Israel's most famous living author. Oz's work has been published in 42 languages, including [Arabic](#), in 43 countries. He has received many honours and awards, among them the [Legion of Honour](#) of France, the [Goethe Prize](#), the [Prince of Asturias Award in Literature](#), the [Heinrich Heine Prize](#) and the [Israel Prize](#). In 2007, a selection from the Chinese translation of [A Tale of Love and Darkness](#) was the first work of modern Hebrew literature to appear in an official Chinese textbook. Since 1967, Oz has been a prominent advocate of a [two-state solution](#) to the [Israeli–Palestinian conflict](#). In his political views on the Palestinian conflict he was completely opposite to Moshe Shamir, who wanted to keep Judea, Samaria, Gaza, the Golan heights, and Sinai. Many of Oz's family members were [right-wing Revisionist Zionists](#). His great uncle [Joseph Klausner](#) (of whom we write extensively in this book) was the [Herut](#) party candidate for the presidency against [Chaim Weizmann](#) and was chair of the Hebrew literature department at the [Hebrew University of Jerusalem](#). Oz and his family were not religious, considering it irrational. Oz, however, attended the community religious school Tachkemoni since the only alternative was a socialist school affiliated with the labour movement, to which his family was even more opposed. The noted poet [Zelda](#) was one of his teachers. After Tachkemoni he attended [Gymnasia Rehavia](#). His mother, who suffered from depression, committed suicide when he was 12. He would later explore the repercussions of this event in his memoir [A Tale of Love and Darkness](#).

Oz has published 38 books, among them 13 novels, four collections of stories and novellas, children's books, and nine books of articles and essays (as well as six selections of essays that appeared in various languages), and about 450 articles and essays. His works have been translated into some 42 languages, including Arabic. Oz's political commentary and literary criticism have been published in the Histradrut newspaper [Davar](#) and [Yedioth Ahronoth](#).

Translations of his essays have appeared in the [New York Review of Books](#). The [Ben-Gurion University of the Negev](#) maintains an archive of his work. Oz tends to present protagonists in a realistic light with an ironic touch while his treatment of the life in the kibbutz is accompanied by a somewhat critical tone. Oz credits a 1959 translation of American writer [Sherwood Anderson](#)'s short story collection [Winesburg, Ohio](#) with his decision to "write about what was around me." In [A Tale of Love and Darkness](#), his memoir of coming of age in the midst of Israel's violent birth pangs, Oz credits Anderson's "modest book" with his own realization that "the written world ... always revolves around the hand that is writing, wherever it happens to be writing: where you are is the center of the universe." In his 2004 essay "How to Cure a Fanatic" (later the title essay of a 2006 collection), Oz argues that the Israeli-Palestinian conflict is not a war of religion or cultures or traditions, but rather a real estate dispute — one that will be resolved not by greater understanding, but by painful compromise. I often wonder how mistaken can a genius be, and quoting what his great uncle Joseph Klausner said on Shamir's historical novel, I say: "There may sometimes be a writer who is not a historian, but to such an extent?"

How marvelous it could be if the Israeli-Palestinian conflict was a real estate dispute like our conflict with Egypt, where we evacuated all the territories to the last meter for a peace treaty. Unfortunately the conflict with the Palestinians leaders is **only** a conflict of religion (al-Aqsa is in danger), culture and traditions. A tradition that glorifies death as a Shahid, where children are called Jihad by the hundreds, where mothers are proud to send their children to be shahids as long as they kill as many Jews as they can, a culture that is based on insurmountable hate to the Jews, with a propaganda of incitement, allies in World War II with the Nazis and wanting to adopt their mass murders of Jews when the Germans would have conquered Palestine (Haj Amin al-Huseini was Hitler's ally). The Palestinian leaders are completely opposed to the Western culture of Israel, maintaining a culture which is undemocratic (there is no democracy in Gaza and the West Bank), fundamentalist (Hamas), with oppression of women, minorities, Christians, with no respect to foreigners and their beliefs (Jews have no rights in Jerusalem and the Wailing Wall/[Western Wall](#)/Kotel), teaching their children at school monstrous lies on the Jews, etc. Furthermore, even when Israel withdrew from all the Gaza strip, the Gaza/Hamas launched thousands of rockets into Israel, killing civilians, When we withdrew from most of the West Bank, Arafat's terrorists killed more than a thousand civilians. When we withdrew completely from Lebanon, the Lebanon/Hizballah launched thousands of rockets into Israel, killing civilians, and proving once more that the conflict with the Palestinians and Fundamentalist Islam is not a real estate dispute, but only a conflict of religion, culture, norms, and traditions.

But unfortunately, the peacelovings in Israel, Europe and all over the world, continue to believe in this false mantra. I do not use in my book disparagingly terms unless I think that the terms are justified (actually, all those who use such terms think them justified). When I call Islamic fundamentalist regimes and organizations backing terrorism and hating Jews and Israelis — Nazis, retrograde, Middle Ages, I do it because they use Nazi tactics and terminology, they want to annihilate Israel and the Jews like the Nazis, and really intend to bring us back to the Middle Ages. I never use those terms for those who back them, and occasionally call them anti-Semites or anti-Israelis, because I believe that those are their motivations, and today anti-Semite has become in many places an honorable term and not a pejorative one. Yet, I use the term of peacelovings for all those who are seeking peace unrealistically, although they think that they are realistic. I don't use the pejorative term peacemonger, although quite often they back terrorist and retrograde regimes and organizations such as the Hamas or Hezbollah, seeking to bring us back to the Middle Ages,

when they advocate a "Free" Palestine, oppose the "blockade" of Gaza, condemn Israel for using too much force, accusing us of indiscriminate children killing, when they are in favor of the right of return to five million Palestinians to Israel, when they are boycotting Israel in the sake of justice, they are seeking peace unrealistically as a "Free" Palestine cannot exist as it does not exist in Gaza nor in the West Bank, in fact none of the Arab states are democratic and their population is far from being free. The "blockade" of Gaza has only one purpose – to prevent the Hamas from receiving thousands of rockets from our enemies, and Israel is not preventing food, electricity nor any basic necessities to the people in Gaza.

Israel uses the least excessive force and kill civilians only in cases where rockets are launched from populated neighborhoods or to prevent terrorism. So, if this is peace seeking for them – I believe that it is not realistic. Otherwise, I would call them "peacemakers" who are according to Webster: "one that makes or seeks to make peace esp. by reconciling parties or persons at variance". We have in history thousands of examples of peacemakers as Sadat, Begin, and all those who assisted them. We have also in history thousands of examples of peacelovings as Chamberlain and Daladier and all those who tried to prevent World War II at all cost, bringing a much worse outcome than if the German aggression would have been prevented from the start. The danger with peacelovings is that they are living in an unrealistic world (I would not call it hallucinatory in order not to be pejorative) and are willing to back the worst regimes on earth – the Nazis in the past and the Muslim fundamentalist and terrorists nowadays, including the Palestinian leaders and Iran. This is dangerous as the outcome of their ideology would be disastrous for the world peace. They do not perceive that Israel is the bastion of democracy and Western norms in the Middle East and they back Israelis enemies - dictatures, without human rights, hating Europeans, Jews, Americans. I oppose them but I do not oppose their right to express themselves, as I am a democrat, in favor of free speech for my opponent as for myself.

But what if they back terrorism? Well, we have a judicial system who will discern free speech from incitement, verbal opposition from terrorism. But what if they do it "at the expense of honor" – this is touchy, because it is exactly what the French government and army accused Zola when he backed Dreyfus and accused them. Were Chamberlain and Daladier traitors who acted at the expense of honor of France and the UK? I don't believe so, as I don't believe that Rabin and Peres were acting at the expense of honor when they signed the Oslo agreements. I also don't call Rabin and Peres peacelovings as they really thought that they are bringing peace to Israel, while the outcome of the agreements was war and terror by the terrorists whom we allowed to come back to Palestine. They took a calculated risk, as Begin and Sadat, but history proved that the peace with Egypt persisted, while the peace with the Palestinians collapsed because of the Palestinian (Hamas, Arafat, Abu Mazen) advocacy of war, terrorism, Nazi incitement, and not recognizing Israel's right to exist as a Jewish state. And what about the Israelis organizations and personalities who are today peacelovings, who even advocate boycott to Israel and an imposed solution to the conflict, are they doing it at the expense of honor? When they receive contributions from foreign countries and organizations who oppose Israel and back our enemies, are they honorable? When they call Israelis who oppose them fascists, warmongers, Nazis, are they honorable? I let the reader decide if they are honorable or not, if Brutus and Cassius are all honorable men, and if backing the enemies of Israel is honorable or not. So, is peaceloving a pejorative term or not? I'll say that when I write peaceloving I do not mean to use the term disparagingly but just descriptively for the lack of another neutral term defining them. I don't despise peacelovings nor advocate a ban on them, and I refrain from calling them peacemongers.

Yet, I love very much Amos Oz, his writings, his humanity, I respect his views, and he is entitled to his views no less than Theodorakis or Ken Loach. The book that I like most is a *Tale of Love and Darkness* which captivated me and made me cry, something that almost never happens to me in reading books, watching films, or in life in general. *A Tale of Love and Darkness* ([Hebrew](#): סיפור על אהבה וחושך) is an [autobiographical novel](#) by [Israeli](#) author [Amos Oz](#), first published in [Hebrew](#) in 2002. The book has been translated into 28 languages and over a million copies have been sold worldwide. In 2011, a bootleg Kurdish translation was found in a bookstore in northern Iraq. Oz was reportedly delighted. Probably Oz is less delighted by the fact that Kurdistan is almost fully conquered in a Jihad war by ISIS, the same ISIS, allies of the Palestinian's Hamas and heroes of many West Bank's leaders and population, ISIS that would conquer the West Bank a couple of months after the state of Palestine will be established, as Hamas conquered Gaza and killed thousands of Fatah's activists. There is no difference between Hamas (Gaza), Fatah/PLO (West Bank) and ISIS leadership, as far as religion, culture and tradition are concerned, terror is terror is terror, and today in the West and Israel terror is only Muslim fundamentalist - sorry, American and European peace-lovers, I have learned from Victor Hugo to tell the truth only, even if it is not convenient to some politically correct people, and many anti-Semites pro-boycott fanatics, and I respect Islam, Palestinians, Arabs and Muslims, acknowledging that most of their population is against terror and not fundamentalists as their leaders. But as they don't oppose and condemn their fundamentalist leaders in the Middle East, Europe, Asia, and America, they should not be surprised of the anti-Muslim feelings of many extreme right leaders and their followers in those countries. Muslims in this fundamentalist war, as Germans in the Nazi area, are the first victims of fundamentalism and most of their casualties. And in their case, they keep them poor, ignorant, with terror, war, without progress...

In March 2011, Oz sent imprisoned former [Tanzim](#) leader [Marwan Barghouti](#) a copy of his book *A Tale of Love and Darkness* in Arabic translation with his personal dedication in Hebrew: "This story is our story, I hope you read it and understand us as we understand you, hoping to see you outside and in peace, yours, Amos Oz". The gesture was criticized by members of rightist political parties, among them Likud MK [Tzipi Hotovely](#). [Assaf Harofeh Hospital](#) canceled Oz's invitation to give the keynote speech at an awards ceremony for outstanding physicians in the wake of this incident. Oz chronicles his childhood in [Jerusalem](#) at the end of the [British Mandate for Palestine](#) and the early years of the State of Israel, and his teenage years on [Kibbutz Hulda](#). As a child, he crossed paths with prominent figures in Israeli society, among them [Shmuel Yosef Agnon](#), [Shaul Tchernichovsky](#), and [David Ben-Gurion](#). One of his teachers was the Israeli poet [Zelda](#). [Joseph Klausner](#) was his great-uncle. Told in a non-linear fashion, Oz's story is interwoven with tales of his family's [Eastern European](#) roots. The family's name was Klausner. By changing the name to a Hebrew one, Oz rebelled against that European background while affirming loyalty to the land of his birth. The epic tragedy of the book is in the suicide of the boy's mother, while the anguish builds in crescendo throughout the book until we read the last page when the mother kills herself. It is read like a detective story where you find only at the end who was the murderer – here we find only at the end how the young boy's mother committed suicide, murdering his youth, murdering his father's hopes, making you cry as you feel that you are the little boy, forcing you to read five times this chapter in order to understand it as you cried in the first time, were so emotioned in the second time, remembered tragic events that you encountered in your life in the third time, starting to grasp the horror of the situation but not yet all its scope in the fourth time. The novel is one of the best books that I have ever read and the best book in Hebrew literature to my opinion. When I decided to write my book, I hesitated between a standard or non standard autobiography, like Charlie Chaplin's, Lee Kuan Yew's, Charles de Gaulle's, or

Amos Oz's autobiography – all of them excellent autobiographies written in different styles and formats. But then I understood that I have not the stature of any of them, and have not achieved even 1% of what they have achieved. I knew that I could not interest and move my readers as the other biographers, and in no way arrive even to a fraction of the emotions of Oz's book, the admiration of Chaplin's book, the historical scope of De Gaulle's book, and the personal story of Lee Kuan Yew. So, I opted for an autobiography that would bring small stories from my life appearing in the relevant chapters of linguistics, literature, history, plays, business ethics, and so on. So, it is not a standard biography in a chronological order but rather on the basis of stream of consciousness in the relevant context, as my life is not so interesting as Charlie Chaplin's, not so tragic as *les gens heureux n'ont pas d'histoire*, or as in the first sentence of Tolstoy's *Anna Karenina* – Happy people don't have a history, which is all alike, while unhappy people's history is very interesting and differs from each other. But what I have to say on all the topics of my autobiography can interest very much the reader or at least the intellectual reader, as it deals with universal subjects as literature, drama, linguistics, with thousands of links to books, plays, classical music, songs, paintings, biographies, conflicts, etc.

When Amos Oz starts his autobiography I thought that he was writing mine. "I was born and bred in a tiny, low-ceilinged ground-floor apartment. My parents slept on a sofa bed that filled their room almost from wall to wall when it was opened up each evening. Early every morning they used to shut away this bed into itself, hide the bedclothes in the chest underneath, turn the mattress over, then scatter a few embroidered oriental cushions on top, so that all evidence of their night's sleep disappeared. In this way their bedroom also served as a study, library, dining room, and living room. Opposite this room was my little green room, half taken up with a big-bellied wardrobe. A narrow, low passage, dark and slightly curved, like an escape tunnel from a prison, linked the little kitchenette and toilet to these two small rooms. A lightbulb imprisoned in an iron cage cast a gloomy half-light on this passage even during the daytime." Well, this is almost exactly our apartment, which I described in my diary almost word by word. The same tiny apartment but not on a ground-floor, on the fourth floor without elevator. My parents slept on a small sofa, with a few oriental cushions on top. Their bedroom served also as a study, library (my father had a huge library, much larger than their tiny sofa), dining room, and living room. I made my homeworks on the table which served of course also as a dining table, and the study table. I describe in my diary in a couple of pages the shabby tablecloth of the unstable table. The same narrow, dark, and low passage. The same room where I could only sleep (with my brother) as it was half taken up with a big-bellied wardrobe, and on top of it – the huge suitcases, that were useless as we never travelled anywhere. Books filled his home – books filled our home, but also a collection of thousands bounded newspapers on shelves all over the tiny two-room apartment, rendering the rooms and passage even narrower. His parents spoke many languages, my parents also. Oz writes: "On my parents' scale of values, the more Western something was, the more cultural it was considered. Europe for them was a forbidden promise land." This sentence applies also to my parents, but what is worse – my parents worshipped European culture and values while they almost never lived or even visited them, living all their lives in Turkey (my father, although at the age of 16 he sold for six months newspapers in Milano, Italy), in Egypt (except for a week stopover in Marseilles in our trip from Egypt to Israel), and in Israel.

נולדתי וגדלתי בדירת־קרקע קטנה מאוד, נמוכת תקרה, כשלושים מטרים רבועים: הורי ישנו על ספת־מגירה שהיתה ממלאת את חדרם כמעט מקיר לקיר כאשר נפתחה מדי ערב. השכם בבוקר היו מדחיקים את הספה הזאת עמוק אל תוך עצמה, מעלימים את כלי המיטה בחשכת הארגז התחתון, הופכים את המזרון, סוגרים, מהדקים, פורשים על הכול כיסוי אפור בהיר, מפזרים כמה כריות מזרחיות רקומות, מעלימים כל ראייה לשנת הלילה שלהם.

כך שימש חדרם גם חדר שינה גם חדר עבודה גם ספרייה גם חדר אוכל וגם חדר אורחים.

מול החדר הזה היה החדרון שלי, הירקרק, שאת חצי שטחו מילא ארון בגדים עב־כרס. פרוזדור אפל צר ונמוך, מפותל קצת, דומה למנהרת בורחי כלא, חיבר את המטבחון ואת כוך השירותים אל שני החדרים הקטנים. נורה קלושה שנכלאה בתוך כלוב ברזל שפכה על הפרוזדור הזה גם בשעות היום אור־לא־אור עכרורי. מלפנים היה רק חלון אחד לחדר הורי וחלון אחד לחדרי, שניהם מוגנים בתריסי ברזל, שניהם מתאמצים במצמוץ תריסים להשקיף מזרחה אך רואים רק ברוש מאובק וגדר של אבנים לא מסותתות. דרך אשנב מסורג הציצו המטבח והשירותים שלנו אל חצר אסירים קטנה מוקפת קירות גבוהים ומרוצפת בטון, חצר שבה הלך וגסס באין אף קרן שמש גרניום חיזור שנשתל בתוך פח זיתים חלוד. על אדני האשנבים עמדו אצלנו תמיד צנצנות חתומות ובהן מלפפונים נכבשים וכן קקטוס קשה־יום מחופר לו באדמת אגרטל שנסדק והוסב לשרת בתפקיד עציץ.

היתה זו דירה מרתפית: קומת־הקרקע של הבניין נחצבה אל תוך צלע הר. ההר הזה היה השכן שלנו שמעבר לקיר - שכן כבד, מופנם וחרישי, הר קשיש ומלנכולי בעל הרגלי רווק קבועים, תמיד הקפיד על שקט גמור, הר מנומנם כזה, חורפי, אף פעם לא גרר רהיטים לא קיבל אורחים לא הרעיש ולא הטריד, אבל דרך שני הקירות המשותפים לו ולנו היו מחלחלים אלינו תמיד, כמו ריח־עובש קל ועקשן, הקור החושך הדומייה והלחות של השכן העגמומי הזה. כך יצא שלכל אורך הקיץ היה נשמר אצלנו קצת חורף. אורחים היו אומרים: כל־כך נעים אצלכם ביום שרב, כל־כך קריר ורועע, ממש צונן, אבל איך אתם מסתדרים כאן בחורף? מה, הקירות לא מעבירים טחב? לא קצת מדכא כאן בחורף? *

שני החדרים, כוך המטבחון, השירותים ובייחוד הפרוזדור שביניהם היו חשוכים. הספרים מילאו אצלנו את כל הבית: אבי ידע לקרוא בשש־עשרה או בשבע־עשרה לשונות ולדבר באחת־עשרה (כולן במבטא רוסי). אמי דיברה בארבע או חמש שפות וקראה בשבע או שמונה. הם היו משוחחים ביניהם ברוסית ובפולנית כשרצו שלא אבין (רוב הזמן רצו שלא אבין. כשאמא טעתה פעם ואמרה בנוכחותי סוס הרבעה בעברית במקום בלועזית, גער בה אבא ברוסית זועפת: שְׁטוּ! שְׁטוּ! ויָדֵשׁ מֵלִצ'יק ריאדום ס נאמי!). מתוך שיקולי תרבות הם קראו ספרים בעיקר בגרמנית ובאנגלית, את חלומותיהם בלילה ודאי חלמו בידיש. אבל אותי לימדו אך ורק עברית: אולי חששו שידעת שפות תחשוף גם אותי לפיתוייה של אירופה הנהדרת והקטלנית.

בסולם־הערך של הורי, כל מה שהיה מערבי יותר נחשב לתרבותי יותר: טולסטוי ודוסטויבסקי היו קרובים לנפשם הרוסית, ובכל זאת נדמה לי שגרמניה - למרות היטלר - נראתה להם תרבותית יותר מאשר רוסיה ופולין! צרפת - יותר מאשר גרמניה. אנגליה עמדה בעיניהם אף למעלה מצרפת. אשר לאמריקה - שוב לא היו כה בטוחים: שם הלוא יורים באינדיאנים, שודדים רכבות דואר, גורפים זהב וצדים בחורות.

אירופה היתה להם ארץ מובטחת אסורה, מחוז־כיסופים של מגדלי פעמונים ושל כיכרות מרוצפות באריחי אבן עתיקים, של חשמליות רחוב ושל גשרים וצריחי כנסיות, כפרים נידחים, מעיינות מרפא, יערות, שלגים ואחו. המילים "בקתה", "אחו", "רועת אווזים", פיתו וריגשו אותי כל ימי ילדותי. היה בהן ניחוח חושני של עולם אמיתי, שאנן, רחוק מגגות הפח המאובקים, ממגרשי הגרוטאות והקוצים ומן המדרונות הצחיחים של ירושלים הנחנקת תחת עול הקיץ המלוכלך. די היה ללחוש לעצמי "אחו" - וכבר הייתי שומע את געיית הפרות שפעמונים קטנים קשורים לצוואריהן ואת פכפוף הפלגים. בעיניים עצומות הייתי מביט ברועת האווזים היחפה, שהיתה לי סקסית עד דמעות עוד לפני שידעתי כלום.

And a few excellent quotes from the book, that I concur with them fully, as if I've written them:

"Once, when I was seven or eight, my mother said to me, as we sat on the last seat but one on the bus to the clinic, or the shoe shop, that while it was true that books could change with the years just as much as people could, the difference was that whereas people would always drop you when they could no longer get any advantage or pleasure or interest or at least a good feeling from you, a book would never abandon you. Naturally you sometimes dropped them,

maybe for several years, or even forever. But they, even if you betrayed them, would never turn their backs on you: they would go on waiting for you silently and humbly on their shelf. They would wait for ten years. They wouldn't complain. One night, when you suddenly needed a book even at three in the morning, even if it was a book you had abandoned and erased from your heart for years and years, it would never disappoint you, it would come down from its shelf and keep you company in your moment of need. It would not try to get its own back or make excuses or ask itself if it was worth its while or if you deserved it or if you still suited each other, it would come at once as soon as you asked. A book would never let you down." How true, All My Friends...

"There are lots of women who are attracted to tyrannical men. Like moths to a flame. And there are some women who do not need a hero or even a stormy lover but a friend. Just remember that when you grow up. Steer clear of the tyrant lovers, and try to locate the ones who are looking for a man as a friend, not because they are feeling empty themselves but because they enjoy making you full too. And remember that friendship between a woman and a man is something much more precious and rare than love: love is actually something quite gross and even clumsy compared to friendship. Friendship includes a measure of sensitivity, attentiveness, generosity, and a finely tuned sense of moderation." And what happens if you are lucky enough to find in a wife or a husband – love, affection, friendship, kindness, common grounds, chemistry...

"If you steal from one book you are condemned as a plagiarist, but if you steal from ten books you are considered a scholar, and if you steal from thirty or forty books, a distinguished scholar." When I read the academic tedious articles quoting from 30 or 40 books, he is so right...

Benjamin Tammuz ([Hebrew](#): בנימין תמוז) (July 11, 1919 – July 19, 1989) was an [Israeli](#) writer and artist who contributed to [Israeli culture](#) in many disciplines, as a novelist, journalist, critic, painter, and sculptor. Benjamin Tammuz was born in [Soviet Russia](#). When he was five years old, he emigrated with his parents to Palestine, where he subsequently attended the Tachkemoni school and the [Herzliya Hebrew High School](#) in [Tel Aviv](#). From an early age, he engaged in writing, sculpture, and painting. He also took an avid interest in [art history](#), going on to study that subject at the [Sorbonne](#) in [Paris](#). While growing up, he became a member of the [Communist](#) underground. As a youth he was a member of the [Canaanite movement](#). More than his teachers and friends, the artist [Yitzhak Danziger](#) was an influence on him. In 1948, Tammuz joined the editorial board of [Haaretz](#). At first he wrote the popular column "Uzi & Co." Later he edited the children's newspaper *Haaretz Shelanu*. From 1965, he edited *Haaretz's* literary and cultural supplement, serving as the art critic there. From 1971 to 1975, he served as cultural attaché at the Israeli embassy in [London](#). From 1979 to 1984, he was invited as a writer-in-residence at [Oxford University](#). Benjamin Tammuz died in 1989 in Tel Aviv. I like Tammuz so much because he is a most modern author, I have read and reread all his books, and each time I enjoy them more.

- *A Castle in Spain* (1973), translation of *Be-Sof Ma'arav* (1966)
- *A Rare Cure* (stories, 1981), translation of *Angioxyl, Terufah Nedirah* (1973)
- *Minotaur* (1981), translation of the Hebrew-language novel of the same title (1980)
- *Requiem for Na'aman* (1982), translation of *Requiem Le-Na'aman* (1978)
- *The Orchard* (novella, 1984), translation of *Ha-Pardes* (1972)
- *Minotaur* was a novel by [Benjamin Tammuz](#) first published in English translation in 1981. The novel is a story of love and obsession with tragic consequences. [Graham](#)

[Greene](#) declared that it was the "novel of the year" following its publication. The novel was made into a film of the same name in 1997 with director Jonathan Tammuz.

We bring here a review on "Minotaur" by Dan Coxon. I am really astonished how Israeli authors have become so popular all over the world and were translated in dozens of languages. How people who know nothing about Israel can identify themselves with the Israeli content of the books. The Israeli books and films have become the best ambassadors of Israel in the world.

Given its reissue as part of Europa's World Noir series, you'd be forgiven for dismissing *Minotaur* as a genre mystery story, or an overworked Police procedural. Even its cover blurb, with its talk of secret agents and John le Carré, encourages us to see it as a mainstream thriller. Nothing could be further from the truth. In his second novel, originally published in Hebrew in 1980, Tammuz instead attempts to map out a fragmentary love story. Along the way it also asks how much we truly know about the people we meet, and questions the false narratives that we build around them. The novel opens with an unnamed protagonist – "A man, who was a secret agent" – watching two girls on a bus. They are seventeen, he is forty-one. In an instant he falls in love with one of the girls, Thea. So begins one of the most unlikely wooings in modern fiction. Our protagonist cannot reveal himself, so he writes to Thea and sends her records to play in the privacy of her room. He manipulates her even as he overwhelms her with his expressions of love. There are undertones of obsession, of sexual predation. His love seems too unreasonable to be genuine. Then something strange happens. Tammuz races abruptly through Thea's story, ending with what appears to be the secret agent's death – and then he rewinds. The story resets to the beginning. This time it's told from the point of view of another of Thea's suitors, a privileged fellow student known as G.R. And just when you're getting to grips with that, he does it again, pulling the rug from beneath us as he switches to yet another of her lovers, the Greek lecturer Nikos. With each telling of the story more of the details are revealed. The narrative peels back layer after layer, revealing a complex tangle of motives and actions. As we come to understand each character more fully, so we review and decode earlier scenes. With repeat readings comes an appreciation of the multi-dimensional nature of *Minotaur*'s labyrinth.

If this seems a lot to achieve in a mere 192 pages, then Tammuz's ongoing themes will also come as a surprise. He attaches the narrative to the history of Israel itself, making his secret agent a cipher for all the troubles the Middle East has endured over the last seventy years. The character acknowledges this: "Who am I? ...What was once my private experience has now become collective experience. Formerly I was the only one out of all the children of Israel to wrestle with the Arab at his own private ford Jabok and emerge a sort of Pyrrhic victor. Now all the children of Israel are partners in this folly". The question of identity, and how it is formed, recurs through each of the narratives. The secret agent repeatedly asks "Who am I?" or "Do I really love her?". His questions and uncertainty make James Bond look like a Nietzschean superman. In many ways *Minotaur* reads as a collection of interconnected stories. Each occupies a world of international intrigue and sudden, explosive violence. To read it in this way is to miss the overarching narrative, however, and its uniquely fractured view of one girl's life and loves. Tammuz does more than simply tell a story. He questions the very nature of storytelling, exposing the lies we tell ourselves as we imagine narratives for the people who surround us. Rather than le Carré, his debt is to Kafka, and Fowles, and Faulkner. He makes us rethink the way we view literature, and compels us to read and re-read his work in an attempt to navigate the complex maze he has created. Ignore the secret agent at its core,

and the sequence of car crashes and gunshots that punctuate it – this is no genre thriller. *Minotaur* is a minor modern classic, and a bold exploration of what it means to be a storyteller. Maybe that's the greatest mystery of all.

We bring here the first chapter of *Minotaur* in English and in Hebrew. One of the main problems of an author is how to start his book, how to captivate the reader, convincing him to read more of the book – all the book. I deal on this issue at length in my book, when I bring in many instances the first chapter, page, or sentence of a book. I imagine that this subject preoccupies every author, Benjamin Tammuz does it perfectly in his book *Minotaur*, as we'll see right away. Tolstoy does it perfectly in his novel *Anna Karenina* – his first sentence has become a classic, and I write about it in my Russian chapter. Jorge Amado kills his protagonist in the first sentence of the book, breaking one implicit law that you can't do that, but don't worry he remains alive at least in the mind of Dona Flor, as I explain in my Portuguese chapter. Emile Zola is a professional, captivating you in each one of his books with the first chapter. With me, it came in a stream of consciousness, when the protagonists of my play/novel dictated to me what do write – and I did in a synopsis of 60 pages written in 24 hours, when developing it to a five acts play was very easy – typing it in 18 days without changing almost anything from the synopsis. So, let us see how Tammuz does it, in a short chapter, when all the plot is brought forward in a nutshell.

"A man, who was a secret agent, parked his hired car in a rain-drenched square and took a bus into town. That day he had turned forty-one, and as he dropped into the first seat he came across, he closed his eyes and fell into bleak contemplation of his birthday. The bus pulled up at the next stop, jerking him back to consciousness, and he watched as two girls sat down on the empty seat in front of him. The girl on the left had hair the color of copper – dark copper with a glint of gold. It was sleek and gathered at the nape of her neck with a black velvet ribbon, tied in a cross-shaped bow. This ribbon, like her hair, radiated a crisp freshness, a pristine freshness to be found in things as yet untouched by a fingering hand. Whoever tied that ribbon with such meticulous care? Wondered the man of forty-one. Then he waited for the moment when she would turn her profile to her friend, and when she turned to her friend and he saw her features, his mouth fell open in a stifled cry. Or did it perhaps escape from his mouth? Anyway, the passengers did not react."

"איש אחד, שהיה סוכן חשאי, החנה את מכוניתו השכורה בכיכר רטובה מגשם ונכנס לאוטובוס הנוסע אל העיר.

באותו יום מלאו לו ארבעים ואחת שנים, ובצנחו אל המושב הראשון שנזדמן לו עצם את עיניו ושקע בהרהורים שוממים על טיבו של יום ההולדת שלו. עצירת האוטובוס בתחנה הבאה העירה אותו ממנומו והוא ראה שתי נערות מתיישבות בספסל הפנוי שלפניו. לנערה שמשמאל היו שערות שצבען כעין הנחושת: נחושת כהה, נוצצת בברק זהב. שערותיה היו חלקות ואסופות על עורפה בתוך סרט-קטיפה שחור, שנקשר בעניבה מצולבת. הסרט, כמו השערות, התנכר בנקיון רענן, אותו סוג נקיון ראשוני המצוי בדברים שהיד הממששת עדיין לא נגעה בהם. מי קשר את הסרט בקפידה כזאת לעורפה, חשב האיש בן הארבעים ואחת. אחר כך חיכה לרגע שבו תפנה אל חברתה את צדודית פניה; וכשפנתה אל חברתה והוא ראה את תווי הפנים, נפער פיו לצעקה, שהוחנקה באבה. ואולי אפילו נמלטה מפיו. הנוסעים, מכ מקום, לא הגיבו."

And what have literary agents to say about the opening chapter of a novel, let us see it also:

"I don't like it when the main character dies at the end of Chapter One. Why did I just spend all this time with this character? I feel cheated."

– **Cricket Freeman**, *The August Agency*

“I dislike opening scenes that you think are real, then the protagonist wakes up. It makes me feel cheated.”

– **Laurie McLean, Foreword Literary**

“I’m not a fan of prologues, preferring to find myself in the midst of a moving plot on page one rather than being kept outside of it, or eased into it.”

– **Michelle Andelman, Regal Literary**

“Prologues are usually a lazy way to give back-story chunks to the reader and can be handled with more finesse throughout the story. Damn the prologue, full speed ahead!”

– **Laurie McLean, Foreword Literary**

“Perhaps my biggest pet peeve with an opening chapter is when an author features too much exposition – when they go beyond what is necessary for simply ‘setting the scene.’ I want to feel as if I’m in the hands of a master storyteller, and starting a story with long, flowery, overly-descriptive sentences (kind of like this one) makes the writer seem amateurish and the story contrived. Of course, an equally jarring beginning can be nearly as off-putting, and I hesitate to read on if I’m feeling disoriented by the fifth page. I enjoy when writers can find a good balance between exposition and mystery. Too much accounting always ruins the mystery of a novel, and the unknown is what propels us to read further.”

– **Peter Miller, PMA Literary and Film Management**

“I dislike endless ‘laundry list’ character descriptions. For example: ‘She had eyes the color of a summer sky and long blonde hair that fell in ringlets past her shoulders. Her petite nose was the perfect size for her heart-shaped face. Her azure dress — with the empire waist and long, tight sleeves — sported tiny pearl buttons down the bodice. Ivory lace peeked out of the hem in front, blah, blah.’ Who cares! Work it into the story.”

– **Laurie McLean, Foreword Literary**

“Characters that are moving around doing little things, but essentially nothing. Washing dishes & thinking, staring out the window & thinking, tying shoes, thinking.”

– **Dan Lazar, Writers House**

“I don’t really like ‘first day of school’ beginnings, ‘from the beginning of time,’ or ‘once upon a time.’ Specifically, I dislike a Chapter One in which nothing happens.”

– **Jessica Regel, Foundry Literary + Media**

“Someone squinting into the sunlight with a hangover in a crime novel. Good grief — been done a million times.”

– **Chip MacGregor, MacGregor Literary**

“Cliché openings in fantasy can include an opening scene set in a battle (and my peeve is that I don’t know any of the characters yet so why should I care about this battle) or with a pastoral scene where the protagonist is gathering herbs (I didn’t realize how common this is).”

– **Kristin Nelson, Nelson Literary**

“I know this may sound obvious, but too much ‘telling’ vs. ‘showing’ in the first chapter is a definite warning sign for me. The first chapter should present a compelling scene, not a road map for the rest of the book. The goal is to make the reader curious about your characters, fill their heads with questions that must be answered, not fill them in on exactly where, when,

who and how.”

– **Emily Sylvan Kim**, Prospect Agency

“I hate reading purple prose – describing something so beautifully that has nothing to do with the actual story.”

– **Cherry Weiner**, Cherry Weiner Literary

“A cheesy hook drives me nuts. They say ‘Open with a hook!’ to grab the reader. That’s true, but there’s a fine line between an intriguing hook and one that’s just silly. An example of a silly hook would be opening with a line of overtly sexual dialogue.”

– **Daniel Lazar**, Writers House

“I don’t like an opening line that’s ‘My name is...,’ introducing the narrator to the reader so blatantly. There are far better ways in Chapter One to establish an instant connection between narrator and reader.”

– **Michelle Andelman**, Regal Literary

“Sometimes a reasonably good writer will create an interesting character and describe him in a compelling way, but then he’ll turn out to be some unimportant bit player.”

– **Ellen Pepus**, Signature Literary Agency

“In romance, I can’t stand this scenario: A woman is awakened to find a strange man in her bedroom — and then automatically finds him attractive. I’m sorry, but if I awoke to a strange man in my bedroom, I’d be reaching for a weapon — not admiring the view.”

– **Kristin Nelson**, Nelson Literary Agency

Hayim Nahman Bialik ([Hebrew](#): חיים נחמן ביאליק; January 9, 1873 – July 4, 1934), also **Chaim** or **Haim**, was a [Jewish poet](#) who wrote primarily in [Hebrew](#) but also in [Yiddish](#). Bialik was one of the pioneers of modern Hebrew poetry. He was part of the vanguard of Jewish thinkers who gave voice to the breath of new life in Jewish life. Bialik ultimately came to be recognized as [Israel's national poet](#). In 1903 Bialik was sent by the Jewish Historical Commission in Odessa to interview survivors of the [Kishinev pogroms](#) and prepare a report. In response to his findings Bialik wrote his epic poem *In the City of Slaughter*, a powerful statement of anguish at the situation of the Jews. Bialik's condemnation of passivity against anti-Semitic violence is said to have influenced the founding Jewish self-defense groups in the Russian Empire, and eventually the [Haganah](#) in [Palestine](#). Bialik visited Palestine in 1909. In the early 20th century, Bialik founded with Ravnitzky, Simcha Ben Zion and Elhanan Levinsky, a Hebrew publishing house, *Moriah*, which issued Hebrew classics and school texts. He translated into Hebrew various European works, such as [Shakespeare's](#) *Julius Caesar*, [Schiller's](#) *Wilhelm Tell*, [Cervantes' Don Quixote](#), and [Heine's](#) poems; and from Yiddish [S. Ansky's](#) *The Dybbuk*.

Bialik wrote several different modes of poetry. He is perhaps most famous for his long, nationalistic poems, which call for a reawakening of the Jewish people. However no less effective are his passionate love poems, his personal verse or his nature poems. Last but not least, Bialik's songs for children are a staple of Israeli nursery life. From 1908 onwards, he wrote mostly prose. By writing his works in Hebrew, Bialik contributed significantly to the revival of the [Hebrew language](#), which before his days existed primarily as an ancient, scholarly tongue. His influence is felt deeply in all modern Hebrew literature. The generation of Hebrew language poets who followed in Bialik's footsteps, including [Jacob Steinberg](#) and

[Jacob Fichman](#), are called "the Bialik generation". To this day, Bialik is recognized as Israel's national poet. Bialik's poems have been translated into at least 30 languages, and set to music as popular songs. These poems, and the songs based on them, have become an essential part of the education and culture of modern Israel. Bialik wrote most of his poems using "Ashkenazi" pronunciation, while modern Israeli Hebrew uses the Sephardi pronunciation. Consequently, Bialik's poems are rarely recited in the meter in which they were written. In many poems Bialik depicted the suffering of his people, but he also could ridicule the weakness and passivity of his fellow intellectuals.

**You have not changed, you're antic old,
There's nothing new I think;
Friends, let me join your club, well rot
Together till we stink.**

(from 'On My Return')

With his call for a reawakening and modernization of language Bialik deeply influenced the Renaissance period of Hebrew literature on its way from Europe to Palestine. We bring here the first part of H.N. Bialik, "The City of Slaughter" in *Complete Poetic Works of Hayyim Nahman Bialik*, Israel Efros, ed. (New York, 1948): 129-43 (Vol. I)

ARISE and go now to the city of slaughter;
Into its courtyard wind thy way;
There with thine own hand touch, and with the eyes of thine head,
Behold on tree, on stone, on fence, on mural clay,
The spattered blood and dried brains of the dead.
Proceed thence to the ruins, the split walls reach,
Where wider grows the hollow, and greater grows the breach;
Pass over the shattered hearth, attain the broken wall
Whose burnt and barren brick, whose charred stones reveal
The open mouths of such wounds, that no mending
Shall ever mend, nor healing ever heal.
There will thy feet in feathers sink, and stumble
On wreckage doubly wrecked, scroll heaped on manuscript,
Fragments again fragmented—
Pause not upon this havoc; go thy way.
The perfumes will be wafted from the acacia bud
And half its blossoms will be feathers,
Whose smell is the smell of blood!
And, spiting thee, strange incense they will bring—
Banish thy loathing—all the beauty of the spring,
The thousand golden arrows of the sun,
Will flash upon thy malison;
The sevenfold rays of broken glass
Over thy sorrow joyously will pass,
For God called up the slaughter and the spring together,—
The slayer slew, the blossom burst, and it was sunny weather!

A few words on translation. I deal extensively in my book on translation issues, because it is almost impossible to find a good translator, least of all a translation of poetry. I'll give here some remarks that illustrate the complexity of the matter, distorting completely the meaning. Let us start from the end. The last line is translated by: "The slayer slew, the blossom burst,

and it was sunny weather!" I understand why he did it, because of the rhyme, but I prefer that the translation would not be in rhymes and would not distort the meaning of the poet. Because the poet says here a completely different thing, that since my high school days, a long long time ago, I still remember as the summit of poetry. Bialik juxtaposes the lyrical pastoral description of the blossom burst and the sunny weather with the horror of the slayer slew, and this should be the sequence of the translation, as Bialik wrote in Hebrew: "The sun was shining, the acacia was blooming, and the slayer slew." This is poetry at its best, and the translation is only a bleak transcription. But even more, when you read the Hebrew original you are shocked, you feel the anguish, the suspense rises in crescendo, you sense the horror, you see the dead, you watch the atrocity, you pity the victims. But when you read the English translation, it is like reading a grocery list, a Waze itinerary, all in verse, in perfect English, but with no soul, no emotion!

בְּעִיר הַהֲרָגָה (בֵּית ראשון)

קוים לך לך אל עיר ההרגה ובאת אל-התצרות,
 ובעיניך תראה וביןך תמשש על-הגדרות
 ועל העצים ועל האבנים ועל-גבי טיח הכתלים
 את-הדם הקרוש ואת-המח הנקשה של-התללים.
 ובאת משם אל-התרחבות ופסקת על-הפרצים
 ועברת על-הכתלים הנקובים ועל התנורים הנמצים,
 במקום העמיק קרקר המפץ, הרחיב הגדיל החורים,
 מחשף האבן השחורה וערות הלבנה השרופה,
 והם נראים כפיות פתוחים של-פצעים אנושים ושוחרים
 אשר אין להם תקנה עוד ולא-תהי להם תרופה,
 וטבעו רגליך בנוצות והתנגפו על תלי-תלים
 של-שברי שברים ורסיסי רסיסים ותבוסת ספרים וגוילים,
 כליון עמל לא-אנוש ופרי משנה עבודת פרו;
 ולא-תעמד על-ההרס ועברת משם הדרך –
 ולבלבו השטים לנגדה וזלפו באפך בשמים,
 וציציתו חצים נוצות וריחו כריח דמים;
 ועל-אפך ועל-חמתך תביא קטרמן הנזה
 את-עדנת האביב בלבבך – ולא-תהי לך לזרא;
 וברבבות חצי זהב יפלח השמש כבדך
 ושבע קרנים מכל-רסיס וכוכית תשמחנה לאידך,
 כי-קרא אדני לאביב ולטבח גם-יחד:
 השמש ורחק, השטה פרחק והשוטט שחט.

THOUGHTS ABOUT THE CONTRIBUTION OF JEWS TO EUROPEAN LITERATURE IN THE TWELFTY 1820-1939

Whether I write as Jacque Corot or Jacques Cory it is impossible to survey the literature in the twelfty 1820-1939 without mentioning the contribution of Jews to European and American culture and especially to literature. I would not deal on this issue if it was not for the anti-Semitism which was preponderant in this twelfty and in those countries. Israel didn't exist, yet Jews were persecuted, and immediately after this twelfty six million Jews, almost all the European Jews, were massacred in the Holocaust by the Germans and their aides. Jews and converted Jews contributed out of proportionally to culture, literature, business and finance in Paris, France & Europe. Did it provoke fear, jealousy, hate, inferiority/superiority complexes?

King Solomon, the wisest man in history, said "Don't be right often". Many wise men have argued that a main reason of anti-Semitism is Jewish boast. Don't speak too much about Judaism, God forbid that the "gentiles" would think that the Jews excel in all what they do, they believe anyhow that the world is run by Jewish money, and that Jews are "everywhere" – in law, in economics, in literature, in arts, in music, in business, "they are at the forefront of capitalism and communism, they own the press, the theaters, the film industry, and they prevent the Christians and Muslims to thrive" are convinced the anti-Semites, but is it true?

Jews have won [22% of Nobel Prizes](#) (see link). Nobel Prizes have been awarded to over 850 individuals, of whom at least 22%, almost 200, (without peace prize over 24%) were [Jews](#), although Jews comprise less than 0.2% of the world's population (or 1 in every 500 people). Overall, Jews have won a total of 41% of all the Nobel Prizes in Economics, 28% in Medicine, 26% in Physics, 19% in Chemistry, 13% in Literature and 9% of all Peace awards. Yet they are only 0.2% of the world population, or 1% of the Western world. The West has won 90% of the prizes, which is also out of proportions in comparison to the world population. The Jews "should" have won (if the prizes were distributed proportionately and not qualitatively) out of the 112 Literature laureates 1 prize and not 14, which is 1 of 8, or 12.5% of all laureates, however they received: Paul Heyse (Germany, 1910), Henri Bergson (France, 1927), Boris Pasternak (USSR, 1958), Shai Agnon (Israel, 1966), Nelly Sachs (Sweden, 1966, wrote in German), Saul Bellow (US, 1976), Isaac Bashevis Singer (US, 1978, wrote in Yiddish), Elias Canetti (UK/born in Bulgaria, 1981, lived also in Germany, Austria and Switzerland, wrote in German), Joseph Brodsky (US, 1987, wrote in Russian), Nadine Gordimer (South Africa, 1991, wrote in English), Imre Kertesz (Hungary, 2002), Elfriede Jelinek (Austria, 2004), Harold Pinter (UK, 2005), Patrick Modiano (France, 2014). And this is if we extend the survey beyond the twelfty of 1820-1939, as these trends have continued.

In this survey I showed how about half of the most prominent German language authors in the 20th century were Jewish, and they operated mainly in the first half of the century, as they left Germany when Hitler came into power. We'll see in this chapter the important contribution of American, British, French, and Russian Jewish authors to the literature of their countries. And this is only literature, but Jews contribute also in Economics with more than 40% of the prizes won by Jews, or Sciences with more than 25%, these achievements may cause envy.

So, why brag? Why speak about topics that are taboos? Why not be politically correct and play down/conceal the origin of the authors/economists/scientists, like the French Jews excel so well? Decades after the end of the twelfty, right wing and left wing intellectuals,

academics, and just common people old-school anti-Semites, have joined the plunder, the "Alayhum", reviving the [Hep-Hep Riots](#) of the 19th and 20th centuries, reminding us of the worst times of the Middle Ages and the hatred of Jews in Spain, Portugal and other European countries from this epoch until "yesterday". Their aim is to kill Jews, boycott them, delegitimize Israel and the Jews; and large segments of the public sympathize the aggressors, the terrorists, the killers and not the victims. In this extreme situation, it is of the utmost importance to emphasize the huge contribution of the Jews to the world, the economy, business, the culture in literature, music, philosophy, psychology, economics, sciences, art...

In this extremely pervasive, perverse, and defamatory situation we have to compare what is the contribution of the Jews to humanity and to their homelands in all the fields of culture and economy and the contribution of all the anti-Semites who want to boycott the Jews and exterminate the Jews. We have to compare one by one the achievements of the anti-Semites individuals and nations and the achievements of the Jews and Israel – in literature, economy, business, art, theater, films, music, philosophy, psychology, technology, sciences, innovation, high tech, agriculture, even sports..., peace..., as opposed to the contribution of the Jews slanderers in wars starting with World War II, launched by the worst anti-Semite in world history Hitler, terror, breaches of human rights, gender inequality, GDP, ethics, corruption, participation of the population in the riches of the countries – oil..., household income, income inequality, poverty, civil wars, external debt. Who contributed more in human development, sustainability, health, education, social welfare, quality of life, economic dynamism, political environment, democracy, freedom, press freedom, economic freedom, social progress, productivity, competitiveness, financial development, credit rating, universities rating, distribution of wealth, globalization. When we compare those parameters we would get the answer on the causes of anti-Semitism – most of all envy and complexes.

How would the world look like without (link to [List of Jews](#)) the German scientist Einstein, the Austrian psychiatrist Freud, the authors: French Andre Maurois, Marcel Proust, Joseph Kessel, American Arthur Miller, David Mamet, Clifford Odets, Russian Boris Pasternak, British Pinter, Czech Kafka, German Heine, Israeli Agnon, the Italian painter Modigliani and Russian painter Marc Chagall, the composers Mendelssohn, Offenbach, Mahler, Meyerbeer, Kreisler, Darius Milhaud, Gershwin, Irving Berlin, Kurt Weill, Schoenberg, Leonard Bernstein, Elmer Bernstein, Aaron Copland, Stephen Sondheim, Jerome Kern, Bob Dylan, Oscar Hammerstein, Serge Gainsbourg, Joseph Kosma, Marvin Hamlisch, Francis Lemarque, the jazz musicians Burt Bacharach, Benny Goodman, Artie Shaw, the singers Joe Dassin, Sacha Distel, Georges Moustaki, Enrico Macias, Billy Joel, Simon & Garfunkel, Neil Diamond, Barbra Streisand, Carole King, the Barry Sisters, Neil Sedaka, Paula Abdul, Dinah Shore, Eddie Fisher, Dario Moreno, Barbara, Theodore Bikel, Mike Brant, Leonard Cohen, Al Jolson, Jan Peerce, Mireille. And this is if we extend the list beyond the book's twelfth.

The actors Sarah Bernhardt, Rachel, Danny Kaye, Groucho Marx, Jake Gyllenhaal, Scarlet Johansson, Barbra Streisand, Natalie Portman, Adrien Brody, Gwyneth Paltrow, Joaquin Phoenix, Rachel Weisz, Mathieu Amalric, Lisa Bonet, Helena Bonham Carter, Sean Penn, Live Schreiber, Kyra Sedgwick, Ayelet Zurer, Jamie Lee Curtis, Jeff Goldblum, Jane Seymour, Debra Winger, James Caan, Peter Coyote, Neil Diamond, Michael Douglas, Richard Dreyfuss, Harrison Ford, Goldie Hawn, Barbara Hershey, Miriam Margolyes, Rob Reiner, Anouk Aimee, Alan Arkin, Richard Benjamin, Steven Berkoff, Claire Bloom, May Britt, Dyan Cannon, Sammi Frey, Elliott Gould, Judd Hirsch, Dustin Hoffman, Harvey Keitel, Martin Landau, Piper Laurie, Jackie Mason, George Segal, Susan Strasberg, Chaim Topol, Gene Wilder, Lauren Bacall, Shelley Winters, Theodor Bikel, Mel Brooks, Tony Curtis, Peter Falk, Eddie Fisher, Laurence Harvey, Judy Holliday, Jack Klugman, Jerry Lewis, Walther

Matthau, Paul Newman, Tony Randell, Simone Signoret, Mel Torme, Jean-Pierre Aumont, Martin Balsam, Jeff Chandler, Lee J. Cobb, Harry Baur, Pierre Arditi, Yvan Attal, Jean-Pierre Bacri, Patrick Bruel, Gad Elmaleh, Roger Hanin, Agnes Jaoui, Regine, Elsa Zylberstein, Emmanuelle Beart, Charlotte Gainsbourg, Kirk Douglas, Zsa Zsa Gabor, John Garfield, Hedy Lamarr, Zero Mostel, Dinah Shore, Eli Wallach, Melvyn Douglas, Peter Lorre, Fanny Brice, Eddie Cantor, Leslie Howard, Sam Jaffe, Paul Muni, Edward G. Robinson, Theda Bara, Al Jolson, Sophie Tucker, Eric von Stroheim. A large proportion of them in the book's twelfty.

The filmmakers Steven Spielberg, Woody Allen, Paul Mazursky, Carl Reiner, Billy Wilder, Peter Brook, Roland Joffe, Alexander Korda, Mike Leigh, Sam Mendes, Sidney Lumet, Stanley Kubrick, Michael Curtiz, Milos Furman, Ernst Lubitsch, Fritz Lang, Joseph Mankiewicz, Joel and Ethan Coen, Jules Dassin, Roman Polanski, David Cronenberg, Otto Preminger, Arthur Penn, George Cukor, William Wyler, Michael Mann, Rob Reiner, Josef von Sternberg, Eric von Stroheim, Oliver Stone, Stanley Donen, Don Siegel, Jean-Pierre Melville, Fred Zinnemann, Mike Nichols, Barry Levinson, Istvan Szabo, John Frankenheimer, William Friedkin, Stanley Kramer, Marcel Ophuls, Claude Berri, Gerard Oury, Alan J. Pakula, Anatole Litvak, John Schlesinger, Joel Schumacher, Michel Hazanavicius, Ralph Bakshi, Philip Kaufman, Peter Bogdanovich, Richard Brooks, Sydney Pollack, Cedric Kahn, Claude Lanzmann, Moshe Mizrahi, Ephraim Kishon, Irvin Kershner, Claude Lelouch, Francois Truffaut, Robert Hossein, & Jewish preponderance in Hollywood.

How would the world of medicine look like without [Jonas Salk](#) who developed the polio vaccine – thus saving the lives of millions, [Karl Landsteiner](#) who discovered the human blood groups, the polio virus, and is the father of transfusion of blood – thus saving the lives of millions, [Ernst Boris Chain](#) who discovered penicillin's therapeutic action – thus saving the lives of millions, [Selman Waksman](#) who discovered [Streptomycin](#) and several other [antibiotics](#) – thus saving the lives of millions, [Waldemar Haffkine](#) who developed vaccines against cholera and bubonic plague – thus saving the lives of millions, Bernard Kouchner founder of Doctors Without Border, and so many others. A world without Rene Cassin – president of the European Court for Human Rights, the most famous economists – David Ricardo, Paul Samuelson, Simon Kuznets, Kenneth Arrow, Milton Friedman, Lawrence Klein, Franco Modigliani, Robert Solow, Joseph Stiglitz, Paul Krugman. How would history be without the contribution of King David, King Solomon, Moses, Jesus (who was a social activist Jew crucified by "neoliberal" Romans), Rambam/Maimonides, Rashi, Spinoza, Disraeli, Rabin, & many researchers say that [even Cervantes & Columbus were Jewish](#). Jews were among the most prominent entrepreneurs and business moguls in France – Andre Citroen, founder of Citroen car factories, Marcel Dassault, founder of the Dassault Aircraft factories, Daniel Carasso, founder of the Danone food factories, Pierre Wertheimer, co-founder (investing in the late 1920s) of the couture and parfumerie company Chanel, and the financiers – the Rothschild family, the Dreyfus family, and the Lazard family. Some well-known French politicians were also Jewish: Leon Blum, Adolphe Cremieux, Pierre Mendes-France, Michel Debre, Laurent Fabius, Jack Lang, Simone Veil, and others. We can of course cite here the names of the prominent Jewish businessmen and politicians in the US, UK, Germany, Italy, Russia, etc., but they can be found in the politicians [List of Jews](#), including Lenin (with a Jewish grandfather), the well known businessmen [in the UK](#) – including my Egyptian born compatriot [Sir Ronald Cohen](#), known as the father of British venture-capital/founder of Apax Partners and of social investment – founder of Bridges Ventures.

The list of the Jewish American businessmen [List of Jews](#), is really impressive. We find there the financiers who founded Warburg, Goldman Sachs, Blackstone, Soros, the founders of

Starbucks, Levi Straus, Calvin Klein, Home Depot, Mattel, Max Factor, Estee Lauder, The Gap, the owners of The New York Times (that maybe explains the pro-Israeli articles of the newspaper... I'm just kidding), New England Patriots, Las Vegas Venetian and Sands Casinos, real estate, hotels, Hyatt, Carnival, and the founders/CEOs in the film/TV industry: Miramax, Paramount, Columbia, 20th Century Fox, Fox Film, Warner, Time Warner, Disney, Dreamworks, ABC, Universal, MGM, CBS, Viacom, NBC, RCA. Jews and Israelis are among the most famous technology wizards who innovated so much at Intel, Google, Facebook, cellular phones, Waze, computers, space, irrigation, agriculture, physics, chemistry, and some of the most important breakthroughs in medicine & biotechnology. The most renowned are: Sergey Brin and Larry Page founders of Google, Mark Zuckerberg founder of Facebook, Andrew Grove founder of Intel, Michael Dell founder of Dell, Steve Ballmer who was CEO of Microsoft and had 8% of its shares, Lawrence Ellison founder of Oracle, Sandy Lerner founder of Cisco, Irwin Jacobs founder of Qualcomm, Benjamin Rosen Chairman of Compaq, Beny Alagem founder and CEO of Packard Bell, Rob Glaser CEO of Real Networks, Jerry Greenberg founder of Sapient. Theodor Maiman successfully fired the first working laser in 1960, there were other important inventions in genetic engineering, Materials, pacemakers and defibrillators... More than half of Jewish adults (55%) in the US received college degree and 25% earned a graduate degree. More than 60% of all employed Jews in the US are in one of the three highest status job categories: business/finance, professional/technical, management/executives. Israeli talent invented Intel's Pentium, Checkpoint's FireWall Internet Security, the cell phone developed at Motorola Israel, the voice mail technology, the Disk on Key, the highest level of scientific papers per capita, startups per capita, the world's second highest supply of new books per capita, technology protecting airlines from missile attacks, Drip Irrigation causing a revolution in agriculture, Quicktionary, the sun-heated water tank, etc., while Jews were almost not involved in terror.

We give here a partial list of the contribution of Jews in France, Germany & Austria. We have similar lists for the contribution of Jews in the UK, US, Russia, Italy, and many other states.

FRENCH AUTHORS, SOCIAL SCIENTISTS (WIKIPEDIA - [LIST OF FRENCH JEWS](#))

- [Tristan Bernard](#) (1866–1947) playwright & novelist, father of [Raymond Bernard](#) and [Jean-Jacques Bernard](#)^[178]
- [Jean-Jacques Bernard](#) (1888–1974) playwright, Son of [Tristan Bernard](#) & brother of [Raymond Bernard](#)^[179]

BIOGRAPHIES ON 18 GREAT CULTURAL & INNOVATIVE FIGURES IN 1820-1939

I read hundreds of biographies, many of them about great cultural figures in Europe and the US - authors, playwrights, poets, musicians, composers, actors, scientists, painters, philosophers, inventors, “prophets”, etc. from the twelfty 1820-1939. I present here a survey on 18 י"ח of some of the most illustrious persons of this twelfty: Honore de Balzac, Felix Mendelssohn, Theodor Herzl who was also an author, Henrik Ibsen, Alma Mahler, Karl Marx, Victor Hugo, Mahatma Gandhi who wrote also books, Federico Garcia Lorca, George Sand, Emile Zola, Lev Tolstoy, Rachel, Giuseppe Verdi, Auguste Renoir, Benjamin Disraeli who was also an author, Coco Chanel, Sarah Bernhardt. But I could give also a similar survey on biographies that I read on 18 additional illustrious persons who were active in this twelfty: Thomas Mann, Heinrich Mann, Thomas Edison, Marcel Pagnol, Sigmund Freud, Charles Chaplin, Jean-Paul Sartre, Enrico Caruso, Baron Hausmann, Shai Agnon, Alberto Moravia, Frederic Chopin, Claude Monet, Amadeo Modigliani, Vincent Van Gogh, Alfred de Musset, Arthur Rubinstein, Marie Curie. Not counting 12 biographies on Ben Gurion, de Gaulle, Churchill, Roosevelt, Lincoln, Dreyfus, Talleyrand but also on Greta Garbo, Valentino, Clark Gable, Claudette Colbert, Katharine Hepburn... And I have started to read 12 biographies on Heine, Shaw, Tennessee Williams (I also read an outstanding autobiography by Arthur Miller), Proust, Goethe, Canetti, Brecht, Darwin, Einstein, Hemingway, Strindberg.

HONORE DE BALZAC – BIOGRAPHIES BY STEFAN ZWEIG AND ANDRE MAUROIS

I have written extensively on Balzac and his life in this book, so I'll focus in this chapter uniquely on his biographies. One of the best biographies ever written is Balzac's biography written by Stefan Zweig. Such a genius author deserves a biography written by a genius biographer. I like very much Zweig's biographies, Fouche is also a masterpiece and you can at least understand such a despicable person. But I enjoyed even more reading the masterpiece – Prometheus, the Life of Balzac, by Andre Maurois. Here again a genius author - Maurois, much more appreciated than Zweig writes a biography of another genius – Balzac. And you don't get bored by reading both biographies as they describe Balzac in quite different perspectives. I've read many other biographies by Maurois – Lelia ou la vie de George Sand, Disraeli, Ariel ou la vie de Shelley, all of them brilliant. I have read most of the novels by Balzac, but the best novel of Balzac is his life. He had a tumultuous life and it is a miracle how in such harsh conditions he could have written such momentous works. But when he wrote his works he described also multiple facets from his own biography. Both books, but especially Maurois' masterpiece, are read as a suspense story, you share with Balzac his financial problems, you participate in the writing of his masterpieces, especially after I visited

Balzac's home in Paris, feeling very sorry that he was to die so young, aged only 51. We missed so many masterpieces because of that!

Zweig devoted ten years of research and writing to Balzac, which he regarded as his crowning achievement. This late work reads like a picaresque novel, with Balzac's quest for "a woman with a fortune" and recurrent episodes of the author chasing an elusive pot of gold driving the story. This biography of one classic author by another is filled with Zweig's characteristic psychological insights. He portrays the energy and "exuberance of imagination" that produced some two thousand characters in *La comédie humaine*, as well as the daily details of the coffee-chugging writer's life, his manic writing schedule, method of correcting proofs, dealing with publishers and reviewers, signing contracts, doing marketing and publicity. Balzac blends biography and literary history in a highly readable volume that will teach you French cultural history as you laugh out loud. "[Balzac] is sure to entertain, instruct and charm ... It is a work of art, ... alive with the teeming life of its model ... It is true both to facts and to the more elusive psychological and spiritual truth of a man who ... has remained one of the most mysterious of great creators.", Henri Peyre, Sterling professor of French Literature, Yale University, NY Times

An anonymous comment describes Zweig's biography of Balzac in a very vivid way: According to Stefan Zweig's friend and editor, Richard Friedenthal, his biography of Balzac was intended to be a much more monumental work than this, the culminating achievement of all his biographies. However, the not-altogether-finished manuscript was left behind in Bath when Zweig went to South America in 1940. Zweig continued to work on it briefly, but he quickly lost interest, and eventually he committed suicide in 1941. On at least one occasion the manuscript was narrowly saved from destruction during German air raids before it saw its way to publication in 1946. Balzac was a prolific writer with a marvelous constitution which he proceeded to abuse mercilessly for most of his adult life. At the age of 33 he dedicated himself to writing a comprehensive collection of novels that would attempt to realistically describe every aspect of mid-19th century French society for posterity. This major work he called "*La comédie humaine*" (The Human Comedy). This monumental opus was projected to consist of 150 novels comprising some 2000 characters. In fact, Balzac achieved about two-thirds of this remarkably ambitious undertaking, which includes such well-known titles as "*Le père Goriot*," "*La cousine Bette*," and "*La recherche de l'absolu*." Balzac wrote thousands of words virtually every day of his adult life. Or, to be more exact, every night: he slept by day until late afternoon at which time he allowed himself to socialize and, more importantly, to absorb every detail of that which he saw and heard; then at midnight, he would sit down at his desk -- for years in unheated garrets in the poorer neighborhoods of Paris -- and write prodigiously until dawn. During this time Balzac seemed to almost revel in living a life on the edge of financial disaster and emotional collapse; for most of his life he was constantly evading his creditors: "...he adopted a hundred devious ways of holding his creditors at bay, aided by his intimate knowledge of the laws, his inventive skill, and his unscrupulous effrontery."

Yet this remarkably intelligent man always remained optimistic that some day he would finish his great undertaking and eventually would be able to live a life of luxury. To assist him to attain that end, Balzac went through a succession of relationships with women (usually older, usually wealthy, usually married) with whom he had affairs and upon whom he relied for financial assistance and emotional support. He used these women to obtain his objectives. Eventually the tables turned, and it appears as if one of these women ended up using him. In 1833 a bored baroness in the Ukrainian hinterlands, one Eva de Hanska, for a lark sent a

panegyric letter of admiration to Balzac. They entered into a lengthy correspondence, arranged to meet in Switzerland where they had an affair virtually under the very nose of her unsuspecting husband, who they both expected would die soon. Unfortunately, it took 10 years for the Baron to die, during which time Balzac, while swearing eternal devotion to Eva, was philandering all over Paris. The very wealthy Baroness Hanska was astute enough and cynical enough to keep Balzac waiting another seven years after her husband's death before finally consenting to marry him. In the meantime, while Balzac waited and daydreamed that his life of financial security would finally be realized, he stopped writing and instead became preoccupied in preparing an elegant house in Paris (Pavillon Beaujon on rue Fortunee) for his future bride to be, which he filled with all kinds of over-priced objets d'art. Baroness Hanska finally consented to leave Russia and marry Balzac in March 1850 only when it was apparent to her that he too would not live long. Although ailing rapidly, Balzac returned in triumph to Paris with his wife, but they hardly took up occupation of Pavillon Beaujon when he became confined to his deathbed; he died on August 18. The Baroness lived another 32 years, shrewdly holding on to his correspondence and unfinished manuscripts, fully aware that these products of Europe's (then) most famous writer, would most certainly some day fetch a fair price. This is a well-written book and it reads like a novel. (One would hardly guess this was translated, by William and Dorothy Rose, from German into English.) It was difficult for me to sympathize with Balzac when reading this account: he is a snob, he shows callous disregard about incurring indebtedness, he uses women, and he never succeeds in looking reality in the face in his own personal life, even though he has done a remarkable job of doing so in the lives of his fictitious characters. Balzac was a remarkably flawed genius.

Kirkus Review: Maurois ends the enormous, sprawling life of Balzac with the question, "'But who would wish to be Balzac?'" A man's query perhaps. A woman might write to him admiringly, at first anonymously, as so many did then. What Maurois evokes here so strongly is the writer and the lover and the always hungry dreamer of fame, greatness and happiness. Balzac's feats were prodigious. Hounded by creditors throughout his life, he bought antiques and jewelled walking sticks, and indulged in one ruinous financial deal after another. He worked for months at a frenzied pace. With a passion for unity, he tried to make a comprehensive world from his many works-- "'La Comedie Humaine.'" He was lover to many women but he loved only two--Madame de Berny, his mistress in youth and twenty years his senior, and Madame Hanska, whom he married just before his death. Most of the time the narrative is just shy of the many quotations. Maurois is a little like the wise "'friend of the family'" who tells the story with all the intimate speculations, small reproaches and loving (sometimes sentimental) praise one might expect. Names, places and figures abound, and while many of these particulars are only scantily examined, one doesn't mind. Such a French abundance of "'givens'" is in keeping with the rush and energy of Balzac's life. There are good but simple summaries of Balzac's thought but for the most part this close biography draws one headlong into a fantastic life.

Balzac, the Great, by V.S. Pritchett: '*On n'a jamais peint les exigences de la gueule*': the crude, sardonic introduction to the character of le cousin Pons serves Balzac himself. The fat, plebeian, butcher-like figure, shorts legged and larded with the pâtés of Tours, toothless at thirty-two, whose natural openness, goodness, and burning brilliance captivated Paris almost against its will, is the novelist of our appetites. He is Appetite itself—appetite for power, fame, money, things, women, life, mystery, and work. Until the last months of his life he makes nonsense of the moral of *Le Peau de chagrin*: the skin grows larger with every desire fulfilled. All his desires fed one another and, united, they fed the artist: arresting them by drinking strong coffee killed him. No wonder that at the end of his new biography, M. André

Maurois exclaims with emotion, Who would not be Balzac? Any novelist would give his eyes for Balzac's energy and vitality (I beg to differ, I need my eyes...). Of course, he was cut out for his period. Appetite was the note of the day: *En somme, voici le jeu que je joue, quatre hommes arront eu une vie immense: Napoleon, Cuvier, O'Connell et je vais être le quatrième.* The first, "inocule des armées" had become the life of Europe; the second had married the natural world—*épousé le globe*; the third had incarnated a people. Balzac intended to be the fourth by carrying a whole society in his head.

THE EXAMPLE OF BALZAC has often been urged on novelists during the last fifty years but the stimulus we get from reading all the *Lives* by André Billy, Stefan Zweig, and now M. Maurois is illusory. The first lesson to be learned is that to hold a society in our heads it is first of all indispensable not to be completely of our time. Of Balzac, Lamartine noted: "There was nothing in him of the man of this century." And André Maurois's *Life*, which succeeds as "actualité" in bringing the man and his work together, in the daily process of making each other, leaves one with the same firm conclusion. Balzac belongs to the age of Louis XV and harks even further back to the age of Molière (but I think that Balzac is much more a contemporary author). He could live confidently on the assumption of universal knowledge: what a help that would be to us! Wealth for him was the seventeenth- and eighteenth-century notion of inheritance and Fortune, not the monotonous nineteenth-century system of profit, investment, wages paid, and interest accruing. His extravagances; his strong feeling for aristocracy and practical government; his habit of amassing things of value—"je suis sûr qu'au poids il y aura, dans notre maison, trois mille kilogrammes de cuivres et bronzes dorés"—in the manner of the dukes who filled up their châteaux with the loot of Europe generation after generation; his compulsion to pile up debts as if they were a form of capital; all indicate the naïf parvenu peasant who preserves in himself the ethos of an earlier age long after that age is there to guide him.

FELIX MENDELSSOHN – ON WINGS OF SONG – BIOGRAPHY BY WILFRID BLUNT

Jakob Ludwig Felix Mendelssohn Bartholdy (3 February 1809 – 4 November 1847), born and widely known as **Felix Mendelssohn**, was a German composer, pianist, organist and conductor of the early Romantic period. A grandson of the philosopher Moses Mendelssohn, Felix Mendelssohn was born into a prominent Jewish family. Although initially he was brought up without religion, he was later baptised as a Reformed Christian. Mendelssohn was recognised early as a musical prodigy, but his parents were cautious and did not seek to capitalise on his talent. Mendelssohn enjoyed early success in Germany, where he also revived interest in the music of Johann Sebastian Bach, and in his travels throughout Europe. He was particularly well received in Britain as a composer, conductor and soloist, and his ten visits there – during which many of his major works were premiered – form an important part of his adult career. His essentially conservative musical tastes, however, set him apart from many of his more adventurous musical contemporaries such as Franz Liszt, Richard Wagner and Hector Berlioz. The Leipzig Conservatoire (now the University of Music and Theatre Leipzig), which he founded, became a bastion of this anti-radical outlook. Mendelssohn wrote symphonies, concerti, oratorios, piano music and chamber music. His best-known works include his Overture and incidental music for A Midsummer Night's Dream, the Italian Symphony, the Scottish Symphony, the overture The Hebrides, his mature Violin Concerto, and his String Octet. His Songs Without Words are his most famous solo piano compositions. After a long period of relative denigration due to changing musical tastes and anti-Semitism in the late 19th and early 20th centuries, his creative originality has now been recognised and

re-evaluated. He is now among the most popular composers of the Romantic era, and possibly the most liked composer in the world.

The biography *On Wings of Song* by Wilfrid Blunt is quite good in describing the epoch and Mendelssohn's life, the meeting with Queen Victoria and Prince Albert who admired his music, the Jewish connotations, his music. As I admire Mendelssohn's music, I enjoyed reading this biography, understanding better the composer. The first classical music that I loved were Mendelssohn's works and especially his Violin Concerto which moves me to tears everytime that I hear or see it in concert. I also experienced a "unique" event when, at the age of 18 while I was a young student in Jerusalem, I saw a concert of the Israeli Radio orchestra at the YMCA hall, that was broadcasted live, and when the soloist started to play the second movement of the Violin Concerto he got mixed up, the conductor stopped the concert, and they started to play the Concerto from the beginning. There are all kind of bunglers, you can mix up the name of the Beauty Queen and crown the wrong one, you can tear your evening dress in the middle of a reception, you can even maintain at a strait-laced dinner in London as I did that my family came to England after Spain in 1492 when Jews were not allowed in [England until 1657](#), but the Violin soloist erring in a live broadcast was probably one of the most embarassed bunglers.

On 21 March 1816, at the age of seven years, Mendelssohn was baptized with his brother and sisters in a home ceremony by Johann Jakob Stegemann, minister of the Evangelical congregation of Berlin's [Jerusalem Church](#) and [New Church](#). Although Mendelssohn was a conforming (if not over-zealous) Christian as a member of the Reformed Church, he was both conscious and proud of his Jewish ancestry and notably of his connection with his grandfather Moses Mendelssohn. He was the prime mover in proposing to the publisher Heinrich Brockhaus a complete edition of Moses's works, which continued with the support of his uncle [Joseph Mendelssohn](#). Mendelssohn was notably reluctant, either in his letters or conversation, to comment on his innermost beliefs; his friend Devrient wrote that "[his] deep convictions were never uttered in intercourse with the world; only in rare and intimate moments did they ever appear, and then only in the slightest and most humorous allusions". Thus for example in a letter to his sister Rebecka, Mendelssohn rebukes her complaint about an unpleasant relative: "What do you mean by saying you are not hostile to Jews? I hope this was a joke [...] It is really sweet of you that you do not despise your family, isn't it?" Some modern scholars have devoted considerable energy to demonstrate either that Mendelssohn was deeply sympathetic to his ancestors' Jewish beliefs, or that he was hostile to this and sincere in his Christian beliefs.

In 1835 Mendelssohn was named conductor of the [Leipzig Gewandhaus Orchestra](#). He chose this position although he had also been offered direction of the opera house in [Munich](#) and the editorship of the prestigious music journal, the [Allgemeine musikalische Zeitung](#). Mendelssohn concentrated on developing the musical life of [Leipzig](#), working with the orchestra, the opera house, the Choir of [St. Thomas Church](#), and the city's other choral and musical institutions. Mendelssohn's concerts included, in addition to many of his own works, three series of "historical concerts" and a number of works by his contemporaries. He was deluged by offers of music from rising composers and would-be composers; amongst these was Richard Wagner, who submitted his [early Symphony](#), which to Wagner's disgust Mendelssohn lost or mislaid. This is probably one of the reasons why Wagner hated Mendelssohn, it is amazing how small incidents like that may have such an impact. Mendelssohn also revived interest in [Franz Schubert](#). [Robert Schumann](#) discovered the manuscript of Schubert's [9th Symphony](#) and sent it to Mendelssohn, who promptly premiered

it in Leipzig on 21 March 1839, more than a decade after Schubert's death. A landmark event during Mendelssohn's Leipzig years was the premiere of his oratorio *St. Paul*, given at the Lower Rhenish Festival in Düsseldorf in 1836, shortly after the death of the composer's father, which much affected him; Felix wrote that he would "never cease to endeavour to gain his approval [...] although I can no longer enjoy it". *St. Paul* seemed to many of Mendelssohn's contemporaries to be his finest work, and sealed his European reputation.

In 1829 Mendelssohn paid his first visit to Britain, where his former teacher Ignaz Moscheles, already settled in London, introduced him to influential musical circles. In the summer he visited [Edinburgh](#), where he met among others the composer [John Thomson](#), whom he later recommended to be Professor of Music at [Edinburgh University](#). On his eighth visit in the summer of 1844, he conducted five of the Philharmonic concerts in London, and wrote: [N]ever before was anything like this season – we never went to bed before half-past one, every hour of every day was filled with engagements three weeks beforehand, and I got through more music in two months than in all the rest of the year. On subsequent visits he met [Queen Victoria](#) and her musical husband [Prince Albert](#), who both greatly admired his music. In the course of ten visits to Britain during his life, totalling about 20 months, Mendelssohn won a strong following, sufficient for him to make a deep impression on British musical life. He composed and performed, and he edited for British publishers the first critical editions of [oratorios](#) of Handel and of the organ music of J.S. Bach. Scotland inspired two of his most famous works: the overture *The Hebrides* (also known as *Fingal's Cave*); and the *Scottish Symphony* (Symphony No. 3). On his last visit to Britain in 1847, Mendelssohn was the soloist in [Beethoven's Piano Concerto No. 4](#) and conducted his own *Scottish Symphony* with the Philharmonic Orchestra before the Queen and Prince Albert. This left him exhausted and ill from a hectic schedule. The death of his sister Fanny on 14 May 1847 caused him great distress. On 4 November, Mendelssohn died in Leipzig after a series of strokes. He was only 38, remaining forever young.

In the immediate wake of Mendelssohn's death, he was mourned both in Germany and England. However, the conservative strain in Mendelssohn, which set him apart from some of his more flamboyant contemporaries, bred a corollary condescension amongst some of them toward his music. Mendelssohn's relations with Berlioz, Liszt and others had been uneasy and equivocal. Listeners who had raised questions about Mendelssohn's talent included Heinrich Heine, who wrote in 1836 after hearing the oratorio *St. Paul* that his work was "characterized by a great, strict, very serious seriousness, a determined, almost importunate tendency to follow classical models, the finest, cleverest calculation, sharp intelligence and, finally, complete lack of naïveté. But is there in art any originality of genius without naïveté?" Such criticism of Mendelssohn for his very ability – which could be characterised negatively as facility – was taken to further lengths by Richard Wagner. Mendelssohn's success, his popularity and his Jewish origins irked Wagner sufficiently to [damn Mendelssohn with faint praise](#), 3 years after his death, in an anti-Jewish pamphlet *Das Judenthum in der Musik*: [Mendelssohn] has shown us that a Jew may have the amplest store of specific talents, may own the finest and most varied culture, the highest and tenderest sense of honour – yet without all these pre-eminences helping him, were it but one single time, to call forth in us that deep, that heart-searching effect which we await from art... The washiness and the whimsicality of our present musical style has been... pushed to its utmost pitch by Mendelssohn's endeavour to speak out a vague, an almost nugatory Content as interestingly and spiritedly as possible. Wagner is a member of the disgraceful gallery of anti-Semites who denigrate Jews' works only because they are Jews, or alternatively if they don't like the works of a Jew they generalize this dislike to all Jews. This was the start of a movement to

downgrade Mendelssohn's status as a composer which lasted almost a century, the echoes of which still survive today in critiques of Mendelssohn's supposed mediocrity.

In the 20th century the [Nazi](#) regime and its [Reichsmusikkammer](#) cited Mendelssohn's Jewish origin in banning performance and publication of his works, even asking Nazi-approved composers to rewrite incidental music for *A Midsummer Night's Dream*. ([Carl Orff](#) obliged.) Under the Nazis, "Mendelssohn was presented as a dangerous 'accident' of music history, who played a decisive role in rendering German music in the 19th century 'degenerate'." You have to be completely twisted, degenerate and hateful if you find such divine music as the music of Mendelssohn to be degenerate, and I'll not say a word against Wagner's music, that they thought was divine, as I do not want to sound prejudiced against such a divine anti-Semite. I just advise the reader to compare *A Midsummer Night's Dream* to the *Goetterdaemmerung* – the Twilight of the Gods, with Bruennhilde, Woglinde, Wellgunde and Flosshilde, and decide what Gods are most divine... Mendelssohn's reputation in England remained high throughout the 19th century. Prince Albert inscribed (in German), a libretto for the oratorio *Elijah* in 1847: To the noble artist who, surrounded by the [Baal](#)-worship of false art, has been able, like a second Elijah, through genius and study, to remain true to the service of true art. Mendelssohn's *Wedding March* from *A Midsummer Night's Dream* was played at the wedding of Queen Victoria's daughter, [Princess Victoria, The Princess Royal](#), to [Crown Prince Frederick of Prussia](#) in 1858, and it remains popular at marriage ceremonies. I included the music in the program of the surprise party to Ruthy, as it is one of the best musical works that I admire most. I may be not sophisticated enough to prefer Mendelssohn, Verdi and Offenbach to Wagner, but I also prefer Renoir to Picasso, Paul Anka to the Beatles, [the Golden Girls](#) and [Dear John](#) to [Friends](#) and [Seinfeld](#)...

[Charles Rosen](#) in a chapter on Mendelssohn in his 1995 book *The Romantic Generation* both praises and criticizes the composer, calling him a "genius" with a "profound" comprehension of Beethoven and "the greatest child prodigy the history of Western music has ever known". Although Rosen feels that in his later years, without losing his craft or genius, the composer "renounced ... his daring", he calls Mendelssohn's relatively late Violin Concerto in E minor "the most successful synthesis of the Classical concerto tradition and the Romantic virtuoso form". Rosen calls the *Fugue in E minor* (later included in Mendelssohn's Op. 35 for piano) a "masterpiece"; but in the same paragraph calls Mendelssohn "the inventor of religious [kitsch](#) in music". Such opinions are evidence of how a more nuanced appreciation of Mendelssohn's work has developed over the last 50 years, together with the publication of a number of modern biographies placing his achievements in context. Mercer-Taylor comments on the irony that "this broad-based reevaluation of Mendelssohn's music is made possible, in part, by a general disintegration of the idea of a musical canon", an idea which Mendelssohn "as a conductor, pianist and scholar" had done so much to establish. All of Mendelssohn's oeuvre – including the most popular works such as the E minor Violin Concerto and the *Italian Symphony* – has been explored more deeply, and prior concepts about the Victorian conventionality of the oratorio *Elijah* have been shed. The frequently intense and dramatic world of Mendelssohn's chamber works has been more fully recognized. Virtually all of Mendelssohn's published works are now available on CD, and his works are frequently heard in the concert hall and on broadcasts. An [English Heritage blue plaque](#) commemorating Mendelssohn was placed at 4 Hobart Place in Belgravia, London, in 2013. As the critic [H. L. Mencken](#) concluded, if Mendelssohn indeed missed true greatness, he missed it "by a hair". Well, I'd rather miss true greatness by a hair, living a gratifying life, than be great and live a tormented life, although Picasso proves to us that you can be great and have a gratifying life, so in some extraordinary cases you can win them all!

THEODOR HERZL – BIOGRAPHIES BY AMOS ELON AND BY SHLOMO AVINERI

I had the privilege to learn [Greek Political Philosophy](#) by the best professor I have ever had – [Shlomo Avineri](#). It was in 1961, when I was only 17 at the Hebrew University of Jerusalem. Avineri was very young but he was already an erudite. I still remember everyone of his lectures during a whole year – [Plato](#), [Aristotle](#), [Socrates](#), the [Epicureans](#), [Heraclitus](#) – *Panta Rhei*:

"πάντα χωρεῖ καὶ οὐδὲν μένει" καὶ "δις ἐς τὸν αὐτὸν ποταμὸν οὐκ ἂν ἐμβαίης"
Panta chōrei kai ouden menei kai dis es ton auton potamon ouk an embaies
 "Everything changes and nothing remains still ... you cannot step twice into the same stream".
 Avineri taught me the foundations of Ethics. He was responsible that throughout my whole business career I kept my ethical credo according to the precepts that he taught me and that the Ancient Greeks taught me. It is a scandal and outrage that business ethics is not taught in most or quite all the Economics departments from those days until today. I have tried very hard to convince Economics' deans to let me teach ethics but to no avail. And it is ironic that ethics are taught in Political Sciences and not in Economics where it is needed most. This absurd situation brings about such deplorable phenomena as Milton Friedman, the supremacy of the unethical neoliberalism, and the absence of moral considerations in most regimes throughout the world. Teaching of business ethics in MBAs has become in most of the cases window dressing, and most of the students enter their business life without any ethical credo. Luckily, I studied both Economics and Political Sciences at the University, and had such outstanding professors as Avineri. I remember him as I had very few excellent professors in my life – Shlomo Avineri, Henri-Claude de Bettignies at Insead, Yvon Pesqueux at CNAM, Teddy Weinshall, Zimna – who taught me Julius Caesar in high school, none of my professors in Economics, and the professor who was so much devoted to her students (Avineri taught us in a huge hall of a hundred or more students) – Ora Bareket, my teacher of Physics at High School in Haifa. Ora succeeded to teach us a very difficult subject Physics (5 unities) in 1960-1961 – we came to the last year just before the matriculation exam without basic knowledge of Physics and she succeeded in six months to teach us brilliantly all the subjects, with a strong, calm, and stable character. Our class was wild (not me – I was always a nerd), but she overcame this hurdle and gained the respect and attention of all the students. She sacrificed herself on our behalf when we had more than a month teachers' strike, she still came to teach us unofficially breaking the strike and while she was pregnant she taught us until one day before the birth of her baby, and also immediately after he was born. She was not obliged to do so, but she did it because she felt responsibility for our success and because she... loved us. And I got 9 the highest grade because of her and many other students got also high grades. I mentioned her in my diary & I do so here.

Well, I was a little bit carried away, as in many other instances in this book, but I allow myself to be governed by the stream of consciousness. It is much more interesting than a structured presentation. I managed to do so during ten years of teaching without any notes, any PowerPoint presentation, and the students loved it, and got the essence of ethics like that. Back to Herzl!

Theodor Herzl had been a successful Viennese journalist and a less successful playwright with no political ambitions. That changed in 1896, when he published *The Jewish State*. In response to the wide resonance that the book received, Herzl convened the first Zionist Congress in Basel, Switzerland, in 1897, which founded the Zionist Organization in order to establish a national home for the Jewish people in Palestine, recognized and guaranteed by

public international law. As he transformed himself in just a few years from fin-de-siècle writer and editor into the leader of an international political movement, Herzl learned politics and diplomacy on the run. And while he was not the first to call for the establishment of a Jewish nation-state, his activity was crucial in creating the institutional and organizational structure which helped to bring the idea of a Jewish state to the attention of world leaders and international public opinion. In his efforts to gain broad support for his vision, Herzl met with the Ottoman Sultan; the German Emperor Wilhelm II; Pope Pius X; British, Russian, and German ministers; as well as an enormous number of other government and public opinion leaders of most European countries. By the time of his early death in 1904 at the age of forty-four, Herzl had transformed Jewish public discourse and made the idea of a Return to Zion into a reality, albeit still a weak one, in world politics. In this concise, illuminating biography, the renowned Israeli political scientist and public intellectual Shlomo Avineri portrays Herzl's intellectual and spiritual odyssey from a private and marginal individual into a Jewish political leader and shows how it was the political crisis of the Austro-Hungarian Habsburg Empire, torn apart by contending national movements, which convinced Herzl of the need for a Jewish polity. Drawing extensively on Herzl's diaries as well as his published works, Avineri tells the story of how Herzl became, with the Zionist movement that he founded, a player in international politics, and how he harnessed the power of the word to his goals as no other statesman before him had done. Combining a visionary idea with practical action, Herzl fashioned the policies and institutions that paved the way for the Jewish state.

And after the presentation on Avineri's book, we bring here the presentation and comments on Amos Elon's book: Born in Budapest to a well-to-do assimilated Jewish family, Theodor Herzl (1860-1904) and his family moved to Vienna when he was 18. He studied law before he began writing plays and pieces of journalism. Herzl became the Paris correspondent for Vienna's leading newspaper, the *Neue Freie Presse*, and covered the Dreyfus affair, which shocked and galvanized him to write *The Jewish State: An Attempt at a Modern Solution of the Jewish Question*, published in 1896. After the first Zionist congress of 1897, Herzl wrote in his diary: "In Basel I founded the Jewish state. If I said this aloud today, I would be answered by universal laughter. Perhaps in five years, and certainly in fifty, everyone will agree."

"A great dramatic biography." — Alfred Kazin, *The New York Times*

"Any reader familiar with the sources can appreciate the brilliance, restraint and fidelity of Elon's narrative... the excitement of events and the quality of their prime mover come through admirably." — *The New Republic*

"You could not put the book down without admiring Theodor Herzl's courage and practical achievements — his romance turned into a Congress, a bank, a diplomacy." — Bernard Avishai, *The New Yorker*

"A quite astonishing portrait... positively rewarding" — *Kirkus Reviews*

"Elon's 1975 biography of Herzl... vividly portrayed the man with all his quirks, inventiveness and shortcomings" — Lawrence Joffe, *The Guardian*

"considered one of the best biographies to date of Zionist founder Theodor Herzl" — Benjamin Spier, *Jerusalem Post*

“arguably the best biography ever written of the founding father of Zionism, Theodore Herzl”
— Tom Segev, Ha’aretz

“A fascinating book ... it has the fascination of a novel on the grand scale.” — Arthur Miller,
Washington Post

“A skillfully written human look at the man whose life reads like a novel...” — Miami Herald

Sic transit gloria mundi. The author of the biography of Herzl Amos Elon left Israel in 2004, moving to Italy permanently, disillusioned with developments in Israel since 1967. I have related in this book how I watched his daughter's Danae Elon film at the Haifa Film Festival, with all the veterans of extreme dovish attitudes. Shlomo Avineri has dovish attitudes of the same scope as Elon, he advocated negotiations with the PLO when it was forbidden by law, but Avineri did not leave Israel, and never settled elsewhere. Of course, we live in a democracy where everyone can express himself as he wishes and live where he chooses. But it is ironic that the two best biographers of Herzl, and I enjoyed both biographies, are very dovish, and one of them has left the country for good and died in Italy. I cited the biography of Avineri in my courses, showing how Israel has forsaken Herzl's third way socio-economic ideology. Could it be that the biographers of Herzl have found in his life indications that Israel has forsaken Herzl's message? I differ totally from their points of view, but I remember that Avineri taught me what humanism and ethics are, and I imagine that their belief is that Israel does not act in a humane way towards the Palestinians, like Herzl preconized in his books and lectures. But Herzl had many illusions that reality has shattered. I fully adhere with Herzl's credo that Israel should be the homeland of all its citizens, a Jewish state but with equal rights to all the inhabitants. Herzl envisioned that the Arabs would be grateful for the prosperity that the Jews have bestowed to Palestine, which was an under developed land before Altneuland was established, as he writes so well in his book.

But how do we have to react against the Palestinians' leadership who don't want us to exist at all, in Israel or elsewhere, who say that the Holocaust did not exist, who incite their children to kill as many Jews as possible, who fully adhere to the radical Muslim ideology, to terrorism? I believe that all the blame is to be bestowed on the Palestinian side, as the Jews did their utmost to live in peace, but were attacked in 1948, 1967, 1973, and in all the other wars and aggressions. The conflict has nothing to do with territories, as the territorial issues were resolved with Egypt that received all its territories and we signed a peace agreement. The same applies to Jordan. The problem is that the Arabs who collaborate with Jews, like Altneuland's Reshid Bey, are perceived as traitors, the Israeli Arab leaders denounce those who want to volunteer to Civil Service even within their community, not only they are not grateful of what the Jews have accomplished since Israel was established but they want the right of return for 5 million Arabs that will bring us back to what we were in 1948, that will make us like Iraq, Syria, Yemen, Algeria, Sudan, and Gaza..., poor as Egypt, or with Sharia law as Saudi Arabia and Iran!

I have a problem – I lack completely self-hatred as many of the peacelovings have or Stockholm Syndrome or trying to justify anti-Semitism as some of the peacelovings do. In my 77 years I never forgot nor forgave those who did me wrong, I did not want to take revenge, in some cases I tried to cause them economic harm (never physical harm) that in most cases was not even equivalent to the harm they have done to me (including illicit behaviour), as I never resorted to illicit behaviour as they did. If a friend was not convenient anymore with my

friendship because I attacked tycoons his benefactors, I ceased our friendship. The same goes with jobs, bosses, and... peoples. If some of the Palestinians hate us so much (not all of them, nor most of them, but enough) I do not try to befriend them at all cost, bearing the "cross" of Israel's conduct as the peacelovings do, being always in an apologetic attitude. I do not hate them I just ignore them and of course I don't denounce essential violations of human rights which do occur in reaction to the terrorist attacks (as frequent checks, searches and so on) or casualties because our airforce retaliates to the thousands of rockets of the Hamas to the launching sites which are always among Palestinian population. It goes without saying that the Palestinians never deplore our civilian casualties and give the suicide bombers the title of *Shahid*, with streets and honor for them. So, why should I be so eager to defend their human rights if they hate us so much? In extreme and very seldom cases when extremist Israelis resort to terrorism I denounce it fully. I am against boycott but if someone or some people boycott me why should I not retaliate and boycott them only if it does not harm me. I would not boycott Wagner because he was an anti-Semite if I enjoy his operas and of course not read his allegations, I would see films by Ken Loach even that he boycotts us as he is an excellent director, listen to the wonderful music of Theodorakis although he is against us, not boycott Israeli singers, actors, playwrights, authors who don't want to perform in the "occupied" territories, but not go to films where Mel Gibson acts, as I really don't lose anything, and visit Ireland only after I've visited 20 more countries which have a much more friendly attitude to Israel as the Balkans states, Russia or the US.

Herzl envisioned a Jewish state that combined modern Jewish culture with the best of the European heritage. Thus a "Palace of Peace" would be built in Jerusalem to arbitrate international disputes, and at the same time the [Temple](#) would be rebuilt on [modern](#) principles. Herzl did not envision the Jewish inhabitants of the state as being [religious](#), but there was respect for religion in the public sphere. He also assumed that many languages would be spoken, and that [Hebrew](#) would not be the main tongue. Proponents of a Jewish cultural rebirth, such as [Ahad Ha'am](#), were critical of *Altneuland*. In *Altneuland*, Herzl did not foresee any conflict between [Jews](#) and [Arabs](#). One of the main characters in *Altneuland* is a Haifa engineer, Reshid Bey, who is one of the leaders of the "New Society". He is very grateful to his Jewish neighbors for improving the economic condition of Israel and sees no cause for conflict. All non-Jews have equal rights, and an attempt by a fanatical rabbi to disenfranchise the non-Jewish citizens of their rights fails in the election which is the center of the main political plot of the novel.

Herzl also envisioned the future Jewish state to be a "third way" between capitalism and socialism, with a developed welfare program and public ownership of the main natural resources. Industry, agriculture and trade were organized on a cooperative basis. Along with many other progressive Jews of the day, such as [Emma Lazarus](#), [Louis Brandeis](#), [Albert Einstein](#), and [Franz Oppenheimer](#), Herzl desired to enact the land reforms proposed by the American political economist [Henry George](#). Specifically, they called for a [land value tax](#). He called his mixed economic model "Mutualism", a term derived from French [utopian socialist](#) thinking. Women would have [equal voting rights](#)—as they had in the Zionist movement from the Second Zionist Congress onwards. In *Altneuland*, Herzl outlined his vision for a new Jewish state in the [Land of Israel](#). He summed up his vision of an open society: "It is founded on the ideas which are a common product of all civilized nations. ... It would be immoral if we would exclude anyone, whatever his origin, his descent, or his religion, from participating in our achievements. For we stand on the shoulders of other civilized peoples. ... What we own we owe to the preparatory work of other peoples. Therefore, we have to repay our debt.

There is only one way to do it, the highest tolerance. Our motto must therefore be, now and ever: 'Man, you are my brother.'"

In his novel, Herzl wrote about an electoral campaign in the new state. He directed his wrath against the nationalist party, which wished to make the Jews a privileged class in Israel. Herzl regarded that as a betrayal of Zion, for Zion was identical to him with humanitarianism and tolerance—and that this was true in politics as well as religion. Herzl wrote: "Matters of faith were once and for all excluded from public influence. ... Whether anyone sought religious devotion in the synagogue, in the church, in the mosque, in the art museum, or in a philharmonic concert, did not concern society. That was his [own] private affair." *Altneuland* was written both for Jews and non-Jews: Herzl wanted to win over non-Jewish opinion for Zionism. When he was still thinking of [Argentina](#) as a possible venue for massive Jewish immigration, he wrote in his diary: "When we occupy the land, we shall bring immediate benefits to the state that receives us. We must expropriate gently the private property on the estates assigned to us. We shall try to spirit the penniless population across the border by procuring employment for it in the transit countries, while denying it any employment in our country. The property owners will come over to our side. Both the process of expropriation and the removal of the poor must be carried out discretely and circumspectly ... It goes without saying that we shall respectfully tolerate persons of other faiths and protect their property, their honor, and their freedom with the harshest means of coercion. This is another area in which we shall set the entire world a wonderful example ... Should there be many such immovable owners in individual areas [who would not sell their property to us], we shall simply leave them there and develop our commerce in the direction of other areas which belong to us". Herzl was wrong all the way because he was too humanistic, but he did not foresee how barbaric Europe will become within 30 years with Nazis and fascists. The Jews contribute to society? Half of the German authors in German language were Jews in the first half of the century? Jews were instrumental in science, physics, economics, psychology? It didn't matter for the Nazis who killed them all, who banned Kafka, Heine and Mendelssohn. It doesn't matter to radical Muslims who want the right of return to Europe and havin the Sharia law in all the countries where they live, with stoning of women, murdering liberals/nonbelievers.

I understand the frustration of Amos Elon, Danae Elon, Shlomo Avineri, and many peace-loving Israelis, who want us to give back all the occupied territories (we did it in Gaza and Lebanon – and as a token of gratitude they send us thousands of rockets), who want no discrimination of Arabs, no walls/fence, no checkpoints. But they live in 1902 with Herzl when *Altneuland* was published, they think that all Arabs are like Reshid Bey, that if we withdraw from the West Bank we'll become a land of milk and honey. I like very much milk but I am allergic to lactose, I like very much honey but the bees keep stinging me. I am a realist, not an idealist, I was born in Egypt and have experienced the burning of Cairo, I come from the business world where the rights of the weak parties are trampled without pity, and I am aware that all is interests in life like my mother Pauline used to tell me. President Obama says [that 99.9% of Muslims](#) reject the radical interpretation of Islam, are looking for the same goals as the others, don't support terrorism. Raheel Raza, a Muslim author and human rights activist gives the figures of radical Islam, as many scholars and journalists, like Guy Behor do. More British Muslims fight in Syria than in the UK armed forces. 200,000 Muslims are involved in Radical Muslim terrorism in ISIS, al-Qaeda, Hamas, Hezbollah, and other Jihadists, while only 19 can instigate 9/11 and murder 3,000 people in New York and Washington, 8 can murder 130 Parisians in 13/11, and very small numbers can murder tens of thousands innocent civilians in Afghanistan, Iraq, Syria, Europe and America. In the second

layer there are the Islamists who want to impose their religion on the rest of humanity, using also democracy like they did in Gaza (don't worry when they take power they forget about democracy, like the Nazis did). They use the political and cultural system to further their aims. The Muslim Brothers with Mohammed Morsi won the elections in Egypt and wanted to impose Islamic Law in Egypt, limit the rights of women like in Iran. They back and finance terrorist organizations like Hamas, al-Qaeda, etc. They try to silence liberals, threaten them, boycott Israel, and accuse liberals of being racists and anti-Muslims if they oppose them. They have supporters in America and Europe. Dilemma – what should prevail democracy (at least initially) or human rights? But politically correct politicians let them participate in elections, let them speak and write freely, don't ban their organizations, why?

The third layer are Fundamentalists wanting to impose Sharia Law, and according to surveys they are hundreds of millions, not 0.1%, hundreds of millions from the total of 1.6 trillion Muslims, expanding at a very fast rate. They are against terrorism, they don't want to overthrow governments, but they hold beliefs and practises against women rights, homosexuals. In 2013 a comprehensive survey was conducted among thousands of Muslims in 29 countries, and a majority of them believed that those who leave the Muslim faith should be executed, honor killing of women can be justifiable for women who had extra-marital affairs. The Muslim World is increasingly out of step with the modern world. As a matter of fact we faced such a situation after the collapse of the Roman empire when the "I will not say barbaric as I want to be politically correct" conquered Europe and shortly after the Muslims conquered half of Europe. We had for more than a thousand years the Middle Ages where human progress stood still, but in modern times we'll not have this privilege because if the Fundamentalist will get hold of Atomic weapons they will use it bringing the end of the world. 42% of the young French Muslims believe that suicide bombings against civilians can be justified (remember 13/11/2015), 35% of the British Muslims (remember 7/7/2005), 26% of American Muslims (remember 9/11/2001). The young generation is becoming more and more radical. 52% want the Sharia Law to be the law of the land in Muslim majority countries, stoning women, amputating thieves...

Many Israelis who were frustrated from the occupation of the West Bank and the alleged infringement of human rights to the Palestinians left the country to Italy, Sweden, but no Jew has left to Muslim countries, except Juliano Mer who was murdered by Muslim extremists in Jenin. Many of them compare Israel to Nazi Germany and themselves to Thomas Mann who fled Nazi Germany. I refer extensively to the fallacy of this comparison in my book, I'll just say here that there were no terrorist Jews who killed Nazis or Germans by the thousands. The Jews who were persecuted contributed so much to Europe's culture, economy and science, while ISIS, al-Qaeda, Iran, Hamas and other Muslim extremists have contributed mainly terrorism and murder. It is true that many Palestinian civilians were killed and harassed in checkpoints and walls/fences but none of them was persecuted because he was an Arab (except very rare cases of Jewish terrorism who are horrible and should be punished like Arab terrorism), but because other Arabs murdered thousands of civilians and it was necessary to build walls/fences and checkpoints in order to stop these murders. I believe like Herzl, like Elon and like Avineri that Israel should be a model of human rights, peace, progress and freedom, with equal rights to all its citizens – Jews and Arabs. I am against the occupation and has devised in my books a plan how to end occupation and still keep Israel's security – not like the doves propose to withdraw from all or most of the West Bank, establishing a Palestinian demilitarized State, that will be demilitarized like Gaza with or without blockade that has only one purpose to prevent Hamas from receiving rockets and weapons, and that will be a state like Syria and Iraq are states with ISIS, Hamas and other extremist organizations

destroying in a week the Palestinian army, conquering the West Bank and launching rockets to Tel Aviv, Jerusalem and Haifa. The Palestinians have the right for a state but not in snail states that cannot survive economically and politically, but as part of a Palestinian/Jordanian Kingdom with joint forces with Israel that will preserve the Kingdom against ISIS, and with better democracy than what they have now in Gaza and the West Bank, and as a matter of fact in all Arab countries. Such a state living in peace with Israel and being members of the European Union will resemble Herzl's vision of cooperation between Arabs and Jews, no more harassment, equal rights to all, no terrorism, and economic progress and welfare.

Amos Elon ([Hebrew](#): עמוס אילון, July 4, 1926 – May 25, 2009) was an [Israeli](#) journalist and author. Married to Beth Elon and father of filmmaker [Danae Elon](#). Amos Elon was born in [Vienna](#). He immigrated to [Mandate Palestine](#) in 1933. He studied law and history in Israel and England. He was married to Beth Elon, a New York-born literary agent, with whom he had one daughter, Danae. In the 1990s, Elon began to spend much of his time in [Italy](#). In 2004 he moved there permanently, citing disillusionment with developments in Israel since 1967. Elon died on May 25, 2009, in [Tuscany](#), Italy, aged 82. Beginning in the 1950s, Elon served as a correspondent on European and American affairs for the newspaper [Haaretz](#). He took a leave of absence from Haaretz in 1971 and resumed in 1978. Amos retired from Haaretz in 2001. Amos Elon was an early advocate for the creation of a Palestinian state and withdrawal from the territories occupied by Israel in 1967. He was a frequent contributor to the [New York Review of Books](#) and [The New York Times Magazine](#). For many years, he was widely regarded as one of Israel's leading journalists. Elon was the author of nine books. He rose to international fame in the early 1970s after publishing *The Israelis: Founders and Builders*, described as "an affectionate but unsparing portrait of the early [Zionists](#)".

Shlomo Avineri ([Hebrew](#): שלמה אבינרי) (born 1933, [Bielsko](#), [Poland](#)) is an Israeli [political scientist](#). He is [Professor](#) of [Political Science](#) at the [Hebrew University](#) of [Jerusalem](#) and member of the Israel Academy of Sciences and Humanities. He also serves as Recurring Visiting Professor at the [Central European University](#) in [Budapest](#) and Fellow of a [Munich](#)-based academic think tank offering advice to politicians ([German](#): *Centrum für angewandte Politikforschung*). Avineri has written extensively in the history of [political philosophy](#), especially on the political thought of [Marx](#), [Hegel](#), and on the early [Zionist](#) political theories of [Moses Hess](#) and [Theodor Herzl](#). He has also written numerous books and articles on Middle Eastern affairs and international affairs. Avineri contributed in revising Hegel's political thought and showing Hegel's pluralism. Avineri was also involved in the debate over the [dissolution of the Soviet Union](#). He argued that it was the pre-capitalist structure of 1917 [Russia](#), as well as the strong authoritarian traditions of the Russian state and its weak civil society, which pushed the [Soviet revolution](#) towards its repressive development. His recent intellectual biography of Herzl shows how developments in his native [Austro-Hungarian Empire](#), rather than the [Dreyfus Affair](#) in France, convinced Herzl of the failure of Jewish emancipation in Europe and of the need to find a political solution for the Jews, based on national self-determination, outside of Europe. His work has appeared in [Dissent](#), [Foreign Affairs](#), and [The New York Review of Books](#). He frequently contributes [Op-eds](#) to [Haaretz](#). He is a member of the Editorial Board of the [Jewish Review of Books](#). He served as Director of Eshkol Research Institute (1971–74); Dean of Faculty of Social Sciences (1974–76); Director-General of the Ministry of Foreign Affairs (1976–77); and Director of the Institute for European Studies at the Hebrew University (1997–2002). Avineri has had numerous visiting appointments including [Yale University](#), [Wesleyan University](#), [Australian National University](#), [Cornell University](#), [University of California](#), [The Queen's College, Oxford](#), [Northwestern University](#), Cardozo School of Law, and [Oxford](#) and, most recently, the

[University of Toronto](#). He has been a visiting scholar at the [Wilson Center](#), the Carnegie Endowment for International Peace, and [Brookings Institution](#) in Washington, DC, and at the Institute of World Economics and International Relations in Moscow. He is currently Recurring Visiting Professor at the Central European University, in Budapest.

Avineri served as Director-General of Israel's Ministry of Foreign Affairs from 1975–77. He also headed the Israeli delegation to the [UNESCO](#) General Assembly, and in 1979 he was a member of the joint Egyptian-Israeli commission that negotiated the Cultural and Scientific Agreement between the two countries. When the Rabin government appointed Avineri to the post of Director-General of the Foreign Ministry in 1975, this was harshly criticized by the Likud opposition because of Avineri's support for negotiations with the PLO (a Likud MK even compared him to "Lord Haw-Haw", the British traitor who had broadcast from Berlin during World War II and was later executed). During his time at the Foreign Ministry, Avineri followed the official line of the Rabin government preferring the "Jordanian Option" and participated in some of the meetings with King Hussein. But in his writings, and internal Foreign Ministry memoranda, he tried to present the conflict with the Palestinians within a wider context of a conflict between two national movements, beyond the narrow ideological or security-oriented conventional Israeli discourse. At that time, some of the first unofficial meetings between Israeli peace activists and PLO officials also took place. These developments were curtailed by the Likud electoral victory in 1977, which also led to Avineri's resignation from the Foreign Ministry, but were resumed in the 1990s in the second government of Rabin and led to the Oslo accords between Israel and the PLO.

HENRIK IBSEN – A BIOGRAPHY BY ROBERT FERGUSON

I wrote extensively about Henrik Ibsen and his work in my books and articles, and indeed Ibsen is my favorite playwright, and *An Enemy of the People* one of the best plays that I have ever read and seen. I have taught this play dozens of times to classes from different backgrounds, and all of them reacted enthusiastically to this play. In this book I refer also to Henrik Ibsen and his plays, so in this chapter I'll bring others opinions on Ibsen, his biography and some of his plays.

First published in 1996, Robert Ferguson's controversial *Henrik Ibsen: A New Biography* is perhaps the most irreverent and critical of all the Ibsen biographies. Ferguson provides insight into Ibsen's personal life, his creative work, and the world in which he lived. He paints the portrait of a complex, emotionally tormented artist ... not one who is necessarily likable, but one whom we can understand and appreciate. Using previously unavailable material, including a letter in which Ibsen admits paternity of his illegitimate son, Ferguson chips through the hard enamel of Ibsen's public reputation. He details many of Ibsen's private traumas, such as how his inability to pay for the child's support very nearly landed him in jail, and shows the real impact of these experiences on Ibsen's growth, both as a man and as a playwright. The book clearly demonstrates that Ibsen was one of the great therapeutic artists. *Henrik Ibsen: A New Biography* is a deeply researched, wide-ranging account of the man often called the founder of modern drama. At the time of its publication it polarised the critics and stirred up a great deal of debate. Essential reading for anyone interested in Ibsen and in the development of the modern theatre.

Henrik Ibsen was a Norwegian playwright, one of "the four great ones" with [Alexander Kielland](#), [Jonas Lie](#) and [Bjørnstjerne Bjørnson](#) of the 19th-century Norwegian literature. Ibsen is generally acknowledged as the founder of modern prose drama. He moved away from the Romantic style, and brought the problems and ideas of the day onto the stage of his time. Ibsen's famous plays, *Brand* (1866) and *Peer Gynt* (1867), were originally not intended for the stage; they were "reading dramas". "... And what does it mean, then to be a poet? It was a long time before I realized that to be a poet means essentially to see, but mark well, to see in such a way that whatever is seen is perceived by the audience just as the poet saw it. But only what has been lived through can be seen in that way and accepted in that way. And the secret of modern literature lies precisely in this matter of experiences that are lived through. All that I have written these last ten years, I have lived through spiritually." ('Speech to the Norwegian Students, September 10, 1874, from *Speeches and New Letters*, 1910)

Henrik Ibsen was born in Skien, a tiny coastal town in the south of Norway. His father, Knud Ibsen, was a prosperous merchant, whose financial failure changed the family's social position. Later Ibsen bitterly recalled how his father's friends broke all connections with him and the "Altenburg Manor", earlier known for its dinners and festivities. In disgrace the family moved to Venstøp farmhouse, provided to them by the creditors. As a child Ibsen dreamed of becoming an artist. His mother, Marichen Cornelia Martine Altenburg, was an avid painter, and she loved theatre. Ibsen's education was interrupted by poverty and at the age of 15 he was apprenticed to a pharmacist in Grimstad. In 1846 he was compelled to support an illegitimate child born to a servant girl. Ibsen moved in 1850 to Christiania (now Oslo), where he attended Heltberg's "student factory", an irregular school for university candidates, and occasionally earned from his journalistic writings. In the same year he wrote two plays, *Cataline*, a tragedy, which reflected the atmosphere of the revolutionary year of 1848, and *The Burial Mound*, written under the pseudonym of Brynjolf Bjarme. Ibsen hoped to become a physician, but failed university entrance examinations.

Cataline sold only a few copies but *The Burial Mound* was performed three times in 1850. The first performance of *Cataline* did not take place until 1881. After successfully performing a poem glorifying Norway's past, Ibsen was appointed in 1851 by Ole Bull as "stage poet" of Den Nationale Scene, a small theater in Bergen. During this period Ibsen staged more than 150 plays, becoming thoroughly acquainted with the techniques of professional theatrical performances. In addition to his managerial work he also wrote four plays based on Norwegian folklore and history, notably *Lady Inger of Ostrat* (1855), dealing with the liberation of medieval Norway. In 1852 his theater sent him on a study tour to Denmark and Germany. Ibsen returned in 1857 to Christiania to continue as artistic director of the new Norwegian (Norske) Theatre. In 1858 he married Suzannah Thoresen, the stepchild of the novelist Magdalene Thoresen. Their only child, Sigurd, was born next year. After many productions, the theater went bankrupt, and Ibsen was appointed to the Christiania Theatre. To this period belong *The Vikings of Helgoland* (1858) and *The Pretenders* (1864), both historical sagas, and *Love's Comedy* (1862), a satire. Several of Ibsen's plays failed to attract audience. These drawbacks contributed to his decision to move abroad. In 1864 Ibsen received an award for foreign travel from the government, and also had financial help from Bjørnstjerne Bjørnson. He left Norway for Italy in April, and traveled abroad for the next 27 years, returning to Norway only for brief visits. During this time, when he lived in Rome, Munich and Dresden, Ibsen wrote most of his best-known works, among others *Brand*, inspired by Kierkegaard's idea of subjectivity as truth. The symbolic tragedy tells about a priest, who follows his high principles at the cost of the lives of his child and his wife. Its

theme, an individual with his God-given mission pitted against society, reflected Ibsen's disappointment in weak and spineless politicians.

Brand's firm belief is "No compromise!". At the end Brand admits his own weakness and is buried by an avalanche. *Peer Gynt* (1867), written mostly in Southern Italy, in Ischia and in Sorrento, was a satiric fantasy about a boastful egoist, irresponsible young man, an Ulyssean figure from Norwegian folklore. In both of these works the romantic hero is destroyed and their "ideal demands" are crushed. No doubt the themes also rose from Ibsen's disillusionment with his countrymen. In 1865 he wrote to Björnson: "If I were to tell at this moment what has been the chief result of my stay abroad, I should say that it consisted in my having driven out of myself the aestheticism which had a great power over me – an isolated aestheticism with a claim to independent existence. Aestheticism of this kind seems to me now as a great curse to poetry as theology is to religion." Ibsen himself considered *The Emperor and the Galilean* (1873) his most important play. However, this heavy drama about Christianity and paganism is generally not included among his most important achievements. *Pillars of Society* (1877) dealt with a wealthy and hypocritical businessman, whose perilous course almost results in the death of his son. *A Doll's House* (1879) was a social drama, which caused a sensation and toured Europe and America. In the play a woman refuses to obey her husband and walks out from her apparently perfect marriage, her life in the "doll's house". At the turn-of-the-century physicians used Nora, whose mood changes from joy to depression in short cycles of time, as an example of "female hysteria". Later Havelock Ellis, inspired by Nora's character, saw in her "the promise of a new social order."

In *An Enemy of the People* (1882) Ibsen attacked "the compact liberal majority" and the mass opinion. Arthur Miller's adaptation from 1950 was a clear statement of resistance to conformity. "The majority," says the honest and brave Dr. Stockmann, "is never right until it *does* right." *Ghosts* (1881) touched the forbidden subject of hereditary venereal disease. The London *Daily Telegraph* called the play "an open drain; a loathsome sore unbandaged; a dirty act done publicly; a lazaret house with all its doors and windows open." Again a bourgeois façade hides moral decay and guilt. Mrs. Alving, the widow of the respected Captain Alving, has to reveal to her son Oswald the ugly truth about his disease. Eventually she has to decide whether or not to euthanize his son, whose mind has disintegrated. *Hedda Gabler* (1890) was a study of a neurotic woman. Oscar Wilde, after attending the play, wrote: "I felt pity and terror, as though the play had been Greek." Hedda, twenty-nine years old, has married down, is pregnant with an unwanted child, and bored by her husband. Before marriage she has flirted with the drunken poet Loevborg, a portrait of the playwright Strindberg, who hated Ibsen. She plots to the ruin of Loevborg by burning his manuscript on the future of civilization. Judge Brack, who lusts after Hedda, discovers that Hedda has instigated Loevborg's accidental suicide - he has died in a bordello. Hedda cries: "Oh, why does everything I touch become mean and ludicrous? It's like a curse!" Brack gives her the choice either of public exposure or of becoming his mistress. But Hedda chooses suicide when she falls into his power.

In 1866 Ibsen received poet's annual stipend. He also had royalties from his dramatic poem *Brand*, his first financially successful drama. With the receipt of a new grant, he visited Stockholm, dined with the King, and later represented Norway at the opening of the Suez Canal. In the 1870s he worked with the composer Edward Grieg on the premiere of *Peer Gynt*. Grieg had met Ibsen in Rome in 1866; the play was written a year after their meeting. They never became close but Ibsen felt that the busy conductor and virtuoso pianist had a real understanding of his work. In January 1874 he commissioned Grieg to provide incidental music for the play, which he never intended to be staged. The assignment was completed in

September of the following year and was premiered in Oslo, together with a revised stage version of the drama, on February 24, 1876. Both the author and the composer were surprised by its success. When Ibsen spent a couple months in Norway during the summer of 1874, Norwegian students marched in procession to his home to greet him. In reply Ibsen said: "For a student has essentially the same task as the poet: to make clear to himself, and thereby to others, the temporal and eternal questions which are astir in the age and in the community to which he belongs." (from *Speeches and New Letters*)

Ibsen returned to Norway in 1891 and continued to write until a stroke in 1900. His marriage was joyless, but he had a few episodes of friendship with young women. In 1898 Ibsen received the world's homage on the occasion of his 70th birthday. George Bernard Shaw called him the greatest living dramatist in a lecture entitled 'The Quintessence of Ibsenism'. Ibsen's son married Bjørnson's daughter Bergliot. The marriage built a bridge of friendship between the two writers. Their relationship had broken after Ibsen's play *The League of Youth* (1869), where the central character resembled Bjørnson. Ibsen died in Christiania on May 23, 1906. Ibsen's final years were clouded by mental illness. *When We Dead Awaken* (1899), his last dramatic effort, showed the influence of Strindberg. James Joyce, who was from his student days a great admirer of Ibsen's work, published a laudatory essay on the play in the 1 April 1900 issue of the *Fortnightly Review*. It was Joyce's first published piece. A supposedly unknown Ibsen play, entitled *The Sun God*, surfaced in 2006 and an antiquarian bookshop in Oslo was offered a chance to buy it. After police investigation, a Norwegian scriptwriter and actor was charged in 2011 for forging writings and documents that allegedly originated from Ibsen and Knut Hamsun. "A woman cannot be herself in the society of the present day, which is an exclusively masculine society, with laws framed by men and with judicial system that judges feminine conduct from a masculine point of view." (from *Ibsen's Workshop*, 1912)

Ibsen wrote for and about the middle class and life in the suburbs and small towns. He focused on characters and psychological conflicts rather than dramatic situations. His central theme was the duty of the individual towards himself, not the out-of-date conventions of bourgeois society. "I have really never had a strong feeling for solidarity," Ibsen said to Brandes in 1871. Ibsen's anarchistic individualism made a deep impression on the younger generation outside Norway, where he was considered a progressive writer. In his home country, however, Ibsen was seen as a moral preacher and more conservative than Bjørnson. Ibsen's disciple or successor was [George Bernard Shaw](#), who dramatized with flair and wit generally accepted ideas into uncompromising plays. *Peer Gynt* (1867), a verse drama. The hero is the legendary Peer Gynt of Norwegian Folklore. Peer is a young peasant farmer, a liar and opportunist, the antithesis of Brand, he has no calling. He attends the country wedding feast, where he meets Solveig, a girl who is deeply attracted to him. Peer kidnaps the bride and later abandons her in the wilderness. A fugitive now, Peer experiences, like Sinbad the sailor, amazing adventures in many lands. He courts and then abandons the daughter of the Troll King. Before fleeing the country, he visits Aase, his aged mother, whose death he softens by a fantasy of a sleigh ride into an imaginary heaven. In his middle life Peer ships missionaries and idols to China, and becomes a slave trader. "To be creator of the universe, / So I need gold if I'm to play / The emperor's part with any force." He makes and loses money, and saves his own life in a shipwreck by letting another drown. Eventually Peer returns to Norway, old and embittered by his fruitless odyssey. He comes up before the Button Molder, who tells that "Friend, it's melting time," and tries to melt him in his ladle. Peer asks what is "to be yourself" and the Button Molder answers: "To be yourself is to slay yourself." Peer is horrified at the idea of losing his precious identity. However, he is saved from oblivion by the redeeming love Solveig, who has waited for him faithfully and in whose mind he has existed

as a real personality. Peer discovers his reason for being in her forgiving arms. Incidental music accompany the play was composed by Edward Grieg. - "Whatever his critics think, Ibsen does not regard Peer as a failure or a hollow man. Faust, Part Two is an even greater dramatic poem than Peer Gynt, but unlike Faust, Peer is the triumphant representation of a personality. What Ibsen values in Peer is what we should value: the idiosyncratic that refuses to be melted down into the reductive or the commonplace..." (Harold Bloom in *The Western Canon*, 1994)

ALMA MAHLER – A BIOGRAPHY BY FRANCOISE GIROUD

I was fascinated by the biography of [Alma Mahler as well as the play by Joshua Sobol](#). She was a remarkable woman in a century where women lived in the shadow of their men and husbands. She succeeded in her life time to be at the crossroads of most of the cultural facets of civilization: music (with one of the leading composers Gustav Mahler), architecture (with one of the leading architects Walter Gropius), literature (with one of the leading authors Franz Werfel), painting (with one of the leading painters Oscar Kokoshka), and even religion. She lived in two continents in a very troubled period, actually she lived (1879-1964) in the best period of the cultural geniuses I like most in contemporary: literature and drama, the twelfty of this book – Zola, Ibsen, Sartre, Chekhov, Tolstoy, Brecht, Pirandello, Proust, Lorca, Strindberg, painting and sculpture - Monet, Renoir, Cezanne, Rodin, Klimt, classical music, opera and ballet – Mahler, Verdi, Puccini, Tchikovsky, Stravinsky, in modern architecture..., but she was hit by personal tragedies, she could not achieve happiness and peace of mind, she was a fascinating personality but also a tragic one. She may be not one of the greatest figures of this twelfty, although she was very talented, but she was associated to some of the giants of our twelfty and influenced them, and she was one of the most interesting and typical persons.

Born in 1879, the daughter of a Viennese painter, [Alma Mahler](#) inspired the passionate love and devotion of an astonishing array of creative artists. She married three of them--the composer Gustav Mahler, the architect Walter Gropius, and the writer Franz Werfel--and had a host of admirers and lovers, including the painters Oscar Kokoschka, Egon Schiele, and Gustav Klimt. The composer Alban Berg dedicated his opera *Wozzeck* to her and a violin concerto to the memory of her daughter, Manon, who died of polio. In *Alma Mahler*, Francoise Giroud provides a spirited portrait of one of Europe's great *femme fatales*, ranging from her childhood (she was raised on a steady diet of Nietzsche) to her heyday as a leading figure in Europe's art scene, to her later life as an exile in California and New York. We meet a woman of remarkable beauty and unconventional mind, the possessor of a fine, demanding intelligence, who was highly conscious of herself as a member of the elite, a woman never truly conquered by her lovers. Her last husband, Franz Werfel, called her "one of the very few sorceresses of our time." And indeed when she appeared, her presence attracted all eyes as she moved like a queen through a room. And what eyes she drew. Virtually all the great figures of 19th-century Vienna march through these pages, including Sigmund Freud, Richard Strauss, Arnold Schonberg, Hugo van Hofmannsthal, Karl Kraus, and Elias Canetti, and Giroud pens striking portraits of each. There are also many memorable scenes: Franz Werfel singing Verdi arias with James Joyce in a Paris cafe; the young Gropius, having an affair with then-married Alma, chased from the Mahler home by guard dogs and taking refuge under a bridge; Kokoschka, after his affair with Alma has died, commissioning a life-sized doll, a faithful reproduction of his former lover. But the heart of the book is Alma's marriage to Mahler. We read Alma's own first impression of Mahler--"He is terribly nervous. He paced around the

room like a wild animal. He's pure oxygen. You get burnt if you go too near." Unfortunately for Mahler, his attempt to subjugate his young wife to his will--"you have only *one* profession from now on: *to make me happy*"--led to disaster, and he himself was burnt. Alma Mahler stood at the center of the creative world, the intimate friend (if not lover) of the major artists of her age, and Giroud paints an unforgettable portrait. It was awarded France's *Grand Prix litteraire de la femme* in 1988. **Francoise Giroud** has written numerous books, including biographies of Marie Curie and Christian Dior. Director of the French magazine *Elle* from 1945 to 1952 and co-founder of *L'Express*, she was Minister of Culture under Giscard D'Estaing from 1974 to 1977. The main drawback of this biography is that it is very short, less than 200 pages, and I like biographies of 500-1,000 pages if not more. I would expect that Alma's exceptional adventure with some of the most cultural personalities of the century would be developed fully and not like in Giroud's rudimentary biography.

From Kirkus Reviews

Although in this unsatisfying biography she describes Alma Mahler as a "goddess who made a god of each of her lovers," Giroud (ed. in chief, *L'Express*; *I Give You My Word*, 1974) also depicts the composer's wife as an arrogant, narcissistic woman who played whatever role she was cast in by creative, demanding men who in turn adored her for conforming to their expectations. Mahler was born into the artistic circles of Vienna in 1879. According to Giroud, Gustav, her first husband and 20 years her senior, enslaved her to his domestic needs, denigrated her taste for Nietzsche, Wagner, and Plato, and read Kant to her while she was in labor with the second of their two daughters, who died at age four. Sexually deprived, Alma began an affair with architect Walter Gropius; her husband consulted Freud. After Gustav's death and several other affairs, Mahler married Gropius, with whom, Giroud says, she "had nothing in common" except an exquisite daughter who died at age 17. The couple divorced. Although the work of Mahler's creative mates "bored" her, as Giroud puts it, Mahler liked the painting of Oskar Kokoschka, with whom she had an affair before, at age 50, marrying Franz Werfel, the author of *The Song of Bernadette*. There were other lovers, even at age 55, in what Werfel called his wife's "last fling," with a 38-year-old priest. As Werfel's fame declined, Mahler resumed her role as the great composer's widow, or sometimes as the "widow of the four arts." She died in 1964, at age 85. A grudging tribute without insight, compassion, or even evidence of the "power" that inspired the love that Mahler supposedly cultivated as an art. Mahler's determination, which allowed her to survive the loss of children and husbands, and her life in prewar Vienna certainly deserve at least as much attention as the amount of benedictine she drank.

Alma Maria Mahler Gropius Werfel (born **Alma Maria Schindler**; 31 August 1879 – 11 December 1964) was a Viennese-born socialite and composer. She became the wife, successively, of composer [Gustav Mahler](#), architect [Walter Gropius](#), and novelist [Franz Werfel](#), as well as the consort of several other prominent men. Musically active from her teens, she was the composer of at least seventeen songs for voice and piano. In later years her salon became part of the artistic scene, first in Vienna, then in Los Angeles. Alma Schindler was born in Vienna, Austria (then [Austria-Hungary](#)), to the landscape painter [Emil Jakob Schindler](#) and his wife Anna Bergen (1857–1938), in 1879. Although later in life Mahler characterized her upbringing as privileged, the family is said to have been only moderately successful. After her father's death (1892), her mother married her late husband's former pupil, [Carl Moll](#), who was a co-founder of the [Vienna Secession](#). Alma's social interactions in her youth included friendships with the artists of the [Vienna Secession](#), among them [Gustav Klimt](#). As a young woman she had a series of flirtations, including Klimt, theater director [Max Burckhard](#), composer [Alexander von Zemlinsky](#).

On 9 March 1902 she married Gustav Mahler, who was nineteen years her senior and the director of the Vienna Court Opera. With him she had two daughters, Maria Anna (1902–1907), who died of [scarlet fever](#) or [diphtheria](#), and [Anna](#) (1904–1988), who became a sculptor. The terms of Alma's marriage with Gustav were that she would abandon her own interest in composing. Artistically stifled herself, she embraced her role as a loving wife and supporter of Gustav's music, together regularly attending the salon of Adele Bloch-Bauer ([Portrait of Adele Bloch-Bauer I](#)). Later in their marriage, after becoming severely depressed in the wake of Maria's death, she began an affair with the young architect [Walter Gropius](#) (later head of the [Bauhaus](#)), whom she met during a rest at a spa. On seeking advice from [Sigmund Freud](#), who cited Mahler's curtailing of Alma's musical career as a major marital obstacle, and following the emotional crisis in their marriage after Gustav's discovery of the affair, Gustav began to take a serious interest in Alma's musical compositions, regretting his earlier dismissive attitude and taking promotional actions, including editing and re-orchestrating some^{[[which?](#)]} of her works. Upon his urging, and under his guidance, she prepared five of her songs for publication (they were issued in 1910, by Gustav's own publisher, [Universal Edition](#)). After this turbulent period in their marriage, Alma and Gustav traveled to New York, where Gustav was seasonally engaged as a conductor. In 2/1911, he fell severely ill with an infection related to a heart defect that had been diagnosed several years earlier. He died in May, shortly after their return to Vienna.

After Mahler's death, she did not immediately resume contact with Gropius. Between 1912 and 1914 she had a tumultuous affair with the artist [Oskar Kokoschka](#), who created works inspired by his relationship with her, including his painting [The Bride of the Wind](#). Kokoschka's possessiveness wore on Alma, and the emotional vicissitudes of the relationship tired them both. With the coming of World War I, Kokoschka enlisted in the [Austro-Hungarian Army](#), and she subsequently distanced herself from him and resumed contact with Gropius, who was also serving in combat at that time. She and Gropius married in 1915 during one of his military leaves. They had a daughter together, [Manon Gropius](#) (1916–1935), who grew up being friends with [Maria Altmann](#). Manon died of [polio](#) at the age of 18. (Composer [Alban Berg](#) wrote his [Violin Concerto](#) in memory of her.) She became pregnant and gave birth to a son, Martin Carl Johannes Gropius (1918–1919). Gropius at first believed that the child was his, but Alma's ongoing affair with [Werfel](#) was common knowledge in Vienna by this time, and she was soon exposed. Within a year, they agreed to a divorce. In the meantime, Martin, who had been born prematurely, developed [hydrocephalus](#) and died at the age of ten months. Her divorce from Gropius became final in 1920. **While Gropius's military duties were still keeping him absent, she met and began an** affair with Prague-born poet and writer Franz Werfel in the fall of 1917. She and Werfel began openly living together from that point on. She postponed marrying Werfel until 1929, after which she took the name "Alma Mahler-Werfel".

In 1938, following the [Anschluss](#), Alma and Werfel, who was Jewish, were forced to flee Austria for France; they maintained a household in [Sanary-sur-Mer](#), on the [French Riviera](#), from summer 1938 until spring 1940. With the German invasion and occupation of France during World War II, and the deportation of Jews and political adversaries to [Nazi concentration camps](#), the couple were no longer safe in France and frantically sought to secure their emigration to the United States. In Marseille, they were contacted by [Varian Fry](#), an American journalist and emissary of the [Emergency Rescue Committee](#), a private American relief organization that came to the aid of refugee intellectuals and artists at that time. Since exit visas could not be obtained, Fry arranged for the Werfels to journey on foot across the [Pyrenees](#) into Spain, in order to evade the [Vichy French](#) border officials. From Spain, Alma

and Franz traveled on to Portugal and then boarded a ship for New York City. Eventually they settled in Los Angeles, where Werfel, who had already enjoyed moderate renown in the U.S. as an author, achieved popular success with his novel [The Song of Bernadette](#), which was made into a [film in 1943](#), and the science fiction novel, *Star of the Unborn*, published after his death. Werfel, who had experienced serious heart problems throughout their exile, died of a heart attack in California in 1945. In 1946 Mahler-Werfel became a U.S. citizen. Several years later she moved to New York City, where she remained a cultural figure. [Leonard Bernstein](#), who was a champion of Gustav Mahler's music, stated in his [Charles Eliot Norton lectures](#) of 1973 that Alma had attended some of his rehearsals. Bernstein considered her to be a "living" link to both Mahler and Alban Berg. He had not had the chance to meet either man, since he was of a later generation. Alma Mahler Werfel died 11 December 1964 in New York City. She is buried in the [Grinzing](#) section of Vienna, in the same cemetery as her daughter Manon Gropius and her first husband Gustav Mahler.

[KARL MARX](#) – A BIOGRAPHY BY DAVID MCLELLAN

It is difficult to read and understand Karl Marx's works and even Karl Marx's biography. Yet, I read it with great attention as I wanted to understand the man and his ideas. As a philosopher and economist he was the most influential personality in modern history. For better and for worse he influenced all Europe, Asia and America, half of Europe became communists in the 20th century – USSR and Eastern Europe, and half of Asia as well – China, Afghanistan, Mongolia, South Yemen, Indochina and Asian USSR. Many African countries had communist or neo-communist regimes – Angola, Benin, Congo-Brazzaville, Ethiopia, Mozambique, Somalia, but in the 21st century only one country remained communist – Cuba, while China, Laos and Vietnam have regimes that can be labeled as neo-communists. North Korea is no more officially communist. Yet, the fear of communism was instrumental in the establishment of the welfare state in Europe and the US, as in many Western countries the communist party was quite important – France, Italy, Spain, Greece, Germany. When the USSR crumbled the neoliberal regimes were no more afraid of communism and increased substantially inequality in the US and in Western Europe. All this turmoil came about [because of one](#) man, one giant, who devised a theory which seemed very appealing, especially to the masses who were extremely poor and even starving – as Marx said 'You have nothing to lose but your chains', 'Proletarians of the world – Unite!'. We can quote Marx in [hundreds of quotes](#) as he found ways to influence the masses with his works and slogans. I would add only one more of my own: "If Marx did not exist we would still be working in sweatshops in unhealthy conditions, paid minimum salaries by greedy capitalists who would pay us as little as necessary not to die from hunger. Proletariat and even 99% of the population would be exploited by the 1% who rules us and oppresses us. But, are we living in 1850 or in 2015? Is it not what Occupy Wall Street and all the protest organizations say, we are still in the same situation but at a higher level of welfare, which is due to Karl Marx and to the fear from his communism, but now that fear does not exist the ruthless neoliberal capitalists want to win back what they have lost in the last century, return us to the state of slavery, ruled by a chosen few & we have the right to choose between those who oppress us and those who enslave us!"

I am bringing here famous quotes from Karl Marx's works, some of them are still relevant today:

Religion is the sigh of the oppressed creature, the heart of a heartless world, and the soul of soulless conditions. It is the opium of the people.

Social progress can be measured by the social position of the female sex.

History repeats itself, first as tragedy, second as farce.

Workers of the world unite; you have nothing to lose but your chains.

From each according to his abilities, to each according to his needs.

Democracy is the road to socialism.

A specter is haunting Europe - the specter of communism.

Landlords, like all other men, love to reap where they never sowed.

If anything is certain, it is that I myself am not a Marxist.

The first requisite for the happiness of the people is the abolition of religion.

The writer must earn money in order to be able to live and to write, but he must by no means live and write for the purpose of making money.

Experience praises the most happy the one who made the most people happy.

The history of all previous societies has been the history of class struggles.

Revolutions are the locomotives of history.

Men's ideas are the most direct emanations of their material state.

The ruling ideas of each age have ever been the ideas of its ruling class.

The more the division of labor and the application of machinery extend, the more does competition extend among the workers, the more do their wages shrink together.

Jonathan Wolff, an eminent professor and Marx's expert, maintains that communism is relevant even today: " In recent years we could be forgiven for assuming that Marx has nothing left to say to us. Marxist regimes have failed miserably, and with them, it seemed, all reason to take Marx seriously. The fall of the Berlin Wall had enormous symbolic resonance: it was often taken to be the fall of Marxism as such, as well as of Marxist politics and economics. But in celebrating the end of the 'evil empire' we forgot that the thinkers who inspired Eastern European communism were not evil people. On the contrary, they saw themselves as our saviours. At huge personal cost they sought to liberate humanity from what they believed to be an inhumane economic and social system: capitalism. They were fired both by a vision of how society ought to be and an account of what was wrong with existing, bourgeois, society. The positive vision turned into a nightmare (although, as we shall see, whether communist regimes were an authentic interpretation of Marx's ideas is another question). But the failure of communism does not mean that all is well with Western, liberal, democratic capitalism. And it is Marx, above all, who still provides us with the sharpest tools with which to criticize existing society. We can think of Marx as the great-grandfather of today's anti-capitalist movement. Of course, much has changed. For example, Marx seems to have assumed that natural resources were inexhaustible, and thus he has a much more limited ecological perspective than one would expect today. But on the other hand Marx portrays a world in which the capitalist market comes to permeate society, putting a price on everything and crowding out non-economic forms of value. Businesses grow ever-larger, becoming more ruthless and exploitative—more vampire-like—in the process. Under capitalism progress comes at a high price. Marx's criticisms of late nineteenth-century society have enormous

relevance even in the early twenty-first century. We may have no confidence in his solutions, but this does not mean that the problems he identifies are not acute."

Karl Marx: His Life and Thought is a 1973 biography of [Karl Marx](#) by political scientist [David McLellan](#). The work was republished as *Karl Marx: A Biography* in 1995. McLellan deals with Marx's intellectual, political and private life. The 1995 edition includes a critical bibliography that briefly evaluates numerous works dealing with Marx and [Marxism](#), among them [Isaiah Berlin](#)'s *Karl Marx: His Life and Environment* (1939), [Herbert Marcuse](#)'s *Reason and Revolution* (1941), and [Leszek Kołakowski](#)'s *Main Currents of Marxism* (1976). The book has been described as, "The most comprehensive scholarly account of Marx's life and works" by professor of political theory [Terrell Carver](#). Historian of science Roger Smith calls it "readable and reliable". **Karl Marx** (5 May 1818 – 14 March 1883) was a [German](#) philosopher, economist, communist, sociologist, journalist and [revolutionary socialist](#). Born in [Prussia](#) (now [Rhineland-Palatinate](#)), he later became [stateless](#) and spent much of his life in London. Marx's work in economics laid the basis for much of the current understanding of labour and its relation to capital, and subsequent economic thought. He published numerous books during his lifetime, the most notable being *The Communist Manifesto* (1848) and *Das Kapital* (1867–1894). Born into a wealthy middle-class family in [Trier](#) in the [Prussian Rhineland](#), Marx studied at the universities of [Bonn](#) and [Berlin](#) where he became interested in the philosophical ideas of the [Young Hegelians](#). After his studies he wrote for the *Rheinische Zeitung*, a radical newspaper in [Cologne](#), and began to work out the theory of the [materialist conception of history](#). He moved to Paris in 1843, where he began writing for other radical newspapers and met [Friedrich Engels](#), who would become his lifelong friend and collaborator. In 1849 he was exiled and moved to London together with his wife and children, where he continued writing and formulating his theories about social and economic activity. He also campaigned for socialism and became a significant figure in the [International Workingmen's Association](#).

Marx's theories about society, economics and politics—the collective understanding of which is known as [Marxism](#)—hold that human societies progress through [class struggle](#): a conflict between an ownership class that controls production and a dispossessed labouring class that provides the labour for production. States, Marx believed, were run on behalf of the ruling class and in their interest while representing it as the [common interest](#) of all; and he predicted that, like previous socioeconomic systems, capitalism produced internal tensions which would lead to its self-destruction and replacement by a new system: [socialism](#). He argued that class antagonisms under capitalism between the bourgeoisie and proletariat would eventuate in the working class' conquest of political power and eventually establish a classless society, communism, a society governed by a [free association of producers](#). Marx actively fought for its implementation, arguing that the working class should carry out organised [revolutionary action](#) to topple capitalism and bring about socio-economic change. Both lauded and [criticised](#), Marx has been described as one of the most influential figures in human history. Many intellectuals, labour unions and political parties worldwide have been influenced by Marx's ideas, with many variations on his groundwork. Marx is typically cited, with [Émile Durkheim](#) and [Max Weber](#), as one of the three principal architects of modern [social science](#).

By [Barron Laycock](#) on February 24, 2004

Karl Marx's contribution to modern social thought is so immense it is now difficult to understand the profound degree to which much of what he thought and wrote has been almost totally discredited and discounted. This is not to deny the fact that his social theory is indeed

quite essentially flawed, but rather to suggest that given the relative proportions of his contribution to sociology, economics, and cultural critique, one tends to throw out the baby with the bath water in summarily rejecting all that this intellectual genius had to offer regarding the nature of modern capitalistic society. No book does a better job of presenting the broad sweep of Marx's remarkable critical contributions than this wonderful and quite comprehensive biography of Marx by renowned psychologist and academic David McLellan. With painstaking care and meticulous attention to detail, McLellan places Marx's life in context, showing how the multitude of social, cultural, and economic issues that formed him and scarred him early in life carried with them a most urgent message regarding the nature of modern society. Growing up a secular Jew in Germany, the phenomenally gifted young academic found himself barred from teaching based both on virulent anti-Semitism within the academic community and the fact that he was indeed correctly perceived as a radical thinker and political dissident from the beginning in the truculent and suffocating political environment within the society itself. Yet there was no denying either his intellectual brilliance or his charismatic abilities to fan the flames of political discontent almost everywhere he went over his sixty some years. The son of a comfortable Jewish professional who had adopted the Protestant faith for secular convenience, Marx found himself set adrift within currents that his own proclivities toward radical social, economic, and political analysis forced him to often flee one step ahead of arresting authorities. Marx finally settled into London, surviving through a combination of writing short newspaper articles and through the largesse and generosity of his long-time confidant and erstwhile ally in arms, Friedrich Engels, the scion of a quite prosperous industrial family who incessantly came to the aid of Marx and his perpetually destitute family. McLellan helps us to see how all the elements of the times and the sweep of historical circumstances sped Marx along toward political involvement in one of the most important social developments of the twentieth century. My own personal opinion is that a careful reading of Marx leads one to the conclusion that his observations are still strikingly accurate in terms of his prognostications regarding the destiny of capitalism and I remind the prospective reader that the jury is yet out, time still marches on, and that what is going on now around us can be quite persuasively interpreted in elegant Marxian terms. Enjoy!

VICTOR HUGO – OLYMPIO OU LA VIE DE HUGO, BIOGRAPHY BY ANDRE MAUROIS

Victor Hugo was the first great author whom I read, when I was still a boy, and he uncovered for me a wonderful world – France of the Middle Ages, France of the eighteenth century, France of the Revolution. Hugo has a style incomparable to any other author, which is quite impossible to translate – in poetry, drama, and prose. Hugo was the first humanist writer that I read, long before Emile Zola. Dumas and Verne are excellent authors but they don't have a humanist agenda as Hugo had. The foundations of my ethical beliefs are probably in Hugo's works, as he was greater than life, he not only wrote masterpieces, but he was also an exceptional person, that France reveres even today. Zola was not the author of all France – he was the author of half of France, of the socialist and humanist half as compared to the conservatives who abhorred him. But the veneration to Hugo is throughout all the classes of France – this was not so in the 19th century, as he was a republican anti-clerical, and the royalists and clericals did not like him although they respected him. But today, almost all Frenchmen love Hugo and his works. Andre Maurois succeeds to give us the fantastic story of Hugo's life in a very vivid way, as only a great author can tell the story of another great

author. I read this biography at least twice, and I still remember it as one of the most exhilarating biographies that I have ever read when I was young.

KIRKUS REVIEW

Destined for the broad market and recognition which came to Lelia, Maurois' recent biography of George Sand, and perhaps to go beyond it, this is a monumental study of a monumental poet and statesman. Reading this in comparison with the Lelia, it is a pleasure to note again Maurois' style, his choice of detail and emphasis that makes such a study thoroughly interesting to modern readers, his fine use of source material that covers hitherto unpublished letters as well as the most familiar of Hugo's poems, and the apt integration of the man's works with the man's life. To some readers who may come to this book as an introduction to Hugo, he emerges as a creature of amazing contrasts. The events in his life alone are enough to startle, but Maurois leads us into them, unfolding them so that their cumulative effect is particularly lasting. That Hugo was a quiet, retiring boy, a demanding and priggish suitor, a bored husband, and in old age a faun becomes especially clear in the perceptive reporting of his feelings towards women through letters he wrote and received and in the light of social background and his own erratic genius. So too does his evolution as a writer and believer in liberty as the root of good. The praise Hugo received from his contemporaries- Sainte Beuve, Lamartine, Vigny- and the contrast of his poems and plays with those of his forerunners in the romantic period firmly cast him in the role of spokesman for the French language of his day & the ""voice, in the wilderness"" who in exile kept the thought of freedom alive after 1850. A complete study, for a wide variety of readers.

Victor Marie Hugo (26 February 1802 – 22 May 1885) was a French poet, novelist, and dramatist of the [Romantic movement](#). He is considered one of the greatest and best-known French writers. In France, Hugo's literary fame comes first from his poetry and then from his novels and his dramatic achievements. Among many volumes of poetry, [Les Contemplations](#) and [La Légende des siècles](#) stand particularly high in critical esteem. Outside France, his best-known works are the novels [Les Misérables](#), 1862, and *Notre-Dame de Paris*, 1831 (known in English as [The Hunchback of Notre-Dame](#)). He also produced more than 4,000 drawings, which have since been admired for their beauty, and earned widespread respect as a campaigner for social causes such as the abolition of [capital punishment](#). Though a committed [royalist](#) when he was young, Hugo's views changed as the decades passed, and he became a passionate supporter of [republicanism](#); his work touches upon most of the political and social issues and the artistic trends of his time. He is buried in the [Panthéon](#). Victor Hugo's first mature work of fiction appeared in 1829, and reflected the acute social conscience that would infuse his later work. *Le Dernier jour d'un condamné* ([The Last Day of a Condemned Man](#)) would have a profound influence on later writers such as [Albert Camus](#), [Charles Dickens](#), and [Fyodor Dostoevsky](#). [Claude Gueux](#), a documentary short story about a real-life murderer who had been executed in France, appeared in 1834, and was later considered by Hugo himself to be a precursor to his great work on social injustice, [Les Misérables](#).

Hugo became the figurehead of the romantic literary movement with the plays *Cromwell* (1827) and *Hernani* (1830). Hugo's novel *Notre-Dame de Paris* ([The Hunchback of Notre-Dame](#)) was published in 1831 and quickly translated into other languages across Europe. One of the effects of the novel was to shame the City of Paris into restoring the much-neglected [Cathedral of Notre Dame](#), which was attracting thousands of tourists who had read the popular novel. The book also inspired a renewed appreciation for pre-Renaissance buildings, which thereafter began to be actively preserved. Hugo began planning a major novel about

social misery and injustice as early as the 1830s, but a full 17 years were needed for *Les Misérables* to be realised and finally published in 1862. Hugo was acutely aware of the quality of the novel and publication of the work went to the highest bidder. The Belgian publishing house Lacroix and Verboeckhoven undertook a marketing campaign unusual for the time, issuing press releases about the work a full six months before the launch. It also initially published only the first part of the novel ("Fantine"), which was launched simultaneously in major cities. Installments of the book sold out within hours, and had enormous impact on French society.

The critical establishment was generally hostile to the novel; [Taine](#) found it insincere, [Barbey d'Aurevilly](#) complained of its vulgarity, [Gustave Flaubert](#) found within it "neither truth nor greatness", the [Goncourt brothers](#) lambasted its artificiality, and [Baudelaire](#) – despite giving favourable reviews in newspapers – castigated it in private as "tasteless and inept". *Les Misérables* proved popular enough with the masses that the issues it highlighted were soon on the agenda of the [National Assembly of France](#). Today, the novel remains his most enduringly popular work. It is popular worldwide, and has been adapted for cinema, television, and stage shows. An apocryphal tale about the shortest correspondence in history is said to have been between Hugo and his publisher [Hurst and Blackett](#) in 1862. Hugo was on vacation when *Les Misérables* was published. He queried the reaction to the work by sending a single-character [telegram](#) to his publisher, asking ?. The publisher replied with a single ! to indicate its success. Hugo turned away from social/political issues in his next novel, *Les Travailleurs de la Mer* (*Toilers of the Sea*), published in 1866. The book was well received, perhaps due to the previous success of *Les Misérables*. Dedicated to the channel island of [Guernsey](#), where he spent 15 years of exile, Hugo tells of a man who attempts to win the approval of his beloved's father by rescuing his ship, intentionally marooned by its captain who hopes to escape with a treasure of money it is transporting, through an exhausting battle of human engineering against the force of the sea and a battle against an almost mythical beast of the sea, a giant squid. Superficially an adventure, one of Hugo's biographers calls it a "metaphor for the 19th century—technical progress, creative genius and hard work overcoming the immanent evil of the material world."

His last novel, *Quatre-vingt-treize* (*Ninety-Three*), published in 1874, dealt with a subject that Hugo had previously avoided: the [Reign of Terror](#) during the [French Revolution](#). Though Hugo's popularity was on the decline at the time of its publication, many now consider *Ninety-Three* to be a work on par with Hugo's better-known novels. Another masterpiece is - *L'Année terrible* - a series of poems written by [Victor Hugo](#) and published in 1872. They deal with the [Franco-Prussian War](#), the trauma of losing his son Charles, and with the [Paris Commune](#). Covering the period from August 1870 to July 1871, a group of poems encapsulates each month, blending Hugo's anguish over personal tragedies with his despair at the predicament of France.

*J'entreprends de conter l'année épouvantable,
Et voilà que j'hésite, accoudé sur ma table.
Faut-il aller plus loin ? dois-je continuer ?
France ! ô deuil ! voir un astre aux cieux
diminuer !
Je sens l'ascension lugubre de la honte.
Morne angoisse ! un fléau descend, un autre
monte.
N'importe. Poursuivons. L'histoire en a besoin.
Ce siècle est à la barre et je suis son témoin.*

I take up pen to tell of the terrible year,
And suddenly I stop, elbows on my desk.
Must I proceed? must I go on?
France! what horror! to see a star fade in the
heavens!
I feel the lugubrious ascent of disgrace.
Dismal anguish! one curse falls, a new one rises.
No matter. Let's continue. History needs this.
The century is in the dock and I am his witness.

My father Albert had three fields of interest: Books, Stamps, and Zionism. He wrote articles on Zionism, read many Zionist books, and risked to be imprisoned because of that by the Egyptian authorities as it was forbidden by law. He collected also thousands of stamps from all over the world, but his pride was on the 4 complete collections of Israeli stamps – mint, used, first day covers, with tabs. When he was more than 80 and not in his prime he was conned by a crook who came to his apartment and sold him counterfeit stamps – for the most valuable and rare Israeli stamps. He invested in his collection large amounts of money, and unfortunately when he passed away at the age of almost 88 we found the deceit and the value of the collections was quite small. You need to be a ruthless crook to con old people, but unfortunately this is quite common nowadays. My father was a fervent admirer of Victor Hugo; he was born about twenty years after Hugo died, so they were almost contemporary. He read and purchased most of Hugo's books, as well as many Alexandre Dumas books, but did not like much Emile Zola. Anyhow, he had a huge library with many books, some of them quite rare books. One of the rare books that my father had in his library was Victor Hugo's [L'annee terrible](#). It was a very fine book with illustrations by Flameng and Vierge, published by Michel Levy Freres, Editeurs, in 1874. On the first blank page of the book, I read an inscription in pencil - 15 francs (when? In 1874?) and a seal: I. M. Rofe – 30 August 92 (probably 1892) – Caire, Egypte, with the original signature of Isaac Rofe. Oh, that is indeed a rare book, I thought, published more than a century ago, I'll take it for evaluation to the antique dealer who was at the corner of Rue du Faubourg Saint Honore, near my hotel. At those times I travelled every month to Paris, so I brought it in my next trip. The antiquaire laughed at me and said that its value was 100 francs – \$14, because the first edition was in 1872, and the 1874 was the second edition which had no value. Really, I was frustrated that I would not get rich from the stamps or rare books, and I'll have to rely solely on the business that I make in Paris, the US and Israel, and not on rare books, stamps or inheritance. But, fortunately the inheritance that I received from my mother and father was the love of knowledge, reading books, getting a higher education than they received, as the aim of every generation, at least in our family, is that the children will be “better” than the parents, and the grandsons even “better”, that is Darwinism in its best form, by “better” I mean in education, success, achievements, intellectualism, moral attitude, but all should be identically “good”.

After three unsuccessful attempts, Hugo was finally elected to the [Académie française](#) in 1841, solidifying his position in the world of French arts and letters. A group of French academicians, particularly [Etienne de Jouy](#), were fighting against the "romantic evolution" and had managed to delay Victor Hugo's election. Thereafter he became increasingly involved in French politics. He was elevated to the peerage by King [Louis-Philippe](#) in 1841 and entered the Higher Chamber as a [pair de France](#), where he spoke against the [death penalty](#) and [social injustice](#), and in favour of [freedom of the press](#) and [self-government](#) for Poland. In 1848, Hugo was elected to the Parliament as a conservative. In 1849 he broke with the conservatives when he gave a noted speech calling for the end of misery and poverty. Other progressive speeches called for universal suffrage and free education for all children. Hugo's advocacy to abolish the death penalty was renowned internationally. One should bear in mind that Hugo's convictions were an exception.

When Louis Napoleon ([Napoleon III](#)) [seized complete power in 1851](#), establishing an anti-parliamentary constitution, Hugo openly declared him a traitor to France. He relocated to [Brussels](#), then [Jersey](#), from which he was expelled for supporting a Jersey newspaper that had criticised Queen Victoria and finally settled with his family at [Hauteville House](#) in [Saint Peter Port](#), [Guernsey](#), where he would live in exile from October 1855 until 1870. While in exile, Hugo published his famous political pamphlets against Napoleon III, [Napoléon le Petit](#) and

Histoire d'un crime. The pamphlets were banned in France, but nonetheless had a strong impact there. He also composed or published some of his best work during his period in [Guernsey](#), including *Les Misérables*, and three widely praised collections of poetry (*Les Châtiments*, 1853; *Les Contemplations*, 1856; and *La Légende des siècles*, 1859). He convinced the British government to spare the lives of six Irish people convicted of terrorist activities and his influence was credited in the removal of the death penalty from the constitutions of [Geneva](#), [Portugal](#) and [Colombia](#). He had also pleaded for [Benito Juárez](#) to spare the recently captured emperor [Maximilian I of Mexico](#) but to no avail. His complete archives (published by Pauvert) show also that he wrote a letter asking the USA, for the sake of their own reputation in the future, to spare [John Brown's](#) life, but the letter arrived after Brown was executed.

Although Napoleon III granted an amnesty to all political exiles in 1859, Hugo declined, as it meant he would have to curtail his criticisms of the government. It was only after Napoleon III fell from power and the [Third Republic](#) was proclaimed that Hugo finally returned to his homeland in 1870, where he was promptly elected to the National Assembly and the Senate. He was in Paris during the [siege by the Prussian army in 1870](#), famously eating animals given to him by the Paris zoo. As the siege continued, and food became ever more scarce, he wrote in his diary that he was reduced to "eating the unknown". Because of his concern for the rights of artists and [copyright](#), he was a founding member of the *Association Littéraire et Artistique Internationale*, which led to the [Berne Convention for the Protection of Literary and Artistic Works](#). However, in Pauvert's published archives, he states strongly that "any work of art has two authors : the people who confusingly feel something, a creator who translates these feelings, and the people again who consecrate his vision of that feeling. When one of the authors dies, the rights should totally be granted back to the other, the people".

Hugo's religious views changed radically over the course of his life. In his youth, he identified as a Catholic and professed respect for Church hierarchy and authority. From there he became a [non-practicing Catholic](#), and increasingly expressed anti-Catholic and [anti-clerical](#) views. He frequented [spiritism](#) during his exile (where he participated also in many [séances](#) conducted by Madame [Delphine de Girardin](#)), and in later years settled into a [rationalist deism](#) similar to that espoused by [Voltaire](#). A census-taker asked Hugo in 1872 if he was a Catholic, and he replied, "No. A [Freethinker](#)". After 1872, Hugo never lost his antipathy towards the Catholic Church. He felt the Church was indifferent to the plight of the working class under the oppression of the monarchy. Perhaps he also was upset by the frequency with which his work appeared on the Church's [list of banned books](#). Hugo counted 740 attacks on *Les Misérables* in the Catholic press. When Hugo's sons Charles and François-Victor died, he insisted that they be buried without a [crucifix](#) or priest. In his will, he made the same stipulation about his own death and funeral. Hugo's [rationalism](#) can be found in poems such as *Torquemada* (1869, about [religious fanaticism](#)), *The Pope* (1878, [anti-clerical](#)), *Religions and Religion* (1880, denying the usefulness of churches) and, published posthumously, *The End of Satan and God* (1886 and 1891 respectively, in which he represents Christianity as a [griffin](#) and [rationalism](#) as an [angel](#)). [Vincent van Gogh](#) ascribed the saying "Religions pass away, but God remains", actually by [Jules Michelet](#), to Hugo.

In another context I brought one of my most favorite poems by Victor Hugo, that summarizes my attitude towards business ethics, and towards life in general. I may be a super nerd, but deep in my soul I am a revolutionary, fighting for my ideas, like Hugo, Zola, Ibsen, and the prophets... I am no more politically correct, I would rather be approximately right than precisely wrong, and I prefer to put a red hat on the old dictionary, making a tempest at the

bottom of the inkstand, leaping out of the ring and breaking the compass. I would rather establish democratically a Second Republic of Israel than try to change the situation with a political party, as it was proved inefficient throughout the years, and especially since December 2018. I point the finger at the wrongdoers, the hypocrites, the crooks, and call them by their name. My book's purpose is to blend the white swarm of ideas with the black multitude of words. In my 77th year I know all the tricks of the trade, I found out that more activism is needed in order to make an impact in the near future. A new revolutionary wind is needed, even if it is not based on smoking-gun evidence. Most of what I preconize in my books cannot be fully proven, as the wrongdoers prefer to conduct their abuse in the dark, like Mack the knife. A fresh wind of transparency is essential, and I base my books inter alia on entries that I have found on the Internet, the ultimate transparency democratic vehicle...

"Je fis souffler un vent révolutionnaire.
 Je mis un bonnet rouge au vieux dictionnaire.
 Plus de mot sénateur! plus de mot roturier!
 Je fis une tempête au fond de l'encrier,
 Et je mêlai, parmi les ombres débordées,
 Au peuple noir des mots l'essaim blanc des idées;
 Et je dis: Pas de mot ou l'idée au vol pur
 Ne puisse se poser, toute humide d'azur!...
 Je bondis hors du cercle et brisai le compas.
 Je nommai le cochon par son nom; pourquoi pas?"
 (Victor Hugo, Reponse a un acte d'accusation, Reply to a bill of indictment)
 "I have swept a revolutionary wind.
 I have put a red hat on the old dictionary.
 No more noble! no more common people!
 I have made a tempest at the bottom of the inkstand,
 And I have blended, between the overloaded shadows,
 The white swarm of ideas with the black multitude of words;
 And I said: No words where the pure flight of ideas
 Cannot land on, all humid from the azure sky!...
 I have leaped out of the ring and broken the compass.
 I have pointed the finger at the pig; why not?

MAHATMA GANDHI – BY JUDITH BROWN

It is quite odd that I would choose Gandhi as the personality who impressed me most, being raised in a Western culture and having never visited India. Yet, I admire Gandhi and his doctrine, and especially his non-violence attitude. An Israeli advocating non-violence – is it an oxymoron? Jews have preconized non-violence throughout 2,000 years, our prophets preached against violence, and I know that the Israeli society is mostly against violence of all sorts, and if it uses violence it is only against our enemies' aggression. This is not a coincidence that most of the Israelis who travel abroad after their service in the Israeli army travel to India, and Indian philosophy and [meditation](#). I have read several times the [Bhagavad Gita](#), translated from Sanskrit by my friend and fellow ethicist Itamar Theodor. The setting of the *Gita* in a battlefield has been interpreted as an allegory for the ethical and moral struggles of the human life. The *Bhagavad Gita*'s call for selfless action inspired many leaders of the [Indian independence movement](#) including [Bal Gangadhar Tilak](#) and [Mohandas Karamchand Gandhi](#). [Gandhi](#) referred to the *Gita* as his "spiritual dictionary". Yet, Gandhi never ceased trying to overturn the prejudices of Western modernity. He dressed as an Indian peasant and rejected all outward signs of being a modern intellectual or politician. True civilization, he

insisted, was about moral self-knowledge and spiritual strength rather than bodily well-being, material comforts, or great art and architecture. I believe like Gandhi that true civilization is moral self-knowledge and spiritual strength, but I am not willing to overlook bodily well-being, moderate material comfort, great art, architecture, literature and music. I found the harmony between an intellectual and cultural life with a cosmopolitan perspective, but rooted in my Jewish heritage, my country, and my language, without any inferiority complexes towards the West, nor any resentment from past colonialism, anti-Semitism, and discrimination. I feel well in my country Israel, and in my visits and stays in Paris and Provence, UK, US, Spain, Germany, Greece, Latin America, Singapore, Portugal, Scandinavia, the Netherlands, Canada, Australia, New Zealand, Italy and Switzerland. I adhere spiritually with Gandhi's vision, but I think that his asceticism does not suit me, but I don't want also luxuries and riches, just to live a moderate/ethical life, with a rich culture.

Mohandas Karamchand Gandhi (2 October 1869 – 30 January 1948) was the preeminent leader of the [Indian independence movement](#) in [British-ruled India](#). Employing [nonviolent civil disobedience](#), Gandhi led India to independence and inspired movements for civil rights and freedom across the world. The [honorific Mahatma](#) ([Sanskrit](#): "high-souled", "venerable") applied to him first in 1914 in South Africa, is now used worldwide. He is also called **Bapu** ([Gujarati](#): endearment for "father", "papa") in India. In common parlance in Bharat (India) he is called Gandhiji; reference as Gandhi can be considered lacking in good form and respect. Born and raised in a Hindu [merchant caste](#) family in coastal [Gujarat](#), [western India](#), and trained in law at the [Inner Temple](#), London, Gandhi first employed nonviolent civil disobedience as an expatriate lawyer in South Africa, in the resident Indian community's struggle for civil rights. After his return to India in 1915, he set about organising peasants, farmers, and urban labourers to protest against excessive land-tax and discrimination. Assuming leadership of the [Indian National Congress](#) in 1921, Gandhi led nationwide campaigns for easing poverty, expanding women's rights, building religious and ethnic amity, ending [untouchability](#), but above all for achieving [Swaraj](#) or self-rule. Gandhi famously led Indians in challenging the British-imposed salt tax with the 400 km [Dandi Salt March](#) in 1930, and later in calling for the British to [Quit India](#) in 1942. He was imprisoned for many years, upon many occasions, in both South Africa and India. Gandhi attempted to practise nonviolence and truth in all situations, and advocated that others do the same. He lived modestly in a [self-sufficient residential community](#) and wore the traditional Indian [dhoti](#) and shawl, woven with yarn hand-spun on a [charkha](#). He ate simple vegetarian food, [undertook long fasts](#) as a means of both self-purification and social protest.

Gandhi's vision of an independent India based on [religious pluralism](#), however, was challenged in the early 1940s by a new Muslim nationalism which was demanding a separate Muslim homeland carved out of India. Eventually, in August 1947, Britain granted independence, but the British Indian Empire was [partitioned](#) into two [dominions](#), a Hindu-majority [India](#) and Muslim [Pakistan](#). As many displaced Hindus, Muslims, and [Sikhs](#) made their way to their new lands, religious violence broke out, especially in the [Punjab](#) and [Bengal](#). Eschewing the [official celebration of independence](#) in Delhi, Gandhi visited the affected areas, attempting to provide solace. In the months following, he undertook several [fasts unto death](#) to promote religious harmony. The last of these, undertaken on 12 January 1948 at age 78, also had the indirect goal of pressuring India to pay out some cash assets owed to Pakistan. Some Indians thought Gandhi was too accommodating. [Nathuram Godse](#), a [Hindu nationalist](#), [assassinated Gandhi](#) on 30 January 1948 by firing three bullets into his chest at point-blank range. Indians widely describe Gandhi as [the father of the nation](#) ([Hindi](#):

राष्ट्रपिता). His birthday, 2 October, is commemorated as [Gandhi Jayanti](#), a [national holiday](#), and world-wide as the [International Day of Nonviolence](#).
Review on the biography by Pavan Varma

The first volume of Mohandas Karamchand Gandhi's autobiography, *My Experiments with Truth*, was published in 1927; the second volume surfaced in 1929. Both were written in Gujarati and priced at Re 1. Since then there have been innumerable biographies of Mahatma Gandhi, the entire trend culminating in Richard Attenborough's epochal film, *Gandhi*, in 1982. The question that arises now is: is there anything new remaining to be said about Gandhi? Reading Judith Brown's masterly biography of the great saint-politician, the answer is a categorical 'yes'. What is distinct about her work is that it is not merely a narration of the main events of the well-known life of the 'father of the Indian nation', but also a portrait of Gandhi, the man and the person; it is a portrait of not only the 'Mahatma' but also of the 'Bapu'; and it is a picture of not only the politician but also of the son, the father and the husband. It explores, through considerable new archival research, the inner dilemmas of a leader, not always victorious - as those who have put him on a pedestal tend to believe - but often in deep gloom; not always declaratory and triumphant, but often in contemplative retreat. Historians of peoples and places tend to focus on the peaks and shallows; this particular work dwells equally on the plateaus that stretch for long distances between the two. Brown begins with a succinct summary of the impact of British rule in India as a backdrop to Gandhi's birth in 1869. She then traces the evolution of Gandhi, the political agitationist - from the petty politics of Kathiawad to the national stage in India. The spiritual evolution of Gandhi, inseparable from his politics, is dexterously interwoven.

Important events are analysed to identify Gandhi's impact, his choices and options, in the context of the time, place and circumstance. Considerable space is given to Gandhi's views on matters other than politics: diet, personal hygiene, education, health and sex. For instance, Gandhi attempted a celibate life when still in his early 30s. In his autobiography he recalls that he was in bed with his wife when his ailing father died. Brown feels that Gandhi could never outlive this childhood association of sex with guilt. Many of Gandhi's views - and not only in matters of sex - would even be difficult for a modern Indian to understand, leave alone someone from the West. Brown's approach, however, is to treat Gandhi, in such matters, as a man of his time and place, with a particular philosophic and religious background. There is no derisive condescension here; even criticism is in the form of careful comment, not hasty dismissal. There is no doubt that even Gandhi's fads became elevated to the level of principles by the touch of his idealism and the force of his convictions. Each of his tools - ahimsa, satyagraha and non-cooperation - had their contradictions and limitations, and yet taken together they nurtured to victory the world's most unique anti-imperialist revolution. The problem is that Gandhi's personal morality and idealism were so absolute that they were incapable of emulation. In part, therefore, his legacy has been to spawn the most widespread hypocrisy in Indian public life: lip service to the ideals of the father of the nation, self-service in pursuit of the very things he spent a life-time trying to eliminate.

Review on the biography by Silvester Percival

Gandhi is often remembered simplistically as the champion of non-violent resistance and the "father of independent India." There is plenty of truth to this. Like Malcolm X and Martin Luther King, he is remembered most for a few signature achievements. But behind these signature achievements there was a highly complex private life, and a career trajectory that was never as simple or smooth as it would seem. Judith Brown's biography of Gandhi tries to

tell this more complex story. It is mainly a story of Gandhi's public life and the aspects that would later influence his view of Indian affairs: studying law in England as a young man, his early political activism in South Africa, his discovery of higher ideals upon return to India, and finally his influence on the movement for Indian independence. Brown depicts Gandhi as a character of both contradiction and vision, who confronted the most profound questions of the time "in the context of an active public life." She gives particular emphasis to Gandhi's personal crisis in the 1920s, which resulted from the failure of non-violence and his diminishing political influence as the leader of Congress. According to Brown, this crisis inspired Gandhi's transformation from a political activist to a spiritual leader, and ultimately characterized the remainder of his life. His new vision became the transformation of Indian society from the roots upwards in order to create a unified and harmonious India free of British rule. In contrast to the popular memory of Gandhi as the father of independent India, Brown stresses the ways in which he uneasily coexisted with the educated and westernized Indians who led the Indian National Congress. Gandhi's sympathies lay with the poor, with the masses unable to find representation within the system the British imposed – not with Congress leaders intent on expedient political solutions.

Gandhi's early struggles in convincing Indians of the importance of non-violence, in particular, set him at odds with Congress members, who wished for a more aggressive pursuit of independence. But it also cast him as an all-India public figure capable of commanding mass support, and made him recognizable to all who were politically aware. According to Brown, this charisma became Gandhi's appeal. His ideals reflected a unique combination of Indian traditionalism and Western idealism. He appealed to both Indians and Western sympathizers, who recognized him as a visionary spiritual leader, aloof from the fray of politics, and this is largely how he is remembered today. The only real weakness of this biography is that it focuses perhaps overmuch on Gandhi's public life when the reader perhaps wishes for a little more on his controversial personal life (Gandhi did not have such progressive views when it came to the treatment of women, such as his wife, for example). But this is still one of the best biographies of one of the most important figures of modern history.

Extracts from an Article: The Inner Voice/Gandhi's Real Legacy, by Pankat Misra, published on May 2, 2011 in The New Yorker

Gandhi's ideas were rooted in a wide experience of a freshly globalized world. Born in 1869 in a backwater Indian town, he came of age on a continent pathetically subject to the West, intellectually as well as materially. Europeans backed by garrisons and gunboats were free to transport millions of Asian laborers to far-off colonies (Indians to South Africa, Chinese to the Caribbean), to exact raw materials and commodities from Asian economies, and to flood local markets with their manufactured products. Europeans, convinced of their moral superiority, also sought to impose profound social and cultural reforms upon Asia. Even a liberal figure like John Stuart Mill assumed that Indians had to first grow up under British tutelage before they could absorb the good things—democracy, economic freedom, science—that the West had to offer. The result was widespread displacement: many Asians in their immemorial villages and market towns were forced to abandon a life defined by religion, family, and tradition amid rumors of powerful white men fervently reshaping the world, by means of compact & cohesive nation-states, the profit motive, and superior weaponry. Dignity, even survival, for many uprooted Asians seemed to lie in careful imitation of their Western conquerors. Gandhi, brought out of his semirural setting and given a Western-style education, initially attempted to become more English than the English. He studied law in

London and, on his return to India, in 1891, tried to set up first as a lawyer, then as a schoolteacher. But a series of racial humiliations during the following decade awakened him to his real position in the world. Moving to South Africa in 1893 to work for an Indian trading firm, he was exposed to the dramatic transformation wrought by the tools of Western modernity: printing presses, steamships, railways, and machine guns. In Africa and Asia, a large part of the world's population was being incorporated into, and made subject to the demands of, the international capitalist economy. Gandhi keenly registered the moral and psychological effects of this worldwide destruction of old ways and life styles and the ascendancy of Western cultural, political, and economic norms.

He was not alone. By the early twentieth century, modern Chinese and Muslim intellectuals were also turning away from Europe's universalist ideals of the Enlightenment, which they saw as a moral cover for unjust racial hierarchies, to seek strength and dignity in a revamped Confucianism and Islam. (These disenchanted Confucianists and Islamic modernists were later pushed aside by hard-line Communists and fundamentalists, respectively.) The terms of Gandhi's critique, however, were remarkably original. He set out his views in "Hind Swaraj or Indian Home Rule," a book written feverishly, in nine days, in November, 1909. Gandhi opposed those of his revolutionary Indian peers who—inspired by Marx, Herbert Spencer, Russian nihilists, and nationalists in Italy and Ireland—saw salvation in large-scale emulation of the West. Many of these were Hindu nationalists, intellectual ancestors of Gandhi's assassin, determined to unite India around a monolithic Hinduism. Gandhi saw that these nationalists would merely replace one set of deluded rulers in India with another: "English rule," as he termed it, "without the Englishman." Gandhi's indictment of modern civilization went further. According to him, the industrial revolution, by turning human labor into a source of power, profit, and capital, had made economic prosperity the central goal of politics, enthroning machinery over men and relegating religion and ethics to irrelevance. As Gandhi saw it, Western political philosophy obediently validated the world of industrial capitalism. If liberalism vindicated the preoccupation with economic growth at home, liberal imperialism abroad made British rule over India appear beneficial for Indians—a view many Indians themselves subscribed to. Europeans who saw civilization as their unique possession denigrated the traditional virtues of Indians—simplicity, patience, frugality, otherworldliness—as backwardness.

Gandhi never ceased trying to overturn these prejudices of Western modernity. He dressed as an Indian peasant and rejected all outward signs of being a modern intellectual or politician. True civilization, he insisted, was about moral self-knowledge and spiritual strength rather than bodily well-being, material comforts, or great art and architecture. He upheld the self-sufficient rural community over the heavily armed and centralized nation-state, cottage industries over big factories, and manual labor over machines. He also encouraged satyagrahis to feel empathy for their political opponents and to abjure violence against the British. For, whatever their claims to civilization, the British, too, were victims of the immemorial forces of human greed and violence that had received an unprecedented moral sanction in the political, scientific, and economic systems of the modern world. Satyagraha might awaken in them an awareness of the profound evil of industrial civilization. Hostile interpretations of Gandhi's acts stalked him throughout his life. Muslims accused him of being the harbinger of Hindu "Raj"; Hindu nationalists accused him of being insufficiently dedicated to their cause. Left-wing Indians suspected that he was cunningly preëempting class conflict on behalf of India's big businessmen. Most of Gandhi's European interlocutors regarded him with fear and distaste; Winston Churchill wanted Gandhi to be "bound hand and foot at the gates of Delhi

and then trampled on by an enormous elephant with the new Viceroy seated on its back.” A confidential government report on Gandhi’s years in South Africa declared that “the workings of his conscience . . . his ethical and intellectual attitude . . . baffles the ordinary processes of thought.” The British press as well as the government routinely took this disdainful view of India’s leading anti-colonial campaigner.

Gandhi was not only the most prolific of modern thinkers—his “Collected Works” will run to a hundred volumes—but also the most globalized and ecumenical, and, a century later, it’s still not easy to place him. His closest friends in South Africa were Jewish intellectuals from England and Germany. After trying vainly to turn himself into an English gentleman, he was initiated into Hindu philosophy by a Russian Theosophist. And he borrowed as much from the New Testament, Ruskin, Thoreau, G. K. Chesterton, and Tolstoy (the polemical Christian rather than the novelist) as from the Bhagavad Gita, whose affirmation of righteous war he reinterpreted as a parable of nonviolence. Though known as a devout Hindu, Gandhi rarely visited temples, and was generally repelled by the rituals and customs of organized religion. He disclaimed all responsibility for what his followers and detractors called “Gandhism,” declaring that any ideological “‘ism’ deserves to be destroyed.” Though he drew upon the language of modern anti-imperialism, he professed no faith in constitutional democracy, Communism, industrialization, or other forms of self-strengthening embraced by Indian and Asian anti-imperialists. He preferred, as his exasperated and articulate assassin put it, such “old superstitious beliefs” as the “power of the soul, the inner voice, the fast, the prayer and the purity of the mind.”

Gandhi’s nonconformist ways tend to appall and alienate secular-minded observers. George Orwell confessed to an “aesthetic distaste” for his “anti-human and reactionary” aims. “Gandhi’s teachings cannot be squared with the belief that Man is the measure of all things,” Orwell warned, correctly. Roberts is not entirely wrong to allege that Gandhi was “a political incompetent, and a fanatical faddist.” Advising European Jews to practice nonviolent resistance against Hitler, he was guilty of a grotesque misunderstanding of the Third Reich. Many of his acts were deeply selfish: he did not consult his wife before imposing his vow of celibacy on her. Yet the British historian Judith Brown exaggerates only slightly when she claims, in her introduction to “The Cambridge Companion to Gandhi,” that “anyone who considers many of the fundamental issues of human life, its goals, its capacities, and the nature of men and women in public communities, issues of violence and cooperation, and of ends and means, will find that Gandhi has been there before, and struggled with them.” Gandhi’s name, after all, is frequently and wistfully invoked in many conflict zones today; sometimes, the widely felt yearning for a Palestinian or Israeli Gandhi seems proof of the moral superiority of his nonviolent politics. He diagnosed many maladies of our interdependent world in ways that seem prescient. His ecological world view—summed up by his homily “Earth provides enough to satisfy every man’s need but not for every man’s greed”—and forays into organic farming no longer seem as eccentric as they did when hardly anyone had a private car and only a fraction of the world’s population regularly ate meat. Petra Kelly, a co-founder and the first leader of Germany’s increasingly powerful Green Party, credited Gandhi for the now commonplace belief that having an ecologically oriented society “reduces the risk that policies of violence will be pursued in our name.”

Gandhi’s greatest contribution to the arsenal of political activism, however, is his theory and practice of bringing together great masses of highly motivated and disciplined protesters in public spaces. Here his spiritual beliefs were crucial: the assumption, in particular, that,

regardless of the regime people lived under—democracy or dictatorship, capitalist or socialist—they always possessed a freedom of conscience, an inner capacity to make moral choices in everyday life. As his mass campaigns often proved, and the recent Arab uprisings have affirmed, such strongly self-aware individuals acting coöperatively in the spotlight of the world media could come to wield an astonishing amount of moral authority—the “authentic, enduring power” of people that, as Hannah Arendt wrote in her analysis of the Prague Spring of 1968, a repressive regime or government could neither create nor suppress through the use of terror, and before which it must eventually surrender. Gandhi did not see his own political activism as a means to a predetermined end, and exhorted his old Congress Party to dissolve itself after India’s independence instead of becoming the new ruling class. Gandhi felt politics to be too important to be left to professional politicians, or to the technocrats and journalists who shape government policy and influence public opinion. Indeed, as the philosopher Akeel Bilgrami points out in a stimulating essay in “The Cambridge Companion to Gandhi,” he recoiled from such instrumentalist categories of statecraft and politicking as “populations” and “citizenry.” For him, working and bonding with other flesh-and-blood men and women was the most satisfying way of being in the world. As such, political and social activism was an end in itself.

Bilgrami describes Gandhi as a greater “anti-imperialist theorist” than Lenin and Frantz Fanon. This seems right. Unlike them, Gandhi didn’t just single out Western imperialists, or blame capitalism’s unquenchable thirst for new markets and resources for European expansionism in Asia and Africa. In his view, organized exploitation of people and resources was a feature of all industrial civilization; and he did not spare its eager imitators in Asia, such as Japan, and their obsession with achieving national strength at the expense of the weak. He could never have advocated or endorsed something like the Great Leap Forward—Mao’s attempt to catch up with the industrialized West, which consumed between thirty and forty-five million lives. India, he was convinced, would be “a curse for other nations, a menace to the world,” once it became industrialized. Bilgrami shows how finely Gandhi integrated his religious beliefs and his political ones. According to him, Gandhi intuited that the triumph of a scientific world view over a religious one had “desacralized nature and made it prey without impunity to the most ruthlessly systematic extractive political economies—of mining, deforestation, plantation agriculture (what we now call agribusiness), and so on.” Defining humanity in terms of “gains and utilities,” the modern outlook “could not see the world itself as containing anything that made moral or normative demands on one,” and led East and West alike into a “cognitive enslavement.” For Gandhi, genuine anti-imperialism lay in devising a mode of politics and economy that did not lead millions of Indians into the iron cage of a “decadent and utilitarian modernity.”

The audacious radicalism of Gandhi’s ideas is too often lost in the blandly universal reverence his name evokes. It’s true that a lot of his arguments can seem like the ravings of a Luddite: his accusation, for instance, that modern lawyers and doctors make people more irresponsible and greedy. But they are not without a kernel of truth: a century later, we are more receptive to his idea that the profit motive makes lawyers divide rather than reconcile people, or that the lucrative business of modern medicine often treats symptoms while ignoring the real causes of disease. Dwight Macdonald claimed to love Gandhi precisely because he lacked respect for “railroads, assembly-belt production and other knick-knacks of liberalistic Progress” and did not make speeches about democracy and Fascism. “He was the last political leader in the world who was a person, not a mask,” Macdonald wrote in a tribute after Gandhi’s assassination, “the last leader on a human scale.” But Gandhi’s refusal to endorse one or

another of the many secular and rational ideologies of collective redemption (liberal capitalism, socialism, nationalism) also makes it difficult for us to enter his unique world view.

As a figure, the spiritually minded, sagelike thinker long ago faded from the mainstream of modern societies, together with religious faith, which used to prescribe ethical responsibilities and duties. Such traditional forms of authority have been displaced by ideologies, laws, and institutions, and the secular world views of science and commerce. It has been left to relatively marginal religious writers and philosophers such as Simone Weil, Reinhold Niebuhr, and Czeslaw Milosz to reckon with the difficulty of being moral men and women in complex, immoral societies. Gandhi, trying to devise a way of living ethically in the midst of the most violent century in history, now seems the most distinguished figure in this countercultural tradition; and if some part of his message rings true it is because we share his anxieties about the public life of our societies, which seems possessed of an irrational momentum all its own. States grow ever more machine-like, men are transformed into statistical choruses of voters, producers, patients, tourists or soldiers. In politics, good and evil, categories of the natural world and therefore obsolete remnants of the past, lose all absolute meaning; the sole method of politics is quantifiable success. Power is a priori innocent because it does not grow from a world in which words like guilt and innocence retain their meaning.

This could be Gandhi; it is actually Václav Havel, in his early essay "Politics and Conscience," describing the political consequences of the desacralized world—the loss of the human scale in Western democracies as well as in Communist dictatorships. Reflecting on the ideological standoffs of the Cold War, Havel was convinced that "a genuine, profound and lasting change for the better . . . can no longer result from the victory of any particular traditional conception." Instead, it would have to "derive from human existence, from the fundamental reconstitution of the position of people in the world, their relationships to themselves and each other, and to the universe." This sounds like a very tall order. But it was what Gandhi set his sights on, pitting himself against every political and social trend of the past two hundred years. Defeat was ordained. Yet there were many moments of redemptive glory in his great struggle. Emerging in the early nineteen-thirties from one of Gandhi's most brilliantly choreographed campaigns, Jawaharlal Nehru confessed, "What the future will bring I know not, but . . . our prosaic existence has developed something of epic greatness in it." Many more people since then have known this exhilaration of effecting change through individual acts of courage and empathy. It is what young Egyptians and Tunisians feel today, and their Yemeni counterparts may experience tomorrow: the ever renewable power of cooperative action, which is a truer measure of Gandhi's legacy than his many failures.

FEDERICO GARCIA LORCA— A BIOGRAPHY (THE ASSASSINATION) BY IAN GIBSON

The author I admire most in Spanish language is Cervantes, but the modern author I admire most is Federico Garcia Lorca. I have read his poetry, his plays, a biography, and I was moved by the story of his assassination. I strongly oppose any censure, any ban on books, as an intellectual has to be exposed to all the literature that he chooses. Lawrence was banned, Zola was banned, even Hugo was banned, many authors who wrote about freedom, who

opposed oppression, who were social activists were banned, not counting dissident authors as Heine because he was Jewish, Solzhenitsyn because he fought for freedom, Lorca because he was homosexual. We live in times that are both advanced and retrograde. Homosexuals are allowed to marry in many countries, while in others they are murdered. In 2015 in the advanced Israel a young teenager was murdered by an ultra-orthodox fanatic at a gay parade and the two orthodox parties' members of parliament left their seats when [a gay Likud member](#) was sworn in. Yet, many gays and lesbians are no more afraid to speak about their sexual orientation in Spain, Israel, France, the UK and the US. How can one ban such a marvelous author as Lorca, one of the best poets whom I ever read if not the best. I am privileged to understand Spanish because otherwise I would have lost in translation most of the flavor of Lorca's poems. I am very far from the ambience of Lorca's plays – *Yerma*, *Bodas de sangre*, *La casa de Bernarda Alba*... - but Lorca makes us identify with his protagonists and understand perfectly their motives, in an exemplary style.

Federico del Sagrado Corazón de Jesús García Lorca, known as **Federico García Lorca** (5 June 1898 – 19 August 1936) was a Spanish poet, playwright, and theatre director. García Lorca achieved international recognition as an emblematic member of the [Generation of '27](#). The Generation of '27 was a group consisting of mostly poets who introduced the tenets of European movements (such as symbolism, futurism, and surrealism) into Spanish literature. He was executed by [Nationalist](#) forces at the beginning of the [Spanish Civil War](#). His body has never been found. In 2008, a Spanish judge opened an investigation into Lorca's death. The García Lorca family eventually dropped objections to the excavation of a potential gravesite near [Alfacar](#), but no human remains were found. At dawn on the 19th of August 1936 Spaniards murdered the man who most profoundly embodied the poetic spirit of their country. Federico García Lorca was the victim of the passions that arose in Spain as the Church, the military and the bourgeoisie embarked on their reckless and brutal repression of "undesirables". For Lorca was not a political man; he embraced Spain - from its struggling leftist movement to its most conservative traditions - with a love that transcended politics. His "crime" was his antipathy to pomposity, conformity and intolerance. For years the Spanish government suppressed the truth about Lorca's death. In this recreation of the assassination, Ian Gibson redresses the wrong. Based on information only recently made available, this is an illumination not only of the death of a great poet, but of the atmosphere of Civil War Spain that allowed it to happen.

A review by [MH Lambert](#) on 14 Feb. 2010

This is basically a revised, more readable and more approachable English-language edition of Gibson's book about the Nationalist repression in Granada. This edition is subject to more revision and a more Lorca-based analysis of proceedings. This is no bad thing, Gibson does not pretend to be an academic historian but writes lucidly, engagingly and brilliantly about a brutal, controversial and mystified topic. For those wanting to delve briefly into one of the most whitewashed and misunderstood political murders in Spanish history - you need look no further than this. Gibson starts the book with an outline of Granada as an historical-cultural area and about how Lorca fitted into it all. He then elucidates the basic politics of the Republic and local politics of Granada in easily understandable and approachable terms. Gibson readily argues against the revisionist wisdom of an apolitical Lorca and inserts him in the narrative of the Republic. He does occasionally simplify issues but not to the detriment of his overall argument or the tone of the book. The main section of the book then deals with the rising, repression and revenge that engulfed Granada - eventually resulting in the death of Lorca. This is the main weight of the book and Gibson reconstructs this tumultuous time

through a great selection of primary evidence which paints a picture for the audience of life and death in Granada.

What makes this book great for the general reader is that Gibson leads you by the hand through all the controversies of the topic. Evidence and items are not left in the bibliography or footnotes alone, but incorporated and dealt with in the text itself. For instance, he discredits the arguments of Nationalist historians but explains WHY and HOW they are incorrect, scurrilous or downright fictitious. He meticulously - but not boringly - picks apart why he has constructed the sequence of events he has and backs it up to the reader with justification. He does not say it is the absolute truth, but suggests it is the most feasible with all the presentable evidence. This is even more interesting in the recent failed efforts to exhume his body and all the controversy surrounding the ruthless and systematic terror of the civil war. I would strongly recommend this book to those with a passing interest in the topic of Lorca, the Spanish Civil War and the circumstances of his death. It is a short and easily readable book which is aware of its shortcomings but is excellent at constructing and conveying the intensity of the time. Importantly, it does not require prior reading nor deals with the - now enormous - historiographical literature on the civil war. Written in plain English and with easily digestible chapters, this narrative demonstrates everything right on research about the war, and everything wrong with the conduct and experiences of participants during it.

A review by DANIEL EISENBERG, Florida State University:

This polemical and eminently readable book, probably the final one of this most controversial of topics, is a revised and expanded translation by the author of his original *La represión nacionalista en Granada en 1936 y la muerte de Federico García Lorca* (Paris, 1971). Gibson's strength is his exhumation and exploration of new sources, and where his book is good, it is very good indeed. He succeeded in talking to the evasive Ramón Ruiz Alonso, smuggling in with him a tape recorder, and unearthed a forgotten book of Alonso's, *Corporativismo* (Salamanca, 1937), which has important biographical information. He located and won the confidence of Angelina, the maid of the Montesinos family, who carried Federico his meals while he was in the Granada jail. By some wizardry he was able to consult in the newspaper's own office copies of the rightist *Ideal* for the initial days of the revolt. He consulted the cemetery records of Granada, and identifies and reproduces the death certificate of another man executed together with Lorca. This is first-rate sleuthing, and from documents and numerous interviews Gibson has been able to establish some things for the first time and to provide substantiation for others. The uprising in Granada was surely accompanied by widespread executions. The operation to remove Lorca from the Rosales' house, where he was hiding, was undoubtedly headed by Ruiz Alonso, and he was taken to jail in the car of Alonso's friend Juan Trescastro. Once in jail, he was kept there several days, presumably so that the governor Valdés could consult with Queipo de Llano about his fate. Gibson knows even the names of the members of the death squad at Víznar, which he decided not to publish. This is all the mechanics of the execution, however, and when discussing the more important question of the motives, Gibson's analysis is less satisfying. In an important clarification, he disproves the theory that Lorca's death was in retaliation for the supposed assassination of Benavente, documenting John Crow's observation that the first news of Benavente's "assassination" appeared after Lorca's death. But he has nothing to suggest in its place, save Lorca's friendship with Republican politicians, and ends with the lame conclusion that "Lorca was assassinated by a state of mind"... Gibson is obviously a competent scholar, even if he gets a bit carried away with a justified indignation over the events in Granada in 1936. I hope he will publish a revised edition of his book with a definitive explanation, and put an end to the speculation which as things stand now is bound to continue.

THE BLOOD OF A GENIUS, by ALLEN JOSEPHS; Allen Josephs, who is University Research Professor at the University of West Florida, October 8, 1989, on FEDERICO GARCIA LORCA A Life by Ian Gibson – The New York Times

The story of Lorca's brief life (1898-1936) seems forever fated to begin with his death: "Federico Garcia Lorca was thirty-eight when anti-Republican rebels in Granada assassinated him at the beginning of the Spanish Civil War in 1936." So begins, almost ineluctably, the introduction to Ian Gibson's rich biography of the great Spanish poet. Even in the most death-conscious country in Western tradition - where, as Lorca once pointed out, death is the national spectacle - his obsession with the subject was remarkable. In a poem written in New York in 1929, he predicted that he would be assassinated and that his body would never be found. On Aug. 19, 1931, he finished and dated an insistently death-centered, autobiographical play called "When Five Years Pass." Five years later to the day a fascist death squad executed him and dumped his body into a common, unmarked grave. In 1934 his friend Ignacio Sanchez Mejias returned to the bullring after seven years in retirement, and Lorca knew intuitively the matador would be killed. When it proved true he told a friend: "Ignacio's death is like mine, the trial run for mine." The matador, he commented, "did everything he could to escape from his death, but everything he did only helped to tighten the strings of the net." That Sophoclean description fits Lorca's death as well. At the beginning of the civil war he should have been in Mexico with his favorite actress, Margarita Xirgu, who was there staging his plays. But he hesitated to leave Spain. When the violence preceding the military uprising began in Madrid, Lorca was frightened and decided to go home to Granada instead. He was repeatedly warned not to go, and his once-close friend, the film maker Luis Bunuel, was adamant: "Dreadful things are going to happen. Stay here. You'll be much safer in Madrid." Yet, like the figure summoned to a date with death in one of his "Gypsy Ballads," Lorca went home to Granada and his fate. Against that dark backdrop, his life sometimes seemed like a display of fireworks. "Life is laughter," he once remarked, "amid a rosary of deaths." Actor, director, scene designer, costume designer, pianist, guitarist, folklorist, painter, essayist, playwright and poet - he developed into a consummate artist whose genius in theater, music, art and poetry rather defies description or comparison, and he has now become the most widely translated Spanish author of all time.

He also possessed a rare talent for performance, and his "lectures" in Spain, Cuba and Argentina brought thunderous applause from his admirers. In New York in 1929-30, knowing little English, he electrified cultural gatherings by reciting his poetry, singing and accompanying himself on the piano. His theatrical success in Argentina in 1933-34 was such that the Chilean poet Pablo Neruda called it "the greatest triumph ever achieved by a writer of our race." Years later Neruda would remember with intense nostalgia the months preceding the civil war in Madrid as "the great days of my life. It was such a splendid and generous rebirth of Spanish creative life that I never again saw anything that could approach it." There were many stars in that fugitive Hispanic Pleiade, but Lorca burned the brightest. Mr. Gibson has captured the chiaroscuro of Lorca's life as no one before him has done. Unlike previous biographers, he was allowed access to the Lorca archives, specifically to "many unpublished manuscripts, his letters to his family, and a wide range of correspondence received." He was also given encouragement, cooperation and "much useful information" by Isabel Garcia Lorca, the poet's younger sister. Armed with that privileged information, 20 years of research, a scrupulous sense of honesty and the wise decision to limit himself to Lorca's life and not to

include elaborate critical consideration of his works, Mr. Gibson has written a distinguished biography that never falters on the tightrope between readability and credibility.

To say that Ian Gibson - Irish by birth and a Spanish citizen since 1984 - is the authority on Lorca's life is probably to understate the case. He began in Paris in 1971 (because of censorship in Spain) with a ground-breaking book on Lorca's assassination. Since moving permanently to democratic Spain in 1978, he has written a number of books on Lorca and the Spanish Civil War. In 1985 and 1987, he completed the two volumes, published in Spain, of his magnum opus on Lorca. "Federico Garcia Lorca: A Life" is the author's own English-language condensation of that work. In the course of his far-ranging research, he has tracked down hundreds of sources all over Spain and in all the places where Lorca spent any time: the United States, England, Cuba, Uruguay and Argentina. Mr. Gibson understands Spanish culture from the inside, and he paints the complex historical and geographical background of Lorca's native region of Andalusia perfectly. His opening chapters, set in Granada and the surrounding countryside, are as informative as they are graceful and witty. In straightforward chronological fashion, he goes on to render the familiar outlines of Lorca's life: the idyllic childhood in the village of Fuente Vaqueros; the liberal education of a talented, sensitive and somewhat feckless student in Granada; the glorious early years in Madrid at the Residencia de Estudiantes, surrounded by the already eccentric painter Salvador Dali, Luis Bunuel and other young luminaries from all over Spain; the publication in 1928 of "Gypsy Ballads," the most popular book of poetry ever published in Spanish; the frustration, depression and rejection that followed - "An Andalusian Dog," Dali and Bunuel's revolutionary film of 1929, refers specifically to Lorca - and the subsequent flight to New York and Havana; the optimistic early days of the Spanish Republic when he was artistic director of the University Theater, touring with the classics of the Spanish stage to outlying towns and villages; the theatrical triumphs in Buenos Aires and Barcelona; and finally the political turmoil of the waning days of the republic, the uprising and the senseless slaughter of a poet.

Within that chronological frame, however, Mr. Gibson traces three intertwining threads of Lorca's life: religious belief, sexuality and social concern. It is in these areas - and their integral relationship to Lorca's creative powers - that his investigation and analysis are at their sharpest, his new and definitive contributions most important. Lorca was a mystical poet, a pantheistic purveyor - both provider and foreseer - of mystery, but he was also a fierce rebel against ecclesiastical authority and dogmatism. Calling Lorca's youthful rebellion "Swinburnian in its intensity," Mr. Gibson gives irrefutable evidence of "a passionate hatred for the Christian God." He cites important unpublished early poems that reveal an embittered young artist for whom the orthodox ideals of God, church and country were anathema, but who identified so deeply with the figure of Jesus that, at the age of 19, he began a play called "Christ: A Religious Tragedy." That the poet's Dionysian homoeroticism paralleled his religious heterodoxy is reasonably well known. But Mr. Gibson has greatly amplified our understanding of Lorca's involvement with the most significant figures of his time, especially Salvador Dali. At the vaunted height of their complex relationship they thought of themselves as the twin souls of Greek mythology, Castor and Pollux. Indeed, they had many similarities, and both were subject to obsessions with dreams, death and sex. As Mr. Gibson's analysis shows, although their physical relationship did not develop (Dali was unreciprocal), the effect they had on each other's lives and art was deep and enduring.

Lorca's outspoken social concerns - including, for example, published remarks about Granada's having "the worst middle class in Spain today," which "infuriated many people" there - are inseparable from his religious and sexual iconoclasm. Although he was not actively

political, his deep commitment to democracy and freedom was part and parcel of his revolutionary ideas about the theater. This past July in Madrid, Lorca's most startlingly modern play, the so-called "Play Without a Name" - a long, unfinished fragment that had never before been staged - sold out and has had to be held over for the fall season. This new biography goes to the heart of Lorca's explosive genius and helps explain the undiminished appeal of such radically innovative theater. Mr. Gibson has accomplished an original critical triangulation - one that is essential for fully understanding Lorca's life, his art and his death. He has told us those parts of Lorca's life he has actually been able to verify and has not indulged in surmises. His disarming candor about the impossibility of always knowing the truth and the lack of any overriding thesis lend this very believable account the air of a classic. It has taken a long time for Lorca's full story to come to light, but now that the Spanish Civil War - so symbolic of the violence of our time - is half a century behind us, it is appropriate to have Mr. Gibson's monumental biography of its most gifted victim. **THE GRANDSON OF AN IRISH FASCIST?**

"I practiced the arts of sleuthing, lying and bribing people," Ian Gibson recalled about his earliest investigations into the death of Lorca, which began in Spain in 1965. To get access to a collection of Spanish newspapers, Mr. Gibson was particularly creative: "I said I was the grandson of an Irish fascist general and that I was researching the Irish contribution to the Spanish Civil War." One of Mr. Gibson's earlier books, "The Assassination of Federico Garcia Lorca," won the Prix International de la Presse in 1971 and was banned in Spain. After the death of Generalissimo Francisco Franco in 1975, official obstacles facing Mr. Gibson slowly eased, only to be replaced by those thrown up by friends and admirers wanting to protect Lorca from Mr. Gibson's "prying on private territory." "It's not surprising that the first Lorca biography was done by a foreigner, because there's a complete lack of a biographical tradition in Spain," according to Mr. Gibson, a native of Ireland who became a Spanish citizen in 1984. "Anytime I asked anything about Lorca's personal life or his sexuality, I was called 'morboso,' or morbid."

The absence of documentation about the poet's sexual life is "an important loss, but I can honestly say it's not my fault," Mr. Gibson said by telephone from his apartment in Madrid. "Lorca was very careful with his letters, and other people were very careful with them too." When he began work on his biography of Lorca in 1978, Mr. Gibson returned to Spain hoping for an advance from a publisher. Instead, he found himself churning out five other books to support his family while researching Lorca's life. "I kept thinking that if I could write just one more I'd be ahead of the game, so I could concentrate fully on Lorca. That never happened." Even now, with his life of the poet published, he acknowledges he may not be finished. "If something significant came to light, if his personal letters were found, I'd have to revise." **JOSEPH A. CINCOTTI**

García Lorca's return to Spain in 1930 coincided with the fall of the dictatorship of [Primo de Rivera](#) and the re-establishment of the [Spanish Republic](#). In 1931, García Lorca was appointed as director of a university student theatre company, Teatro Universitario la Barraca (The Shack). This was funded by the [Second Republic's](#) Ministry of Education, and it was charged with touring Spain's most remote rural areas in order to introduce audiences to radically modern interpretations of classic Spanish theatre free of charge. With a portable stage, and little equipment, they sought to bring theatre to people who had never seen any, with García Lorca directing as well as acting. He commented: "Outside of Madrid, the theatre, which is in its very essence a part of the life of the people, is almost dead, and the people suffer accordingly, as they would if they had lost their two eyes, or ears, or a sense of taste."

We [La Barraca] are going to give it back to them". His experiences of travelling through impoverished rural Spain and New York (particularly amongst the disenfranchised African American population), transformed him into a passionate advocate of the theatre of social action. He wrote "The theatre is a school of weeping and of laughter, a free forum, where men can question norms that are outmoded or mistaken and explain with living example the eternal norms of the human heart".

While touring with *La Barraca*, García Lorca wrote his now best-known plays, the *Rural Trilogy* of [Bodas de Sangre](#) (*Blood Wedding*), [Yerma](#) and [La Casa de Bernarda Alba](#) (*The House of Bernarda Alba*), which all rebelled against the norms of bourgeois Spanish society. He called for a rediscovery of the roots of European theatre and the questioning of comfortable conventions such as the popular drawing room comedies of the time. His work challenged the accepted role of women in society and explored taboo issues of homoeroticism and class. García Lorca wrote little poetry in this last period of his life, declaring in 1936, "theatre is poetry that rises from the book and becomes human enough to talk and shout, weep and despair." Travelling to Buenos Aires in 1933 to give lectures and direct the Argentine premiere of *Blood Wedding*, García Lorca spoke of his distilled theories on artistic creation and performance in the famous lecture *Play and Theory of the Duende*. This attempted to define a schema of artistic inspiration, arguing that great art depends upon a vivid awareness of death, connection with a nation's soil, and an acknowledgment of the limitations of reason. As well as returning to the classical roots of theatre, García Lorca also turned to traditional forms in poetry. His last poetic work *Sonnets to his dark love* (1936) was long thought to have been inspired by his passion for Rafael Rodríguez Rapun, secretary of La Barraca, but new documents and mementos discovered in 2012 suggest that the actual inspiration was Juan Ramírez de Lucas, a 19-year-old with whom Lorca hoped to emigrate to Mexico. The love sonnets are inspired by the 16th-century poet [San Juan de la Cruz](#). La Barraca's subsidy was cut in half by the new government in 1934, and its last performance was given in April 1936. Lorca kept Huerta de San Vicente as his summer house in Granada from 1926 to 1936. Here he wrote, totally or in part, some of his major works, among them [When Five Years Pass](#) ([Así que pasen cinco años](#)) (1931), [Blood Wedding](#) (*Bodas de sangre*) (1932), [Yerma](#) (1934) and *Diván del Tamarit* (1931–1936). The poet lived in the Huerta de San Vicente in the days just before his arrest and assassination in August 1936. Although García Lorca's artwork doesn't often receive attention he was also a keen artist.

García Lorca left Madrid for his family home in Granada only three days before the [Spanish Civil War](#) broke out (July 1936). The Spanish political and social climate had greatly intensified after the murder of prominent monarchist and anti-[Popular Front](#) spokesman [José Calvo Sotelo](#) by [Republican Assault Guards](#) ([Guardia de Asalto](#)). García Lorca knew that he would be suspect to the rising right wing for his outspoken socialist views. Granada was so tumultuous that it had had no mayor for months; no one dared accept the job. When Lorca's brother-in-law, Manuel Fernández-Montesinos, agreed to accept the position, he was immediately assassinated. On the same day he was shot, 18 August, Lorca was arrested. It is thought that García Lorca was shot and killed by Nationalist militia on 19 August 1936. The author [Ian Gibson](#) in his book *The Assassination of García Lorca* alleges that he was shot with three others (Joaquín Arcollas Cabezas, Francisco Galadí Melgar and Dióscoro Galindo González) at a place known as the Fuente Grande, or Great Fountain in Spanish, which is on the road between [Víznar](#) and [Alfacar](#). Police reports released by radio station Cadena Ser in April 2015 conclude that Lorca was executed by fascist forces. Significant controversy remains about the motives and details of Lorca's murder. Personal, non-political motives have also been suggested. García Lorca's biographer, Stainton, states that his killers made remarks

about his sexual orientation, suggesting that it played a role in his death. [Ian Gibson](#) suggests that García Lorca's assassination was part of a campaign of mass killings intended to eliminate supporters of the [Marxist Popular Front](#). However, [Gibson](#) proposes that rivalry between the [anti-communist Spanish Confederation of the Autonomous Right](#) (CEDA) and the [Falange](#) was a major factor in Lorca's death. Former CEDA Parliamentary Deputy [Ramón Ruiz Alonso](#) arrested García Lorca at the Rosales's home, and was the one responsible for the original denunciation that led to the arrest warrant being issued.

It has been argued that García Lorca was apolitical and had many friends in both Republican and Nationalist camps. [Gibson](#) disputes this in his 1978 book about the poet's death. He cites, for example, [Mundo Obrero's](#) published manifesto, which Lorca later signed, and alleges that Lorca was an active supporter of the [Popular Front](#). Lorca read this manifesto out loud at a banquet in honour of fellow poet [Rafael Alberti](#) on 9 February 1936. Many anti-communists were sympathetic to Lorca or assisted him. In the days before his arrest he found shelter in the house of the artist and leading [Falange](#) member [Luis Rosales](#). Indeed, evidence suggests that Rosales was very nearly shot as well for helping García Lorca by the Civil Governor Valdes. The [Basque](#) Communist poet [Gabriel Celaya](#) wrote in his memoirs that he once found García Lorca in the company of [Falangist](#) José Maria Aizpurua. Celaya further wrote that Lorca dined every Friday with [Falangist](#) founder and leader [José Antonio Primo de Rivera](#). On 11 March 1937 an article appeared in the [Falangist](#) press denouncing the murder and lionizing García Lorca; the article opened: "The finest poet of Imperial Spain has been assassinated." Jean-Louis Schonberg also put forward the 'homosexual jealousy' theory. The dossier on the murder, compiled at [Franco's](#) request and referred to by Gibson and others, has yet to surface. The first published account of an attempt to locate Lorca's grave can be found in British traveller and Hispanist [Gerald Brenan's](#) book 'The Face of Spain'. Despite early attempts such as Brenan's in 1949, the site remained undiscovered throughout the Franco era.

GEORGE SAND – BIOGRAPHIES BY JOSEPH BARRY AND ANDRE MAUROIS

Is there a special category of writing – women writing? And who are the women who would be included in this category? George Sand, JK Rowling, Mme. de la Fayette, Simone de Beauvoir, Jane Austen, Virginia Woolf, George Eliot, Vicki Baum, Emily Bronte, Charlotte Bronte, Isabel Allende, Ronit Matalon? I personally don't think that the writing by women is different from men's writing; in my cosmopolitan belief I wouldn't say even that there is a material difference between writing by Russian, French, Spanish, English or German authors. Of course, authors tend to write on subjects that they know most, but if you read Daniel Deronda or The Mill on the Floss would you know that they were written by a woman – George Eliot? Are the Bronte's sisters novels feminine in any way? And what about Harry Potter if you didn't know that it was written by a woman would you guess that? Some of the writings by Simone de Beauvoir are feminine, The Second Sex probably but not The Mandarins. George Sand's novels are very good, not excellent maybe as Balzac's or Zola's, but interesting and well written. However, what attracted me most was George Sand's personality, her life, her philosophy of life, her independence. She did not behave manly as people often write, she behaved independently, as only men behaved in the 19th century, but as women behave today so often. She managed her own life and did not rely on her husband or her lovers, she stayed with them as long as she loved them and she left them when she wanted to be free. I have read two biographies, many of her books, her correspondence with Alfred de Musset, I have seen many films on her life, and I believe that I can judge her

personality quite well. She was "feminine" – good, considerate, caring, loving, but so can also be men – not machos but many men of today. And she did not care what society will say and how she will be judged, which is exactly like I believe a man or a woman should do – he should choose his own way regardless of the society's norms. She cared for the poor in an aristocratic society, she was intellectual and associated with some of the best authors and composers of her century, reminding us of Alma Mahler's life, but Sand was much more independent, she was a prominent author, and although she was ostracized by part of the society she had her own friends, and that is exactly like I did – telling overtly what is wrong in my society, in business life, writing and teaching it, and yet I never missed friends, as I have now more friends than I ever had before. Ultimately, society respects independent persons – men or women, and George Sand was respected by her contemporaries, she was the precursor of women's independence, I would not say feminism, as she had a humane category of her own.

Amantine-Lucile-Aurore Dupin (1 July 1804 – 8 June 1876), best known by her pseudonym **George Sand**, was a French novelist and memoirist. She is equally well known for her much publicized romantic affairs with a number of artists, including the composer and pianist [Frédéric Chopin](#) and the writer [Alfred de Musset](#). Sand wrote: "My name is not Marie-Aurore de Saxe, Marquise of Dudevant, as several of my biographers have asserted, but Amantine-Lucile-Aurore Dupin, and my husband, M. François Dudevant, claims no title: the highest rank he ever reached was that of infantry second lieutenant." Always known simply as "Aurore" she was born in Paris, but raised for much of her childhood by her grandmother, Marie-Aurore de Saxe, Madame Dupin de Francueil, at her grandmother's estate, [Nohant](#), in the French province of [Berry](#) (see [House of George Sand](#)). Sand later used the setting in many of her novels. It has been said that her upbringing was quite liberal. Her father, Maurice Dupin, was the grandson of the Marshal General of France, [Maurice, Comte de Saxe](#), an illegitimate son of [Augustus II the Strong](#), King of Poland and a Saxon elector, and a [cousin](#) to the sixth degree to the kings of France [Louis XVI](#), [Louis XVIII](#) and [Charles X](#). Sand's mother, Sophie-Victoire Delaborde, was a commoner.

In 1822, at the age of 18, Sand married [Casimir Dudevant](#) (1795–1871), illegitimate son of Baron Jean-François Dudevant. She and Dudevant had two children: [Maurice](#) (1823–1889) and Solange (1828–1899). In early 1831, she left her husband and entered upon a four- or five-year period of "romantic rebellion." In 1835, she was legally separated from Dudevant and took her children with her. Sand conducted affairs of varying duration with [Jules Sandeau](#) (1831), [Prosper Mérimée](#), [Alfred de Musset](#) (summer 1833 – March 1835), Louis-Chrysostome Michel, Pierre-François Bodge, [Félicien Mallefille](#), [Louis Blanc](#), and [Frédéric Chopin](#) (1837–1847). Later in life, she corresponded with [Gustave Flaubert](#). Despite their obvious differences in temperament and aesthetic preference, they eventually became close friends. She engaged in an intimate friendship with actress [Marie Dorval](#), which led to widespread but unconfirmed rumours of a lesbian affair. Letters written by Sand to Dorval made such references as "wanting you either in your dressing room or in your bed." Sand was also known for her implication and writings during the [Paris Commune](#), where she took a position for the Versailles assembly against the "[communards](#)", urging them to take violent action against the "rebels".

A liaison with the writer [Jules Sandeau](#) heralded her literary debut. They published a few stories in collaboration, signing them "Jules Sand". Her first published novel, *Rose et Blanche* (1831), was written in collaboration with Sandeau. She subsequently adopted, for her first independent novel, *Indiana* (1832), the pen name that made her famous – George Sand.

Drawing from her childhood experiences of the countryside, she wrote the pastoral novels [La Mare au Diable](#) (1846), *François le Champi* (1847–1848), [La Petite Fadette](#) (1849), and *Les Beaux Messieurs Bois-Doré* (1857). [A Winter in Majorca](#) described the period that she and Chopin spent on that island from 1838 to 1839. Her other novels include [Indiana](#) (1832), [Lélia](#) (1833), [Mauprat](#) (1837), *Le Compagnon du Tour de France* (1840), [Consuelo](#) (1842–1843), and *Le Meunier d'Angibault* (1845). Theatre pieces and autobiographical pieces include *Histoire de ma vie* (1855), *Elle et Lui* (1859, about her affair with Musset), *Journal Intime* (posthumously published in 1926), and *Correspondence*. Sand often performed her theatrical works in her small private theatre at the Nohant estate. In addition, Sand authored [literary criticism](#) and political texts. She wrote many essays and published works establishing her [socialist](#) position. Because of her early life, she sided with the [poor](#) and [working class](#) as well as [women's rights](#). When the [1848 Revolution](#) began, Sand started her own newspaper, which was published in a workers' co-operative. This allowed her to publish more political essays. She wrote: "I cannot believe in any republic that starts a revolution by killing its own proletariat." She was known well in far reaches of the world, and her social practices, her writings and her beliefs prompted much commentary, often by other luminaries in the world of arts and letters. A few excerpts demonstrate much of what was often said about George Sand: What a brave man she was, and what a good woman — [Ivan Turgenev](#), The most womanly woman — [Alfred de Musset](#), The most widely used quote of her own is: "*There is only one happiness in life, to love and be loved.*" George Sand died at [Nohant](#), near [Châteauroux](#), in France's [Indre département](#) on 8 June 1876, at the age of 71 and was buried in the grounds of her home there. In 2003, plans that her remains be moved to the [Panthéon](#) in Paris resulted in controversy.

Sand's reputation came into question when she began sporting men's clothing in public, which she justified by the clothes being far sturdier and less expensive than the typical dress of a noblewoman at the time. In addition to being comfortable, Sand's male dress enabled her to circulate more freely in Paris than most of her female contemporaries, and gave her increased access to venues from which women were often barred, even women of her social standing. Also scandalous was Sand's smoking tobacco in public; neither peerage nor gentry had yet sanctioned the free indulgence of women in such a habit, especially in public (though [Franz Liszt's](#) paramour [Marie d'Agoult](#) smoked large cigars). These and other behaviors were exceptional for a woman of the early and mid-19th century, when social codes — especially in the upper classes — were of the utmost importance. As a consequence of many unorthodox aspects of her lifestyle, Sand was obliged to relinquish some of the privileges appertaining to a baroness, though the mores of the period did permit upper-class wives to live physically separate from their husbands, without losing face, provided the estranged couple exhibited no blatant irregularity to the outside world. Poet [Charles Baudelaire](#) was a contemporary critic of George Sand: "She is stupid, heavy and garrulous. Her ideas on morals have the same depth of judgment and delicacy of feeling as those of janitresses and kept women ... The fact that there are men who could become enamoured of this slut is indeed a proof of the abasement of the men of this generation." Other writers of the period, however, differed in their assessment. [Flaubert](#), by no means an indulgent or forbearing critic, was an unabashed admirer. [Honoré de Balzac](#), who knew Sand personally, once said that if someone thought George Sand wrote badly, it was because their own standards of criticism were inadequate. He also noted that her treatment of imagery in her works showed that her writing had an exceptional subtlety, having the ability to "virtually put the image in the word". George Sand's life was filmed extensively in the following films:

- [*A Song to Remember*](#) (1945), directed by [Charles Vidor](#), starring [Merle Oberon](#) as George Sand and [Cornel Wilde](#) as Chopin.
- [*Song Without End*](#) (1960), also directed by Vidor (who died during production and direction was assumed by [George Cukor](#)), in which [Dirk Bogarde](#) starred as [Franz Liszt](#); [Patricia Morison](#) played a cameo role as George Sand
- [*Notorious Woman*](#) (1974), a seven-part [BBC](#) miniseries starring [Rosemary Harris](#) as George Sand and [George Chakiris](#) as Chopin.
- [*Impromptu*](#) (1991), starring [Judy Davis](#) as George Sand and [Hugh Grant](#) as Chopin.
- [*Les Enfants du siècle*](#) (1999), starring [Juliette Binoche](#) as George Sand and [Benoît Magimel](#) as [Alfred de Musset](#)
- [*Chopin*](#) (2002), directed by [Jerzy Antczak](#) starring [Danuta Stenka](#) as George Sand and [Piotr Adamczyk](#) as Chopin.
- *Sand... George en mal d'Aurore* (2003), TV, directed by Françoise-Renée Jamet and Laurent Marocco, with the voice of [Lambert Wilson](#)

Review on Maurois' biography – *Lelia ou la vie de George Sand*, by [Ludmila](#) on March 1, 2003:

Andre Maurois has great esteem for George Sand (the "nom de plume" of Aurore Dupin de Dudevant), which he eloquently manifests in his biography of the great literary heroine of 19th Century France. I have been an avid fanatic of Madame Sand for quite a while, having read many of her novels (she was incredibly prolific, and so it must take many more years than the 25 which I have thus lived to read her entire oeuvre), as well as several biographies written about her. I read her "Histoire de Ma Vie" ("Story of My Life") a couple of years ago, for an Independent Study I was conducting during my years as an undergraduate, and I was absolutely fascinated by her life and her spirit, which she manifested in her novels. She led a life which many of her contemporaries considered "depraved," yet she always lived fearlessly and emotionally, according to her own inclinations and heart ("Never fear when your heart tells you what to do. . . the heart can never be wrong," she once wrote). I picked up Maurois' biography on George Sand recently, and I devoured it in a matter of days. His approach and style is somewhat antiquated (he wrote this book in the 50's, after all), but he nevertheless seems to have an uncanny understanding of Sand's life and ideas. I highly recommend his biography to anyone who is not too acquainted with Sand or her writings, but for the true Sand aficionado, I suggest that he or she read her autobiography before Maurois' biography. After all, who is most entitled and prepared to speak about her own life than Sand herself? Nevertheless, Maurois has written a good and thorough account of Sand's life. It is not one of those most commendable biographies, in which the reader believes that the writer must have known his or her subject personally, but it is a solid account of Sand's life, regardless. Although Maurois holds George Sand in high regard, he is not biased in his opinions regarding the authoress. . . in fact, at times he almost seems to pass judgement regarding her chaotic lifestyle and her tumultuous liaisons. For example, he portrays De Musset as more of a victim of Sand's indiscretions (her affair with the doctor who sought to cure De Musset of his infirmities, for example), than his own penchant for a life of debauchery. I would not go so far as to proclaim that Maurois is sexist, but he does seem, at times, to allow more liberties to the men in Sand's life than he does to Sand herself. He sometimes depicts Sand as a sort of vampiress, who devours her male counterparts, while seemingly disregarding their own vices. Sand had a few jilted lovers, yes, but she too was wounded in several romantic liaisons. Nevertheless, and in summary, Maurois renders a pretty accurate portrait of George Sand, which will surely inspire the reader to learn more about this fascinating and mysterious author, truly so far ahead of her time. . . George Sand lived the sort of life, both as a woman

and as an artist, which was not generally not embraced during her lifetime. She paved a literary path for future female writers, such as Colette, Virginia Woolf, and Jane Austen, among countless others, who have carried on her legacy. . . Maurois acknowledges such, if we read between the lines. Well, it was not his intent to present his readers with a literary feminist treatise, but he wrote a really good biography about a woman who would influence future female authors to follow her example. . .

King's College – George Sand

In French Literature, the Enlightenment period, which sparked intellectual energies of the nation towards changes and reform was followed by the Romantic Movement which correlated with the return of the French Monarchy in 1815. During this period there was a conflict between revolutionary and reactionary thinking which was reflected in literature, and a radical, revolutionary female writer would emerge, George Sand. Sand would question the social norms that had entrapped women in specific gender roles and lifestyles. Controversy would follow this novelist and early feminist as she would attempt to live a lifestyle similar to the successful men in French society. Sometimes dressed as a man, seeking a writing career that would produce groundbreaking literature and financial stability, Sand would put to question all previously held notions of female independence. George Sand was raised for much of her childhood by her grandmother at the family estate, Nohant, in the French region of Berry, a setting used in many of her novels. There she would learn to read, write, play the piano, and ride horses. Sand was born Amandine Aurore Lucile Dupin in Paris to a father of aristocratic lineage and a common mother. Her father was Maurice Dupin, a retired lieutenant in the army of the republic and her mother was Sophie Delaborde, the daughter of a Paris bird fancier. Their marriage took place only a month before the birth of their child. In 1822, she married a baron, Cisimir Dudevant, who was the son of Baron Dudevant. For the first few years of their marriage Sand and her husband enjoyed a tranquil relationship living on the estate she had inherited from her grandmother, raising their two children, her son Maurice born in 1823, and her daughter Solange born in 1828. This peaceful existence between husband and wife ended after she found Cisimir's will, which contained all of his complaints about their marriage. In 1831, Sand and her husband came to an amicable separation by which her whole estate was surrendered to her husband with the stipulation that she should receive an allowance each year. With the end of her marriage she gained freedom and made no secret of her intention to use it to its fullest advantage.

After separating from her husband, Sand moved to Paris and publicly showcased her preference of wearing men's clothing, although she continued to dress as a woman for social occasions. This male wardrobe enabled her to circulate more freely about Paris and increased her access to social venues that were usually denied to a woman of her social standing. Sand did not stop at dressing like a man, she began smoking cigars and would engage in numerous love affairs the way most famous men had done. After arriving in Paris, Sand started to write for *Le Figaro*, contributing *Revue des Deux Mondes* and *La Republique* and she was co-editor of *Revue Independante*. During this time in Paris, Sand would begin to associate with many artists, poets, philosophers and politicians. One such acquaintance, the writer Jules Sandeau would become her lover, and they would co-write a novel, *Rose Et Blanche*, under the pseudonym Jules Sand. As their relationship began to dissolve, Sand wrote *Indiana* by herself and used the pseudonym George Sand. *Indiana*, a story about a naïve abused love starved woman led to widespread critical attention and immediate fame. Sand immediately followed it with two novels *Valentine* and *Leilia*. Sand's own romantic life led to accusations of lesbianism and nymphomania due to her affairs with well known celebrities. She had

passionate affairs with the poet Alfred de Musset, Franz Liszt, and the composer Frederic Chopin. The one documented affair Sand had with a woman did cause a scandal in Paris. She became lovers with Marie Dorval an admired actress, but this romance quickly subdued and they remained close friends, as Sand did with many of her former lovers. George Sand was a prolific writer who expressed a deep concern for human problems and strong feminist ideals. Sand would write over seventy novels, twenty four plays, ten volumes of autobiography, essays, book reviews, political pamphlets, and an estimated forty- thousand letters of which twenty-two thousand have been printed. Sand was one of the most widely read novelists of her time and she inspired many authors such as Walt Whitman, but at the same time was denounced by the Vatican which repeatedly put her novels on the list that no good Catholic should read. George Sand died on June 8, 1876 from intestinal cancer at her family's estate at Nohant surrounded by her children and grandchildren.

In terms of historical impact, George Sand's writing continues to appeal to audiences worldwide, specifically those in the feminist movement, who identify with her resolute determination to succeed both socially and economically as men have. An example of Sand's appeal is the George Sand Society, which is a cigar smoking women's club with chapters in New York and Los Angeles. In today's society, George Sand would not seem as out of place as she did in her own time. George Sand stood out in 19th century Europe by being a pants-wearing, economically independent woman, seeking romance; but this persona has become an acceptable part of the social norm for a single female in most of today's world. Although George Sand may not have the mainstream public appeal of a Jane Austen, she relates more to most of today's females than any other author of the 19th century.

The Life of George Sand, by Joseph Barry, comments by André Bandeira

Joseph Barry arrived in Paris, in 1945, with the american troops and never left. He fell in love with a woman, who was a man, who was credited to be an «homosexual», and who was dead for a long time, when he arrived, despite Victor Hugo phrasing at her burial that « she died, and she became immortal». What strikes me most in this biography, that is its honesty. The author gets carried away by the impetus of George Sand, but he doesn't pretend to make a romantic biography in the style of George Sand, Aurore Dupin. He just admires the character - probably he shoulders the crush that George Sand has imprinted in his foreign invader's heart - and then, he describes the case the best he can. The result is a very good one, which, I would say, seems to be enough for having an updated knowledge of her, beyond the snapshots of the modern totalitarian media. Who was George Sand, after all, in this biographer's perspective? George Sand appears to be an unpleasant typhoon of selfishness till the very end, when the time comes for her to disclose her soul. She dies, probably with stomach cancer, in terrible pain, counting one by one, her grand-children, after spending her final days, playing and tutoring each of them as a very classical grandmother would do, and rushing away from the time she lost being other things.

But it is not only George Sand who died with cancer. The whole France, which shot down 25.000 Paris communards, against the «Wall of the Federated», in Père Lachaise's cemetery, died with cancer, too. How could George Sand not sympathize with the miserable being killed by the different revolution crushers, in the streets of Paris? She was a descendent of Maurice of Saxe, a privileged woman in education and wealth, despite all the miseries in her personal conduct. She had no paradise on earth, but she could see outcasts who didn't even have the right to be in hell. How could she see otherwise? She saved four republican soldiers of being shot, after intervening by the side of Louis Napoléon. She saved other people, everyone who

asked for her help, in face of imminent death. As an aristocrat she could indulge in the luxury of choosing the position of libertarian socialism, to be extracted gradually from democracy, as a picknick party among young lords, in Spring. She could imagine whatever, and figure it out as a political position. She even could write about it and stop the show, distracting, for moments, the real Destiny brokers, and even rescue from their claws, a few miserable ones. But she couldn't be one of them. So, what to do, when one cannot fill a never plenishable hole? Maybe compensate on the opposite side, the brute forces which loom on one side. Jesus didn't come for the virtuous. He came for the sinners. And this sinner, George Sand, was saved since the beginning of Times.

EMILE ZOLA – BIOGRAPHIES BY HENRI TROYAT, DENISE LE BLOND-ZOLA, HENRI MITTERAND

Emile Zola is my favorite author and dozens of pages in this book were written or quoted on Emile Zola, his life, his books, my commentaries, others' commentaries, Wikipedia entry, and so on. In this chapter I prefer to quote from the Encyclopedia Britannica's entry on Emile Zola. But I'll bring also entries on the biographers of Zola, mainly Henri Mitterand and Henri Troyat. Since this book deals extensively on biographies I'll expand on the life of Henri Troyat, his works, and his biographies. Troyat was THE BIOGRAPHER – the most renowned biographer, and I'll bring a long list on his biographies. I have also read many biographies by Troyat, who is with Andre Maurois my favorite biographer, both of them are French, both of them make us read the biographies as novels, identify with the personalities, understand the psychological motives.

Encyclopedia Britannica, Article written by: William J. Berg:

Émile Zola, in full Émile-Édouard-Charles-Antoine Zola (born April 2, 1840, [Paris](#), died September 28, 1902, Paris), French novelist, critic, and political activist who was the most prominent French novelist of the late 19th century. He was noted for his theories of [naturalism](#), which underlie his monumental 20-novel series *[Les Rougon-Macquart](#)*, and for his intervention in the [Dreyfus Affair](#) through his famous open letter, “[J'accuse](#).” Though born in Paris in 1840, Zola spent his youth in [Aix-en-Provence](#) in southern France, where his father, a civil engineer of Italian descent, was involved in the construction of a municipal water system. The senior Zola died in 1847, leaving Madame Zola and her young son in dire financial straits. In Aix, Zola was a schoolmate of the painter [Paul Cézanne](#), who would later join him in Paris and introduce him to [Édouard Manet](#) and the [Impressionist](#) painters. Although Zola completed his schooling at the Lycée Saint-Louis in Paris, he twice failed the *baccalauréat* exam, which was a prerequisite to further studies, and in 1859 he was forced to seek gainful employment. Zola spent most of the next two years unemployed and living in abject poverty. He subsisted by pawning his few belongings and, according to legend, by eating sparrows trapped outside his attic window. Finally, in 1862 he was hired as a clerk at the publishing firm of Hachette, where he was later promoted to the advertising department. To supplement his income and make his mark in the world of letters, Zola began to write articles on subjects of current interest for various periodicals; he also continued to write fiction, a pastime he had enjoyed since boyhood. In 1865 Zola published his first [novel](#), *La Confession de Claude*, a sordid, semiautobiographical tale that drew the attention of the public and the police and incurred the disapproval of Zola's employer. Having sufficiently established his reputation as a writer to support himself and his mother, albeit meagerly, as a freelance journalist, Zola left his job at Hachette to pursue his literary interests. (I often wonder what beneficiary are the hardships of a person, if Zola had not fail his exams he

would have become a mediocre lawyer, because of his hardships and poverty he acquired the social consciousness, because his father was Italian he was sensitive to Dreyfus).

In the following years Zola continued his career in journalism while publishing two novels: *Thérèse Raquin* (1867), a grisly tale of murder and its aftermath that is still widely read, and *Madeleine Féral* (1868), a rather unsuccessful attempt at applying the principles of [heredity](#) to the novel. It was this interest in science that led Zola, in the fall of 1868, to conceive the idea of a large-scale series of novels similar to [Honoré de Balzac](#)'s *La Comédie humaine* (*The Human Comedy*), which had appeared earlier in the century. Zola's project, originally involving 10 novels, each featuring a different member of the same family, was gradually expanded to comprise the 20 volumes of the *Rougon-Macquart* series. *La Fortune des Rougon* (*The Rougon Family Fortune*), the first novel in the series, began to appear in serial form in 1870, was interrupted by the outbreak of the [Franco-German War](#) in July, and was eventually published in book form in October 1871. Zola went on to produce these 20 novels—most of which are of substantial length—at the rate of nearly one per year, completing the series in 1893. In the 1860s and '70s Zola also defended the art of Cézanne, Manet, and the [Impressionists](#) [Claude Monet](#), [Edgar Degas](#), and [Pierre-Auguste Renoir](#) in newspaper articles. During this period he was a constant presence at weekly gatherings of the painters at various studios and cafés, where theories about [the arts](#) and their potential interrelationships were vociferously debated. Zola's friendship with Cézanne and the other artists was, however, irreparably damaged by the publication of his novel *L'Oeuvre* (1886; *The Masterpiece*), which depicts the life of an innovative painter who, unable to realize his creative potential, ends up hanging himself in front of his final painting. Cézanne, in particular, chose to see the novel as a thinly disguised commentary on his own temperament and talent. (Having read of course *L'Oeuvre* I cannot understand why Cezanne was offended, as the painter in the novel has a life of his own, Cezanne was able to realize his creative potential and would never have thought of committing suicide).

In 1870 Zola married Gabrielle-Alexandrine Meley, who had been his companion and lover for almost five years, and the young couple assumed the care of Zola's mother. In the early '70s Zola expanded his literary contacts, meeting frequently with [Gustave Flaubert](#), Edmond Goncourt, [Alphonse Daudet](#), and [Ivan Turgenev](#), all successful novelists whose failures in the theatre led them to humorously refer to themselves as *auteurs sifflés* ("hissed authors"). Beginning in 1878 the Zola home in Médan, on the Seine River not far from Paris, served as a gathering spot for a group of the novelist's disciples, the best-known of whom were [Guy de Maupassant](#) and [Joris-Karl Huysmans](#), and together they published a collection of short stories, *Les Soirées de Médan* (1880; *Evenings at Médan*). As the founder and most celebrated member of the [naturalist](#) movement, Zola published several treatises to explain his theories on art, including *Le Roman expérimental* (1880; *The Experimental Novel*) and *Les Romanciers naturalistes* (1881). Naturalism involves the application to [literature](#) of two scientific principles: determinism, or the belief that character, temperament, and, ultimately, behaviour are determined by the forces of [heredity](#), environment, and historical moment; and the experimental method, which entails the objective recording of precise data in controlled conditions. If Zola's penchant for polemics and publicity led him to exaggerate his naturalist principles in his early writings, in later years, it can be said, rather, that controversy sought out the reluctant novelist. His publication of a particularly grim and sordid portrait of peasant life in *La Terre* in 1887 led a group of five so-called disciples to repudiate Zola in a manifesto published in the important newspaper *Le Figaro*. His novel *La Débâcle* (1892), which was openly critical of the French army and government actions during the Franco-German War (1870–71), drew vitriolic criticism from French and Germans alike. Despite Zola's

undisputed prominence, he was never elected to the [French Academy](#), although he was nominated on no fewer than 19 occasions. Although Zola's marriage to Alexandrine endured until his death, the author had a fourteen-year affair with Jeanne Rozerot, one of his wife's housemaids, beginning in 1888. Jeanne bore him his only children: Denise & Jacques, who were "recognized" by Madame Zola after her husband's death.

In 1898 Zola intervened in the Dreyfus Affair—that of a Jewish French army officer, [Alfred Dreyfus](#), whose wrongful conviction for treason in 1894 sparked a 12-year controversy that deeply divided French society. At an early stage in the proceedings Zola had decided rightly that Dreyfus was innocent. On January 13, 1898, in the newspaper *L'Aurore*, Zola published a fierce denunciation of the French general staff in an open letter beginning with the words "[J'accuse](#)" ("I accuse"). He charged various high-ranking military officers and, indeed, the War Office itself of concealing the truth in the wrongful conviction of Dreyfus for espionage. Zola was prosecuted for libel and found guilty. In July 1899, when his appeal appeared certain to fail, he fled to [England](#). He returned to France the following June when he learned that the Dreyfus case was to be reopened with a possible reversal of the original verdict. Zola's intervention in the controversy helped to undermine [anti-Semitism](#) and rabid militarism in France. (Zola, although he was an excellent writer, gained immortality because of the Dreyfus Affair, he was the conscience of France, as 42 years later De Gaulle was France's conscience in fighting a similar ultra-conservative regime of Petain, whose supporters deported the Jews to the death camps).

Zola's final series of novels, *Les Trois Villes* (1894–98; [The Three Cities](#)) and *Les Quatre Évangiles* (1899–1903; [The Four Gospels](#)), are generally conceded to be far less forceful than his earlier work. However, the titles of the novels in the latter series reveal the values that underlay his entire life and work: *Fécondité* (1899; *Fecundity*), *Travail* (1901; *Work*), *Vérité* (1903; *Truth*), and *Justice* (which, ironically, remained incomplete). Zola died unexpectedly in September 1902, the victim of coal gas asphyxiation resulting from a blocked chimney flue. Officially, the event was determined to be a tragic accident, but there were—and still are—those who believe that fanatical anti-Dreyfusards arranged to have the chimney blocked. At the time of his death, Zola was recognized not only as one of the greatest novelists in Europe but also as a man of action—a defender of truth and justice, a champion of the poor and the persecuted. At his funeral he was eulogized by [Anatole France](#) as having been not just a great man, but "a moment in the human conscience," and crowds of mourners, prominent and poor alike, lined the streets to salute the passing casket. In 1908 Zola's remains were transferred to the [Panthéon](#) and placed alongside those of [Voltaire](#), [Jean-Jacques Rousseau](#), and [Victor Hugo](#), other French authors whose works and deeds, like those of Zola, had changed the course of French history.

Although he produced some 60 volumes of fiction, theory, and criticism, in addition to numerous pieces of journalism, during his 40-year career, Zola is best known for his 20-volume series *Les Rougon-Macquart*, which is "the natural and social history of a family under the [Second Empire](#)." As the subtitle suggests, the naturalist goal of demonstrating the deterministic influence of heredity is fulfilled by tracing the lives of various members of the three branches of the Rougon-Macquart family. At the same time, the weight of historical moment is shown by limiting the action of the novels to one historical period, that of the [Second Empire](#) (1852–70), which was the reign of [Napoleon III](#), the nephew and pale imitation of [Napoleon Bonaparte](#). Finally, Zola examines the impact of environment by varying the social, economic, and professional milieu in which each novel takes place. *La Curée* (1872; [The Kill](#)), for example, explores the land speculation and financial dealings that accompanied the renovation of Paris during the [Second Empire](#). *Le Ventre de Paris* (1873;

[*The Belly of Paris*](#)) examines the structure of the Halles, the vast central market-place of Paris, and its influence on the lives of its workers. The 10 steel pavilions that make up the market are compared alternately to a machine, a palace, and an entire city, thereby situating the market within a broader social framework. *Son Excellence Eugène Rougon* (1876; *His Excellency Eugène Rougon*) traces the machinations and maneuverings of cabinet officials in Napoleon III's government. *L'Assommoir* (1877; "The Club"; Eng. trans. [*The Drunkard*](#)), which is among the most successful and enduringly popular of Zola's novels, shows the effects of alcoholism in a working-class neighbourhood by focusing on the rise and decline of a laundress, Gervaise Macquart. Zola's use of slang, not only by the characters but by the narrator, and his vivid paintings of crowds in motion lend authenticity and power to his portrait of the working class. [*Nana*](#) (1880) follows the life of Gervaise's daughter as her economic circumstances and hereditary penchants lead her to a career as an actress, then a courtesan, professions underscored by a theatrical metaphor that extends throughout the novel, revealing the ceremonial falseness of the Second Empire. *Au Bonheur des Dames* (1883; [*Ladies' Delight*](#)) depicts the mechanisms of a new economic entity, the department store, and its impact on smaller merchants. The sweeping descriptions of crowds and dry-goods displays justify Zola's characterization of the novel as "a poem of modern activity."

[*Germinal*](#) (1885), which is generally acknowledged to be Zola's masterpiece, depicts life in a mining community by highlighting relations between the bourgeoisie and the working class. At the same time, the novel weighs the events of a miners' strike and its aftermath in terms of those contemporary political movements (Marxism, anarchism, trade unionism) that purport to deal with the problems of the proletariat. Zola's comparison of the coal mine to a devouring monster and his use of animal and botanical imagery to characterize the workers create a novel of epic scope that replicates, in modern terms, ancient myths of damnation and resurrection. A quite different work, [*L'Oeuvre*](#) (1886), explores the milieu of the art world and the interrelationship of the arts by means of the friendship between an Impressionist painter, Claude Lantier, and a naturalist novelist, Pierre Sandoz. Zola's verbal style mirrors the visual techniques of Impressionism in word-pictures of Paris transformed by varying effects of colour, light, and atmosphere. In *La Terre* (1887; [*Earth*](#)) Zola breaks with the tradition of rustic, pastoral depictions of peasant life to show what he considered to be the sordid lust for land among the French peasantry. In *La Bête humaine* (1890; [*The Human Beast*](#)) he analyzes the hereditary urge to kill that haunts the Lantier branch of the family, set against the background of the French railway system, with its powerful machinery and rapid movement. *La Débâcle* (1892; [*The Debacle*](#)) traces both the defeat of the French army by the Germans at the [*Battle of Sedan*](#) in 1870 and the anarchist uprising of the [*Paris Commune*](#). Zola superimposes the viewpoints of numerous characters to capture the vividness of individual vision while at the same time obtaining an overall strategic sense of the war. Finally, in [*Le Docteur Pascal*](#) (1893) he uses the main character, the doctor Pascal Rougon, armed with a genealogical tree of the Rougon-Macquart family published with the novel, to expound the theories of heredity underlying the entire series. The *Rougon-Macquart* series thus constitutes a fictional family saga while providing a valuable sociological document of the events, institutions, and ideas that marked the rise of modern industrialism and the cultural changes it entailed. However, what popularity the novels maintain today is largely due to Zola's unique artistry, a poetry of machine and motion, vitalized by the individual viewpoint, yet structured by vast networks of imagery that capture the intense activity and alienation of modern industrial society. Zola's novels had an immense impact on [Western literature](#) of the 20th century, from the existentialist novel and the [New Novel](#) in France to the works of the [muckrakers](#) in the United States. In their striking combination of visuality and movement, Zola's novels can even be said to foreshadow the motion picture, for which they have proved

admirably suited for adaptation; the pioneering version of *La Bête humaine* by [Jean Renoir](#) in 1938 and a big-budget rendition of *Germinal* by [Claude Berri](#) in 1993 are two examples. Above all, Zola's writings endure on account of his forthright portrayal of social injustice, his staunch defence of the downtrodden, and his unwavering belief in the betterment of the human condition through individual and collective action.

Henri Mitterand, a former fellow of the *Ecole normale supérieure*, *agrégé de l'Université*, *docteur ès lettres* (1969), Professor Emeritus at the Sorbonne Nouvelle, Professor Emeritus of French at Columbia, has edited the five volumes of Zola's Rougon-Macquart in the "Bibliothèque de la Pléiade" (éditions Gallimard) and also the fifteen volumes of Zola's *Oeuvres complètes* with *Cercle du Livre précieux*, Paris. He served as literary advisor for the publication of Zola's Correspondance, in ten volumes (Editions du CNRS and Presses de l'Université de Montréal). Mitterand is also the author of many books on Émile Zola and other 19th and 20th-century novelists as well as on broad issues such as the novel as a literary genre (*Zola et le naturalisme*, *Zola, l'Histoire et la fiction*, *Le Discours du roman*, *Le Regard et le Signe*, *L'Illusion réaliste*, *Le Roman à l'oeuvre*). In addition, he has published more than two hundred articles on literature and linguistics. He recently published a three-volume monumental biography of Zola (Paris, éditions Fayard: Grand Prize of the City of Paris, 2000; Prize for Literary Biography, *Académie française*, 2003). Mitterand is the founder of the Center for Research on Zola and Naturalism (Centre National de la Recherche Scientifique). He is the director of the new chronological edition of Zola's *Oeuvres complètes* (20 volumes, Nouveau Monde Editions, Paris; 10 volumes already published), and he is currently working on a book on *Espace Romanesque*. Mitterand is a Chevalier of the French Legion of Honor, a Commander in the French Order of Arts and Letters, and a Member of the Royal Society of Canada. He is the President of the *Société littéraire des amis d'Emile Zola*. (I do hope to finish reading Mitterand's monumental biography of Zola, which I read with sheer delight, but as I read in parallel other books in many languages, and write my own autobiography, I don't know when I'll finish it).

Henri Troyat (1 November 1911 – 2 March 2007) was a Russian-born French author, biographer, historian and novelist. Troyat was born **Lev Aslanovich Tarasov**, ([Russian](#): Лев Асланович Тарасов, *Lev Aslanovich Tarasov*) in Moscow to parents of mixed heritage, including [Armenian](#), [Russian](#), German and [Georgian](#). According to his autobiography he states that his surname is [Armenian](#) (Torossian), while his maternal grandmother was German and his maternal grandfather was of mixed [Georgian](#) and Armenian descent. His family fled Russia after the outbreak of the [revolution](#). After a long exodus taking them to the Caucasus on to Crimea and later by sea to Istanbul and then Venice, the family finally settled in Paris in 1920, where young Troyat was schooled and later earned a law degree. The stirring and tragic events of this flight across half of Europe are vividly recounted by Troyat in *Tant que la terre durera*. His first marriage produced a son before ending in divorce. He later married the love of his life, a widow with a young daughter whom he raised as his own. Troyat received his first literary award, *Le prix du roman populaire*, at the age of twenty-four, and by twenty-seven, he was awarded the [Prix Goncourt](#). He published more than 100 books, novels and biographies, among them those of [Anton Chekhov](#), [Catherine the Great](#), [Rasputin](#), [Fyodor Dostoyevsky](#), [Ivan the Terrible](#) and [Leo Tolstoy](#). Troyat's best-known work is *La neige en deuil*, which was adapted as an English-language film in 1956 under the title *The Mountain*. Troyat was elected as a member of the [Académie française](#) in 1959. At the time of his death, he was the longest-serving member. His biographies (all of them on Russian and French personalities) include the following books, some of them - perceived as masterpieces: [1940](#) : *Dostoievski*, [1946](#) : *Pouchkine*, [1952](#) : *L'Étrange Destin de Lermontov*, [1965](#) : *Tolstoi*, [1971](#) :

Gogol, 1977 : Catherine la Grande (prix des Ambassadeurs 1978), 1979 : Pierre le Grand, 1981 : Alexandre I^{er}, 1982 : Ivan le Terrible, 1984 : Tchekhov, 1985 : Tourgueniev, 1986 : Gorki, 1988 : Flaubert, 1989 : Maupassant, 1990 : Alexandre II, le tsar libérateur (Alexandre II de Russie), 1991 : Nicolas II, 1992 : Zola, 1993 : Verlaine, 1994 : Baudelaire, 1995 : Balzac, 1996 : Raspoutine, 1997 : Juliette Drouet, 1998 : Terribles Tsarines, 1998 : Les Turbulences d'une grande famille (famille Lebaudy), 1999 : Nicolas I^{er}, 2001 : Marina Tsvetaeva, l'éternelle insurgée, 2002 : Paul I^{er}, le tsar mal aimé, 2004 : La Baronne et le musicien, Madame Von Meck et Tchaïkovski, 2004 : Alexandre III, le tsar des neiges, 2005 : Alexandre Dumas, le cinquième mousquetaire, 2006 : Pasternak, 2008 : Boris Godounov, 2010 : Trois mères, trois fils. Madame Baudelaire, Madame Verlaine, Madame Rimbaud, 2012 : Gontcharov. Troyat has also written many novels, which I have not read.

Troyat wrote more than 100 works, including novels, biographies and plays. Many of his biographies focused on major Russian figures, including Leo Tolstoy, Catherine the Great and Aleksander Pushkin. Troyat's fictional tales often were involved, epic sagas that drew comparisons to the novels of the 19th century. His works have been translated into English, Spanish, Hebrew and Chinese. His lost Russia was a continuing source of fascination and inspiration throughout his career. "Thanks to him, the Russian novel has become a bit French," French Culture Minister Renaud Donnedieu de Vabres said. President Jacques Chirac called Troyat a "giant of French letters." Troyat was inducted into the prestigious Academie Francaise in 1959, making him the most long-standing member of the group of 40 so-called "immortals" who safeguard the French language. "He was a born teller of stories, both true and invented," Maurice Druon, another academy member, wrote in Le Figaro newspaper. "That was what he lived and breathed for. A day without writing seemed like a sin to him." Troyat was born Lev Tarassov in Moscow in 1911. His family lost everything they had when they fled Russia during the 1917 Revolution. They wandered for many months, with stops including Istanbul and Venice, before settling in Paris in 1920. Troyat never returned to his native land, even after the fall of the Soviet Union, saying he wanted to keep alive the imaginary Russia he created out of childhood memories and dreams. "The snow is cleaner in my dreams," he once said.

Polls often ranked Troyat as the favorite writer of the French. He also won France's highest Legion of Honor ranking, the Grand Croix or Grand Cross. But Troyat said he cared little for glory. "Success means nothing," he once said, according to Le Figaro. "I know what I'm talking about; at the very beginning of my life, I saw my parents lose everything in a reversal of fortune, and I kept that lesson in mind." Troyat studied law as a young man, but he won early renown as a writer with the publication of his first novel, "Faux Jour" (False Light), when he was completing his mandatory French military service. His fifth novel, "L'Araigne" (The Spider), published when he was 27, won France's top literary prize, the Prix Goncourt. Many of Troyat's books were set in Russia; others were portraits of French families. He also wrote biographies of French writers, including Emile Zola, Honore de Balzac and Gustav Flaubert. Troyat remained prolific in his later years, publishing his final novel, "La Traque" (The Hunt), when he was 94. Prime Minister Dominique de Villepin said Troyat's works "fascinated thousands of readers for 70 years, and will continue to fascinate them." Troyat will be remembered forever mainly for his excellent biographies, as he is probably the best biographer, at least in the French language.

LEV TOLSTOY – BIOGRAPHY BY HENRI TROYAT

Tolstoy is one of my favorite authors, by far the best Russian author. In my youth I read most of his novels, but in my diary I write at the age of 17: "I have read *The Death of Ivan Ilyich* by Tolstoy in French. Tolstoy starts to torment me, he is too much right. Those types of men are dangerous to society, it is dangerous to hear or read them. It is therefore good that society caused him troubles when he was alive. The greatest tragedy with him is that he is right and tells the truth. Truth tellers are dangerous to society, which is why they should be denounced. That is what Johnson states in his essay *On Toleration*. Society will condemn those types without my intervention. Would I want to reform the ethics of modern society, like Tolstoy does, but why should I do it? Why should I tell society what not to do? Should I believe in Tolstoy? Epicurus said long before him that a man should enjoy life and why should I believe Tolstoy and not Epicurus? It is true that my inner voice tells me that this life is negative, but I shouldn't forget that this inner voice stems from the education that I have received but who says that my parents are right? Nobody can state who is right." In the film "*Me against Myself*", I, at the age of 17, condemn/denounce Tolstoy and all those who stand for social justice and say that society is right when it persecutes him. So why an old man like me should be surprised that society (and I myself as a youngster) denounces me as a whistleblower? Tolstoy made me think when I was a teenager what is ethics, why are truth tellers "dangerous" to society, should we denounce and persecute them? Fifty years later when rereading my diary I noticed what a tremendous change has occurred in my life's philosophy, how I was metamorphosed from a materialist hawk to an ethicist dove. And I at the age of 17 would have denounced me at the age of 57 when I published my first academic books and novel on ethics. Probably the seeds that Tolstoy, Zola and Hugo were sowing at the age of 11-17 and onwards fought in my inner soul my natural materialist tendency and the society norms prevailing in Israel and the Western world and finally succeeded to influence my career in business and made me choose a new ethical career. I reached the same conclusion as Tolstoy that ethics depends on a sensitivity (I would add coming from sufferance), developed over a lifetime, to particular people and specific situations.

Leo Tolstoy, Tolstoy also spelled Tolstoi, Russian in full Lev Nikolayevich, Graf (count) Tolstoy (born August 28, 1828, [Yasnaya Polyana](#), [Tula](#) province, Russian Empire—died November 7, 1910, Astapovo, Ryazan province), Russian author, a master of realistic [fiction](#) and one of the world's greatest novelists. Tolstoy is best known for his two longest works, *War and Peace* (1865–69) and *Anna Karenina* (1875–77), which are commonly regarded as among the finest novels ever written. [War and Peace](#) in particular seems virtually to define this form for many readers and critics. Among Tolstoy's shorter works, *The Death of Ivan Ilyich* (1886) is usually classed among the best examples of the [novella](#). Especially during his last three decades Tolstoy also achieved world renown as a moral and religious teacher. His doctrine of nonresistance to evil had an important influence on [Gandhi](#). Although Tolstoy's religious ideas no longer command the respect they once did, interest in his life and personality has, if anything, increased over the years. Most readers will agree with the assessment of the 19th-century British poet and critic [Matthew Arnold](#) that a [novel](#) by Tolstoy is not a work of art but a piece of life; the Russian author [Isaak Babel](#) commented that, if the world could write by itself, it would write like Tolstoy. Critics of diverse schools have agreed that somehow Tolstoy's works seem to elude all artifice. Most have stressed his ability to observe the smallest changes of consciousness and to record the slightest movements of the body. What another novelist would describe as a single act of consciousness, Tolstoy convincingly breaks down into a series of infinitesimally small steps. According to the English writer [Virginia Woolf](#), who took for granted that Tolstoy was "the greatest of all

novelists,” these observational powers elicited a kind of fear in readers, who “wish to escape from the gaze which Tolstoy fixes on us.” Those who visited Tolstoy as an old man also reported feelings of great discomfort when he appeared to understand their unspoken thoughts. It was commonplace to describe him as godlike in his powers and titanic in his struggles to escape the limitations of the human condition. Some viewed Tolstoy as the embodiment of nature and pure vitality, others saw him as the incarnation of the world’s conscience, but for almost all who knew him or read his works, he was not just one of the greatest writers who ever lived but a living symbol of the search for life’s meaning.

The scion of prominent aristocrats, Tolstoy was born at the family estate, about 130 miles (210 kilometres) south of Moscow, where he was to live the better part of his life and write his most-important works. His mother, Mariya Nikolayevna, née Princess Volkonskaya, died before he was two years old, and his father Nikolay Ilich, Graf (count) Tolstoy, followed her in 1837. His grandmother died 11 months later, and then his next guardian, his aunt Aleksandra, in 1841. Tolstoy and his four siblings were then transferred to the care of another aunt in Kazan, in western [Russia](#). Tolstoy remembered a cousin who lived at [Yasnaya Polyana](#), Tatyana Aleksandrovna Yergolskaya (“Aunt Toinette,” as he called her), as the greatest influence on his childhood, and later, as a young man, Tolstoy wrote some of his most-touching letters to her. Despite the constant presence of death, Tolstoy remembered his childhood in idyllic terms. His first published work, *Detstvo* (1852; [Childhood](#)), was a fictionalized and nostalgic account of his early years. Educated at home by tutors, Tolstoy enrolled in the University of Kazan in 1844 as a student of Oriental languages. His poor record soon forced him to transfer to the less-demanding law faculty, where he wrote a comparison of the French political philosopher [Montesquieu](#)’s *The Spirit of Laws* and [Catherine the Great](#)’s *nakaz* (instructions for a law code). Interested in [literature](#) and ethics, he was drawn to the works of the English novelists [Laurence Sterne](#) and [Charles Dickens](#) and, especially, to the writings of the French philosopher [Jean-Jacques Rousseau](#); in place of a cross, he wore a medallion with a portrait of Rousseau. But he spent most of his time trying to be *comme il faut* (socially correct), drinking, gambling, and engaging in debauchery. After leaving the university in 1847 without a degree, Tolstoy returned to Yasnaya Polyana, where he planned to educate himself, to manage his estate, and to improve the lot of his serfs. Despite frequent resolutions to change his ways, he continued his loose life during stays in Tula, Moscow, and St. Petersburg. In 1851 he joined his older brother Nikolay, an army officer, in the Caucasus and then entered the army himself. He took part in campaigns against the native peoples and, soon after, in the [Crimean War](#) (1853–56).

In 1847 Tolstoy began keeping a diary, which became his laboratory for experiments in self-analysis and, later, for his fiction. With some interruptions, Tolstoy kept his diaries throughout his life, and he is therefore one of the most copiously documented writers who ever lived. Reflecting the life he was leading, his first diary begins by confiding that he may have contracted a venereal disease. The early diaries record a fascination with rule-making, as Tolstoy composed rules for diverse aspects of social and moral behaviour. They also record the writer’s repeated failure to honour these rules, his attempts to formulate new ones designed to ensure obedience to old ones, and his frequent acts of self-castigation. Tolstoy’s later belief that life is too complex and disordered ever to conform to rules or philosophical systems perhaps derives from these futile attempts at self-regulation. Concealing his identity, Tolstoy submitted *Childhood* for publication in [Sovremennik](#) (“The Contemporary”), a prominent [journal](#) edited by the poet [Nikolay Nekrasov](#). Nekrasov was enthusiastic, and the pseudonymously published work was widely praised. During the next few years Tolstoy published a number of stories based on his experiences in the Caucasus, including “Nabeg”

(1853; “The Raid”) and his three sketches about the [Siege of Sevastopol](#) during the Crimean War: “Sevastopol v dekabre mesyatse” (“Sevastopol in December”), “Sevastopol v maye” (“Sevastopol in May”), and “Sevastopol v avguste 1855 goda” (“Sevastopol in August”; all published 1855–56). The first sketch, which deals with the courage of simple soldiers, was praised by the tsar. Written in the second person as if it were a tour guide, this story also demonstrates Tolstoy’s keen interest in formal experimentation and his lifelong concern with the morality of observing other people’s suffering. The second sketch includes a lengthy passage of a soldier’s [stream of consciousness](#) (one of the early uses of this device) in the instant before he is killed by a bomb. In the story’s famous ending, the author, after commenting that none of his characters are truly heroic, asserts that *the hero of my story—whom I love with all the power of my soul...who was, is, and ever will be beautiful—is the truth*. Readers ever since have remarked on Tolstoy’s ability to make such “absolute language,” which usually ruins realistic fiction, aesthetically effective.

After the [Crimean War](#) Tolstoy resigned from the army and was at first hailed by the literary world of St. Petersburg. But his prickly vanity, his refusal to join any intellectual camp, and his insistence on his complete independence soon earned him the dislike of the radical intelligentsia. He was to remain throughout his life an “archaist,” opposed to prevailing intellectual trends. In 1857 Tolstoy traveled to Paris and returned after having gambled away his money. After his return to Russia, he decided that his real vocation was pedagogy, and so he organized a school for peasant children on his estate. After touring western Europe to study pedagogical theory and practice, he published 12 issues of a journal, *Yasnaya Polyana* (1862–63), which included his provocative articles “Progress i opredeleniye obrazovaniya” (“Progress and the Definition of Education”), which denies that history has any underlying laws, and “Komu u kogu uchitsya pisat, krestyanskim rebyatam u nas ili nam u krestyanskikh rebyat?” (“Who Should Learn Writing of Whom: Peasant Children of Us, or We of Peasant Children?”), which reverses the usual answer to the question. Tolstoy married Sofya (Sonya) Andreyevna Bers, the daughter of a prominent Moscow physician, in 1862 and soon transferred all his energies to his marriage and the composition of *War and Peace*. Tolstoy and his wife had 13 children, of whom 10 survived infancy. Tolstoy’s works during the late 1850s and early 1860s experimented with new forms for expressing his moral and philosophical concerns. To *Childhood* he soon added *Otrochestvo* (1854; [Boyhood](#)) and *Yunost* (1857; [Youth](#)). A number of stories centre on a single semiautobiographical character, Dmitry Nekhlyudov, who later reappeared as the hero of Tolstoy’s novel [Resurrection](#). In “Lyutsern” (1857; “Lucerne”), Tolstoy uses the diary form first to relate an incident, then to reflect on its timeless meaning, and finally to reflect on the process of his own reflections. “Tri smerti” (1859; “Three Deaths”) describes the deaths of a noblewoman who cannot face the fact that she is dying, of a peasant who accepts death simply, and, at last, of a tree, whose utterly natural end contrasts with human artifice. Only the author’s transcendent consciousness unites these three events.

“Kholstomer” (written 1863; revised and published 1886; “Kholstomer: The Story of a Horse”) has become famous for its dramatic use of a favourite Tolstoyan device, “defamiliarization”—that is, the description of familiar social practices from the “naive” perspective of an observer who does not take them for granted. Readers were shocked to discover that the protagonist and principal narrator of “Kholstomer” was an old horse. Like so many of Tolstoy’s early works, this story satirizes the artifice and conventionality of human society, a theme that also dominates Tolstoy’s novel *Kazaki* (1863; [The Cossacks](#)). The hero of this work, the dissolute and self-centred aristocrat Dmitry Olenin, enlists as a cadet to serve in the Caucasus. Living among the Cossacks, he comes to appreciate a life more in touch with

natural and biological rhythms. In the novel's central scene, Olenin, hunting in the woods, senses that every living creature, even a mosquito, "is just such a separate Dmitry Olenin as I am myself." Recognizing the futility of his past life, he resolves to live entirely for others. Happily married and ensconced with his wife and family at Yasnaya Polyana, Tolstoy reached the height of his creative powers. He devoted the remaining years of the 1860s to writing *War and Peace*. Then, after an interlude during which he considered writing a novel about [Peter the Great](#) and briefly returned to pedagogy (bringing out reading primers that were widely used), Tolstoy wrote his other great novel, [Anna Karenina](#). These two works share a vision of human experience rooted in an appreciation of everyday life and prosaic virtues.

[*War and Peace*](#)

Voyna i mir (1865–69; *War and Peace*) contains three kinds of material—a historical account of the Napoleonic wars, the biographies of fictional characters, and a set of essays about the philosophy of history. Critics from the 1860s to the present have wondered how these three parts cohere, and many have faulted Tolstoy for including the lengthy essays, but readers continue to respond to them with undiminished enthusiasm. The work's historical portions narrate the campaign of 1805 leading to [Napoleon](#)'s victory at the [Battle of Austerlitz](#), a period of peace, and Napoleon's invasion of Russia in 1812. Contrary to generally accepted views, Tolstoy portrays Napoleon as an ineffective, egomaniacal buffoon, Tsar [Alexander I](#) as a phrasemaker obsessed with how historians will describe him, and the Russian general [Mikhail Kutuzov](#) (previously disparaged) as a patient old man who understands the limitations of human will and planning. Particularly noteworthy are the novel's battle scenes, which show combat as sheer chaos. Generals may imagine they can "anticipate all contingencies," but battle is really the result of "a hundred million diverse chances" decided on the moment by unforeseeable circumstances. In [war](#) as in life, no system or model can come close to accounting for the infinite complexity of human behaviour. Among the book's fictional characters, the reader's attention is first focused on Prince Andrey Bolkonsky, a proud man who has come to despise everything fake, shallow, or merely conventional. Recognizing the artifice of high society, he joins the army to achieve glory, which he regards as truly meaningful. Badly wounded at Austerlitz, he comes to see glory and Napoleon as no less petty than the salons of St. Petersburg. As the novel progresses, Prince Andrey repeatedly discovers the emptiness of the activities to which he has devoted himself. Tolstoy's description of his death in 1812 is usually regarded as one of the most-effective scenes in [Russian literature](#). The novel's other hero, the bumbling and sincere [Pierre Bezukhov](#), oscillates between belief in some philosophical system promising to resolve all questions and a relativism so total as to leave him in apathetic despair. He at last discovers the Tolstoyan truth that wisdom is to be found not in systems but in the ordinary processes of daily life, especially in his marriage to the novel's most-memorable heroine, Natasha. When the book stops—it does not really end but just breaks off—Pierre seems to be forgetting this lesson in his enthusiasm for a new utopian plan. In accord with Tolstoy's idea that prosaic, everyday activities make a life good or bad, the book's truly wise characters are not its intellectuals but a simple, decent soldier, Natasha's brother Nikolay, and a generous pious woman, Andrey's sister Marya. Their marriage symbolizes the novel's central prosaic values.

The essays in *War and Peace*, which begin in the second half of the book, satirize all attempts to formulate general laws of [history](#) and reject the ill-considered assumptions supporting all historical narratives. In Tolstoy's view, history, like battle, is essentially the product of contingency, has no direction, and fits no pattern. The causes of historical events are infinitely varied and forever unknowable, and so historical writing, which claims to explain the past, necessarily falsifies it. The shape of historical narratives reflects not the actual course of

events but the essentially literary criteria established by earlier historical narratives. According to Tolstoy's essays, historians also make a number of other closely connected errors. They presume that history is shaped by the plans and ideas of great men—whether generals or political leaders or intellectuals like themselves—and that its direction is determined at dramatic moments leading to major decisions. In fact, however, history is made by the sum total of an infinite number of small decisions taken by ordinary people, whose actions are too unremarkable to be documented. As Tolstoy explains, to presume that grand events make history is like concluding from a view of a distant region where only treetops are visible that the region contains nothing but trees. Therefore Tolstoy's novel gives its readers countless examples of small incidents that each exert a tiny influence—which is one reason that *War and Peace* is so long. Tolstoy's belief in the efficacy of the ordinary and the futility of system-building set him in opposition to the thinkers of his day. It remains one of the most-controversial aspects of his philosophy.

[Anna Karenina](#)

In *Anna Karenina* (1875–77) Tolstoy applied these ideas to family life. The novel's first sentence, which indicates its concern with the domestic, is perhaps Tolstoy's most famous: "All happy families resemble each other; each unhappy family is unhappy in its own way." *Anna Karenina* interweaves the stories of three families, the Oblonskys, the Karenins, and the Levins. The novel begins at the Oblonskys, where the long-suffering wife Dolly has discovered the infidelity of her genial and sybaritic husband Stiva. In her kindness, care for her family, and concern for everyday life, Dolly stands as the novel's moral compass. By contrast, Stiva, though never wishing ill, wastes resources, neglects his family, and regards pleasure as the purpose of life. The figure of Stiva is perhaps designed to suggest that evil, no less than good, ultimately derives from the small moral choices human beings make moment by moment. Stiva's sister [Anna](#) begins the novel as the faithful wife of the stiff, unromantic, but otherwise decent government minister Aleksey Karenin and the mother of a young boy, Seryozha. But Anna, who imagines herself the heroine of a romantic novel, allows herself to fall in love with an officer, [Aleksey Vronsky](#). Schooling herself to see only the worst in her husband, she eventually leaves him and her son to live with Vronsky. Throughout the novel, Tolstoy indicates that the romantic idea of love, which most people identify with love itself, is entirely incompatible with the superior kind of love, the intimate love of good families. As the novel progresses, Anna, who suffers pangs of conscience for abandoning her husband and child, develops a habit of lying to herself until she reaches a [state](#) of near madness and total separation from reality. She at last commits suicide by throwing herself under a train. The realization that she may have been thinking about life incorrectly comes to her only when she is lying on the track, and it is too late to save herself.

The third story concerns Dolly's sister Kitty, who first imagines she loves Vronsky but then recognizes that real love is the intimate feeling she has for her family's old friend, Konstantin Levin. Their story focuses on courtship, marriage, and the ordinary incidents of family life, which, in spite of many difficulties, shape real happiness and a meaningful existence. Throughout the novel, Levin is tormented by philosophical questions about the meaning of life in the face of death. Although these questions are never answered, they vanish when Levin begins to live correctly by devoting himself to his family and to daily work. Like his creator Tolstoy, Levin regards the systems of intellectuals as spurious and as incapable of embracing life's complexity. Both *War and Peace* and *Anna Karenina* advance the idea that [ethics](#) can never be a matter of timeless rules applied to particular situations. Rather, ethics depends on a sensitivity, developed over a lifetime, to particular people and specific situations. Tolstoy's preference for particularities over abstractions is often described as the

hallmark of his thought. Upon completing *Anna Karenina*, Tolstoy fell into a profound state of existential despair, which he describes in his *Ispoved* (1884; [My Confession](#)). All activity seemed utterly pointless in the face of death, and Tolstoy, impressed by the faith of the common people, turned to religion. Drawn at first to the [Russian Orthodox church](#) into which he had been born, he rapidly decided that it, and all other Christian churches, were corrupt institutions that had thoroughly falsified true Christianity. Having discovered what he believed to be Christ's message and having overcome his paralyzing fear of death, Tolstoy devoted the rest of his life to developing and propagating his new faith. He was excommunicated from the Russian Orthodox church in 1901. (Which strengthen my conviction that social awareness, faith of the common people, pursuit of truth, liberty, and ethics, никогда/"nikagda"/never can comply with fundamentalist/orthodox religion, neoliberalism, conservatism, and that probably Jesus would have also been, as Spinoza and Tolstoy, excommunicated/banned from his Christian congregation, as he was from his Jewish).

With the notable exception of his daughter Aleksandra, whom he made his heir, Tolstoy's family remained aloof from or hostile to his teachings. His wife especially resented the constant presence of disciples, led by the dogmatic V.G. Chertkov, at Yasnaya Polyana. Their once happy life had turned into one of the most famous bad marriages in literary history. The story of his dogmatism and her penchant for scenes has excited numerous biographers to take one side or the other. Because both kept diaries, and indeed exchanged and commented on each other's diaries, their quarrels are almost too well documented. Tormented by his domestic situation and by the contradiction between his life and his principles, in 1910 Tolstoy at last escaped incognito from Yasnaya Polyana, accompanied by Aleksandra and his doctor. In spite of his stealth and desire for privacy, the international press was soon able to report on his movements. Within a few days, he contracted [pneumonia](#) and died of heart failure at the railroad station of Astapovo. In contrast to other psychological writers, such as Dostoyevsky, who specialized in unconscious processes, Tolstoy described conscious mental life with unparalleled mastery. His name has become synonymous with an appreciation of contingency and of the value of everyday activity. Oscillating between skepticism and dogmatism, Tolstoy explored the most-diverse approaches to human experience. Above all, his greatest works, *War and Peace* and *Anna Karenina*, endure as the summit of realist fiction. [Gary Saul Morson](#)

Review on Tolstoy's biography by Troyat, by [Cipriano](#) on June 3, 2001

Tolstoy once wrote in his diary "Nobody will ever understand me." I can imagine that many biographers have been tormented by those words as they tried to compile and collate information about the extraordinary life of this great "lion" of writers. Troyat has done a remarkable job of this daunting monumental task, and his book ought to be considered essential reading for anyone who wants to understand the lifelong inner struggle that seemed to fuel the creative genius of Leo Tolstoy. As others have commented, it truly does read with the pace and interest of a sweeping epic novel, and there doesn't seem to be any possible chronological gap that could be missing. It's all here: Tolstoy's ancestry, the early loss of both his parents, his military youth in the Caucasus, his bouts with profligacy, his fickle literary friendships, his blunderous courtship and tumultuous (to put it mildly) marriage with Sofya Behrs... and all of his day-to-day glaring contradictory theories that remind us of Herzen's assessment of him: "He oversteps the limits. His brain does not take time to digest the impressions it absorbs." Everything is here: his vacillating acceptance and rejection of earthly comfort, his never ending search for some form of self-imposed suffering to atone for his affluence, his frustrating envy of all who had the good fortune of being unfortunate... his

ultimate rejection of a fortune. In my opinion, Leo Tolstoy was the greatest writer the world has ever produced. I've read other biographies of him, and consider Troyat's to be the best for many reasons, not the least of which is his selective restraint with detail. It's obvious that he probably read upwards of a million pages in order to give us this 900, and the finished product is never tedious. His look at Tolstoy is unbiased, he does not try to canonize him. It takes a great man to have every stone of his life upturned like this, and yet emerge as a hero. Tolstoy does!

Review by Thomas Fortenberry on October 23, 1998

Henri Troyat surely deserves every award known to biographers. The man is a genius. This is lucky for us, because Tolstoy's complexity demands genius to even comprehend it. But comprehend it Troyat does. As Doubleday said of Troyat about this book, he possesses "a combination of talents almost Tolstoyan in breadth and scope." How else can you define an author so wonderfully in tune with his subject but by the very definition of that subject? The strength of this book is its depth and scope. It covers everything from Tolstoy's birth to death, and I mean everything: The young nobleman obsessed with charity, the artistic ecstasy, the sexual scandals and insatiability, the marriage and the children, and yet the saintliness of the philosopher and theologian, monk and hermit. Troyat amazingly covers the entirety of Tolstoy's life and works. It is an entire world revealed, in infinite detail, to its horizons and then beyond. (800 pages and, no, that is not large type) This tale of Leo Tolstoy proves the man is every bit as large as his legend, and so much more. Every page is filled with breathtaking revelations, touching and frightening displays, family secrets and public explosions, and intimate looks behind every deed of the man in the very words of his own hand. This book is psychology, philosophy, theology, anthropology, poetry, truth, and on yes, biography so incredibly well-written it reads better than most novels. M. Troyat, my hat is off to you. Thank you for one of the most enjoyable and informative reads of my life.

Notes extracts on Tolstoy/Troyat's biography by [Edmund Wilson](#), [February 25, 1971](#)

What M. Troyat has put together is a record of Tolstoy's life from the copious letters, diaries, and memoirs of Lyov Nikolaevich himself, his wife, his children, and his friends. Has ever an eminent writer been so documented by written evidence? The number of members of the family who kept diaries seems from our point of view incredible. One of the daughters, Tanya, started hers at twelve. The conflict between Tolstoy and his wife over Chertkov, against whom she developed, not, it would seem, without cause, a mania of jealousy, over the right to publish her husband's writings, on which she was partly dependent for the income to support the family, and over the possession of his later diaries, in which she felt she had been maligned—all this has been pieced together in a depressing but absorbing narrative. The comic aspects of Lyov Nikolaevich's life from the moment of his religious conversion are too obvious and too well-known to be described here at length. While preaching chastity, poverty, and the inescapable obligation to share the manual labor of the muzhik, he continued to give his wife pregnancies, most of them resulting in children, up through the age of seventy; to live comfortably among his family, with a secretary and a doctor in attendance; and although he did learn to make shoes and sometimes worked in the fields, to occupy himself chiefly with the production, subject to Chertkov's censorship, of his innumerable religious tracts. In all this, despite his profession of humility, there was certainly a fair amount of vanity.

Once for all [he had written at twenty-five] I must accustom myself to the idea that I am an exceptional being, one who is ahead of his period, and who is by temperament absurd, unsociable and always dissatisfied.... I have been lying to myself in imagining that I have

friends, that there were people who understood me. A mistake! I have never met a single man who was morally as good as I am, who has always in every situation been drawn, as I have been, to the good. Who, like me, is always ready to sacrifice everything for this ideal. It is on this account that I find no society in which I feel at home. He was later to speak much of his imperfections, but, even discounting the stock reproaches that women make to their husbands, it is possible to sympathize with the Countess, Sofia Andreevna, when she complains of Tolstoy's "vanity, his desire for glory, the need to have himself talked about as much as possible." He unloads everything on me [she writes in her diary], everything without exception: the children, the management of the properties, his relations with people, his business affairs, the household, the publishers. He scorns me for taking care of all that, he shuts himself up in his egoism and constantly criticizes me. And what does he do himself? He goes for walks, he rides, writes a little, does whatever he pleases, does nothing whatever for the family and enjoys the profits of everything: of his daughter's help, of his comfort, of the adulation that is squandered on him, of my submission to him and the trouble I take for him. And the glory, this insatiable thirst for glory to which he has sacrificed everything and continues to sacrifice everything!

In all this, on the part of Tolstoy, there was evidently a certain perversity. He liked to make people uncomfortable by reminding them at the dinner table that not everyone could enjoy these luxuries. "Why," he demanded in the course of one of their parlor games, "must Ustyusha, Alyona, Peter, etc. [the servants] cook, prepare things, sweep, clear away, serve, while the gentlemen eat, stuff themselves, go to the water closet and eat again?" One of the relatives he liked best and who interested him most was a cousin, Alexandrina Tolstoya, who was a maid of honor to one of the grand duchesses. When he made his discovery, by revelation, of what he regarded as the true Christianity, he harangued her insultingly for her Orthodox faith: "Whether rightly or wrongly, I consider your faith as a work of the Devil, uniquely conceived to deprive humanity of the salvation promised by Christ." He recalled this letter after sending it, but wrote another in a not very different vein: I understand that any woman can desire her salvation, but then, if she is a true Christian, she will begin by dissociating herself from the Court, from the world; she will go to matins, she will fast, she will save herself as best she can. How has a courtier's situation come to be a diploma of theology? It is comic in the highest degree! It is as if he had discovered only late in life that the church depends on the state and the state on the police and the army, and that hence all run counter to the teachings of Jesus; and as if he were reprobating other people for not having always known and acted on this.

Is it Tolstoy's notion that Alexandrina, rather remarkably intelligent though she evidently was, would be ready to give up her social position and the Orthodox ritual she had been practicing all her life for the extremely subversive doctrines of her now fanatical cousin? And how much of his gospel of asceticism and his gesture of stripping himself of his property may not have been due to the impulse to worry and exasperate his wife? When he was asked to give land to his peasants, he was able to protest that he was powerless, since everything now was in the name of the Countess. When people wrote him complaining that he was not living up to his principles, he would reply that he was sorry, that he was deeply embarrassed, but was fatally caught in the web of his family and other obligations. At the time of the terrible famine of 1891-2, not far from the Tolstoy estate, he at first took the attitude that there were plenty of people who were ready to feed the starving out of pride in the name of benefactors and in order to prevent them from revolting; whereas the fundamentally important thing, for the purpose of combatting the famine, was not to give the people bread, but "to love the hungry as well as the fed." And yet as the misery grew worse and more people were dying of

hunger, he was unable to remain indifferent and, contrary to what he thought were his principles, he undertook to organize effective relief and in this he was aided by the Countess and his daughters. He fought for and financed the Doukhobors, who were then being persecuted for their refusal to serve in the army; and though he would not take part in political and social reforms, he was in general opposed to suppression by the government and insisted on the paramount importance of obeying one's individual conscience. He was perhaps a kind of Protestant at the same time that his aspirations to saintliness were quite those of a Russian holy man. It is evidence of his great vitality, of his extraordinary insight into other personalities, and of his genuine if intermittent efforts toward nobility of moral character that he should have been able to command, to the end of his long life, so much reverence as well as admiration. All this M. Troyat has got into his book compactly and without much commentary. (It should be mentioned that the Dial Press has published a translation by Ann Dunnigan of *The Last Year of Leo Tolstoy* by V.F. Bulgakov. Bulgakov was Tolstoy's last secretary, and he shows how, up to the agonies of the final moments, the family went on performing the familiar rituals of Russian life, the celebration of days sacred to the saint after whom one had been named, the amusements such as "post office" and chess, the enjoyment of music and the discussion of literature, and the entertainment of guests on a scale which to us seems quite staggering.)

* * *

In college I read translations of "The Kreutzer Sonata" and "Master and Man," and although I was rather impressed by the latter, the absurdity of the former and the bleakness of both discouraged me from further reading of Tolstoy. When, however, I was studying Russian after a trip to the Soviet Union, I sat down to *War and Peace*. I came to it under favorable circumstances. I was then living alone in the country in Connecticut beside the small Mianus River. I was buried in a fairly large forest with not another house in sight. I would begin to read or write after dinner and not go to bed till four in the morning. It was winter, and the only drive was covered with snow. I could imagine myself perfectly in the country house of the Bolkonskys, when the smooth and worldly official, Prince Kuragin, is coming to present his worthless son for the hand of the Princess Maria, whom he wants to marry for her money, and her father, the laconic old Prince, whose attitude toward the Kuragins is anything but cordial, makes his servant put back on the road, in order to obstruct their arrival, the snow that has just been removed in their honor. I was surprised to find the book so amusing: the scene at the death of Pierre's father and the episode of debauchery with the bear. The atmosphere was anything but bleak. And the vitality of the characters was amazing. Tolstoy is perhaps—in a less caricatured way from those of either Dickens or Proust—the greatest mimic in fiction, and this is something that cannot be brought over in translation. Though I did not always know which syllable of a Russian word should be stressed and could not have read a page aloud correctly, the voices of the characters, in my winter solitude, seemed to come right out of the pages and to animate my little house: the dry brusquery of the old Bolkonsky, compelling his son, Prince Andrei, to acknowledge the failure of his marriage: "*Ploxo delo, a?*" "*Chto ploxo?*" "*Zhena!*" ("Bad business, eh?" "What is bad?" "Wife!"); the wheedling diplomacy of the old Kuragin, who tries to reassure the grasping elder princess by calling her "*Moya golubushka*" ("my dear little dove"); the girlish high spirits of Natasha, more or less transformed by Constance Garnett into a proper little English girl such as one finds in the drawings of Du Maurier, with her gay and rather infantile family. "*Smotrite na papà*" ("Look at papa"), cried Natasha for all the ballroom to hear ...(completely forgetting that she was dancing with a grown-up), bending her curly head to her knees and filling the whole room with her ringing laugh.... "*Batyushka-to nash! Orel!*" ("Our Father! An eagle!") exclaimed the nurse loudly from a doorway. And the invidious often comic contrast between the characters when they are speaking their formal French, and when they relapse into their good

old blunt Russian. The only possible objection to *War and Peace* has been made by Dmitri Mirsky: that it is something of an idealized idyl of the life of the old nobility, of the author's grandparents and parents, the mother whom he never knew, the father who died while he was still a child. The closer he comes to his own experience the more he is bound to be biased by the moral problems he is forced to confront.

* * *

I do not know how much the foreign reader of Tolstoy is aware, in *Anna Karenina*, of the issue that Tolstoy is raising between the life of the Karenins and Vronskys in St. Petersburg, and that of Levin and Kitty in the country outside Moscow. For young people, especially young women, the shade of contempt that the author feels toward the people of Petersburg may not be perceptible at all. The affair of Anna and Vronsky may seem simply a romantic though tragic love story. Yet it is plain that Anna's creator does not take a lenient view of Anna, so beautiful but so immoral: she is damned by the Biblical epigraph; and Vronsky is made little short of ridiculous. Through a reckless desire to excel, he has broken the back of his mare in the races, as he is later to do with Anna; he bungles an attempt at suicide in which it seems evident that he has only half wanted to succeed; and, after Anna's effective self-destruction, he goes off in the train with nothing worse than a toothache, to the war against the Turks, of which Tolstoy did not approve. A stern moral judgment is half-hidden in this partly seductive story.

* * *

Childhood, *Adolescence*, and *Youth*, all written when Tolstoy was in his twenties, are in the main autobiographical, but are mixed with elements of fiction. They are remarkable and very interesting but in certain ways rather unsympathetic. Yet what is unsympathetic is due to Tolstoy's instinct for telling the truth about himself. His characteristic traits are seen to have emerged very early. His reaction to being made to speak French—bound up with his reaction against mere elegance—when he is reprimanded by his sister's governess for speaking Russian instead of French, makes him want to chatter in Russian; and he loathes a later French tutor, who disapproved of him and punished him severely. In our country, the people of a certain class [he writes in *Youth*], who love in a *beautiful* way, not only talk to other people about their love, but invariably, talk about it in French. It sounds strange and absurd to say so, but I am sure that there have been many people of a certain society, especially the women, whose love for their friends, their husbands, their children would be quite annihilated if they were forbidden to talk about them in French. This prejudice against the French was probably reinforced later as a result of the Crimean war, in which Tolstoy as a young man took part, when the Russians were beaten by the French and the English. A certain exhibitionism in Tolstoy's religious attitude is illustrated thus early in his story of his first confession, which has taken place in the narrator's home, but which he feels obliged to supplement when, after lying in bed at night and remembering a sin which he has failed to acknowledge, he gets up early and goes to the monastery in order to discharge the duty of confessing it. The priest is at morning mass and cannot attend to him at once, and while waiting in a rather bare and shabby anteroom, "which spoke to me clearly of some new and up to now unknown life, of a solitary life of prayer and quiet and peaceful happiness, 'The months pass, the years pass,' I thought, 'he is always alone, he is always at peace, he always feels that his conscience is clean before God and that his prayers are heard by Him.' " This impulse toward asceticism continues to be felt but it has always kept a certain dramatic character, a certain desire to be known as acting out these gestures of humility. One may note here also the scene in one of the uncontinued beginnings of the projected novel on the Decembrist conspirators, in which a man of fifty-two, going to church on Maundy Thursday, remembers how once, at the age of twelve, he had felt a temptation to interrupt the mass by crowing like a cock and is obliged to make an effort to dismiss such buffooneries, which even

now haunt him as impulses, and recognize his sins and pray. It is this kind of impious self-assertion, later masked as apostolic vocation, that is seen to develop to immense proportions in the later years of Tolstoy's life and that makes his professions and behavior, so insulting and troublesome to his wife and which result in his excommunication, rather suspect as a demonstration of saintliness. He was obviously disappointed at never being penalized by the government, which for once in his case showed good sense. He longed to be imprisoned, a martyr.

* * *

What confronted Tolstoy now that he seemed to have disposed of all other obligations and to have attained all personal goals was the degraded position of the muzhiks. And then there was the question of salvation. The gulf between the peasants and the educated classes in Russia was so wide that it presented to the Russian intellectuals and Westernized landowners a problem that, if they tried to think seriously about it, made them reformers or revolutionaries, or filled them with despair or stunned them. From Chernyshevsky, with his novel *Chto Delat'?*, to Lenin's political program with the same title, *What To Do?*, this question was reiterated through the nineteenth century and during the later revolutionary period. Tolstoy echoed it in *Tak Chto-zhe Nam Delat'?* in connection with his exploration of the misery of the Moscow poor. This question, as put by Tolstoy, sent a vibration through all the West from Gandhi to Jane Addams. There were poverty and degraded people everywhere, but in the West it was easier for the comfortable classes to be callous to this state of things or to contribute to occasional charities, and, except in the case of the American Negroes, the gulf was not so wide, even after the emancipation of the serfs, between the educated people and the peasants, as it continued to be in Russia.

One must always remember this appalling disproportion in connection with Russian literature and history. Among the great writers, Turgenev, abandoning his estates, left Russia, except for short visits, in order to live in the West and made fun of the Russian idealists who thought that the salvation of Russia was coming "out of the peasants' overcoat"; Chekhov, the grandson of a serf, was occupied mostly with the educated classes, but gave horrible pictures of the peasantry. Tolstoy tried to be a muzhik and denounced all art, including his own, which could not be understood by the peasant; the lower classes had to be gradually educated. Tolstoy, in his schools for his peasants, had of course tried to do this in a very small way. What a terribly long distance there was to go is shown by the slow results of education in the Soviet schools. Tolstoy's relapse into religion, in a belief, as the only hope, in the example of the virtuous and benevolent man, seems a throwing up of hands in despair at the spectacle of so much evil, of which the abasement of so many human beings constituted a large part. Tolstoy found himself now in the unusual, for a great writer perhaps the unprecedented, situation of having everything he could possibly want in a material way and having realized, in a literary way, all of his possible ambitions. He had a title and a distinguished ancestry and an extensive country estate, no adverse parental pressures, an attractive and intelligent wife, first-rate intellectual powers, and an imaginative genius which had enabled him to produce two masterpieces of fiction that were bringing in a good deal of money: when he heard of his former colleagues' receiving important official appointments, he would sometimes remark ironically that "though he had not himself earned a Generalship in the artillery, he had at any rate won a Generalship in literature."

But he had served in the war against Shamil and had nearly been killed by a shell, he had fought in the Crimean warfare, and had declined or disregarded three crosses for valor; he had had innumerable women; he had seen all he wanted to see of Western Europe. He had acted as an Arbiter of the Peace, after the liberation of the serfs, with such an impartial justice as to

infuriate many of his fellow nobles; he had instituted and directed a school for the peasants' children on a system of his own creation. He was, although sensitive, physically strong. It is no wonder—though so rare a phenomenon—that, having experienced and accomplished so much at a relatively early age, he should ask himself, as he does in *A Confession*, what there was to hope for and aim at next. Life at last has confronted him with a great blank. How is this blank to be filled? There is no further way to excel save through some effort of spiritual ennoblement. The difference between Tolstoy's great early novels and his so much less satisfactory late ones is due to his having been able, in the former, to split up his own complicated personality into the several personalities of his characters—as in Pierre Bezukhov, Prince André, and Nicholas Rostov—each true to its own laws and each more or less of a piece. When he falls back on dramatizing his own mixed nature in an attempt to reduce it to something more easily acceptable, he produces such relatively implausible creations as Ivan Ilyich, Father Sergius, and Prince Nekhlyudov.

* * *

Resurrection is more impressive because it deals with actuality, a situation much less of fantasy. It seems to me an underrated book. It has become a critics' cliché to say that it is by no means equal to its more celebrated predecessors. It was begun in December, 1889, twelve years after *Anna Karenina*, but not finished till 1899, when the author made it ready to be published for the purpose of raising money to finance the journey to Canada of the heretical sect of the Doukhobors, who refused to serve in the army. Tolstoy said of the novel that he did not have time to make it what it ought to be; but what he seems to have meant was not that he did not have time to polish and prune it but that he ought to have brought it closer to his conception of the kind of thing that could be easily understood by an unsophisticated audience. Prince Nekhlyudov has to sit on a jury and finds himself in the position of judging a peasant girl with whom he has had a love affair and who has since then lapsed into prostitution and is now accused wrongly of having robbed and poisoned a merchant. Nekhlyudov offers to marry her, but she cannot take this seriously; and most of the rest of the story consists of his persistent attempts to rectify the judicial error. These take us through a whole panorama of tsarist officialdom, which gives Tolstoy an excellent opportunity to exploit his inexhaustible interest in how different kinds of people behave and live. He even includes a group of young revolutionaries, of whose projects he disapproves but whose point of view he is able to understand.

These judges and generals and rebels open up for Tolstoy a whole new department of contemporary life. *Resurrection* takes you closer to the machinery of the government than anything he has written before. In the end, Nekhlyudov succeeds in getting his girl's sentence commuted—hardly a possibility under the present Soviet regime—but he insists on following her to Siberia. We get a vividly imagined picture of an elderly general and his wife who have been assigned to duty there—another instance of Tolstoy's success in presenting the life of a family existing under special conditions. Nekhlyudov's former love finds an admirer better suited to her than he is; and Nekhlyudov discovers the New Testament, which he borrows from one of the prisoners. Tolstoy was contemplating a sequel which should show Nekhlyudov's subsequent struggles to lead a truly Christian life, but this sequel was never written. His own problems, one supposes, overwhelmed him. The title of this novel involves a kind of play on words that does not come out in translation. "*Voskresenia*" means both "Sunday" and "resurrection," and the satirical accounts of the Orthodox services, one of them in a prison chapel, are intended by Tolstoy to contrast with Nekhlyudov's real *voskresenia* when he is brought to it by the words of Jesus.

* * *

Tolstoy's moral principles come into play in his treatment of Nicholas I, who is made a detestable figure: he acquires a respectable young girl as his mistress and, while enjoying a conviction of righteousness for having abolished capital punishment, thinks nothing of virtually condemning to death by making him run a gauntlet of beatings, a student who has struck his professor. But a fragment and an omitted chapter of the manuscript, unpublished at the time of Tolstoy's death, show how his preoccupation with the lives of different kinds of families led him away from this bitter portrait. He began to become interested in the Royal Family and he seems to be trying to explain how Nicholas got to be what he was. This additional matter has also unaccountably been omitted from the selective Soviet edition. It is illuminating, by the way, to compare the texts published by Chertkov in Germany, which show in brackets what the censorship would not allow, with the recent English edition of *Babi Yar*, which shows omissions imposed by the Soviet censor. The effect is very much the same. In the one case, what is removed is everything derogatory to the Tsar; in the second, everything that unpleasantly reflects on the recent procedures of the Soviet government. In all Tolstoy's talk about love and God, it is a little hard to know what he means by either. He does not seem very much to love others; and what is his communion with God? He is more impressive when, at the time of the famine—though, as he said, in violation of his principles—he is saving the lives of the starving, or when he is compromising with his children and with Sophie Andreevna, to the last of whom he owed so much. For the rest, the cult of love and God seems often, as with Father Sergius, an arid self-directed exercise that simply raises the worshipper in his own esteem.

RACHEL – BIOGRAPHY BY CLAUDE DUFRESNE – LA DIVINE TRAGEDIE

I discovered Rachel after reading her biography. I heard of course of Rachel, but knew very little about her life, basically that she was born to a very poor Jewish family, had a fantastic talent as tragedienne especially in *Phedre* by Racine, that she had many lovers, and died very young. But in her biography I discovered an admirable person, that made a tremendous impact on the theater – as her acting style was characterized by clear diction and economy of gesture, which represented a major change from the exaggerated style of those days, as society was beginning to demand the highly emotional, realistic, instinctual acting styles of the Romantics. I hate exaggeration in theater and in life in general, unless it is for seeing 50+ films in 10 days at the Haifa Film Festival, 30+ plays, films, museums, concerts, & operas in 10 days at a visit in Paris, or writing day and night in 18 days a 5 acts momentous play "Nelly Doron". I saw in films how actors played before Rachel and it seems really ridiculous, but I do not need films for that as the Israeli/Russian actors who founded the Israeli Theater in Habimah played like that for 50 years, and only in "Sabras" theaters as the Cameri you could enjoy "modern" acting without all the mannerism of the old school. Rachel was the first actress that experienced modern acting (as usual "modern" for me starts somewhere in the 19th century), as Ibsen was the father of modern theater, and Antonioni, Fellini and La nouvelle vague were the precursors of modern films.

To all the xenophobic French people, the old bourgeoisie, the anti-Dreyfusards, and the Petainists (luckily enough, most of the Frenchmen at least today are open-minded and xenophiles) I would say how is it, if you hate so much strangers, that some of the most talented personalities/icons in France in the last two centuries were not born in France or their parents and grandparents were foreigners – Rachel and Sarah Bernhard were Jewish and I'll not write here once again about the immense contribution of Jews to France – I have done it at

length in my survey on Modern Literature. But let us give other examples – Zola's father was Italian, Duma's grandmother was an African slave, Heinrich Heine was German, Chopin was Pole, Offenbach was German, Marie Curie was Pole, Stravinsky was Russian, Diaghilev was Russian, Yves Montand was Italian, Luis Mariano was Spanish, Dalida was Egyptian/Italian, Edith Piaf's mother and grandparents were Italian and Moroccan. Charles Aznavour was Armenian, Georges Moustaki and Guy Beart are Egyptian/Jews, Camus was a pied-noir Algerian of Spanish descent, Ionesco was Romanian, Beckett was Irish, Nana Mouskouri is Greek, Zinedine Yazid Zidane is from Algerian descent, Picasso was Spanish, Vlaminck was Flemish, Van Gogh was Dutch, Brancusi – Romanian, Picabia's father was Cuban, Utrillo's father was apparently Spanish, Marc Chagall was born in Belarus, Jacques Lipchitz was born in Lithuania, Max Ernst was born in Germany, Giacometti was Swiss, Vasarely was born in Hungary, Balthus was born in Poland. Can there be more Frenchmen than Zola and Dumas? More French than Offenbach's operas, yet he was a Jewish German. Can there be a more French singer than Yves Montand, yet he was Italian, than Aznavour, yet he was Armenian. Van Gogh is Provence par excellence, yet he was Dutch. And so Rachel the most French actress was the daughter of a Swiss Jewish pedlar.

We'll compare here the entries/articles on Rachel, the French actress, by Wikipedia, Encyclopedia Britannica, and Lyndon Orr, as the difference of presentation is really amazing.

Elisabeth "Eliza/Élisa" Rachel Félix (also *Elizabeth-Rachel Félix*), better known only as **Mademoiselle Rachel** (February 21, 1821 – January 3, 1858), was a [French actress](#). She became a prominent figure in French society, and was the mistress of, among others, [Napoleon III](#) and [Napoléon Joseph Charles Paul Bonaparte](#). Efforts by newspapers to publish pictures of her on her deathbed led to the introduction of [privacy rights](#) into French law. Rachel Félix was born Elisa Félix on February 28, 1821, in [Mumpf](#), [Rheinfelden](#), [Aargau](#). Her father, Jacob Félix, was a peddler and her mother, Esther Hayer, was a Bohemian dealer in second-hand clothes. She had four sisters (Sarah, Rebecca, Dinah, and [Leah](#)) and one brother, Raphael. As a child, Félix earned money singing and reciting in the streets. She arrived in Paris in 1830 intending to become an actress. She took [elocution](#) and singing lessons, eventually studying under the instruction of the musician [Alexandre-Étienne Choron](#) and [Saint-Aulaire](#). She also took dramatic arts classes at the Conservatoire. She debuted in *La Vendéenne* in January 1837, at the [Théâtre du Gymnase](#). Delestre-Poirson, the director, gave her the stage name Rachel, which she chose to keep in her private life. Rachel was described as a very serious and committed student. She was admired for her intelligence, work ethic, diction, and ability to act. Auditioning in March, 1838, she starred in [Pierre Corneille's](#) *Horace* at the [Théâtre-Français](#) at the age of 17. During this time she also began a liaison with [Louis Véron](#), the former director of the [Paris Opera](#), which became the subject of much gossip. From 1838 to 1842, she lived in a third-floor apartment in Paris's [Galerie Véro-Dodat](#). Her fame spread throughout Europe after success in [London](#) in 1841, and she was often associated with the works of [Racine](#), [Voltaire](#), and Corneille. She toured [Brussels](#), [Berlin](#), and [St. Petersburg](#). Though French classical tragedy was no longer popular at the time Rachel entered the stage of Comédie-Française, she remained true to her classical roots, arousing audiences with a craving for the tragic style of writers like Corneille, Racine and Molière. She created the title role in [Eugène Scribe's](#) *Adrienne Lecouvreur*. Her acting style was characterized by clear diction and economy of gesture; she evoked a high demand for classical tragedy to remain on the stage. This represented a major change from the exaggerated style of those days, as society was beginning to demand the highly emotional, realistic, instinctual acting styles of the Romantics. Félix completely rejected the Romantic Drama movement happening in nineteenth-century France. She was best known for her

portrayal of the title role in [Phèdre](#). Eliza Rachel, as the actress was also known, was reportedly a great tragedienne.

Félix became the mistress of [Napoleon I](#)'s son, [Alexandre Joseph Count Colonna-Walewski](#), and together they had a son, Alexandre Colonna-Walewski, in 1844. He entered the diplomatic service and died at his post in Turin in 1898. After an affair with Arthur Bertrand, Félix left for England. There she briefly had an affair with [Louis Napoleon Bonaparte, later Napoleon III](#), as well as with [Napoléon Joseph Charles Paul Bonaparte](#). Her second son, Gabriel-Victor Félix, was never acknowledged by Bertrand. He became a navy man and died in the Congo in 1889. Rachel never married, although she had many lovers. When Walewski upbraided her for not remaining faithful to him, she retorted, "I am as I am; I prefer renters to owners." Félix's health declined after a long tour of Russia. She died of [tuberculosis](#) in [Le Cannet, Alpes-Maritimes](#), France. Upon her deathbed, she wrote many farewell letters to her sons, family members, lovers, colleagues and theatre connections at Comédie-Française. She is buried in a mausoleum in the Jewish part of [Père Lachaise Cemetery](#) and Avenue Rachel in Paris was named after her. The English theatre critic [James Agate](#) published a biography of her in 1928, which echoes the anti-Semitism of his day. A modern account of her life and legacy by Rachel Brownstein was published in 1995. The character Vashti in [Charlotte Brontë](#)'s novel [Villette](#) was based on Félix, whom Brontë had seen perform in London. The raschel knitting-machine is according to the OED also named after her, and so is a face powder in light tannish colour, used in artificial light.

RACHEL (1821-1858), French actress, whose real name was Elizabeth Felix, the daughter of poor Jew pedlars, was born on the 28th of February 1821, at Mumpf, in the canton of Aargau, Switzerland. At Reims she and her elder sister, Sophia, afterwards known as Sarah, joined a troupe of Italian children who made their living by singing in the cafes, Sarah singing and Elizabeth, then only four years of age, collecting the coppers. In 1830 they came to Paris, where they sang in the streets, Rachel giving such patriotic songs as the *Parisienne* and the *Marseillaise* with a rude but precocious energy which evoked special admiration and an abundant shower of coppers. Etienne Choron, a famous teacher of singing, was so impressed with the talents of the two sisters that he undertook to give them gratuitous instruction, and after his death in 1833 they were received into the Conservatoire. Rachel made her first appearance at the Gymnase in Paul Duport's *La Vendéenne* on the 4th of April 1837, with only mediocre success. But on the 12th of June in the following year she succeeded, after great difficulty, in making a *début* at the Théâtre Français, as Camille in Corneille's *Horace*, when her remarkable genius at once received general recognition. In the same year she played Roxane in Racine's *Bajazet*, winning a complete triumph, but it was in Racine's *Phèdre*, which she first played on the 21st of January 1843, that her peculiar gifts were most strikingly manifested. Her range of characters was limited, but within it she was unsurpassable. She excelled particularly in the impersonation of evil or malignant passion, in her presentation of which there was a majesty and dignity which fascinated while it repelled. By careful training her voice, originally hard and harsh, had become flexible and melodious, and its low and muffled notes under the influence of passion possessed a thrilling and penetrating quality that was irresistible. In plays by contemporary authors she created the characters of Judith and Cleopatra in the tragedies of Madame de Girardin, but perhaps her most successful appearance was in 1849 in Scribe and Legouvé's *Adrienne Lecouvreur*, which was written for her. In 1841 and in 1842 she visited London, where her interpretations of Corneille and Racine were the sensation of the season. In 1855 she made a tour in the United States with comparatively small success, but this was after her powers, through continued ill-health, had begun to deteriorate. She died of consumption at Cannet, near Nice, on the 4th of January

1858, and was buried in the Jewish part of the cemetery of Père Lachaise in Paris. Jules G. Janin, *Rachel el la tragédie* (1858); Mrs Arthur Kennard, *Rachel* (Boston, 1888); and A. de Faucigny-Lucinge, *Rachel et son temps* (1910).

Rachel by Lyndon Orr

Outside of the English-speaking peoples the nineteenth century witnessed the rise and triumphant progress of three great tragic actresses. The first two of these—Rachel Felix and Sarah Bernhardt—were of Jewish extraction; the third, Eleanor Duse, is Italian. All of them made their way from pauperism to fame; but perhaps the rise of Rachel was the most striking. In the winter of 1821 a wretched peddler named Abraham—or Jacob—Felix sought shelter at a dilapidated inn at Mumpf, a village in Switzerland, not far from Basel. It was at the close of a stormy day, and his small family had been toiling through the snow and sleet. The inn was the lowest sort of hovel, and yet its proprietor felt that it was too good for these vagabonds. He consented to receive them only when he learned that the peddler's wife was to be delivered of a child. That very night she became the mother of a girl, who was at first called Elise. So unimportant was the advent of this little waif into the world that the burgomaster of Mumpf thought it necessary to make an entry only of the fact that a peddler's wife had given birth to a female child. There was no mention of family or religion, nor was the record anything more than a memorandum.

Under such circumstances was born a child who was destined to excite the wonder of European courts—to startle and thrill and utterly amaze great audiences by her dramatic genius. But for ten years the family—which grew until it consisted of one son and five daughters—kept on its wanderings through Switzerland and Germany. Finally, they settled down in Lyons, where the mother opened a little shop for the sale of second-hand clothing. The husband gave lessons in German whenever he could find a pupil. The eldest daughter went about the cafes in the evening, singing the songs that were then popular, while her small sister, Rachel, collected coppers from those who had coppers to spare. Although the family was barely able to sustain existence, the father and mother were by no means as ignorant as their squalor would imply. The peddler Felix had studied Hebrew theology in the hope of becoming a rabbi. Failing this, he was always much interested in declamation, public reading, and the recitation of poetry. He was, in his way, no mean critic of actors and actresses. Long before she was ten years of age little Rachel—who had changed her name from Elise—could render with much feeling and neatness of eloquence bits from the best-known French plays of the classic stage. The children's mother, on her side, was sharp and practical to a high degree. She saved and scrimped all through her period of adversity. Later she was the banker of her family, and would never lend any of her children a sou except on excellent security. However, this was all to happen in after years.

When the child who was destined to be famous had reached her tenth year she and her sisters made their way to Paris. For four years the second-hand clothing-shop was continued; the father still taught German; and the elder sister, Sarah, who had a golden voice, made the rounds of the cafes in the lowest quarters of the capital, while Rachel passed the wooden plate for coppers. One evening in the year 1834 a gentleman named Morin, having been taken out of his usual course by a matter of business, entered a BRASSERIE for a cup of coffee. There he noted two girls, one of them singing with remarkable sweetness, and the other silently following with the wooden plate. M. Morin called to him the girl who sang and asked her why she did not make her voice more profitable than by haunting the cafes at night, where she was sure to meet with insults of the grossest kind. "Why," said Sarah, "I haven't anybody to

advise me what to do." M. Morin gave her his address and said that he would arrange to have her meet a friend who would be of great service to her. On the following day he sent the two girls to a M. Choron, who was the head of the Conservatory of Sacred Music. Choron had Sarah sing, and instantly admitted her as a pupil, which meant that she would soon be enrolled among the regular choristers. The beauty of her voice made a deep impression on him. Then he happened to notice the puny, meager child who was standing near her sister. Turning to her, he said: "And what can you do, little one?" "I can recite poetry," was the reply. "Oh, can you?" said he. "Please let me hear you." Rachel readily consented. She had a peculiarly harsh, grating voice, so that any but a very competent judge would have turned her away. But M. Choron, whose experience was great, noted the correctness of her accent and the feeling which made itself felt in every line. He accepted her as well as her sister, but urged her to study elocution rather than music.

She must, indeed, have had an extraordinary power even at the age of fourteen, since not merely her voice but her whole appearance was against her. She was dressed in a short calico frock of a pattern in which red was spotted with white. Her shoes were of coarse black leather. Her hair was parted at the back of her head and hung down her shoulders in two braids, framing the long, childish, and yet gnome-like face, which was unusual in its gravity. At first she was little thought of; but there came a time when she astonished both her teachers and her companions by a recital which she gave in public. The part was the narrative of Salema in the "Abufar" of Ducis. It describes the agony of a mother who gives birth to a child while dying of thirst amid the desert sands. Mme. de Barviera has left a description of this recital, which it is worth while to quote: While uttering the thrilling tale the thin face seemed to lengthen with horror, the small, deep-set black eyes dilated with a fixed stare as though she witnessed the harrowing scene; and the deep, guttural tones, despite a slight Jewish accent, awoke a nameless terror in every one who listened, carrying him through the imaginary woe with a strange feeling of reality, not to be shaken, off as long as the sounds lasted. Even yet, however, the time had not come for any conspicuous success. The girl was still so puny in form, so monkey-like in face, and so gratingly unpleasant in her tones that it needed time for her to attain her full growth and to smooth away some of the discords in her peculiar voice.

Three years later she appeared at the Gymnase in a regular debut; yet even then only the experienced few appreciated her greatness. Among these, however, were the well-known critic Jules Janin, the poet and novelist Gauthier, and the actress Mlle. Mars. They saw that this lean, raucous gutter-girl had within her gifts which would increase until she would be first of all actresses on the French stage. Janin wrote some lines which explain the secret of her greatness: All the talent in the world, especially when continually applied to the same dramatic works, will not satisfy continually the hearer. What pleases in a great actor, as in all arts that appeal to the imagination, is the unforeseen. When I am utterly ignorant of what is to happen, when I do not know, when you yourself do not know what will be your next gesture, your next look, what passion will possess your heart, what outcry will burst from your terror-stricken soul, then, indeed, I am willing to see you daily, for each day you will be new to me. To-day I may blame, to-morrow praise. Yesterday you were all-powerful; to-morrow, perhaps, you may hardly win from me a word of admiration. So much the better, then, if you draw from me unexpected tears, if in my heart you strike an unknown fiber; but tell me not of hearing night after night great artists who every time present the exact counterpart of what they were on the preceding one.

It was at the Theatre Francais that she won her final acceptance as the greatest of all tragedians of her time. This was in her appearance in Corneille's famous play of "Horace."

She had now, in 1838, blazed forth with a power that shook her no, less than it stirred the emotions and the passions of her hearers. The princes of the royal blood came in succession to see her. King Louis Philippe himself was at last tempted by curiosity to be present. Gifts of money and jewels were showered on her, and through sheer natural genius rather than through artifice she was able to master a great audience and bend it to her will. She had no easy life, this girl of eighteen years, for other actresses carped at her, and she had had but little training. The sordid ways of her old father excited a bitterness which was vented on the daughter. She was still under age, and therefore was treated as a gold-mine by her exacting parents. At the most she could play but twice a week. Her form was frail and reed-like. She was threatened with a complaint of the lungs; yet all this served to excite rather than to diminish public interest in her. The newspapers published daily bulletins of her health, and her door was besieged by anxious callers who wished to know her condition. As for the greed of her parents, every one said she was not to blame for that. And so she passed from poverty to riches, from squalor to something like splendor, and from obscurity to fame. Much has been written about her that is quite incorrect. She has been credited with virtues which she never possessed; and, indeed, it may be said with only too much truth that she possessed no virtues whatsoever. On the stage while the inspiration lasted she was magnificent. Off the stage she was sly, treacherous, capricious, greedy, ungrateful, ignorant, and unchaste. With such an ancestry as she had, with such an early childhood as had been hers, what else could one expect from her?

She and her old mother wrangled over money like two pickpockets. Some of her best friends she treated shamefully. Her avarice was without bounds. Some one said that it was not really avarice, but only a reaction from generosity; but this seems an exceedingly subtle theory. It is possible to give illustrations of it, however. She did, indeed, make many presents with a lavish hand; yet, having made a present, she could not rest until she got it back. The fact was so well known that her associates took it for granted. The younger Dumas once received a ring from her. Immediately he bowed low and returned it to her finger, saying: "Permit me, mademoiselle, to present it to you in my turn so as to save you the embarrassment of asking for it." Mr. Vandam relates among other anecdotes about her that one evening she dined at the house of Comte Duchatel. The table was loaded with the most magnificent flowers; but Rachel's keen eyes presently spied out the great silver centerpiece. Immediately she began to admire the latter; and the count, fascinated by her manners, said that he would be glad to present it to her. She accepted it at once, but was rather fearful lest he should change his mind. She had come to dinner in a cab, and mentioned the fact. The count offered to send her home in his carriage.

"Yes, that will do admirably," said she. "There will be no danger of my being robbed of your present, which I had better take with me." "With pleasure, mademoiselle," replied the count. "But you will send me back my carriage, won't you?" Rachel had a curious way of asking every one she met for presents and knickknacks, whether they were valuable or not. She knew how to make them valuable. Once in a studio she noticed a guitar hanging on the wall. She begged for it very earnestly. As it was an old and almost worthless instrument, it was given her. A little later it was reported that the dilapidated guitar had been purchased by a well-known gentleman for a thousand francs. The explanation soon followed. Rachel had declared that it was the very guitar with which she used to earn her living as a child in the streets of Paris. As a memento its value sprang from twenty francs to a thousand. It has always been a mystery what Rachel did with the great sums of money which she made in various ways. She never was well dressed; and as for her costumes on the stage, they were furnished by the theater. When her effects were sold at public auction after her death her furniture was worse

than commonplace, and her pictures and ornaments were worthless, except such as had been given her. She must have made millions of francs, and yet she had very little to leave behind her. Some say that her brother Raphael, who acted as her personal manager, was a spendthrift; but if so, there are many reasons for thinking that it was not his sister's money that he spent. Others say that Rachel gambled in stocks, but there is no evidence of it. The only thing that is certain is the fact that she was almost always in want of money. Her mother, in all probability, managed to get hold of most of her earnings.

Much may have been lost through her caprices. One instance may be cited. She had received an offer of three hundred thousand francs to act at St. Petersburg, and was on her way there when she passed through Potsdam, near Berlin. The King of Prussia was entertaining the Russian Czar. An invitation was sent to her in the shape of a royal command to appear before these monarchs and their guests. For some reason or other Rachel absolutely refused. She would listen to no arguments. She would go on to St. Petersburg without delay. "But," it was said to her, "if you refuse to appear before the Czar at Potsdam all the theaters in St. Petersburg will be closed against you, because you will have insulted the emperor. In this way you will be out the expenses of your journey and also the three hundred thousand francs." Rachel remained stubborn as before; but in about half an hour she suddenly declared that she would recite before the two monarchs, which she subsequently did, to the satisfaction of everybody. Some one said to her not long after: "I knew that you would do it. You weren't going to give up the three hundred thousand francs and all your travelling expenses."

"You are quite wrong," returned Rachel, "though of course you will not believe me. I did not care at all about the money and was going back to France. It was something that I heard which made me change my mind. Do you want to know what it was? Well, after all the arguments were over some one informed me that the Czar Nicholas was the handsomest man in Europe; and so I made up my mind that I would stay in Potsdam long enough to see him." This brings us to one phase of Rachel's nature which is rather sinister. She was absolutely hard. She seemed to have no emotions except those which she exhibited on the stage or the impish perversity which irritated so many of those about her. She was in reality a product of the gutter, able to assume a demure and modest air, but within coarse, vulgar, and careless of decency. Yet the words of Jules Janin, which have been quoted above, explain how she could be personally very fascinating. In all Rachel's career one can detect just a single strand of real romance. It is one that makes us sorry for her, because it tells us that her love was given where it never could be openly requited.

During the reign of Louis Philippe the Comte Alexandre Walewski held many posts in the government. He was a son of the great Napoleon. His mother was that Polish countess who had accepted Napoleon's love because she hoped that he might set Poland free at her desire. But Napoleon was never swerved from his well-calculated plans by the wish of any woman, and after a time the Countess Walewska came to love him for himself. It was she to whom he confided secrets which he would not reveal to his own brothers. It was she who followed him to Elba in disguise. It was her son who was Napoleon's son, and who afterward, under the Second Empire, was made minister of fine arts, minister of foreign affairs, and, finally, an imperial duke. Unlike the third Napoleon's natural half-brother, the Duc de Moray, Walewski was a gentleman of honor and fine feeling. He never used his relationship to secure advantages for himself. He tried to live in a manner worthy of the great warrior who was his father. As minister of fine arts he had much to do with the subsidized theaters; and in time he came to know Rachel. He was the son of one of the greatest men who ever lived. She was the child of roving peddlers whose early training had been in the slums of cities and amid the

smoke of bar-rooms and cafes. She was tainted in a thousand ways, while he was a man of breeding and right principle. She was a wandering actress; he was a great minister of state. What could there be between these two?

George Sand gave the explanation in an epigram which, like most epigrams, is only partly true. She said: "The count's company must prove very restful to Rachel." What she meant was, of course, that Walewski's breeding, his dignity and uprightness, might be regarded only as a temporary repose for the impish, harsh-voiced, infinitely clever actress. Of course, it was all this, but we should not take it in a mocking sense. Rachel looked up out of her depths and gave her heart to this high-minded nobleman. He looked down and lifted her, as it were, so that she could forget for the time all the baseness and the brutality that she had known, that she might put aside her forced vivacity and the self that was not in reality her own. It is pitiful to think of these two, separated by a great abyss which could not be passed except at times and hours when each was free. But theirs was, none the less, a meeting of two souls, strangely different in many ways, and yet appealing to each other with a sincerity and truth which neither could show elsewhere. The end of poor Rachel was one of disappointment. Tempted by the fact that Jenny Lind had made nearly two million francs by her visit to the United States, Rachel followed her, but with slight success, as was to be expected. Music is enjoyed by human beings everywhere, while French classical plays, even though acted by a genius like Rachel, could be rightly understood only by a French-speaking people. Thus it came about that her visit to America was only moderately successful. She returned to France, where the rising fame of Adelaide Ristori was very bitter to Rachel, who had passed the zenith of her power. She went to Egypt, but received no benefit, and in 1858 she died near Cannes. The man who loved her, and whom she had loved in turn, heard of her death with great emotion. He himself lived ten years longer, and died a little while before the fall of the Second Empire.

VERDI – BIOGRAPHIES BY PETER SOUTHWELL-SANDER – VERDI HIS LIFE & TIME AND BY CLAUDIO CASINI IN ITALIAN

The philosopher [Isaiah Berlin](#) ranked Verdi in the 'naïve' category. It is probably my destiny to like most "naïve" writers – Emile Zola, painters - Renoir, and composers - Verdi. I am probably not sophisticated enough to appreciate James Joyce, Picasso and Wagner, my tastes are more "vulgar", "commonplace", popular. In cuisine – I prefer steaks and schnitzels to escargots and crabs, I prefer water to wine, in pop music I prefer Paul Anka to the Beatles, in sitcoms I prefer the Golden Girls to Seinfeld. Only in drama I am sophisticated enough to prefer Ionesco, Duerrenmatt, Sartre, Pinter, Strindberg, Shakespeare, Racine, Corneille, Lope de Vega, Pirandello, Lorca, Chekhov, Ibsen, Goethe, Brecht, O'Neill, Sophocles, Sobol, but even then I am also "naïve" as I appreciate and love also Feydeau, Rostand, Pagnol, Arthur Miller, Moliere, Odets, Kishon, Schnitzler, Anski, Williams, Aristophanes, Courteline, Goldoni, Mamet, Niel Simon, Albee, [Ziegfeld Follies](#)-styled revue, My Fair Lady, Oklahoma, South Pacific, The King and I, Seven Brides to Seven Brothers, Hello Dolly, Hair, Annie Get Your Gun, The Sound of Music, and Offenbach's operettas [Orphée aux enfers](#) (1858), [La belle Hélène](#) (1864), [La vie parisienne](#) (1866), [La Grande-Duchesse de Gérolstein](#) (1867) and [La Périochole](#) (1868)...

Not only in drama, in films also – my favorite directors are Ingmar Bergman, Antonioni, Fellini, La nouvelle vague, Jean Renoir, Elia Kazan, Fritz Lang, David Lean, Ken Loach, Billy Wilder, Woody Allen, Richard Attenborough, Milos Forman, Stanley Kramer, Sidney Lumet, Alan Pakula, Roman Polanski, Steven Spielberg, Francis Coppola, Sergei Eisenstein, Luis Bunuel, Pedro Almodovar, the Greek Theo Angelopoulos, the Portuguese Manoel de Oliveira who made films even at the age of 104, the Indian Satyajit Ray, the Israeli excellent directors since 2000, but I am also very fond of Frank Capra, Claude Berri, Charlie Chaplin, Clint Eastwood, Ernst Lubitsch, Otto Preminger, Rouben Mamoulian, Tony Richardson, some Indian films with Raj Kapoor, some Spanish films – La violetera, Joselito..., some Greek films with Aliki, films by Menahem Golan, Vittorio de Sica, the Austrian trilogy of Sissi, French films with Fernandel...

Personally, I don't agree at all to categorize authors, directors, and composers to "naïve" and "sophisticated". Verdi is by far a better composer than Wagner, Renoir is by far a better painter than Picasso, and Zola is by far a better author than Joyce. Greatness is achieved when a composer, painter or author, a director, playwright or philosopher, succeeds in moving you extremely emotionally and rationalistically – if quite all the paintings by Picasso leave you indifferent he is not as good as Renoir who moves me to tears, if Joyce's Ulysses does not move you at all – he is not as good as Zola who captivates you from the first moment, if Wagner's operas irritates you to the extreme – while Verdi's operas delight you to the extreme, he is not as good as Verdi. Aristotle is by far a better philosopher than Kant, as I understand and identify with him. Bergman and Capra are both great directors as Scenes from a Marriage and It's a Wonderful Life both make you cry and move you extremely, even that quite all the experts would say that Bergman is better – but not for me. Feydeau makes you laugh "sophisticatedly" not less than Shakespeare's Much Ado About Nothing – and so both are for me excellent playwrights and I enjoy seeing their plays in the same way. I admire Gaudi and cannot appreciate Gothic architecture, and so for me Gaudi is a better architect. I would also say that my son's architecture – [Joseph Cory/Geotectura](#) moves me much more than the Bauhaus architecture, and therefore for me he is a much better architect than Walter Gropius, but Gropius' wife Alma Mahler would disagree.

So, am I objective or subjective in my judgments? Frankly, I couldn't care less – I wrote an autobiography on all the topics that interest me, so even if 99% of the experts would disagree with me, this book is my book, my beliefs, my tastes, my philosophy of life. I adore Verdi, and so most of the opera lovers, much more than what they love Wagner, I may be populist, naïve, I am also willing to consider that I don't like Wagner because he was an anti-Semite (but I like Ken Loach and Theodorakis although they loathe Israel), while Verdi composed Nabucco on the sorrows of the Hebrews and compared it to the sorrows of the enslaved Italians. That I like Zola because he wrote J'accuse, but here there is not even a case because Joyce also loved very much Jews and his leading protagonist in Ulysses is a Jew. I am quite sure that Picasso loved much more Jews (he hated Nazism and Fascism – Guernica...) than Renoir, who was [a notorious anti-Semite](#) and denounced Pissarro's family as part of "that Jewish race of tenacious cosmopolitans and draft-dodgers who come to France only to make money". Renoir and Degas were anti-Dreyfusards, while Monet, Signac and Pissarro were Dreyfusards (and so was the Norwegian Grieg who refused in 1899 to come to play in Paris because of France's injustice to Dreyfus, and for that he was ostracized by some of his old friends). I prefer Renoir to Pissarro although the first was anti-Semitic and the second was Jew, as cultural preferences have nothing to do with social biases. Back to Verdi from this digression (I am becoming worse than Cervantes who in Don Quijote digresses all the time,

yet his book is a masterpiece, but I excuse those digressions as "stream of consciousness", which shows that Cervantes was as modern as Sartre and Joyce).

I wrote extensively in this book on Verdi, *Rigoletto* that I know by heart, and many of his operas. I bring herebelow extracts from Wikipedia's entry on Verdi and others, but I would like to start with a paragraph from Casini's Verdi on *Macbeth*, the opera which I have seen in 2010 in Dresden and made me discover a Verdi that I did not know before, certainly a Verdi who is much more different than the Verdi of *Rigoletto*, *La Traviata*, *Il Trovatore*, *Nabucco*, *Aida*...: "La novita di *Macbeth* consiste nel fatto che Verdi adopero lo schema convenzionale del melodramma in maniera oggettiva e spregiudicata, piegandolo a rappresentare un dramma barbarico nella maniera piu realistica possibile, piu vicina, per Verdi, al modello tragico di Shakespeare. L'impegno imponeva un concetto rivoluzionario del canto, rispetto a quel che esso era nel melodramma italiano." *Macbeth*'s novelty consists in the fact that Verdi depicts the story in an objective way, representing this barbaric drama in the most realistic way, much closer to Shakespeare's tragic model. *Macbeth* disclosed a revolutionary concept, which was quite new.

Giuseppe Fortunino Francesco Verdi (10 October 1813 – 27 January 1901) was an Italian composer of [operas](#). Verdi was born near [Busseto](#) to a provincial family of moderate means, and developed a musical education with the help of a local patron. Verdi came to dominate the Italian opera scene after the era of [Bellini](#), [Donizetti](#) and [Rossini](#), whose works significantly influenced him, becoming one of the pre-eminent opera composers in history. In his early operas Verdi demonstrated a sympathy with the [Risorgimento](#) movement which sought the unification of Italy. He also participated briefly as an elected politician. The chorus "[Va, pensiero](#)" from his early opera [Nabucco](#) (1842), and similar choruses in later operas, were much in the spirit of the unification movement, and the composer himself became esteemed as a representative of these ideals. An intensely private person, Verdi however did not seek to ingratiate himself with popular movements and as he became professionally successful was able to reduce his operatic workload and sought to establish himself as a landowner in his native region. He surprised the musical world by returning, after his success with the opera [Aida](#) (1871), with three late masterpieces: his [Requiem](#) (1874), and the operas [Otello](#) (1887) and [Falstaff](#) (1893). His operas remain extremely popular, especially the three peaks of his 'middle period': [Rigoletto](#), [Il trovatore](#) and [La traviata](#), and the bicentenary of his birth in 2013 was widely celebrated in broadcasts and performances. Verdi was committed to the publisher [Giovanni Ricordi](#) for an opera—which became [Stiffelio](#)—for Trieste in the Spring of 1850; and, subsequently, following negotiations with La Fenice, developed a libretto with Piave and wrote the music for [Rigoletto](#) (based on [Victor Hugo's](#) [Le roi s'amuse](#)) for Venice in March 1851. This was the first of a sequence of three operas (followed by [Il trovatore](#) and [La traviata](#)) which were to cement his fame as a master of opera. The failure of [Stiffelio](#) (attributable not least to the censors of the time taking offence at the taboo subject of the supposed adultery of a clergyman's wife and interfering with the text and roles) incited Verdi to take pains to rework it, although even in the completely recycled version of [Aroldo](#) (1857) it still failed to please. *Rigoletto*, with its intended murder of royalty, and its sordid attributes, also upset the censors. Verdi would not compromise:

What does the sack matter to the police? Are they worried about the effect it will produce?...Do they think they know better than I?...I see the hero has been made no longer ugly and hunchbacked!! Why? A singing hunchback...why not?...I think it splendid to show this character as outwardly deformed and ridiculous, and inwardly passionate and full of love. I chose the subject for these very qualities...if they are removed I can no longer set it to music.

Verdi substituted a Duke for the King, and the public response and subsequent success of the opera all over Italy and Europe fully vindicated the composer. Aware that the melody of the Duke's song "[La donna è mobile](#)" ("Woman is fickle") would become a popular hit, Verdi excluded it from orchestral rehearsals for the opera, and rehearsed the tenor separately. Verdi and his mistress Strepponi moved into Sant'Agata on 1 May 1851. May also brought an offer for a new opera from La Fenice, which Verdi eventually realised as *La traviata*. That was followed by an agreement with the Rome Opera company to present *Il trovatore* for January 1853. Verdi now had sufficient earnings to retire, should he have wished to do so. He had reached a stage where he could develop his operas as he wished, rather than be dependent on commissions from third parties. *Il trovatore* was in fact the first opera he wrote without a specific commission (apart from *Oberto*). At around the same time he began to consider creating an opera from Shakespeare's *King Lear*. After first (1850) seeking a libretto from Cammarano (which never appeared), Verdi later (1857) commissioned one from [Antonio Somma](#), but this proved intractable, and no music was ever written. Verdi began work on *Il trovatore* after the death of his mother in June 1851. The fact that this is "the one opera of Verdi's which focuses on a mother rather than a father" is perhaps related to her death. In the winter of 1851–52 Verdi decided to go to Paris with Strepponi where he concluded an agreement with the Opéra to write what became *Les vêpres siciliennes*, his first original work in the style of [grand opera](#). In February 1852, the couple attended a performance of [Alexander Dumas fils's](#) play, *The Lady of the Camellias*; Verdi immediately began to compose music for what would later become *La traviata*.

After his visit to Rome for *Il trovatore* in January 1853, Verdi worked on completing *La traviata*, but with little hope of its success, due to his lack of confidence in any of the singers engaged for the season. Furthermore, the management insisted that the opera be given a historical, not a contemporary setting. The premiere in March 1853 was indeed a failure: Verdi wrote: "Was the fault mine or the singers'? Time will tell." Subsequent productions (following some rewriting) throughout Europe over the following two years fully vindicated the composer; Roger Parker has written "*Il trovatore* consistently remains one of the three or four most popular operas in the Verdian repertoire: but it has never pleased the critics". Having achieved some fame and prosperity, Verdi began in 1859 to take an active interest in Italian politics. His early commitment to the [Risorgimento](#) movement is difficult to estimate accurately; in the words of the music historian [Philip Gossett](#) "myths intensifying and exaggerating [such] sentiment began circulating" during the nineteenth century. An example is the claim that when the "[Va, pensiero](#)" chorus in *Nabucco* was first sung in Milan, the audience, responding with nationalistic fervour, demanded an encore. As encores were expressly forbidden by the government at the time, such a gesture would have been extremely significant. But in fact the piece encored was not "Va, pensiero" but the hymn "Immenso Jehova". The growth of the "identification of Verdi's music with Italian nationalist politics" perhaps began in the 1840s. In 1848, the nationalist leader [Giuseppe Mazzini](#), (whom Verdi had met in London the previous year) requested Verdi (who complied) to write a patriotic hymn. The opera historian [Charles Osborne](#) describes the 1849 *La battaglia di Legnano* as "an opera with a purpose" and maintains that "while parts of Verdi's earlier operas had frequently been taken up by the fighters of the Risorgimento...this time the composer had given the movement its own opera" It was not until 1859 in Naples, and only then spreading throughout Italy, that the slogan "Viva Verdi" was used as an acronym for *Viva Vittorio Emanuele Re D'Italia* ([Viva Victor Emmanuel King of Italy](#)), (who was then king of [Sardinia](#)). After Italy was unified in 1861, many of Verdi's early operas were increasingly re-interpreted as [Risorgimento](#) works with hidden Revolutionary messages that perhaps had not been originally intended by either the composer or his librettists. The first performance of *Falstaff*

took place at La Scala on 9 February 1893. For the first night, official ticket prices were thirty times higher than usual. Royalty, aristocracy, critics and leading figures from the arts all over Europe were present. The performance was a huge success; numbers were encored, and at the end the applause for Verdi and the cast lasted an hour. That was followed by a tumultuous welcome when the composer, his wife and Boito arrived at the [Grand Hotel de Milan](#). Even more hectic scenes ensued when he went to Rome in May for the opera's premiere at the [Teatro Costanzi](#), when crowds of well-wishers at the railway station initially forced Verdi to take refuge in a tool-shed. He witnessed the performance from the Royal Box at the side of [King Umberto](#).

Not all of Verdi's personal qualities were amiable. John Rosselli concluded after writing his biography that "I do not very much like the man Verdi, in particular the autocratic [rentier](#)-cum-estate owner, part-time composer, and seemingly full-time grumbler and reactionary critic of the later years", yet admits that like other writers, he must "admire him, warts and all...a deep integrity runs beneath his life, and can be felt even when he is being unreasonable or wrong." Budden suggests that "With Verdi...the man and the artist on many ways developed side by side." Ungainly and awkward in society in his early years, "as he became a man of property and underwent the civilizing influence of Giuseppina,...[he] acquired assurance and authority." He also learnt to keep himself to himself, never discussing his private life and maintaining when it suited his convenience legends about his supposed 'peasant' origins, his materialism and his indifference to criticism. Mendelsohn describes the composer as "an intensely private man who deeply resented efforts to inquire into his personal affairs. He regarded journalists and would-be biographers, as well as his neighbors in Busseto and the operatic public at large, as an intrusive lot, against whose prying attentions he needed constantly to defend himself." The writer Friedrich Schiller (four of whose plays were adapted as operas by Verdi) distinguished two types of artist in his 1795 essay [On Naïve and Sentimental Poetry](#). The philosopher [Isaiah Berlin](#) ranked Verdi in the 'naïve' category – "They are not...self-conscious. They do not...stand aside to contemplate their creations and express their own feelings....They are able...if they have genius, to embody their vision fully." (The 'sentimentals' seek to recreate nature and natural feelings on their own terms – Berlin instances Wagner – "offering not peace, but a sword."). Verdi's operas are not written according to an aesthetic theory, or with a purpose to change the tastes of their audiences. In conversation with a German visitor in 1887 he is recorded as saying that, whilst "there was much to be admired in [Wagner's operas] [Tannhäuser](#) and [Lohengrin](#)...in his recent operas [Wagner] seemed to be overstepping the bounds of what can be expressed in music. For him "philosophical" music was incomprehensible." Although Verdi's works belong, as Rosselli admits "to the most artificial of genres...[they] ring emotionally true: truth and directness make them exciting, often hugely so." That is not to say his operas did not come as great innovations. What sounds to a modern listener as derivative of the bel canto, his first major success, [Nabucco](#), came as a something entirely new. Never before had opera been so harmonically complex and direct. No longer was there the empty vocal display of the [bel canto](#) period composers. Granted, there is a significant amount of vocal fireworks, but they exist for the purpose of drama, not to show off singers. Aside from this, his use of the chorus was entirely new. Before *Nabucco*, an opera's chorus was limited to be only a background voice, another instrument. In *Nabucco*, this is abolished; he uses the chorus as character, to show the suffering and consensus of the people. The famous "Va, pensiero" is an example of this. The first of his "big three" operas, [Rigoletto](#), followed by [La Traviata](#), and ending with [Il Trovatore](#), also was revolutionary. In a letter to *Rigoletto*'s librettist, [Francesco Maria Piave](#), he says, "I conceived [Rigoletto](#) almost without arias, without finales but only an unending string of duets." And that it is. *Rigoletto* is one of, if not the earliest operas to abandon the

traditional distinction between the sung aria, and the more speech-like recitative. After these three operas, his works took an increasing amount of time to finish, were significantly longer, and more masterfully orchestrated. His last three works: the Requiem, Otello and Falstaff, are perceived more mature, more Wagner-like, more profound.

Verdi's operas are frequently staged around the world. The [Operabase](#) listings for 2013–2014 show *La traviata* as the most performed opera during this period (659 performances). Other Verdi operas in the top 20 are *Rigoletto* (8th place, 445 performances), *Aida* (12th place, 304 performances), *Nabucco* (16th place, 304 performances) and *Il trovatore* (18th place, 232 performances). All of his operas are available in recordings in a number of versions, and on DVD – [Naxos Records](#) offers a complete boxed set. Modern productions may differ substantially from those originally envisaged by the composer. [Jonathan Miller](#)'s 1982 version of *Rigoletto* for [English National Opera](#), set in the world of modern American [mafiosi](#), received critical plaudits. But the same company's staging in 2002 of *Un ballo in maschera* as *A Masked Ball*, directed by [Calixto Bieito](#), including "satanic sex rituals, homosexual rape, [and] a demonic dwarf", got a general critical thumbs down. Meanwhile, the music of Verdi can still evoke a range of cultural and political resonances. Excerpts from the Requiem were featured at the memorial service for [Diana, Princess of Wales](#) in 1997. On 12 March 2011 during a performance of *Nabucco* at the [Opera di Roma](#) celebrating 150 years of Italian unification, the conductor [Riccardo Muti](#) paused after "Va pensiero" and turned to address the audience (which included the then Italian Prime Minister, [Silvio Berlusconi](#)) to complain about cuts in state funding of culture; the audience then joined in a repeat of the chorus. In 2014, the pop singer [Katy Perry](#) appeared at the [Grammy Award](#) wearing a dress designed by [Valentino](#), embroidered with the music of "Dell'invito trascorsa e già l'ora" from the start of *La traviata*. The bicentenary of Verdi's birth in 2013 was celebrated in numerous events around the world, both in performances and broadcasts.

In the [Cambridge Verdi Encyclopedia](#): Verdi's enduring presence on the opera stages of the world and as a subject for scholarly study by researchers in various disciplines has placed him as a central figure within modern culture. The composer's undisputed popularity from the mid-nineteenth century to the present day, among enthusiasts and scholars alike, lies at the heart of The Cambridge Verdi Encyclopedia. This comprehensive resource covers all aspects of Verdi's music and his world, including the people he knew and worked with, his compositions, and their reception. Extensive appendices list all of Verdi's known works, both published and unpublished, and the characters in his operas. As a starting point for information on specific works, people, places, and concepts, the Encyclopedia reflects the very latest scholarship, presented by an international array of experts in a manner that will have a broad appeal for opera lovers, students, and scholars: Contains close to 1,000 entries on Verdi and his music, including the people, places, concepts and practices associated with him. Includes entries by major international authorities from a variety of disciplines, presenting the most up-to-date scholarship. Three appendices offer supplementary information on Verdi's works and a basic chronology of his life.

[RENOIR](#) – BIOGRAPHIES BY NANCY NANHEAD, FRANCOIS FOSCA, SOPHIE MOUNERET, BY HIS SON JEAN RENOIR – PIERRE AUGUSTE RENOIR, MON PERE

I like very much arts, and especially paintings. Unfortunately, the paintings of the great painters, and especially the Impressionists, whom I like most, are very rare in Israel, and that

is why I seize the opportunity every time that I travel abroad to see those paintings at dozens of museums which I visit time and again – the Impressionists mainly in Paris and Provence, the Renaissance painters mainly in Italy, the English painters mainly in London, the Dutch painters mainly in the Netherlands, all the Great Painters as well as other works of art at the museums in New York, Boston, Los Angeles, San Francisco, Chicago, and in Berlin, Madrid, Barcelona, Copenhagen, Stockholm, Oslo, Brussels, Frankfurt, Switzerland, Greece, Lisbon, Sidney, San Petersburg, etc. Sometimes I visit museums on the Internet, I see fiction films and documentary films on the lives of painters and sculptors, and I have read at least a hundred art books with reproductions and biographies of the great painters. I'll give here a list of some of the art books that I have in my library and that I have read most of them a few times. Sometimes, when I feel "blue", I take an art book and after an hour or so I am so absorbed by the paintings that I forget all the problems, this is also a kind of therapy, sometimes even more effective than bibliotherapy. I don't want to leave the impression that I read art books, novels, plays or biographies only as a kind of therapy, this is maybe a side effect, but as most of the time I don't need a therapy, all my intellectual activities are for sheer pleasure without any afterthought, and this includes watching movies, going to the theater, concerts, operas, lectures, museums, or just visiting nice cities and sites.

Books in English, French, Hebrew, and other languages on Bonard, Bosch, Botticelli, Bruegel, Caillebotte, Mary Cassatt, Cezanne x2, Chagall x2, Corot, Cranach, Dali, Degas, Derain x2, Ernst, Gauguin, Goya, El Greco, Ori Hofmekler, Hopper, Frida Kahlo, Klimt, Magritte, Manet x2, Matisse x2, Modigliani x2, Monet x3, Munch x2, Oudot, Picasso, Pissarro, Redon, Seurat, Rembrandt, Renoir x5, Douanier Rousseau, Sisley, Stematsky, Toulouse-Lautrec, Turner, Suzanne Valadon, Van Gogh x3, Vermeer, Les grands peintres modernes, Modern Primitives, The Great Collectors, A History of Italian Renaissance by Hartt, Haomanut/Art, Gothic Art, Indian Art, Ancient Egypt Art, 100 Masterpieces of Art, Romanticism, The Impressionism x4, The Pre-Raphaelites, Symbolists and Decadents, The American Scene – Early 20th century, Audubon Homer Whistler and the 19th century America, Metropolitan Children, L'art contemporain, Contemporary Art, Musee de l'Orangerie, Art at the turn of the Millennium, Art Links, The Illustrated Encyclopedia of Western Art, Arts and the Artists, History of Modern Art..

Renoir is my favorite painter, he moves me profoundly, especially his portraits, I can see his paintings dozens of times and still find them interesting. I believe that he excelled most in painting men, women, especially children and young women. He may be sugary, but portraits should not show exactly the person as a photo, they must disclose their personalities, and for that no painters can compare to Renoir. He does not have the "shticks" of Chagall with flying bodies, or Modigliani with long necks, I really don't care if the Mona Lisa is smiling or not, I just think that the portrait is boring and I prefer by far the portrait of a young woman by Renoir. Most of all I prefer the following paintings: Bal du Moulin de la Galette, The Theater Box, La balançoire, Two sisters, Girls at the piano, La grenouillère, Portrait of Claude Monet, portraits of young girls, A girl with a watering can, Mme. Charpentier and her children – I think that it is the most beautiful painting that I have ever seen and every time that I visit the Metropolitan Museum I watch this picture for at least ten minutes, By the water, Luncheon of the boating party, Dance at Bougival, Dance in the country, Girl brooding her hair, Julie Manet, self portraits, Nudes, the Large Bathers, Nude in the sun, After the bath, Bathers, Gabrielle Renard and infant, Portrait of Ambroise Vollard, Portrait of Paul Durand-Ruel, [paintings at l'Orangerie](#), [at musee d'Orsay](#)...

Pierre-Auguste Renoir, commonly known as **Auguste Renoir** (25 February 1841 – 3 December 1919), was a French artist who was a leading painter in the development of the [Impressionist](#) style. As a celebrator of beauty, and especially feminine sensuality, it has been said that "Renoir is the final representative of a tradition which runs directly from [Rubens](#) to [Watteau](#)." He was the father of actor [Pierre Renoir](#) (1885–1952), filmmaker [Jean Renoir](#) (1894–1979) and ceramic artist Claude Renoir (1901–69). He was the grandfather of the filmmaker [Claude Renoir](#) (1913–1993), son of Pierre. After a series of rejections by the Salon juries, Renoir joined forces with Monet, Sisley, [Pissarro](#), and several other artists to mount the first Impressionist exhibition in April 1874, in which Renoir displayed six paintings. Although the critical response to the exhibition was largely unfavorable, Renoir's work was comparatively well received. That same year, two of his works were shown with [Durand-Ruel](#) in London. Hoping to secure a livelihood by attracting portrait commissions, Renoir displayed mostly portraits at the second Impressionist exhibition in 1876. He contributed a more diverse range of paintings the next year when the group presented its third exhibition; they included *Dance at Le Moulin de la Galette* and *The Swing*. [Renoir](#) did not exhibit in the fourth or fifth Impressionist exhibitions, and instead resumed submitting his works to the Salon. By the end of the 1870s, particularly after the success of his painting *Mme Charpentier and her Children* (1878) at the Salon of 1879, Renoir was a successful and fashionable painter.

In 1881, he traveled to [Algeria](#), a country he associated with [Eugène Delacroix](#),^[10] then to [Madrid](#), to see the work of [Diego Velázquez](#). Following that, he traveled to Italy to see [Titian](#)'s masterpieces in [Florence](#) and the paintings of [Raphael](#) in Rome. On 15 January 1882 Renoir met the composer [Richard Wagner](#) at his home in [Palermo](#), Sicily. Renoir painted Wagner's portrait in just thirty-five minutes. In the same year, after contracting pneumonia which permanently damaged his respiratory system, Renoir convalesced for six weeks in Algeria. In 1883, Renoir spent the summer in [Guernsey](#), one of the [islands](#) in the [English Channel](#) with a varied landscape of beaches, cliffs and bays, where he created fifteen paintings in little over a month. Most of these feature *Moulin Huet*, a bay in [Saint Martin's, Guernsey](#). These paintings were the subject of a set of commemorative postage stamps issued by the Bailiwick of Guernsey in 1983. While living and working in Montmartre, Renoir employed [Suzanne Valadon](#) as a model, who posed for him (*The Large Bathers*, 1884–87; *Dance at Bougival*, 1883) and many of his fellow painters; during that time she studied their techniques and eventually became one of the leading painters of the day. In 1887, the year when [Queen Victoria](#) celebrated her [Golden Jubilee](#), and upon the request of the queen's associate, Phillip Richbourg, Renoir donated several paintings to the "French Impressionist Paintings" catalog as a token of his loyalty.

In 1890, he married Aline Victorine Charigot, who, along with a number of the artist's friends, had already served as a model for *Le Déjeuner des canotiers* ([Luncheon of the Boating Party](#)) 1881, and with whom he had already had a child, Pierre, in 1885. After his marriage, Renoir painted many scenes of his wife and daily family life including their children and their nurse, Aline's cousin [Gabrielle Renard](#). The Renoirs had three sons: [Jean Renoir](#), who became a filmmaker of note, [Pierre Renoir](#), who became a stage and film actor, and Claude Renoir, who became a ceramic artist. In the late 1860s, through the practice of painting light and water [en plein air](#) (outdoors), he and his friend [Claude Monet](#) discovered that the color of shadows is not brown or black, but the reflected color of the objects surrounding them, an effect known today as [diffuse reflection](#). Several pairs of paintings exist in which Renoir and Monet worked side-by-side, depicting the same scenes (*La Grenouillère*, 1869). One of the best known Impressionist works is Renoir's 1876 *Dance at Le Moulin de la Galette* ([Bal du moulin de la Galette](#)). The painting depicts an open-air scene, crowded with people at a popular dance

garden on the *Butte Montmartre* close to where he lived. The works of his early maturity were typically Impressionist snapshots of real life, full of sparkling color and light. By the mid-1880s, however, he had broken with the movement to apply a more disciplined formal technique to portraits and figure paintings, particularly of women. It was a trip to Italy in 1881, when he saw works by [Raphael](#) and other [Renaissance](#) masters, that convinced him that he was on the wrong path, and for the next several years he painted in a more severe style in an attempt to return to classicism. Concentrating on his drawing and emphasizing the outlines of figures, he painted works such as *The Large Bathers* (1884–87; [Philadelphia Museum of Art](#)) during what is sometimes called his "[Ingres](#) period". After 1890 he changed direction again. To dissolve outlines, as in his earlier work, he returned to thinly brushed color. From this period onward he concentrated on monumental nudes and domestic scenes, fine examples of which are [Girls at the Piano](#), 1892, and *Grandes Baigneuses*, 1887. The latter painting is the most typical and successful of Renoir's late, abundantly fleshed nudes. A prolific artist, he created several thousand paintings. The warm sensuality of Renoir's style made his paintings some of the most well-known and frequently reproduced works in the history of art. The single largest collection of his works—181 paintings in all—is at the [Barnes Foundation](#), in [Philadelphia](#).

We bring here the Introduction by Robert L. Herbert to the translation of Renoir, my father, a biography by Renoir's son Jean Renoir.

INTRODUCTION

IN THE spring of 1953, from his home in Hollywood, Jean Renoir wrote to the publisher Bennett Cerf:

I would like to attempt to give form to my own recollections of the conversations I had with my father mostly at the end of his life. I won't quote the exact dialogue which I don't remember, but try to give an idea of my past impressions of such meetings and of the way they influence me today. These conversations were about anything: his past experiences, his childhood, our family, his friends, his admirations, and also very much about his suspicions regarding the fast changes in our modern world.

The famous filmmaker was then fifty-nine, and would be sixtyeight when the book was published at the end of 1962. When he and his father began their lengthy conversations in 1915, during Jean's long convalescences from successive wartime injuries, Jean was twenty-one, and Auguste seventy-four. The book is therefore the son's nostalgic reminiscences of his father's old age, when he himself was growing old. Their two old ages are movingly brought together in an effervescent blend of nostalgia for an earlier era. Probably to give a more lifelike tone to his recollections, Jean put his father's words in quotation marks despite telling Cerf that he would not do so. He had no written records of his conversations of 1915–1919, so he drew upon memory and upon interviews with many who knew the painter, chiefly Gabrielle Renard Slade (1879–1959), who had been his childhood nurse and one of the painter's favorite models and who was now living nearby in

Hollywood. He used a tape recorder and, presumably, written notes, as the two “played the little game of taking a trip back into the past.” Gabrielle was his principal source for the period before his birth and his early years: “I hardly know which are my recollections and which are hers.” Jean also asked friends and researchers to provide him with lengthy excerpts from early writings about Renoir, and the first half of the book consists mostly of a blend of these with available biographies and histories. In addition, he used extensive writings by his father (these have only recently been published); he quoted three pages of aphorisms from them and elsewhere paraphrased them by putting their thoughts into reconstructed conversations.

Renoir, My Father has the rollicking and sometimes earthy tone of Jean’s postwar films, like *French Cancan* (1955) or *The Little Theater of Jean Renoir* (1969), rather than the critical edges of his greatest films, such as *Grand Illusion* and *The Rules of the Game* (both from the later 1930s). But when the roughly chronological account reaches World War I, the book takes on a greater immediacy, perhaps because Jean’s wounded leg gave him more sympathy for his father’s condition. One can never again look indifferently at Renoir’s later portraits and paintings of nudes after reading Jean’s recollections of his father’s disastrous arthritis. Despite his infirmity, Renoir would only rarely pause from painting and then—this is the filmmaker writing—

Darkness would invade the studio in the Boulevard Rochechouart, helping him to drift back into the past. I would take advantage of the interval to lift him up and hold him firmly while Grand’ Louise refilled his rubber cushion with air. Then, with the utmost care, we would lower him into his chair and settle him in the best position. ‘What nasty material rubber is! Give me a cigarette, will you?’ He drew a few puffs, than let it go out.

Equally moving is Jean’s account of his father’s earlier attempts to ward off the arthritis that eventually crippled his hands by juggling with a *bilboquet* (the cup-and-ball game), and, when that was no longer possible, with a smooth wooden stick. Jean does not offer many details of his father’s craft but occasionally gives vivid descriptions of the painter at work, bobbing back and forth from his wheelchair to the canvas with rapid, stiffened gestures, the brush strapped to his wrist. His aged father, he writes, harassed the subject ceaselessly as a lover harasses the girl who puts up a struggle before yielding. He seemed also to be engaged on a hunt. The anxious rapidity of his brushstrokes, which were urgent, precise, flashing extensions of his piercing vision, made me think of the zig-zag flight of a swallow catching insects. I purposely borrow a comparison from ornithology. Renoir’s brush was linked to his visual perception as directly as the swallow’s beak is linked to its eyes.

Jean also gives firsthand accounts of some subjects of Renoir's portraits, most notably of the dealer Ambroise Vollard. We learn that Renoir chose the toreador's costume in which he pictured Vollard in 1917 in order to suit what he saw as the swarthy man's exoticism.

"He was Othello before," he has his father say; "as he grew older, he became Massinissa, King of Numidia."

The particular charm of *Renoir, My Father* lies in Jean's unselfconscious sliding back and forth between himself and his father.

He writes that his father "would have been delighted to know that the atom could be split," and then that the painter "imagined that the microbes of a bad cold, for instance, regarded their own solar system, the inside of his nose, as the center of the world." This seems more likely to be Jean imagining what his father could have said than anything he actually did say. If we needed further proof of this merging of two personalities, we would find it in the lists Jean provides of his father's likes and dislikes, hardly to be distinguished from his own. Auguste liked "Burgundian or Mediterranean roof tiles covered with moss; the skin of a healthy woman or child; brown bread; meat grilled over wood or charcoal fires; . . . workingmen's blue jeans after they have been washed and mended a number of times."

Among Auguste's views of life that Jean shared is the dislike of "the fast changes in our modern world" which he mentioned in his letter to Cerf. For both men, materialism, machinery, and mass production stifle the individual and degrade nature and artistic quality; it is the "leprosy of modern industry" that Jean writes about when revisiting his father's sites in Chatou. Nearly every modern encounter in the book with his father's painted places and his family's former residences makes him lament their former state. In Provence nowadays, "the little farmhouses, with Mediterranean tile roofs, have been replaced by apartment buildings of reinforced concrete, and the old mill in the valley has become a night club." In Montmartre, Jean deplores the loss of a garden plot near his father's old studio, replaced by an eight-story building. In his letter to Cerf, Jean said that he would try "to give an idea of my past impressions" of the meetings with his father, "and of the way they influence me today." *French Cancan*, released two years after he began the book, shows that influence because it is a wistful return to the Montmartre of his extreme youth (he was born in 1894) where memory merged with Renoir's paintings. In Hollywood, where he lived after 1940, his wife Dido's garden made him think of "Paradou," the southern garden in Zola's novel *La Faute de l'Abbé Mouret*. He surrounded himself with furniture and objects from his father's household, "magic carpets which take me back to the years I am trying to evoke." He used his magic carpets to give delightful accounts of Belle Epoque persons like the actress Jeanne Samary, whom Renoir painted long before Jean was born.

Inserting dialogue as though he and the reader were present, Jean seems to have scripted his book as if it were a film. He recalls living after his father's death on the rue Frochot in a building which legend says was built by the elder Dumas, and that reminds him to insert his father's thoughts about Dumas. From the same apartment on the rue Frochot he could see the building where Jeanne Samary lived. He imagines her leaning out the window, or doing her morning marketing on the rue Lepic. "She must have carefully felt the melons to see if they were ripe, and looked with a critical eye at the whiting to make sure it was fresh."

It would be foolish to object to these cinematic flashbacks, because the appeal and the value of Jean Renoir's book is in his imaginative reconstruction of the time and the personages of his father's paintings. We do not object to the same kind of reconstructed past in *The Horse of Pride*, the memorable account of Brittany in which Pierre-Jakez Hélias draws on interviews with his father and grandfather to form an equally nostalgic evocation of an era before his own birth. Both books belong on the shelves of those who wish to understand French culture of a bygone era. *Renoir My Father* is that rarest of documents, a book that brings great pleasure while it reveals the thoughts of two great artists.

—ROBERT L. HERBERT

DISRAELI – BIOGRAPHY BY ANDRE MAUROIS

In my youth I admired Benjamin Disraeli, and I read with great interest his biography by Andre Maurois. Disraeli was the first Jew to become prime minister of a leading European power – UK at its apotheosis, he was also a novelist, an intellectual, a friend of Queen Victoria, and most of all because he arranged for the British to purchase a major interest in 1875 in the Suez Canal Company in Ottoman-controlled Egypt. Without Disraeli Egypt would not have been occupied de facto by the British from 1882 until 1956, and the Jews could not have lived safely in Egypt. In spite of the fairy tales that I hear now and then from Jewish Egyptians that long for the "good" life with the Egyptians and the harmony between both people, the reality is that the Jews were not slaughtered and persecuted by the Egyptians only because Egypt was a de-facto British protectorate, which made possible the safety of the Jews and all the hundreds of thousands Europeans as well. When the British left Egypt in 1956 within a few years Egypt became "Judenrein/Europaerein", and all the Europeans and Jews had to leave Egypt penniless. The reader should not construe this statement as favoring colonialism in any way. I am against colonialism, as Israel has suffered from British colonialism maybe even more than Egypt, the British have prohibited immigration of Jews from Germany and Europe prior to World War II and even after that, they have helped the Jordanians and the Arabs in the Israeli war of independence, arrested and executed many Jews... But I just state the fact that the British were instrumental in keeping the safety of the Europeans in Egypt, furthermore they saved Egypt and the whole Middle East from the abominable German Nazi regime, that would have exterminated all the Jews of the Middle East as they did in Europe, and subjugated also the Arabs as they did with all their collaborators, from Petain to Quisling, from the Romanians to the Italians. The Egyptians, eager to get rid from the colonialists, got rid of all the Europeans and of all European

influence, and their economic situation is today much worse than what it was before the revolution of 1952, while the extremely wise Lee Kuan Yew in Singapore kept the European influence, brought in European and American companies, kept the English language, and won it all – full independence, prosperity, moving from Third World to First, and keeping a much better democracy than the Egyptian democracy from the era of Nasser to Mubarak. Age has made me more realistic, if I was in the past socialist and then capitalist, colonialist and anti-colonialist, I judge the situation realistically, trying to adopt the best facets of a humane capitalism regime, independent country but open to European influence, Israeli patriot but also cosmopolitan. And after all, this was also the policy of Disraeli, who was a realistic and very wise statesman.

Benjamin Disraeli, in full Benjamin Disraeli, earl of Beaconsfield, Viscount Hughenden of Hughenden, byname Dizzy (born December 21, 1804, [London, England](#)—died April 19, 1881, London), British [statesman](#) and novelist who was twice prime minister (1868, 1874–80) and who provided the [Conservative Party](#) with a twofold [policy](#) of Tory democracy and [imperialism](#). Disraeli was of Italian-Jewish descent, the eldest son and second child of Isaac D'Israeli and Maria Basevi. The most important event in Disraeli's boyhood was his father's quarrel in 1813 with the synagogue of Bevis Marks, which led to the decision in 1817 to have his children baptized as Christians. Until 1858, Jews by religion were excluded from Parliament; except for the father's decision, Disraeli's political career could never have taken the form it did. Disraeli was educated at small private schools. At the age of 17 he was articled to a firm of solicitors, but he longed to become notable in a more sensational manner. His first efforts were disastrous. In 1824 he speculated recklessly in South American mining shares, and, when he lost all a year later, he was left so badly in debt that he did not recover until well past middle age. Earlier he had persuaded the publisher John Murray, his father's friend, to launch a daily newspaper, the *Representative*. It was a complete failure. Disraeli, unable to pay his promised share of the capital, quarreled with Murray and others. Moreover, in his novel [Vivian Grey](#) (1826–27), published anonymously, he lampooned Murray while telling the story of the failure. Disraeli was unmasked as the author, and he was widely criticized.

Disraeli suffered what would later be called a nervous breakdown and did little during the next four years. He wrote another extravagant novel, *The Young Duke* (1831), and in 1830 began 16 months of travel in the Mediterranean countries and the [Middle East](#). These travels not only furnished him with material for Oriental descriptions he used in later novels but also influenced his attitude in foreign relations with India, Egypt, and Turkey in the 1870s. Back in England, he was active in London social and literary life, where his dandified dress, conceit and affectation, and exotic good looks made him a striking if not always popular figure. He was invited to fashionable parties and met most of the celebrities of the day. His novel [Contarini Fleming](#) (1832) has considerable autobiographical interest, like many of his novels, as well as echoes of his political thought. By 1831 Disraeli had decided to enter politics and sought a seat in [Buckinghamshire](#), near Wycombe, where his family had settled. As an independent radical, he stood for and lost [High Wycombe](#) twice in 1832 and once in 1835. Realizing that he must attach himself to one of the political parties, he made a somewhat eccentric interpretation of [Toryism](#), which some features of his radicalism fitted. In 1835 he unsuccessfully stood for Taunton as the official Conservative candidate. His extravagant behaviour, great debts, and open liaison with Henrietta, wife of Sir Francis Sykes (the prototype of the heroine in his novel *Henrietta Temple* [1837]), all gave him a dubious reputation. In 1837, however, he successfully stood for Maidstone in Kent as the Conservative candidate. His maiden speech in the [House of Commons](#) was a failure. Elaborate metaphors,

affected mannerisms, and foppish dress led to his being shouted down. But he was not silenced. He concluded, defiantly and prophetically, “I will sit down now, but the time will come when you will hear me.”

Before long, Disraeli became a speaker who commanded attention. He established his social position by marrying in 1839 Mrs. Wyndham Lewis, a widow with a life interest in a London house and £4,000 a year. She was deeply devoted to Disraeli, and, when he teased her in company that he had married for her worldly goods, she would say, “Dizzy married me for my money but if he had the chance again he would marry me for love.” Her husband agreed. The Conservative leader, [Sir Robert Peel](#), encouraged Disraeli, but, when in 1841 the Conservatives won the election and Peel became prime minister, Disraeli was not given [office](#) in the cabinet. He was mortified at the rebuff, and his attitude toward Peel and his brand of Conservatism became increasingly critical. A group of young Tories, nicknamed [Young England](#), and led by George Smythe (later Lord Stangford), looked to Disraeli for inspiration, and he obliged them, notably in his novel [Coningsby; or, The New Generation](#) (1844), in which the hero is patterned on Smythe, and the cool, pragmatic, humdrum, middle-class Conservatism that Peel represented is contrasted to [Young England's](#) romantic, aristocratic, nostalgic, and escapist attitude. In 1845, when the combination of the Irish famine and the arguments of [Richard Cobden](#) convinced Peel to repeal the protective duties on foreign imported grain known as the Corn Laws, Disraeli found his issue. Young England could rally against Peel not only their own members but the great mass of the country squires who formed the backbone of the [Conservative Party](#). As lieutenant to [Lord George Bentinck](#), the nominal leader of the rebels, Disraeli consolidated the opposition to Peel in a series of brilliant speeches. His invective greatly embittered the battle and created lasting resentment among Peel's followers. While Disraeli and his fellow protectionists could not stop the repeal of the [Corn Laws](#) because the Whigs also backed the bill, the rebels put Peel in the minority on another issue and forced him to resign in 1846.

The loyalty of most of the Conservative former ministers to Peel and the death of Bentinck made Disraeli indisputably the leader of the opposition in the Commons. Disraeli spent the next few years trying to extricate his party from what he had come to recognize as the “hopeless cause” of protection. While Disraeli's policy was sensible, it raised mistrust among his followers, as did his pride in and insistence upon his Jewish ancestry. The party could not, however, do without his talents. His election to Parliament as member for Buckinghamshire in 1847 and his purchase of Hughenden Manor, near High Wycombe, in 1848 fortified his social and political power. His finances, however, remained shaky. When the Whig government fell in 1852 and the [earl of Derby](#), leader of the Conservative Party, formed a short-lived minority government, Disraeli was chancellor of the Exchequer despite his protest that he knew nothing of finance. His budget in fact brought the government down in 1852, though Disraeli could hardly be blamed. The free-trade majority in the Commons was determined to defeat measures that relieved agriculture, even though the method chosen did not involve protection, yet Disraeli had to bring forward some such proposals to placate his followers. Again, until 1858, the Tories were in opposition. Then Derby again formed a minority government with Disraeli as chancellor of the Exchequer. Disraeli for some time had felt there was no reason to allow parliamentary [reform](#) to be a Whig monopoly, and so he introduced a moderate reform bill in 1859. The bill, however, seemed too obviously designed to help his party, and so it was defeated; the Tories again were out of office and remained so for six years. (You need a very strong character to overcome so many failures, but Disraeli knew how to recover from the lowest abysses and climb to the highest peaks.)

In 1865 when the Whig-Liberal leader [Lord Russell](#) brought forward a moderate reform bill, a combination of Tory opposition and a revolt against Russell toppled his government. Derby formed his third minority government with Disraeli as chancellor of the Exchequer. Although the initiative for a new Conservative [reform bill](#) came from [Queen Victoria](#) and Lord Derby, Disraeli introduced it in the Commons and conducted the fight for it with unsurpassed enthusiasm and mastery of parliamentary tactics. He believed the bill should be a sweeping one with certain safeguards, and he was determined that it should be carried by a Conservative government. The [Liberals](#), however, had a majority, and he had to accept their amendments, which removed nearly all the safeguards. The bill that passed doubled the existing electorate and was more democratic than most Conservatives had foreseen. Derby called it “a leap in the dark,” but Disraeli could fairly claim that the bill had gone far toward “realizing the dream of my life and re-establishing Toryism as a national foundation.” In 1868 when Derby retired from politics, Disraeli became prime minister. “Yes,” he said in reply to a friend’s congratulations, “I have climbed to the top of a greasy pole.” The government was only a caretaker one, for the general election awaited only the completion of a new electoral register, and later in 1868 the Liberals won. Disraeli set a precedent by resigning before Parliament met. In the following 12-year period, politics changed from the chaotic collection of ill-defined, shifting groups that had been common from the beginning of Disraeli’s career. Now the old politics defined by personalities shifted to an emergence of two parties with coherent policies. The party leaders, Disraeli and [William E. Gladstone](#), were implacable enemies, and they polarized the parties.

At first Disraeli played a comparatively peaceful role. He tried to create a new image for the Conservative Party that he hoped would persuade the new electorate. His seeming apathy disturbed his followers, and his novel [Lothair](#) (3 vol., 1870), a political comedy, seemed to some of them undignified. From 1872, however, Disraeli ran the party with a firm hand. He sharply differentiated Conservative from Liberal policy on several issues: he defended the monarchy, the [House of Lords](#), and the church against what he took to be the threat of radical Liberal policy; he put forth a policy to consolidate the empire, with special emphasis on India; he dwelt on social reform; he enunciated a strong [foreign policy](#), especially against [Russia](#). In 1872 Disraeli’s wife died of cancer after many months of illness. Her death brought material losses: her house in London and her fortune passed to cousins. At age 68 his health was not good, but he turned implacably to political battle. He began a romantic friendship with two sisters, Lady Bradford and Lady Chesterfield, with whom he corresponded on politics and his personal feelings until his death. His political fortunes turned when Gladstone’s ministry was defeated in 1873. When Gladstone resigned, Disraeli refused to take office, pleading there was too much uncompleted business to dissolve Parliament, and that a minority government could only damage his party’s prospects. Gladstone reluctantly returned to office, but within a year he dissolved the Parliament himself. Disraeli had been at [work](#) on party organization and electoral machinery, and the Conservatives won a resounding victory in 1874.

Disraeli gained power too late. He aged rapidly during his second ministry. But he formed a strong cabinet and profited from the friendship of the queen, a political conservative who disliked Gladstone. Disraeli treated her as a human being, whereas Gladstone treated her as a political institution. In regard to social reform, Disraeli was able at last to show that Tory democracy was more than a slogan. The [Artizans’ and Labourers’ Dwellings Improvement Act](#) made effective slum clearance possible. The [Public Health Act](#) of 1875 codified the complicated law on that subject. Equally important were an enlightened series of factory acts (1874, 1878) preventing the exploitation of labour and two trades union acts that clarified the legal position of those bodies. Disraeli’s imperial and foreign policies were even more in the

public eye. His first great success was the acquisition of Suez Canal shares. The extravagant and spendthrift khedive [Ismā'il Pasha](#) of Egypt owned slightly less than half the [Suez Canal Company](#)'s shares and was anxious to sell. An English journalist discovered this fact and told the Foreign Office. Disraeli overrode its recommendation against the purchase and bought the shares using funds provided by the Rothschild family until Parliament could confirm the bargain. The deal was seen as a notable triumph for imperial prestige. Early in 1876 Disraeli brought in a bill conferring on Queen Victoria the title empress of [India](#). There was much opposition, and Disraeli would have gladly postponed it, but the queen insisted. For some time his poor health had made leading the Commons onerous, so he accepted a [peerage](#), taking the titles earl of Beaconsfield and Viscount Hughenden of Hughenden, and became leader in the House of Lords.

Foreign policy largely occupied him until 1878. The [Russian-Turkish conflict](#) had lain dormant since the Crimean War in the 1850s, but Christian subjects of the Ottoman Empire revolted against intolerable misrule. Russia declared war on Turkey in 1877 and reached the gates of Constantinople early in 1878. Britain feared for the safety of the route to India, but Disraeli correctly judged that a show of force would be enough to bring the exhausted Russian forces to terms. The highly Pan-Slavist [Treaty of Stefano](#) forced on Turkey by Russia had to be submitted to a European [Congress at Berlin](#) in 1878. Beaconsfield attended and won all concessions he wanted. He returned to London in triumph, declaring that he had brought back "peace with honour." At this climax of his career, the queen offered him a dukedom, which he refused, and the Order of the Garter, which he accepted. Thereafter his fortunes waned with disaster in [Afghanistan](#), forces slaughtered in South Africa, agricultural distress, and an industrial slump. The Conservatives were heavily defeated in the general election of 1880. Beaconsfield kept his party leadership and finished [Endymion](#) (3 vol., 1880), a mellow, nostalgic political novel viewing his early career. His health failed rapidly, and, a few days after his burial in the family vault at Hughenden, Queen Victoria came to lay a wreath upon the tomb of her favourite prime minister. COCO CHANEL – BIOGRAPHY BY PATRICIA SOLIMAN: COCO, THE NOVEL

As a feminist I have to admire Coco Chanel who did for women much more than [Simone de Beauvoir](#) and the [Suffragettes](#) combined. But I have many reservations about her as a person, that are obvious when you read her biography or encyclopedias. Coco liberated women from the rigors of an uncomfortable fashion, it was much easier for women to work with her dresses, and women could wear fashionable dresses at a reasonable cost. In the past women who wanted to dress in comfortable clothes had to be dressed as men, like George Sand did, and of course were perceived by society as weirds. But Coco Chanel took male clothes and redesigned them as women clothes, for respectable, society women. Yet, she was anti-Semitic, collaborated with the Germans during the Occupation, but also independent and very talented. I have seen a few films about her life and loves, but neither the films nor the biography are really good enough to tell the story of this extraordinary woman. For me it is not so interesting to know who were her lovers, but much more to understand her psychology, learn what was the social and economical impact of her designs, and how she made an impact on the history of the 20th century. In the Time's list of the 25 most powerful women of the 20th century, Coco Chanel appears with Corazon Aquino, Hillary Clinton, Marie Curie, Indira

Gandhi, Estee Lauder, Madonna, Golda Meir, Angela Merkel, Aretha Franklin, Margaret Mead, Rosa Parks, Eleanor Roosevelt, Mother Teresa, Margaret Thatcher, Oprah Winfrey, Virginia Woolf – quite an impressive list of politicians, business women, singers, authors, humanists, scientists, with positive and negative characters.

Coco Chanel appears in the list of women who changed the world of [Biography On Line](#): **Coco Chanel** (1883-1971) – French fashion designer. One of the most innovative fashion designers, Coco Chanel was instrumental in defining feminine style and dress during the 20th Century. Her ideas were revolutionary; in particular she often took traditionally male clothes and redesigned them for the benefit of women. The list of the women who changed the world comprise also: Sappho, Cleopatra, Mary Magdalene, Boudicca, Hildegard of Bingen, Eleanor of Aquitaine, Joan of Arc, Mirabai, St Teresa of Avila, Catherine de Medici, Elizabeth I, Catherine the Great, Mary Wollstonecraft, Jane Austen, Margaret Fuller, Harriet Beecher Stowe, Elizabeth Cady Stanton, Queen Victoria, Florence Nightingale, Susan B. Anthony, Elizabeth Blackwell, Emily Dickinson, Milicent Fawcett, Emmeline Pankhurst, Marie Curie, Emily Murphy, Rosa Luxemburg, Helena Rubinstein, Helen Keller, Coco Chanel, Eleanor Roosevelt, Annie Besant, Katharine Hepburn, Simone de Beauvoir, Mother Theresa, Dorothy Hodgkin, Rosa Parks, Queen Elizabeth II, Billie Holiday, Indira Gandhi, Eva Peron, Betty Friedan, Margaret Thatcher, Marilyn Monroe, Anne Frank, Audrey Hepburn, Germaine Greer, Wangari Maathai, Betty Williams, Billie Jean King, Shirin Ebadi, Benazir Bhutto, Oprah Winfrey, Madonna, Diana Princess of Wales, J. K. Rowling, Tegla Loroupe, Malala Yousafzai. Chanel is the only fashion designer listed on [Time](#) magazine's [list of the 100 most influential people of the 20th century](#).

We bring here three reviews on the biography of Coco Chanel, not all of them laudatory:

From Publishers Weekly

Nicely researched but ploddingly told, this novelized biography of the legendary couturiere and style setter aims no higher than commercial fare. First novelist Soliman analyzes her protagonist's fiercely ambitious personality in terms of chronic insecurity: the illegitimate daughter of a decamped peddler, Chanel entered society through the demimonde and eventually became the intimate of the leading artists, writers, musicians, dancers and world leaders of her time, but she never forgot her lowly origins. Though Soliman varies the narrative point of view among Coco and her friends--arts patron Misia Sert (here reduced to a meddling gossip and sexual debauchee), Vera Bate, Boy Capel, Serge Lifar--the voices are nearly identical; famous figures parade through these pages like so many wooden mannequins. Coco's life, however, has enough intrinsic drama, rampant sexuality and creative verve to make a passing good story. Her two major heartbreaks--the death of her one great love, Boy Capel, and her inability to bear a child (and thus qualify as a wife) for the Duke of Westminster--are recounted along with her many other romantic trysts (including her questionable liaison with a Nazi general) and the triumphs of her revolutionary sense of design. Publishing veteran Soliman has edited Jackie Collins; this romanticized view of Chanel may appeal to the same audience. BOMC alternate.

KIRKUS REVIEW

Soliman, editor to the likes of Jackie Collins and Zsa Zsa Gabor, debuts with a busy novel based on the life of Coco Chanel. Alternately narrated by Coco and by her intimates, this mini-series-ready drama is carefully built around documented events (as described more soberly in Axel Madsen's biography, *Chanel: A Woman of Her Own*, p. 486) but adorned with descriptions of champagne and soft fabrics and great sex. The teen. age Coco is a skilled seamstress in the provincial city of Moulin. A cavalry man falls for her and introduces her around; soon she outgrows him and moves in with the great love of her life, "'Boy'" Capel, who gives her the financial and moral support to launch her new design house. During the happy years with Boy, Coco makes lifelong friends (Diaghilev, Cocteau and her best friend/rival, the gorgeous and bisexual Misia Sert) and becomes a fixture on the Parisian scene. When Boy makes a politically astute marriage, Coco continues to see him, even designing dresses for his child-bride. Then, however, Boy is killed in an accident, and while Coco mourns him for years, her business flourishes. The wildly wealthy Duke of Westminster courts her, but their long affair breaks up when she can't give him an heir. She indulges in odd political machinations during WW II, and continues to design dresses and captivate men until her death at 87. The requisite elements--sex, rivalry, manipulation, and loss--are all here, and the revolutionary ideas of Chanel and her artistic gang are paid due lip-service. What's missing is psychological insight into the designer's charm and astonishing drive. The alternating narrators all sound exactly the same, and describe events rather than personal perspectives. Still, an untaxing portrait of a compelling subject.

August 19, 1990|Virginia Tyson | *Tyson is a Times copy editor*

"Coco, the Novel" is a good argument against dying. With death--in this case, fashion icon Coco Chanel's--a private life enters the public domain, free to become the stuff that novels are made of. And not necessarily great novels--novels that take the events of a lifetime, compress them, reshape them and serve them anew with a few interpretive social flavorings. Who was Coco Chanel? As portrayed "Coco: The Novel" she was a veritable superwoman: a

workaholic, a natural horsewoman, a crack shot and a raven-haired beauty with boundless ambition and the determination never to be possessed by a man. She had a designing eye for the simple, yet her life was far from uncomplicated. She was lucky at gaming tables but, for the most part, unlucky at love. The perfect stuff of novels. Patricia B. Soliman presents her fictional portrait of Coco, from age 17 to her death, through narration in Coco's voice and the voices of her confidants and lovers. Alas, one failing of the book is that the voices have little to distinguish them. Each new voice introduces itself with a little personal history, then launches into a "the first time I saw Coco" reverie. It makes for slow going in the early chapters.

The book jacket explains that Soliman, an editor for two decades, now has switched literary hats. She knows the tricks of the literary craft. It's all technically correct, but it lacks inspiration. After failing in her ambition to become a star of the stage, our little dark-haired Gabrielle evolves into Coco and eases into dressmaking, millinery and a love affair with a rich man. That affair is followed by another love affair with another rich man. Unfortunately, due to the compression of events, all this and World War I go by in the blink of an eye. Somewhere in the midst of all this, *chere petite Coco* opens her couture business in Paris (with a little help from her the second rich lover, Boy Capel), expands to Deauville, liberates women from corsets and raises hemlines to ankle-baring heights. *Mon dieu!* On occasion, the novel manages to suggest passion. A few of the scenes summon up the romantic intensity of an earnest bodice-ripper. One imaginative scene creates a metaphor between lovemaking and Coco's penchant for pearls (and that's all I can say in a family newspaper). The later chapters have more vitality. Perhaps by then Soliman had a greater familiarity with her characters; perhaps the terrain felt less foreign.

By this time, Coco is running with the rich and the famous and the notorious and the artsy. The name-dropping gets serious: Picasso, Cocteau, Diaghilev, Stravinsky, Winston Churchill. After pages of events and openings and balls and what-nots, we find ourselves with a mature Coco of 37. Suddenly, in middle life after years of liaisons, Coco is concerned with her fertility. Is that the old ticktock of the biological clock we hear? Still, her life seems a little too effortless. (Yeah, I know Coco was lonely and suffered from insomnia, but she also had a seemingly endless string of lovers and lots of money.) Soliman's idea, no doubt, is that Coco was an original--that she just *was*. But if I'm going to buy a hardcover and spend the time it takes to read nearly 400 pages, I want to have an understanding or at least a good guess--as to *who* or *what* the woman was. What we get instead is a woman allegedly fiercely driven to independence but who just couldn't stop attracting men (and a few women) who wanted to possess her. For all her independence, our Coco was a prisoner of love. In fact, Soliman chose a Chanel quote to set the book's tone: "Great loves, too, must be endured." The same could be said for portions of this novel. So, *chers amis*, if you are curious about Coco Chanel the person, pick up a biography. If, however, you're interested in the more romanticized version, this is the book for you. It's suitable for pool-side or airplane reading. Only, wait for the paperback.

Gabrielle Bonheur "Coco" Chanel (19 August 1883 – 10 January 1971) was a [French fashion designer](#) of women's clothes and [founder](#) of the [Chanel](#) brand. Along with [Paul Poiret](#), Chanel was credited in the post-[World War I](#) era with liberating women from the constraints of the "[corseted](#) silhouette" and popularizing a sportive, and casual chic as the feminine standard of style. A prolific fashion creator, Chanel extended her influence beyond couture clothing, realising her design aesthetic in [jewellery](#), [handbags](#), and fragrance. Her signature scent, [Chanel No. 5](#), has become an iconic product. She is the only fashion designer listed on

Time magazine's [list of the 100 most influential people of the 20th century](#). Chanel was known for her lifelong determination, ambition, and energy which she applied to her professional and social life. She achieved both success as a business woman and social prominence, thanks to the connections she made through her work. These included many artists and craftspeople to whom she became a patron. In 1970 her net worth was \$19 billion (\$118 billion in 2015 dollars). Chanel became one of the richest women of all time. Her social connections appeared to encourage a highly conservative personal outlook. Rumors arose about Chanel's activities during the [German occupation of France](#) in [World War II](#), and she was criticized for being too comfortable with the Germans but never thoroughly investigated. After several years in Switzerland after the war, she returned to Paris and revived her fashion house. In 2011 Hal Vaughan published a book on Chanel based on newly declassified documents of that era, revealing that she had collaborated with Germans in intelligence activities. One plan in late 1943 was for her to carry an [SS](#) separate peace overture to British Prime Minister [Winston Churchill](#) to end the war.

When Gabrielle was 12, her mother died of bronchitis at the age of 32. Her father sent his two sons out to work as farm laborers and sent his three daughters to the [Corrèze](#), in central France, to the convent of [Aubazine](#), which ran an orphanage. Its religious order, the Congregation of the Sacred Heart of Mary, was "founded to care for the poor and rejected, including running homes for abandoned and orphaned girls". It was a stark, frugal life, demanding strict discipline. At age eighteen, Chanel, too old to remain at Aubazine, went to live in a boarding house set aside for Catholic girls in the town of [Moulins](#). Later in her life, Chanel would retell the story of her childhood somewhat differently; she would often include more glamorous accounts, which were generally untrue. She said that when her mother died, her father sailed for America to seek his fortune, and she was sent to live with two aunts. She also claimed to have been born a decade later than 1883 and that her mother had died when she was much younger than 12.

Having learned the art of sewing during her six years at [Aubazine](#), Chanel was able to find employment as a seamstress. When not plying her needle, she sang in a cabaret frequented by cavalry officers. Chanel made her stage debut singing at a [café-concert](#) (a popular entertainment venue of the era) in a [Moulins](#) pavilion, "La Rotonde". She was among other girls dubbed *poseuses*, the performers who entertained the crowd between star turns. The money earned was what they managed to accumulate when the plate was passed among the audience in appreciation of their performance. It was at this time that Gabrielle acquired the name "Coco", possibly based on two popular songs with which she became identified, "Ko Ko Ri Ko", and "Qui qu'a vu Coco", or it was an allusion to the French word for [kept woman](#), *cocotte*. As a cafe entertainer, Chanel radiated a juvenile allure that tantalized the military habitués of the cabaret.

Chanel begun designing hats, initially as a diversion that evolved into a commercial enterprise. She became a licensed milliner (hat maker) in 1910 and opened a boutique at 21 rue Cambon, Paris, named *Chanel Modes*. As this location already housed an established clothing business, Chanel sold only her millinery creations at this address. Chanel's millinery career bloomed once theatre actress [Gabrielle Dorziat](#) modelled her hats in the F Noziere's play *Bel Ami* in 1912. Subsequently, Dorziat modelled her hats again in *Les Modes*. In 1913, Chanel opened a boutique in [Deauville](#), financed by Arthur Capel, where she introduced deluxe casual clothes suitable for leisure and sport. The fashions were constructed from humble fabrics such as [jersey](#) and [tricot](#), at the time primarily used for men's underwear. The location was a prime one, in the center of town on a fashionable street. Here Chanel sold hats, jackets, sweaters, and the *marinière*, the sailor blouse. Chanel had the dedicated support of

two family members. One was her sister, Antoinette. The other was Adrienne Chanel; she was close to Chanel's own age but was her aunt; the child of a union her grandfather had late in his life. Adrienne and Antoinette were recruited to model Chanel's designs; on a daily basis the two women paraded through the town and on its boardwalks, advertising the Chanel creations.

Chanel, determined to re-create the success she had enjoyed in Deauville, opened an establishment in [Biarritz](#) in 1915. Biarritz, situated on the Côte Basque, in proximity to wealthy Spanish clients, had neutral status during [World War I](#), allowing it to become the playground for the moneyed and those exiled from their native countries by the hostilities. The Biarritz shop was installed not as a storefront, but in a villa opposite the casino. After one year of operation, the business proved to be so lucrative that in 1916 Chanel was able to reimburse Capel his original investment. This was her sole decision; she did not consult with Capel. It was in Biarritz that Chanel made the acquaintance of an expatriate aristocrat, the [Grand Duke Dmitri Pavlovich of Russia](#). They had a romantic interlude, and maintained a close association for many years afterward. By 1919, Chanel was registered as a couturière and established her maison de couture at 31 rue Cambon, Paris.

In 1918, Chanel purchased the entire building at 31 rue Cambon, which was situated in one of the most fashionable districts of Paris. In 1921, she opened what may be considered an early incarnation of the fashion [boutique](#), featuring clothing, hats, and accessories, later expanded to offer jewellery and fragrance. By 1927, Chanel owned five properties on the rue Cambon, encompassing buildings numbered 23 through 31. In the spring of 1920 (approximately May), Chanel was introduced to the Russian composer [Igor Stravinsky](#) by [Sergei Diaghilev](#), impresario of the [Ballets Russes](#). During the summer, Chanel discovered that the Stravinsky family was seeking a place to live, having left the Soviet Union after the war. She invited them to her new home, "Bel Respiro," in the Paris suburb of Garches, until they could find a more suitable residence. They arrived at "Bel Respiro" during the second week of September and remained until May 1921. Chanel also guaranteed the new (1920) Ballets Russes production of Stravinsky's [Le Sacre du Printemps](#) (*The Rite of Spring*) against financial loss with an anonymous gift to Diaghilev, said to be 300,000 francs.

In 1922, at the [Longchamps](#) races, [Théophile Bader](#), founder of the Paris [Galeries Lafayette](#), introduced Chanel to businessman [Pierre Wertheimer](#). Bader was interested in inaugurating the sale of the Chanel No. 5 fragrance in his department store. In 1924, Chanel made an agreement with the Wertheimer brothers, Pierre and Paul, directors since 1917 of the eminent perfume and cosmetics house [Bourgeois](#). They created a corporate entity, "Parfums Chanel," and the Wertheimers agreed to provide full financing for production, marketing and distribution of [Chanel No. 5](#). The Wertheimers would receive seventy percent of the profits, and Théophile Bader a twenty percent share. For ten percent of the stock, Chanel licensed her name to *Parfums Chanel* and withdrew from involvement in all business operations. Displeased with the arrangement, Chanel worked for more than twenty years to gain full control of *Parfums Chanel*. She said that Pierre Wertheimer was "the bandit who screwed me".

One of Chanel's longest enduring associations was with [Misia Sert](#), a notable member of the bohemian elite in Paris and wife of Spanish painter [José-Maria Sert](#). It is said that theirs was an immediate bond of like souls, and Misia was attracted to Chanel by "her genius, lethal wit, sarcasm and maniacal destructiveness, which intrigued and appalled everyone". Both women were convent schooled, and maintained a friendship of shared interests and confidences. They

also shared drug use. By 1935, Chanel had become a habitual drug user, injecting herself with [morphine](#) on a daily basis, a habit she maintained until the end of her life. According to [Chandler Burr's](#) *The Emperor of Scent*, [Luca Turin](#) related an apocryphal story in circulation that Chanel was "called Coco because she threw the most fabulous [cocaine](#) parties in Paris".

The writer [Colette](#), who moved in the same social circles as Chanel, provided a whimsical description of Chanel at work in her atelier, which appeared in "Prisons et Paradis" (1932). "If every human face bears a resemblance to some animal, then Mademoiselle Chanel is a small black bull. That tuft of curly black hair, the attribute of bull-calves, falls over her brow all the way to the eyelids and dances with every maneuver of her head." In 1923, [Vera Bate Lombardi](#), (born Sarah Gertrude Arkwright), reputedly the illegitimate daughter of the [Marquess of Cambridge](#), afforded Chanel entry into the highest levels of British aristocracy. It was an elite group of associations revolving around such figures as politician [Winston Churchill](#), aristocrats such as the Duke of Westminster, and royals such as [Edward, Prince of Wales](#). In Monte Carlo in 1923, at age forty, Chanel was introduced by Lombardi to the vastly wealthy [Duke of Westminster, Hugh Richard Arthur Grosvenor](#), known to his intimates as "Bendor". The Duke of Westminster lavished Chanel with extravagant jewels, costly art, and a home in London's prestigious [Mayfair](#) district. His affair with Chanel lasted ten years.

The Duke, an outspoken anti-Semite, intensified Chanel's inherent antipathy toward Jews. He shared with her an expressed [homophobia](#). In 1946, Chanel was quoted by her friend and confidant, [Paul Morand](#): "Homosexuals? ... I have seen young women ruined by these awful queers: drugs, divorce, scandal. They will use any means to destroy a competitor and to wreak vengeance on a woman. The queers want to be women—but they are lousy women. They are charming!" Coinciding with her introduction to the Duke, was her introduction, again through Lombardi, to Lombardi's cousin, the Prince of Wales, Edward VIII. The Prince allegedly became smitten with Chanel and pursued her in spite of her involvement with the Duke of Westminster. Gossip had it that he visited Chanel in her apartment and requested that she call him "David", a privilege reserved only for his closest friends and family. Years later, [Diana Vreeland](#), editor of *Vogue*, would insist that "the passionate, focused and fiercely independent Chanel, a virtual tour de force," and the Prince "had a great romantic moment together". In 1927, the Duke of Westminster gave Chanel a parcel of land he had purchased in [Roquebrune-Cap-Martin](#) on the French Riviera. Chanel built her villa here, which she called [La Pausa](#) ("restful pause"), hiring the architect Robert Streitz. Streitz's concept for the staircase and patio contained design elements inspired by [Aubazine](#), the orphanage in which Chanel spent her youth. When asked why she did not marry the Duke of Westminster, she is supposed to have said: "There have been several Duchesses of Westminster. There is only one Chanel."

In 1921 while in [Monte Carlo](#) Chanel became acquainted with [Samuel Goldwyn](#). She was introduced through a mutual friend, the [Grand Duke Dmitri Pavlovich](#), cousin to the last czar of Russia, Nicolas II. Goldwyn offered Chanel a tantalizing proposition. For the sum of a million dollars (approximately seventy-five million in twenty-first century valuation), he would bring her to Hollywood twice a year to design costumes for [MGM](#) stars. Chanel accepted the offer. Accompanying her on her first trip to Hollywood was her friend Misia Sert. En route to California from New York, traveling in a white train car luxuriously outfitted for her use, Chanel was interviewed by *Colliers* magazine in 1932. She said that she had agreed to go to Hollywood to "see what the pictures have to offer me and what I have to offer the pictures." Chanel designed the clothing worn on screen by [Gloria Swanson](#), in [Tonight or](#)

[Never](#) (1931), and for [Ina Claire](#) in [The Greeks Had a Word for Them](#) (1932). Both [Greta Garbo](#) and [Marlene Dietrich](#) became private clients.

Her experience with American movie making left Chanel with a dislike for the Hollywood film business and distaste for the film world's culture, which she denounced as "infantile". Chanel's verdict was that "Hollywood is the capital of bad taste ... and it is vulgar." Ultimately, her design aesthetic did not translate well to film. [The New Yorker](#) speculated that Chanel had left Hollywood because "they told her her dresses weren't sensational enough. She made a lady look like a lady. Hollywood wants a lady to look like two ladies." Chanel went on to design the costumes for several French films, including [Jean Renoir](#)'s 1939 film [La Règle du jeu](#), in which she was credited as La Maison Chanel. Chanel introduced the left-wing Renoir to [Luchino Visconti](#), aware that the shy Italian hoped to work in film. Renoir was favorably impressed by Visconti and brought him in to work on his next film project.

Chanel was the mistress of some of the most influential men of her time, but she never married. She had significant relationships with the poet [Pierre Reverdy](#) and the illustrator and designer [Paul Iribe](#). After her romance with Reverdy ended in 1926, they maintained a friendship that lasted some forty years. It is postulated that the legendary maxims attributed to Chanel and published in periodicals were crafted under the mentorship of Reverdy — a collaborative effort. "A review of her correspondence reveals a complete contradiction between the clumsiness of Chanel the letter writer and the talent of Chanel as a composer of maxims ... After correcting the handful of aphorisms that Chanel wrote about her *métier*, Reverdy added to this collection of "Chanelisms" a series of thoughts of a more general nature, some touching on life and taste, others on allure and love." Her involvement with Iribe was a deep one until his sudden death in 1935. Iribe and Chanel shared the same reactionary politics, Chanel financing Iribe's monthly, ultra-nationalist and anti-republican newsletter, *Le Témoign*, which encouraged an irrational fear of foreigners and preached anti-Semitism. In 1936, one year after *Le Témoign* stopped publication, Chanel veered to the opposite end of the ideological continuum by financing Pierre Lestringuez's radical left-wing magazine [Futur](#).

The Chanel couture was a lucrative business enterprise, by 1935 employing 4,000 people. As the 1930s progressed, Chanel's place on the throne of haute couture was threatened. The boyish look and the short skirts of the 1920s flapper seemed to disappear overnight. Chanel's designs for film stars in Hollywood were not successful and had not aggrandized her reputation as expected. More significantly, Chanel's star had been eclipsed by her premier rival, the designer [Elsa Schiaparelli](#). Schiaparelli's innovative design, replete with playful references to [Surrealism](#), was garnering critical acclaim and generating enthusiasm in the fashion world. Feeling she was losing her avant-garde edge, Chanel collaborated with [Jean Cocteau](#) on his theatre piece *Oedipe Rex*. The costumes she designed were mocked and critically lambasted: "Wrapped in bandages the actors looked like ambulant mummies or victims of some terrible accident."

In 1939, at the beginning of [World War II](#), Chanel closed her shops, maintaining her apartment situated above the couture house at 31 Rue de Cambon. She claimed that it was not a time for fashion; as a result of her action, 3,000 female employees lost their jobs. Her biographer Vaughan suggests that Chanel used the outbreak of war as an opportunity to retaliate against those workers who, lobbying for fair wages and work hours, had closed her business operation during a general labor strike in France in 1936. In closing her couture house, Chanel made a definitive statement of her political views. Her dislike of Jews,

reportedly inculcated by her convent years and sharpened by her association with society elites, had solidified her beliefs. She shared with many of her circle a conviction that Jews were a threat to Europe because of the [Bolshevik](#) government in the Soviet Union. During the German occupation, Chanel resided at the [Hotel Ritz](#). It was noteworthy as the preferred place of residence for upper-echelon German military staff. Her romantic liaison with Baron [Hans Gunther von Dincklage](#), a German officer who had been an operative in military intelligence since 1920, eased her arrangements at the Ritz.

World War II, specifically the Nazi seizure of all Jewish-owned property and business enterprises, provided Chanel with the opportunity to gain the full monetary fortune generated by *Parfums Chanel* and its most profitable product, Chanel No. 5. The directors of *Parfums Chanel*, the Wertheimers, were Jewish. Chanel used her position as an "[Aryan](#)" to petition German officials to legalize her claim to sole ownership. On 5 May 1941, she wrote to the government administrator charged with ruling on the disposition of Jewish financial assets. Her grounds for proprietary ownership were based on the claim that *Parfums Chanel* "is still the property of Jews" and had been legally "abandoned" by the owners. "I have," she wrote, "an indisputable right of priority ... the profits that I have received from my creations since the foundation of this business ... are disproportionate ... [and] you can help to repair in part the prejudices I have suffered in the course of these seventeen years."

Chanel was not aware that the Wertheimers, anticipating the forthcoming Nazi mandates against Jews had, in May 1940, legally turned control of *Parfums Chanel* over to [Felix Amiot](#), a Christian French businessman and industrialist. At war's end, Amiot returned "Parfums Chanel" to the hands of the Wertheimers. During the period directly following the end of World War II, the business world watched with interest and some apprehension the ongoing legal wrestle for control of *Parfums Chanel*. Interested parties in the proceedings were cognizant that Chanel's Nazi affiliations during wartime, if made public knowledge, would seriously threaten the reputation and status of the Chanel brand. [Forbes](#) magazine summarized the dilemma faced by the Wertheimers: [it is Pierre Wertheimer's worry] how "a legal fight might illuminate Chanel's wartime activities and wreck her image—and his business."

Ultimately, the Wertheimers and Chanel came to a mutual accommodation, renegotiating the original 1924 contract. On 17 May 1947, Chanel received wartime profits from the sale of Chanel No. 5, in an amount equivalent to some nine million dollars in twenty-first century valuation. Her future share would be two percent of all Chanel No. 5 sales worldwide. The financial benefit to her would be enormous. Her earnings were projected at \$25 million a year, making her at the time one of the richest women in the world. In addition, Pierre Wertheimer agreed to an unusual stipulation proposed by Chanel herself. Wertheimer agreed to pay all of Chanel's living expenses—from the trivial to the large — for the rest of her life.

In September 1944, Chanel was called in to be interrogated by the Free French Purge Committee, the *épuration*. The committee had no documented evidence of her collaboration activity and was obliged to release her. According to Chanel's grand-niece, Gabrielle Palasse Labrunie, when Chanel returned home she said, "Churchill had me freed". The extent of Churchill's intervention for Chanel after the war became a subject of gossip and speculation. Some historians claimed that people worried that, if Chanel were forced to testify about her own activities at trial, she would expose the pro-Nazi sympathies and activities of certain top-level British officials, members of the society elite, and the royal family. Vaughan writes that some claim that Churchill instructed [Duff Cooper](#), British ambassador to the French

provisional government, to protect Chanel. Requested to appear in Paris before investigators in 1949, Chanel left her retreat in Switzerland to confront testimony given against her at the war crime trial of [Baron Louis de Vaufreland](#), a French traitor and highly placed German intelligence agent. Chanel denied all the accusations. She offered the presiding judge, Leclercq, a character reference: "I could arrange for a declaration to come from Mr. Duff Cooper." Chanel's friend and biographer Marcel Haedrich said of her wartime interaction with the Nazi regime: "If one took seriously the few disclosures that Mademoiselle Chanel allowed herself to make about those black years of the occupation, one's teeth would be set on edge."

In 1945, Chanel moved to [Switzerland](#), where she lived for several years, part of the time with Dincklage. In 1953 she sold her villa [La Pausa](#) on the French Riviera to the publisher and translator [Emery Reves](#). Five rooms from La Pausa have been replicated at the [Dallas Museum of Art](#), to house the Reves' art collection as well as pieces of furniture belonging to Chanel. Unlike the pre-war era, when women reigned as the premier couturiers, [Christian Dior](#) achieved success in 1947 with his "[New Look](#)," and a cadre of male designers achieved recognition: Dior, [Cristóbal Balenciaga](#), [Robert Piguet](#), and [Jacques Fath](#). Chanel was convinced that women would ultimately rebel against the aesthetic favored by the male couturiers, what she called "illogical" design: the "waist cinchers, padded bras, heavy skirts, and stiffened jackets". At more than 70 years old, after having her couture house closed for 15 years, she felt the time was right for her to re-enter the fashion world. The revival of her couture house in 1954 was fully financed by Chanel's opponent in the perfume battle, Pierre Wertheimer. Her new collection was not received well by Parisians, who felt her reputation had been tainted by her wartime association with the Nazis. But, her return to couture was applauded by the British and Americans, who became her faithful customers.

According to Edmonde Charles-Roux, Chanel had become tyrannic and extremely lonely late in life. In her last years she was sometimes accompanied by [Jacques Chazot](#) and her confidante Lilou Marquand. A faithful friend was also the Brazilian [Aimée de Heeren](#), who lived in Paris four months a year at the nearby [Hotel Meurice](#). The former rivals shared happy memories of times with the [Duke of Westminster](#). They frequently walked together around central Paris. As 1971 began, Chanel was 87 years old, tired, and ailing. She carried out her usual routine of preparing the spring catalog. She had gone for a long drive the afternoon of Saturday, January 9. Soon after, feeling ill, she went to bed early.⁴ She died on Sunday, January 10, 1971 at the Hotel Ritz, where she had resided for more than 30 years. Her funeral was held at the [Église de la Madeleine](#); her fashion models occupied the first seats during the ceremony and her coffin was covered with white flowers – camellias, gardenias, orchids, azaleas and a few red roses. Her grave is located in the Bois-de-Vaux Cemetery, [Lausanne, Switzerland](#).

The concept of the [little black dress](#) is often cited as a Chanel contribution to the fashion lexicon; it is a style still worn to this day. Her first dress of this sort was executed in thin silk, crêpe de chine, and had long sleeves. Chanel started making little black dresses in wool or chenille for the day and in satin, crepe or velvet for the evening. The dress was fashionable, yet comfortable and practical because it was stripped of all excess. In 1926, the American edition of [Vogue](#) highlighted such a Chanel dress, dubbing it the *garçonne* (little boy look). They predicted it would "become sort of a uniform for all women of taste." *Vogue* said it embodied a standardized aesthetic, similar to the democratic appeal of the ubiquitous black Ford automobile. Its spare look generated widespread criticism from male journalists, who complained: "no more bosom, no more stomach, no more rump...Feminine fashion of this moment in the 20th century will be baptized lop off everything." The popularity of the little

black dress can be attributed in part to the timing of its introduction. The 1930s was a period of the [Great Depression](#) Era, when women needed affordable fashion. Chanel quoted, "Thanks to me they (non-wealthy) can walk around like millionaires."

SARAH BERNHARDT – BIOGRAPHY BY FRANCOISE SAGAN

The first time that I heard about Sarah Bernhardt was when I was a little boy in Egypt. I heard a joke that when [Tutankhamun](#)'s tomb was discovered in 1922, he raised from the dead and the first question that he asked was: "Is Sarah Bernhardt still performing?" And indeed at the age of 78, although her leg was amputated and she was old and sick, she still performed until her death. Bernhardt is best known in America for the famous nine tours called "farewell tours" that she made between 1880 and 1918. She performed as young men when she was an old woman – Hamlet, and mainly L'Aiglon, the son of Napoleon, in the play by Edmond Rostand, which was the first play that I have ever seen as a little boy in the Egyptian Diaspora. Unfortunately, Bernhardt died about twenty years before I was born, but many people remembered her as she played until 1923. She is perhaps remembered most often for her portrayal of Marguerite Gauthier, the courtesan stricken with consumption, in Dumas fils' *La Dame aux Camélias*. She appeared in several silent films, and of course in the film *La Dame aux Camélias* (1911). She earned large amounts of money from her tours and her theater — in 1894 she started her own resident theater company and she opened the Théâtre Sarah Bernhardt in 1899. But she also had a weakness for humanitarian causes. Until today, nearly a hundred years after she died, Sarah Bernhardt is perceived as the ultimate actress, the best world actress of all times.

Sarah Bernhardt – Wikipedia

Sarah Bernhardt (c. 22/23 October 1844 – 26 March 1923) was a [French stage](#) and early [film actress](#). She was referred to as "the most famous actress the world has ever known", and is regarded as one of the finest actors of all time. Bernhardt made her fame on the stages of France in the 1870s, at the beginning of the [Belle Epoque](#) period, and was soon in demand in Europe and the Americas. She developed a reputation as a sublime dramatic actress and tragedienne, earning the nickname "**The Divine Sarah**". In her later career she starred in some of the earliest films ever produced. Sarah's career spanned over six decades, during which she established herself as the Victorian era's most celebrated actress. In addition to being one of the greatest actors of all time, she was noted for her outsize legend, which made her the first international entertainment icon. Bernhardt's admirers included [Sigmund Freud](#), who kept a photograph of her in his waiting room, [Mark Twain](#), who remarked "There are five kinds of actresses: bad actresses, fair actresses, good actresses, great actresses— and then there is Sarah Bernhardt", and [Czar Alexander III](#), who famously rejected a bow from Bernhardt with "No, Madame. It is I who must bow to you." (and he did so before his court). Numerous theatres and works bear her name.

Bernhardt's stage career started in 1862 while she was a student at the [Comédie-Française](#), France's most prestigious theater. She decided to leave France, and soon ended up in Belgium, where she became the mistress of Henri, [Prince de Ligne](#), and gave birth to their son, Maurice, in 1864. After Maurice's birth, the Prince proposed marriage, but his family forbade it and persuaded Bernhardt to refuse and end their relationship. After being expelled from the Comédie Française, she resumed the life of [courtesan](#) to which her mother had introduced her at a young age, and made considerable money during that period (1862–65). During this time

she acquired her famous [coffin](#), in which she often slept in lieu of a bed – claiming that doing so helped her understand her many tragic roles. Bernhardt then reverted to the theater, securing a contract at the [Théâtre de L'Odéon](#) where she began performing in 1866. Her most famous performance there was her [travesty](#) performance as the Florentine minstrel in François Coppé's *Le Passant* (January 1869). With the outbreak of the [Franco-Prussian War](#) performances were stopped and Bernhardt converted the theatre into a makeshift hospital where she took care of the soldiers wounded on the battlefield. In 1872, she left the [Odéon](#) and returned to Comédie-Française. One of her remarkable successes there was in the title role of Voltaire's [Zaïre](#) (1874).

She made her fame on the stages of Europe in the 1870s and was soon in demand all over Europe. Her first tour of the United States and Canada took place in 1880-81 (157 performances in 31 cities). In 1887 she toured South America including Cuba where she performed in the [Sauto Theater](#), in [Matanzas](#). In 1888 she toured Italy, Egypt, Turkey, Sweden, Norway and Russia. In 1891-92 she took part in a worldwide tour which included much of Europe, Russia, North & South America, Australia, New Zealand, Hawaii and Samoa. Another tour of America took place in 1896. 1901 saw her 6th American Tour, 1906 her 7th (her "first Farewell Tour" where she concluded the Southern California leg with "La Tosca" at the Venice Auditorium), 1910 her 8th (when she made a recording on Wax Cylinder at Thomas Edison's laboratory in West Orange, New Jersey), and 1913-1914 her 9th (on the evening of March 12, 1913, in Los Angeles, she was involved in a motorcar accident while she was being driven in a taxi to the downtown Orpheum Theatre to appear in "La Tosca"). In between tours Bernhardt took over the lease of the [Théâtre de la Renaissance](#), which she ran as producer-director-star from 1893 to 1899. She coached many young women in the art of acting, including actress and courtesan [Liane de Pougy](#).

In 1899 Bernhardt took over the former [Théâtre des Nations](#) on the Place du Châtelet, renaming it the Théâtre Sarah-Bernhardt and opening on 21 January in one of her most admired parts, the title role in [Victorien Sardou's](#) *La Tosca*. This was followed by revivals of Racine's *Phèdre* (24 February), Octave Feuillet's *Dalila* (8 March), Gaston de Wailly's *Patron Bénéic* (14 March), [Edmond Rostand's](#) *La Samaritaine* (25 March), and [Alexandre Dumas fils's](#) *La Dame aux Camélias* on 9 April. On 20 May, she premiered her most controversial part, the title role in Shakespeare's *Hamlet*, in a prose adaptation which she had commissioned from Eugène Morand and [Marcel Schwob](#). The play was greeted with rave reviews despite its running time of four hours. She developed a reputation as a serious dramatic actress, earning the title "The Divine Sarah"; arguably, she was the most famous actress of the 19th century. Bernhardt also participated in scandalous productions such as [John Wesley De Kay's](#) "Judas". It performed in New York's Globe Theatre for only one night in December 1910 before it was banned there, as well as in Boston and Philadelphia. In New York's art scene of 1910 the story line of the play was nothing short of scandalous. Mary Magdalene, who at first became a lover of Pontius Pilate, then of Judas Iscariot, got involved with Jesus. Judas, after realizing that Mary Magdalene had given herself to Jesus, decided to betray his friend to the Romans. To top the provocation of New York's theater lovers, Judas was played by the voluptuous Sarah Bernhardt. In Paris, Bernhardt continued to direct the Théâtre Sarah-Bernhardt until her death, when her son Maurice took over.

Sarah Bernhardt Facts/Your Dictionnary

One of the first great "stars" of the world stage, Sarah Bernhardt, known as "The Divine Sarah" (1844-1923), dominated the theatrical scenes of both Europe and America

for over half a century. In addition to being considered one of the greatest actors of all time, she was noted for her "larger than life personality" and extravagant lifestyle.

Sarah Bernhardt was born Henriette-Rosine Bernard into the Parisian demi-monde of courtesans and affluent gentlemen on October 23, 1844. She did not know her father, a Parisian who never married her Dutch Jewish mother, a woman who had little time or inclination to raise a young child in the social whirl of the Paris salon set. After a tumultuous childhood, Bernhardt was ready to commit herself to a religious life when a place was secured for her to study acting in the Paris Conservatoire (1859 to 1862). She debuted professionally in 1862 in Racine's *Iphigénie*, in which she displayed little of the talent that would propel her to stardom in just a few years. Physically, Bernhardt was somewhat boyish in her physique; she also suffered from bouts of ill health that plagued her from childhood. Her most noted qualities as an actor were her "voice of gold" and her ability to breathe emotional life into classic roles and melodramatic heroines, lifting the former from the stultifying effects of tradition and lending nobility and depth to the latter. Bernhardt's professional career began in earnest in 1866 as a member of the theater company at the Odéon. Her first major successes came as a member of France's greatest theater company, the Comédie Française, starting in 1872. After a triumphant tour of England with members of the Comédie in 1878, she broke what was considered to be a lifetime contract with the company to pursue her own successes in 1880.

Bernhardt excelled in emotionally overwrought roles in the classical vein, such as the queen in Hugo's *Ruy Blas* (1879), the title role in Racine's *Phèdre* (1874), and Doña Sol in *Hernani* (1877). She also played several "breeches" roles (male parts played by women) throughout her career, such as Hamlet and the title role in Rostand's *L'Aiglon* (The Eaglet, about Napoleon's son), which was written especially for her. She is perhaps remembered most often for her portrayal of Marguerite Gauthier, the courtesan stricken with consumption, in Dumas' *La Dame aux Camélias* (Camillo to most English-speaking audiences). Her off-stage life was often just as harrowing as that of the characters she portrayed, with frequent bouts of physical ailments, financial difficulties, and numerous love affairs. Journalists of the day frequently painted her as an eccentric, and this contributed to her fame as much as her acting talent did. It is true that she sometimes slept in a coffin; whether she was at home or traveling Bernhardt always kept a large coterie of friends and admirers about her, as well as servants and a menagerie of exotic animals. She was a visual as well as theatrical artist, and many of her paintings and sculptures were popular. To her credit, she also had a weakness for humanitarian causes. During the Franco-Prussian War in 1870 she established a military hospital in the closed Odéon theater, and during World War I she contributed both money and fund-raising activities to support the war effort.

Bernhardt is best known in America for her famous "farewell tours" that she made between 1880 and 1918. The nine tours she made in America often had a financial rather than artistic motivation behind them. During one such tour she teamed with France's greatest male actor of the day, the comedian Constant-Benoît Coquelin (the only person to ever leave the Comédie Française, until Bernhardt), to perform Edmund de Rostand's *Cyrano de Bergerac*, among other plays. Bernhardt also took a progressive approach to the new medium of film (which was looked down upon by the legitimate theater), unabashedly appearing in several films in her lifetime, including *La Dame aux Camélias* (1911), *Queen Elizabeth* (1912), and *Adrienne Lecouvreur* (1913). The success of *Queen Elizabeth* in America, one of the first dramatic silent features, enabled producer Adolph Zukor to start the Famous Players production company, which eventually became Paramount Pictures.

In 1894 she started her own resident theater company. She opened the Théâtre Sarah Bernhardt in 1899. Her leg was amputated in 1911 because of a chronic knee condition brought on by several injuries. However, she continued to perform, even though she was constrained to perform excerpts of her most famous roles lying in a prone position or propped up by an artfully-designed set piece. Her hotel room in Paris had been converted to a film set for *La Voyante*, but she died on March 26, 1923, at the age of 79 before the film was completed. Bernhardt never performed any of her parts in anything but French, but she was hailed and revered as a great actress on both sides of the Atlantic regardless of her audiences' abilities to comprehend the language. This popularity is a testament to both her emotional and vocal power as an actress, as well as her contribution to the modern stage as a singular star rather than as a member of a company.

From *The Divine Sarah Bernhardt's Hamlet* by Sylvia Morris

Although Bernhardt made her name in her native France playing roles such as Phedre in Racine's intense drama, she loved Shakespeare and appeared as Cordelia in *King Lear* and Lady Macbeth. In 1899 she played Hamlet in a French adaptation of the play in twelve scenes. The production of Hamlet was brought to the Adelphi Theatre in London during 1899. The duel scene (heavily cut) was specially staged and filmed at the time. Actress Elizabeth Robins published a full [account of Bernhardt's performance](#) the following year. Even at the age of 55, "Madame Bernhardt's assumption of masculinity is so cleverly carried out that one loses sight of Hamlet in one's admiration for the *tour de force* of the actress... She gives us...a spirited boy; doing it with an impetuosity, a youthfulness, almost childish." In giving advice to the players she was "a precocious young gentleman, who...thoroughly enjoys laying down the law to plodding professionals". And in the play scene, "with something a little reminiscent of an urchin swarming over an orchard wall, [Hamlet] crawls up to the throne, till his eyes, not sombre and horror-stricken, but keen and glittering, are on a level with the King's. When he has surprised the guilty terror there, this Hamlet actually bursts out into peal on peal of laughter. His clever trick has succeeded, his *Schadenfreude* overflows."

After performing in London, Bernhardt and her company gave one performance at the Shakespeare Memorial Theatre in Stratford, a matinee on Thursday 29 June 1899. On 16 June the Stratford Herald reported that she was performing in Stratford "to gratify her desire to play here", and had made an advance visit. The day of performance was to be most exciting. A special train brought the company up from London, and both the railway station and the principal streets were decorated with flags and streamers. Marie Corelli met the train, presenting Mme Bernhardt with "a magnificent bouquet with tricolour ribbons, bearing greetings in French". Most of the extensive news coverage concentrated on her reception more than her performance, but the Birmingham Post commented on Bernhardt's "intense dramatic power" while complaining that the prose of the French version "seemed out of character in the poet's Birthplace".

The Birmingham Gazette ventured some criticism: "too short a time the philosopher and too much the man of wrath and vengeance". "Mme Bernhardt...puts his passion in the foreground, and every monologue becomes a diatribe. Her Hamlet is a man in constant frenzy, possessed with the one thought of avenging his father's death. He is not mad, but maddened". In her book *Rosemary for Stratford*, Ursula Bloom tells what happened when Sarah Bernhardt visited Shakespeare's tomb without any prior warning. The appearance of the great star who spoke no English threw some of the staff into a panic. It was my grandfather, William Tompkins, sub-sacristan at the church, who "came to the rescue" with

schoolboy French. "The imperturbable Tompkins...stepped forward and bowed deeply to the lady. "Madame, bon apres-midi," said Tompkins, with an elegant gesture of the hand which he supposed also to be French." "Sarah Bernhardt greeted him with an almost embarrassing exuberance. He had not a clue as to what she said, but there seemed to be a great deal of it. He led her up the aisle to the choir stalls, his black cassock brushing the pews as he went. Then, coming to a standstill, again he waved his hands. "A la tombe, a la monument," said he."

Review on the biography by Goodreads

A world famous novelist writes here about one of the most famous actresses of all time, Sarah Bernhardt, but not wanting this to be a traditional biography, Sagan hit upon the daring device of an imaginary correspondence between Sarah Bernhardt and herself, giving a first-person voice with dimension. The result is a brilliant, lively, intimate exchange of letters, sharing of opinions on past and contemporary culture, and Bernhardt's reflections on her career, friends, motherhood, lovers, money and fans. Though the letters are imaginary, the real woman, Sarah Bernhardt dominated the stage not only in her native France, but throughout the world for sixty years, literally until the week she died in 1923.

From Library Journal

In this charming imaginary correspondence, Sagan interviews the legendary actress (1844-1923). Since Sagan distrusts the published biographies, especially Bernhardt's coy *Ma double vie* (1907), she leads her subject to make candid comments on her upbringing as a cocotte's daughter, her roles on- and off-stage, her intertwined workaholicism and spendthrift life all illuminated by Bernhardt's captivating megalomania. Despite Bernhardt's sexual appetite and self-indulgence, the correspondence is discreet, almost chaste. The charm lies in Sagan's convincing recreation of Bernhardt's conversational voice, which the translator conveys admirably. Marilyn Gaddis Rose, SUNY at Binghamton

KIRKUS REVIEW

Fascinated by the life and personality of Sarah Bernhardt, and, her publisher tells us, uninterested in a traditional biography, Sagan (*Bonjour Tristesse*; *With Fondest Regards*, 1985; etc.) has written instead an imaginary correspondence with the divine Sarah, now over 60 years in her grave. Sagan has done her research, and as long as she sticks to the facts—Bernhardt's childhood in a convent school, her troubled reunion in adolescence with her courtesan mother, her discovery of her theatrical gifts, and the triumphs of her phenomenal career—she succeeds in tracing the trajectory of her subject's life. But Sagan is a hopeless fan, dazzled by Bernhardt's numerous private conquests as well as her public acclaim. She gushes to Bernhardt in an early letter that no woman in history "'was more adored than you. . .openly adored in all the splendor and gaiety of her glory.'" The premise of this correspondence is weak to start with, and it collapses when the two begin agreeing that they are really very much alike, that they share the same values, the same weaknesses, that they have a rare understanding of each other. The book's device needs a light touch, and time and again Sagan's self-indulgence destroys the credulity of the most sympathetic reader. Sagan's genuine admiration for Bernhardt can at times bring the haughty, heedless, and flamboyant actress vividly to life. But a reader's enthusiasm would have to equal Sagan's in order to overlook the romantic and sentimental excesses here.

Sarah Bernhardt and the Jewish problem? Many Jews like to find a connection in all the world's events with the Jewish problem, especially if we are dealing with Jews, as Sarah Bernhardt. Sarah Bernhardt was born in [Paris](#) as Rosine Bernardt, the daughter of Julie Bernardt (1821, [Amsterdam](#) – 1876, Paris) and an unknown father. Julie was one of six children of an itinerant [Jewish](#) spectacle merchant, "vision specialist" and petty criminal, Moritz Baruch Bernardt, and Sara Hirsch (later known as Janetta Hartog; c. 1797–1829). When Sarah was young her mother sent her to Grandchamp, an Augustine [convent school](#) near [Versailles](#). Bernhardt is said to have once stated, "Me pray? Never! I'm an [atheist](#)." She had been baptised a Roman Catholic, and accepted the last rites shortly before her death, but she considered herself [irreligious](#) and strongly identified as [Jewish](#). After her son died in 1928, her theatre retained the name Sarah Bernhardt until the [Occupation](#) by the Germans in World War II, when the name was changed to Théâtre de la Cité because of Bernhardt's [Jewish](#) ancestry. So, you can be baptized and be buried as a Christian, but the anti-Semites will never forgive your Jewish roots.

Quotes by Sarah Bernhardt – known for her brilliant quotes, we bring here some of them:

Quand même - Bernhardt's motto, a versatile French phrase meaning "anyway, nevertheless; really; how about that; finally"

Once the curtain is raised, the actor ceases to belong to himself. He belongs to his character, to his author, to his public. He must do the impossible to identify himself with the first, not to betray the second, and not to disappoint the third. And to this end the actor must forget his personality and throw aside his joys and sorrows. He must present the public with the reality of a being who for him is only a fiction. With his own eyes, he must shed the tears of the other. With his own voice, he must groan the anguish of the other. His own heart beats as if it would burst, for it is the other's heart that beats in his heart. And when he retires from a tragic or dramatic scene, if he has properly rendered his character, he must be panting and exhausted. *The Art of the Theatre* (1925), p. 171

Me pray? Never! I'm an atheist. As quoted in *What Great Men Think of Religion* (1945) by Ira D Cardiff

Life engenders life. Energy creates energy. It is by spending oneself that one becomes rich. As quoted in *Madam Sarah* (1966) by Cornelia Otis Skinner, p. xvi

Acting is all internal, but must be externalized.

Victor Hugo could not promise without keeping his word. He was not like me: I promise everything with the firm intention of keeping my promises, and two hours after I have forgotten all about them. If anyone reminds me of what I have promised, I tear my hair, and to make up for my forgetfulness I say anything, I buy presents — in fact, I complicate my life with useless worries. It has always been thus, and always will be so.

My fame had become annoying for my enemies, and a little trying, I confess, for my friends. But at that time all this stir and noise amused me vastly. I did nothing to attract attention. My somewhat fantastic tastes, my paleness and thinness, my peculiar way of dressing, my scorn of fashion, my general freedom in all respects, made me a being quite apart from all others. I did not recognize the fact. I did not read, I never read, the newspapers.

So I did not know what was said about me, either favourable or unfavourable. Surrounded by a court of adorers of both sexes, I lived in a sunny dream.

Those who know the joys and miseries of celebrity when they have passed the age of forty know how to defend themselves. They are at the beginning of a series of small worries, thunderbolts hidden under flowers, but they know how to hold in check that monster advertisement. It is a sort of octopus with innumerable tentacles. It throws out to right and left, in front and behind, its clammy arms, and gathers in, through its thousand little suckers, all the gossip and slander and praise afloat, to spit out again at the public when it is vomiting its black gall. But those who are caught in the clutches of celebrity at the age of twenty two know nothing.

I am so superstitious that if I had arrived when there was no sunshine I should have been wretched and most anxious until after my first performance. It is a perfect torture to be superstitious to this degree, and, unfortunately for me, I am ten times more so now than I was in those days, for besides the superstitions of my own country, I have, thanks to my travels, added to my stock all the superstitions of other countries. I know them all now, and in any critical moment of my life, they all rise up in armed legions for or against me. **I cannot walk a single step or make any movement or gesture, sit down, go out, look at the sky or ground, without feeling some reason for hope or despair, until at last, exasperated by the trammels put upon my actions by my thought, I defy all superstitions and just act as I want to act.**

Life is short, even for those who live a long time, and we must live for the few who know and appreciate us, who judge and absolve us, and for whom we have the same affection and indulgence. The rest I look upon as a mere crowd, lively or sad, loyal or corrupt, from whom there is nothing to be expected but fleeting emotions, either pleasant or unpleasant, which leave no trace behind them. **We ought to hate very rarely, as it is too fatiguing; remain indifferent to a great deal, forgive often and never forget.**

What matters poverty? What matters anything to him who is enamoured of our art? Does he not carry in himself every joy and every beauty?

For the theatre one needs long arms... an artiste with short arms can never make a fine gesture.

If I have a foreign accent—which I much regret—it is cosmopolitan, but not Teutonic. I am a daughter of the great Jewish race, and my somewhat uncultivated language is the outcome of our enforced wanderings.

Permanent success cannot be achieved except by incessant intellectual labour, always inspired by the ideal.

I have often been asked why I am so fond of playing male parts. As a matter of fact, it is not male parts, but male brains that I prefer.

To be a good actor... it is necessary to have a firmly tempered soul, to be surprised at nothing, to resume each minute the laborious task that has barely just been finished.

The dramatic art would appear to be rather a feminine art; it contains in itself all the artifices which belong to the province of woman: the desire to please, facility to express emotions and hide defects, and the faculty of assimilation which is the real essence of woman.

The theatre is the involuntary reflex of the ideas of the crowd.

Art is not about something, Art is something

He who is incapable of feeling strong passions, of being shaken by anger, of living in every sense of the word, will never be a good actor.

Legend remains victorious in spite of history.

Although all new ideas are born in France, they are not readily adopted there. It seems that they must first commence to prosper in a foreign country.

What would life be without art? Science prolongs life. To consist of what-eating, drinking, and sleeping? What is the good of living longer if it is only a matter of satisfying the requirements that sustain life? All this is nothing without the charm of art.

When asked at age 79 why her Paris apartment was located up many flights of stairs at the top of the building: It's the only way I can still make the hearts of men beat faster.

Actors of the first water are not more plentiful than playwrights of genius.

Alas, we are the victims of advertisement. Those who taste the joys and sorrows of fame when they have passed forty, know how to look after themselves. They know what is concealed beneath the flowers, and what the gossip, the calumnies, and the praise are worth. But as for those who win fame when they are twenty, they know nothing, and are caught up in the whirlpool.

The artist's personality must be left in his dressing-room; his soul must be denuded of its own sensations and clothed with the base or noble qualities he is called upon to exhibit.... [he] must leave behind him the cares and vexations of life, throw aside his personality for several hours, and move in the dream of another life, forgetting everything.

There are five kinds of actresses: bad actresses, fair actresses, good actresses, great actresses— and then there is Sarah Bernhardt - Mark Twain

She is the Muse of Poetry herself. Neither intelligence nor artistry have anything to do with it. She is guided by a secret instinct. She recites as the nightingale sings, as the wind sighs, as water murmurs, as Lamartine once wrote. - Theodore de Banville

A symphony of golden flutes and muted strings; silver dawn lit by lambent lightnings, soft stars and a clear-cut crescent moon. - Maurice Baring, on Bernhardt's legendary "voix d'or" (golden voice)

THOUGHTS AND QUOTES ON FAVORITE PLAYS

MY FAVORITE PLAYWRIGHTS OF THE TWELFTY

I enjoy very much playwrights from the twelfth 1820-1939 – Hugo, Ibsen, Strindberg, Rostand, Chekhov, Shaw, Wilde, Sholom Aleikhem, Brecht, Feydeau, Pirandello. I enjoy most all those playwrights, but I appreciate and admire very much all the other playwrights as well and I read and see their plays with sheer pleasure: Shakespeare, Corneille, Moliere, Racine, Aeschylus, Sophocles, Euripides, Aristophanes, Lope de Vega, Tirso de Molina, Virgil (The Aeneid), Calderon, Goethe, Seneca, Schiller, Chaucer, Dante (The Divine Comedy), Homer (The Iliad and Odyssey), etc. They are all my sons (or my fathers) and I enjoy reading all of them, but especially the newborns (I mean in the twelfth 1820-1939, and in this book “twelfth” means also era or period when it refers to the era of 1820-1939 covered in this book). I read most of those playwrights in their original language – French, English, Spanish, Italian, Hebrew, Ladino, Yiddish, German, but I read all the plays written originally in Russian, Norwegian/Danish (Ibsen wrote in Danish), Swedish, Greek and Latin in translations, as I read them before learning their languages, but even now it takes me a lot of time to read Ibsen in Norwegian and I do it only when I have enough time and patience.

Yet, it is very easy to read plays in foreign languages as there are no long descriptions and the dialogues are colloquial, in prose and in a simple language, especially in modern plays since 1850. I bring here extracts of texts of modern plays in translations and in: French - L'Aiglon by Rostand, in Italian by Pirandello - Six Characters in Search of an Author, in Spanish by Lorca - The House of Bernarda Alba, in Swedish by Strindberg - Miss Julie, in Russian by Chekhov - Three Sisters, in Ladino by Avraam Papo - The Vineyard of Navot, in Catalan by Guimera - Terra Baixa, in Portuguese by Garrett - Frei Luis de Sousa. Rigoletto in Italian, Verdi's opera with Piave's libretto, based on Victor Hugo's play Le Roi S'amuse – analysis and text, Revizor by Nikolai Gogol – analysis, An Enemy of the People by Henrik Ibsen – analysis and text in Norwegian, The Threepenny Opera by Bertolt Brecht – analysis and text in German, Topaze by Marcel Pagnol – Analysis. Finally the analysis of the novel The Great Gatsby by Frances Scott Fitzgerald. Altogether a survey of 11 plays, 2 operas, and a novel.

CORY'S FIRST MEMORY – EDMOND ROSTAND'S PLAY L'AIGLON (FRENCH)

My earliest memory was of a play I saw with my parents at the age of 3 or 4. La Comedie Francaise, the best French theater, has come on tour to Cairo, the French Diaspora, with Edmond Rostand's L'Aiglon. A very long play of more than 3 hours with 6 acts, yet for the young boy it was a revelation, the best childhood experience I ever had, and I remembered well the play, staying awake until the end, and hearing among the last verses of the play, those immortal lines of [L'Aiglon](#). [L'Aiglon](#) is a play in six acts by [Edmond Rostand](#) based on the life of [Napoleon II](#), who was the son of Emperor [Napoleon I](#) and his second wife, Empress [Marie Louise](#). The title of the play comes from a nickname for Napoleon II, the [French](#) word for "eaglet" (a young [eagle](#)). The title role was created by [Sarah Bernhardt](#) in the play's premiere on 15 March 1900 at the [Théâtre Sarah Bernhardt](#). In October of the same year, the play (in an English translation by [Louis N. Parker](#)) premiered at New York's [Knickerbocker Theatre](#), with [Maude Adams](#) in the title role. Its first performance in London was at [Her Majesty's Theatre](#) in 1901, with Bernhardt again playing the leading role. Rostand had written

L'Aiglon specifically for Bernhardt, and it became one of her signature roles. [Arthur Honegger](#) and [Jacques Ibert](#) composed an [opera](#) in five acts, also with the title *L'Aiglon*, to a libretto by [Henri Cain](#), based on Rostand's play. It was first performed at the [Opéra de Monte-Carlo](#) in 1937.

Napoleon II, the son of the emperor, died in Vienna, sick and hopeless. He says that he lived between his cradle and his death bed, without encountering any glory. History will not remember the sick young prince, but will always recall the baby who held the globe as a ball. Before dying, L'Aiglon forgives his mother who betrayed his father, left him to return with the child to Vienna, to her father the Emperor. But then he forgives the Empress...

*“Oh! comme mon berceau touche mon lit de mort!
(Il met la main entre le berceau et le lit en murmurant :)
Ma vie est là dans la ruelle.
[...]Et le sort,
Dans la ruelle mince - oh! trop mince et trop noire!-
N’a pu laisser tomber une épingle de gloire!”*

Alas ! how near my cradle to my death-bed !

[He points to the gap between the cradle and the

bed.]

And all my life lies in that narrow space !

THERESA.

Oh!

THE DUKE.

In that gap, too narrow and too dark,
Fate ne'er let fall a single pin of glory.
Lay me upon the bed.

*“Et l’Histoire, d’ailleurs, ne se souviendra pas
Du prince que brûlaient toutes les grandes fièvres...
Mais elle reverra, dans sa voiture aux chèvres,
L’enfant au col brodé qui, rose, grave, et blond,
Tient le globe du monde ainsi qu’un gros ballon!”*

“ Inspirez-moi, mon Dieu,

La parole profonde et cependant légère

Avec laquelle on peut pardonner à sa mère!”

“(Vivement, et posant avec une noblesse infinie la main sur les cheveux de

Marie Louise agenouillée.)

De l'Impératrice!

(A ce mot qui pardonne et qui la recouronne, la mère éclate en sanglots.)”

I tried to find a record of this performance during many hours on the Internet, the only thing that I found was that the Comedie Francaise was on tour in Cairo in 1950 (in this case it was not my earliest memory as I was six years old), and that Jean Weber who was most of his life an actor at the Comedie Francaise acted in L'Aiglon in 1949 at the Theatre des Celestins and in 1950 at the Theatre Sarah Bernhardt, but not at the Comedie Francaise, although of course he played the role of Napoleon II L'Aiglon [in a film](#) of 1931 when he was 25. [Sarah Bernhardt](#), the best known French actress, was the first actor of L'Aiglon in 1900 at the age of 56 and she [continued to play](#) the role until she was 70, although the role is of a young man aged 21. I saw also several times the [best known](#) play of [Edmond](#) Rostand Cyrano de Bergerac ([play/film](#)).

I saw many performances at the Comedie Francaise when I studied at Insead in 1967 and 1968, and later on when I came to Paris on business, tourism, or for my PhD dissertation, and to many other theaters as well, most of it excellent theaters, with unforgettable plays, remarkable actors and directors, performing the best classical and modern plays. I remembered most my visit at the Odeon, where [Jean-Louis Barrault](#) directed the best plays, and he acted with his wife Madeleine Renaud. In the past Barrault performed there in 1960 the premiere of Ionesco's Rhinoceros. He was Berenger and directed the play. On the same year he was Cassius in Julius Caesar, Trofimov in Tchekhov's The Cherry Orchard, and also played in a comedy by Feydeau. But in May 1968, during the Students' Revolution in Paris, where I participated, Barrault opened his theater l'Odeon to the students who occupied it during a month. I was there, of course, and I heard Barrault trying to explain to the students that his theater was relevant in the class struggle and was not a frozen vestige of the past, irrelevant to the sufferings of French society, students and workers. What a long way for Cory, since L'Aiglon and the Lycee in Cairo...

SEI PERSONAGGI IN CERCA D'AUTORE/SIX CHARACTERS IN SEARCH OF AN AUTHOR BY LUIGI PIRANDELLO IN ITALIAN AND ENGLISH

One of the first books that I read in Italian was Sei personaggi in cerca d'autore/Six characters in search of an author, by Luigi Pirandello (1921). It is one of my favorite plays, as in plays in contrast to music and art, I enjoy most avant garde plays. I bring here the final scene, which is easy to understand, and I could read the play without the assistance of a dictionary or translation. There is only one problem, as you can notice the translation is not identical to the original... I saw the play several times but unfortunately not in Italian, yet I saw it in Italian and in translations on the Internet also.

Costernazione generale. La Madre, spaventata, cercherà di interporsi, di separarli.

La madre (c.s.). Per carità! Per carità!

Il padre (senza lasciarlo). Devi obbedire! Devi obbedire!

Il figlio (colluttando con lui e alla fine buttandolo a terra presso la scaletta, tra l'orrore di tutti). Ma che cos'è codesta frenesia che t'ha preso? Non ha ritegno di portare davanti a tutti la sua vergogna e la nostra! Io non mi presto! non mi presto! E interpreto così la volontà di chi non volle portarci sulla scena!

Il capocomico. Ma se ci siete venuti!

Il figlio (additando il Padre). Lui, non io!

Il capocomico. E non è qua anche lei?

Il figlio. C'è voluto venir lui, trascinandoci tutti e prestandosi anche a combinare di là insieme con lei non solo quello che è realmente avvenuto; ma come se non bastasse, anche quello che non c'è stato!

Il capocomico. Ma dica, dica lei almeno che cosa c'è stato! Lo dica a me! Se n'è uscito dalla sua camera, senza dir nulla?

Il figlio (dopo un momento d'esitazione). Nulla. Proprio, per non fare una scena!

Il capocomico (incitandolo). Ebbene, e poi? che ha fatto?

Il figlio (tra l'angosciata attenzione di tutti, muovendo alcuni passi sul palcoscenico). Nulla... Attraversando il giardino... S'interromperà, fosco, assorto.

Il capocomico (spingendolo sempre più a dire, impressionato dal ritegno di lui). Ebbene? attraversando il giardino?

Il figlio (esasperato, nascondendo il volto con un braccio). Ma perché mi vuol far dire, signore? È orribile!

La Madre tremerà tutta, con gemiti soffocati, guardando verso la vasca.

Il capocomico (piano, notando quello sguardo, si rivolgerà al Figlio con crescente apprensione). La bambina?

Il figlio (guardando davanti a sè, nella sala). Là, nella vasca...

Il padre (a terra, indicando pietosamente la Madre). E lei lo seguiva, signore!

Il capocomico (al Figlio, con ansia). E allora, lei?

Il figlio (lentamente, sempre guardando davanti a sè). Accorsi; mi precipitai per ripescarla... Ma a un tratto m'arrestai, perché dietro quegli alberi vidi una cosa che mi gelò: il ragazzo, il ragazzo che se ne stava lì fermo, con occhi da pazzo, a guardare nella vasca la sorellina affogata.

La Figliastra, rimasta curva presso la vasca a nascondere la Bambina, risponderà come un'eco dal fondo, singhiozzando perdutoamente. Pausa.

Feci per accostarmi; e allora...

Rintronerà dietro gli alberi, dove il Giovinetto è rimasto nascosto, un colpo di rivoltella.

La madre (con un grido straziante, accorrendo col Figlio e con tutti gli Attori in mezzo al subbuglio generale). Figlio! Figlio mio!

E poi, fra la confusione e le grida sconnesse degli altri:

Ajuto! Ajuto!

Il capocomico (tra le grida, cercando di farsi largo, mentre il Giovinetto sarà sollevato da capo e da piedi e trasportato via, dietro la tenda bianca). S'è ferito? s'è ferito davvero?

Tutti, tranne il Capocomico e il Padre, rimasto per terra presso la scaletta, saranno scomparsi dietro il fondalino abbassato, che fa da cielo, e vi resteranno un po' parlottando angosciosamente, poi, da una parte e dall'altra di esso, rientreranno in iscena gli Attori.

La prima attrice (rientrando da destra, addolorata). È morto! Povero ragazzo! È morto! Oh che cosa!

Il primo attore (rientrando da sinistra, ridendo). Ma che morto! Finzione! finzione! Non ci creda!

Altri attori da destra. Finzione? Realtà! realtà! È morto!

Altri attori da sinistra. No! Finzione! Finzione!

Il padre (levandosi e gridando tra loro). Ma che finzione! Realtà, realtà, signori! realtà!

E scomparirà anche lui, disperatamente, dietro il fondalino.

Il capocomico (non potendone più). Finzione! realtà! Andate al diavolo tutti quanti! Luce! Luce! Luce!

D'un tratto, tutto il palcoscenico e tutta la sala del teatro sfolgoreranno di vivissima luce. Il capocomico rifiaterà come liberato da un incubo, e tutti si guarderanno negli occhi, sospesi e smarriti.

Ah! Non m'era mai capitata una cosa simile! Mi hanno fatto perdere una giornata!

Guarderà l'orologio.

Andate, andate! Che volete più fare adesso? Troppo tardi per ripigliare la prova. A questa sera!

E appena gli Attori se ne saranno andati, salutandolo:

Ehi, elettricista, spegni tutto!

Non avrà finito di dirlo, che il teatro piomberà per un attimo nella più fitta oscurità.

Eh, perdio! Lasciami almeno accesa una lampadina, per vedere dove metto i piedi!

Subito, dietro il fondalino, come per uno sbaglio d'attacco, s'accenderà un riflettore verde, che proietterà, grandi e spiccate, le ombre dei Personaggi, meno il Giovinetto e la Bambina. Il Capocomico, vedendole, schizzerà via dal palcoscenico, atterrito. Contemporaneamente si spegnerà il riflettore dietro il fondalino, e si rifarà sul palcoscenico il notturno azzurro di prima. Lentamente, dal lato destro della tela verrà prima avanti il Figlio, seguito dalla Madre con le braccia protese verso di lui; poi dal lato sinistro il Padre. Si fermeranno a metà del palcoscenico, rimanendo lì come forme trasognate. Verrà fuori, ultima, da sinistra, la Figliastra che correrà verso una delle scalette; sul primo scalino si fermerà un momento a guardare gli altri tre e scoppiierà in una stridula risata, precipitandosi poi giù per la scaletta; correrà attraverso il corridoio tra le poltrone; si fermerà ancora una volta e di nuovo riderà, guardando i tre rimasti lassù; scomparirà dalla sala, e ancora, dal ridotto, se ne udrà la risata. Poco dopo calerà la tela.

FINE

[*The MOTHER, frightened, tries to separate them.*]

The Mother [*pleading*]. Please! please!

The Father [*not leaving hold of the SON*]. You've got to obey, do you hear?

The Son [*almost crying from rage*]. What does it mean, this madness you've got? [*They separate.*] Have you no decency, that you insist on showing everyone our shame? I won't do it! I won't! And I stand for the will of our author in this. He didn't want to put us on the stage, after all!

The Manager. Man alive! You came here . .

The Son [*indicating FATHER*]. He did! I didn't!

The Manager. Arent't you here now?

The Son. It was his wish, and he dragged us along with him. He's told you not only the things that did happen, but also things that have never happened at all.

The Manager. Well, tell me then what did happen. You went out of your room without saying a word?

The Son. Without a word, so as to avoid a scene!

The Manager. And then what did you do?

The Son. Nothing . . . walking in the garden . . . [*Hesitates for a moment with expression of gloom.*]

The Manager [*coming closer to him, interested by his extraordinary reserve*]. Well, well . . . walking in the garden . . .

The Son [*exasperated*]. Why on earth do you insist? It's horrible! [*The MOTHER trembles, sobs, and looks towards the fountain.*]

The Manager [*slowly observing the glance and turning towards the SON with increasing apprehension*]. The baby?

The Son. There in the fountain . . .

The Father [*pointing with tender pity to the MOTHER*]. She was following him at the moment . . .

The Manager [*to the SON anxiously*]. And then you . . .

The Son. I ran over to her; I was jumping in to drag her out when I saw something that froze my blood . . . the boy standing stock still, with eyes like a madman's, watching his little drowned sister, in the fountain! [*The STEP-DAUGHTER bends over the fountain to hide the CHILD. She sobs.*] Then . . . [*A revolver shot rings out behind the trees where the BOY is hidden.*]

The Mother [*with a cry of terror runs over in that direction together with several of the ACTORS amid general confusion*]. My son! My son! [*Then amid the cries and exclamations one hears her voice.*] Help! Help!

The Manager [*pushing the ACTORS aside while THEY lift up the BOY and carry him off.*] Is he really wounded?

Some Actors. He's dead! dead!

Other Actors. No, no, it's only make believe, it's only pretence!

The Father [*with a terrible cry*]. Pretence? Reality, sir, reality!

The Manager. Pretence? Reality? To hell with it all! Never in my life has such a thing happened to me. I've lost a whole day over these people, a whole day!

Curtain.

LA CASA DE BERNARDA ALBA/THE HOUSE OF BERNARDA ALBA BY FEDERICO GARCIA LORCA IN SPANISH AND ENGLISH

I enjoy very much reading Federico Garcia Lorca in Spanish, he is one of my favorite playwrights, and I've seen many of his plays, but unfortunately not in Spain. I read Lorca's biography and I gave a summary of it in this book. One of his best plays is La casa de Bernarda Alba/The House of Bernarda Alba (written in 1936), here we bring the final scene.

Aparece Bernarda. Sale en enaguas con un mantón negro.)

Bernarda: Quietas, quietas. ¡Qué pobreza la mía, no poder tener un rayo entre los dedos!

Martirio: *(Señalando a Adela.)* ¡Estaba con él! ¡Mira esas enaguas llenas de paja de trigo!

Bernarda: ¡Esa es la cama de las mal nacidas! *(Se dirige furiosa hacia Adela.)*

Adela: *(Haciéndole frente.)* ¡Aquí se acabaron las voces de presidio! *(Adela arrebatada un bastón a su madre y lo parte en dos.)* Esto hago yo con la vara de la dominadora. No dé usted un paso más. ¡En mí no manda nadie más que Pepe!

(Sale Magdalena.)

Magdalena: ¡Adela!

(Salen la Poncia y Angustias.)

Adela: Yo soy su mujer. *(A Angustias.)* Entérate tú y ve al corral a decírselo. Él dominará toda esta casa. Ahí fuera está, respirando como si fuera un león.

Angustias: ¡Dios mío! Bernarda: ¡La escopeta! ¿Dónde está la escopeta? *(Sale corriendo.)*

(Aparece Amelia por el fondo, que mira aterrada, con la cabeza sobre la pared. Sale detrás Martirio.)

Adela: ¡Nadie podrá conmigo! *(Va a salir.)*

Angustias: *(Sujetándola.)* De aquí no sales con tu cuerpo en triunfo, ¡ladrona! ¡deshonra de nuestra casa!

Magdalena: ¡Déjala que se vaya donde no la veamos nunca más!

(Suena un disparo.)

Bernarda: *(Entrando.)* Atrévete a buscarlo ahora.

Martirio: *(Entrando.)* Se acabó Pepe el Romano.

Adela: ¡Pepe! ¡Dios mío! ¡Pepe! *(Sale corriendo.)*

La Poncia: ¿Pero lo habéis matado?

Martirio: ¡No! ¡Salió corriendo en la jaca!

Bernarda: No fue culpa mía. Una mujer no sabe apuntar.

Magdalena: ¿Por qué lo has dicho entonces?

Martirio: ¡Por ella! Hubiera volcado un río de sangre sobre su cabeza.

La Poncia: Maldita.

Magdalena: ¡Endemoniada!

Bernarda: Aunque es mejor así. *(Se oye como un golpe.)* ¡Adela! ¡Adela!

La Poncia: *(En la puerta.)* ¡Abre!

Bernarda: Abre. No creas que los muros defienden de la vergüenza.

Criada: *(Entrando.)* ¡Se han levantado los vecinos!

Bernarda: *(En voz baja, como un rugido.)* ¡Abre, porque echaré abajo la puerta! *(Pausa. Todo queda en silencio)* ¡Adela! *(Se retira de la puerta.)* ¡Trae un martillo! *(La Poncia da un empujón y entra. Al entrar da un grito y sale.)* ¿Qué?

La Poncia: *(Se lleva las manos al cuello.)* ¡Nunca tengamos ese fin!

(Las hermanas se echan hacia atrás. La Criada se santigua. Bernarda da un grito y avanza.)

La Poncia: ¡No entres!

Bernarda: No. ¡Yo no! Pepe: irás corriendo vivo por lo oscuro de las alamedas, pero otro día caerás. ¡Descolgarla! ¡Mi hija ha muerto virgen! Llévala a su cuarto y vestirla como si fuera doncella. ¡Nadie dirá nada! ¡Ella ha muerto virgen! Avisad que al amanecer den dos clamores las campanas.

Martirio: Dichosa ella mil veces que lo pudo tener.

Bernarda: Y no quiero llantos. La muerte hay que mirarla cara a cara. ¡Silencio! *(A otra hija.)* ¡A callar he dicho! *(A otra hija.)* Las lágrimas cuando estés sola. ¡Nos hundiremos todas en un mar de luto! Ella, la hija menor de Bernarda Alba, ha muerto virgen. ¿Me habéis oído? ¡Silencio, silencio he dicho! ¡Silencio!

Día viernes 19 de junio, 1936.

Telón rápido.

(Bernarda appears. She is wearing petticoats and a black shawl.)

BERNARDA: Quiet. Quiet. A pity I haven't a lightning bolt in my hand!

MARTIRIO: *(Pointing at Adela)* She was with him! Look at her petticoat covered with straw!

BERNARDA: A bed of straw is the bed of a whore! (*She approaches Adela angrily.*)

ADELA: (*Confronting her*) That's enough of your gaoler's voice! (*She takes hold of her mother's walking stick and breaks it in half.*) That's how I treat the tyrant's rod. Don't take another step. No one but Pepe can command me!

(*Magdalena appears.*)

MAGDALENA: Adela!

(*La Poncia and Angustias enter.*)

ADELA: I'm his woman. (*To Angustias*) Listen, go into the yard and tell him so. He'll rule this whole household. He's there now, breathing like a lion.

ANGUSTIAS: Dear God!

BERNARDA: The shotgun! Where's the shotgun? (*She exits in haste*)

(*Amelia enters upstage, looking on in terror, her head against the wall. Martirio exits.*)

ADELA: No one can stop me! (*She starts to exit.*)

ANGUSTIAS: (*Restraining her*) You'll not leave here in triumph, you thief, to dishonour our house!

MAGDALENA: Let her go: so that we'll never have to see her again!

(*A gunshot is heard.*)

BERNARDA: (*Entering*) Go on, look for him now if you dare!

MARTIRIO: (*Entering*) That's the last of Pepe el Romano.

ADELA: Pepe! My God! Pepe! (*She rushes out.*)

LA PONCIA: Did you finish him off?

MARTIRIO: No! He galloped off on his horse!

BERNARDA: It wasn't for want of trying. But we women are poor shots.

MAGDALENA: Why say such things, then!

MARTIRIO: For her benefit! I'd like to pour a whole river of blood over her head.

LA PONCIA: You witch.

MAGDALENA: You she-devil!

BERNARDA: It's better this way. (*A thud is heard.*) Adela! Adela!

LA PONCIA: (*At the door.*) Open up!

BERNARDA: Open up now. Don't think this house can hide your shame.

SERVANT: (*Entering*) You've woken the neighbours.

BERNARDA: (*In a low harsh voice*) Open the door, before I break it down! (*Pause. Total silence.*) Adela! (*She moves away from the door.*) Bring an axe! (*La Poncia pushes open the door and goes inside. She utters a scream and reappears.*) What is it?

LA PONCIA: (*Clasping her hands to her throat*) Pray God none of us may end like that!

(*The sisters shrink back. The servant crosses herself. Bernarda gives a cry and steps forward.*)

LA PONCIA: Don't go in!

BERNARDA: No. No, I shall not! Pepe: you may have fled for your life now through the dark branches, but one day you'll be brought low. Cut her down! My daughter died a virgin! Carry her to her room and dress her as a maiden. No one will dare say a word! She died a virgin! Tell them to ring the bells twice at dawn.

MARTIRIO: She was a thousand times fortunate: to have had him.

BERNARDA: And no tears. Death must be stared straight in the face. Silence! (*To another daughter*) Silence, I say! (*To another*) You can shed tears when you're alone. We'll drown ourselves in a sea of mourning! She, the youngest of Bernarda Alba's daughters died a virgin. Do you hear? Silence, Silence I say! Silence!
Curtain

Federico del Sagrado Corazón de Jesús García Lorca, known as **Federico García Lorca** (5/6/1898 – 19/8/1936) was a Spanish poet, playwright, and theatre director. García Lorca achieved international recognition as an emblematic member of the [Generation of '27](#). The Generation of '27 was a group consisting of mostly poets who introduced the tenets of European movements (such as symbolism, futurism, and surrealism) into Spanish literature. He was executed by [Nationalist](#) forces at the beginning of the [Spanish Civil War](#). His body has never been found. In 2008, a Spanish judge opened an investigation into Lorca's death. The García Lorca family eventually dropped objections to the excavation of a potential gravesite near [Alfacar](#), but no human remains were found. While touring with *La Barraca*, García Lorca wrote his now best-known plays, the *Rural Trilogy* of [Bodas de Sangre](#) ([Blood Wedding](#)), [Yerma](#) and [La Casa de Bernarda Alba](#) ([The House of Bernarda Alba](#)), which all rebelled against the norms of bourgeois Spanish society. He called for a rediscovery of the roots of European theatre and the questioning of comfortable conventions such as the popular drawing room comedies of the time. His work challenged the accepted role of women in society and explored taboo issues of homoeroticism and class. García Lorca wrote little poetry in this last period of his life, declaring in 1936, "theatre is poetry that rises from the book and

becomes human enough to talk and shout, weep and despair.” Although Lorca's artwork doesn't receive attention he was also a keen artist.

FROEKEN JULIE/MISS JULIE BY AUGUST STRINDBERG IN SWEDISH & ENGLISH

Strindberg was for me a revelation. I love Ibsen, as he appeals to my brains, he is intellectual, a social fighter, but Strindberg is a master in the language of theater, he grasps you by the guts, something similar to the juxtaposition of Arthur Miller versus Tennessee Williams. In Miss Julie (1889), nothing happens, or rather everything happens in the mind of Miss Julie, a modern masterpiece. I saw it several times at the theater and on the Internet in Swedish and in other languages, but nothing can compare with the original.

Det ringer två skarpa slag i klockan; Fröken störtar upp; Jean byter om rock.

JEAN

Greven är hemma! -Tänk om Kristin ---

Går till talröret; knackar och lyss

FRÖKEN

Nu har han varit i chiffonjén?

JEAN

Det är Jean! herr greve!

Lyss (Obs.: åskådaren hör icke vad greven talar.)

Ja, herr greven!

Lyss.

Ja, herr greven! Straxt!

Lyss.

-Genast, herr greven!

Lyss.

-Jaha! Om en halv timme!

FRÖKEN

ytterligt ängslig.

Vad sa han? Herre Jesus, vad sa han?

JEAN

Han begärde sina stövlar och sitt kaffe om en halvtimme!

FRÖKEN

Alltså om en halv timme! åh, jag är så trött; jag förmår ingenting, förmår inte ångra mig, inte fly, inte stanna, inte leva - inte dö! Hjälp mig nu! Befall mig, och jag ska lyda som en hund! Gör mig den sista tjänsten, rädda min ära, rädda hans namn! Ni vet vad jag skulle vilja, men inte vill, vill det, ni, och befall mig utföra det!

JEAN

Jag vet inte - men nu kan jag inte heller - jag förstår inte - det är alldeles som om den här rocken gjorde att - jag inte kan befälla över er - och nu, sen greven talte till mig - så - jag kan inte redogöra för det riktigt - men - ah det är den djävla drängen som sitter i ryggen på mig! -

Jag tror att om greven kom ner nu- och befallde mig skära halsen av mig, så skulle jag göra det på stället.

FRÖKEN

Låtsas då att ni är han, och jag är ni! - ni kunde ju spela nyss så bra, när ni låg på knä - då var ni adelsmannen - eller - har ni aldrig varit på teatern och sett magnetisören -

Jakande gest av Jean.

han säger åt subjektet: tag kvasten; han tar den; han säger: sopa, och den sopar---

JEAN

Då måste ju den andre sova!

FRÖKEN

extatisk.

Jag sover redan - hela rummet står som en rök för mig och ni ser ut som en järnkamin som liknar en svartklädd man i hög hatt - och era ögon lysa som kolen när elden går ut - och ert ansikte är en vit fläck som falaskan -

Solskenet har nu fallit in på golvet och lyser på Jean.

- det är så varmt och gott -

Hon gnuggar händerna som om hon värmdes framför en eld.

- och så ljust - och så lugnt!

JEAN

tar rakkniven och sätter i hennes hand.

Där är kvasten! Gå nu medan det är ljust - ut på logen - och ...

Viskar i hennes öra

FRÖKEN

vaken.

Tack! Nu går jag till vila! Men säg nu bara - att de främsta också kunna få nådens gåva. Säg det, om ni också inte tror det!

JEAN

De främsta? Nej, det kan jag inte! -Men vänta - fröken Julie -nu vet jag! -Ni är ju icke längre bland de främsta - då ni är bland de - yttersta!

FRÖKEN

Det är sant. -Jag är bland de allra yttersta; jag är den yttersta! åh! - Men nu kan jag icke gå - Säg en gång till att jag skall gå!

JEAN

Nej, nu kan inte jag heller! Jag kan inte!

FRÖKEN

Och de främsta skola vara de yttersta!

JEAN

Tänk inte, tänk inte! Ni tar ju all min kraft från mig också, så att jag blir feg - vad, jag tyckte klockan rörde sig! -Nej! Ska vi sätta papper i den! -- Att vara så rädd för en ringklocka! -Ja men det är inte bara en klocka - det sitter någon bakom den - en hand sätter den i rörelse - och

något annat sätter handen i rörelse - men håll för örona bara - håll för örona! Ja så ringer han ändå värre! - ringer bara ända tills man svarar - och då är det för sent! och så kommer länsman - och så...

Två starka ringningar i klockan.

Jean far tillsammans; därpå rätar han upp sig.

Det är rysligt! Men det finns intet annat slut! -Gå!

Fröken går bestämt ut genom dörren. Riddå.

[Two sharp rings on bell are heard. Julie starts to her feet. Jean changes his coat.]

JEAN. The Count—has returned. Think if Kristin has— [Goes up to speaking tube and listens.]

JULIE. Now he has seen the desk!

JEAN [Speaking in the tube]. It is Jean, Excellency. [Listens]. Yes, Excellency. [Listens]. Yes, Excellency,—right away—immediately, Excellency. Yes—in half an hour.

JULIE [In great agitation]. What did he say? In Heaven's name, what did he say?

JEAN. He wants his boots and coffee in a half hour.

JULIE. In half an hour then. Oh, I'm so tired—I'm incapable of feeling, not able to be sorry, not able to go, not able to stay, not able to live—not able to die. Help me now. Command me—I will obey like a dog. Do me this last service—save my honor. Save his name. You know what I have the will to do—but cannot do. You will it and command me to execute your will.

JEAN. I don't know why—but now I can't either.—I don't understand myself. It is absolutely as though this coat does it—but I can't command you now. And since the Count spoke to me— —I can't account for it—but oh, it is that damned servant in my back—I believe if the Count came in here now and told me to cut my throat I would do it on the spot.

JULIE. Make believe you are he—and I you. You could act so well a little while ago when you knelt at my feet. Then you were a nobleman—or haven't you ever been at the theatre and seen the hypnotist—[Jean nods] He says to his subject "Take the broom," and he takes it; he says, "Sweep," and he sweeps.

JEAN. Then the subject must be asleep!

JULIE [Ecstatically]. I sleep already. The whole room is like smoke before me—and you are like a tall black stove, like a man clad in black clothes with a high hat; and your eyes gleam like the hot coals when the fire is dying; and your face a white spot like fallen ashes. [The sunshine is coming in through the windows and falls on Jean. Julie rubs her hands as though warming them before a fire]. It is so warm and good—and so bright and quiet!

JEAN [Takes razor and puts it in her hand]. There is the broom, go now while it's bright—out to the hay loft—and—[He whispers in her ear.]

JULIE [Rousing herself]. Thanks. And now I go to rest. But tell me this—the foremost may receive the gift of Grace? Say it, even if you don't believe it.

JEAN. The foremost? No, I can't say that. But wait, Miss Julie—you are no longer among the foremost since you are of the lowliest.

JULIE. That's true, I am the lowliest—the lowliest of the lowly. Oh, now I can't go. Tell me once more that I must go.

JEAN. No, now I cannot either—I cannot.

JULIE. And the first shall be last— — —

JEAN. Don't think. You take my strength from me, too, so that I become cowardly.— What— —I thought I heard the bell!— — No! To be afraid of the sound of a bell! But it's not the bell—it's someone behind the bell, the hand that sets the bell in motion—and something else that sets the hand in motion. But stop your ears, stop your ears. Then he will only ring louder and keep on ringing until it's answered—and then it is too late! Then come the police and then—[Two loud rings on bell are heard, Jean falls in a heap for a moment, but straightens up immediately.] It is horrible! But there is no other way. Go!

[Countess Julie goes out resolutely.] CURTAIN.

ТРИ СЕСТРЫ, TRI SESTRY, THREE SISTERS BY ANTON CHEKHOV IN RUSSIAN AND ENGLISH

I have seen so many times plays by Anton Chekhov, as Israel's theater is still very much influenced by the Russian theater and plays. Our national theater Habimah was established in Russia and from there the actors came to Israel and until the end they still spoke Hebrew with a Russian accent. Gesher, one of the best Israeli companies is managed, directed and mostly acted by Russian immigrants. I have seen Three Sisters (1901) several times and read it as well, but I want to tell the story of my son Amir who doesn't speak a word of French, still as he spent with me a couple of weeks in Paris, I took him to see plays and musicals in French. One of the nights we went to see the play in a small theater [Le Theatre du Nord-Ouest](#). It is one of the best theaters in Paris, and as it is so small, they can afford to perform all the plays by well-known playwrights, you buy a subscription at a very low price and you can see all the plays by Racine, by Chekhov or by Sartre. I told Amir what was the plot of Three Sisters, warned him that the play is very long, about three hours, nothing melodramatic happens (unlike Cyrano for example), and he could be bored, but he was happy to experience the challenge. And, indeed he was moved to tears by the actresses who were magnificent, and he understood the play perfectly well by his senses rather than by his brains. But this was not the only time that I took him to see plays. When he was 13 I took him to a Bar Mitzvah trip to London, and there he saw every night for ten days plays by Shakespeare, Ibsen (Peer Gynt, no less), modern plays and musicals (Show Boat). In the morning we went to the best museums, and I allowed him once to go by himself to Madame Tussaud. When we came back to Israel, Amir was an intellectual, and since then he reads the best novels, sees the best plays and classic films. That is how I perceive education, you have to be assertive with your children, and direct them to the right path, and not be permissive and let the children decide what they want to do, without letting the parents interfere. Ruthy and me were quite successful in this respect. We try with less success to influence our grandchildren...

Входит Н а т а ш а .

Н а т а ш а (*горничной*). Что? С Софочкой посидит Протопопов, Михаил Иванович, а Бобика пусть покатает Андрей Сергеич. Столько хлопот с детьми... (*Ирине.*) Ты завтра уезжаешь, Ирина,— такая жалость. Останься еще хоть недельку. (*Увидев Кулыгина, вскрикивает; тот смеется и снимает усы и бороду.*) Ну вас совсем, испугали! (*Ирине.*) Я к тебе привыкла и расстаться с тобой, ты думаешь, мне будет легко? В твою комнату я велю переселить Андрея с его скрипкой — пусть там пилит! — а в его комнату мы поместим Софочку. Дивный, чудный ребенок! Что за девчурочка! Сегодня она посмотрела на меня своими глазками и — «мама»!
Кулыгин. Прекрасный ребенок, это верно.

Н а т а ш а . Значит, завтра я уже одна тут. *(Вздыхает.)* Велю прежде всего срубить эту еловую аллею, потом вот этот клен. По вечерам он такой страшный, некрасивый... *(Ирине.)* Милая, совсем не к лицу тебе этот пояс... Это безвкусица. Надо что-нибудь светленькое. И тут везде я велю понасажать цветочков, цветочков, и будет запах... *(Строго.)* Зачем здесь на скамье валяется вилка? *(Проходя в дом, горничной.)* Зачем здесь на скамье валяется вилка, я спрашиваю? *(Кричит.)* Молчать!

К у л ы г и н . Разошлась!

За сценой музыка играет марш; все слушают.

О л ь г а . Уходят.

Входит Ч е б у т ы к и н .

М а ш а . Уходят наши. Ну, что ж... Счастливый им путь! *(Мужу.)* Надо домой... Где моя шляпа и тальма...

К у л ы г и н . Я в дом отнес... Принесу сейчас. *(Уходит в дом.)*

О л ь г а . Да, теперь можно по домам. Пора.

Ч е б у т ы к и н . Ольга Сергеевна!

О л ь г а . Что?

Пауза.

Что?

Ч е б у т ы к и н . Ничего... Не знаю, как сказать вам... *(Шепчет ей на ухо.)*

О л ь г а *(в испуге)*. Не может быть!

Ч е б у т ы к и н . Да... такая история... Утомился я, замучился, больше не хочу говорить... *(С досадой.)* Впрочем, все равно!

М а ш а . Что случилось?

О л ь г а *(обнимает Ирину)*. Ужасный сегодня день... Я не знаю, как тебе сказать, моя дорогая...

И р и н а . Что? Говорите скорей: что? Бога ради! *(Плачет.)*

Ч е б у т ы к и н . Сейчас на дуэли убит барон.

И р и н а . Я знала, я знала...

Ч е б у т ы к и н *(в глубине сцены садится на скамью)*. Утомился... *(Вынимает из кармана газету.)* Пусть поплачут... *(Тихо напевает.)* Та-ра-ра-бумбия... сажу на тумбе я... Не все ли равно!

Три сестры стоят, прижавшись друг к другу.

М а ш а . О, как играет музыка! Они уходят от нас, один ушел совсем, совсем навсегда, мы останемся одни, чтобы начать нашу жизнь снова. Надо жить... Надо жить...

И р и н а *(кладет голову на грудь Ольге)*. Придет время, все узнают, зачем все это, для чего эти страдания, никаких не будет тайн, а пока надо жить... надо работать, только работать! Завтра я поеду одна, буду учить в школе и всю свою жизнь отдам тем, кому она, быть может, нужна. Теперь осень, скоро придет зима, засыплет снегом, а я буду работать, буду работать...

О л ь г а *(обнимает обеих сестер)*. Музыка играет так весело, бодро, и хочется жить! О, боже мой! Пройдет время, и мы уйдем навеки, нас забудут, забудут наши лица, голоса и сколько нас было, но страдания наши перейдут в радость для тех, кто будет жить после нас, счастье и мир настанут на земле, и помянут добрым словом и благословят тех, кто живет теперь. О, милые сестры, жизнь наша еще не кончена. Будем жить! Музыка играет так весело, так радостно, и, кажется, еще немного, и мы узнаем, зачем мы живем, зачем страдаем... Если бы знать, если бы знать!

Музыка играет все тише и тише; К у л ы г и н , веселый, улыбающийся, несет шляпу и тальму. А н д р е й

везет другую колясочку, в которой сидит Бобик.

Чебутикин (*тихо напевает*). Тара... ра... бумбия... сижу на тумбе я... (*Читает газету.*) Все равно! Все равно!

О л ь г а . Если бы знать, если бы знать!

Занавес

[Enter NATASHA.]

NATASHA. [To the maid] What? Mihail Ivanitch Protopopov will sit with little Sophie, and Andrey Sergeyevitch can take little Bobby out. Children are such a bother.... [To IRINA] Irina, it's such a pity you're going away to-morrow. Do stop just another week. [Sees KULIGIN and screams; he laughs and takes off his beard and whiskers] How you frightened me! [To IRINA] I've grown used to you and do you think it will be easy for me to part from you? I'm going to have Andrey and his violin put into your room—let him fiddle away in there!—and we'll put little Sophie into his room. The beautiful, lovely child! What a little girlie! To-day she looked at me with such pretty eyes and said "Mamma!"

KULIGIN. A beautiful child, it's quite true.

NATASHA. That means I shall have the place to myself to-morrow. [Sighs] In the first place I shall have that avenue of fir-trees cut down, then that maple. It's so ugly at nights.... [To IRINA] That belt doesn't suit you at all, dear.... It's an error of taste. And I'll give orders to have lots and lots of little flowers planted here, and they'll smell.... [Severely] Why is there a fork lying about here on the seat? [Going towards the house, to the maid] Why is there a fork lying about here on the seat, I say? [Shouts] Don't you dare to answer me!

KULIGIN. Temper! temper! [A march is played off; they all listen.]

OLGA. They're going.

[CHEBUTIKIN comes in.]

MASHA. They're going. Well, well.... Bon voyage! [To her husband] We must be going home.... Where's my coat and hat?

KULIGIN. I took them in... I'll bring them, in a moment.

OLGA. Yes, now we can all go home. It's time.

CHEBUTIKIN. Olga Sergeyevna!

OLGA. What is it? [Pause] What is it?

CHEBUTIKIN. Nothing... I don't know how to tell you.... [Whispers to her.]

OLGA. [Frightened] It can't be true!

CHEBUTIKIN. Yes... such a story... I'm tired out, exhausted, I won't say any more.... [Sadly] Still, it's all the same!

MASHA. What's happened?

OLGA. [Embraces IRINA] This is a terrible day... I don't know how to tell you, dear....

IRINA. What is it? Tell me quickly, what is it? For God's sake! [Cries.]

CHEBUTIKIN. The Baron was killed in the duel just now.

IRINA. [Cries softly] I knew it, I knew it....

CHEBUTIKIN. [Sits on a bench at the back of the stage] I'm tired.... [Takes a paper from his pocket] Let 'em cry.... [Sings softly] "Tarara-boom-deay, it is my washing day...." Isn't it all the same!

[The three sisters are standing, pressing against one another.]

MASHA. Oh, how the music plays! They are leaving us, one has quite left us, quite and for ever. We remain alone, to begin our life over again. We must live... we must live....

IRINA. [Puts her head on OLGA's bosom] There will come a time when everybody will know why, for what purpose, there is all this suffering, and there will be no more mysteries. But now we must live... we must work, just work! To-morrow, I'll go away alone, and I'll teach and give my whole life to those who, perhaps, need it. It's autumn now, soon it will be winter, the snow will cover everything, and I shall be working, working....

OLGA. [Embraces both her sisters] The bands are playing so gaily, so bravely, and one does so want to live! Oh, my God! Time will pass on, and we shall depart for ever, we shall be forgotten; they will forget our faces, voices, and even how many there were of us, but our sufferings will turn into joy for those who will live after us, happiness and peace will reign on earth, and people will remember with kindly words, and bless those who are living now. Oh dear sisters, our life is not yet at an end. Let us live. The music is so gay, so joyful, and, it seems that in a little while we shall know why we are living, why we are suffering.... If we could only know, if we could only know!

[The music has been growing softer and softer; KULIGIN, smiling happily, brings out the hat and coat; ANDREY wheels out the perambulator in which BOBBY is sitting.]

CHEBUTIKIN. [Sings softly] "Tara... ra-boom-deay.... It is my washing-day..." [Reads a paper] It's all the same! It's all the same!

OLGA. If only we could know, if only we could know! Curtain.

Anton Pavlovich Chekhov ([Russian](#): Анто́н Па́влович Че́хов , 29 January 186 – 15 July 1904) was a Russian [playwright](#) and short story writer who is considered to be among the greatest writers of short fiction in history. His career as a playwright produced four classics and his best short stories are held in high esteem by writers and critics. Along with [Henrik Ibsen](#) and [August Strindberg](#), Chekhov is often referred to as one of the three seminal figures in the birth of early modernism in the theater. Chekhov practiced as a [medical doctor](#) throughout most of his literary career: "Medicine is my lawful wife", he once said, "and literature is my mistress." Chekhov renounced the theatre after the disastrous reception of [The Seagull](#) in 1896, but the play was revived to acclaim in 1898 by [Constantin Stanislavski's Moscow Art Theatre](#), which subsequently also produced Chekhov's [Uncle Vanya](#) and premiered his last two plays, [Three Sisters](#) and [The Cherry Orchard](#). These four works present a challenge to the acting ensemble as well as to audiences, because in place of conventional action Chekhov offers a "theatre of mood" and a "submerged life in the text". Chekhov had at first written stories only for financial gain, but as his artistic ambition grew, he made formal innovations which have influenced the evolution of the modern short story. He made no apologies for the difficulties this posed to readers, insisting that the role of an artist was to ask questions, not to answer them. Although Chekhov did not fully realize it at

the time, Chekhov's plays, such as "The Seagull" (written in 1895), "Uncle Vanya" (written in 1897), "The Three Sisters" (written in 1900), and "The Cherry Orchard" (written in 1903) served as a revolutionary backbone to what is common sense to the medium of acting to this day: an effort to recreate and express the "realism" of how people truly act and speak with each other and translating it to the stage in order to manifest the human condition as accurately as possible in hopes to make the audience reflect upon their own definition of what it means to be human, warts and all. This philosophy of approaching the art of acting has stood not only steadfast, but as the cornerstone of acting for much of the 20th century to this day. Mikhail Chekhov considered *Ivanov* a key moment in his brother's intellectual development and literary career. From this period comes an observation of Chekhov's that has become known as "[Chekhov's gun](#)", a dramatic principle that requires that every element in a narrative be necessary and irreplaceable, and that everything else be removed.

DRAMA IN LADINO – TRANSLATION INTO ENGLISH, YOSEF AVRAAAM PAPO –
TRANSLATION OF ATHALIE BY RACINE– FRENCH & LADINO, THE ORIGINAL
PLAY LA VINYA DE NAVOT/THE VINEYARD OF NAVOT IN LADINO, POEM TO
RUTHY

We wrote about the famous play *Dybbuk* in the Yiddish chapter and brought texts in Yiddish and English. But also in Ladino there was a great [effervescence in the US](#), Israel and other countries. I already wrote how the first book that I read in Ladino was *Romeo i Julieta* in a translation in Rashi letters made in Greece. In the 1930s, one of the overriding concerns of the Sephardic colony was the escalating violence against the European Jewish people by the Nazis and their collaborators. *La Vara*, at the time the Nazis rose to power, was the only surviving Ladino newspaper in the United States, and is thus a major source chronicling the involvement of American Sephardic Jews in Holocaust relief efforts. Esther Cohen's community expressed its distress about Nazi persecution of Jews through a performance in June of 1938, sponsored by a number of New Lots Sephardic organizations to benefit the United Palestine Fund. The play, *Baron Lenzer of Germany*, was based on issues of assimilation within German Jewish society and was directed by Cohen's husband, Victor, and R. Albert Nahoum. Esther Cohen played the role of a servant employed in the house of Baron Lenzer, an assimilated German Jew. In one scene, she recited a dirge bemoaning Nazi brutality and pleading for the repatriation of the Jewish people in the land of Israel. Cohen, who composed the lyrics herself, sang the solo to the tune of "Eli, Eli" and, as *La Vara* reported, "moved the audience intensely." The verses, transliterated and translated from the Ladino, read as follows:

Diós de los sielos, arekoje tu puevlo,

Aronjados por los Romanos,

Matados por los Jermanos.

Dámos libertad, dámos un lugar para repozar.

Diós de los sielos, estamos mucho sufriendo,

Mándamos un regmidor, mándamos la salvasión.

Dámos libertad, damos un lugar para repozar.

Diós de los sielos, perdónamos nuestros yeros.

Mira a tus kreados, arastando i yorando,

Mira a Hitler ke se está vengando,

Dámos libertad, dámos un lugar para repozar.

God of the heavens, restore life unto Your people,

Thrown out by the Romans, Murdered by the Germans.

Grant us liberty, grant us a place of respite.

God of the heavens, we suffer greatly!

Send us a savior, send us salvation!

Grant us liberty, grant us a place of respite.

God of the heavens, pardon our errors,

Look upon Your creatures, wandering and wailing,

Look upon Hitler, who is wreaking his vengeance.

Grant us liberty, grant us a place of respite.

And here we bring an extract of a translation made by Yosef Avraam Papo to *Athalie* by Racine, which was the basis for his monumental play *La Vinya de Navot* (the vineyard of Navot). I read the play which I have in my library in Rashi letters. Papo was from Ruschuk, Bulgaria (we visited the town in our trip to the Balkans and spoke there of [Elias Canetti](#), another prominent Sephardi Jew born in this famous town who received the Nobel Prize but who wrote in German – I read one of his books *Auto-da-Fe*). Papo lived between 1865 to 1923 and besides translating *Athalie* by Racine (see below), he translated other plays from French as *Shaul* by Lamartine, and wrote besides *La Vinya de Navot* – the play *Miriam la Hashmonea*. *La Vinya de Navot* (1909) by Papo is in verses, but Racine's influence is only in the composition of the protagonists and the construction of the action.

[Shena tersera]

[Yeoyada:] enteramente aboreser la verdad.
 Vos amostrarán la virtud en una afroza imaje,
 Siendo eyos supieron azer trazayerar mizmo el mas savio
 de los reyes.
 Prometed, dunke, sovre este livro i delante todos estos
 testimonios
 Ke el Dio sera siempre el primo de vuestros kudios,
 Ke seresh sev[e]ro kon los malos, i el abrigo de los
 buenos,
 Entre el prove i vos, tomaresh el Dio por justador.

Acte IV Scène III

Yoad: Ils vous feront enfin haïr la vérité, Vous
 peindront la vertu sous une affreuse image.
 Hélas! ils ont des rois égaré le plus sage.
 Promettez sur ce livre, et devant ces témoins,
 Que Dieu sera toujours le premier de vos soins;
 Que sévère aux méchants, et des bons le refuge,
 Entre le pauvre et vous, vous prendrez
 Dieu pour juge.
 Vous souvenant mon fils, que caché sous ce lin,
 Comme eux vous fûtes pauvre, et comme eux orphelin

<p>En akodrandovos mi ijo ke</p> <p>Komo eyos un dia fuistesh prove, i komo eyos guerfano.</p> <p>Yoash: (djurando sovre el libro) Yo prometo de observar todo lo ke la Ley ordena. Mi Dio kastigadme siriozamente si yo vos abandono i me olvido de vuestra Ley.</p> <p>Yeoyada: Venid rey a untarvos kon la azeite Santa, I vos Jozabet, aparesid, venid mostradvosh entre nozotros.</p> <p>Shena kuatrena Yoash, Yeoyada, Jozabet, Zeharia, Shelomit, Azaria, Yishmael, tres kapos de los Leviyim i el koro</p> <p>Jozabet: O rey, ijo de David!</p> <p>Yoash: O mi unika madre!</p> <p>Zeharia, ven abrasar a tu ermano!</p> <p>Jozabet: Mi ijo, enkorvate a los pies de tu rey.</p> <p>Yeoyada: Ijikos, puedrash vozotros amarvos siempre este modo.</p> <p>Jozabet: (a Yoash) Ya savesh vos kuala sangre vos a dado la vida?</p> <p>Yoash: O si, ya se mizmo kuala mano me keria matar, i ke es grasias a vuestras asistensia ke yo bivo.</p>	<p>Joas: Je promets d'observer ce que la loi m'ordonne Mon Dieu, punissez-moi si je vous abandonne .</p> <p>Joad: Venez: de l'huile sainte il faut vous consacrer Paraissez. Josabet: vous pouvez vous montrer .</p> <p>Acte IV Scène IV Joas, Joad, Josabet, Zacharie, Azarias, Etc., Salomith, Le Choeur</p> <p>Josabet: Ô Roi, fils de David!</p> <p>Joas: O mon unique mère! Venez, cher Zacharie, embrasser votre frère.</p> <p>Josabet: (à Zacharie) Aux pieds de votre roi prosternez-vous, mon fils.</p> <p>Joad: (pendant qu'ils s'embrassent) Enfants, ainsi toujours puissiez-vous être unis!</p> <p>Josabet: (à Joas) Vous savez donc quel sang vous a donné la vie?</p> <p>Joas: Et je sais quelle main sans vous me l'eût ravie</p>
-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

The monumental book of Elena Romero on the Sephardi theater was published in three parts in Madrid 1979: [El Teatro de los Sefardies Orientales](#). Romero found 201 dramas en Ladino – 91 original plays, 64 – translated plays, 45 – works in Ladino that their origin is not known. She found 44 authors, 28 translators and 5 (including Papo) who were original authors and translators as well. I bring below an extract of La Vinya de Navot in Ladino written in Latin alphabet, although it was written originally in Rashi writing, which today is very difficult to read. The extract is the last scene, which is an ode to the king and queen who reign in justice and vanquished malice and evil. As you can see it is in verse, in the classical style of Racine.

Todos

Biva el rey! Biva la reina! Biva la djustisia!

Abasho la inikuidad! Abasho la malisia!

(forman un kortejo para irsen al palasio, el rey i la reina adelante i todos detrás van rodeando por la esena i kantando en kaminando avagar avagar a la luz del pigal en boz de שאו שערים ראשיכם)

Dio alto i temerozo, djusto i maraviozo,

Te rendemos a millones grasias i alavaciones!

Nuestra tierra destruyida, nase, torna a la vida.

Por gozar kon su rey nuevo, ke es muy bravo mansevo. (gritan)

Biva el rey! Biva la reina! Biva la djustisia!

Abasho la inikuidad! Abasho la malisia! (kantan en boz de "שובב ציון")

Kanta Israel por tu rehmission,

Ya vino goel para tu nasion.

Nuestro Dio fiel, kon su bendision,

Ara korrer miel dientro de Shomron.

Nos alegrara kon el nuevo rey

I nos atara kon su santa ley.

Nos kontentara kon su dulce fey.

Torna nos dira: "Tu mi pueblo sey!"

Kanta Israel por tu rehmission

Ya vino goel para tu nasion! (gritan)

Biva el rey! Biva la reina! Biva la djustisia!

Abasho la inikuidad! Abasho la malisia! (kantan en boz de "צור שוכן עלי שמים")

Efrayim kon grande gozo, kanta este dia ermozo!
 Vate para la kampanya, i grita en la montanya
 Ke dios te tiro su sanya i te rindio muy orocho.
 Efrayim, kon grande gozo, kanta este dia ermozo!
 Ye'hu en Dios se arima, i atrae su estima,
 Kon una reina sublima, forma un par muy glorioso
 Efrayim, kon grande gozo, kanta este dia ermozo! (gritan)
 Biva el rey! Biva la reina! Biva la djustisia!
 Abasho la inikuidad! Abasho la malisia!
 [Fin]

Finally, I would like to bring here my humble contribution to Ladino poetry, the poem "Onde estas mujer kerida" – "Where are you beloved wife", that I wrote to my wife Ruthy on the occasion of her birthday on 18/1/2000, that was published in [Aki Yerushalayim in 2005](#), in Ladinokomunita, and on other occasions, in which I praise all her merits – how she assists her dying father at the hospital, her bereaved mother, her children, her grandson, her pupils, how she visits the tumb of her grandmother, how she cares for everybody in innumerable good deeds...

Ma por ti marido kerido – But for you dear husband
 Tengo la mas grande mitsva – I do the greatest "mitsva"/good deed (in Ladino, Yiddish, Hebrew)
 Amarte sin fin – loving you forever
 En siendo siempre fiel. – and being always faithful.

I si no tengo muncho tiempo para ti – And if I don't have much time for you
 Ke sepas que sos todo mi mundo - you should know that you are all my world
 I si ago tantas mitsvot para todos – and if I do so many "mitsvot"/good deeds for everybody
 Es para rengrasiar a Dios ke me regalo a ti !– it is to thank God who gave you as a present to me.

Onde estas mujer kerida? איפה את אשתי היקרה

Onde estas mujer kerida? איפה את אשתי היקרה

Andjel, amor, onde estas? מלאכי, אהובתי, אייך

Un momento esto kon mi padre רגע אחד אני עם אבי

Ke esta hazino en el eshpital, הגוסס בבית החולים

Lo ayudo, le do a komer, מאכילה אותו, מסייעת לו,

Le ago karizias, lo konsolo. מלטפת אותו, מנחמת אותו.

En el otro vijito a mi madre ברגע הבא מבקרת אני את אמי

Ke esta sola en kaza, שנותרה לבדה בביתה,

Para konfortarla על מנת לחזק אותה

I darle koraje. ולנסוך בה אומץ רוח.

Despues me vo a mi nuera אחר כך אני הולכת לכלתי

Ke pario ayer un ijo tempranero, שילדה אמש פג בטרם עת,

I la embezo ke deve azer ואני מלמדת אותה מה עליה לעשות

En este tiempo difisil. בעתות קשות אלה.

Me vo tambien a mi ijo גם כן לבני

Traerle a komer מביאה לו אוכל

Lavarle la ropa מכבסת את בגדיו

Limpiarle la kaza. מנקה את ביתו.

Ma tengo tambien ke lavorar אך עלי גם לעבוד

Y ensenyar a los elevos ולחנך את תלמידי

Amarles komo mis ijos לאהוב אותם כמו את ילדי

Darles mi alma. לתת להם את נשמתי.

No ulvido vijitar איני שוכחת לבקר

La tomba de mi nona את קברה של סבתי

Meterle flores מביאה לה פרחים

Insindiendo kandelas de neshama. מדליקה לה נרות נשמה.

Aziendo muchas mitsvot עושה מצוות רבות

En una semana בשבוע אחד

Ke otras azen שאחרות עושות

En una vida entera... במשך חיים שלמים

Ma por ti marido kerido אבל עבורך בעלי היקר

Tengo la mas grande mitsva : אני עושה את המצווה הגדולה מכולן :

Amarte sin fin לאהוב אותך ללא קץ

En siendo siempre fiel. ולהישאר תמיד נאמנה לך.

I si no tengo mucho tiempo para ti ואם אין לי זמן רב להקדיש לך

Ke sepas que sos todo mi mundo עליך לדעת שאתה כל עולמי

I si ago tantas mitsvot para todos ואם עושה אני כה הרבה מצוות עבור כולם

Es para rengrasiar a Dios ke me regalo a ti ! זה בשביל להודות לאל על שהעניק לי אותך במתנה !

Jacques Cory יעקב קורי

ON THE LANGUAGE CATALAN, TERRA BAIXA BY ANGEL GUIMERA IN CATALAN AND SPANISH

Angel Guimera is one of [the most renowned playwrights](#) in Catalan. The literary career of Àngel Guimerà (1845 – 1924) is closely linked with the consolidation of the political and cultural movement known as the Renaixença. He was one of its most outstanding figures, both in its creative aspects, especially in theatre, and as an activist championing Catalan language and literature. He was steadfast in his militant support for Catalan nationalism at the time, a man of peace and supporter of – very often idealised – confraternity in years of great social tension. He did not dodge contentious issues, from anarchist attacks through to more genuinely Christian positions than those taken by the official Church at the time. He always showed his concern about the forms of injustice and hypocrisy that condition human life, all of which made him a popular writer, admired by a very broad spectrum of society. We bring here an extract of his play Terra Baixa (1896) with a translation into Spanish (there are also translations into Italian and German). I have in my library several books by Guimera and I have read his play Mar i Cel.

Catalan is a [Romance language](#) named for its origins in [Catalonia](#), in what is northeastern [Spain](#) and adjoining parts of [France](#). It is the national and only official language of [Andorra](#),^[5] and a co-official language of the Spanish [autonomous communities](#) of [Catalonia](#), the [Balearic Islands](#), and the [Valencian Community](#) (where the language is known as [Valencian](#), and there exist regional standards). It also has semi-official status in the city of [Alghero](#) on the [Italian](#) island of [Sardinia](#). It is also spoken with no official recognition in parts of the Spanish autonomous communities of [Aragon](#) ([La Franja](#)) and [Murcia](#) ([Carche](#)), and in the historic French region of [Roussillon/Northern Catalonia](#), roughly equivalent to the [department](#) of [Pyrénées-Orientales](#). According to the Statistical Institute of Catalonia in 2008 the Catalan language is the second most commonly used in Catalonia, after [Spanish](#), as a native or self-defining language. The Generalitat of Catalunya spends part of its annual budget on the promotion of the use of Catalan in Catalonia and in other territories. There are 4.1 million

native speakers of Catalan in Catalonia, Valencia provinces, Balearic Islands, Andorra, etc., and 5.1 million speakers as a second language. It is amazing how the Catalonians have succeeded to establish this language as the most spoken language in Catalonia, if we remember that Franco banned the language. It can be compared to the renaissance of the Hebrew language in Israel, and the Irish people have a lot to learn from the Catalonians as their success in instituting Irish as a spoken language is so low.

Catalan evolved from [Vulgar Latin](#) around the eastern [Pyrenees](#) in the 9th century. During the [Low Middle Ages](#) it saw a golden age as the literary and dominant language of the [Crown of Aragon](#), and was widely used all over the [Mediterranean](#). The union of Aragon with the other territories of [Spain](#) in 1479 marked the start of the decline of the language. In 1659 Spain ceded [Northern Catalonia](#) to [France](#), and Catalan was banned in both states in the early 18th century. 19th-century Spain saw a [Catalan literary revival](#), which culminated in the 1913 orthographic standardization, and the officialization of the language during the [Second Spanish Republic](#) (1931–39). However, the [Francoist dictatorship](#) (1939–75) banned the language again. Since the [Spanish transition to democracy](#) (1975–1982), Catalan has been recognized as an official language, language of education, of mass media, all of which have contributed to its increased prestige. There is no parallel in Europe of such a large, [bilingual](#), [non-state](#) speech community.

Terra Baixa

ESCENA VIII

[...]

MARTA: Manelic!... Que... el dinar ja és a taula.

MANELIC: Ah, sí; el dinar. El dinar. (*S'ha acostat a la taula i comença a llescar pa. Mentrestant la Marta ha anat a la llar. A part.*) I que no costa gaire, no, de degollar a un home! I an ella... an ella menos!... (*Se troba amb la mirada de la Marta que torna.*) Si ella no em mirava! Ah! (*Llença la ganiveta sobre la taula.*)

MARTA: Posa-te'n tu, Manelic. (*Ell se'n posa: després ella. Pausa; mengen.*)

MANELIC (*a part*): Qui fos golut com allà dalt! Perquè els goluts no pateixen. Si no em pot passar res per aquí dintre!

MARTA (*baixet*): Ai, Déu meu! Ajudeu-me!

MANELIC (*a part*): Pst! Que l'ajudin! (*Va a enraonar i s'atura.*)

MARTA: Què? Digue-ho! Què anaves a dir? (*Va cap an ell.*)

MANELIC (*apartant-la amb lo braç*): Res, res, aparta't!

MARTA: Parla un cop a la vida! Jo t'ho demano, per...

MANELIC (*sarcàstic*): Per qui m'ho demanes?

MARTA: Per... per...

MANELIC: Per ell? Per qui? (*Esperant que ella diga.*) I quin fàstic que em fa aquesta dona! Eh! Afarta't tu sola! (*S'aixeca.*) Jo me'n torno a les meves muntanyes! (*Se'n va cap a la porta.*)

MARTA: No, Manelic, no! I escolta'm!... I perdona'm!

MANELIC (*molt exaltat*): Que et perdoni? Ira de Déu!... Què t'havia fet, jo? Enraona!

Per què m'havies d'enganyar a mi? Per què?

MARTA: Perquè no era ningú, jo! Que era sense voluntat, obeïa! I ni t'havia mirat mai!

Ni t'estimava! Ni sabia què era tenir voluntat per un altre!
 MANELIC: Doncs per què t'has casat amb mi, i no et vas casar amb aquell home!
 Digue-ho! (*Rabiós sempre.*) Que no sé jo el perquè, i em consumo, i em torno boig per saber-ho! (*Corrent a ella.*) Per què? Per què? Respon-me!
 MARTA: Ah, això no! Que tu m'avorriries encara més del que m'avorreixes!
 MANELIC: Avorrir-te? Matar-te hauria de fer jo, que és sols lo que mereixes!
 MARTA: Oh, sí, matar-me, sí; que això és lo que desitjo!
 MANELIC: No, no; abans anar-me'n. Anar-me'n d'aquí per a sempre!
 MARTA (*rabiosa per aturar-lo*): És que no goses a parlar-me! No, no; no t'atreveixes!
 (*Anant darrera d'ell desesperada.*) És que em tens por; me tens por, a mi!
 Covard! Por! Por!
 MANELIC (*aturant-se*): Que...! Que jo et tinc por? (*A l'aturar-se ell, ella canvia de cop plorant perquè es quedi.*)
 MARTA: Parla'm! Insulta'm! Pega'm! Mes no te'n vagis! (*S'abraça als seus genolls sanglotant.*)
 MANELIC: Deixa'm anar, que això és un toll de misèries! Eh! Rebolca-t'hi!
 (*Desprenent-se d'ella i anant cap a la porta. Ella cau apoiant-se en un braç a terra.*)
 MARTA (*per aturar-lo, rabiosa i plorant*): Sí, Sí; amb el que jo estimo! (*Agenollada avança cap a la porta.*) Que t'he enganyat a tu! I tu no em castigues!
 (*En Manelic s'atura. A part.*) No se'n va, no! (*Alt, suplicant.*) Manelic! (*Ell, que ha dubtat, va a sortir.*) I sóc tota de l'altre!... ¡I de tu no ho sóc, no ho sóc!
 MANELIC (*tornant enrera, amenaçant-la amb lo puny*): Que callis! Calla! Calla!
 (*La Marta s'ha alçat.*)
 MARTA (*satisfeta de que ell no se'n vagi*): I t'he enganyat jo, i estic contenta d'haver-te enganyat! I mira: me n'en ric de tu, com tothom, mira! (*Riu com boja.*) Sí, sí, me n'en ric! I encara espero l'altre! (*Ell corre cap a la taula i agafa la ganiveta.*)
 MANELIC: Pel nom de Déu que aquí mateix...!
 MARTA (*corrent a agafar-lo pel braç esquerre*): Sí, sí, t'enganyo! Encara t'enganyo! Que vindrà l'altre! (*Arrenca una rialla feréstega.*)
 MANELIC (*alçant la ganiveta*): Que et mataré!
 MARTA (*rient i plorant*): Mata'm! Mata'm! A que no em mates!
 MANELIC: Què anava a fer! No puc, no!
 MARTA (*refermant-s'hi al veure que s'aparta*): Ah, covard! Que ja es veu que t'has venut per diners! (*Agafant-se a Manelic perquè la fereixi.*)
 MANELIC: Doncs té! Maleïda! (*Ferint-la en un braç.*)
 MARTA: Ah! (*Satisfeta.*) A la fi!
 MANEUC (*llençant lo ganivet amb espant*): Oh, Déu meu! Què he fet jo!
 MARTA: És sang! Sang meva! I tu has sigut!... (*Sostenint-se a la taula.*) Oh, quin goig! Si ric! Mira com ric! I ara ric d'alegria!
 MANELIC: Maleït jo! Maleït jo cent cops, que sóc com les bèsties salvatgines!
 (*Quedant assegut en una cadira i rebregant-se el cap entre les mans.*)

Tierra Baja

MARTA:Manelic... que la comida ya está en la mesa.

MANELIC: ¡Ah, sí, la comida! ¡La comida! (*Manelic se acerca a la mesa y empieza a cortar el pan. Mientras tanto Marta se dirige al hogar.*)

MANELIC: ¡Y no cuesta mucho degollar a un hombre...! ¡Y a ella menos, mucho menos! (*Tropieza con la mirada de Marta que se acerca. Aparte.*)

¡Si no fuese! ¡Ah! (*Arroja el cuchillo sobre la mesa.*)

MARTA: Sírvete, Manelic. (*Manelic se sirve y después Marta. Pausa. Comen.*)

MANELIC: (*Aparte.*) ¡Ah, quién estuviera hambriento como allá arriba! ¡Porque los hambrientos no sufren! ¡Si no me puede pasar nada por aquí dentro!

MARTA (*En voz baja.*) ¡Ah, Dios mío, ayúdame!

MANELIC (*Aparte.*) ¡Je! ¡Que la ayude! (*Manelic se dispone a hablar pero se calla.*)

MARTA ¿Qué? ¡Habla! ¿Qué ibas a decir? (*Se le acerca.*)

MANELIC (*Apartándola con el brazo.*) ¡Nada, nada! ¡Aparta!

MARTA ¡Habla una vez en la vida...! Te lo pido, por...

MANELIC (*Sarcástico.*) ¿Por quién me lo pides?

MARTA Por... por...

MANELIC ¿Por... él? ¿Por quién? (*Esperando la respuesta de Marta.*) ¡Qué asco me da esta mujer! ¡Ea! ¡Hártate tú sola...! (*Se levanta.*) ¡Yo me vuelvo para mis montañas...! (*Se dirige hacia la puerta.*)

MARTA ¡No! ¡Manelic, no! ¡Y escúchame! ¡Y perdóname...!

MANELIC (*Exaltado.*) ¿Que te perdone? ¡Ira de Dios! ¿Qué te había hecho yo? ¡Habla! ¿Por qué me tuviste que engañar? ¿Por qué?

MARTA ¡Porque yo no era nadie! ¡Que era una mujer sin voluntad y obedecía! ¡Y no te había mirado jamás! ¡Ni te quería! ¡Ni sabía lo que era tener cariño por otro!

MANELIC Entonces, ¿por qué te casaste conmigo y no te casaste con aquel hombre? ¡Dilo! (*Cada vez más furioso.*) ¡Que no sé por qué, y me consumo y estoy loco por saberlo! (*Avanza rápido hacia Marta.*)

¿Por qué? ¿Por qué? ¡Contesta!

MARTA ¡Ah, eso sí que no! ¡Eso no! ¡Que me odiarías todavía más de lo que me odias!

MANELIC ¿Odiarte? ¡Lo que yo debería hacer es matarte que es lo único que mereces!

MARTA ¡Oh, sí, matarme, sí! ¡Eso es lo que quiero!

MANELIC ¡No, no! ¿Prefiero irme, irme de aquí para siempre...!

MARTA (*Furiosa para retenerle.*) ¡Pero si no te atreves a hablarme! ¡No, no; no te atreves! (*Le persigue desesperada.*) ¡Y es que me tienes miedo, miedo, me tienes miedo a mí!

¡Cobarde! ¡Miedo! ¡Miedo!

MANELIC *Se detiene.* ¿Qué? ¿Qué yo tengo miedo? (*Cuando Manelic se detiene, Marta rompe a llorar para que se quede.*)

MARTA ¡Háblame! ¡Insúltame! ¡Pégame! ¡Pero no te vayas! (*Se abraza a las rodillas de Manelic sollozando.*)

MANELIC ¡Déjame ir porque todo esto no es más que un charco de miserias! ¡Ah! ¡Revuélcate en él! (*Manelic se desprende de Marta y se dirige hacia la puerta. Marta cae apoyando un brazo en el suelo.*)

MARTA (*Para retenerle, furiosa, mientras ríe y llora.*) ¡Sí, sí, como el que yo quiero! (*Arrodillada se dirige hacia la puerta.*) ¡Sí, te he engañado! ¡Y tú no me castigas! (*Manelic se detiene y Marta dice aparte:*) ¡No se va! *Suplicando.*) ¡Manelic! (*Manelic que estaba dudando parece que va a cruzar la puerta.*)

¡Y soy para el otro! ¡Y no soy para ti! ¡No lo soy!

MANELIC (*Retrocede y la amenaza con el puño.*) ¡Calla! ¡Calla! ¡Calla! (*Marta se ha levantado.*)

MARTA (*Satisfecha porque logra que Manelic no se vaya.*) ¡Y te he engañado yo! ¡Y estoy contenta de haberte engañado!

¡Y mira, me río de ti, como todo el mundo, mira! (*Ríe como una loca.*) ¡Sí, sí, me río! ¡Y todavía espero al otro! (*Manelic corre hacia la mesa y agarra el cuchillo.*)

MANELIC ¡En nombre de Dios que aquí mismo...!

MARTA (*Corre a sujetarle el brazo izquierdo.*) ¡Sí, sí, te engaño! ¡Sigo engañándote! ¡Y ahora vendrá el otro! (*Estalla en una carcajada feroz.*)

MANELIC (*Levanta el cuchillo.*) ¡Te mataré!

MARTA (*Ríe y llora.*) ¡Mátame! ¡Mátame! Por qué no me matas?

MANELIC ¡Iba a hacerlo! ¡Pero no puedo!

MARTA (*Afirmándose al ver que Manelic se aparta.*)

¡Ah, cobarde! ¡Bien se ve que te has vendido por dinero! (*Se agarra a Manelic para que la hiera.*)

MANELIC ¡Pues torna, maldita! (*La hiere en un brazo.*)

MARTA ¡Ah! (*Satisfecha.*) ¡Por fin!

MANELIC (*Arrojando el cuchillo con espanto.*) ¡Dios mío! ¡Qué he hecho!

MARTA ¡Es sangre! ¡Sangre mía! ¡Y has sido tú...! (*Agarrándose a la mesa.*) ¡Oh, qué alegría! ¡Pero si estoy riendo!

¡Mira como río! ¡Y ahora río de alegría!

MANELIC ¡Maldito de mí! ¡Maldito de mí que soy como las fieras salvajes! (*Cae sentado en una silla, apretándose la cabeza entre las manos.*)

FREI LUIS DE SOUSA BY ALMEIDA GARRETT IN PORTUGUESE

João Baptista da Silva Leitão de Almeida Garrett, Viscount of Almeida Garrett (February 4, 1799 – December 9, 1854) was a Portuguese poet, playwright, novelist and politician. He is considered to be the introducer of the Romantic movement in Portugal. He is regarded as one of history's greatest Romanticists and a true revolutionary and humanist. In 1843, Garrett published *Romanceiro e Cancioneiro Geral*, a collection of folklore; two years later, he wrote the first volume of his historical novel *O Arco de Santana* (fully published in 1850, it took inspiration from Victor Hugo's *The Hunchback of Notre Dame*). *O Arco de Santana* signified a change in Garrett's style, leading to a more complex and subjective prose with which he experimented at length in *Viagens na Minha Terra* (*Travels in My Homeland*, 1846), which I read. His innovative manner was also felt in his poem collections *Flores sem Fruto* (*Flowers without Fruit*, 1844) and *Folhas Caídas* (*Fallen Leaves*) 1853). Almeida Garrett ended his relationship with Luísa Midosi and divorced in 1835 (who later remarried Alexandre Desiré Létrillard) to join 17-year-old Adelaide Deville Pastor in 1836 – she was to remain his partner until her early death in 1839, causing him to break, and leaving a daughter named Maria Adelaide (who later married and had issue), whose early life tragedy and illegitimacy inspired her father in order to write the play *Frei Luís de Sousa* (1843). I read the play in Portuguese, an excellent play, a real masterpiece, we bring here the last scene. In this scene Maria, an adolescent of 12 years but adult in her behavior enters into the church, recognizes and goes to her parents who embrace her. Maria questions the sanctity of the ceremonies in church, she asks "what kind of God is he who takes away a daughter from her parents". She says "kill me if you wish so but don't separate me from my parents". She complains that she is told that "this child is the outcome of crime and sin". She begs her parents to deny that as she was born out of love. Finally, Maria dies of shame...

SCENA XI

O PRIOR DE BEMFICA, _o_ ARCEBISPO, MANUEL DE SOUSA, MAGDALENA, etc.

MARIA, _que entra precipitadamente pela igreja em estado de completa alienação; traz umas roupas brancas, desalinhadas e cahidas, os cabellos soltos, o rosto macerado, mas inflammado com as rosetas ethicas, os olhos desvairados; pára um momento, reconhece os pais e vai direita a elles.--Espanto geral: a cerimonia interrômpe-se_.

Maria. Meu pae, meu pae, minha mãe! levantae-vos, vinde. (_Toma-os pelas mãos; elles obedecem machinalmente, veem ao meio da scena: confusão geral_.)

Magdalena. Maria! minha filha!

Manuel. Filha, filha!... Oh, minha filha!... (_Abraçam-se ambos n'ella_.)

Maria, _separando-se com elles da outra gente, e trazendo-os para a bôcca da scena_. Esperae: aqui não morre ninguém sem mim. Que quereis fazer? Que cerimoniaes são éstas? Que Deus é esse que está n'esse altar, e quer roubar o pae e a mãe a sua filha?--(_Para os circumstantes_) Vós quem sois, espectros fataes?... quereis-m'os tirar dos meus braços?... Esta é a minha mãe, este é o meu pae... Que me importa a mim com o outro? Que morrêsse ou não, que esteja com os mortos ou com os vivos--que se fique na cova ou que resuscite agora para me mattar?... Matte-me, matte-me, se quer, mas deixe-me este pae, ésta mãe, que são meus.--Não ha mais do que vir ao meio de uma familia e dizer: «Vós não sois marido e mulher?... e ésta filha do vosso amor, ésta filha criada ao collo de tantas meiguices, de tanta ternura, ésta filha é...»--Mãe, mãe, eu bem o sabia... nunca t'o disse, mas sabia-o: tinha-m'o ditto aquelle anjo terrivel que me apparecia todas as noites para me não deixar dormir... aquelle anjo que descia com uma espada de chammas na mão, e a atravessava entre mim e ti, que me arrancava dos teus braços quando eu adormecia n'elles... que me fazia chorar quando meu pae ia beijar-me no teu collo.--Mãe, mãe, tu não hasde morrer sem mim... Pae, dá ca um panno da tua mortalha... dá ca, eu quero morrer antes que elle venha: (_incolhendo-se no hábito do pae_) quero-me esconder aqui, antes que venha esse homem do outro mundo dizer-me na minha cara e na tua--aqui deante de toda ésta gente: «Essa filha é a filha do crime e do peccado!...» Não sou; dize, meu pae, não sou... dize a essa gente toda, dize que não sou. (_Vai para Magdalena_) Pobre mãe! tu não podes... coitada!... não tens ânimo...--nunca mentiste?... Pois mente agora para salvar a honra de tua filha, para que lhe não tirem o nome de seu pae.

Magdalena. Misericordia, meu Deus!

Maria. Não queres? Tu tambem não, pae?--Não querem. E eu heide morrer assim... e elle vem ahi...

SCENA XII

MARIA, MAGDALENA, MANUEL; o ROMEIRO e TELMO _que apparecem no fundo da

scena sahindo detrás do altar-mór_.

Romeiro, _para Telmo_. Vai, vai; ve se ainda é tempo: salva-os, salva-os, que ainda podes... (_Telmo dá alguns passos para diante_.)

Maria, _apontando para o romeiro_. É aquella voz, é elle, é elle.--Já não é tempo... Minha mãe, meu pae, cobri-me bem éstas faces, que morro de vergonha... (_Esconde o rosto no seio da mãe_) morro, morro... de vergonha... (_Cá e fica morta no chão. Manuel de Sousa e Magdalena prostram-se ao pé do cadaver da filha_.)

Manuel, _depois de algum espaço, levânta-se de joelhos_. Minha irman, rezemos por alma... incommendemos a nossa alma a este anjo que Deus levou para si.--Padre prior, podeis-me lançar aqui o escapulario?

Prior, _indo buscar os escapularios ao altar-mór e tornando_. Meus irmãos, Deus afflige n'este mundo áquelles que ama. A coroa de glória não se dá senão no céu.
(_Toca o orgam; e cá o panno_.)

João Baptista da Silva Leitão de Almeida Garrett, Viscount of Almeida Garrett (4 February 1799 – 9 December 1854) was a [Portuguese](#) poet, [playwright](#), [novelist](#) and [politician](#). He is considered to be the introducer of the [Romantic movement](#) in Portugal. He is regarded as one of history's greatest Romanticists and a true revolutionary and humanist. Garrett divorced in 1835 to join 17-year-old Adelaide Deville Pastor in 1836 – she was to remain his partner until her early death in 1839, causing him to break, and leaving a daughter named Maria Adelaide (who later married and had issue), whose early life tragedy and illegitimacy inspired her father in order to write the play *Frei Luís de Sousa*.

RIGOLETTO, VERDI'S OPERA WITH PIAVE'S LIBRETTO BASED ON VICTOR HUGO'S PLAY LE ROI S'AMUSE

One of the most difficult problems in the struggle against unethical persons is the problem of the victim's syndrome. The victim identifies many times with his oppressor, for various reasons: admiration, love, fear, masochism. The opera Rigoletto by Piave and Verdi, based on the famous play by Victor Hugo "Le roi s'amuse", gives an excellent example of the victim's syndrome. The Duke of Mantua is an unscrupulous tyrant with an absolute power over his citizens. He is a womanizer and sends his noblemen to prison if they dare complain. But he perceives himself as the victim of women who are fickle (*la donna e mobile*). This is a typical attitude of wrongdoers who attribute their defaults to the wronged people, thus the minority shareholders are called despicable speculators while it is the controlling shareholders who speculate, and here - the rapist of women complain that he is the victim of women.

Monterone, a respectable nobleman, complains to the Duke that he abducted his daughter. He threatens to become a whistleblower (my voice will be heard everywhere). Rigoletto, the court jester ridicules Monterone and asks him how dare he accuse the Duke of such crimes. But Monterone pursues his accusations. He tells the Duke that he'll interrupt his orgies. He wants to punish the Duke for his crimes and even if he'll be sentenced to death he'll return as a ghost to avenge the honor of his daughter. When the Duke tells his servants to take Monterone to prison he curses the Duke, as he has sent a dog to tear the body of a dying lion, and Rigoletto, as he is a mocking snake who ridicules the pain of a father. All the court mocks Monterone, but Rigoletto this time is silent. After Monterone is taken to his death he pardons

the Duke, saying that as he couldn't hurt him he wishes him to be happy. This is a typical victim's syndrome. Some of the victims commit suicide when they cannot succeed to punish their wrongdoers, some of them get sick or die of sorrow, but others identify with their oppressors and become worse than them.

Rigoletto, apparently has not such a syndrome. He has a daughter Gilda who is abducted by the Duke (because of Monterone's curse, he believes). He decides to murder the Duke and pays a killer Sparafucile to do the job. But Gilda who is in love of the Duke, although she knows that he abducted her on false pretense and is courting Sparafucile's sister, disobeys her father and sacrifices herself to Sparafucile's knife in order to save the Duke. Verdi and Hugo, who were both freedom fighters, couldn't imagine that a Duke might be killed by a common and they are saved by the same commons that they offended. Rigoletto who dares planning the murder of the Duke loses his daughter and Monterone who dared be a whistleblower loses his life. This is one of the best examples of the victim's syndrome which is very common in the business world. Very few people who dare to oppose unethical tycoons succeed and almost all of them don't remain in the business world as they are perceived as whistleblowers. In some cases they are even killed like Silkwood. Unethical Tycoons (the modern robber barons and Dukes) are therefore immune from reprisal in most of the cases, only their lieutenants, the CFOs or the Majors are punished if at all, but the CEOs, Tycoons or Generals remain untouched. Those who dared confront them are severely punished as happened to Monterone or Rigoletto.

We can kill for \$11, for 30 denarius or for \$10,000. According to that logic, the hired killer has the highest respect for human life, as he asks for the higher price. Even Sparafucile in Rigoletto is ready to spare the life of the Duke, as Madalena his sister thinks that he is handsome. The hired killer is impressed by the personification of the Duke and is ready to kill in his place an unknown man. Sparafucile, like some of the companies' executives, is willing to commit a crime if it is toward an unpersonified victim. The personification of the shareholders and stakeholders becomes therefore a major cause to safeguard their interests, as it is much more difficult to wrong them if we know them and appreciate or like them. But, in many cases in modern business the victim is ultimately the abused party who tries to fight the mighty ones. This reminds us of Rigoletto, who has ordered Sparafucile to murder the Duke in order to avenge the abuse of his daughter. The one who dies ultimately is his daughter Gilda, who sacrifices herself in order to save the Duke whom she loved. She presents herself as an unknown person to Sparafucile, who kills her instantly.

“Rigoletto: Dio tremendo! Ella stessa fu colta
dallo stral di mia giusta vendetta!

(A Gilda) Angiol caro, mi guarda, m'ascolta,
parla, parlami, figlia diletta!

Gilda: Ah, ch'io taccia!

A me, a lui perdonate!

Benedite alla figlia, o mio padre!

Lassu in cielo, vicina alla madre,
in eterno per voi preghero.

Rigoletto: Non morir, mio tesoro, pietade.

Mia colomba, lasciami non dei,
no, lasciami non dei.”

(Piave, Rigoletto, end of the opera)

"Rigoletto (to himself): Oh, horror, she herself
 has been struck by my vengeance.
 (to Gilda) Dear angel, look, listen to me, speak to me beloved.
 Gilda: Ah, that I must be silent forever!
 Forgive me, forgive him!
 Bless your daughter, O father.
 In heaven, beside my mother,
 I soon shall be,
 And there we'll pray for you.
 Rigoletto: Do not die, my treasure.
 My dove,
 Don't leave me."

Rigoletto is an [opera](#) in three acts by [Giuseppe Verdi](#). The Italian [libretto](#) was written by [Francesco Maria Piave](#) based on the play *Le roi s'amuse* by [Victor Hugo](#). Despite serious initial problems with the Austrian censors who had control over northern Italian theatres at the time, the opera had a triumphant premiere at [La Fenice](#) in Venice on 11 March 1851. It is considered by many to be the first of the operatic masterpieces of Verdi's middle-to-late career. Its tragic story revolves around the licentious Duke of Mantua, his hunch-backed [court jester](#) Rigoletto and Rigoletto's beautiful daughter Gilda. The opera's original title, *La maledizione* (The Curse), refers to the curse placed on both the Duke and Rigoletto by a courtier whose daughter had been seduced by the Duke with Rigoletto's encouragement. The curse comes to fruition when Gilda likewise falls in love with the Duke and eventually sacrifices her life to save him from the assassins hired by her father. In modern times, it has become a staple of the standard operatic repertoire. It appears as number 9 (with 395 performances) on the [Operabase](#) list of the most-performed operas worldwide between 2008/2009 and 2012/13 seasons, and was also the 9th most frequently performed opera in Italy during that period.

RUSSIA - CORRUPTION IN THE LOCAL GOVERNMENT - THE PLAY "REVIZOR" BY NIKOLAI GOGOL - SUMMARY AND ANALYSIS

Based on the play *Revizor* (1842) by Nikolai Gogol

The film is based on the play with substantial changes:

The Inspector General, 1949, 102 min., Director Henry Koster, with Danny Kaye

Summary and Analysis:

Gogol introduces us into the ethical dilemma of the play from the first line when the mayor tells his colleagues: "I have invited you in order to announce you very unpleasant news, a Revizor is coming to inspect us". Following the astonishment of his colleagues he tells them that it is a revizor from Petersbourg who is about to visit the town incognito with secret instructions. The revizor is about to disturb their peace of mind, preventing them from receiving bribes and not fulfilling their duties, while none of the citizens is complaining. They

do their schemes in obscurity and all of a sudden the revizor will shed light on their stealing and they will become transparent.

When the alleged revizor (a bum who is mistakenly perceived as the incognito revizor) agrees to receive from them bribes they can at last obtain their peace of mind, as "he is one of us and we can come to terms with him, like with all the others". The merchants who dare to complain are rebuffed by the Mayor who tells them that he is a good friend with the Revizor, who intends to marry the Mayor's daughter (The Mayor doesn't know of course that his wife tried to seduce as well the Revizor but he possibly wouldn't mind if the Revizor would be willing to overlook the Mayor's crimes). In the climax of the euphoria comes the postmaster with a letter from the alleged revizor where he describes cynically to his friend all the drawbacks of the elites of the town. They finally understand that they, who normally con everybody else, have been conned by a smarter crook. And then the real revizor comes and the play ends showing their astonished faces.

Gogol describes the mayor as a man who gets old in his position, very clever, receiving bribes but perceived as a man of honor. Many politicians could fit into this profile. All the important men of the town are honorable men, but beneath their conduct they are corrupted as the worst thieves. They are willing to bribe the revizor or the inspector general in the English version, as it is a price worthwhile to be paid in order to perpetuate their schemes. The play was actual in Tsarist Russia as it is actual today all over the world, especially in unethical countries.

The Russian censors were afraid to authorize the play but the Tsar Nikolai I had to interfere personally in order to allow the play to be staged as he wanted to eradicate the corruption in his country. The Mayor and the corrupted civil servants claim that this is the way to do business and nothing can be changed in the human nature. These are the usual norms and what is ethics after all if not abiding to the common norms. But if corruption is universal so is ethics and one cannot say that it does not apply in his country.

Gogol's satire has no sympathetic characters, all are crooked, distorted, corrupted. The play displays greed, stupidity and corruption. Khlestakov, the alleged revizor, is reckless, irresponsible and light-minded. Revizor can be played as a realistic or surrealistic play. It is even perceived as the precursor of the absurd movement, of Ionesco and Rhinoceros. It deals with the hypocrisies of everyday life as with the essence of the corruption of the elites.

A WHISTLEBLOWER WITH SOCIAL RESPONSIBILITY - THE PLAY "AN ENEMY OF THE PEOPLE" BY HENRIK IBSEN & THE INDIAN FILM "GANASHATRU" - SUMMARY & ANALYSIS

Based on the play "An Enemy of the People" (En Folkefiende), 1882, by Henrik Ibsen

The films:

An Enemy of the People, 1978, 90 min., Director George Schaefer, with Steve McQueen, is based on the play with slight changes

Ganashatru, 1989, 99 min., Director Satyajit Ray, Indian masterpiece based on the play, with substantial changes

Summary:

Dr. Thomas Stockmann is a doctor in a small Norwegian town and the medical officer of the baths developed by his initiative under the management of his brother Peter, the Mayor of the town. The baths brought a surge in tourism and the financial conditions of the citizens improved substantially. Thomas and his wife have many friends who are often invited to dinner at their home, especially Hovstad the editor of the local newspaper and Billing the sub-editor. Thomas is a family man worshipped by his daughter Petra, a teacher, and by his sons Ejolf & Morten. His father-in-law is Morten Kill, a tanner, whose factory pollutes the water of the baths. When Thomas discovers the pollution he decides to write an article in the local newspaper in order to warn the citizens of the danger to their health. The editors and Aslaksen, the publisher of the newspaper, back him at first and Thomas tells them modestly that he doesn't want them to honor him with a dinner for his contribution to society. But, after the interference of the Mayor, the publisher and editors change their mind and decide not to publish Thomas' report, as they are afraid that the citizens will have to bear the costs of repairing the contamination. Thomas refuses to accept this and decides to convene a meeting of the town's citizens in order to explain them the dangers of the pollution. In the meeting, the Mayor convinces the citizens to back him, Thomas is denounced as a lunatic, anti-democrat, as he maintains that he is right and the majority is wrong. He is proclaimed an Enemy of the People, is fired from his position at the Baths, his daughter is fired, hooligans break the windows of his house and he is asked to leave his house. Thomas decides to remain in town and fight for his principles against all odds.

Analysis:

The play illustrates the dilemma of the whistleblower and his moral motives. Is he a despicable tell-tale, a martyr, or a fearless hero? Society bans the whistleblower, even when he blows the whistle in order to rescue the people. Ibsen shows the double-talk of unethical persons who talk like the Mayor on a need of tolerance and civility, but act on behalf of the town's rich people. Another aspect is the consideration of ego in business: whose idea it was to open the Spa - Peter's or Thomas'. But things are not clear-cut. We see the modesty of unethical people like Peter as compared to the lavishness of ethical people like Thomas. Is it at all relevant to the ethical issues? The unethical businessmen depict those who fight for ethics as having their own agenda, they are megalomaniac, lunatics, anti-business, short or long in their shares' transactions, they are unfaithful to their wives or husbands, they are shoplifters if they refuse to pay for a damaged can-opener, and so on.

In the play we see the joy of creation of Thomas the innovator as compared to the gloom of Peter the bureaucrat. Thomas is very generous by inviting his friends frequently to dinners, however it doesn't pay off. We face the dilemma whether Thomas was right when he didn't disclose to Peter his suspicion about the polluted water. Thomas should be loyal and transparent, but to whom? To his superiors in the Spa's board, to his brother the Mayor, to the inhabitants of his town, to the tourists who use the Spa, to his family, to his conscience, to his profession? Is it justifiable to blow the whistle on corrupted business practices? Is the Mayor correct in telling Thomas that the individual in society should be loyal to the authorities of society who are responsible for the welfare of the public? To what extent should the individual adapt himself to the norms of society, and be a "conformist"? As those who are not ready to conform risk the retaliation of society, their bosses, their colleagues...

The Mayor doesn't have broad interests and is very narrow-minded, he confines himself to work only, but he is very efficient. However, he is under the pressure of election, and being slightly paranoiac he is afraid that all the "schemes" of Thomas and his father-in-law are all

intended to undermine his position and to benefit from the low prices of the shares of the Baths. The pressure on Peter reminds of the pressure exerted on politicians by election to the parliament or the presidency, on executives of companies traded on the stock exchange by quarterly reports, controlling shareholders, audits, etc. Does it justify an unethical conduct of the managers? Ibsen, Thomas and the Captain, who hosts the citizens' assembly, believe in elitism. This raises the question: Who should lead: the elites, assuming that they are competent and ethical, or the masses, even if they are ignorant and without values?

Other facets of the analysis: The criticism of Petra on hiding the truth at school where she teaches and at home towards her younger brothers. Dr. Stockmann is in favor of maximum transparency and raising the curtain on the evils of society. But is it always justifiable? The ecology as a driving factor in this play, one of the first plays to raise ecological issues. What is more important economy and progress or ecology, should there be a contradiction between them? Should we always be concerned by economic factors even when human lives and health is at stake? If we advocate maximization of profits - the answer is yes.

Another facet is: The naivety of whistleblowers like Stockmann who believe that society will give them prizes and honor to reward them of what they have discovered. But are all Thomas' intentions pure, to what extent is his conduct motivated by rivalry with his brother, revulsion from his father-in-law the tanner who spoils the water of the Spa with his factory's waste, ego considerations, revenge from the Spa's board who wanted to save the costs of expensive piping? What about the rationality of economics? And maybe the most important issue: Is Dr. Stockmann a Don Quixote who doesn't have an economic vision or are his considerations valid for the long run only? Possibly, a little more cunning (like Ulysses and the Trojan Horse) would have assisted Thomas in his campaign, if the end justifies the means. After all, what has Stockmann achieved? He has lost his job, Petra was fired, they cannot live anymore in their house, their children are beaten, the pollution will continue and people will get sick and die, he was declared an enemy of the people and has lost most of his friends. So, what can we suggest Thomas to do in order to achieve at least part of his plea, without giving up his convictions? Could he embark in such a campaign without a political sense?

Dr. Stockmann thinks that his brother will envy him because it was he who discovered the pollution. His more practical wife suggests him to tell the Mayor that it was his idea from the beginning. The attitude of Mrs. Stockmann up to the people's assembly is quite critical and down-to-earth, but when she sees how the editors and the people treat her husband she decides to back him fully, although she might disagree with his methods. The citizens do not want to recognize the truth about the pollution and convince themselves that it is a sheer invention of the lunatic Dr Stockmann. Ultimately, a simple problem like the water's pollution becomes a pawn in the campaign of the tanner against the Mayor, the journalist against the tycoons, the Mayor in his election campaign, and the citizens who do not want to pay more taxes. Hovstad mutates from the journalist who starts as a fighter against the tycoons and ends as their most fateful lackey. This raises the question whether it is a common aspect in the relations of the media with business?

Thomas starts as the most popular man in town and ends up as an enemy of the people. He is inconsistent as he is in favor of majority when he thinks that everybody is with him and favors the minority when he learns that he is left almost alone. The victim is always guilty. Peter blames Thomas that the Spa will be closed because of him and not because he objected investing enough money in the piping. Peter objects the disclosure of the pollution for ethical reasons as it will hurt his credibility as a civil servant. The Mayor, as well as many unethical businessmen state "that the public does not need new ideas, as the old ones serve us pretty

well". Would Galileo, Emile Zola and Brutus agree? The mayor accuses Thomas of being paranoiac and individualistic, and in fact it is a very common accusation against the whistleblowers. Peter asks Thomas to retract from his disclosure, although he knows that Thomas would not be able to do so. But even if he would have agreed, it would discredit Thomas in the eyes of his few supporters and he would be fired anyway, as he is perceived as a whistleblower. Another common allegation against the whistleblowers is that they oppose everyone who is their superior. Is the ideal employee the obedient yes-man, who agrees with the whims of his bosses even when their commands are unlawful and unethical?

The silence of the lambs, the law of Omerta, community of thought, like in *The Enemy of the People*, may be slogans of the Mafia, totalitarian regimes, banana republics, but they often apply to a part of the business world. The Mayor tells Thomas that as an employee he is not entitled to his own opinion and especially if it contradicts the ideas of his superiors. This statement is very common in many companies, but in any case one should find the golden mean between this idea of total discipline as opposed to total chaos and insubordination. Peter tries to convince his sister-in-law to call to order her husband for the sake of her family and welfare. This tactic is very common - to try and influence or intimidate the family of the whistleblower - and succeeds only in cases where the family is not cohesive enough, like in *The Insider* or *The Visit*, but not in cases like the Dreyfus Affair. The whistleblowers are not rewarded for their actions, they are dismissed and banned. Often because they are not politically correct in their allegations, like Dr. Stockmann who finds an analogy between the polluted water and the polluted moral climate of his town. But, who loves the town more: the Mayor or the physician? One would tend to think that the physician, but we can also find justifications to the Mayor's conduct as well.

Mrs. Stockmann tells her husband that justice without power has no value. We could think of many examples that validate this statement and the opposite one as well. The communists believed that they were just but they didn't prevail until they had the power. However, the dissidents like Solzhenitzyn and the East Germans democrats at the end of the eighties, as well as the Indians in 1948 prevailed although they didn't have the power. These arguments raise the question: Does the end justify the means and is a person who fights for justice allowed to act against his people, his religion or his country? To the detriment of his family, his welfare, his health and even his life? Is the whistleblower a modern hero who fights for justice? Thomas may sound selfish when he doesn't pay attention to the admonition of his wife who tells him to think of his family and compromise with the evils of society. But Thomas perseveres in his fight even against the whole world. Thomas may also sound manipulative when he says that he wants to be able to look in the eyes of his sons when they will grow up and be free men. Here again he acts on behalf of the victims, for their own good, without even asking them, although Petra supports him from the start.

Dr Stockmann is accused of being a revolutionary, and so is Lowel Bergman in *The Insider*. Is it a compliment, an insult, a fact? Was it his intention from the start? As Thomas didn't want to be a revolutionary but was driven to that, we could argue that circumstances make most of revolutionaries what they are. Dr. Stockmann could have stuck to his findings as a scientist and not transgress his fight to political issues. Doing so, it wouldn't have hampered his credibility and allow slander that he is motivated by revenge against his brother or by ambition to become the new Mayor. Aslaksen states that he is a coward in the local arena but is not afraid to state his own views in the national arena. We could explain that by his fear of personifying the struggle. Aslaksen and Hovstad change their views by 180 degrees after they talk to the Mayor, as the strength of their moral convictions is in opposite function to the strength of the pressure exerted on them. On some people putting pressure is effective but

with others it goes on the opposite way and strengthen their resistance. Ibsen shows how flattery is effective in the business world. The mayor flatters Aslaksen and is successful but Dr Stockmann fails, because he is too blunt. Aslaksen was ready to fight for a cause when it was abstract. But when it affects his welfare and the welfare of his colleagues he opposes it. Charity begins at home.

Why do Aslaksen and Hovstad fall into the trap of the Mayor? They could have said that the Spa's company which is entitled to all the profits should bear also all the investment for repairing the pipes. The piping should not be on the community expenses as they don't share the profits. But this is a common attitude of unethical businessmen to ask for the assistance of government and community when the situation deteriorates but not to share with them profits when it improves. Thomas sounds sometimes as a macho, when he tells his wife to go home and take care of the household while he will take care of the problems of society. Another issue which is relevant even today is: Who decides what should be written in the newspaper: the editor, the owner, the readers, the authorities? Hovstad, Aslaksen, Dr Stockmann or the Mayor? Does mediocrity shut the truth up or is 'vox populi vox dei'? We could see many commonalities between the town's citizens meeting and the shareholders' meetings. The chances of an individual shareholder or a man with dissident opinions to express himself and to influence others are very slim, as the Chairman and the mighty act in both cases arbitrarily.

Aslaksen advocates for the golden mean like Aristotle, Dr Stockmann is a "revolutionary" who wants to destroy the corrupted society. But who is more ethical? Aslaksen and Hovstad, the conformists are expected to receive their reward from the Mayor and the wealthy people in due time, indirectly, as they owe them now. Dr. Stockmann in the meeting does not flatter his people but attacks them, still he wants their support, or is he trying to maintain a cause which he know has no chance to prevail? Stockmann wants the destruction of his hometown as it is based on lies. Is it effective? We could draw analogies from Soviet Russia and Great Britain. In the Soviet Union the revolution didn't work on behalf of the masses while in Great Britain the masses are in much better conditions without any revolution. What about other political regimes, racial conflicts, economic and social conflicts? Is destruction the only way to remedy the evils? The examples of the fascist and communist regimes as opposed to democracies where people compromise and don't destroy are illuminating in advocating for moderation.

When they don't find rational arguments against Stockmann his friends resort to slander: he is crazy, he wants a raise in his salary, he wanted to purchase the shares of the Spa with his father-in-law at a very low price and that's why he invented the story about pollution. Ibsen raises another issue: what is preferable to stick to your country and society even if they are corrupt and you are persecuted in order to change them from within or emigrate. Dr. Stockmann wanted to emigrate to the US but ultimately he decides to stay and fight in his hometown. "One should not wear his best trousers when he wants to fight for truth and freedom". Is it a private joke of Ibsen or does it contain a lot of truth about the risks of the struggle? Ibsen illustrates the brutality of society and the mighty who break Stockmann's windows, threaten him and his family, fire him and the captain his only friend, his daughter... Is it common also today? The cases and the research show that in many cases it is still common. Peter tries to convince Thomas to sign a declaration that he was wrong and maybe they will hire him back in the future. This is a common communist device to give a so-called appearance of justification to their brutal acts. But luckily Thomas refuses as he doesn't want to deny his convictions, as Galileo said *e pur si muove* and Dreyfus maintained that he was innocent. Thomas' father-in-law, Morten Kiil, tries to bribe him as he wants to preserve his reputation. Unethical persons insist in maintaining a faultless reputation and they are willing

to pay for it. Finally, is Dr. Stockmann a model for imitation, will he achieve success at least in the long run?

Norway is today the most ethical country in the world, and Ibsen has contributed to it with his plays. However, in the Indian film *Ganashatru* we have a happy ending, with many young people coming to support the enemy of the people and others deciding to publish his report, still India is among the most corrupt countries in the world. What approach is best for reform?

Ganashatru (Bengali: গণশত্রু *Gônoshotru* "Enemy of the People") is a 1990 Indian film by Satyajit Ray. It is an adaptation of Henrik Ibsen's play *An Enemy of the People*. Ray adapts the play to an Indian setting: a flourishing township in Bengal, in which a temple attracts devotees as well as tourists. Dr. Ashoke Gupta is the head of the of a town hospital. Gupta's younger brother Nisith is the head of the committees running the hospital and the temple. Both were built by a local industrialist. The temple is a big tourist attraction. Dr. Gupta is convinced that the holy water of the temple is contaminated due to the faulty pipe-laying. It is causing an epidemic in the town and he warns his brother Nisith.

Nisith, the industrialist and other town officials reject the idea that holy water might be the cause of the epidemic. They refuse to close the temple to carry out the repairs because of the loss that will ensue. Dr. Gupta wants to write an article in the newspaper to warn people, but giving-in to the pressure from the powerful people, the editor refuses to publish it. Left with no alternative, Dr. Gupta organizes a public meeting that is also sabotaged. And Dr. Gupta is proclaimed an enemy of the people.

The movie brings forth the eternal conflict between hard scientific fact and the opposing religious doctrine. In the movie the young generation ultimately favors science and this optimism about India that Ray has envisioned is completely unrealistic. There are two possibilities to warn the people – tell them the truth as Ibsen did and cover-up the truth as Ray does. If you want that the audience of the play or the film would go home in a good mood – you can adopt Ray's methods, but if you want to educate the people even if they would be reluctant at first to see the truth that hurts – adopt Ibsen's methods, which in the long run has brought Norway to the top of the ethical countries, while people in India are still in a nirvana watching Bollywood movies.

BEST BUSINESS ETHICS NOTION: AN ENEMY OF THE PEOPLE (NORWEGIAN)

In order to illustrate this chapter on Plays, we chose to bring the last lines of [An Enemy of the People](#) in [Norwegian](#) and English. No play has succeeded to give the reader and viewer a better notion on business ethics than this play, which I have seen several times in Israel and abroad, read many times in Norwegian and other languages (Ibsen wrote it in [Danish](#)...), seen the film in an English version with Steve McQueen (!) and in an [Indian version](#) (with a happy ending...), taught it to my students, showing them extracts of the plays and films. Ibsen wrote the play in 1882, describing Norway which was extremely unethical. Yet, a hundred years later, Norway is the most ethical country in the world, due in a large part to Ibsen's play. Ibsen, who was ostracized in his country and had to work abroad in Italy and Germany, was the forefather of modern ethics, like the Jewish prophets thousands of years ago. Outside Scandinavia, in the US, Israel and neoliberal countries, teachers of business ethics continue to be ostracized or marginalized, but ethics will prevail everywhere not in 100 years, but hopefully within 10 years.

Ibsen illustrates in a dramatic way the ethical dilemma of Dr. Stockman, the officer of the municipal Baths, who has discovered that the water of the Baths is polluted, and announces it publicly at the risk of alienating himself from his whole town, which could be ruined as a result of his discovery. He is indeed called The Enemy of the Public, dismissed from his job and ostracized by his community. In a decisive confrontation with the citizens' assembly, Dr. Stockman maintains that the majority has not the monopoly over truth and morality, and he advocates with vehemence the right of the minority to embrace the truth, which can be opposed to that of the majority, but which nevertheless is the unique moral truth, over which he will fight without heeding the consequences. Stockman, the individualist, who fights alone against everybody else, has even a predestined name very relevant to this book, as he is called stock-man, the man with a stock, the individual shareholder.

“I propose to raise a revolution against the lie that the majority has the monopoly of the truth. What sort of truths are they that the majority usually supports? They are truths that are of such advanced age that they are beginning to break up. And if a truth is as old as that, it is also in a fair way to become a lie, gentlemen. (Laughter and mocking cries.) Yes, believe me or not as you like; but truths are by no means as long-lived as Methuselah – as some folk imagine. A normally constituted truth lives, let us say, as a rule seventeen or eighteen, or at most twenty years; seldom longer. But truths as aged as that are always worn frightfully thin, and nevertheless it is only then that the majority recognizes them and recommends them to the community as wholesome moral nourishment. These ‘majority truths’ are like last year’s cured meat – like rancid, tainted ham; and they are the origin of the moral scurvy that is rampant in our communities.” (Ibsen, *An Enemy of the People*, p. 256-7)

If the majority of businessmen maintain that you cannot argue with success and that everything is permitted to obtain this success, there could still exist a minority that maintain that the absolute value is ethics and it is despicable to succeed by despoiling the rights of minority shareholders, stakeholders and, ultimately, everybody. The author of this book believes that this minority is probably right. They will ridicule us as they have done to Don Quixote, they will fight us as they have done to The Enemy of the People, but finally, the truth of the minority will be perceived as self-evident, as democracy, as Human Rights, as equality of mankind, black, yellow or white, men and women, Christians, Muslims or Jews, Americans, French, British, Dutch or Israelis. The play ends with the following lines brought here in Norwegian and English.

MORTEN

Men hvad skal vi gøre, når vi er ble't fri og fornemme mænd da?

DOKTOR STOCKMANN

Da skal I jage alle gråbenene over til det fjerne vesten, gutter!

Ejlif ser noget betænkelig ud; Morten hopper og råber hurra.

FRU STOCKMANN

Ak, bare det ikke blir disse her gråbenene, som jager dig, Tomas.

DOKTOR STOCKMANN

Er du rent gal, Katrine! *Jage mig! Nu*, da jeg er byens stærkeste mand!

FRU STOCKMANN

Den stærkeste – *nu*?

DOKTOR STOCKMANN

Ja, jeg tør sige så stort et ord, at *nu* er jeg en af de stærkeste mænd i hele verden.

MORTEN

Å nej da!

DOKTOR STOCKMANN *sænker stemmen*

Hys; I skal ikke tale om det endnu; men jeg har gjort en stor opdagelse.

FRU STOCKMANN

Nu igen?

DOKTOR STOCKMANN

Ja visst, ja visst! (*samlers dem om sig og siger fortrolig*) Sagen er den, ser I, at den stærkeste mand i verden, det er han, som står mest alene.

FRU STOCKMANN *smiler og ryster på hodet*

Å du Tomas —!

PETRA *trøstigt, griber hans hænder*

Far!

Morten. And what are we going to do, when you have made liberal-minded and high-minded men of us?

Dr. Stockmann. Then you shall drive all the wolves out of the country, my boys!
(EJLIF looks rather doubtful about it; MORTEN jumps about crying "Hurrah!")

Mrs. Stockmann. Let us hope it won't be the wolves that will drive you out of the country, Thomas.

Dr. Stockmann. Are you out of your mind, Katherine? Drive me out! Now—when I am the strongest man in the town!

Mrs. Stockmann. The strongest—now?

Dr. Stockmann. Yes, and I will go so far as to say that now I am the strongest man in the whole world.

Morten. I say!

Dr. Stockmann (lowering his voice). Hush! You mustn't say anything about it yet; but I have made a great discovery.

Mrs. Stockmann. Another one?

Dr. Stockmann. Yes. (Gathers them round him, and says confidentially:) It is this, let me tell you—that the strongest man in the world is he who stands most alone.

Mrs. Stockmann (smiling and shaking her head). Oh, Thomas, Thomas!

Petra (encouragingly, as she grasps her father's hands). Father!

Henrik Johan Ibsen (20 March 1828 – 23 May 1906) was a major [19th-century](#) Norwegian [playwright](#), theatre director, and [poet](#). He is often referred to as "the father of [realism](#)" and is one of the founders of [Modernism](#) in theatre. His major works include [Brand](#), [Peer Gynt](#), [An Enemy of the People](#), [Emperor and Galilean](#), [A Doll's House](#), [Hedda Gabler](#), [Ghosts](#), [The Wild Duck](#), [Rosmersholm](#), and [The Master Builder](#). He is the most frequently performed dramatist in the world after [Shakespeare](#), and *A Doll's House* became the world's most performed play by the early 20th century. Several of his later dramas were considered scandalous to many of his era, when European theatre was expected to model strict morals of family life and propriety. Ibsen's later work examined the realities that lay behind many façades, revealing much that was disquieting to many contemporaries. It utilized a critical eye and free inquiry into the conditions of life and issues of morality. The poetic and cinematic early play *Peer Gynt*, however, has strong [surreal](#) elements. Ibsen is often ranked as one of the truly great playwrights in the European tradition. Richard Hornby describes him as "a profound poetic dramatist—the best since [Shakespeare](#)". He is widely regarded as the most important playwright since Shakespeare. He influenced other playwrights and novelists such as [George Bernard Shaw](#), [Oscar Wilde](#), [Arthur Miller](#), [James Joyce](#), [Eugene O'Neill](#) and [Miroslav Krleža](#). Ibsen was nominated for the [Nobel Prize in Literature](#) in 1902, 1903 and 1904. Ibsen wrote his plays in [Danish](#) (the common written language of [Denmark](#) and [Norway](#)) and they were published by the Danish publisher [Gyldendal](#). Although most of his plays are set in Norway—often in places reminiscent of [Skien](#), the port town where he grew up—Ibsen lived for 27 years in [Italy](#) and [Germany](#), and rarely visited Norway during his most productive years. Born into a [merchant family](#) connected to the [patriciate](#) of Skien, his dramas were shaped by his family background. He was the father of Prime Minister [Sigurd Ibsen](#). Ibsen's dramas continue in their influence upon contemporary culture and film with notable film productions including *A Doll's House* featuring Jane Fonda and *A Master Builder* featuring Wallace Shawn.

It was a pleasure visiting Scandinavia, Norway – beautiful Oslo, rainy Bergen, the Fjords, enjoying especially Flom, where me and my family spent a few days; Sweden – Goteborg, beautiful Stockholm trying to figure the recent event where Cory's in-law Dan Shechtman received the Chemistry Nobel-prize, the museums, the streets, the palaces; Finland where we visited Helsinki and a farm nearby; Denmark – wonderful Copenhagen, that I describe as the paradise on earth as everything there is perfect, ethical, beautiful, the people, the scenery, the palaces, culture, ecology, and Denmark but also Sweden, Finland, Norway, get the best scores on all the parameters, except the climate of Scandinavia where it rains and is cold most of the time.

CORRUPTION, BUSINESS, CRIME AND GOVERNMENT - THE PLAY "THE THREEPENNY OPERA" - SUMMARY AND ANALYSIS

Based on the play "The Threepenny Opera" (1928) by Bertolt Brecht.

The film is based on the play with substantial changes:

Die Dreigroschenoper, 1931, 112 min., Director Georg Pabst, with Lotte Lenya, Rudolf Forster. Based on Bertolt Brecht and Kurt Weill's opera "The Threepenny Opera".

Summary and Analysis:

The musical play was written by the German Bertolt Brecht with music by Kurt Weill. It is adapted from an 18th century English play The Beggar's Opera by John Gay. The Threepenny Opera is perceived even today as a socialist critique of the capitalist world. It is set in London's Soho. The central character is Mack the Knife - Macheath, a murderer and robber who sees himself as a businessman. Mack the Knife "marries" Polly Peachum, whose father Jonathan controls the beggars of London. He is the boss of the "labor unions" of those days and is interested only in enriching himself at the expense of the poor. Peachum wants Macheath to be hanged, and he deserves so because of his crimes, but the robber is a personal friend of Tiger Brown the chief of police of London. Macheath is arrested, escapes and is imprisoned once more. Both Polly and his former "wife" - Lucy Brown, the daughter of Tiger Brown, try to rescue him but to no avail. When Mack the Knife is about to be hanged he is rescued by a messenger of the Queen with a happy ending. The most ethical character of the play is Jenny, a whore who loved Mack, who sings a ballad on how she leads a pirate assault on the city. The opening song about Mack has become a classic, describing the robber with white gloves and a hidden knife that nobody sees.

The play raises crucial dilemmas as: What is the danger in the cooperation between government and tycoons? Financing their political campaigns in return to subsidies to their companies, tips on economical measures, refraining from being sued even when caught on unlawful acts, etc. What are the dangers in the cooperation between crime, gambling, drugs and government, trade unions, leaders of the mob? How do the governments in some countries utilize the mob in their policy? How can democracies increase corruption? For example by permitting to the Mafia to infiltrate in the parties' organizations and influence the politicians. What about lobbying in favor of gambling, the tobacco industries, real estate companies? Examples where old buddies from the military service help each other when they get to key positions in the economy, government and trade unions. Is it legitimate, to what extent? Should civil servants be prohibited from going to work for companies which they were supposed to control?

Brecht describes in a captivating way the degeneration of wealth and power. How comes that this subject is modern and relevant from the times of John Gay's opera to nowadays? Who is today Mack the Knife and how does he manage to keep his gloves white, while nobody sees his knife? Do the governments of today support only tycoons and strong parties or weaker parties as well? Is it the purpose of democracy, the rule of the people, by the people and for their benefit? Is it true that today the rich get richer, the poor get poorer, and the middle class are disappearing? What will happen to democracies if this tendency will continue? Why is corruption bad for the economy, equality, minimizing the gaps between people, growth? Who benefits from corruption? Crime likes darkness, and unethical companies are looking for anonymity, just like Mackheath in the opening and ending song:

Moritatensanger:

“Und der Haifisch, der hat Zahne

Und die tragt er im Gesicht

Und Machheath, der hat ein Messer

Doch das Messer sieht man nicht.

Ach, es sind des Haifisch Flossen

Rot, wenn dieser Blut vergiesst.

Mackie Messer tragt ‘nen Handschuh

Drauf man keine Untat liest.

An ‘nem schonen blauen Sonntag

Liegt ein toter Mann am Strand

Und ein Mensch geht um die Ecke

Den man Mackie Messer nennt.

Und Schmul Meier bleibt verschwunden

Und so mancher reiche Mann

Und sein Geld hat Mackie Messer

Dem man nichts beweisen kann.”

(Brecht, Die Dreigroschenoper, The Threepenny Opera, Die Moritat von Mackie Messer, The Ballad of Mack the Knife, Act I, scene I)

“Streetsinger:

And the shark has teeth

And he wears them in his face

And Macheath, he has a knife,

But the knife one does not see.

Oh, the shark’s fins appear

Red, when he spills blood.

Mack the Knife, he wears his gloves

On which his crimes leave not a trace.

On a nice, clear-skied Sunday

A dead man lies on the beach

And a man sneaks round the corner

Whom they all call Mack the Knife.

And Schmul Meier disappeared for good

And many a rich man.

And Mack the Knife has all his money,

Though you cannot prove a thing.”

In order to denounce immoral crimes in companies, as for discovering the crimes of Mack the Knife, we have to be assisted by disclosers, as nobody sees the knives of immoral companies, which keep an impeccable facade and are assisted by the best lawyers and public relations. We need transparency otherwise nothing would ever be disclosed, and the law will never be

able to safeguard the interests of the stakeholders, whether they are rich like Schmul Meier or poor like Smith. Therefore, only light can raise the curtain on the unethical acts of companies.

Moritatensinger:

“Denn die einen sind im Dunkeln

Und die andern sind im Licht.

Und man siehet die im Lichte

Die im Dunkeln sieht man nicht.”

(Brecht, Die Dreigroschenoper,

Die Schluss-Strophen der Moritat, The Final Verses of the Moritat,

Act III, last scene)

“For the ones they are in darkness

And the others are in light.

And you see the ones in brightness

Those in darkness drop from sight.”

Other issues raised in the opera are: Has Mack the Knife any ethical dilemmas? Why does he cooperate with the authorities? Why he is not punished and pardoned by the authorities? Peachum as a trade union leader who collaborates with crime, tycoons and government to the detriment of those he is supposed to protect, reminding of analogies with trade unions in the US, France and the Soviet Union. Brown the Sheriff as a moral character, is he ethical? How does he compromise between Peachum and Macheath? Is Jenny the only moral character in the play although she is a whore? Why does she betray Mack? Ultimately, Brecht is an author of modern business ethics, who perceived eighty years ago the dangers of corruption.

THE THREEPENNY OPERA IN BERLIN IN GERMAN & TI'S LECTURE BASED ON IT

This was not the only time that I saw a play on the last row, as compared to the hundreds of times that I saw plays on the first rows. When I was in Berlin in 2010, I saw ten plays, each night a play, but most of all I wanted to see my favorite play - Brecht's and Weill's [Threepenny Opera in German](#) at the same theater when it was first performed in 1928. It was

also sold out, but I decided to go with Ruthy, my wife, to a performance and try to purchase at the last minute a ticket. And indeed we got two tickets in the last row at the last moment and had a fantastic and unique experience. The unique spell of this play can be achieved only in German.

On the day after, I gave a lecture on business ethics at the headquarters of Transparency International in Berlin, the largest ethical organization in the world. I based my lecture on the three acts of the play and gave a memorable speech to the top management of the organization:

Dr. Jacques Cory, gave a lecture on June 4, 2010, as Keynote Speaker to the management of Transparency International - TI - at its headquarters in Berlin. Moderator: Dr. Francois Valerian, Head of Private Sector Programmes, with the participation of Dr. Miklos Marschall, Regional Director Europe and Central Asia, and other executives. The topic of the lecture was "Drawing Lessons from the Great Recession of 2007-2010", and it was divided in three parts along the main themes of *Die Dreigroschenoper*, *The Threepenny Opera*, by Bertolt Brecht. The response to the lecture was enthusiastic, with a vivid Q&A of more than half an hour.

The first part on transparency, common to TI and Cory's books, appears in the first act of the play: The ballad singer in the Prologue - the ballad of Mack the Knife: "Und Macheath, der hat ein Messer, Doch das Messer sieht man nicht", And Macheath has got a knife, but the knife is seen by no one. Analogies between Mack the Knife and the criminals of Wall Street who hid their schemes and thefts offshore and off balance sheet, and no one saw their knives.

Und der Haifisch, der hat Zähne
Und die trägt er im Gesicht
Und MacHeath, der hat ein Messer
Doch das Messer sieht man nicht

And the shark, he has teeth
And he wears them in his face
And MacHeath, he has a knife
But the knife you don't see

An 'nem schönen blauen Sonntag
Liegt ein toter Mann am Strand
Und ein Mensch geht um die Ecke,
Den man Mackie Messer nennt

On a beautiful blue Sunday
Lies a dead man on the Strand
And a man goes around the corner
Whom they call Mack the Knife

Und Schmul Meier bleibt verschwunden
Und so mancher reiche Mann
Und sein Geld hat Mackie Messer
Dem man nichts beweisen kann

And Schmul Meier is missing
And many a rich man
And his money has Mack the Knife,
On whom they can't pin anything.

Jenny Towler ward gefunden
Mit 'nem Messer in der Brust
Und am Kai geht Mackie Messer,
Der von allem nichts gewußt

Jenny Towler was found
With a knife in her chest
And on the wharf walks Mack the Knife,
Who knows nothing about all this.

Und die minderjährige Witwe
Deren Namen jeder weiß
Wachte auf und war geschändet
Mackie welches war dein Preis?

And the minor-aged widow,
Whose name everyone knows,
Woke up and was violated
Mack, what was your price?

Refrain

Und die einen sind im Dunkeln

And some are in the darkness

Und die anderen sind im Licht
Doch man sieht nur die im Lichte
Die im Dunklen sieht man nicht

And the others in the light
But you only see those in the light
Those in the darkness you don't see

Doch man sieht nur die im Lichte
Die im Dunklen sieht man nicht

But you only see those in the light
Those in the darkness you don't see

The second part on the dilemma of profitability versus ethics, which according to Cory are compatible but according to many businessmen are an oxymoron. At the end of the second act Macheath and Jenny sing: "Erst kommt das Fressen, dann kommt die Moral", Voracity is the first thing, Morals follow on. We do not talk just about food, but voracity, excess, lavishness, salaries of hundreds of million dollars to the CEOs in parallel to layoffs of millions. When "Fressen" comes first, we never have time or resources for Ethics or Social Responsibility. That is why most of the translations of the play are wrong, as the following one, when they translate *Erst kommt das Fressen* by *First comes food*. My knowledge of German is quite limited by I know for sure that *fressen* is devour (and so says the dictionary), eat like an animal, like a pig. This changes completely the moral content of the play. If you translate *fressen* by *eat* or *food* you imply that those who are thieves and murderers do so out of necessity because they are hungry. But Mack the Knife was not hungry, and the crooks of Wall Street who caused unethically but legally the Great Recession are not hungry either. They devour like pigs the savings of the poor, of the middle class, of our pensions, they are rich people who steal because they are criminals, because they know that they will not be punished, that others will foot the bill of their crimes!

Ballade über die Frage "Wovon lebt der Mensch" (What keeps mankind alive?) - Deutsch

Macheath:

Ihr Herrn, die ihr uns lehrt, wie man brav leben,
Und Sünd und Missetat vermeiden kann,
Zuerst müsst ihr uns was zu fressen geben,
Dann könnt ihr reden, damit fängt es an.
Ihr, die ihr euren Wanst und unsre Bravheit liebt,
Das eine wisset ein für allemal,
Wie ihr es immer dreht, und wie ihr's immer schiebt,
Erst kommt das Fressen, dann kommt die Moral.
Erst muss es möglich sein auch armen Leuten,
Vom grossen Brotlaib sich ihr Teil zu schneiden.

Jenny:

Denn wovon lebt der Mensch?

Macheath:

Denn wovon lebt der Mensch?
Indem er stündlich, den Menschen peinigt, auszieht, anfällt, abwürgt und frisst.
Nur dadurch lebt der Mensch,
Vergessen kann, dass er ein Mensch doch ist.

Chor:

Ihr Herren, bildet euch nur da nichts ein,

Der Mensch lebt nur von Missetat allein!

English

Macheath:

You gentlemen who tell us how to live properly,
And how to avoid all sins and crime,
Must first makes sure that we have food to eat.
Then you can resume your talking, that's where it begins.
You with your paunch and us with our bravery,
You know what's best for all of us.
No matter how much you twist it, or try to change the truth,
First comes food, then comes the morals.
And it also must be possible for the poor,
To cut themselves a slice of the bread.

Jenny:

What keeps mankind alive?

Macheath:

What keeps mankind alive?
It's a fact that hourly people torture, oppress, strangle, and eat.
Only after man goes through that,
Can he forget that he is a man.

Chorus:

Your Gentlemen, imagine there is only you,
Mankind lives on crime alone!

The third part of the lecture and of the play is at the end of the third act when Mack the Knife is "Gerettet, gerettet!", reprieved, reprieved, and instead of being hanged for all his crimes the Queen of England (or the US President, European Prime Ministers, and so on), gives Mack the castle of Marmarel, likewise a pension of ten thousand pounds, like the criminals of the Great Recession who were bailed out (they could indeed sing with Mack the Knife – bailed out, bailed out...), whose schemes cost the world more than ten trillion dollars, as they were too big to fail, transferring the losses from their companies to the governments, i.e. to us. After socializing the losses in 2008 , they privatized the profits in 2009, with salaries and bonuses of billions leading the world as the pied piper of Hamelin to a Domsday Depression towards 2020, with losses of hundreds of trillions, while no government would be able to bailout them or us!

Der reitende Bote (The Riding Messenger) - Deutsch

Peachum:

Verehrtes Publikum wird sind soweit,
Und Herr Macheath wird aufgehängt,
Denn in der ganzen Christenheit,
Da wird dem Menschen nichts geschenkt,
Damit ihr aber nun nicht denkt,
Das wird von uns auch mitgemacht,

Wird Herr Macheath nicht aufgehängt,
 Sondern wir haben uns einen anderen Schluss ausgedacht,
 Damit ihr wenigstens in der Oper seht,
 Wie einmal Gnade vor Recht ergeht.
 Und darum wird, weil wir's gut mit euch meinen,
 Jetzt der reitende Bote des Königs erscheinen.

Chor:

Horch, horch, horch,
 Horch, horch, horch,
 Horch, wer kommt!
 Horch, wer kommt!
 Horch, wer kommt!
 Horch, wer kommt!
 Des Königs reitender Bote
 Horch, wer kommt!
 Des Königs reitender Bote,
 Des Königs reitender Bote kommt, Bote kommt, Bote kommt!
 Horch, wer kommt!
 Horch, wer kommt!
 Des Königs reitender Bote kommt, Bote kommt, Bote kommt!
 Horch, wer kommt!
 Horch, wer kommt!
 Des Königs reitender Bot

Macheath:

Gerette gerette!
 Ja, ich wusste es ja, ich wusste es,
 Wenn die Not am höchsten, ist die Rettung am nächsten.
 Wenn die Not am höchsten, ist die Rettung am nächsten.

Polly:

Gerettet, gerettet, mein lieber Mackie ist,
 Ich bin sehr glücklich.

Frau Peachum:

So wendet alles sich am End zum Glück.
 So leicht und freidlich wäre unser Leben, wenn die reitenden Boten des Königs immer kämen.

Peachum:

Darum bleibt alle stehen, wo ihr stehet,
 Und singt den Choral der Ärmsten der Armen,
 Deren schwieriges Leben ihr heute dargestellt habt.
 Denn in Wirklichkeit ist gerade ihr Ende schlimm.
 Die reitenden Boten des Königs kommen sehr selten,
 Und die getreten werden, treten wieder.

English

The public so far have been honored, And Mr. Macheath will be hanged,

In the name of Christianity.
 Nothing is given to these people,
 And noone thinks about it.
 That why we've joined together,
 To hang Macheath.
 But we've come up with an alternative ending,
 For you just to see in the opera.
 About how righteousness is enforced.
 The king's messenger appears.

Chorus:

Hark, hark, hark!
 Hark, hark, hark!
 Hark, who comes!
 Hark, who comes!
 Hark, who comes!
 Hark, who comes!
 The king's riding messenger!
 Hark, who comes!
 The king's riding messenger!
 The king's riding messenger comes, the messenger comes, the messenger comes!
 Hark, who comes!
 Hark, who comes!
 The king's riding messenger comes, the messenger comes, the messenger comes!
 Hark, who comes!
 Hark, who comes!
 The king's riding messenger!

Macheath:

I've been rescued! I've been rescued!
 Yes! I knew it! Yes! I knew it!
 When the need is at it's highest, the rescue always comes.
 When the need is at it's highest, the rescue always comes.

Polly:

Saved! My dearest Mackie is saved!
 I am so lucky!

Mrs. Peachum:

So it all ends in luck.
 So easy and free would our lives be if the kings messenger always showed up to save the day.

Mr. Peachum:

So everyone remains standing where they are,
 Singing hymns arm in arm.
 Their difficult lives have been represented here today,
 For in reality the ending is just as bad.
 The king's riding messengers rarely come,
 Those who have treaded will tread again.

EDUCATION, SOCIETY, SOCIAL RESPONSIBILITY THE PLAY "TOPAZE" - SUMMARY AND ANALYSIS

Based on the play:

Topaze (1928) by Marcel Pagnol

The films are based on the play with some changes:

Topaze, 1951, 136 min., Director Marcel Pagnol, with Fernandel, Jacqueline Pagnol

Topaze, 1933, 78 min., Director Harry d'Abbadie d'Arrast, with John Barrymore, Mirna Loy

Summary and Analysis:

Albert Topaze, a sincere and ethical schoolteacher works at a private school run by a supremely money-grubbing M. Muche, whose daughter also a schoolteacher makes cynical use of the knowledge that Topaze loves her. Topaze's naïve honesty brings him unjust dismissal. It makes him fair game for the "aunt" of his private pupil Suzy Courtois, really the mistress of the crooked politician Regis Castel-Vernac, who is looking for a new straw man for his schemes after the former one wanted too much money and left. Topaze, dazzled by Suzy, is lured to become the new straw man, but he soon discovers of the schemes and has a moral crisis. Should he continue cooperation, as he earns a lot of money or should he beat his employer in his own game and takeover the company as he is already its "official" owner. He decides to beat the system, ruins Regis, gets Suzy, bring Tamise as his assistant, and loses his ethics, according to the maxim: If you can't beat them join them and then beat them. The conclusion could be that ethics can't prevail in a corrupted world that manages to corrupt even the most ethical men and women. The attitude of society towards unethical businessmen is in many cases benevolent, admiring and respectful, while it scorns ethical conduct. The crooks are the smart guys, they are envied, and members of society want to resemble them.

In the beginning of the play we see maxims on the walls of Topaze's class: Poverty is not a vice, You would better suffer than cause sufferance, Money doesn't bring happiness. Topaze teaches his pupils moral, but his pupils don't seem to understand what it is all about. When Muche, his headmaster, wants Topaze to raise the grades of a bad pupil coming from a rich and noble family he is fired from the school. After Topaze discovers the schemes of Regis Castel-Vernac and cooperates with his employer, we see different maxims in his office:

‘Soyez brefs’ – be brief, ‘Le temps, c’est de l’argent’ – time is money, ‘Parlez de chiffres’ – speak in numbers. Topaze is a front man, a man of straw. He feels soiled and cannot suffer the look of an honest man. Topaze tries to maintain still that money does not bring happiness, but Suzy, the woman he loves answers him ‘No, but it buys it from those who make it’. In the corrupted environment he starts to prove himself and becomes much more competent than his colleagues.

The play describes the metamorphosis of Topaze from an ethical teacher to an unscrupulous crook, the temptation of Tamise, Topaze's friend, to cooperate with Topaze, the conduct of Muche, the headmaster, who is willing to sacrifice Topaze in order to keep a rich client's son in his school, the conduct of Suzy Courtois, who respects and admires money and who leaves Regis, who corrupted Topaze after Topaze manages to con his boss and takes over the company. In confrontation with his old friend, Tamise, he justifies himself: ‘All that I have done is legal. If society was just, I would have been in prison.’ And Topaze concludes: “Look at those banknotes, they can fit in my pocket but they will soon take form and color of my desire. Comfort, beauty, health, love, honors, power, I hold all this in my hand... You are bewildered, my poor Tamise, but I will tell you a secret: in spite of the dreamers, in spite of the poets and maybe in spite of my heart, I have learned the big lesson: Tamise, men are not good. It is power which governs the world, and this small rectangles of noisy paper, this is the modern structure of power.” Pagnol, alternatively pessimist and optimist, describes to us admirably the dilemmas of all of us and how many of us resolve them. If Topaze would have remained in his environment, as a teacher with an honest headmaster, he would have remained the most honest man. But it is because Topaze has suffered injustice and has joined a corrupted society that he has been corrupted himself and has sold his soul, while being convinced that he is on the right track. He becomes much more corrupted than his mentors, as he thinks that this is the only way to survive, and he finds justifications that manage to convince him as well. This is therefore the predominant role of the moral environment, which succeeds in most of the cases, especially with men who do not have a strong and well-formed character, to fashion its members into its image. Tell me who your friends are, and I will tell you who you are.

WEALTH, FAIRNESS AND ETHICS –

THE NOVEL "THE GREAT GATSBY"

SUMMARY AND BASIS FOR DISCUSSION

Based on the novel "The Great Gatsby" (1925) by Frances Scott Fitzgerald

The film is based on the novel with slight changes:

The Great Gatsby, 1974, 140 min., Director Jack Clayton, with Robert Redford, Mia Farrow

Summary and Analysis:

Nick Carraway, a New York bond dealer from the Midwest, befriends his neighbor Jay Gatsby, an extremely wealthy young man known for hosting lavish evenings in his Long Island mansion. Gatsby's great wealth is a subject of much rumor, nobody knows for sure anything about his past. Nick is the cousin of Daisy married to a millionaire Tom Buchanan, who has an affair with Mirtle Wilson, the wife of a cheap car garage owner. Daisy and Gatsby were in love before she met Nick, but she couldn't marry Gatsby as he was poor. With Nick's help they meet once again and begin an affair. When Tom discovers it he confronts Gatsby in an hotel room, Daisy runs away and Gatsby follows her. She drives his car and in a hit and run accident crashes into Mirtle who ran out to meet the car. Gatsby takes the blame on him, and Tom directs Wilson to him as the one who killed Mirtle. Wilson kills Gatsby and commits suicide. None of Gatsby's friends attend his funeral, except Nick. Nick describes Tom and Daisy as rich people who leave it to others to clean up their messes, but he pardons Tom and Daisy and moves back home.

The main issues raised by the book are: The turnabout of Nick, the narrator's attitude towards Gatsby, from scorn to whatever he stands for to admiration and friendship. Nick Carraway finds a career in bonds not because he likes it but because all his friends do the same. It shows the conformism of the narrator. West Egg and East Egg as a parable: West Egg where the nouveau riches, such as Gatsby, live, and East Egg where New York's "aristocrats" live, such as Tom and Daisy Buchanan. Tom comes from a very wealthy family and spends huge amounts of money without working in any field. His main occupation is playing Polo and conducting a very active social life. Daisy also comes from a very wealthy family. Nick describes Tom as an arrogant, aggressive, choleric, despising person, who is also a racist,

believes in the supremacy of the white race, very superficial intellectually, cheating his wife on every occasion and responsible for her miserable life. Gatsby was a Major during the war, a hero, a self-made man, who became rich in dubious ways, loves truly Daisy who is Nick's cousin, very sociable, a perfect host, a good friend. Why is it him and not Tom who gets murdered for a crime he has not committed and the wealthy criminals Tom and Daisy are not punished?

Nick believes that he is one of the most ethical people he knows, is it true? Even so, how comes that he admires more Gatsby with the dubious past and not Tom who comes from a respectable family? Who is more ethical, Tom or Gatsby, in what respect? What considerations were taken into account in Daisy's decision to marry Tom and remain married to him despite his despicable conduct? Is it because he is rich, they come from the same milieu, her family approves it, he is handsome, good-hearted? Why hasn't Daisy decided to choose Gatsby even when he got rich although she loved him and knew that he will remain faithful? All that in the context of American's society in the early twentieth century that was too much impregnated with prejudices against nouveau riches, Jews, Afro-Americans, Italians, Irish, poor people, everyone who did not belong to the elites. Wolfsheim and Gatsby believe that they can "buy" Nick, but he tells them that integrity is for him a supreme value. All the wealth of Gatsby, his house, his luxurious parties, were meant only to impress Daisy. Is it really effective, is he correct in his assumption that only wealth impresses her, even after she got disappointed from Tom's wealth and character?

Scott Fitzgerald manages to describe in a brilliant way how wealth and poverty are only a façade that beyond it are hidden eternal human behaviors, such as love, hate, envy, arrogance, cruelty, hypocrisy, greed... Is it not an oversimplification to say that money makes the world go around, is it true, in all cases, in the past, today, only in American society? Scott Fitzgerald describes brilliantly the phenomenon of the nouveau riches (reminding of Moliere's play *Le Bourgeois Gentilhomme*), what are their motives, how they despise the world that they come from, their envy to the old bourgeoisie, and their wish to be like them, even though it can never be achieved because of the poverty "smell" emanating from them? Napoleon said that he prefers lucky generals to talented generals. What are the reasons that Gatsby is so unlucky? A loser, who does not get satisfaction from anything? He remains an outsider, without any true friends, Daisy remains with Tom and he is murdered instead of him. The double standards of Tom who loses his temper when he learns that Daisy has a lover, although he has also a lover. Why is Gatsby more dangerous than the Wilsons? The double standards of Tom

who despises Gatsby because of the dubious way by which he got rich associating with the Jewish Mafia, while he himself is an idler who never earned a dollar from work, and maybe his ancestors got also rich being robber barons?

Daisy describes the "dilemmas" of the rich bums who do not have a positive contribution to society by asking what will they do in the afternoon, and tomorrow and in the next thirty years? When there is no *raison d'être* it brings to corruption, unethical conduct and degeneration. Gatsby believes that the voice of Daisy is silvery, this is her charm, her rich background, forever unattainable for the depressed Gatsby. He probably loves her because of what she represents and not because of her personality and this could be the reason why she leaves him. Nick arrives to the conclusion that there is no basic difference between human beings. Wilson reacts when he learns that his wife betrays him in a similar way to Tom when he learns that Daisy betrays him, however Wilson draws the conclusion of his crime and commits suicide while Tom cowardly commits an indirect crime going unpunished. The exorbitant eyes of T. J. Eckelberg in the huge poster near Wilson's garage: Those are the eyes of God, or of conscience, or of fate, morality and ethics. They see and know everything, and one cannot escape from them except the wealthy who always get away unpunished. Most of the novel takes place in a rich environment, in Gatsby's house, Tom's house, the Plaza hotel and so on. But in spite of this the protagonists are unhappy. The reason could be that if you haven't earned your money in an ethical way and with your own efforts you can never be satisfied by your fate. Or is it a wishful thinking?

The novel takes place a few years before the collapse of 1929, they live in a decadent world, without morals and ethics, and Scott Fitzgerald as a biblical prophet prophesizes what is going to happen. Is this situation similar to the modern era? Tom succeeds to deprecate Gatsby's image to Daisy when he tells her what are the origins of his wealth. She is horrified from it although the conduct of Tom is no less corrupted. The ethical criminals always find a moral justification to their crimes. They commit them for the benefit of the victims, they want to help society. Tom suspects that Gatsby ran over Wilson's wife on purpose, and that's why he convinces Wilson that Gatsby was his wife's lover. He gets rid of Gatsby with his white gloves with clean hands and conscience. However, it is Daisy who made the accident, but the loving Gatsby doesn't divulge it and because of his kindness he is murdered. Daisy knows the truth, that she killed Wilson's wife and Gatsby, but this does not disturb her peace of mind, because they do not belong to their world and their lives do not count anyway. It strengthens

her ties with Tom as they share those secrets and crimes. The victim is the underdog and the wealthy remain unpunished.

Scott Fitzgerald describes the cowardice of the wealthy who ran away from the scene of the crime, from their crimes and from Gatsby. The others behave bravely - Gatsby who was a Major at war protects Daisy and Wilson is not afraid of committing suicide. Daisy and Tom are not happy from what happened but are not also sad, they have a natural intimacy, egoistic to the extreme, despising the others and knowing that nothing would happen to them because of their wealth. The most transient difference between Tom and Gatsby is their self-confidence. Tom is confident that because of his background and wealth he is immune, the end justifies the means. While Gatsby is insecure because of his origins, instead of insisting to take Daisy from Tom, he waits passively until he is murdered as he cannot reach a decision. Gatsby is a novel on wealth and ethics. The narrator cannot forgive his rich friends or like them. He acknowledges that what they have done was entirely justified to them. They were careless people, Tom and Daisy - they smashed up things and creatures and then retreated back into their money or their vast carelessness, and let other people clean up the mess they had made... He shakes hands with them as he feels as though he is talking to a child. Nick doesn't tell the police of what he knows because of his cowardice and the pointlessness as he doesn't have any proof although he knows the truth. He forgives the criminals because they are children. What do you think, should they be forgiven, what is the point in calling criminals children or finding excuses for criminal conduct in a traumatic childhood? What is the analogy between the conduct of Tom and Daisy and the conduct of unethical companies? Should they be forgiven or should we fight this conduct relentlessly?

THE BEST BOOK BY THE BEST AUTHOR - "L'ARGENT" BY EMILE ZOLA

Based on the book "L'Argent" (1890) by Emile Zola

The film is based on the book with slight changes:

L'Argent TV 1988, 250 minutes, Director Jacques Rouffio, with Claude Brasseur, Miou-Miou and Michel Galabru

Another film based on the book with substantial changes:

L'Argent, 1928, 195 minutes, Director Marcel L'Herbier, with Pierre Alcover, Alfred Abel, Brigitte Helm

Summary and Analysis:

If we could choose one film, book or play that describes in the most trenchant way the dilemmas of business ethics, tycoons, the stock exchange, banking, and especially ethics for minority shareholders it is undoubtedly the book L'Argent (Money) by Emile Zola, which was adapted to the screen and the stage several times. Zola was one of the first, together with Ibsen, to deal with business ethics in literature and he did it in a superb way, in a moving style that touched readers and spectators very deeply. Zola, who was a social radical, dared to attack the capitalist system, the stock exchange, the tycoons and the banks, at least the "rotten apples" of this system.

The plot of the book takes place during the Second Empire, that of Napoleon III in France, the nephew of the great Napoleon. Napoleon III epitomized all the corruption and hypocrisy of French society, but also the glory, the joie de vivre and the debauched life. If the emperor had a mistress whom he acquired at an astronomical price, Aristide Saccard, the hero of the book, had to get her at a higher price, and ensured that all of Parisian high society knew it, as it was a status symbol and was also good for business. But Saccard was also close to a pure soul, Caroline Hamelin, who was attracted to him like a butterfly to a flame. She becomes his mistress and in spite of the enormous difference in their characters and way of thinking, she falls in love. His vitality, his unending energy and his occasional bursts of kindness facilitated her infatuation. Saccard, who was bankrupt, gains the confidence of a princess who founds an

orphanage from her own money, and he assists her pro bono. But he also tries to receive the management of her immense fortune from her, 500 million francs that she inherited from her husband. He wants to speculate with the money on the stock exchange, but she refuses categorically, as this money was acquired by her husband in unethical but legal ways on the stock exchange. Her husband was responsible for the loss of the savings of poor minority shareholders, and that is why she wants to invest it only in philanthropy and not be ashamed anymore.

Saccard was bankrupt because of his rivalry with Gundermann, a Jewish banker, serious and ascetic. Gundermann is the opposite of Saccard the hedonist. Both visit the same luxurious restaurants, but while Saccard eats the best gourmet dishes with the most refined wines Gundermann drinks only a glass of milk and behaves modestly in spite of his legendary wealth. At one of the family dinners of Saccard and Caroline, he hears from her brother, Georges Hamelin, that all the projects that Georges devised to develop Lebanon/the Middle East – mining, transport, schools, hospitals, industry, cannot actualize because of a lack of funds. George's vision fades, and he is unable to achieve his dream, as a fervent Catholic, to enable the Pope to return to the Holy Land and to spare him the humiliation that he receives from the nationalist Italians who want to chase him away from his territories. Saccard, the eternal entrepreneur, sees an opportunity in Georges' plans to sway the Catholic masses with the dream of reclamation of the desert in the Middle East and the Holy Land. He markets dreams, like the modern entrepreneurs, only a fraction of which ultimately succeed in their high tech ventures. Saccard chooses a challenging name: La Banque Universelle, no more, no less. One could ask: who is the true entrepreneur – Georges who had the vision, made the plans, spent long periods in the Middle East, or Saccard who implemented the programs in the real world, found the money (l'argent) to make the vision come true... or not, as we shall see later on?

Saccard meets Mazaud, a broker, and asks him to raise 25 million francs. "Think Big", as our modern tycoons would say, while leveraging their investment with unreasonable proportions of 10:1, ten times more loans than the private equity that they bring in. In Saccard's case, as in many other modern schemes, the entrepreneur doesn't bring any money of his own, because he doesn't have any or he doesn't want to risk it. If he succeeds - the benefits will be his because he was the entrepreneur, but if he loses - the banks or the shareholders will bear the costs. The slogan of many of the modern tycoons is to work with "Other People's Money". Mazaud is astonished at Saccard's daring, he knows that he doesn't have a dime, that the

project is not even his, and nevertheless he wants to raise tens of millions, later even hundreds of millions. But Saccard believes that you need two things in order to succeed in life: dream like a crazy and work like an animal, and he excels in both. When Caroline asks him if he doesn't want to rest he answers her that rest means death.

Saccard approaches a colleague who manages an Otoman Bank in the Middle East and wants to interest him in the project. The banker answers him in Russian and Saccard goes to his friend Sigsimond who speaks many languages and who is in the process of translating the Communist Manifest by Karl Marx. He is a fervent communist, but Saccard likes people who fight for their causes, such as Sigsimond the communist or Georges Hamelin the Catholic. Saccard says that "Passion" is the most important thing, it is what makes the world go around, it sounds like "Money/l'argent, makes the world go around" of "Cabaret" or "Greed makes the world go around", as maintained by Gordon Gekko in "Wall Street". Sigsimond reads the letter and tells Saccard that the Banker's answer is affirmative. Sigsimond is very ill and Bush takes care of him. Bush is a loan shark, who specializes in collecting bad debts. Thus, for many years he has been trying to find a man who gave IOUs to a young woman who gave birth to his child, but disappeared. By comparing Saccard's handwriting to that of this man, he understands that Saccard is the man he is looking for. Saccard has changed his name several times in his career because of his schemes, but Bush tells his partner Madame Mechain, that the time is not appropriate to approach Saccard as he doesn't have any money to pay for the IOUs. Indeed, Saccard is the same man that we know from Zola's previous book "La Curee"; he became rich and lost all his money several times, he was married twice, had plenty of mistresses. He even has a legitimate son from his first marriage to Renee – Maxime, who inherited money from his rich mother after she died, but his son doesn't want to help his father as he knows of his schemes. Saccard's illegitimate son from the young woman who received the IOUs is Victor, who became an unbridled vagabond. Originally Saccard was called Rougon, the origin of his family is from the south of France and he is the brother of Son Excellence Eugene Rougon (Zola's hero in another of his books in the series of the Rougon-Macquart), a prominent minister in Napoleon III's regime. Eugene disavows Saccard, as he knows of his schemes, and doesn't want to have any ties with him.

Saccard goes to a luxurious restaurant, where he meets Gundermann. He tells him defiantly that he has founded a new bank with a capital of 25 million francs. He asks him, cynically, if he would be willing to invest in his bank as the shares will rise enormously. Gundermann of course refuses and predicts that Saccard will fall once again, however from a greater height,

as he has connections and support from other tycoons, the Catholic milieu and possibly the Pope. Saccard's drive beyond the lucrative aspects, are ego considerations: he wants to win in the showdown with his rival, as it is a struggle between different temperaments, religions and ideologies. It reminds us of *The Merchant of Venice*, but this time the prudent Jew wins while the frivolous Catholic loses. It is not surprising if we remember that Zola would write "J'accuse" on the Dreyfus affair several years later. The world has evolved since the times of the Duke of Venice. We are in the 19th century, in a democratic France, but the hatred of the Jews was still prevalent. Nobody likes the stern Gundersmann, while masses of minority shareholders like Saccard very much and are even willing to forgive him his bankruptcy as the Jews are to blame in their conspiracy against the Catholics and the Pope. Zola based his novel on a similar case that had happened in France a few years earlier, when a Catholic bank collapsed because of its speculations and the Jewish Rothschild bank was blamed by those who lost their money. Yet, Saccard and his likes do not exist anymore, while the Rothschilds still exist and prosper. We know of course that speculation has nothing to do with religion. There are many Jewish (and Israeli) speculators who behaved unethically to their stakeholders, while other bankers and tycoons who were Catholic, Protestant or Moslem behaved ethically and meticulously fulfilled all their obligations. The Bible invented business ethics, but the Jews do not have the copyright on ethics. Business Ethics is universal and has nothing to do with religion and Zola proves it in his book *L'Argent*. Saccard also wants to prove to his arrogant brother Eugene that he can succeed even more than he had, as he is as good. The book proves to us, once again, that what makes the business world go around is not Adam Smith's invisible hand, but primarily feelings, psychology, love, hate, ego, envy and competition.

Saccard meets Huret, his brother Rougon's confidant, and asks him to intercede in his favor with his brother. Huret tells him that he doesn't have a chance, as Eugene despises him, but when Saccard offers him shares in the bank and a seat on the Board of Directors, Huret is willing to comply. Saccard tries to play the Catholic card but Huret tells him that Gundersmann has come to the rescue of the government with loans when it needed them and the stern banker has the favor of the Emperor. Saccard tells Caroline that the business world is like a war and those who are afraid die first. All that happened long before the admiration street fighters get today. Zola "invented" modern business ethics, and if I had to choose between reading the books of the best modern ethicists or Zola's "*L'Argent*", I would recommend Zola, as he encompasses most of the issues in a much more interesting way.

Saccard is willing to risk everything (especially as it is not his money), he has the mentality of a gambler, as it is his only possibility to rise once again from the ashes. Zola also invents the "externalities" here, the stakeholders bear the costs and risks, while Saccard doesn't risk a thing. The directors of La Banque Universelle have not invested anything in the Bank; they have received their shares (illegally) from Saccard, if they are "wise" enough they can sell their shares at their peak as some of them do, if they are too loyal they risk losing their money and reputation. Yet, this is only in Zola's book. Zola, who is a moralist, shows that at the end the speculators lose, bringing down thousands of innocent minority shareholders with them, while in modern economies in most cases the unethical businessmen do not bear the costs of their speculations, except in a few cases such as Enron, WorldCom, Barings and so on. By externalizing the costs and the risks, those who pay the price are the minority shareholders who lose their savings, the employees who lose their jobs, the banks who lose their loans, the suppliers who are not paid and the customers who don't get the goods and services that they paid for, and, of course the environment and the community who have to pay to remove the toxic waste.

Caroline is in love, she is still young but has grey hair after suffering from an earlier love affair. She only sees Saccard's positive sides: he is brave, impulsive and generous. In comparison to him, Daigremont is much more cynical. He is a tycoon who wants to win easily, eat and drink in the best restaurants, have women and entertainment, with a minimal risk. He is willing to cooperate with Saccard as long as he has something to gain from it. Daigremont is willing to join the bank but only if Rougon backs the venture. Saccard adds Sabatini to the Board; here is an unscrupulous hedonist with a dubious past, who remained friendly with Saccard in his bad moments. Another acquisition to the Board is the Marquis de Bohain, contributing his name and pedigree to the Bank. However, he is also a hedonist who cheats in cards and entangles Saccard in his problems. Another protagonist in the novel and the film is the journalist Jantrou, who founds a journal named *L'Esperance* (Hope) with Saccard's money. He is Saccard's straw-man, writing laudatory articles about him and the Bank, as well as about the regime and Rougon. Huret intercedes with Rougon in favor of Saccard, but the minister answers him: "Let my brother do whatever he likes, but he shouldn't count on me". But Saccard tells Huret: "The ministry is not eternal, the empire is not eternal, but money is eternal". Finally, he convinces Huret to tell everybody that Rougon cannot back up Saccard openly because he is his brother, but he said nevertheless: "Let my brother do whatever he likes". Telling half truths and not behaving transparently is something as

common in Zola's time as it is nowadays. Huret doesn't repeat the end of the sentence, he remains vague, he doesn't disclose the bad news, and exaggerates the good.

The conscientious and moral Caroline, who became Saccard's mistress, continues to be skeptical of her lover's work methods, but he shows her her brother's plans of and convinces her that he'll manage to build factories, mines and schools from them. People will find employment, sick people will be cured, prosperity will be achieved. Caroline is worried, as according to the law, the issued capital should also be paid up, but some of the founders have not paid for their shares, like Huret and de Bohain. He appeases her by telling her that everybody does the same thing, another typical excuse of unethical businessmen. The bank keeps some shares illegally, under the name of Sabatini, who is his straw-man, exactly like Topaze in Pagnol's play, written 40 years later. Saccard mocks Caroline who is always worried, but she answers him that she loves him and doesn't want him to be hurt. And, indeed Saccard has a winning personality, he is liked by almost everybody, like many unethical businessmen (Gordon Gekko, to name one). It is hard not to like him as it is easy to hate Gundermann the righteous, cold and distant man, with his eternal glass of milk. Drinking milk and not wine to a Frenchman is probably pure heresy. However, Saccard also wants his bank to be perceived as a modest and serious bank, it is a bank working for people with modest income, with a solid appearance, a modest building, he even asks for the Princess' permission to locate the bank initially in her orphanage. But later on, Saccard intends to start his speculations. He thinks that the Bank's regulations are intended only for the notaries, it is not regulations that built the Suez Canal, it is the energy, the inventiveness, the vision. He says that speculation, to the masses, is a dirty word, but it is speculation (in Boesky's words Greed) that develops the country, it is the new world, it reinforces. Without the stock exchange and speculation everything is small, it is at a standstill, it is dead. But with the stock exchange everything is possible, there are factories, employment, railways, prosperity, and new opportunities. MONEY (L'ARGENT) IS GOD, ALL THE WORLD WILL BE RICH WITH THE BANQUE UNIVERSELLE, AND EVERYBODY WILL BE HAPPY, BECAUSE OF ME!, says Saccard. Saccard is much more convincing than Ivan Boesky or Michael Milken. He is much more picturesque, true and credible, although he is fiction and they are real, but Zola's style is so real that he makes a fictional novel sound like a documentary.

Saccard governs the Board of Directors in typical corporate governance, where the yes-men agree with whatever Saccard does, even if it is unethical or illegal, nobody cares about the minority shareholders anyway and everybody owes his seat to Saccard. The film chooses to show the Board meeting like in a silent movie and as a matter of fact an earlier version of "L'Argent" was a silent movie by L'Herbier. Words are superfluous anyhow, as nothing is different in Board meetings of unethical companies, either in Zola's times or nowadays. Gundermann says about Saccard: "Saccard thinks that I despise him because he is not a Jew. It is untrue. I will break him as I respect our mission as bankers. I don't like people fooling with the seriousness of the banks. I will let him grow, take his revenge on me and then I'll break him." And in the meantime the shares are sold at higher and higher prices. Pensioners buy them, as do noblemen and merchants. But Maxime is not willing to invest in his father's bank, he knows too well who his father is. At the Shareholders' Meeting nobody asks any questions, decisions are taken unanimously. We should bear in mind that as always Zola was a pioneer, he was one of the first to describe at length what happens in Board meetings, shareholders' meetings, banks, minority shareholders, speculation, entrepreneurs. Today it is obvious, but in the romantic 19th century his naturalistic approach was unheard of. However, even today Zola's "L'Argent" seems modern, as if it were written in the US, France or Israel of the years 2000. His protagonists are immortal, his plot is universal and his insight is unmatched.

Saccard asks his friend Sigsimond how in his communist world people will live without money, and he answers him "they'll live freely". The communist is even eager that Saccard succeed, as in the days of the revolution the proletariat will nationalize all the private enterprises and instead of nationalizing many banks they'll have to nationalize only one - Saccard's. Lenin would say a few years later that the worse it gets the better it gets for the communists, who managed to rule Russia because of the catastrophes of the Tzarist regime. We are curious to know what Zola would say of the neo-liberal world of today, with a few tycoons and multinationals controlling the world's economy, not so far from the communist world of Sigsimond and the Soviet Union where the state controlled everything, and very similar to the worship of speculation, greed and money by Saccard. Speculation and greed are bad; they ruin companies, economies, make millions miserable and enrich the few. Gundermann's way of thinking is sensible, cautious, moderate, even if he or his likes are not as charismatic as Saccard or Gekko. Masses and shareholders tend to follow the demagogues, the speculators, the panaceas of the scoundrels. We are today somewhat blasé, tired of

revolutions: fascists, communists, nationalists, tired of socialists, neo-liberal and ultra-capitalist regimes. We should return to the basics: to Aristotelian moderation, to Stiglitz's third way, to Zola's neo-social doctrines. Extremism is bad; we have seen it from the French revolution to Milton Friedman's nightmarish inhuman world where you have to maximize profits, widen the social gaps, pay exorbitant salaries to executives, while more and more people have McJobs. The third way doctrines are not utopic, they exist in Scandinavia, in the Netherlands, even in many ways in France. They don't exist in the US or in Israel and in many other countries, but reading Zola's novels, studying Stiglitz's academic books and watching movies like Erin Brockovich could assist in bringing about the changes. This is the ultimate purpose of my book in bringing together all these elements and illustrating them by case studies based on an international business career, academic studies and teaching, and analyzing the immortal masterpieces of Zola, Ibsen, Arthur Miller or the prophet Amos.

The minority shareholder is characterized by the junior employee of the newspaper Dejoie, who invested all his savings in the Bank's shares in order to pay for his daughter's dowry. When the Bank collapses, he blames his ambition (the victim's syndrome) not Saccard. In some way he is right, as he had enough money for the dowry but then he wanted to have money for his pension as well, and his appetite grew bigger and bigger until the price of the shares collapsed and he lost everything. So, should we blame him for being greedy or Saccard, who ruined Dejoie? I believe categorically that there is only one guilty party: Saccard. Dejoie is "blind" and Saccard put a stumbling block to his feet, like in the Bible's time, like in the subprime mortgage crisis. He doesn't have the insider information of Saccard, he is innocent and cannot follow the intricacies of the stock exchange. Of course he shouldn't speculate, people like him should save money in saving accounts and it should be forbidden for pension funds to invest in the stock exchange, least of all in speculative shares. If pension funds want to invest a small amount of their funds in the stock exchange they could at least do it in Ethical Funds and thus avoid the risks of unethical investments. Dejoie's daughter leaves him as her fiancé broke the engagement and she is not willing to forgive his father. She runs away with an "aged" man of 40 in a way that will bring her to perdition. Dejoie cries in the presence of Caroline after the bankruptcy and when she blames Saccard he resents and says: "Saccard was right when he persuaded me not to sell. The business is fantastic. We could have won if the traitors hadn't have left us. Only Saccard can save us now and it is a pity that he was sent to jail. I told the judge to give him back to us and I'll give him all my savings, my life, once more as this man is God, he did whatever he wanted. Tell Saccard when you see

him that we'll always be with him." After these astonishing and true statements of the minority shareholders who never learn, we should not be surprised if Gilda, Rigoletto's daughter, is willing to sacrifice her life in order to save the life of the man who abducted her, the Duke of Mantua, who complains that women are frivolous, *la donna e mobile*. The victims' syndrome is a very common mental sickness in love as on the stock exchange.

Back to the novel's plot – Saccard doubles the capital of the Bank, he raises money from the public several times at higher and higher prices, as he is always short of money in order to keep up with the speculation. He illegally keeps 3,000 shares, which could assist him in crucial votes at Shareholders' meetings, as he knows that Gundermann is secretly buying shares in the Bank in order to ruin him in due course. Saccard forces George to sign a false statement stating that all the shares were funded and he entangles him in an illegal act that could put him in jail, as indeed ultimately it does. When George and Caroline come to Saccard in order to pay for the shares that they have illegally received for free, after they inherited enough money to pay for the shares, Saccard doesn't allow them to do so. His rationale is that they deserve the money for their initiative, but he really wants to make them his accomplices, after they declared that they had paid for the shares and the books had been forged accordingly. The tycoons have a vital interest in making their partners accomplices in their schemes as in this manner they cannot disclose all the illegal deeds of the tycoons. When the partners participate in the schemes they do it for "peanuts", while the tycoons gain the millions, in most of the cases they sign on behalf of the tycoons as Georges did for Saccard, Bud Fox did so for Gordon Gekko, and all the junior managers do it for their bosses, unless they become state witnesses, as in Enron or in other scandals. Caroline is worried because of the war with Prussia that is imminent, but Saccard tells her that it doesn't interest him, as all his thoughts are with the Bank and the minority shareholders... This is another typical excuse of unethical tycoons who are always worried about the employment of their employees, the welfare of the community, the country's prosperity, while they are maximizing their profits to the detriment of all the stakeholders, the minority shareholders; they don't pay taxes, externalize the waste and hurt the environment but advertise that they are green companies who donate 1% (!) of their profits to welfare, while obtaining the other 99% by schemes and unethical acts. And Saccard summarizes that the motto of business is to create a snow ball based on the trust of the shareholders.

The Baroness Sandorf is a compulsive speculator who invests all her money without the knowledge of her husband, who is a counselor in the Austro-Hungarian Embassy in Paris.

Jantrou, the journalist, is willing to give her some insider information in return for her favours, but she prefers to give them to Saccard, who treats her like a prostitute, but delivers some useful information from time to time. Saccard and Jantrou mislead the investors with disinformation on the happenings in Lebanon, where the Bank's money is invested in order to enliven the speculation. What is essential is not what happens but what is reported in the newspaper; this is a kind of virtual reality, of a perception of the truth and not of the sheer truth. The only truth is what is written in the news, and, of course, they never heard of transparency. The strong ties of unethical tycoons with the media are present throughout books, plays and films such as *An Enemy of the People*, *The Visit*, *Topaze*, *The Insider*. Sometimes the role of the media is positive, as in *The China Syndrome*. In *L'Argent*, Jantrou wants to convince the readers that the imminent war with Prussia will not affect the Bank as all its investments are in the Middle East. Caroline who is always worried prays "God, make all this succeed", and Saccard replies: "Leave God outside, he is too far away from the stock exchange". Saccard receives insider information from his partner Huret that France was summoned to act as a mediator in the Austro-Prussian war and the war is nearing its end. He decides to risk all his money (correction – other people's money that he controls) and all the money of the saving accounts of the Bank's clients (without their knowledge of course) to speculate, resulting in a huge profit of 20 million francs. Saccard doesn't risk anything, he knows for sure, because of the insider information, what the result of the war will be and this shows, once again, how the market is not perfect, as maintained by all the neo-liberals. If the speculation succeeds the Saccards benefit from all the profits, but if it fails it is the minority shareholders, the clients and the employees who bear the costs. If worse comes to worse, Ken Lay and Jeff Skilling are called Bad Apples and those who were not caught continue their schemes in spite of Sarbanes-Oxley.

Saccard wins 20 million francs and gives a million to Georges and Caroline. He is undoubtedly generous, he is not a miser; he helps his accomplices, in contrast to Gundermann, who doesn't keep his word. And Gundermann summarizes the event in his laconic way: "I like the profit of 20 million francs that Saccard has made. It will make him conceited and it is like the plague". Caroline tells Saccard that he has become a slave to money, but Saccard answers her that money is a vehicle to create employment, education, hospitals, prosperity. This dual language is like a mantra of unethical tycoons. Saccard buys a palace from Gundermann for the Bank; it is no longer the modest bank but an extravagant bank, as Enron was an extravagant company before it collapsed. This time Saccard explains it

by saying that the clients would prefer a sumptuous bank, a bank that makes plenty of money and shows it off. And de Bohain even adds "and an honest bank as well". The share price of the bank is now 1,300. Caroline continues to love Saccard, as he has something exciting, gentle, that makes her forget his swindling. In the meantime he continues to artificially boil the kettle of the market until it explodes. Saccard's new ambition is to reach a price of 3,000, not the employment of tens of thousands; he has forgotten this argument, it is now sheer speculation.

In one of the comic interludes of the film we see a ball in Parisian high society near the end of the reign of Napoleon III. Saccard's new mistress, who has been the emperor's mistress, introduces the two. Bismarck, the guest of honor at the ball, who will, in a short while, win the war against France and make the rotten regime collapse, remarks: "Both started from zero, both will have the same end, the end of the adventurers". But Saccard is at the height of his career and believes that his success will last forever. Daigremont raises a toast in Saccard's honor at the ball and congratulates him for being the King of Paris. Meanwhile, a friendship starts between Maxime and Caroline. He urges her to leave Saccard and not to endanger her money in his schemes as he ruins everyone with whom he works. Maxime sees Georges as a weak man who is under the influence of the charismatic Saccard; he is risking his reputation and freedom with the false financial statements, the straw-men, the false statements on the capital of the Bank, the fraud on the Bank's books. Caroline is weighing whether to sell her shares but decides not to do so, as she believes and loves Saccard and could not face his disappointment if he learned about it. But Huret tells Saccard that he doesn't believe in him anymore and forces him to buy out his shares in cash. Saccard's friends start to leave him, but even at the price of 3,000 Saccard has no intention stopping, because if the price stagnates the shareholders will lose their confidence in the Bank and start selling their stock, and Gundermann will take over the Bank. The final gunfight between the two is imminent. Finally, Caroline sells all their shares after seeing that the Pope is not willing to back up Saccard. The Pope is not willing to back up a speculative bank even if it is Catholic. Saccard conceals the decision by the Pope from the public, as he is afraid of the collapse of the share' price. The Baroness comes to Gundermann and offers him information in return for assistance. Gundermann tells her that he is aware of the conduct of all the directors of the Bank. He confesses that he is a lonely man without any joy of life. He promises to recompense her generously. However, when she tells him of all the plans made by Saccard, her lover, he sends her away without giving her anything, because he doesn't like traitors.

When she insists on receiving some piece of advice from him he tells her: "Don't deal with money, it makes you ugly". Gundermann's conduct presents us with another ethical dilemma: should you reward squealers who assist you or not. What is more important: a promise made by Gundermann or not keeping a promise to squealers?

The price of the share reaches 3,000. Saccard is exhilarated, but more and more people are leaving the sinking boat. The last of them is Jantrou, Saccard's closest counselor. Gundermann has already purchased 40% of the capital of the bank. He lets Saccard know that he is going to attack him on November 22, the day of the dividend' payment. Gundermann plans to sell more shares than Saccard could buy, thus making the Bank collapse. Saccard is convinced that he is going to win this time also and that he will become France's no. 1 banker. However, Daigremont betrays him, after learning that Rougon doesn't back his brother; he sells all his shares. Saccard then tries to convince his former friend, in the name of the small shareholders who are going to lose all their money. Daigremont tells him that he should have thought of them before he lied to him about his brother. After the fall, Mazaud, the broker who committed fraud and lost his reputation, commits suicide. His wife and children discover his body when Caroline visits them. And Maxime tells Caroline: "My father has caused victims throughout his life: his wives, his mistresses, his friends, those who trusted him, you, your brother, me, all of us were betrayed, were knifed by him, and when I think that he called his newspaper Hope, he should have called it shame, lie, rubbish". Caroline, still backing Saccard, tells Maxime that Saccard was willing to sell all his belongings in order to save the minority shareholders, but he hasn't had enough time to do it. Only after she visits Saccard in jail she is convinced that he is an incorrigible cheat without remorse. He claims that they call him a cheat because he has lost the battle, but if he had won, everybody would have praised him as they had in the past. He has no remorse, as he is not guilty, he hasn't caused the death of Mazaud, Daigremont has done it with his betrayal. However, in his trial he intends to disclose everything and reveal the behaviour of the elites, the haute finance, all those who have brought about his ruin. He will make them share his ruin, they will fall with him and he will start all over again. He will even find money to compensate the minority shareholders. But those have lost everything, their world has collapsed, their lives are ruined. Caroline is too sensitive to their fate and when Saccard tells her that he'll make her rich once again, when she sees that he has no remorse, she decides to leave him. However, as nowadays, the rotten apples don't pay the price. Rougon who is afraid of the scandal involving his reputation as well, decides to banish his brother to Amsterdam. In the puritan Netherlands Saccard starts all

over again, making a presentation to a Dutch Board of Directors, trying to convince them to build a huge dam in order to dry part of the sea; it will be a project similar to the Suez Canal, which will add huge amounts of fertile soil to the small country, bringing about employment and prosperity. And he ends by saying: "Give me the money and I'll give you life". Saccard perceives himself to be like God, who brings life, not like Satan, who brings destruction. He continues in his endeavors, like many other unethical tycoons who destroy economies, the lives of innocent people, the ecology and even the earth. The ethical people can unite against the demonic power of the Saccards, as we - workers, customers, the community - have the power, as ethics is the ultimate guarantee for justice, prosperity, life!

THE WORK OF EMILE ZOLA, THE ULTIMATE ETHICIST

Based on the book: "La Curee" (1871) by Emile Zola

The film is based on the book with substantial changes:

The Game is Over, La Curee, 1966, 98 min., Director Roger Vadim, with Jane Fonda, Michel Piccoli, P. McEnery

Based also on the books:

"Le ventre de Paris" (1873) by Emile Zola

"L'Argent" (1891) by Emile Zola

"Zola" (1992) by Henry Troyat

Based on the film:

Life of Emile Zola 1937, 116 m., Director William Dieterle, with Paul Muni, Henry O'Neill

Summary and Analysis:

Renee, a young woman, is married to an elderly tycoon Aristide Saccard who sacrifices her in order to get richer. She loves his son from a first marriage and is ready to leave all her wealth in order to live with him. However, Maxime, much like his father although a weaker person, prefers to abandon her in order to marry a rich woman, whose father can assist Aristide in his business. Aristide Saccard, the hero of L'Argent as well, has no scruples or ethics, and his wife, son and friends are merely pawns in his ambitious schemes. La Curee describes also insider dealings, real estate speculation, endless ambition, the world of get-rich-quick, and many more topics treated in business ethics courses. If we compare the family relations in La Curee to An Enemy of the People, can we draw conclusions on the secret of a happy marriage, is it ethics? Or is there no correlation between family and ethics? Can a man be ethical in his family relations and unethical in his business relations? Can a man betray his wife and conduct ethically to stakeholders? Or rather can a man be an exemplary family man and be the worst unethical and corrupted businessman?

La Curee describes the degeneration that comes to a family because of excessive richness, but Zola who describes all the layers of society describes similar family degeneration in the lower classes as well, such as in L'Assomoir and Nana. Emile Zola describes in his book 'Le Ventre

de Paris' - 'The Belly of Paris' the conduct of Lisa Quenu-Macquart who finds herself in an ethical dilemma that would make a good case study on ethics. Florent, her husband's brother, has fled from the Devil's Island where he was imprisoned because of subversive conduct toward the regime of Napoleon III. He has the right of his part of the inheritance and she decides to give it to him, by fundamental honesty. She wants to give him the money, but Florent insists that she keep it in her butcher shop. "Vous avez tort, dit-elle, comme pour conclure. J'ai fait ce que je devais faire. Maintenant, ce sera comme vous voudrez... Moi, voyez-vous, je n'aurais pas vécu en paix. Les mauvaises pensées me dérangent trop." (Zola, *Le Ventre de Paris*, p. 106) "You are wrong, she said, as to conclude. I have done what I had to do. Now, it will be as you wish... You see, I would have never lived in peace. Malicious thoughts disturb me too much."

Lisa is the epitome of honesty; her conscience does not reproach her of anything; she does not owe a penny, is not part of any skullduggery; she buys and sells good meat, she does not charge more than her competition... The dishonest people are people like Saccard her cousin the financier, the hero of *L'Argent*, the speculators, those who despoil the poor people. She is a proud 'minority shareholder' who despises the 'majority shareholders', the mighty. "C'est bon pour nos cousins, les Saccard, ce que tu dis-là. Ils font semblant de ne pas même savoir que je suis à Paris; mais je suis plus fière qu'eux, je me moque pas mal de leurs millions. On dit que Saccard trafique dans les démolitions, qu'il vole tout le monde. Ça ne m'étonne pas, il partait pour ça. Il aime l'argent à se rouler dessus, pour le jeter ensuite par les fenêtres, comme un imbécile... Qu'on mette en cause les hommes de sa trempe, qui réalisent des fortunes trop grosses, je le comprends. Moi, si tu veux le savoir, je n'estime pas Saccard... Mais nous, nous qui vivons tranquilles, qui mettront quinze ans à amasser une aisance, nous qui ne nous occupons pas de politique, dont tout le souci est d'élever notre fille et de mener à bien notre barque! allons donc, tu veux rire, nous sommes d'honnêtes gens!" (same, p. 238-239) "It is good for our cousins, the Saccard, what you say here. They pretend to ignore that I am in Paris; but I am prouder than them, I don't care about their millions. They say that Saccard speculates in real estate, that he steals from everybody. It doesn't surprise me; he started like that. He likes money to roll with it on the ground, in order to throw it afterwards from the windows, like a fool... I understand that people of his kind who earn exorbitant fortunes have questionable conduct. For myself, if you want to know it, I don't estimate Saccard... But we who live quietly, who will need fifteen years to achieve an easy life, we

who are not preoccupied by politics, whose only concern is to raise our daughter and row our boat properly! Come on, you are kidding, we are honest people!"

And it is this honest woman, who ultimately finds the political discussions of Florent despicable, who cannot stand the smell of fish that Florent brings to the table as it prevents her from eating, she – who probably has the smell of pork from her butcher shop. She thinks that Florent eats too much but he doesn't enjoy it. He cannot even get fatter, the miserable, as he is eaten up by his malice. The honest lamb Florent has become a wolf in the imagination of Lisa, when she sees that she can profit from the inheritance. "Elle s'était approchée de la fenêtre. Elle vit Florent qui traversait la rue Rambuteau, pour se rendre à la poissonnerie. L'arrivage de la marée débordait, ce matin-là; les mannes avaient de grandes moires d'argent, les criées grondaient. Lisa suivit les épaules pointues de son beau-frère entrant dans les odeurs fortes des Halles, l'échine pliée, avec cette nausée de l'estomac qui lui montait aux tempes; et le regard dont elle l'accompagnait était celui d'une combattante, d'une femme résolue au triomphe." (same, p. 242-3) "She approached the window. She saw Florent cross Rambuteau Street and reach the fish shop. The tide overflowed this morning; the mannas glistened like silver, the fishmongers' auctions were at their peak. Lisa followed the pointed shoulders of her brother-in-law entering the Halles, his back curved, with a nausea of the stomach that reached his temples; and the look with which she accompanied him was a look of a warrior, a woman resolute to win." Florent was condemned because of his smell of fish, of his 'malice', but really because these excuses gave her the legitimacy to steal his part of the inheritance that she coveted without admitting it, as she was honest. Exactly like those who condemned Captain Dreyfus to exile to the same Devil's Island where Florent was imprisoned, because of his Jewish smell, his treason, his innocence. And Zola, who 20 years later condemns the honorable and honest men who have judged Dreyfus in 'J'accuse'; blames Lisa of her treachery and honest people of their covetousness, after the policemen take Florent to prison. "Les bandes de lard entrevues, les moities de cochon pendues contre les marbres, mettaient la des rondeurs de ventre, tout un triomphe du ventre, tandis que Lisa, immobile, avec sa carrure digne, donnait aux Halles le bonjour matinal, de ses grands yeux de forte mangeuse. Puis toutes deux se penchèrent. La belle Mme Lebigre et la belle Mme Quenu échangeaient un salut d'amitié. Et Claude, qui avait certainement oublié de dîner la veille, pris de colère à les voir si bien portantes, si comme il faut, avec leurs grosses gorges, serra sa ceinture, en grondant d'une voix fâchée: 'Quels gredins que les honnêtes gens!' " (same, p. 424) "The packs of bacon, the half porks hung over the marble, put over there roundness of bellies, a whole

triumph of bellies, while Lisa, motionless, with her imposing dignity, gave to the Halles the good morning, with her large eyes. Then both of them stooped over. The beautiful Mme. Lebigre and the beautiful Mme. Quenu said a friendly hello to each other. And Claude, who certainly has forgotten to dine yesterday, furious to see them so healthy, decent, with their large bosoms, gripped his belt, while growling in an angry voice: 'What scoundrels are the honest people!' "

But the simplistic segmentation of Lisa between simple and honest people and rich and corrupted people has no value, as we should not personify the minority shareholders as weak and honest. The majority shareholders can be more honest than the minority shareholders and this book does not intend to idealize the honesty of the weak. Those weak masses can become wolves when they have the opportunity, exactly like Lisa has become a wolf to Florent. Human nature is the same, among the mighty and the weak. The only reason to safeguard the interests of the stakeholders and minority shareholders is for justice and ethics to prevail and allocate the same rights to the strong as to the weak, exactly like in the democracies. The same rights, even if they abuse them, even if they do not deserve them. For it is impossible to pronounce an ethical judgment on the personal value of every one of us. We can always find excuses why we have to abolish the rights of others, legitimate or not, as we are wolves or lambs subsequently or simultaneously, depending on who describes the case.

Zola describes in a magnificent way the panacea of the board of directors in his famous book 'L'Argent', Money. One would think that Zola had participated in hundreds of board meetings in recent days in the US, Israel or France. Only a genius writer like Zola can remain immortal and stay modern, even after more than 100 years. "Saccard avait acheve de mettre la main sur tous les membres du conseil, en les achetant simplement, pour la plupart. Grace a lui, le marquis de Bohain, compromis dans une histoire de pot-de-vin frisant l'escroquerie, pris la main au fond du sac, avait pu etouffer le scandale, en desinteressant la compagnie volee; et il etait devenu ainsi son humble creature, sans cesser de porter haut la tete, fleur de noblesse, le plus bel ornement du conseil. Huret, de meme, depuis que Rougon l'avait chasse, apres le vol de la depeche annoncant la cession de la Venetie, s'etait donne tout entier a la fortune de l'Universelle, la representant au Corps legislatif, pechant pour elle dans les eaux fangeuses de la politique, gardant la plus grosse part de ses effrontes maquignonnages, qui pouvaient, un beau matin, le jeter a Mazas. Et le vicomte de Robin-Chagot, le vice-president, touchait cent mille francs de prime secrete pour donner sans examen les signatures, pendant les longues absences d'Hamelin; et le banquier Kolb se faisait egalement payer sa

complaisance passive, en utilisant a l'étranger la puissance de la maison, qu'il allait jusqu'à compromettre, dans ses arbitrages; et Sedille lui-meme, le marchand de soie, ebranlé a la suite d'une liquidation terrible, s'était fait prêter une grosse somme, qu'il n'avait pu rendre. Seul, Daigremont gardait son indépendance absolue vis-a-vis de Saccard; ce qui inquietait ce dernier, parfois, bien que l'aimable homme restât charmant, l'invitant a ses fêtes, signant tout lui aussi sans observation, avec sa bonne grace de Parisien sceptique qui trouve que tout va bien, tant qu'il gagne." (Zola, *L'Argent*, p. 310-311)

"Saccard had succeeded in getting hold of all the members of the board of directors, in buying them out literally, in most of the cases. It is due to him, that the marquis de Bohain, compromised in a story of bribing equivalent to a swindle, discovered with his hand in the bag, could escape from a scandal, by compensating the robbed company; and he became subsequently his humble servant, while remaining with his head high, an aristocrat, the best ornament of the board. Huret, as well, since Rougon has dismissed him, after the theft of the wire that announced the transfer of Venetia, has committed himself fully to the success of the Universelle, representing it at the Parliament, fishing for it in the dirty waters of politics, keeping the largest part of the shameless scams, that could throw him one day to prison. And the vicomte de Robin-Chagot, the vice-president, received a hundred thousand francs as a secret fee for signing without examination during the long absences of Hamelin; and the banker Kolb was paid also for his passive readiness to oblige, while utilizing abroad the strength of the company, which put it even in jeopardy in his arbitrations; and Sedille himself, the silk merchant, undermined by the consequences of a terrible liquidation, was lent a huge sum, that he was unable to reimburse. Only, Daigremont kept his full independence toward Saccard; which bothered the latter, sometimes, although the nice person remained charming, inviting him to his feasts, signing everything without inquiring, with his amiability of a skeptical Parisian that finds that all is well, as long as he is gaining money."

Insider trading is surely not a modern invention. Zola described it brilliantly in *L'Argent* – *The Money*, where Saccard and his colleagues commit insider trading and speculations to the detriment of the minority shareholders and remain practically unpunished. "*L'Argent* serait-il donc un conte moral où les méchants sont punis et les bons récompensés? Bien sûr, l'escroc Saccard est emprisonné – pas pour longtemps. Mais le 'filou' Sabatini, l' 'adroit' Nathanson et le malhonnête Fayeux courent encore. Et surtout beaucoup de gens honnêtes dont la seule erreur a été leur pitoyable naïveté restent des victimes. C'est le cas de l'agent de change Mazaud mais surtout de tous les petits actionnaires. Les gros s'en tirent mieux. Si la justice

n'est pas retablie par la condamnation effective des profiteurs dans la diegese elle-meme, du moins l'est-elle par leur condamnation verbale." (Commentaires par Therese Ioos, Zola, *L'Argent*, p. 502) "Is *L'Argent* a moral tale where the bad people are punished and the good ones rewarded? Of course, the swindler Saccard is imprisoned – not for long. But the 'crook' Sabatini, the 'skillful' Nathanson and the dishonest Fayeux are still at large. And especially many honest people whose only mistake was their pitiful naivete remain their victims. It is the case of the broker Mazaud but especially of all the small minority shareholders. The big ones succeed more. If justice is not reestablished by the effective condemnation of the profiteers in the story, at least it is done in their verbal condemnation."

One and a half century have elapsed since the events that took place in the French stock exchange that inspired Zola to write his masterpiece *L'Argent*. His book that should be the bible of the minority shareholders concludes by describing the outcome of the schemes to which they have succumbed. Every small shareholder should read the following lines before deciding to invest in the stock exchange today as in the times of Zola. "Mais les morts inconnus, les victimes sans nom, sans histoire, emplissaient surtout d'une pitie infinie le coeur de Mme. Caroline. Ceux-la etaient legion, jonchaient les buissons ecartes, les fosses pleins d'herbe, et il y avait ainsi des cadavres perdus, des blesses ralanant d'angoisse, derriere chaque tronc d'arbre. Que d'effroyables drames muets, la cohue des petits rentiers pauvres, des petits actionnaires ayant mis toutes leurs economies dans une meme valeur, les concierges retirees, les pales demoiselles vivant avec un chat, les retraites de province a l'existence reglee de maniaques, les pretres de campagne denudes par l'aumone, tous ces etres infimes dont le budget est de quelques sous, tant pour le lait, tant pour le pain, un budget si exact et si reduit, que deux sous de moins amenant des cataclysmes! Et, brusquement, plus rien, la vie coupee, emportee, de vieilles mains tremblantes, eperdues, tatonnantes dans les tenebres, incapables de travail, toutes ces existences humbles et tranquilles jetees d'un coup a l'epouvante du besoin!" (Emile Zola, *L'Argent*, p. 440)

"But the unknown dead, the nameless victims, with no history, filled especially with infinite pity the heart of Mme. Caroline. Those were legions, were strewn all over the remote bushes, the ditches full of grass, lost corpses, wounded people moaning from anxiety, behind every trunk of a tree. How many dreadful silent dramas, the crowd of the small poor retired people, the small shareholders who have invested all their savings in the same stock, the retired concierges, the pale old maids living with a cat, the old people living in the country in a well-ordered obsessive existence, the priests in the villages resorting to begging, all those tiny little

people with tight budgets, so much for milk, so much for bread, such a small and exact budget, that any reduction can cause a cataclysm! And, all of a sudden, a void, life is cut off, taken away, old shaky hands, desperate, groping in the dark, unable to work, all those humble and quiet lives thrown all of a sudden to the terror of poverty!" (All translations in this chapter are by Cory Jacques)

Emile Zola is probably the best symbol of social responsibility. He devoted his life to improve French society, was condemned by large segments of the conservative French society, the militarists, the religious, high society and the elites, while he was admired by the liberal and socialist segments of the French society, the intellectuals, artists and the press. Zola fought all his life on behalf of the oppressed, the poor, women, minorities, ecology, the stakeholders, and was the pillar of the humane and social conscious France of today. But in his times he was called enemy of the people and he was probably murdered by suffocation. He is worldwide renowned because of the Dreyfus affair, when he accused, in his famous article in *L'Aurore* "J'accuse" in 1898, the French government and the French army of sentencing Dreyfus to life imprisonment for treason although he was not guilty. Dreyfus, a Jewish Captain in the French Army, one of the first Jews to enroll the Army, was accused of treason on behalf of Germany, then France's worst enemy, while Colonel Picquart discovered that he was innocent and Esterhazy was the traitor. But Esterhazy was a member of the elites, an aristocrat while Dreyfus was only a Jew and could be the scapegoat, disregarding justice and truth. The honor of the French Army and the government was at stake as they couldn't admit the mistake. So, Zola was sued for defamation on his article and sentenced to one year imprisonment. He escaped to England (like Victor Hugo forty years before) and returned to France only after the Dreyfus case was revised. Yet, if we compare the "guilt" of the French government, army and people and their anti-Semitism, it is insignificant in comparison to the atrocities that other European people have committed to minorities in the twentieth century.

France was divided almost equally between the Dreyfusards and the Anti-Dreyfusards, and Zola alone was responsible for changing the opinion of half the population, as before his article and trial most of the French were either indifferent or against Dreyfus. Zola put all his reputation in favor of justice and against the wrongdoers and by blowing the whistle he managed to change the public opinion. His courageous interference as well as his excellent books, mainly the *Rougon-Macquart*, changed the whole history of France. Zola's books revealed the flaws of French society, the bourgeoisie, the proletariat, the government, the nobility, the rich and the poor, corruption, business ethics, wickedness and goodness, filth and

beauty, the worst and the most sublime facets of mankind. Zola was driven to the Dreyfus case against his will. He was not pro-Semitic to say the least but he met Dreyfus's wife who gave him evidence of her husband's innocence. Zola was particularly outraged by the conduct of the Army towards Picquart, who very courageously maintained that Dreyfus was innocent and because of that he was demoted of his functions and sentenced to jail. The personification of the victims, Dreyfus and his wife as well as Picquart, made him change his mind as you become aware of a wrongdoing more often when it is personified by a victim you know or when it happens to you. Zola, who all his life fought against prejudices against the poor, the women or the liberals, decided to fight the prejudices against the Jews. Many Frenchmen thought that the Jews had to be guilty, they were perceived as foreigners, a lot of them came from Germany and spoke Yiddish, so they should probably be also in contact with their brethren over there and assist Germany, France's worst enemy.

Nevertheless, Petain who was still young during the Dreyfus affair, collaborated with the Germans and sent thousands of Jews to the Holocaust, to the same Germans they supposedly loved so much. But anti-Semitism is always the same, the excuses only change. Sometimes the Jews are accused to be the richest men in the world, with the famous Protocols and they oppress the poor Christians, while sometimes they are accused to be revolutionary Trotskists, Bolsheviks, wanting to kill the bourgeoisie. Zola understood it and decided to fight those prejudices in the same way that he fought the prejudices against the workers.

In the film on Zola, Picquart is perceived as the worst whistleblower and the worst traitor for the French conservatists, Dreyfus was a Jew, and those people could not be trusted anyway after killing Christ, Zola was half Italian, even Esterhazy if he was the traitor did it because he was not a real French, but Picquart one of our own, how has he the the Hutzpah of accusing the Army who could never be wrong or make mistakes? The judge is hostile from the beginning of the trial to Zola and to Picquart who was also a witness. Picquart maintains that the incriminating document against Dreyfus is forged. The judge doesn't want to have a trial on the Dreyfus affair only about the slander by Zola. Zola says in his trial that some people fight with their swords, but he fights with his pen. As a matter of fact we could say that all his life he fought in his books and articles for integrity, honesty, conscience, justice, social responsibility, business ethics, in favor of the meek who don't have a say. Zola cannot resist the temptation to do it, he is bound to be a whistleblower even if it is against his welfare, his peace of mind, his reputation, his wealth and his freedom.

ON JEWISH CULTURAL BOURGEOISIE IN PARIS

I base this chapter inter alia on two books: “Une Elite Parisienne: Les Familles de la Grande Bourgeoisie Juive 1870-1939” by Cyril Grange, CNRS Editions, Paris, 2016, and “Les Juifs Viennois a la Belle Epoque” by Jacques Le Rider, Editions Albin Michel, 2013. When we say cultural bourgeoisie we mean primarily cultivated Jewish women with a literary salon. And who epitomizes most those women if not **Gertrude Stein** (February 3, 1874 – July 27, 1946), an American novelist, poet, playwright, and art collector. Stein moved to [Paris](#) in 1903, and made France her home for the remainder of her life. She hosted a Paris [salon](#), where the leading figures of modernism in literature and art, such as [Pablo Picasso](#), [Ernest Hemingway](#), [F. Scott Fitzgerald](#), [Sinclair Lewis](#), [Ezra Pound](#), [Sherwood Anderson](#) and [Henri Matisse](#), would meet. But even much sooner, we can read in Grange, p. 368 that - Those Jewish women who received an excellent education “do the honors of a salon with a rare distinction, a grace and a perfect esprit”. They are socialites, “femmes du monde”, worldly, with musical or literary “salons”, they are the upper-class, the “salonnières parisiennes”, high society but not vulgar, sophisticated, intellectual. In those salons would meet the Christian and Jewish cultural elite, the salons of Leontine Arman de Caillavet, Elena Beer, Louise Cahen d’Anvers, Rosalie de Fitz-James, Marie Kann, Flore Singer, Ernesta Stern, and others.

Léon **Gustave Schlumberger** (17 October 1844 – 9 May 1929) was a French historian and numismatist who specialized in the era of the [crusades](#) and the [Byzantine Empire](#). I would not bother to mention his name with giants as Proust, if not for the acute dichotomy between his laudatory remarks on the “Jewish salons” and his anti-Dreyfusards attitudes. He was an ultra-conservative, an active supporter of the [anti-Dreyfusard](#) movement. With [Edgar Degas](#), [Jean-Louis Forain](#) and [Jules Lemaître](#), he stormed out of the salon of the hostess Genevieve Straus when her friend [Joseph Reinach](#) pointed out Dreyfus' innocence. In his memoirs, he wrote of his old friend Charles Haas (a model for [Marcel Proust's](#) character Swann): "The delightful Charles Haas, the most likeable and glittering socialite, the best of friends, had nothing Jewish about him except his origins and was not afflicted, as far as I know, with any of the faults of his race, which makes him an exception virtually unique." Following his failure to be elected a member of the [Académie française](#) in 1908, Proust, who was Jewish, and who disliked him, described him as a 'disabused pachyderm'. In his memoirs, Schlumberger, who received a passing mention in Proust's [À la recherche du temps perdu](#), described the novelist as 'bizarre' and described his books as 'admired by some, and quite incomprehensible to others, including myself'. In his “memoires” Schlumberger writes about those Jewish salons that he knew very few except the Pereires, until in 1885 following his friendship with Mme. Potocka, he was invited to the salons of about ten of those “grandes Juives”, salons extremely agreeable, by the unique charm, grace and intelligence of those women, where the distinguished who’s who in literature, politics, arts would meet. But the Dreyfus Affair would later envenom this idyll.

And this is what I “admire” in French anti-Semitism, they hate the Jews, except “our” Jews, Jews are despicable but “my” friends are admirable. I had a friend, a descendant of an illustrious family, who liked me very much, as “although” I was Jewish, I was not as all the Jews whom he knew. And the Bellifontains where I studied would tell me that I was much nicer than the French Jews that they knew. And that is because I don’t look “like” a Jew, don’t behave “like” a Jew, in short I am not like the stereotype of the “Jew” whom they know, in France of 1968, but also in France of the 2000s. And all that in spite of the assimilation of

the Jews that reached its peak in the twelfth 1820 to 1939, before being crushed in France's Vichy regime and the Holocaust. Europeans of today remember longingly the Jews who assimilated when they compare them to some of the Arabs who refuse to assimilate, keeping their customs, language, religious practice, women clothes, who are proud of their heritage and not willing to replace it by European heritage. Another issue is why they don't stay in Arab countries where they can practice all their customs without hindrance, probably because of the wars, poverty and hatred which are even more acute than the European Islamophobia...

Flore Singer (1824-1915) (Grange, p. 369) received on Thursdays at her apartment in Hotel Chimay where the "habitués" – regulars would meet and decide in many instances on the candidates to the Academie Francaise. At her salon would meet Alfred de Vigny, Ernest Renan, Adolphe Cremieux, Edmond About, a mixed society, where Jews were only a minority. Elena Goldschmidt (1864-1948) runs a literary salon and writes also with the pseudonym of Jean Dornis. She was married to the wealthy Guillaume Beer. They had a house at rue des Mathurins where she received on Mondays (the socialites schedule was very busy...) and had the chateau de Voisins at Louveciennes. Well, she received at her evenings Gabriele d'Annunzio, Pierre Loti, Lucien Daudet, Henri de Reigner and Leconte de Lisle who names her in his poem "La Rose de Louveciennes". She is a member of l'Academie des Dames" a women counterpart of l'Academie Goncourt, and where they distribute the Prix Femina. Our dear friend the anti-pro-Semite Gustave Schlumberger is very laudatory on her literary achievements, her popular and much loved salon, where most of the authors gather. In the Journal des Goncourt she receives much less laudatory descriptions, but the Goncourts were not very philosemites to say the least. But Edmond de Goncourt was also quite misogynic as he said "'There are no women of genius; the women of genius are men."

Ernesta de Hirschel, married to Louis Stern, received at the "hotel particulier" at 68, rue du Faubourg Saint-Honore, very near the hotel where I stayed dozens of times for whole months when I resided in Paris (and I didn't know of the illustrious vicinity). The regulars of her salon were la crème de la crème of Paris elites (I would love to be there but I intend to send there at least Jacques Corot) – Auguste Rodin, Leon Bonnat, Carolus-Duran, Paul Adam, the one and only Edmond Rostand, Camille Flammarion, Jose-Maria de Heredia, Joseph Reinach, Jean Richepin, Henri de Reigner, the one and only Marcel Proust, Edmond Fleg, Anna de Noailles, but also musicians as Reynaldo Hahn and Gabriel Fauré are her habitués and she invites the great Caruso to sing at her evenings. She writes under the pseudonym of Maria Star - L'anneau d'or aux six colombes (1920), Autour du coeur (1904), Quinze jours a Londres (1898), Impressions d'Espagne (1900) and a novel in English "Alistair" in 1911.

Louise and Marie Warschawsky are the two daughters of Adam Warschawsky, tycoon of the Russian Railroads (yes, a century before the modern Jewish Russian Oligarchs), runs a salon at their hotel of rue de Bassano, with the habitués – Paul Bourget, Guy de Maupassant and Marcel Proust. Louise is married to Albert Cahen d'Anvers and Marie to Jacques Edouard Kann. The brothers Goncourt describe her in their Journal in not very laudatory terms, and especially her "liaisons" with Paul Bourget and Guy de Maupassant. Her husband tells her in 1890 that she has to choose between him and Paul Bourget, but she would choose him as without him she wouldn't have his money that Bourget doesn't have. But Kann tolerates Maupassant as he is afraid of him, who treats him as a "negre". Quite an interesting life...

All that changes with the Dreyfus Affair. The most engaged salon is that of Genevieve Straus (Grange, 373), second daughter of Fromental Halevy and Leonie Rodrigues, born in 1849. Her father is nominated in 1854 perpetual secretary of l'Academie des Beaux-Arts. At Quai Conti the Halevys mingle at their "Salon de Fromental" well-known artists, young pupils of

the Conservatoire and celebrities of all types. In 1869 Genevieve marries the composer George Bizet, who describes her as “an adorable creature whose intelligence is open to all progress, all reforms, who doesn’t believe in the Jewish God nor the Christian God, but who believes in honor, duty and morals in one word.” (Grange, p. 373). Widowed in 1875 she remarries with Emile Straus, a financier working with Rothschild. She runs a salon from the eighties at Boulevard Haussmann, and since 1898 at rue Miromesnil. Her regular guests are Jules Renard, Tristan Bernard, Victorien Sardou, Rejane, Sarah Bernhardt, Lucien Guitry, Anna de Noailles, Henri Meilhac and Jules Lemaitre. Marcel Proust a “regular” meets there Charles Haas. It is in August 1897 at Trouville that Joseph Reinach tells the Straus that he has the proof of the innocence of capitain Dreyfus. In October Genevieve takes publicly a standpoint in favor of Dreyfus and many habitués desert her salon. Among those who left are Jules Lemaitre, Jean-Louis Forain, Arthur Meyer. Our friend Gustave Schlumberger also leaves her salon, as they become “fanatic protagonists of the innocence of Dreyfus” (Grange, 374).

Another Dreyfusard salon is the one of Leontine Arman de Caillavet, becoming famous because Proust, a habitué of the salon, describes her as a model of Madame Verdurin. Leontine is the daughter of the Viennese banker Auguste Lippmann who lived in Paris under Louis-Philippe. Emile her brother marries Colette Dumas, the daughter of Alexandre Dumas fils, Leontine marries Mathurin Arman de Caillavet. She receives on Wednesdays since the eighties Heredia, Leconte de Lisle, Houssaye, Renan and Proust. Anatole France (Nobel 1921) began a relationship with Madame Arman de Caillavet in 1888. The affair lasted until shortly before her death in 1910. He was elected to the Académie française in 1896. France took a part in the Dreyfus affair. He signed Émile Zola's manifesto supporting Alfred Dreyfus, and wrote about the affair in his 1901 novel *Monsieur Bergeret*. France wrote that without Leontine he would not have written books and she inspires him “Thais” (1890) and “Le Lys Rouge” (1894). Because of this liaison France leaves his wife in 1892 and divorces in 1893. Leontine’s salon becomes political after the Dreyfus affair and she hosts many supporters of the revision of the trial, such as Clemenceau, Leon Blum, Louis Barthou, Raymond Poincaré and Jaures. And our dear Schlumberger once again expresses his bewilderment how such “mondaines” salonnières decided to turn into a “tribal woman”, trying furiously to demolish all the “old France”. Leontine writes to France “I am a Semite, I, prone to the joys of life, I belong to the old Law, I ignore the subtleties of forgiveness, the wounds that I suffer would bleed for me forever.” Between the two World Wars the salons lose their charm.

The Jewish upper class elites are involved even more in musical salons where they finance privately in the vacuum that the Republican governments have left the organization of concerts and lyrical performances. The notorious anti-Semite writes in “La France Juive” – “The book so French, that makes you think, the book that had such an importance position in the 17th century doesn’t exist anymore; it is music, sensitive art, soft art of sickly people, that is now on the forefront. After the crocodile, the Jew is the most musical (melomane) of all animals. All the Jews are musicians or comedians by instinct. Camondo plays the cello, Mme. Saly Stern sings operettas like Judic. Herman Bemberg composes... Mme. Goldschmidt gives also superb concerts in salons that are in a row.” Such hatred, fake news and prejudices in such a short statement, there is a direct line between such statements and France’s Vichy, as between the Wagner’s anti-Semitism and Nazism. Instead of admiring the culture affinities of the Jews they reproach them their culture, exactly in the same words of Wagner and the soft music of the Jews. Only Brunhildes are divine, Mendelssohn’s violin concerto is too soft.

Jewish elites are particularly present in the society of Grandes auditions musicales de France, they have 815 of the 2208 subscribers places of Opera Garnier, the most expensive places. Isaac de Camondo is much more than a musical lover banker, he is a musical patron, he composes an opera “The Clown”. But Jews are also patrons of arts, they collect the best

paintings even of new unknown painters. The Rothschilds are well-known collectors for generations and generations. Another famous collector is Rodolphe Kann, as also his brother Maurice Kann and their distant cousin Alphonse Kann. Others as well: David David-Weill, Ernest May, Charles Ephrussi, Isaac de Camondo. Ernest May starts his collections with paintings of Delacroix & Corot, so he contributed to Jacques Corot's relative the painter Corot. He purchases paintings by Monet, Degas, Manet, Sisley, Pissarro, but he remains faithful to Corot in spite of his new tastes. Charles Ephrussi is very close to Renoir and introduces him to the Fould and the Cahen d'Anvers. Louise Cahen d'Anvers orders from Renoir the famous portrait of her 3 daughters – Irene, Elisabeth and Alice. Renoir paints Ephrussi as one of the canotiers in his famous painting *Le Dejeuner des Canotiers*, with an *haut de forme*. Camondo purchases 30 paintings by Degas and paintings by other impressionists & Cezanne. Finally, the Jew donors contribute 72% of the *pieces artistiques* donated to the Louvre and the Luxembourg, while they are only 47 compared to the 380 total donors, about 12% only.

Between 1857 and 1910 the Viennese population increased fivefold but the Jews increased by a factor of 28. About 10% of the Viennese population were Jews, in Warsaw – 32%, in Budapest – 23%, in Lvov/Lemberg – 28%, but in Berlin only 4%. Modernism in Vienna, particularly in cultural, literary, artistic, politic and theoretic aspects, has increased much in this period. But a large part of the newcomers to Vienna are from Galicia, they speak Yiddish, behave differently, have “weird” Hassidic clothes, they don't assimilate as much as the other Viennese Jews. However, one has to remember that among the newcomers were the families of Sigmund Freud, Theodor Herzl, Arthur Schnitzler, Hugo von Hofmannstahl, Stefan Zweig, Gustav Mahler, Arnold Schoenberg, in fact most of the prominent Jews were newcomers. This is similar to the situation in Paris where most of the prominent Jews came from outside France – the Camondos from Turkey, the Rothschilds from Germany, the Pereires from Portugal, the Cahen d'Anvers from Germany, the Bischoffsheim from Germany, the Morpugos from Italy, the Ephrussi from Russia. But all those families assimilated so well that within a generation or two they became more Parisians than the French (Offenbach and French Cancan...), more Viennese than the Austrians (who is more Viennese than Freud?), and in fact more Americans than Americans (Irving Berlin, Gershwin, Arthur Miller), more Germans than the Germans (Heine, Mendelssohn), more Russians than the Russians (Trotsky...), more British than the British (Disraeli...), more Italians than Italians (Moravia).

Jews in Vienna live in specific neighborhoods, in Leopoldstadt which is called a voluntary Ghetto, where one third of the population is Jewish, the Berggasse where Freud lives, as well as lawyers, physicians, academics, professors, journalists, with a 20% Jewish population, the 1st Quarter where the aristocracy and haute bourgeoisie reside Jews are also 20% of the population (Le Rider, p. 18). However, mixed marriages are less than 10%. Anti-Semitism in Vienna is widespread, but not only against the Jews, against all the “strangers” and newcomers as well. It exists also if Jews are “invisible” and fully assimilated, in fact they are much more afraid from the assimilated Jews than from the “visible” Jews, as they don't have objective reasons to hate them, unless their jealousy, which is at the base of every anti-Semitism, from anti-Dreyfusards, from Nazis and from Islamic fundamentals and Palestinian leadership. They envy the Jews who have succeeded as businessmen, lawyers, physicians, writers, playwrights, composers, painters, philosophers, psychiatrists, scientists, but also if they have succeeded as the Israelis in agriculture, industry, army, high tech, culture, economy. Jews in Vienna, Paris, and all over Europe, are at the forefront of culture, economy, political thought, philanthropy, science, Nobel Prizes, they excel in innovation, much more than their relative weight in the population, and ameliorate the world in which all of us live.

SENSITIVITY ANALYSIS OF 100-160 YEARS OF CULTURE

In my career as a businessman I wrote more than a hundred business plans, specialized in strategic planning, made sensitivity analyses in order to test the results' validity of the plans. Sensitivity analysis is the study of how the uncertainty in the output of a model or system can be allocated to different sources of uncertainty in its inputs. As all this book is based on uncertainty, is it fiction or reality, are my basic assumptions valid or invalid? I even suggested a voyage in time to validate my arguments, or a voyage into my imagination. If we change some of the assumptions, because of the uncertainty, we have to recalculate outcomes, as we are dealing with variables which are also interrelated. So, how can we test the robustness of the results of our model in presence of uncertainty? How do we increase understanding of the relationships between input and output of the variables in the model? It is preferable to reduce uncertainty as much as possible, to simplify it, to eliminate errors, to calibrate the model, investigate the parameters, and identify important connections between observations & inputs.

So, what are the assumptions? I focus my cultural research in Paris, France, Europe. I think that I have proven in this book that they were the center of a unique process of innovation in world's cultural history. I have made the necessary adjustments and tried to find a sensitivity analysis in other European cultures, comparing them to the French, focusing on the relative advantages of the other European cultures in literature, painting, music, science, and even making a survey, I admit that superficial, on Indian, Chinese, Japanese, African, Arab and Hebrew cultures, to put the European cultures into the right proportion. The centrality of Paris in France is obvious, as there is plenty of evidence that most, even quite all the culture of France was focused in Paris, at least in the period of 1820 to 1939. So, the main sensitivity analysis required is in the epoch. Here quantity prevails, if it is difficult to assess quality. The excessive quantity of excellent and innovative literature, painting, music, science, etc. is obvious in this twelfty according to most of the research conducted in this matter. But what is exactly the span of this twelfty? Is it 100 years, 110 years, 120 years or 160? From when?

Our book surveys and encompasses culture in three important periods: Romanticism, Realism/Naturalism, Modernism. From an academic point of view we have surveyed the peaks of those periods – Romanticism 1820-1860, Realism/Naturalism 1860-1900, Modernism 1900-1940. But in our sensitivity analysis we shall survey also the period starting in 1800. I wanted to delineate the period of the book to a twelfty, or at least a lifetime of a person who could have lived in this twelfty, even if it is a virtual person, who could be active throughout all this period. If we had to choose a century of 100 years we could have chosen 1830-1929 but this would comprise only 30 years of modernism and we would miss some of the most important figures of modernism. Finally, we compromised by choosing 120 years starting in 1820. Our books cover the last years of Romanticism beyond 1860, as our twelfty extends to 1939, as well as the beginning and the end of the Realism/Naturalism period which are fully covered in our twelfty. What about the latest years of Modernism? We have included in our survey most of the modern authors, even if until 1939 they published or started to write only their first books, and so our book includes most of the modern giants, such as Arthur Miller, Williams, Solzhenitsyn, Sartre, Beauvoir, Anouilh, Moravia, Pasternak, Faulkner, Mauriac, Camus, Jimenez, Steinbeck, Beckett, Neruda, Canetti, most of them Nobelists in much later years, to name just the writers, if not the composers and painters.

In order to give a full sensitivity analysis we bring in the following pages Wikipédia's lists by years of the most important events in literature, arts and music in 1800-1819 & 1940-1959.

The list of the important authors and books in the period 1800-1819 in Wikipedia's lists:

1810s

- **1819 in literature** - [Ivanhoe](#) - [Sir Walter Scott](#); [The Sketch Book](#) - [Washington Irving](#); [Ode to a Nightingale](#) - [John Keats](#); [Ode to the West Wind](#) - [Percy Bysshe Shelley](#); [The Masque of Anarchy](#) - [Percy Bysshe Shelley](#); [The Cenci](#) - [Percy Bysshe Shelley](#)
- **1818 in literature** - [Frankenstein](#) - [Mary Shelley](#); [Julian and Maddalo](#) - [Percy Bysshe Shelley](#); [Ozymandias](#) - [Percy Bysshe Shelley](#); [The Revolt of Islam](#) - [Percy Bysshe Shelley](#)
- **1817 in literature** - [Persuasion \(novel\)](#) - [Jane Austen](#); [Northanger Abbey](#) - [Jane Austen](#); [Rob Roy](#) - [Sir Walter Scott](#); [Ormond and Harrington](#) - [Maria Edgeworth](#)
- **1816 in literature** - [Adolphe](#) - [Benjamin Constant](#); [The Sandman](#) - [E.T.A. Hoffman](#); [Alastor](#) - [Percy Bysshe Shelley](#)
- **1815 in literature** - [Emma \(novel\)](#) - [Jane Austen](#); [The Pastor's Fireside](#) - [Jane Porter](#); [The White Doe of Rylstone](#) - [William Wordsworth](#)
- **1814 in literature** - [Mansfield Park](#) - [Jane Austen](#); [Waverley](#) - [Sir Walter Scott](#); [The Dog of Montargis](#) play by [René Charles Guilbert de Pixérécourt](#)
- **1813 in literature** - [Pride and Prejudice](#) - [Jane Austen](#); [Queen Mab](#) - [Percy Bysshe Shelley](#)
- **1812 in literature** - [The Milesian Chief](#) - [Charles Robert Maturin](#); [The Swiss Family Robinson](#) - [Johann David Wyss](#); [Children's and Household Tales](#) - [The Brothers Grimm](#)
- **1811 in literature** - [Sense and Sensibility](#) - [Jane Austen](#); [Childe Harold's Pilgrimage](#) - [Lord Byron](#) - completed
- **1810 in literature** - [The Houses of Osma and Almeria](#) - [Regina Maria Roche](#)

1800s

- **1809 in literature** - [The Martyrs](#) - [François-René de Chateaubriand](#); [Elective Affinities](#) - [Johann Wolfgang von Goethe](#); Death of [Thomas Paine](#)
- **1808 in literature** - [Faust](#) (Part One) - [Goethe](#)
- **1807 in literature** - [Tales from Shakespeare](#) - [Charles Lamb](#) & [Mary Lamb](#)
- **1806 in literature** - [The Earthquake in Chile](#) - [Heinrich von Kleist](#)
- **1805 in literature** - [The Wonder of the Village](#) - [Mary Meeke](#); [Manuscript Found in Saragossa](#) - [Count Jan Nepomucen Potocki](#); [La Dernier Homme](#) - [Jean-Baptiste Cousin de Grainville](#)
- **1804 in literature** - [Jerusalem](#) (poetry) - [William Blake](#); [William Tell](#) - [Friedrich Schiller](#)
- **1803 in literature** - [St. Clair of the Isles](#) - [Elisabeth Helme](#)
- **1802 in literature** - [Delphine](#) - [Anne Louise Germaine de Stael](#); [René](#) - [François-René de Chateaubriand](#)
- **1801 in literature** - [The Wizard and the Sword](#) - [Henry Summersett](#)
- **1800 in literature** - [Castle Rackrent](#) - [Maria Edgeworth](#); [Hymns to the Night](#) - [Novalis](#); [Mary Stuart](#) - [Friedrich Schiller](#); [Glenfinlas](#) - [Walter Scott](#)

Arts by years in the period 1800-1819

1810s

- **1819 in art** – Birth of [Gustave Courbet](#); [Théodore Géricault](#) paints *[The Raft of the Medusa](#)*,
- **1818 in art**
- **1817 in art**
- **1816 in art**
- **1815 in art**
- **1814 in art** – [Francisco Goya](#) paints *[The Third of May 1808](#)*, Birth of [Jean-François Millet](#)
- **1813 in art**
- **1812 in art**
- **1811 in art**
- **1810 in art** – [Francisco Goya](#) begins painting his 82-piece series *[The Disasters of War](#)*; Birth of: [Paul Kane](#)

1800s

- **1809 in art**
- **1808 in art** – [William Blake](#) completes *[Satan Watching the Endearments of Adam and Eve](#)*. Birth of [Honoré Daumier](#)
- **1807 in art**

- **1805 in art**
- **1804 in art**
- **1803 in art**
- **1802 in art** – Death of [Thomas Girtin](#)
- **1801 in art** – Birth of [Thomas Cole](#)
- **1800 in art** – [Francisco Goya](#) paints *[The Naked Maja](#)*

Music by years in the period 1800-1819

1810s

- **1819 in music** – April 16, The publication of [Muzio Clementi](#)'s *[Gradus ad Parnassum](#)* Volume II is entered at Stationer's Hall, London. September 13, Birth of [Clara Schumann](#), German pianist and composer.
- **1818 in music** – *[Hammerklavier sonate](#)* by [Ludwig van Beethoven](#); "[Silent Night](#)" written by [Josef Mohr](#) and composed by [Franz Xaver Gruber](#), – The first performance of *[Silent Night](#)* on December 25, (Church of St. Nikolaus in [Oberndorf, Austria](#)).
- **1817 in music** – March 1, [Muzio Clementi](#)'s *[Gradus ad Parnassum](#)* Volume I is published simultaneously in London, Paris and Leipzig.
- **1816 in music** – *[Il barbiere di Siviglia](#)* (The Barber of Seville) by [Gioachino Rossini](#), premieres in Rome
- **1815 in music**

- [1814 in music](#)
- [1813 in music](#) – Birth of French-Jewish composer and ultra virtuoso pianist [Charles-Valentin Alkan](#); Birth of German composer [Richard Wagner](#); Birth of Italian composer [Giuseppe Verdi](#).
- [1812 in music](#) – Birth of German composer [Friedrich von Flotow](#); Birth of Swiss composer and virtuoso pianist [Sigismund Thalberg](#).
- [1811 in music](#) – Birth of Hungarian composer and virtuoso pianist [Franz Liszt](#).
- [1810 in music](#) – Birth of Polish composer and virtuoso pianist [Frédéric Chopin](#); Birth of German composer and virtuoso pianist [Robert Schumann](#); [Ludwig van Beethoven](#) completes his [Fifth Piano Concerto Emperor](#).

1800s

- [1809 in music](#) – Birth of [Felix Mendelssohn-Bartholdy](#), German composer, pianist, organist and conductor; Death of [Joseph Haydn](#), Austrian composer
- [1808 in music](#) – [Beethoven](#) completes his [6th Symphony "Pastoral"](#), [Beethoven's 5th Symphony](#)
- [1807 in music](#) – [La Vestale](#) by [Gaspard Spontini](#)
- [1806 in music](#) – [Fourth Piano Concerto](#), [Violin Concerto](#) by [Ludwig van Beethoven](#)
- [1805 in music](#) – [Fidelio](#) by [Ludwig van Beethoven](#)
- [1804 in music](#) – [Symphony No. 3 'Eroica'](#) by [Ludwig van Beethoven](#)
- [1803 in music](#) – Birth of [Hector Berlioz](#), French composer
- [1802 in music](#) – [Bach's Sonatas and partitas for solo violin](#) are published by [Böhl and Bock](#)
- [1801 in music](#) – Birth of [Vincenzo Salvatore Carmelo Francesco Bellini](#), Italian opera composer, [Beethoven's Moonlight Sonata](#)
- [1800 in music](#) –

The list of the important authors and books in the two decades following the book's twelfth include the 1940s and the 1950s. Thus the sensitivity analysis gives a comprehensive survey of the literature from 1800 to 1960, or the 90 years of the Romantic Period 1800-1860/1890 (in our book we have included only 1820-1890) but this sensitivity analysis gives us a survey of the missing period of 1800-1820. The Naturalist/Realist period encompasses the years 1850-1900/1920 and the Modernist period encompasses the years 1900-1940/1960 and we give in the sensitivity analysis the 20 missing years of 1940-1960. The periods overlap, some of the writers, as Balzac, are romantic, realist and mostly modern as well. Others as Zola, Ibsen and Twain are only naturalists/realists. Proust, Sartre and Pirandello are only Modern. But Goethe, Chateaubriand and Dumas pere are only romantic. Yet, Beethoven is romantic, realist and mostly modern. And what about the Impressionists are they realist or modern? So, there is a lot of ambiguity here and I have tried to describe the full picture in the Appendix.

List of the important books and authors by years in the 1940s and 1950s:

1950s

- [1959 in literature](#) - William S. Burroughs's [Naked Lunch](#); Günter Grass's [The Tin Drum](#); Heinrich Böll's [Billiards at Half-past Nine](#); Eugène Ionesco's [Rhinocéros](#) ([Rhinoceros](#)); André Schwarz-Bart's [The Last of the Just](#); Terry Southern's [The Magic Christian](#); Alain Robbe-Grillet's [In the Labyrinth](#); Walter M. Miller, Jr.'s [A Canticle](#)

- for Leibowitz*; Tennessee Williams' *Sweet Bird of Youth*; John Arden's *Serjeant Musgrave's Dance*; Death of [Raymond Chandler](#)
- **1958 in literature** - Chinua Achebe's *Things Fall Apart*; Daniil Andreyev's *Roza Mira*; Brendan Behan's *Borstal Boy*; Giuseppe Tomasi di Lampedusa's *Il Gattopardo* (*The Leopard*); Leon Uris's *Exodus*; Terry Southern's *Candy*; Jack Kerouac's *The Dharma Bums*; Claude Simon's *The Grass*; R. K. Narayan's *The Guide*; Harold Pinter's play *The Birthday Party* first performed; Jean Genet's *The Blacks (play)*; Josef Skvorecky's *The Cowards*
 - **1957 in literature** - Jack Kerouac's *On the Road*; Ayn Rand's *Atlas Shrugged*; Vladimir Nabokov's *Pnin*; Patrick White's *Voss*; Ted Hughes's *The Hawk in the Rain*; Boris Pasternak's *Doctor Zhivago* Dr. Seuss' *The Cat in the Hat* and *How The Grinch Stole Christmas*; Max Frisch's *Homo Faber*; Tennessee Williams' *Orpheus Descending*; Jean Genet's *The Balcony*; Harold Pinter's *The Birthday Party*; Harold Pinter's *The Room*; Robert A. Heinlein's *The Door into Summer*; Death of [Oliver St. John Gogarty](#), [Giuseppe Tomasi di Lampedusa](#)
 - **1956 in literature** - Grace Metalious's *Peyton Place*; Friedrich Dürrenmatt's *The Visit*; Eugene O'Neill's *Long Day's Journey into Night*; Allen Ginsberg's *Howl and Other Poems*; Fred Gipson's *Old Yeller*
 - **1955 in literature** - Juan Rulfo's *Pedro Páramo*; Vladimir Nabokov's *Lolita*; Tennessee Williams's *Cat on a Hot Tin Roof*; J. R. R. Tolkien's *The Return of the King*; Flannery O'Connor's *A Good Man Is Hard to Find*; *A View from the Bridge* - [Arthur Miller](#); Death of [Thomas Mann](#) *HMS Ulysses*-[Alistair MacLean](#)
 - **1954 in literature** - William Golding's *Lord of the Flies*; J. R. R. Tolkien's *The Fellowship of the Ring*; J. R. R. Tolkien's *The Two Towers*; Aldous Huxley's *The Doors of Perception*; Kingsley Amis's *Lucky Jim*; Christy Brown's *My Left Foot*; William Soutar's *Diaries of a Dying Man*; Françoise Sagan's *Bonjour tristesse*; Dr. Seuss' *Horton Hears A Who!*; Winston Churchill's *The Second World War* - completed
 - **1953 in literature** - Samuel Beckett's *Waiting for Godot* & *The Unnamable*; Ian Fleming's *Casino Royale* (First James Bond novel); Saul Bellow's *The Adventures of Augie March*; Ray Bradbury's *Fahrenheit 451*; L. P. Hartley's *The Go-Between*; Leon Uris's *Battle Cry*; Arthur Miller's play *The Crucible* first performed; J. D. Salinger's *Nine Stories*
 - **1952 in literature** - Ernest Hemingway's *The Old Man and the Sea*; E. B. White's *Charlotte's Web*; Flannery O'Connor's *Wise Blood*; Death of [Knut Hamsun](#)
 - **1951 in literature** - J. D. Salinger's *The Catcher in the Rye*; Graham Greene's *The End of the Affair*; Marguerite Yourcenar's *Memoirs of Hadrian*; [John Cowper Powys](#)'s *Porius: A Romance of the Dark Ages*; Samuel Beckett's *Molloy* & *Malone Dies*; Isaac Asimov's *Foundation*
 - **1950 in literature** - Ray Bradbury's *The Martian Chronicles*; Eugène Ionesco's *The Bald Soprano*; C. S. Lewis's *The Lion, the Witch and the Wardrobe*; Isaac Asimov's *I, Robot*; Death of [George Orwell](#), [George Bernard Shaw](#)

1940s

- **1949 in literature** - George Orwell's *Nineteen Eighty-Four*; Arthur Miller's *Death of a Salesman*; Jean Genet's *The Thief's Journal*; Vilhelm Moberg's *The Emigrants*
- **1948 in literature** - Graham Greene's *The Heart of the Matter*; Norman Mailer's *The Naked and the Dead*
- **1947 in literature** - Anne Frank's *The Diary of a Young Girl*; Thomas Mann's *Doctor Faustus*; Albert Camus's *La Peste*; Tennessee Williams's *A Streetcar Named Desire*;

- Boris Vian's [*Froth on the Daydream*](#); Malcolm Lowry's [*Under the Volcano*](#); Jean Genet's [*Querelle of Brest*](#) and [*The Maids*](#); Arthur Miller's [*All My Sons*](#)
- **1946 in literature** - Eugene O'Neill's [*The Iceman Cometh*](#); Nikos Kazantzakis's [*Zorba the Greek*](#); George Orwell's [*Critical Essays*](#); E.E. Smith's [*The Skylark of Space*](#); Death of [H. G. Wells](#)
 - **1945 in literature** - George Orwell's [*Animal Farm*](#); Bertrand Russell's [*A History of Western Philosophy And Its Connection with Political and Social Circumstances from the Earliest Times to the Present Day*](#); Evelyn Waugh's [*Brideshead Revisited*](#); Flora Thompson's [*Lark Rise to Candleford*](#); John Steinbeck's [*Cannery Row*](#); [Aleksandr Solzhenitsyn](#) sentenced to eight years in a labour camp for criticism of Stalin
 - **1944 in literature** - Jean-Paul Sartre's [*No Exit*](#); Ivan Bunin's [*Dark Avenues*](#); Jean Genet's [*Our Lady of the Flowers*](#); John Hersey's [*A Bell for Adano*](#); Tennessee Williams's "[*The Glass Menagerie*](#)"
 - **1943 in literature** - Jean-Paul Sartre's [*Anti-Semite and Jew*](#) and [*Being and Nothingness*](#); Ayn Rand's [*The Fountainhead*](#); T. S. Eliot's [*Four Quartets*](#) published together for the first time; Hermann Hesse's [*Das Glasperlenspiel \(The Glass Bead Game\)*](#); Antoine de Saint-Exupéry's [*The Little Prince*](#); Jean Genet's [*Our Lady of the Flowers*](#)
 - **1942 in literature** - Albert Camus's [*Le Mythe de Sisyphe \(The Myth of Sisyphus\)*](#) and [*L'Étranger \(The Stranger\)*](#); Edith Hamilton's [*Mythology*](#); Enid Blyton's [*Five on a Treasure Island*](#) (first in *The Famous Five* series); Robert Musil's [*The Man Without Qualities*](#); Death of [Stefan Zweig](#)
 - **1941 in literature** - Virginia Woolf's [*Between the Acts*](#); Death of [James Joyce](#), [Virginia Woolf](#)
 - **1940 in literature** - Anna Akhmatova's [*Requiem*](#); Arthur Koestler's [*Darkness at Noon*](#); Graham Greene's [*The Power and the Glory*](#); Ernest Hemingway's [*For Whom the Bell Tolls*](#); Carson McCullers's [*The Heart Is a Lonely Hunter*](#); Richard Wright's [*Native Son*](#); Olaf Stapledon's [*Sirius*](#); John Cowper Powys's [*Owen Glendower*](#); Death of [F. Scott Fitzgerald](#)

Arts by years in the period 1940-1959:

1950s

- **1959 in art** – Birth of [Caio Fonseca](#), Death of [Frank Lloyd Wright](#), Sir [Jacob Epstein](#)
- **1958 in art** – [Frank Stella](#) begins black [pinstripe](#) paintings
- **1957 in art** – Death of [Diego Rivera](#), [Jack Butler Yeats](#)
- **1956 in art** – Birth of [David D. Stern](#), Death of [Jackson Pollock](#)
- **1955 in art** – Death of [Fernand Léger](#), [Nicolas de Staël](#), [Bradley Walker Tomlin](#); Birth of [Jeff Koons](#), [Jasper Johns](#) completes [*Flag*](#), (American Flag Painting)
- **1954 in art** – Death of [Henri Matisse](#), [André Derain](#), [Frida Kahlo](#), Birth of [David Wojnarowicz](#)
- **1953 in art** – Death of [Raoul Dufy](#), [John Marin](#), [Francis Picabia](#)

FAMOUS SALONNIERES OF THE 19TH & 20TH CENTURIES

Salons in the tradition of the French literary and philosophical movements of the 17th and 18th centuries were carried on in the 19th century, until the 1920s in urban settings. But most of all salons are a Parisian invention which reached their apotheosis in the epoch 1820-1939.

At that time women/salonnieres had powerful influence over the salon. Women were the center of life in the salon and carried very important roles as regulators. They could select their guests and decide the subjects of their meetings. These subjects could be social, literary, or political topics of the time. They also served as mediators by directing the discussion.

The salon was an informal education for women, where they were able to exchange ideas, receive and give criticism, read their own works and hear the works and ideas of other intellectuals. Many ambitious women used the salon to pursue a form of higher education.

Two of the most famous 17th-century literary salons in [Paris](#) were the [Hôtel de Rambouillet](#), established in 1607 near the [Palais du Louvre](#) by the [marquise de Rambouillet](#), where gathered the original [précieuses](#), and, in 1652 in [Le Marais](#), the rival salon of [Madeleine de Scudéry](#), a long time *habituée* of the Hôtel de Rambouillet. *Les bas-bleus*, borrowed from England's "[blue-stockings](#)," soon found itself in use upon the attending ladies, a nickname continuing to mean "intellectual woman" for the next three hundred years.

Paris salons of the 18th century hosted by women include the following:

- [Madame Geoffrin](#)
- [Madame de Tencin](#)
- [Jeanne Quinault](#), hostess of the Bout-du-Banc
- [Madame Dupin](#)
- [Françoise de Graffigny](#), author of *Lettres d'une Péruvienne*
- [Julie de Lespinasse](#): her chief draw was [d'Alembert](#), but "though the name of M. d'Alembert may have drawn them thither, it was she alone who kept them there."
- the [marquise du Deffand](#), the friend of [Horace Walpole](#)
- the [marquise de Lambert](#)
- the [duchesse du Maine](#)
- [Madame d'Épinay](#)
- [Madame Necker](#), the wife of the financier [Jacques Necker](#)
- [Madame de Staël](#), daughter of the Neckers, took over from her mother and in exile hosted the international [Coppet group](#)^[41]
- [Madame Helvétius](#), the wife of [Helvétius](#)
- [Sophie de Condorcet](#), wife of the mathematician and philosopher [Condorcet](#), visited by foreign notables and French thinkers alike
- [Juliette Récamier](#), socialite and friend of Germaine de Staël
- [Madame Roland](#), the political salon that was the resort of the [Girondists](#) at the first stages of the [Revolution](#)
- [Madame Swetchine](#), wife of General Swetchine
- [Julie Talma](#), a friend of [Benjamin Constant](#)

Some 19th-century salons were more inclusive, verging on the raffish, and centered around painters and "literary lions" such as [Madame Récamier](#). After the shock of the [1870 Franco-Prussian War](#), French aristocrats withdrew from the public eye. However, [Princess Mathilde](#) still held a salon in her mansion, rue de Courcelles, later rue de Berri. From the middle of the 19th century until the 1930s, a lady of society had to hold her "day", which meant that her *salon* was opened for visitors in the afternoon once a week, or twice a month. Days were announced in *Le Bottin Mondain*. The visitor gave his visit cards to the [lackey](#) or the *maître d'hôtel*, and he was accepted or not. Only people who had been introduced previously could enter the *salon*.

[Marcel Proust](#) called up his own turn-of-the-century experience to recreate the rival salons of the fictional duchesse de Guermantes and Madame Verdurin. He experienced himself his first social life in *salons* such as [Mme Arman de Caillavet](#)'s one, which mixed artists and political men around [Anatole France](#) or [Paul Bourget](#); [Mme Straus](#)' one, where the cream of the aristocracy mingled with artists and writers; or more aristocratic *salons* like [Comtesse de Chevalgney](#)'s, [Comtesse Greffulhe](#)'s, Comtesse Jean de Castellane's, Comtesse Aimery de La Rochefoucauld's, etc. Some late 19th- and early 20th-century Paris salons were major centres for contemporary music, including those of [Winnaretta Singer](#) (the princesse de Polignac), and [Élisabeth, comtesse Greffulhe](#). They were responsible for commissioning some of the greatest songs and chamber music works of [Fauré](#), [Debussy](#), [Ravel](#) and [Poulenc](#).

Until the 1950s, some *salons* were held by ladies mixing political men and intellectuals during the IVth Republic, like Mme Abrami, or Mme Dujarric de La Rivière. The last salons in Paris were those of [Marie-Laure de Noailles](#), with [Jean Cocteau](#), [Igor Markevitch](#), [Salvador Dalí](#), etc., Marie-Blanche de Polignac ([Jeanne Lanvin](#)'s daughter) and Madeleine and [Robert Perrier](#), with [Josephine Baker](#), [Le Corbusier](#), [Django Reinhardt](#), etc.

In the following survey we present an overview on the famous Parisian and other salonnières.

Adèle de Boigne (1781-1866)

The July Monarchy (1830-1848) was to be the zenith of Adèle d'Osmond's glory. The Osmond family was closely linked to the Orleans family, and Adele herself was an intimate of the French queen, [Marie-Amélie de Bourbon](#) (1782–1866). With age, her salon took a distinctly political character. Starting in 1835, she wrote her famous memoirs, published in 1907 in an abridged version and in full in 1921, under the title *Stories of an Aunt, Memoirs of the Countess de Boigne, born Osmond*. It is a unique record of the July Monarchy. [Marcel Proust](#) was an enthusiastic reader, and was inspired by it to create the character of Madame de Villeparisis in [À la recherche du temps perdu](#). Her novel *Une Passion dans le grand monde*, published in 1867 after her death, described the artificiality and corruption of the life led by high society.

Dorothee de Courlande (1793-1862)

Dorothea von Biron, Princess of Courland, Duchess of Dino, Talleyrand, and Sagan, was a [Baltic German noblewoman](#). For a long time, she accompanied the French statesman [Charles Maurice de Talleyrand-Périgord](#); she was the separated wife of his nephew, [Edmond de Talleyrand-Périgord](#). The opinions she inspired are various; those of men, admiring her beauty and intelligence, praise her, but those of women, jealous of her position and wealth, are more venomous. It is strange that she had no close female friends but instead was a solitary figure, despite keeping up a wide correspondence with many personalities of her era. She was a true European, in an era where that word was unknown. Born between two cultures, speaking three languages, in contact with all the political personalities of Europe, she could have been, in another era, thanks to her intelligence, a scholar or politician. But in that era, only men had a career, and so she was unable to realize her numerous talents. As Guizot said of her: "une personne rare et grande". [Greville](#) noted in his diary on 20 September 1831 that Talleyrand described her as "the cleverest man or woman he ever knew".

[Olympe Pélissier Rossini](#) (1799-1878)

Olympe Pélissier was a [French artists' model](#), [courtesan](#) and the second wife of the [Italian composer Gioachino Rossini](#). She sat for [Vernet](#) for his painting of *Judith and Holofernes*. [Honoré de Balzac](#) described her as "the most beautiful courtesan in [Paris](#)". Olympe Pélissier was born in Paris on 9 May 1799, the illegitimate daughter of an unmarried woman who later married Joseph Pélissier. She was sold by her mother at age fifteen to a young duke, who installed her in a small furnished house. The duke contracted a venereal disease and had to give her up. Pélissier was then sold to a rich Anglo-American. She soon gained her independence and began to look for other lovers. Under the [Bourbon Restoration](#), Pélissier had been a notable figure in [Parisian](#) society, admired by the Comte de Girardin, holding [salons](#) attended by Baron Schikler, and in 1830 had a liaison with the writer Eugène Sue, who introduced her to Honoré de Balzac. Pélissier and Balzac were lovers for a year, starting in 1830. After Pélissier rejected him, the affair left Balzac full of resentments. A few years later Balzac called Pélissier "an evil courtesan." Amongst her lovers, which included aristocrats, artistic and literary figures, were the painters Horace Vernet and [Alfred d'Orsay](#), and the musician [Vincenzo Bellini](#). The affair with Sue was longer lasting, but the relationship consisted of a frequent swing between quarrels and strong passions. It ended when Pélissier met Gioacchino Rossini. She and Rossini first met in the 1830s in the aftermath of his separation from his first wife [Isabella Colbran](#). The couple lived in his house in Paris until a cholera epidemic forced them to leave the city in favour of Italy. In November 1837 they moved to Milan where they held musical evenings every Friday night. Among the regular guests was [Franz Liszt](#). In October 1845 Isabella, Rossini's first wife died, and in August 1846 Rossini and Pélissier married. Bologna was being affected by uprisings as part of the [1848 Revolution](#), so the couple moved to Florence. They stayed for seven years, during which time Rossini's health declined. Pélissier missed Paris, and wished to return there to seek medical help for Rossini, so May 1855 they returned there, taking a large apartment on the [Rue de la Chaussée-d'Antin](#). In Paris they restarted their musical evenings, which became legendary within Paris society. Guests included [Alexandre Dumas fils](#), [Eugène Delacroix](#), Franz Liszt, and [Giuseppe Verdi](#). The couple had a new villa constructed in the [Passy](#) suburb of Paris in 1859. Rossini died a rich man in 1868, allowing Pélissier to live a comfortable life after his death. Olympe Pélissier died on 22 March 1878.

Apollonie Sabatier (1822-1890)

Sabatier hosted a salon in Paris on Rue Frochot, near the Place Pigalle, where she met nearly all of the French artists of her time, such as Gérard de Nerval, Nina de Villard, Arsène Houssaye, Edmond Richard, Gustave Flaubert, Louis Bouilhet, Maxime du Camp, Gustave Ricard, Judith Gautier, daughter of Théophile; Ernest Feydeau, father of Georges Feydeau, Hector Berlioz, Paul de Saint-Victor, Alfred de Musset, Henry Monnier, Victor Hugo, Ernest Meissonnier, Charles Augustin Sainte-Beuve, Charles Jalabert, Ernesta Grisi, Gustave Doré, the musician Ernest Reyer, James Pradier, Auguste Préault, Jules Barbey d'Aurevilly, Auguste Clésinger and Édouard Manet. Gustave Flaubert, Théophile Gautier and some others have written articles about her and she was one of four women who inspired Charles Baudelaire's famous work Les Fleurs du Mal. Sabatier and Baudelaire were lovers from 1857 to 1862. Edmond de Goncourt was the first to nickname Sabatier *La Présidente*. A term used by Gautier in his *Lettre à la Présidente*, which was published in print in 1890.

Delphine de Girardin (1804-1855)

Delphine de Girardin was born at Aachen, and christened Delphine Gay. Her mother, the well-known Madame Sophie Gay, brought her up in the midst of a brilliant literary society. Gay's marriage in 1831 to Émile de Girardin opened up a new literary career. The contemporary sketches which she contributed from 1836 to 1839 to the *La Presse*, under the *nom de plume* of **Charles de Launay**, were collected under the title of *Lettres parisiennes* (1843), and obtained a brilliant success. *Contes d'une vieille fille à ses neveux* (1832), *La Canne de Monsieur de Balzac* (1836) and *Il ne faut pas jouer avec la douleur* (1853) are among the best-known of her romances; and her dramatic pieces in prose and verse include *Judith* (1843), *Cléopâtre* (1847), *Lady Tartuffe* (1853), and the one-act comedies, *C'est la faute du mari* (1851), *La Joie fait peur* (1854), *Le Chapeau d'un horloger* (1854) and *Une Femme qui deteste son mari*, which did not appear till after the author's death, which occurred in Paris. Madame Girardin exercised considerable personal influence in contemporary literary society, and in her drawing-room were often to be found Théophile Gautier, Honoré de Balzac, Alfred de Musset and Victor Hugo. Her collected works were published in six volumes (1860-1861).

Geneviève Straus (1849-1926)

Geneviève Halévy, later **Geneviève Bizet** and **Geneviève Straus** was a French [salonnière](#). She inspired [Marcel Proust](#) as a model for the Duchesse de Guermantes and Odette de Crécy in *À la recherche du temps perdu*. Geneviève Halévy was the daughter of the composer [Jacques-Fromental Halévy](#) and his wife Léonie (née Rodrigues-Henriques), both Jewish. Her father is nominated in 1854 perpetual secretary of l'Academie des Beaux-Arts. At Quai Conti the Halevys mingle at their "Salon de Fromental" well-known artists, young pupils of the Conservatoire and celebrities of all types. Geneviève Halévy's youth was sad: She lost her father when she was 13 years old, her elder sister when she was 15 years old, and her mother suffered from periods of mental instability. In 1869, she married [Georges Bizet](#), pupil of her father, and gave birth in 1871 to their son Jacques, who became a school friend of [Marcel Proust](#). George Bizet describes her as "an adorable creature whose intelligence is open to all progress, all reforms, who doesn't believe in the Jewish God nor the Christian God, but who believes in honor, duty and morals in one word." Bizet died suddenly of a heart attack in 1875. Geneviève moved to live with her uncle, [Léon Halévy](#), and opened a salon for her cousin [Ludovic Halévy](#), where she helped him in receiving the artistic society of the time. This was known as *Ludovic's Thursdays* (Les jeudis de Ludovic). She remarries with Emile Straus in 1886, a financier working with Rothschild. She runs her own salon from the eighties at Boulevard Haussmann, and since 1898 at rue Miromesnil. Her regular guests are Jules Renard, Tristan Bernard, Victorien Sardou, Rejane, Sarah Bernhardt, Lucien Guitry, Anna de Noailles, Henri Meilhac and Jules Lemaitre. Marcel Proust a "regular" meets there Charles Haas. Her salon became increasingly fashionable: She received [Robert de Montesquiou](#) and his cousin [Comtesse Greffulhe](#), painters and journalists, Baron and Baronness [Alphonse de Rothschild](#), Comtesse Potocka, Duchesse de Richelieu, and [Comtesse de Chevaligné](#), [Guy de Maupassant](#), [Georges de Porto-Riche](#), [Paul Bourget](#), [Paul Hervieu](#), [Joseph Reinach](#), & her cousin Ludovic. Many supporters of [Dreyfus](#) socialized at Mme Straus's salon, including [Marcel Proust](#), who was one of the first intellectuals to sign a petition in *L'Aurore* during the [Dreyfus Affair](#). It is in August 1897 at Trouville that Joseph Reinach tells the Straus that he has the proof of the innocence of Dreyfus. Genevieve takes publicly a standpoint in favor of Dreyfus and many habitués desert her salon, as Jules Lemaitre, Jean-Louis Forain, Arthur Meyer. After the Affair, the salon became less prominent. After 1910, Mme. Straus became increasingly depressed, and removed herself from society. Her son committed suicide in 1922, weeks before Proust's death. She died in 1926.

George Sand (1804-1876)

Amantine Lucile Aurore Dupin, best known by her pen name **George Sand** was a French novelist, memoirist, and Socialist. One of the more popular writers in Europe in her lifetime, being more renowned than both [Victor Hugo](#) and [Honoré de Balzac](#) in England in the 1830s and 1840s, Sand is recognised as one of the most notable writers of the European Romantic era. Sand was well-known around the world, while her social practices, writings, and beliefs prompted much commentary, often by other members of the world of arts and letters. Sand was one of many notable 19th-century women who chose to wear male attire in public. Sand was one of the women who wore men's clothing without a permit, justifying them as being less expensive and far sturdier than the typical dress of a noblewoman at the time. Sand's male attire enabled her to circulate more freely in Paris than most of her female contemporaries, and gave her increased access to venues from which women were often barred, even women of her social standing. Also scandalous was Sand's smoking tobacco in public.

In 1822, at the age of eighteen, Sand married [Casimir Dudevant](#) out-of-wedlock son of Baron Jean-François Dudevant. In early 1831, she left her husband & entered upon a 4-5-year period of "romantic rebellion." In 1835, she was legally separated from Dudevant, and took custody of their children. Sand had romantic affairs with [Jules Sandeau](#) (1831), [Prosper Mérimée](#), [Alfred de Musset](#) (summer 1833 – March 1835), [Pierre-François Bocage](#), [Charles Didier](#), [Félicien Mallefille](#), [Louis Blanc](#), and composer [Frédéric Chopin](#) (1837–1847). Later in her life, she corresponded with [Gustave Flaubert](#), and despite their differences in temperament and aesthetic preference, they eventually became close friends. She engaged in an intimate romantic relationship with actress [Marie Dorval](#).

In addition, Sand wrote [literary criticism](#) and political texts. In her early life, she sided with the poor and working class as well as [women's rights](#). When the [1848 Revolution](#) began, she was an ardent republican. Sand started her own newspaper, published in a workers' co-operative. Politically, she became very active after 1841 and the leaders of the day often consulted with her and took her advice. She was a member of the provisional government of 1848, and during Louis-Napoléon Bonaparte's coup d'état of December 1851, she negotiated pardons and reduced sentences for her friends. Sand was known for her implication and writings during the [Paris Commune](#), where she took a position for the Versailles assembly against the "[communards](#)," urging them to take violent action against the "rebels." She was appalled by the violence of the [Paris Commune](#). She wrote: "The horrible adventure continues. They ransom, they threaten, they arrest, they judge. They have taken over all the city halls, all the public establishments, they're pillaging the munitions and the food supplies." Sand was far more than a salonniere, author, feminist or lover, she was the essence of an epoch, of Paris, of culture.

Juliette Adam (1836-1936)

In 1852, Juliette married a doctor named La Messine, and published in 1858 her *Idées antiproudhoniennes sur l'amour, la femme et le mariage*, in defense of Daniel Stern (pen name of [Marie d'Agoult](#)) and [George Sand](#). After her first husband's death in 1867, Juliette married Antoine Edmond Adam (1816–1877), [prefect](#) of police in 1870, who subsequently became [life-senator](#). She established a salon which was frequented by [Gambetta](#) and the other republican leaders against the conservative reaction of the 1870s. In this salon first at 23, boulevard Poissonniere, and since 1887, at 190, boulevard Malesherbes, she hosted [Georges Clemenceau](#), [Adolphe Thiers](#), [Émile de Marcère](#), [Eugène Pelletan](#), [Gabriel Hanotaux](#), [Edmond About](#), [Louis Blanc](#), [Alphonse Daudet](#), [Camille Flammarion](#), the publisher [Jules Hetzel](#), the poet [Sully Prudhomme](#), [Émile de Girardin](#), [Gustave Flaubert](#), [Gaston Paris](#), [Victor Hugo](#), [Guy de Maupassant](#), [Ivan Tourguéniev](#), [Aurélien Scholl](#), and [Dimítrios Vikélas](#). She is most influential, the incarnation of “la Grande Française”, determined to reconstitute to France her leading role in Europe, thus favoring an alliance with Russia and opposing Germany which defeated France. She founded the *Nouvelle Revue* in 1879, which she edited for 8 years, and retained influence in its administration until 1899.

She published writings by [Paul Bourget](#), [Pierre Loti](#), and [Guy de Maupassant](#) as well as [Octave Mirbeau](#)'s novel *Le Calvaire*. She became involved in the *Avant-Courrière* (Forerunner) association founded in 1893 by [Jeanne Schmahl](#), which called for the right of women to be witnesses in public and private acts, and for the right of married women to take the product of their labor and dispose of it freely. The most famous of her numerous novels is *Païenne* (1883). Her reminiscences, *Mes premières armes littéraires et politiques* (1904) and *Mes sentiments et nos idées avant 1870* (1905), contain much interesting gossip about her distinguished contemporaries. She lived 100 years, almost the same as the book's twelfty, and she emblems this era, hosting the twelfty's most important cultural persons.

[Marie d'Agoult](#) (1805-1876)

Marie Catherine Sophie, Comtesse d'Agoult was a Franco-German [romantic](#) author and historian, known also by her pen name, **Daniel Stern**. Marie was born in [Frankfurt am Main](#), Germany, as **Marie Catherine Sophie de Flavigny**, the daughter of Alexander Victor François, Vicomte de Flavigny (1770–1819), a footloose émigré French aristocrat, and his wife Maria Elisabeth [Bethmann](#) (1772–1847), a German banker's daughter. The young Marie spent her early years in Germany and completed her education in a French convent after the [Bourbon Restoration](#). She entered into an early [marriage of convenience](#) with Charles Louis Constant d'Agoult, Comte d'Agoult (1790–1875) on 16 May 1827, thereby becoming the Comtesse d'Agoult. They had two daughters, Louise (1828–1834) and Claire (1830–1912). Marie never divorced the count, even though she had left him for Franz Liszt. From 1835 to 1839, she lived with [virtuoso](#) pianist and composer [Franz Liszt](#), who was six years younger, and was then a rising concert star. She became close to Liszt's circle of friends, including [Frédéric Chopin](#), who dedicated his [12 Études, Op. 25](#) to her (his earlier set of [12 Études, Op. 10](#) had been dedicated to Liszt). Liszt's "Die Lorelei", one of his very first songs, based on text by [Heinrich Heine](#), was also dedicated to her. D'Agoult had three children with Liszt; however, she and Liszt did not marry, maintaining their independent views and other differences while Liszt was busy composing and touring throughout Europe. Her children with Liszt were: Blandine (1835–1862), who was the first wife of future French prime minister [Émile Ollivier](#) but died at the age of 26. [Cosima](#) (1837–1930), who first married pianist and conductor [Hans von Bülow](#) and then composer [Richard Wagner](#). Daniel (1839–1859), who was already a promising pianist and gifted scholar when he died of [tuberculosis](#). During the Second Empire, Marie d'Agoult hosted a salon where republicans met, such as [Émile Ollivier](#), [Jules Grévy](#), [Carnot](#), [Émile Littré](#) and [Dupont-White](#).

[Juliette Récamier](#) (1777-1849)

Jeanne Françoise Julie Adélaïde Récamier, known as **Juliette**, was a French socialite, whose [salon](#) drew Parisians from the leading literary and political circles of the early 19th century. As an icon of [neoclassicism](#), Récamier cultivated a public [persona](#) of herself as a [great beauty](#) and her fame quickly spread across Europe. She befriended many intellectuals, sat for the finest artists of the age, and spurned an offer of marriage from [Prince Augustus of Prussia](#). At the age of fifteen, she was married on 24 April 1793 to [Jacques-Rose Récamier](#) (1751–1830), a banker nearly thirty years her senior. From the earliest days of the [French Consulate](#) to almost the end of the [July Monarchy](#), Récamier's [salon](#) in Paris was one of the chief resorts of literary and political society that followed what was fashionable. The [habitués](#) of her house included many former royalists, with others, such as [General Jean Bernadotte](#) and [General Jean Victor Moureau](#), more or less disaffected to the government. This circumstance, together with her refusal to act as lady-in-waiting to Empress consort [Joséphine de Beauharnais](#) and her friendship for [Germaine de Staël](#), brought her under suspicion. In 1800 [Jacques-Louis David](#) began [his portrait](#) of her, but left it unfinished on learning [François Gérard](#) had been commissioned to paint a portrait before he had. Despite old age, ill-health, partial blindness, and reduced circumstances, Récamier never lost her attractiveness, though at least one man who met her, artist [Guillaume Gavarni](#), opined that she "stank of the lower middle class." And although she numbered among her admirers [Mathieu de Montmorency](#), [Lucien Bonaparte](#), Prince Augustus of Prussia (whose proposal was accepted but the marriage never occurred), [Pierre-Simon Ballanche](#), [Jean-Jacques Ampère](#), and Benjamin Constant, none of them obtained over her so great an influence as did Chateaubriand, though she suffered much from his imperious temper. If she had any genuine affection, it seems to have been for the [baron de Barante](#), whom she met at Coppet. In 1849, Récamier died in Paris of [cholera](#) at the age of 71, thus living under Louis XVI, the First Republic, Napoleon I, Louis XVIII, Charles X, Louis-Philippe, and Napoleon III's 2nd Republic.

[Léontine Lippmann, Mme. Arman de Caillavet](#), 1844-1910. Private Hotel, 12 Avenue Hoche, Paris

Léontine Lippmann, better known by her married name of **Madame Arman de Caillavet** was the [muse](#) of [Anatole France](#) and the hostess of a highly fashionable literary [salon](#) during the [French Third Republic](#). She is the model of Madame Verdurin in [Proust's *Remembrance of Things Past*](#). Born into a wealthy Jewish family as a banker's daughter, she married Albert Arman, whose wealthy father was a friend of Emperor Napoleon III, who was present at their wedding. Beautiful in her youth, with clear blue eyes, black hair, and a mocking mouth, she was intelligent, cultivated and spoke four languages. She often attended the salons of [Lydie Aubernon](#) and it was there that she met [Anatole France](#), in 1883. From 1888 there followed years of a passionate, exclusive liaison between the pair, often all the stormier for the jealousy of both parties. She inspired his [*Thaïs*](#) (1890) and [*Le Lys rouge*](#) (1894). Mme de Caillavet started her own salon in the [*hôtel particulier*](#) at 12 [avenue Hoche](#), near the [Place de l'Étoile](#). Sitting in a [*bergère*](#) to the right of the fireplace, with Anatole France standing in front of the fireplace, every Sunday she welcomed the French fashionable, intellectual and political elites, including writers, actors, lawyers and députés (but not musicians, since she or France did not like music). On Wednesdays, Mme de Caillavet held conversational dinners on the model of those of Mme Aubernon, where could be found [Alexandre Dumas](#), the Hellenist Brochard, Professor Pozzi, Leconte de Lisle, [José-Maria de Heredia](#), [Ernest Renan](#) and, of course, Anatole France. Other important habitués/attendees were: [Maurice Barrès](#), [Louis Barthou](#), [Tristan Bernard](#), [Sarah Bernhardt](#), Prince & Princess Bibesco, [Léon Blum](#), [Antoine Bourdelle](#), [Georg Brandes](#), [Aristide Briand](#), [Georges Clemenceau](#), [Colette](#) & her husband Willy), Dr. [Paul-Louis Couchoud](#), [François Cruchy](#), [Marie and Pierre Curie](#), [Jean-Élie](#), [Duke Decazes](#), [Guglielmo Ferrero](#), [Robert de Flers](#), the dancer [Loïe Fuller](#), [Fernand Gregh](#), [Paul de Grunbaum](#), the actor [Lucien Guitry](#) and his son [Sacha Guitry](#), [Gabriel Hanotaux](#), [Jean Jaurès](#), [Léopold Kaher](#), [Jules Lemaitre](#), [Count de Lisle](#), [Pierre Loti](#), [Charles Maurras](#), [Pierre Mille](#), [Robert de Montesquiou](#), the abbot and astronomer [Théophile Moreux](#), abbé [Mugnier](#), the painter [Munkacsy](#), [Anna de Noailles](#), [Hugo Ogetti](#), [Raymond Poincaré](#), Prof. [Samuel-Jean Pozzi](#), [Marcel Prévost](#), Count [Giuseppe Primoli](#), [Marcel Proust](#), [Charles Rappoport](#), [Joseph Reinach](#), the actress [Réjane](#), [Commandant Rivière](#), [J.-H. Rosny the elder](#), Baron and Baroness Rothschild, [Marcel Schwob](#), [Raymond Poincaré](#), Michel Corday, and [Marcelle Tinayre](#). Léontine's salon becomes political after the Dreyfus affair and she hosts many supporters of the revision of the trial, such as Clemenceau, Leon Blum, Louis Barthou, Raymond Poincare and Jaures.

Marie-Anne de Loynes (1837-1908)

Marie-Anne Detourbay was a French demimonde & salon-holder. She was a famous courtesan during the Second Empire, and also hosted a literary salon which had some influence during the Second Empire and the Third Republic. Marie-Anne was born in Reims to a poor and large family. She moved to Paris when she was 15, where under the name of *Jeanne de Tourbey* she was discovered in a brothel by Alexandre Dumas fils. She soon became part of the Parisian demimonde. Her first protector, Marc Fournier, was director of the Théâtre de la Porte Saint-Martin, who introduced her to Prince Napoleon, cousin of Napoleon III. Napoleon installed her in a beautiful flat in rue de l'Arcade, close to the Avenue des Champs-Élysées. She would host an exclusively male assembly of the Parisian *men of letters*: Ernest Renan, Sainte-Beuve, Théophile Gautier, Prévost-Paradol and Emile de Girardin. In 1872, she married Count Victor Edgar de Loynes. This marriage gave her access to high society, but the Count soon left for America, where he disappeared. Her visitors became more prestigious; received every day between five and seven o'clock. Her visitors included Georges Clemenceau, Georges de Porto-Riche, Alexandre Dumas fils, Ernest Daudet, Henry Houssaye, Pierre Decourcelle, Maurice Barrès, Paul Bourget, Marcel Proust, Georges Bizet and Henri Kowalski. Between 1880 and 1885, through Arsène Houssaye, she met the critic Jules Lemaître, who was 15 years younger than her. Under his leadership, she founded, the League of the French Homeland in 1899 and became passionately anti-Dreyfusard. This led to a break with some of her friends including Georges Clemenceau and Anatole France. From then on she received into her home Édouard Drumont, Jules Guérin and Henri Rochefort. In her latter years she supported the political position of Charles Maurras, and shortly before her death, she helped Maurras & Léon Daudet to found Royalist newspaper *L'Action française* by donating 100,000 gold francs.

[Mathilde Bonaparte](#), Princesse Mathilde (1820-1904)

Mathilde Laetitia Wilhelmine Bonaparte, Princesse Française, [Princess of San Donato](#) was a [French](#) princess and [salonnière](#). She was a daughter of [Napoleon](#)'s brother [Jérôme Bonaparte](#) and his second wife, [Catharina of Württemberg](#), daughter of [King Frederick I of Württemberg](#). Princess Mathilde lived in a mansion in [Paris](#), where she was a prominent member of the new aristocracy during and after the [Second French Empire](#) as a hostess to men of arts and letters as a salon hostess. She disliked etiquette, but welcomed her visitors, according to [Abel Hermant](#), with an extreme refinement of snobbery and politeness. [Théophile Gautier](#) was employed as her librarian in 1868. Referring to her uncle, [Emperor Napoleon I](#), she once told [Marcel Proust](#): "If it weren't for him, I'd be selling oranges in the streets of [Ajaccio](#)." At the fall of the monarchy in 1870, she lived in [Belgium](#) for a while, but soon returned to Paris. In 1873, following the death of Prince Demidoff in 1870, she married the artist and poet [Claudius Marcel Popelin](#) (1825–1892). She was the only member of the [Bonaparte family](#) to stay in France after May 1886, when the French Republic expelled the princes of the former ruling dynasties. In 1896, she was invited to a ceremony at [Invalides](#) by [Félix Faure](#) at a visit of [Emperor Nicholas II Russia](#) and his wife [Alexandra](#). She died in Paris in 1904, aged 83.

An aged Princess Mathilde makes a brief appearance in Proust's *À l'ombre des jeunes filles en fleurs* (*In the Shadow of Young Girls In Flower*), the second volume of *In Search of Lost Time*. She mentions that if she wants to visit [les Invalides](#), she does not need an invitation: she has her own set of keys. From 1848 to 1852 Mathilde becomes the first Lady of her cousin Louis-Napoleon, president of the Second Republic, who was not married. She runs a literary salon during the Second Empire and the Third Republic in Paris, attended by [Paul Bourget](#), [les frères Goncourt](#), [Gustave Flaubert](#), [Tourgueniev](#), and even authors who opposed the Emperor, although she was a Bonapartiste. When the young Marcel Proust visited her salon in his youth at her private hotel in 20, rue de Berri, there were only old Bonapartistes there as Charles Haas (model of Charles Swann), Paul Bourget (model of Bergotte), count Primoli, count Benedetti (model of M. de Norpois), or the Straus. She resided and received from 1849 to 1857 at [l'hôtel de la Princesse Mathilde](#), n° 10, [rue de Courcelles](#), from 1857 to 1870 at 22-28 rue de Courcelles, since 1871 at the private hotel, 20, rue de Berri.

[Gertrude Stein](#) (1874-1946) Portrait by Pablo Picasso (1906)

Gertrude Stein was an American novelist, poet, playwright, socialite, and art collector. Stein moved to [Paris](#) in 1903, and made France her home for the remainder of her life. She hosted a Paris [salon](#) at 27, Rue de Fleurus, where the leading figures of modernism in literature and art, such as [Pablo Picasso](#), [Ernest Hemingway](#), [F. Scott Fitzgerald](#), [Sinclair Lewis](#), [Ezra Pound](#), [Sherwood Anderson](#), [Gavin Williamson](#), [Thornton Wilder](#), [Francis Cyril Rose](#), [Bob Brown](#), [René Crevel](#), [Élisabeth de Gramont](#), [Francis Picabia](#), [Claribel Cone](#), [Mildred Aldrich](#), [Jane Peterson](#), [Carl Van Vechten](#), and [Henri Matisse](#), would meet. Saturday evenings had been set as the fixed day and time for formal congregation so Stein could work at her writing uninterrupted by impromptu visitors. It was Stein's partner Alice Toklas who became the de facto hostess for the wives and girlfriends of the artists in attendance, who met in a separate room. Gertrude attributed the beginnings of the Saturday evening salons to Matisse, as people began visiting to see his paintings and those of Cézanne: "Matisse brought people, everybody brought somebody, and they came at any time and it began to be a nuisance, and it was in this way that Saturday evenings began." Among Picasso's acquaintances who frequented the Saturday evenings were: [Fernande Olivier](#) (Picasso's mistress), [Georges Braque](#) (artist), [André Derain](#) (artist), [Max Jacob](#) (poet), [Guillaume Apollinaire](#) (poet), [Marie Laurencin](#) (artist, and Apollinaire's mistress), [Henri Rousseau](#) (painter), and [Joseph Stella](#). Hemingway frequented Stein's salon, but the two had an uneven relationship. They began as close friends, with Hemingway admiring Stein as a mentor, but they later grew apart, after Stein called Hemingway "yellow" in *The Autobiography of Alice B. Toklas*. Upon the birth of his son, Hemingway asked Stein to be the godmother of his child. Stein has been credited with inventing the term "[Lost Generation](#)" for those whose defining moment in time and coming of age had been World War I and its aftermath. In 1931, Stein advised the composer & writer [Paul Bowles](#) to go to [Tangier](#), where she & Alice had vacationed.

[Flore Singer](#) (1824-1915) and her Chateau du Chemin at [Neufmoutiers-en-Brie](#)

Flore Singer, daughter of Adolphe Ratisbonne, Jewish banker from Strasbourg, and of Charlotte Oppenheim, granddaughter of the bankers Auguste Ratisbonne and Salomon Oppenheim, descendant of the financier Cerf Beer. She was adopted by the banker Benoit Fould. Flore marries in 1846 to the stockbroker Alexandre Singer, son of the industrialist and philanthropist David Singer. Flore was an important Parisian salonniere, who received on Thursdays for almost half a century at her apartment in Hotel de Chimay where the “habitues” – regulars would meet and decide in many instances on the candidates to the Academie Francaise. At her salon would meet Alfred de Vigny, Adolphe Franck, Elme Caro, John Lemoinne, Octave Feuillert, Emile Deschanel, Ernest Renan, Adolphe Cremieux, Edmond About, a mixed society, where Jews were only a minority. It was said that her salon was the antechamber of Quai Conti. Quai Conti is the location of the Institut de France, a French learned society grouping 5 academies, including the Academie Francaise. Located at Quai Conti, constructed as the College des Quatre-Nations by Cardinal Mazarin under Louis XIV, the Institut de France was established on October 25, 1795 by the French Government (CNAM – Conservatoire National des Arts et Metiers, from which I obtained my PhD in 2004, was founded a year earlier on October 10, 1794). Institut de France comprises:

- [Académie française](#) (French Academy, concerning the French language and literature) – initiated 1635, suppressed 1793, restored 1803 as a division of the institute. 40 members.
- [Académie des inscriptions et belles-lettres](#) (Academy of Humanities, history and archeology) – initiated 1663. 55 members.
- [Académie des sciences](#) (Academy of Sciences) – initiated 1666. 263 members.
- [Académie des beaux-arts](#) (Academy of Fine Arts) – 63 members, created 1816 as the merger of
 - [Académie de peinture et de sculpture](#) (Academy of Painting and Sculpture, initiated 1648)
 - [Académie de musique](#) (Academy of Music, initiated 1669) and
 - [Académie d'architecture](#) (Academy of Architecture, initiated 1671)
- [Académie des sciences morales et politiques](#) (Academy of Moral and Political Sciences) – initiated 1795, suppressed 1803, reestablished 1832. 50 members.

In 1870, when the Prussians approached, Alexandre Singer her husband left their Chateau du Chemin, at Neufmoutiers-en-Brie to Versailles. The Prussians emptied the wine caves at a sumptuous banquet in honor of the creation of the German Empire and invited them by telegraph to participate in the banquet. This historic telegram is part of the family’s archives. During the Dreyfus Affair Flore was a vehement Dreyfusarde, against the beliefs of many of her habitués. She tried to convince her long-time friend Ferdinand Brunetiere to change his view. In her last years she retired to her Chateau du Chemin.

[Jean Dornis](#), pseudonym of Elena Goldschmidt-Franchetti (1864-1948)

Elena Goldschmidt, daughter of Isaac “John” Goldschmidt and Sophie Franchetti was born in Florence in 1864. She was married to the wealthy Guillaume Beer, son of Regina Bischoffsheim. Beer was the manager of the Banque Internationale du Credit. Elena runs a literary salon and writes also with the pseudonym of Jean Dornis. They had a house in Paris at rue des Mathurins where she received on Mondays (the socialites schedule was very busy...) and had the chateau de Voisins at Louveciennes. She received at her evenings Gabriele d’Annunzio, Pierre Loti, Lucien Daudet, Henri de Reigner and Leconte de Lisle (they met in 1888) who names her in his poem “La Rose de Louveciennes”. She is a member of l’Academie des Dames” a women counterpart of l’Academie Goncourt, and where they distribute the Prix Femina. Gustave Schlumberger is very laudatory on her literary achievements, her popular and very loved salon, where most of the authors gather. In the Journal des Goncourt she receives much less laudatory descriptions, but the Goncourts were not very philosemites to say the least. But Edmond de Goncourt was also quite a mysogine as he said ““There are no women of genius; the women of genius are men.” Elena is a great admirer of the poet Leconte de Lisle and attends regularly his salon on Saturday which was active once again after his election to the Academie Francaise. She receives his friends at her salon on Mondays. In 1893 she invites him to the pavillon of her Chateau de Voisins where he stays for the first fortnight of August, and he comes there once again in 1894 and dies there.

Ernesta de Hierschel Stern (1854-1926) at the wedding of her granddaughter

Ernesta Stern, born Maria Ernesta de Hierschel, also known as Maria Star, was an Italian-born French author. Her father was Leon de Hierschel and her mother Clementina Minerbi. She was Jewish. Ernesta married Louis Stern, a banker and a member of the Stern family. She wrote many Venetian tales and novels. She held a salon at her “hotel particulier” of 68, rue du Faubourg Saint-Honore. The regulars of her salon were la crème de la crème of Paris elites (I would love to be there but I intend to send there at least Jacques Corot, especially since I stayed for months at a very close hotel) – Auguste Rodin, Leon Bonnat, Carolus-Duran, Paul Adam, the one and only Edmond Rostand, Camille Flammarion, Joseph Reinach, the Italian poet Filippo Tommaso Marinetti, Jose-Maria de Heredia, Jean Richepin, Henri de Reigner, she was friends with Marcel Proust, Edmond Fleg, Anna de Noailles, but also musicians as Reynaldo Hahn and Gabriel Fauré are her habitués and she invites the great Caruso to sing at her evenings. She writes under the pseudonym of Maria Star - *Au fil des pensees* (1896), *L’anneau d’or aux six colombes* (1920), *Autour du coeur* (1897), *Quinze jours a Londres* (1898), *Impressions d’Espagne* (1900), *Ames de chefs-d’oeuvre* (1901), *Chaines de fleurs* (1903), *Terre des symbols* (1903), *Visions de beaute* (1907), *Les legendes de Venise* (1909), *Les deux glories* (1909), *Faut-il pardonner* (1911), *Qui l’emporte* (1912), *Supreme amour* (1914), *Le Baptême du courage* (1916), *L’epervier d’or* (1923), *Semiramis* (1924), and a novel in English “*Alistair*” in 1911. Stern became a knight of the Legion of Honour in 1920. She was widowed in 1900 and built the Villa Torre Clementina in Roquebrune-Cap-Martin in 1904. Her house is listed as an official historical monument by French Ministry of Culture.

[Marguerite Charpentier \(1848-1904\)](#) – painting by Renoir, 1876

Marguerite Charpentier was a French [salonist](#) and art collector who was one of the earliest champions of the [Impressionists](#), especially [Pierre-Auguste Renoir](#). She was born Marguerite Louise Lemonnier in Paris to Alexandre-Gabriel Lemonnier, the court jeweler, and Sophie Raymonde (née Duchâtenet). In 1871, Marguerite married the publisher [Georges Charpentier](#) and they had four children: Georgette, Marcel, Paul, and Jeanne. On Fridays from the mid 1870s to the early 1890s, Charpentier ran a political and literary salon at her house to which she invited writers, artists, musicians, actors, and politicians. Among those who attended were writers represented by her husband, including [Gustave Flaubert](#), [Alphonse Daudet](#), [Guy de Maupassant](#), [Théodore de Banville](#), [Joris-Karl Huysmans](#), and [Émile Zola](#). Artists who came ranged from traditional realists like [Carolus-Duran](#) and [Jean-Jacques Henner](#) to Impressionists such as [Édouard Manet](#), [Claude Monet](#), [Edgar Degas](#), [Alfred Sisley](#), [Gustave Caillebotte](#), and [Pierre-Auguste Renoir](#). Other visitors included the art critic [Théodore Duret](#), the art collector [Charles Ephrussi](#), the composers [Camille Saint-Saëns](#) and [Jules Massenet](#), and the actor [Sarah Bernhardt](#). Charpentier and her husband amassed a small but significant collection of paintings, mostly by French [Impressionist](#) painters. In 1875, Charpentier acquired three Impressionist paintings by Renoir, making her one of the very first art collectors to buy Impressionist work. Renoir executed half a dozen commissioned portraits of Charpentier and her family, and even described himself at one point as the Charpentiers' "private painter". His 1878 portrait of Charpentier and 2 of her children was acclaimed at the 1879 Paris Salon, and the writer [Marcel Proust](#) refers to this painting in the last volume of his novel cycle [In Search of Lost Time](#). In the early 1880s, Georges Charpentier's publishing firm ran into financial difficulties and the Charpentiers were forced to sell off part of the art collection. After Marguerite Charpentier died in 1904 and Georges in 1905, their surviving children auctioned the remainder of the art collection. Some of it is now in major museums, including the [Musée d'Orsay](#) and the [Metropolitan Museum of Art](#).

[Countess Melanie de Pourtales](#) (1836-1914), portraits by Renoir & Winterhalter

Mélanie de Pourtalès, Countess Edmond de Pourtalès (*née* **Louise Sophie Mélanie Renouard de Bussière**) was a French *salonnière* and courtier. She was born at the [Château de Robertsau](#) in [Strasbourg](#). She was introduced to the French imperial court by the Austrian ambassador, [Richard von Metternich](#), and appointed as [lady-in-waiting](#) to the empress, [Eugénie de Montijo](#), the wife of [Napoleon III](#). Pourtalès' [salon](#) was regarded as one of the most famed during the [Second French Empire](#), when she was one of the leading figures in Parisian high society and imperial court life. In her letters, she writes about the pending marriage of [Antonin-Just-Léon-Marie de Noailles](#), [Duc de Mouchy](#) to the Princess Anne Murat, daughter of [Prince Lucien Murat](#) and granddaughter of the [King of Naples Joachim Murat](#) and Queen [Caroline](#) (younger sister of the Emperor [Napoleon](#)). According to French writer [Alfred Mézières](#), "three people saw clearly what was coming before [1870](#), Lieutenant-Colonel Stoffel, [General Ducrot](#), and Madame de Pourtalès."

On 30 June 1857, she married banker [Count Edmond de Pourtalès](#) (1828–1895), a son of Count [James-Alexandre de Pourtalès](#) of the [Château de Gorgier](#), a prominent banker and art collector who had served as [chamberlain](#) the [King of Prussia Frederick William III](#). From her father, she inherited the family's château, the [Château de la Robertsau](#) (which today is known as the [Château de Pourtalès](#)) in the [département](#) of [Bas-Rhin, Alsace](#). At their château, they hosted [Franz Liszt](#), [Napoléon III](#), [Empress Eugénie](#), the king and queen of Belgium, The Prince of Wales, Prince Napoleon, Albert Schweitzer, Leon Bakst, the Princes of Belgium and Russia, [Ludwig I of Bavaria](#), [Louis II de Bavière](#), Kaiser [Guillaume II](#), the [Grand Duke of Baden](#) and the [Princess Metternich](#). Many plays were played at the park, including *Folies Amoureuses* by Jean-Francois Regnard in 1911. Her husband inherited the [Pourtalès mansion](#), a [hôtel particulier](#) (essentially a grand townhouse) on [Rue Tronchet](#) in the [6th arrondissement of Lyon](#) that was built for his father between 1838 and 1839 by [Félix Duban](#).

[Anne-Marie Gaillard, Nina de Callias](#) (1843-1884), portraits by Manet

Anne-Marie Gaillard, known as *Nina de Villard de Callias*, *Nina de Callias* or *Nina de Villard*, was a French writer and poet. The daughter of a rich [Lyon](#) lawyer, after her marriage to Hector de Callias (comte de Callias, a writer and journalist on [Le Figaro](#)) hosted one of the most prominent literary and artistic Salons of Paris at 17, rue Chaptal. She was a lover of [Charles Cros](#) and the inspiration for his *Coffret de santal*. She is also the *Dame aux éventails* by [Édouard Manet](#). She contributed two poems to *Le Parnasse contemporain*. The [Franco-Prussian War](#) forced her to flee with her mother to [Geneva](#), where she stayed three years before returning to re-assume the dissolved artistic circles there. Although she never recovered her former prominence, she did join various movements and attract new members to her salon, before her early death. She was separated from her husband in 1867.

[Rachilde](#), pen name of Marguerite Vallette-Eymery (1860-1953)

Rachilde was the [pen name](#) and preferred identity of novelist and playwright **Marguerite Vallette-Eymery**. Born near [Périgueux](#), Rachilde went on to become a [symbolist](#) author and the most prominent woman in literature associated with the [Decadent Movement](#) of *fin de siècle*. A diverse and challenging author, Rachilde's most famous work includes the darkly erotic novels [Monsieur Venus](#) (1884), [La Marquise de Sade](#) (1887), and [La Jongleuse](#) (1900). She also wrote a 1928 monograph on gender identity, *Pourquoi je ne suis pas féministe* ("Why I am not a Feminist"). Her work was noted for being frank, fantastical, and always with a suggestion of autobiography underlying questions of gender, sexuality, and identity. Between 1878 and 1881, Marguerite moved to Paris with money that her father had raised by selling his prize hounds. She cut her hair short, went out publicly in men's clothing, and intentionally shocked the society around her with suggestions of gender ambiguity. Her cousin Marie de Saverny had introduced her to famous actress [Sarah Bernhardt](#), who was known for her libertine interests and her own willingness to create her own identity. Bernhardt used her connections to help make sure that Rachilde's career could get off to a good start. Rachilde began to hold a salon in her apartment each Tuesday and it quickly became a gathering place for young non-conformist writers and their allies, placing her at the center of activity for the symbolist and decadent movements. She met [Alfred Vallette](#) in 1885 and they married in 1889, despite his disapproval of her writing and her sometimes shocking public behavior. With their marriage, she regrew her hair and adopted a more subdued presentation of herself. A few months after their civil ceremony wedding, their only child was born. When Vallette helped launch the avant-garde magazine [Mercure de France](#) in 1890, Rachilde was a leading force on the editorial staff. There, she not only got to write her own material, but helped select and refine the work of others and to express her opinions in a way that would help define literature for fin de siècle France. Rachilde began to hold her Tuesday salon in the *Mercure* offices. She took great pride in the luminaries who attended, a group which included not only the established inner circle of symbolist writers, but other notable counter-cultural figures such as [Alfred Jarry](#), [Oscar Wilde](#), painters [Toulouse-Lautrec](#) and [Gauguin](#), composer [Maurice Ravel](#), [Jules Renard](#), [Maurice Barrès](#), [Pierre Louÿs](#), [Émile Verhaeren](#), [Paul Verlaine](#), [Jean Moréas](#), [Paul](#) et [Victor Margueritte](#), [Francis Carco](#), [André Gide](#), [Catulle Mendès](#), [Léo d'Orfer](#) (Marius Pouget), [Natalie Clifford Barney](#), [Henry Bataille](#), [Guillaume Apollinaire](#), [Léon Bloy](#), [Remy de Gourmont](#), [Joris-Karl Huysmans](#), [Camille Flammarion](#), [Stéphane Mallarmé](#), [Henry Gauthier-Villars](#) dit « Willy », [Jean Lorrain](#), [Laurent Tailhade](#), [Louis Dumur](#). She was an early friend and supporter of fellow writer [Colette](#) and American ex-patriate [Natalie Clifford Barney](#). In 1935, however, when Rachilde was 75, her husband died at his desk. Her active social presence ended with his death. After more than fifty years, her Tuesday salons came to an end. She also had a note-worthy impact on the career and legacy of British Oscar Wilde. She hosted him and his lover at her salon.

[Virginie Ancelot](#) (1792-1875)

Marguerite-Louise Virginie Chardon Ancelot was a [French](#) painter, writer and playwright. Ancelot was born to a parliamentary family in [Dijon](#), and was married to playwright [Jacques-François Ancelot](#). From 1824 to 1866 Ancelot hosted a [literary salon](#) on [Paris's rue de Seine](#). Her plays were collected in four volumes and published as *Theâtre complet* in 1848. She published two memoirs: *Les Salons de Paris, foyers éteints* (1858) and *Un salon de Paris 1824-64* (1866). Her most important novels include *Georgine* (1855), *Une route sans issue* (1857), and *Un nœud de ruban* (1858). Virginie's mother holds a salon and initiates her to painting. In 1810 Virginie participates as a painter at the Salon of 1810. At the 1828 Salon she exhibits *Une lecture de M. Ancelot* where almost all the authors from her time appear. Virginie marries in 1818 [Jacques-François Ancelot](#), who would be known soon for his tragedy *Louis IX*. He writes subsequently vaudevilles and light comedies. Virginie succeeds very much with 20 plays staged at the best theaters and published in 1848 in 4 volumes. She has much success also with novels such as *Gabrielle* (1839), *Une famille parisienne* (1856) and others.

Virginie hosts at her salon of l'hôtel de La Rochefoucauld-Liancourt, [rue de Seine](#), from 1824 onwards, [Victor Hugo](#), [Rachel](#), [Stendhal](#), [Chateaubriand](#), [Alphonse de Lamartine](#), [Alfred de Vigny](#), [Prosper Mérimée](#), [Eugène Delacroix](#), [Saint-Simon](#), [Alfred de Musset](#), [Alphonse Daudet](#), [Pierre-Édouard Lémontey](#), [Lacretelle](#), [Baour-Lormian](#), [Sophie Gay](#) et sa fille [Delphine de Girardin](#), [Henri de Rochefort-Luçay](#), [Mélanie Waldor](#), [Jacques Babinet](#), [Juliette Récamier](#), [Anaïs Ségalas](#), [François Guizot](#), her husband [Jacques-François Ancelot](#) who was admitted in 1841 to the [Académie française](#), and many others, thus becoming one of the best literary salons in Paris.

Marie-Louise Jeanne Peyrat, marquise [Arconati-Visconti](#) (1840-1923)

French collector, patron and salonniere. Daughter of the journalist and politician Alphonse Peyrat. She was educated in the spirit of the French Revolution by her father and became progressist. As a young woman she lived in boulevard Saint-Michel in Paris. She attends courses at the Sorbonne and Ecole du Louvre. Her fields of interests are philosophy, politics and history, and she visits often the Assemblée Nationale where her father advocates republican, socialist and anti-clericalism views. He is also an adherent of the Italian Risorgimento and befriends the marquis Giuseppe Arconati Visconti. Marie meets his son Gianmartino, born in 1839, an artist and intellectual who participates in the battles of Italy in 1860/1861. They fall in love and marry in November 1873, in spite of the disapproval of Visconti's family. But he dies 3 years later in 1876. Marie inherits an immense fortune and decides to live in Paris and at their chateau Gaasbeek. She starts a salon littéraire that will last until 1914 at her private hotel in 16, rue Barbet-de-Jouy. On Tuesday she receives artists, art lovers and collectors. On Thursday she has a political salon where she receives progressive personalities, such as [Léon Blum](#), [Georges Clemenceau](#), [Émile Combes](#), [Léon Gambetta](#), [Jean Jaurès](#) & [Raymond Poincaré](#). They are called "jeudistes" as they meet on jeudi - Thursday. In those meetings she becomes an ardent Dreyfusard, and she will later exchange with Alfred Dreyfus a sustained correspondence. At her Tuesday meetings she meets the collector and art lover Raoul Duseigneur who will become her compagnon from 1889 until his death in 1916. The Thursday salon dissolves at the outbreak of World War I, because of the tension between the pacifists as Jean Jaures and the nationalists as Marie and most of the other members. Finally she leaves her hotel in 1914 and ceases altogether her salonniere's activities.

[Laure Hayman](#) (1851-1939)

Laure Hayman is a French sculptor, salonniere and demi-mondaine. She is related to the painter Francis Hayman who was the teacher of Thomas Gainsborough. She was born in Chile where her father was an engineer. After the death of her father she becomes a courtesan and has great success. Among her lovers are the Duc D'Orleans, Charles de La Rochefoucauld Duc D'Estrees, the King of Greece, Charles-Egon IV of Furstenberg, Louis Weil the great uncle of Marcel Proust and Adrien Proust the father of Marcel. The only lover whom she really loved was Prince Alexis Karageorgevich, heir to the throne of Serbia. She enjoys the "liberalites" of the financier Raphael Bischoffsheim. But she lives with her lover Mimi Pegere. Her salon is at a small private hotel 4, rue La Perouse, and is one of the most brilliant of her time. Among her habitués are Marcel Proust whom she meets in 1888 when he was 17 and would remain a close friend and habitué of the salon, Paul Bourget and Jacques-Emile Blanche. She moves subsequently to 34, avenue du President-Wilson. Laure was the model of Odette de Crecy in Proust's novel *A la recherche du temps perdu*. She was probably Paul Bourget's mistress and is the model of Gladis Harvey in one of his novels. Laure is a sculptor and exhibits at the Salon d'automne of 1905. Isadora Duncan and Gertrude Norman were her models for her sculptures.

[Marie Kann](#), nee Warschawsky (1861-1928), portrait by [Léon Bonnat](#) in 1881
 Louise Cahen, nee Warschawsky (1854-1918), portrait by Leon Bonnat in 1891
 Albert Cahen d'Anvers (1846-1903), Louise's husband, portrait by Renoir, 1881

Marie Warschawsky, called “Mariek” was born in Poltava in the Russian Empire and died in Paris. She was a French salonniere, a muse of Paul Bourget and Guy de Maupassant. Louise and Marie Warschawsky were the two daughters of Adam Warschawsky, tycoon of the Russian Railroads (yes, a century before the modern Jewish Russian Oligarchs). Louise was married to Albert Cahen d'Anvers and Marie to Jacques Edouard Kann (1857-1919), a rich banker. Louise and Marie run jointly a salon at Louise's hotel and at Marie's hotel of 33, rue de Monceau, with the habitués – Paul Bourget, Guy de Maupassant and Marcel Proust. Albert Cahen, Louise's husband, was the pupil of Cesar Franck and a friend of Paul Bourget. They lived at 118, rue de Grenelle, at the hotel de Villars. He was quite known as a composer and enjoyed access to the elite social circles of his day. Marie was the friend of Mme. Pol Neveux, of the painter Leon Bonnat, the countess Emmanuela Potocka, Elizabeth de Forceville (nee Cahen d'Anvers), and of Fanny and Jules Ephrussi. She was also an intimate friend of the Princess Mathilde, niece of Napoleon I. The brothers Goncourt described her in their Journal in not very laudatory terms, and especially her “liaisons” with Paul Bourget and Guy de Maupassant. Her husband tells her in 1890 that she has to choose between him and Paul Bourget, but she would choose him as without him she wouldn't have his money. But Kann tolerates Maupassant as he is afraid of him, who treats him as a “negre”. Quite an interesting life, but so complicated, with so many lovers, so many salons to attend & social obligations, one doesn't know when all the habitues had time to work.

All those rich Jewish families were far more than salonnières, they were the financial and cultural elites of French society in 1820-1939 – the Beer, Goldschmidt, Bischoffsheim, Kann, Cahen d'Anvers, Ratisbone, Oppenheim, Lippmann, Straus, Camondo, Ephrussi, especially the Rothschilds, etc. They were influential in the cultural domain, in philanthropy, they purchased paintings and were painted by the best painters, financed musical performances, assisted authors, promoted education and gave scholarships, some of them until today. Jews, who a century ago were not admitted into European society, could not even reside in European cities and capitals, became a century later the paragons of society, famous salonnières, at the forefront of culture and philanthropy. But they became in the book's twelfth 1820-1939 also famous authors, composers, scientists, painters, musicians, physicians, economists – Proust, Kafka, Maurois, Einstein, Freud, Mendelssohn, Mahler, Offenbach, Rubinstein, Modigliani, Chagal, Pissarro, Werfel, Feuchtwanger, Weill, Marx, Eisenstein, Eric von Stroheim, to name but a few, 18 out of the hundreds mentioned in this book... And yet, the Nazis called the Jews [Untermenschen](#), inferior people, with a degenerate culture, while Germany in their epoch contributed nothing to culture, as almost all the cultural icons emigrated ([Exilliteratur](#)), while the Nazis, backed by the German and Austrian people and their allies, only sowed death, violence and plunder in Europe.

[Count Louis Raphael Cahen d'Anvers \(1837-1922\) & wife Louise \(1845-1926\)](#)

Pink & Blue by Renoir – their daughters – Alice (1876-1965) & Elisabeth (1874-1944 KZ Auschwitz)
 Room of Gilbert Cahen d'Anvers – their grandson (1909-1995) at their Chateau de Champs-sur-Marne
 Hotel Cahen d'Anvers at the corner of rue de Bassano and of avenue d'Iena.

Count Louis Raphael Cahen d'Anvers was a French banker, son of 2 wealthy Jewish banking families the Cahen d'Anvers and the Bischoffsheim, he married Louise de Mompugno, of a Sephardi wealthy Jewish family from Trieste. He is one of the largest financiers at the Bourse de Paris, with comte Camondo and the Rothschilds. Louise his wife, very beautiful and with a strong character, had many lovers, including Charles Ephrussi. She was probably not the lover of Alphonse XIII of Spain but she hosted him at their chateau de Champs-sur-Marne. Baudelaire was one of her admirers. They hosted among others, also Marcel Proust, Isadora Duncan, Paul Bourget and King Alphonse XIII of Spain. The couple had 5 children: 1. Robert Cahen d'Anvers (1871-1931), husband of Sonia Warshawsky, who was a banker as his father. One of their daughters married the banker Anthony Gustav de Rothschild (1887-1961). 2. Irene Cahen d'Anvers (1872-1963) married in 1891 count Moise de Camondo, divorced him in 1902 and then married count Charles Sampieri for whom she converted to Catholicism but whom she divorced also. Her portrait as a child is a masterpiece by Renoir. 3. Elisabeth Cahen d'Anvers (1874-1944) portraited with her sister Alice by Renoir, married count Jean de Forceville and then Louis Denfert-Rochereau. In spite of being for 50 years Catholic she was murdered by the Germans somewhere between Drancy and Auschwitz. It is politically correct to mention that she was murdered by the Nazis as mentions Wikipedia, but I prefer to say the truth that she was murdered by the Germans, as all the atrocities of World War II, including the murder of 6 million Jews were not committed only by the Nazis but by the German people and their allies. 4. Alice Cahen d'Anvers (1876-1965) married in 1898 the British general Charles Townshend, Lord Townshend of Kut. 5. Charles Cahen d'Anvers (1879-1957), banker, mayor of Champs-sur-Marne & husband of Suzanne Levy (1884-1955). He is the father of Gilbert Cahen d'Anvers (1909-1995). They had a hotel particulier at 2, rue de Bassano, where they lived with their 5 children, their paintings, etc. It goes without saying that the Germans who occupied Paris plundered all the Jewish art collections.

[Moïse de Camondo](#) (1860-1935) and wife Irene Cahen d'Anvers (1872-1963)
Hôtel Camondo, nowadays [Musée Nissim de Camondo](#)

Count Moïse de Camondo was an [Ottoman Empire](#)-born French banker and art collector. He was a member of the prominent [Camondo family](#). As a child, Camondo moved with his family from their home in [Constantinople, Ottoman Empire](#), to [Paris](#) around 1869, where he grew up and continued the career of his father, Nissim de Camondo (1830-1889), as a banker. The family was ennobled by the King of Italy in 1867. He was born into a [Sephardic Jewish](#) family that owned one of the largest banks in the Ottoman Empire, established in France since 1869. Starting in 1911, he completely rebuilt the family's Parisian mansion on the [Parc Monceau](#) in order to house his collection of 18th-century French furniture and artwork. The entryway is inspired by the [Petit Trianon](#) of [Versailles](#). The home includes a [kosher](#) kitchen with separate sections for meat and dairy. The dining room includes a beautifully-carved green marble fountain in the shape of a shell, with a dolphin spigot for the ritual washing of hands before eating a meal. Some highlights of his collection include a French silver service that had been ordered by Russian Empress [Catherine the Great](#), a set of [Buffon porcelain](#) (with exact reproductions of ornithological drawings) from the [Sèvres](#) manufacturer, and perhaps the only existing complete set of Gobelin royal tapestry sketches. He married Irène Cahen d'Anvers, daughter of [Louis Cahen d'Anvers](#), in 1891. They separated in August 1897 after her affair with de Camondo's stable master, Count Charles Sampieri, whom she would later marry and divorce after her divorce from Camondo in 1902. The children, Nissim and Beatrice, remained with de Camondo. The mansion was completed in 1914, but his son did not reside there very long, as he rejoined the French Army to fight in The Great War. It had been de Camondo's great hope that his son, whom he adored, would take over the family empire. Following Nissim's death in 1917, de Camondo closed all banking activities.

Camondo largely withdrew from society and devoted himself primarily to his collection and to hosting dinners for a club of [gourmets](#) at regular intervals. Camondo died in 1935, and the museum opened the following year. He donated the home to Paris's Decorative Arts society as a museum ([Musée Nissim de Camondo](#)) in honor of the loss of his son [Nissim](#) in [World War I](#). In addition to the collection, the meticulously-restored service areas, elevator and woodwork of the mansion are noteworthy. During the [German occupation of France during World War II](#), his daughter [Béatrice](#), his son-of-law Léon Reinach and their children (Fanny and Bertrand) were deported from France and died in the [Auschwitz concentration camp](#). As a result, the de Camondo family died out. Camondo's hotel initially at 63, rue de Monceau, was described in Emile Zola's immortal masterpiece *La Curee* as hotel Saccard. The children of the Camondos remained with their father after the divorce at rue Hamelin – the son Nissim (1892-1917) dies at war, the daughter Beatrice (1894-1944) married to Leon Reinach dies in the Holocaust, as her husband (1893-1943), daughter Fanny (1920-1943), son Bertrand (1923-1943). Germans blinded by their hatred to the Jews didn't make any difference between rich & poor...

[Irène Cahen d'Anvers](#) as a child – painting by Renoir (1880)

The *Portrait of Irène Cahen d'Anvers*, or *The Little Girl with the Blue Ribbon* or *Little Irène*, is an [oil painting](#) by French [Impressionist](#) artist [Pierre-Auguste Renoir](#). Commissioned by the wealthy French Jewish banker [Louis Cahen d'Anvers](#) in 1880, the painting depicts his daughter Irène Cahen d'Anvers at the age of 8. In the 1870s-80s, Renoir frequently painted portraits for the families of the Parisian Jewish community. Through the collector [Charles Ephrussi](#), proprietor of the [Gazette des Beaux-Arts](#), Renoir met [Louis Cahen d'Anvers](#). In 1880, *The Portrait of Irène Cahen d'Anvers*, also commonly called *Little Irène*, is considered today as one of Renoir's masterpieces. At the time, for an unknown reason, Louis was so dissatisfied with the painting that he hung it in the servants' quarters and delayed Renoir's payment of 1500 francs. In 1883, the painting was first exhibited in the first exhibition dedicated exclusively to Renoir, held in [Paul Durand-Ruel's Boulevard des Capucines](#) gallery. In 1910 the painting was purchased by the wealthy [Camondo family](#), which Irène had married into in 1891. After the [fall of France](#), the painting was looted from [Château de Chambord](#) by the Nazis, it became a part of [Hermann Göring's](#) personal collection. In 1946 it resurfaced and was exhibited in Paris as one of the "French masterpieces found in Germany". The painting along with dozens of other artwork stolen by the Nazis was later acquired by [Emil Georg Bührle](#), a Swiss industrialist, and a wartime supplier of the German military. The painting remains part of the [E.G. Bührle Collection](#) in [Zürich](#). In 2014, it appeared in the movie [The Monuments Men](#).

[Charles Ephrussi](#) (1849-1905)

Charles Ephrussi was a French [art critic](#), [art historian](#), and [art collector](#). He also was a part-owner (from 1885) and then editor (from 1894) as well as a contributor to the *Gazette des Beaux-Arts*, the most important art historical periodical in France, with, [Laforgue](#), [Taine](#), [Gustave Geffroy](#), [Bourget](#), [Berenson](#), [Jules Laforgue](#). A member of the wealthy [Ephrussi family](#), he spent the first ten years of his life in Odessa, a major port on the Black Sea where his grandfather was a grain industrialist, before moving to Vienna. His father Léon and his uncle Ignace were in charge of establishing branches of the family business in Europe. In 1871, Charles Ephrussi moved to the newly built Hôtel Ephrussi, 81 rue de Monceau, in Paris, with his parents and brothers. The next year, he traveled to Italy, where he began to collect art. On his return to Paris, he became more involved in both the purchase of art and writing about it, publishing his first article in *Gazette des Beaux-Arts* in 1876. Like most of his publications, it concerned [Renaissance art](#). He also gave two works of art to the [Louvre](#) at this time. In about 1880, Charles Ephrussi became interested in the art of the [Impressionists](#) and, within the next few years, purchased some 40 works by [Monet](#), [Manet](#), [Degas](#), [Renoir](#), [Puvis de Chavannes](#), and [Pissarro](#), among others. He has been identified as the man in a top hat standing with his back to us in Renoir's *Luncheon of the Boating Party*. But, to the distress of some of the Impressionists, he continued to buy other types of art, including pictures by his friends [Gustave Moreau](#) and [Paul Baudry](#).

It also was at this time that he began to collect [Japanese lacquers](#) and [netsukes](#). In 1891, Ephrussi moved with his brother Ignace to a grander Parisian hôtel at 11, avenue d'Iéna. His taste had changed, and he decorated his part in the [Empire style](#). By this time, he was a well-established figure in the Paris art world, and a welcome guest at some of the most famous salons. He was one of the inspirations for the figure of Swann in [Marcel Proust's](#) *À la recherche du temps perdu*. He was a friend of Proust. All of this changed with the [Dreyfus affair](#) in 1894, which polarized France and caused many doors to be closed to Jews. The Ephrussi family was very prominent and thus became the target of [anti-Semitic](#) attacks. Charles died in 1905, before Dreyfus was exonerated. He had never married, and left much of his estate to his niece Fanny Kann and her husband [Théodore Reinach](#).

Emile Pereire (1800-1875), Isaac Pereire (1806-1880) – brother of Emile & father of Eugene, Eugene Pereire (1831-1908), portrait by Charles Louis Gratia (1884)

The **Pereire brothers** were prominent 19th-century financiers in [Paris, France](#), who were rivals of the [Rothschilds](#). Like the Rothschilds, they were [Jews](#), but the Pereire brothers were [Sephardi Jews](#) of [Portuguese origin](#). [Jacob Rodrigues Pereira](#), one of the inventors of [manual language](#) for the deaf, was their grandfather. He was born in Peniche, [Portugal](#) and established himself in France in 1741, where he became an interpreter for King [Louis XV](#). Both brothers were followers of [Saint-Simonism](#) until their break with [Enfantin](#) in the early 1830s. [Émile](#) and his brother [Isaac](#) founded a business [conglomerate](#) that included creating the [Crédit Mobilier](#) bank. It became a powerful and dynamic funding agency for major projects in France, Europe and the world at large. It specialized in mining developments; it funded other banks including the Imperial Ottoman Bank or the Austrian Mortgage Bank; it funded railway construction and insurance companies, as well as building contractors. Their bank had large investments in a [transatlantic](#) steamship lines, urban [gas lighting](#), a newspaper and the Paris [public transit](#) system. In 1866/7, the bank underwent a severe crisis, and the Pereires were forced to resign at the demand of the Banque de France; the bank never recovered. Eugène Pereire, son of Isaac, joined the enterprise and took over the running of the business empire on his father's death in 1880. He was the founder, in 1881, of the [Banque Transatlantique](#), which still operates today and is one of the oldest [private banks](#) in France. In 1909, Eugène's granddaughter [Noémie Halphen](#) married banking competitor, [Maurice de Rothschild](#), son of Edmond James and father of Edmond – see next pages. In 1835 the Pereire brothers built the Saint-Germain Railroad, the first passenger railroad in France. The guarantee to the financing of 5 millions was made by James de Rothschild, father of Edmond James, Adolphe d'Eichtal and others. Following the success of the project the Pereire Brothers built many more railroads in France, Austria, Spain, Russia. Emile was a patron of the arts, financed the art exhibition of Paul Delaroche, as well as buildings and roads in Paris – rue de Rivoli, Boulevards de [Sébastopol](#), [Haussmann](#), [Malesherbes](#), [Prince-Eugène](#), the Monceau neighborhood, etc. In Paris of today are called after him a Boulevard, place and metro station. His brother Isaac finances the newspaper La Liberté and writes there many articles on economy, finances essays on economy and a deaf-mute school in Paris. In 1855 they purchase the hotel du Chevalier de Montigny at 35-37 faubourg Saint-Honore (today the location of the UK embassy). All the Pereire family lives and receives in this luxurious hotel, designed by the architect Alfred Armand (1805-1888), since 1859. In their hotel one could find famous paintings by Rembrandt, Vermeer, French Rococo painters. Isaac marries Rachel da Fonseca and they have a son Eugene Pereire, who was a French financier and politician. Eugene founded [Banque Transatlantique](#) in 1881. In 1857, Eugene married Juliette Fould of the [Fould family](#). They had two daughters: Alice Pereire (1858–1931), married to [Salomon Halfon](#), President of Banque Transatlantique 1909–23, and Marie Pereire (1860–1936), married to Jules Halphen, son of [Eugène Halphen](#) of the [Halphen family](#). Marie and Jules had a daughter Noemie who married Maurice de Rothschild – see next page.

Maurice Edmond de Rothschild (1881-1957) & wife Noémie Pereire Halphen (1888-1968)

Maurice Edmond Karl de Rothschild was a French art collector, vineyard owner, financier and politician. He was born into the [Rothschild banking family of France](#). Maurice de Rothschild was the second child of [Edmond James de Rothschild](#) (1845–1934) – see next page - and [Adelheid von Rothschild](#). He grew up at the [Château Rothschild](#) in [Boulogne-Billancourt](#). Rothschild inherited a fortune from the childless [Adolphe Carl von Rothschild](#) (1823–1900) of the [Naples branch](#) of the family and moved to [Geneva, Switzerland](#) where he perpetuated the new [Swiss branch](#) of the family. Rothschild served as a member of the [French Senate](#). In 1909 Maurice de Rothschild married [Noémie de Rothschild](#). Her mother was Marie Hermine Rodrigues Péreire (1860–1936), daughter of [Eugène Péreire](#) of the [Péreire banking family](#) whose [Crédit Mobilier](#) were arch-competitors of the Rothschilds. Noémie Halphen and Maurice de Rothschild had one child, a son [Edmond](#) – see next page. In June 1940, during the [Battle of France](#), Rothschild and several family members received Portuguese visas from [Aristides de Sousa Mendes](#), allowing them to flee France for Portugal. Maurice de Rothschild sailed from Lisbon to Scotland the following month. Maurice de Rothschild is commemorated in the [scientific name](#) of a species of [Malagasy](#) lizard, [Paracontias rothschildi](#). Maurice de Rothschild's African expedition 1904-1905, zoological in nature, was conveyed in a three-volume archive and published in 1922, entitled "*Voyage de M. le baron Maurice de Rothschild en Éthiopie et en Afrique orientale anglaise (1904-1905) : résultats scientifiques : animaux articulés*". It is housed at the Biological Diversity Heritage Library. He was an advisor of the Musees nationaux since 1935 and the [Académie des beaux-arts](#) since [1937](#). He succeeds his father at the bank [Rothschild Frères](#) since 1934.

Baroness **Noémie Halphen de Rothschild** was a French philanthropist and property developer. She was the granddaughter of financier [Eugène Péreire](#) of the [Sephardic-Jewish Péreire family](#) of Portugal who were banking rivals of the Rothschilds – see previous page. Rothschild turned her [hôtel particulier](#) in Paris into a hospital during [World War I](#). In 1916, she decided to develop a ski resort in France to avoid having to holiday alongside the Germans in [St. Moritz](#), Switzerland. By 1919, she founded Société Française des Hôtels de Montagne. Rothschild developed the [Domaine du Mont d'Arbois](#), a luxury hotel in [Mont d'Arbois](#) near [Megève](#) in [Haute-Savoie](#). It was completed in 1921.

[Edmond de Rothschild](#) (1845-1934) and his grandson [Edmond de Rothschild](#) (1926-1997)

Baron Abraham Edmond Benjamin James de Rothschild was a French member of the [Rothschild banking family](#). A strong supporter of [Zionism](#), his large donations lent significant support to the movement during its early years, which helped lead to the establishment of the [State of Israel](#), where he is simply known as "the baron Rothschild". A member of [the French branch](#) of the Rothschild banking dynasty, he was born in the Paris suburb of [Boulogne-Billancourt](#), [Hauts-de-Seine](#), the youngest child of [James Mayer Rothschild](#) and Betty von Rothschild. He grew up in the world of the [Second Empire](#) and was a soldier "[Garde Mobile](#)" in the first [Franco-Prussian War](#). In 1877, he married [Adelheid von Rothschild](#) of [Naples](#), the daughter of [Wilhelm Carl von Rothschild](#), one of the Rothschild banking family of Naples, with whom he had three children: [James Armand Edmond](#), [Maurice Edmond Karl](#) and Miriam Caroline Alexandrine. Edmond de Rothschild inherited [Château Rothschild](#), Boulogne-Billancourt and owned the [Château Rothschild d'Armainvilliers](#) in Gretz-Armainvilliers in the [Seine-et-Marne département](#). Edmond took little active part in banking but pursued artistic and philanthropic interests, helping to found scientific research institutions such as the [Institut Henri Poincaré](#), the Institut de Biologie physico-chimique, the pre-Centre National de la Recherche Scientifique, the Casa Velázquez in [Madrid](#), and the French Institute in London. In 1907, as a cofounder member, he also provided funds and support for the foundation of the [Friends of the French National Museum of Natural History Society](#). He served as a member of the French [Académie des Beaux-Arts](#) and through it sponsored the archaeological digs of [Charles Simon Clermont-Ganneau](#) in [Egypt](#), Eustache de Lorey in [Syria](#), and [Raymond Weill](#) in [Palestine](#).

In 1876 he purchases the hotel de Pontalba, 41, rue du Faubourg-Saint-Honore (today residence of the US ambassador) demolishes and rebuild it by Louis Visconti. In its orientalist 1890 fumoir designed by Ambroise Baudry he collections important Islamic pieces of art. Edmond de Rothschild acquired an important collection of [drawings](#) and [engravings](#) that he bequeathed to the [Louvre](#) consisting of more than 40,000 engravings, nearly 3,000 drawings, and 500 illustrated books. Included in this gift were more than one hundred engravings and drawings by [Rembrandt](#). A portion of his art collection was bequeathed to his son James A. de Rothschild and is now part of the [National Trust](#) collection at [Waddesdon Manor](#). However, in 1882 Edmond cut back on his purchases of art and began to buy land in [Southern Syria](#) (Ottoman Palestine). He became a leading proponent of the [Zionist](#) movement,

financing the first site at [Rishon LeZion](#). In his goal for the establishment of a Jewish homeland, he promoted industrialization and economic development. In 1924, he established the [Palestine Jewish Colonization Association](#) (PICA), which acquired more than 125,000 acres of land and set up business ventures. Edmond de Rothschild also played a pivotal role in Israel's wine industry. Under the supervision of his administrators in [Ottoman Palestine](#), farm colonies and vineyards were established, and two major wineries were opened in Rishon LeZion and [Zikhron Ya'akov](#). It is estimated that Rothschild spent over \$50 million in supporting the settlements and backed research in electricity by engineers and financed development of an electric generating station. Rothschild funded a glass factory that would supply bottles for his wineries. Rothschild met [Meir Dizengoff](#) in Paris and chose him to manage the new factory. Mizaga was the first Jewish-owned factory in [Ottoman Palestine](#).

Edmond Adolphe Maurice Jules Jacques de Rothschild or **Baron Edmond de Rothschild** was a French-Swiss banker, the founder of the [Edmond de Rothschild Group](#) in 1953. His investments extended to vineyards, yacht racing, farming and hospitality. Scion of the [Rothschild banking family of France](#), he was the only son of [Maurice](#) and [Noémie de Rothschild](#). He married [Nadine Lhopitalier](#) in 1963 with whom he had one child, [Benjamin de Rothschild](#). He was reportedly the richest member of the [Rothschild family](#) until his death in 1997. The only son of Baron [Maurice de Rothschild](#) (1881-1957) and Baroness [Noémie de Rothschild](#) (née Halphen, 1888-1968), Edmond Adolphe was born into the [Rothschild banking family of France](#). He was the grandson of [Edmond James de Rothschild](#) (1845-1934) and great-grandson of the French branch's founder [James Mayer de Rothschild](#) (1792-1868). Edmond de Rothschild's family was forced to move from France to Switzerland in July 1940, after Maurice de Rothschild, Edmond's father, was declared a noncitizen. Maurice was part of the 80 members of France's Upper House to oppose the pro-Nazi [Vichy regime](#) openly, voting against giving full powers to Maréchal [Philippe Pétain](#). Shortly after finishing his studies, Edmond de Rothschild joined the [de Rothschild Frères](#) bank where he worked for 3 years. In 1953, he founded his first company, La [Compagnie Financière Edmond de Rothschild](#), which became his main investment arm. In 1965, he launched Banque Privée Edmond de Rothschild, and developed branches in [Lugano](#) (1968), [Luxembourg](#) (1969), [Fribourg](#) (1989) and [Lausanne](#) (1992). In 1969, he established the first hedge [fund of funds](#). In 1961, after visiting a [Club Med](#) vacation center in Israel, the Baron decided to settle the business debt of the company, back then on the brink of bankruptcy, and invest in its development. He owned 34% of [Club Med](#) (around 10 million francs worth of shares) which was listed in the [Paris stock exchange](#) in 1966. He acquired a major stake in the [Bank of California](#) in 1973, for \$22 million, establishing it as a holding company for his investments in the United States. He kept his share of the company until 1984, year he sold it at three times its original value to [Mitsubishi Bank](#). Edmond de Rothschild was also a major shareholder of the Israel General Bank. His investments included hotels in the Alps, shares in [De Beers Consolidated Mines](#) Ltd. in South Africa, publishing houses in Paris, and a television company in Luxembourg.

Edmond de Rothschild's grandfather, Baron [Edmond James de Rothschild](#), had set up the acquisition of lands in [Ottoman Palestine](#) for Jewish development in the 1800s. In the 1950s, Edmond de Rothschild donated the family's property to the new Israeli State. The Foundation was tasked with the redistribution of Caesarea's profits to education programs in Israel. Edmond de Rothschild invested heavily in the Tel-Aviv-based Israel General Bank, contributing to the young country's economy. After the [Six-Day War](#), the Baron contributed to the creation of the [Israel Corporation Investment](#) fund when, in 1968, he was invited to the so-called Millionaire's Conference. Each guest was asked to invest \$100,000 in the Corporation's creation. The Baron was President of the Caesarea Development Corporation and of the Israel European Company Isrop (in Luxembourg). He contributed to the creation of the [Supreme Court building in Jerusalem](#) and was the founder of multiple cultural and educational institutions in Israel. And finally, a personal remark – I owe all my business career to the “baron” who gave me a full scholarship for my MBA studies at INSEAD. He came to visit us at Fontainebleau and made a reception to all the Israelis grantees once a year at his Caesaria's estate ([in this photo with my wife](#)) This is my private “connection” to the salons of Paris, to the philanthropists, to the barons of culture, wine and art, besides staying for months at a hotel very near La Compagnie Financiere and some of the other salons' hotels at rue du Faubourg Saint-Honore, visiting the LCF frequently, and having successful business ties and an exhilarating cultural life (but no salons) in Paris.

Photo of Marcel Proust (1871-1922), Portrait by [Jacques-Émile Blanche](#), 1892

I counted 14 salonnières who hosted Marcel Proust and then lost control – Genevieve Straus, Leontine Arman de Caillavet, Marie-Anne de Loynes, Princesse Mathilde, Ernesta Stern, Laure Hayman, the two Louise Cahen d’Anvers (Morpugo & Warschawsky), Marie Kann, Helene Standish, Elizabeth Greffulhe, Madeleine Lemaire, Anna de Noailles, Pauline Hugo, etc. The unfortunate Marcel Proust with his poor health, how could he cope with so many invitations when every salonnière had “her day” – and they overlapped as there are only 7 days a week but there were dozens of salons where the Tout Paris could be seen, where all the action occurred, if you were not present you didn’t count (visita me, ergo sum). And what about work for those who had to work, writing for the authors, painting for the painters, composing for the composers. But then I thought that exactly because of that Marcel Proust had to attend all those salons as he met there the protagonists, the models of his novel “*À la recherche du temps perdu*”, with its 2000 characters, and a lot of research still exists to decipher who is who.

Valentin Louis Georges Eugène Marcel Proust was a French novelist, critic, and essayist who authored the monumental novel *À la recherche du temps perdu* ([In Search of Lost Time](#)). Proust's father, [Adrien Proust](#), was a prominent [pathologist](#) and [epidemiologist](#). Proust's mother, Jeanne Clémence (Weil), was the daughter of a wealthy [Jewish](#) family from [Alsace](#). Literate and well-read, she demonstrated a well-developed sense of humour in her letters. Proust was raised in his father's [Catholic faith](#). He became an atheist and was something of a mystic. By the age of nine, Proust had had his first serious [asthma](#) attack, and thereafter he was considered a sickly child. Proust spent long holidays in the village of [Illiers](#). In 1882, at the age of eleven, Proust became a pupil at the [Lycée Condorcet](#), but his education was disrupted by his illness. Despite this, he excelled in literature, receiving an award in his final year. Thanks to his classmates, he was able to gain access to some of the salons of the upper bourgeoisie, providing him with copious material for *In Search of Lost Time*. He never worked at a job, and he did not move from his parents' apartment until after both were dead. His health throughout this period continued to deteriorate. Proust spent the last three years of his life mostly confined to his bedroom, sleeping during day & working at night to complete his novel.

Begun in 1909, when Proust was 38 years old, *À la recherche du temps perdu* consists of seven volumes totaling around 3,200 pages and featuring more than 2,000 characters. He argued that socialism posed a greater threat to society than the Church. Proust always rejected the bigoted and illiberal views harbored by many priests at the time. Proust was among the earliest [Dreyfusards](#), even attending [Émile Zola's](#) trial and proudly claiming to have been the one who asked [Anatole France](#) to sign the petition in support of Dreyfus's innocence. Proust's work questions the existence of time, the relativity and impossibility of living the present. He analyzes the snobbery of society and questions the social motives of people and their interrelations, social climbing, morality, jealousy, ambition...

[Anastasia Christine, comtesse de Circourt](#), nee Klustine (1808-1863)

Anastasia Christine, comtesse de Circourt was born in Moscow in 1808, daughter of a high ranking officer and the countess Vera Tolstoi. She died in Paris in 1863 and was a French salonniere. At the age of 16 she spoke fluently Russian, German, French and English. She marries in 1830 count Adolphe de Circourt, after spending a few years in France, Switzerland and Italy and learning Italian. She befriends the opera contretenor Carmignani, the actor Niccolini, the art critic Cicognara, the author Giustina Renier Michiel, the archeologist Pietro Ercole Visconti, followed subsequently by general Filangieri, Gino Capponi, Pellegrino Rossi, and count Cavour. During the first year of marriage she befriends in Switzerland Sismondi, Bonstetten, Pyrame de Candolle, and then spends 3 winters in Italy in Pisa, Rome, Genova, Milano, Firenze, Napoli and Venice. After Italy the young couple visits Russia and Germany, increasing the large number of their friends. She befriended the Prince and then King Jean de Saxe, the 2 kings of Prussia Frederic-Guillaume III and IV, as well as Cornelius, Kaulbach, Rauch, Lepsius, Humboldt, Ranke, Bettina von Arnim, Schelling, Tieck, all the best authors, artists and scientists of Germany. But she had also many Russian friends as Pouchkine and Sophie Swetchine. She admired and was devoted especially to Cavour “the most magnanimous person in his epoch”. They maintained a very important correspondence and he knew that he can count on her as a true friend to the Italian cause. Since 1836 she lived in Paris (at last, as I became dizzy from her wanderings and social gatherings). In 1855 her hair caught fire from a candle, and she suffered intensely until the end of her life from burns in her neck and shoulders. Nevertheless she continued her social life and receptions in Paris and Bruyeres, where she held her salons. All Paris attended her salons, where she judged people according to their merits and not on their beliefs or birth. Only at her gatherings met people who otherwise would not agree to meet anywhere else, such as: [Prévost-Paradol](#) & [Drouyn de Lhuys](#), [Sophie Swetchine](#) & Mrs Austin, la comtesse de Pimodan & la duchesse Colonna, [Ranke](#) and [Tocqueville](#), M^{gr} de Bonnechose and [Vitet](#), [Falloux](#) and Munier, [Mgr de Dreux-Brézé](#) and [Mérimée](#), [Lamartine](#), [Salvandy](#), [Vigny](#), [Cobden](#) and [Thiers](#), [Edmond Schérer](#), Lady Holland and M^{me} de Goyon, [Eckstein](#), [Cousin](#), [Ticknor](#), [Cavour](#) and the marquises du faubourg Saint-Germain, Stanley, Prescott, Senior, [de La Rive](#), [Dolgorukov](#), Oliphant, Geffcken, Scherer, [Parieu](#), Filangieri, [Scialoja](#), a whole series of illustrious personalities distant from each other by politics, religion or prejudice, coming from all countries, professing beliefs and opinions far apart.

[Natalie Clifford Barney](#) (1876-1972)

Natalie Clifford Barney, born in Dayton, Ohio, was an American playwright, poet and novelist who lived as an [expatriate](#) in Paris. Barney's [salon](#) was held at her home at 20 rue Jacob in Paris's [Left Bank](#) for more than 60 years and brought together writers and artists from around the world, including many leading figures in French literature along with American and British [Modernists](#) of the [Lost Generation](#). She worked to promote writing by women and formed a "Women's Academy" in response to the all-male [French Academy](#) while also giving support and inspiration to male writers. She was openly lesbian and began publishing love poems to women under her own name as early as 1900. She wrote in both French and English. In her writings she supported [feminism](#) and [pacifism](#). She opposed [monogamy](#) and had many overlapping long and short-term relationships, including on-and-off romances with poet [Renée Vivien](#) and dancer [Armen Ohanian](#) and a 50-year relationship with painter [Romaine Brooks](#). For over 60 years, Barney hosted a literary [salon](#), a weekly gathering at which people met to socialize and discuss literature, art, music and any other topic of interest. In the 1900s Barney held early gatherings of the salon at her house in [Neuilly](#). The entertainment included poetry readings and [theatricals](#) (in which [Colette](#) sometimes performed). [Mata Hari](#) performed a dance once, riding into the garden as [Lady Godiva](#). Soon she rented the [pavilion](#) at 20, Rue Jacob in Paris's [Latin Quarter](#) and her salon was held there until the late 1960s. Frequent guests during this period included [Pierre Louÿs](#), [Paul Claudel](#), [Philippe Berthelot](#), [J. C. Mardrus](#). During [World War I](#) the salon became a haven for those opposed to the war. [Henri Barbusse](#) once gave a reading from his anti-war novel *Under Fire* and Barney hosted a Women's Congress for Peace at the Rue Jacob. Other visitors during the war included [Oscar Milosz](#), [Auguste Rodin](#), [Alan Seeger](#). In the early 1920s, Ezra Pound was a close friend of Barney's and often visited. Other visitors to the salon during the 1920s included [Jeanne Galzy](#), [André Gide](#), [Anatole France](#), [Max Jacob](#), [Louis Aragon](#) and [Jean Cocteau](#) along with English-language writers [Ford Madox Ford](#), [W. Somerset Maugham](#), [F. Scott Fitzgerald](#), [Sinclair Lewis](#), [Sherwood Anderson](#), [Thornton Wilder](#), [T. S. Eliot](#) and [William Carlos Williams](#), [Rainer Maria Rilke](#), [Rabindranath Tagore](#), Romanian [aesthetician](#) and diplomat [Matila Ghyka](#), [Janet Flanner](#), [Nancy Cunard](#), [Caresse](#) and [Harry Crosby](#), [Blanche Knopf](#), [Peggy Guggenheim](#), [Sylvia Beach](#) (the bookstore owner who published [James Joyce's Ulysses](#)), [Tamara de Lempicka](#) and [Marie Laurencin](#) and dancer [Isadora Duncan](#). At a Friday salon in the 1930s [Virgil Thomson](#) sang from *Four Saints in Three Acts*, an opera based on a libretto by [Gertrude Stein](#).

[Helene de Perusse des Cars, Helene Standish](#) (1847-1933)

Helene de Perusse des Cars was born in Paris in 1847. She marries Henry Noailles Widdrington Standish on October 17, 1870. She is a famous femme du monde who hosts at her salon many artists and authors including Marcel Proust who is inspired by her. I admire Proust who in spite of his poor health could attend so many salons without offending any salonnières and who got inspiration by all of them. The cultural salon of the Standish is one of the most famous in Paris, and among their guests are the King of England Edouard VII and his wife Alexandra, the organist Charles-Marie Widor, the painter Detaille and the author Sardou. Other guests are Lord Randolph Henry Spencer-Churchill, and the couple Standish are present at the Wedding of Lord Randolph Churchill and Jennie Jerome at the British Embassy, rue du Faubourg Sain-Honore on April 15, 1874. Winston Churchill was born 7.5 months later, on November 30, 1874. Mrs. Standish participates in charitable works in various events and the funds collected on this occasion from the great of this world, are given to the benefit of the most needy. Henry Standish frequents often with his friends Alfred de Gramont, Daniel Thuret and General de Galliffet, Marienbad where the most famous people of the Belle Epoque meet. Helene Standish who is a devoted Catholic and monarchist hosts at her salon also the secular republican Raymond Poincare who was prime minister and president of the French Republic. She appreciates in him his moderation, his tolerant attitude towards religion and his opposition to anticlericalism.

An aristocratic salon in Paris by James Tissot, 1875. An elegant soiree by Victor-Gabriel Gilbert, 1880

[Elisabeth, Countess Greffulhe](#) (1860-1952), portrait by Philip de Laszlo, 1905,
with her daughter Elaine, 1886, photo by Paul Nadar, 1895

Marie Anatole Louise Elisabeth, Countess Greffulhe, nee de Riquet de Caraman-Chimay, was a French socialite, known as a renowned beauty and queen of the salons of the Faubourg Saint-Germain in Paris. The countess entertained a necessarily unrequited love for her cousin, the exquisite aesthete Count [Robert de Montesquiou](#), in concert with whom she was in contact with the cream of Parisian society, whom she regularly entertained at her *salon* in the *rue d'Astorg*. She married [Henri, Count Greffulhe](#) (1848–1932), of the [Belgian](#) family of bankers, on 28 September 1881. He was an unfaithful, quick-tempered man. They had one daughter, [Élaine](#) (1882–1958), who married [Armand, 12th Duke of Gramont](#), half-brother of the openly bisexual writer the [Duchess of Clermont-Tonnerre](#), who wrote about Élisabeth: "The Comtesse Greffulhe is always beautiful and always elsewhere. After a restricted youth (...) she set herself to attracting musicians, scholars, physicists, chemists, doctors."

The countess helped establish the art of [James Whistler](#), and she actively promoted such artists as [Auguste Rodin](#), [Antonio de La Gandara](#) and [Gustave Moreau](#). [Gabriel Fauré](#) dedicated to her his *Pavane*, which received its first full performance, with the optional chorus, at a garden party she held in the [Bois de Boulogne](#). She was a patron of [Sergei Diaghilev's Ballets Russes](#), and launched a fashion for [greyhound](#) racing. Fascinated by science, she helped [Marie Curie](#) to finance the creation of the Institute of Radium, and [Édouard Branly](#) to pursue his research on radio transmission and telemechanical systems. She is one of the main inspirations for the character of the *duchesse de Guermantes* in [Marcel Proust's À la recherche du temps perdu](#). Her husband, Count Greffulhe, is the main and almost unique inspiration for the character of the *duc de Guermantes*. She hosted regularly at her salon the same "cercleux" that one would find at the countess de Chevalgney or at Lady Standish.

She invited also Charles Haas, model of Proust's Swann. She was a monarchist but hosted republicans as Theophile Delcassé, Pierre Waldeck-Rousseau, General de Galliffet who became War Minister in 1899. As a result of their influence she took sides in favor of Dreyfus and was accused by the press that she intervened in his favor with Kaiser Wilhelm II in 1899. She hosted also Jules Roche, Edmond de Goncourt, Jose-Maria de Heredia, Stéphane Mallarmé, Judith Gautier, Anatole France, l'abbé Mugnier, and occasionally Marcel Proust. She played the guitar and organized concerts of chamber music, *Beatrice et Benedict* by Hector Berlioz at the Theatre de l'Odeon in 1890, the Parisian premiere of *Tristan und Isolde* by Richard Wagner in October 1899. She met Franz Liszt during his last stay in Paris in 1886. She founded in 1890 the Société des grandes auditions musicales with Princess Edmond de Polignac. She hosted the Russian Grand-Duc Paul. When she gave at her home the famous dinner in 1910 for King Edward VII & Queen Alexandra she invited only marquis de Breteuil and the painter Edouard Detaille, whom the king admired very much, although she preferred more delicate paintings.

[Madeleine Lemaire](#) (1845-1928), photo by Paul Nadar. [Pierre Georges Jeannot](#),
Une Chanson de Gibert dans le salon de Madame Madeleine Lemaire (1891)

Madeleine Lemaire, née Coll was a [French](#) painter specialized in elegant [genre works](#), and flowers. [Robert de Montesquiou](#) said she was *The Empress of the Roses*. She introduced [Marcel Proust](#) and [Reynaldo Hahn](#) to the Parisian [salons](#) of the aristocracy. She herself held a *salon* where she received high society. Lemaire exhibited her work at the [Palace of Fine Arts](#) and [The Woman's Building](#) at the 1893 [World's Columbian Exposition](#) in Chicago, Illinois. [George Painter](#) stated in his book *Marcel Proust* she is one of the models of Proust's Madame Verdurin (*In Search of Lost Time*). Lemaire specializes in still life and flowers. She starts exhibiting her paintings at the 1862 Salon, where she exhibits throughout all her life and obtains prizes in 1877 and 1900. She illustrates also books such as *Les Plaisirs et les Jours* by [Marcel Proust](#), *L'Abbé Constantin* by [Ludovic Halévy](#), or poems by [Robert de Montesquiou](#). Every Tuesday from April to June Lemaire receives the [Tout-Paris](#) at her hotel particulier of 31, rue de Monceau. She receives the aristocracy of [faubourg Saint-Germain](#) - [La Rochefoucauld](#), [Boni de Castellane](#), [Luyens](#), [Uzès](#), [Haussonville](#), [Chevigné](#), [Greffulhe](#), [comtesse de Pourtalès](#), [marquise de Casa Fuerte](#), [duchesse Grazioli](#), the [Brissac](#), as well as young artists and celebrities of the theater and politics. She launches young Marcel Proust, who is invited since 1892 and describes her salon to the readers of *Figaro*, [Reynaldo Hahn](#), [Victorien Sardou](#), [Guy de Maupassant](#), [Paul Bourget](#), [Mounet-Sully](#), [Sarah Bernhardt](#), [François Coppée](#). Opera singers give recitals, such as [Emma Calvé](#), [Gabrielle Krauss](#) or [Marie Van Zandt](#). Lemaire specializes in music, while Mme. Arman de Caillavet specializes in literature. She invites Camille Saint-Saëns, Jules Massenet, but also Lucien Guitry, Rejane, Tony – Marshall le grand, [Henri Rochefort](#), [Robert de Flers](#), [Francis de Croisset](#), [Georges de Porto-Riche](#), the young [Gaston Arman de Caillavet](#), the poet [Robert de Montesquiou](#). Lemaire invites also grande-duchesse Wladimir, Marie Diemer, the singer Felix Mayol, Coquelin aîné, journalist Gaston Calmette, Anatole France. Politics are represented with [Raymond Poincaré](#), [Paul Deschanel](#), or [Émile Loubet](#), painting with Jean-Louis Forain, Jean Béraud, Pierre Puvis de Chavannes, Antonio de La Gandara, Raimundo de Madrazo, Edouard Detaille, etc. General Brugere and other generals meet there the Russian, German or Italian ambassadors. Andre Germain, who was her guest, calls her “la massacreuse de roses” and finds her ugly, disgraceful and authoritarian. Her evenings are described by him as suffocating, painful, with too long musical playing. In the summers Lemaire invites her habitués at her Chateau de Reveillon in the Marne, or at her house in Dieppe at 32, rue Aguado, where Proust and Reynaldo Hahn are also invited. On June 9, 1903, she gives a bal costume, with the theme of Athens in the times of Peicles. The guests are disguised accordingly, except Montesquiou who disapproved and Proust who observed hidden at a corner, who refused to disguise. And this reminds me of a bal costume with a similar theme, of Israeli high society with Israeli Tycoon [Idan Ofer](#), who threw a glitzy party on Mykonos, Greece, in August 2019, or as in the words of Mme. Angot – plus ça change plus c’est la même chose. Except that no Proust or Montesquiou were invited or even present undisguised. More than 700 VIP guests gathered at a club to celebrate the tenth anniversary of Ofer’s wedding to his fourth wife, Batia Ofer, According to [mykonoslive.tv](#), the party cost approximately 5 million euros and the preparations for it took weeks.

Pauline Menard-Dorian (1870-1941), portrait by Eugene Carriere, 1890

Pauline Ménard-Dorian was a French woman of letters and a [literary salon](#) hostess of [La Belle Époque](#). Pauline Ménard-Dorian was born at the Château du Fraisse on 21 July 1870 to Paul-François Ménard, a wealthy politician and businessman, and Louise-Aline Dorian. A member of a prominent [Republican](#) family, her maternal grandfather, [Pierre Frédéric Dorian](#), served as the [Minister of Public Works](#) for the [French Third Republic](#). She was raised as a [Protestant](#). She spent her childhood between living in a hotel in the [Rue de la Faisanderie](#) and her family's properties in [Fraisse](#) and [Lunel](#). Her mother hosted Republican [salons](#) attended by [Jules de Goncourt](#), [Edmond de Goncourt](#), [Émile Zola](#), [Alphonse Daudet](#), [Auguste Rodin](#), [Élie-Abel Carrière](#), [Victor Considerant](#), and [Georges Clemenceau](#), [Georges Périn](#), [Allain-Targé](#), [Challemel-Lacour](#), and [Henri Rochefort](#). Her mother was one of the models of Madame Verdurin in Proust's [À la recherche du temps perdu](#).

In 1894 Ménard-Dorian married the painter Georges Victor-Hugo, a grandson of [Victor Hugo](#). They had two children, Marguerite and [Jean](#). Through her marriage she was a sister-in-law of the socialite [Jeanne Hugo](#). She and her husband hosted popular literary and political salons in Paris attended by Zola, [Marcel Proust](#), [Léon Daudet](#), the [Goncourt brothers](#), [Jean Cocteau](#), [Max Jacob](#), [Eugène Carrière](#), and [Erik Satie](#). The marriage was an unhappy one, and Ménard-Dorian filed for divorce in 1899. She remarried the painter Rene Georges Hermann-Paul.

[Anna de Noailles](#) (1876-1933), photo, portrait by Jean-Louis Forrain (1914)

Anna, Comtesse Mathieu de Noailles was a Romanian-French writer and a socialist feminist. Born **Princess Anna Elisabeth Bibesco-Bassaraba de Brancovan** in [Paris](#), she was a descendant of the [Bibescu](#) and [Craiovești](#) families of [Romanian boyars](#). In 1897 she married Mathieu Fernand Frédéric Pascal de Noailles (1873–1942), the fourth son of the [7th Duke de Noailles](#). The couple soon became the toast of Parisian high society. They had one child, a son, Count Anne-Jules de Noailles (1900–1979). Anna de Noailles wrote three novels, an autobiography, and many collections of poetry. She had friendly relations with the intellectual, literary and artistic elite of the day including [Marcel Proust](#), [Francis Jammes](#), [Colette](#), [André Gide](#), [Frédéric Mistral](#), [Robert de Montesquiou-Fezensac](#), [Rainer Maria Rilke](#), [Paul Valéry](#), [Jean Cocteau](#), [Pierre Loti](#), [Paul Hervieu](#), and [Max Jacob](#). So popular was Anna de Noailles that various notable artists of the day painted her portrait, including [Antonio de la Gandara](#), [Ignacio Zuloaga](#), [Kees van Dongen](#), [Jacques Émile Blanche](#), and the [British](#) portrait painter [Philip de László](#). In 1906 her image was sculpted by [Auguste Rodin](#); the clay model can be seen today in the [Musée Rodin](#) in Paris, and the finished marble bust is on display in New York's [Metropolitan Museum](#). Anna de Noailles was the first woman to become a Commander of the [Legion of Honor](#), the first woman to be received in the Royal Belgian Academy of French Language & Literature. She was honored with the "Grand Prix" of the [Académie Française](#) in 1921. At her salon of [l'avenue Hoche](#) in the beginning of the 20th century one could find the intellectual, literary and artistic elites of her times, such as [Edmond Rostand](#), [Francis Jammes](#), [Paul Claudel](#), [Colette](#), [André Gide](#), [Maurice Barrès](#), [René Benjamin](#), [Frédéric Mistral](#), [Robert de Montesquiou](#), [Paul Valéry](#), [Jean Cocteau](#), [Léon Daudet](#), [Pierre Loti](#), [Paul Hervieu](#), [l'abbé Mugnier](#), [Max Jacob](#), [Robert Valléry-Radot](#), [Georges Clemenceau](#), and [François Mauriac](#). But there were not only salonnières. Apparently there were also salonniers, such as [Henri Le Savoureux](#) (1881-1961) who was a physician, psychiatrist, author and salonier. He attended the salon of Natalie Clifford Barney in the 1900s and married in 1923, his second wife Sophie Lydie Plekhanov (1881-1978). In 1914 he buys the estate of Francois-Rene de Chateaubriand in Vallee-aux-Loups at Chatenay-Malabry to establish a psychiatric hospital. Later, with Sophie Lydie Le Savoureux they host jointly there a literary salon attended by painters, authors and artists, such as Arthur Mugnier, Anna de Noailles, Princess Marthe Bibesco, [Marthe Bibesco](#), [Berénice Abbott](#), [Henri de Régnier](#), [Julien Benda](#), [Édouard Herriot](#), [Antoine de Saint-Exupéry](#), [Paul Valéry](#), [Jean Fautrier](#), [Vladimir Jankélévitch](#), [Paul Léautaud](#), [Paul Morand](#), [Jean Paulhan](#), [René Plevin](#), [Francis Ponge](#), [Jacques Audibert](#), [Claude Sernet](#), [Marc Bernard](#), [Gaëtan Gatian de Clérambault](#), [Paul Valéry](#), [Jules Supervielle](#) and [Marc Chagall](#).

[Edith Wharton](#) (1862-1937), photo (1889) and portrait by Edward Harrison May

Edith Newbold Jones, Edith Wharton, was born to a prominent American family in New York. She was an [American novelist](#), [short story](#) writer, & [designer](#). Wharton drew upon her insider's knowledge of the upper class New York "aristocracy" to realistically portray the lives and morals of the [Gilded Age](#). In 1921, she became the first woman to win the [Pulitzer Prize](#) in Literature, for her novel [The Age of Innocence](#). She was inducted into the [National Women's Hall of Fame](#) in 1996. Among her other well known works are the [The House of Mirth](#) and the novella [Ethan Frome](#). On April 29, 1885, at age 23, Wharton married Edward (Teddy) Robbins Wharton, who was 12 years her senior, at the [Trinity Chapel Complex](#). He was from a well-established Boston family. In 1908 her husband's mental state was determined to be incurable. In the same year, she began an affair with [Morton Fullerton](#), a journalist for [The Times](#), in whom she found an intellectual partner. She divorced Edward Wharton in 1913 after 28 years of marriage. She eventually crossed the Atlantic 60 times. In Europe, her primary destinations were Italy, France, and England. Wharton was for four years a tireless and ardent supporter of the French war effort. In 1915 Wharton edited [The Book of the Homeless](#), which included essays, art, poetry, and musical scores by many major contemporary European and American artists, including Henry James, [Joseph Conrad](#), [William Dean Howells](#), [Anna de Noailles](#), Jean Cocteau, and [Walter Gay](#), among others. She also kept up her own work during the war, continuing to write novels, short stories, and poems, as well as reporting for *The New York Times* and keeping up her enormous correspondence. Wharton settled ten miles north of Paris in [Saint-Brice-sous-Forêt](#), buying an 18th-century house on seven acres of land which she called Pavillon Colombe. She lived there in summer and autumn for the rest of her life. She spent winters and springs on the French Riviera at Sainte Claire du Vieux Chateau in [Hyères](#). Wharton was friend and confidante to many gifted intellectuals of her time: [Henry James](#), Sinclair Lewis, [Jean Cocteau](#), and [André Gide](#) were all her guests from time to time. [Theodore Roosevelt](#), [Bernard Berenson](#), and [Kenneth Clark](#) were valued friends as well. Particularly notable was her meeting with [F. Scott Fitzgerald](#). She hosted also [Paul Bourget](#), [Jacques-Émile Blanche](#), [Anna de Noailles](#), [André Gide](#), [Jean Cocteau](#), [Henri Adams](#), [Henry James](#), [Theodore Roosevelt](#), [Walter Gay](#). Wharton died of a [stroke](#) in 1937 at *Le Pavillon Colombe*.

[Ersilia Caetani Lovatelli](#) (1840-1925)

But there were not only salonnières in Paris only, other famous salonnières were Italian, Austrian, etc. **Ersilia Caetani-Lovatelli** or **Ersilia Caetani** was an [Italian](#) art historian, cultural historian and archaeologist. Caetani-Lovatelli was born in [Rome](#) in 1840 to [Michelangelo Caetani](#) and the Polish Countess Calixta Rzewuski. Her mother was from the important Rzewuski family and the aristocratic [Caetani](#) family had featured in the history of Rome and Pisa. Ersilia learnt Greek, Latin and Sanskrit and in 1859 she married [Giovanni Lovatelli](#). Lovatelli was the first woman to become a member of the [Accademia Nazionale dei Lincei](#), which is the oldest Italian scientific academy. Ersilia's work focused on Roman life, including ancient Roman dress, inscriptions, traditions, private life, and poetry. She wrote about archaeological field techniques and philology. Ersilia was supported not only by her father but also by her husband, Count Giacomo Lovatelli who died in 1879, leaving Ersilia responsible for the upbringing of their six children. Many of her friends were amazed that she even had time left to host what became known as the most important meeting place of Rome between 1870 and 1915. But it was hereditary in her family as her mother and grandmother were also famous salonnières. Her mother, the Polish Countess Calista Rzewuska (1810–1842) not only showed talent as a composer but also befriended famous colleagues like Chopin and Beethoven. Calista started extending her own invitations inspired by Ersilia's grandmother (i.e. Rosalie Rzewuska-Lubomirska, 1788–1865), who hosted one of the most influential Viennese 'Teetischen' of her time. Ersilia's salon attracted writers and composers such as [Stendhal](#), [Honoré de Balzac](#), [Nikolai Gogol](#), [Ferdinand Brunetière](#), [Émile Zola](#), [Theodor Mommsen](#), [Franz Liszt](#), Italian and German archeologists as [Giovanni Battista de Rossi](#), [Rodolfo Lanciani](#), [Carlo Ludovico Visconti](#), [Eduard Gerhard](#), [Georg Karo](#), [Ludwig Curtius](#), [Wilhelm Henzen](#) and Ludwig Pollak. Ersilia received guests in the Palazzo Lovatelli at the Piazza Campitelli, also in the heart of Rome, not far from her father's palace. Her receptions were open to all persons involved in politics, science and culture regardless of their political or philosophical views. Ersilia invited her guests not by sending official invitations but by delivering a small card with her name and address, or by writing a short but personal message. She also allowed regular attendees to introduce new guests. In contrast to many other gatherings of her time, Ersilia's were set up without clear rules. The lack of a fixed seating arrangement shocked many diplomats, for instance, while the French novelist Émile Zola was surprised to see most guests wearing casual clothing. Partly the result of her flexibility, Caetani-Lovatelli's receptions grew so popular that she decided to receive on two regular days, Thursdays and Sundays. She continued to do so until 1915, when she was forced to withdraw from public life because of an illness that would keep her bedridden.

[Clara Maffei](#) (1814-1886)

Elena Clara Antonia Carrara Spinelli was an Italian woman of letters and backer of the [Risorgimento](#), usually known by her married name of countess **Clara Maffei** or **Chiarina Maffei**. At 17 years old she married [Andrea Maffei](#) in 1832, author, translator and journalist, twice as old, but they separated by mutual consent on 15 June 1846. She had a long and lasting relationship with [Carlo Tenca](#). She is well known for the [salon](#) she hosted in via dei Tre Monasteri in [Milan](#), known as the "[Salotto Maffei](#)". Starting in 1834 and organised by [Tommaso Grossi](#) and [Massimo d'Azeglio](#), it attracted several well-known literati, artists, scholars, composers and pro-[Risorgimento](#) figures to meet to discuss art and literature. These included [Alessandro Manzoni](#), [Francesco Hayez](#) (who painted a portrait of Clara – above - which he then gave to her husband), count [Opprandino Arrivabene](#), [Luciano Manara](#), poet [Giulio Carcano](#), critic Luigi Toccagni, [Giuseppe Verdi](#) and [Giovanni Prati](#). After the triumph of Nabucco at La Scala on March 9, 1842 and until her death in 1886, Clara remains a confidant of Verdi and corresponds with him extensively. Balzac is also her host and flirts with her. In 1837 she receives him with all due respect, he is hypnotized by her and writes: "I would have given ten years of my life for being loved by her three months. None of the women I have met have impressed me as being so lively, profound and instantaneous." When he leaves Milan to visit other Italian cities he sends her letters with his impressions. Finally, after returning to France, he writes *La fausse maitresse*, praising friendship, and Clara is probably countess Clementina. When Franz Liszt arrives to Milan with his pregnant mistress Marie d'Agoult, that leaved for him a husband and children, she is the only one to host them in her house although they were an "illegitimate" couple. Liszt also is fascinated by her and finds her so different from other salonnières. During the revolution of 1848 she is part of a group of 50 women from the Milanese high society who assist the wounded. She has to flee to Switzerland where she lives with Trenca, one of the leaders of the liberal movement. In 1859 Frances assists Italy in its war against Austria and in the night between 4 and 5 June the Austrians have to leave Milan. In June 8 Vittorio Emanuele II and Napoleon III enter Milan triumphantly and Clara as homage to their ally insists on maintaining the conversation in French and sings *La Marseillaise* to thank the French whom she hosted. Napoleon wanting to respond transmits to her with count Francesco Arese Lucini his autographed photo. In the 1860s she receives at her salon the scapigliati (la bohème) whom she calls her dear sons, including Arrigo Boito, futur librettist of Verdi.

[Olympia Savio](#) (1815-1889)

Olimpia Savio was an [Italian](#) salon-holder and writer. She was considered one of the most influential women in Turin and was later recognised internationally as a patriotic mother who lost her children to an Italian nationalist cause. Savio was born Olimpia Rossi in [Turin](#) to the [Ligurian](#) nobleman Giovan Battista Rossi and his wife the [Biellese](#) Joséphine Ferrero. Her father was the director of the Royal College of the Provinces of Turin and her mother was considered among the smartest women of her time. She was educated by the Sisters of the Sacred Heart and was a debutant in 1830, at a festival for Princess [Maria Cristina of Savoy](#). She married the lawyer Andrea Savio with whom she had four children, Alfredo, Emilio, Federico and Adele. She was Baroness di Bernstiel. Savio hosted salons in Turin during the 19th century and wrote her memoirs leaving a portrait of her visitors and guests - *Memorie della Baronessa Olimpia Savio*, 1911. The period was a turbulent time in the region and Savio left a detailed description of major events. She worked with newspapers and magazines including the "Gazzetta Piemontese", "Le Scintille", "Rivista Contemporanea" and "La Donna e la Famiglia". Savio attended the inauguration of the Turin-Genoa railway in 1854 and the inauguration of the Frejus Tunnel of 1871. Savio wrote poetry and was considered a nationalist and patriotic poet. Her son, Alfredo, was killed during the siege of [Ancona](#) in 1860. In 1861 at the [siege of Gaeta](#) her son Emilio was killed. Savio became the personification of [Our Lady of Sorrows](#) of the Italian crown and cause. [Elizabeth Barrett Browning](#) wrote a poem, *Mother and Poet*, in honour and memory of her loss. Savio died in [Turin](#) and was buried in the Monumental Cemetery of Turin. She is remembered by a road in Mirandola, a province of Modena, Italy which is called the Via Olimpia Rossi Savio.

[Henriette Julie Herz](#) (1764-1847)

Henriette Julie Herz (née **de Lemos**) is best known for the "salonnières" or literary [salons](#) that she started with a group of emancipated Jews in Prussia. She was the daughter of a physician, descended from a [Portuguese Jewish](#) family of [Hamburg](#), [Benjamin de Lemos](#) (1711–1789) and Esther de Lemos (née Charleville) (1742–1817). Henriette Herz had grown up in the [Berlin](#) of the [Jewish emancipation](#) and had shared tutors apparently with [Moses Mendelssohn](#)'s daughters. At age fifteen, she married a physician, seventeen years her senior, [Markus Herz](#) had studied medicine at the [University of Königsberg](#), one of only three universities that accepted Jews—but only in its medical faculty. She was said to be an extremely beautiful woman. After a few years the salon split in two, a science-seminar led by her husband and a literary salon by Henriette herself. Most notable men and women in Berlin were said to have attended her salon. Among her friends and acquaintances were [Friedrich Schiller](#), [Mirabeau](#), [Dorothea von Schlegel](#), [Wilhelm von Humboldt](#), [Jean Paul](#), [Friedrich Rückert](#), [Karl Wilhelm Ramler](#), [Johann Jakob Engel](#), [Georg Ludwig Spalding](#), the Danish [Barthold Georg Niebuhr](#), [Johannes von Müller](#), the sculptor [Schadow](#), [Salomon Maimon](#), [Friedrich von Gentz](#), [Fanny von Arnstein](#), [Madame de Genlis](#), [Alexander zu Dohna-Schlobitten](#), [Gustav von Brinkmann](#), and [Friedrich Schlegel](#). [Alexander von Humboldt](#) often visited and even received Hebrew lessons from Henriette. The theologian [Friedrich Schleiermacher](#) was another frequent visitor. After the death of her husband she came under the powerful influence of Schleiermacher and converted to [Protestantism](#). Her grave is preserved in the [Protestant Friedhof II der Jerusalems- und Neuen Kirchengemeinde](#) (Cemetery No. II of the congregations of [Jerusalem's Church](#) and [New Church](#)) in [Berlin-Kreuzberg](#), south of [Hallesches Tor](#).

[Johanna Schopenhauer](#) (1766-1838)

Johanna Schopenhauer (née Trosiener, born in Gdansk) was the first German woman to publish books without a pseudonym, an influential literary salon host, and in the 1820s the most famous female author in Germany. In these days, she is known primarily for being the mother of philosopher [Arthur Schopenhauer](#). Before turning 10, she already knew [Polish](#), [French](#), and [English](#) apart from her native [German](#). The young Johanna had aspirations to become a painter, a desire her parents nipped right at the bud, considering it improper that a girl of her class exercised "a trade." At 18 years of age she married Heinrich Floris Schopenhauer, a much wealthier merchant twenty years her senior. He was to become the father of her 2 children, Arthur and Adele Schopenhauer, who were born in 1788 and 1797, respectively. The marriage was stable, but from the beginning Johanna felt that her happiness and that of her husband depended on her resignation to his will. One year after her husband's death in 1805, Johanna and her daughter moved to [Weimar](#), a town where Johanna had neither relatives nor close friends and which was, moreover, about to be the stage of war between Prussia and the invading troops of [Napoleon](#). In Weimar Johanna Schopenhauer made a name as an author. After the war, she gained a high reputation as a [salonnière](#) (as she had planned before she left Hamburg), and for years to come there attended her semiweekly parties several literary celebrities: [Wieland](#), the Schlegel brothers [August](#) and [Friedrich](#), [Tieck](#), and, above all, [Goethe](#), whose acquaintance was probably what attracted Johanna to Weimar in the first place. Goethe's endorsement was a big factor behind Johanna's social success, and it greatly contributed to their friendship the fact that Johanna was the first upper-class woman in Weimar to open the doors of her house to [Christiane Vulpius](#), Goethe's mistress, who had hitherto been excluded from the shining social scene of the city owing to her lowly background, but also to the fact that Goethe & Vulpius were no more than lovers, despite living together. In letters written to Schopenhauer, Johanna makes it very clear how distressed she was at her son Arthur's pessimism, his arrogance, and his imperious ways.

Princess Volkonskaia, portraits by Kiprenskiy, 1830, Muneret, 1814. Zinaida's Moscow salon by Myasoyedov, Facade of Palais Poli & Trevi Fountain in Rome

Princess **Zinaida Aleksandrovna Volkonskaya** (1792-1862), was a Russian writer, [poet](#), singer, [composer](#), [salonist](#) and [lady in waiting](#). She was an important figure in 19th-century Russian cultural life. She performed in [Paris](#) and [London](#) as an amateur [opera](#) singer. She was born in [Turin](#) in the family of a Russian ambassador, Prince Alexander [Beloselsky-Belozersky](#). Zinaida was lady-in-waiting to Queen [Louise of Prussia](#) in 1808 and was close to Emperor [Alexander I of Russia](#), who became her lifelong correspondent and, possibly, lover. To stem gossip, Zinaida married Alexander's aide-de-camp, Prince [Nikita Volkonsky](#), in 1810. They were prominent during the [Congresses of Vienna](#) and [Verona](#). She moved to Russia in 1817, and to Moscow in 1822. In the 1820s she hosted a literary and musical [salon](#) on [Tverskaya Street](#) in Moscow with [Adam Mickiewicz](#), Prince [Yevgeny Baratynsky](#), [Dmitry Venevitinov](#), [Prince Wiazemski](#), [Stepan Netchaïev](#), [Alexander Pushkin](#) frequented her house. She became member of the Society of Russian History and Antiquity in 1825. Following the displeasure and pressures of the new Tzar Nicholas I, Zinaida moved to [Rome](#) in 1829. She was accompanied by her son and [Stepan Shevyrev](#), the son's tutor. Among her lodgings in Rome were [Palazzo Poli](#), [Villa Wolkonsky](#), and a smaller house in the [Via degli Avignonesi](#). Her salon was frequented by [Karl Brullov](#), [Alexander Ivanov](#), [Bertel Thorvaldsen](#), [Vincenzo Camuccini](#), [Stendhal](#), & [Sir Walter Scott](#). [Nikolai Gogol](#), the famous Russian author, wrote much of [Dead Souls](#) at her villa.

Bertha Zuckerkandl (1864-1945), portrait by Vilma Lwoff-Parlaghy, 1886

Berta Zuckerkandl-Szepts (born **Bertha Szepts**) was an Austrian writer, journalist, and [art critic](#). Bertha Szepts was the daughter of a [Galician Jewish](#) liberal newspaper publisher [Moritz Szepts](#) and was raised in Vienna. She was married to the Hungarian anatomist [Emil Zuckerkandl](#). For half a century from 1889 until 1938, she led an important [literary salon](#) in Vienna, originally from a villa in [Döbling](#), later in the Oppolzergasse near the [Burgtheater](#). Many famous Viennese artists and personalities including [Auguste Rodin](#), [Gustav Klimt](#), [Gustav Mahler](#), [Alma Mahler](#), Alexander Girardi, Max Burckhardt, [Hermann Bahr](#), [Hugo von Hofmannsthal](#), [Max Reinhardt](#), [Arthur Schnitzler](#), [Stefan Zweig](#), [Egon Friedell](#), Josef Hoffmann, and others frequented the salon. Protégés of the salon include [Anton Kolig](#) and [Sebastian Isepp](#) of the [Nötsch Circle](#). Her sister Sophie (1862–1937) was married to Paul Clemenceau, the brother of the French President [Georges Clemenceau](#), and, therefore, she also had good ties to Parisian artistic circles, and met there Auguste Rodin, Eugene Carriere, Emile Zola and Gustave Geoffroy at the salon of [Aline Ménard-Dorian](#). She translated a number of plays from French to German, by [Paul Gerdely](#), [Tristan Bernard](#) & [Sacha Guitry](#), and was a cofounder of the [Salzburg Music Festival](#). Berta published articles and art criticism in *Die Zeit*, in *Wiener Allgemeine Zeitung*, and in *Neue Wiener Journal*. She engaged in the defense of modern Austrian art, in particular the Viennese Secession, which was created in her salon. In 1938, she emigrated to Paris and later to [Algiers](#). She returned very sick in 1945 to Paris and died there the same year.

Portrait of Maria Sanchez de Thompson (1786-1868), with her children by Jean-Philippe Goulu, 1830s, portrait by Johann Moritz Rugendas (1845), photo from 1854, the Argentine National Anthem being played for the first time at her salon, Pedro Subercaseaux, 14/5/1813

Mariquita Sánchez de Thompson Y de Mende ville, also known simply as **Mariquita Sánchez de Thompson**, was a patriot from Buenos Aires and one of its leading *salonnières*, whose *tertulias* gathered many of the leading personalities of her time. She is widely remembered in the Argentine historical tradition because the [Argentine National Anthem](#) was sung for the first time in her home, on May 14th, 1813. One of the first politically outspoken Argentine women, Mariquita Sánchez de Thompson has been considered the most active female figure in the revolutionary process. She married her cousin, [Martín Thompson](#), in 1805. She became a widow in 1817, and remarried in 1819/1820, to the French expatriate Washington de Mende ville. Sánchez hosted *tertulias*, social gatherings similar to salons, that were some of the most renowned in all the [Viceroyalty](#), and which were attended by many aristocrats and officials of the time. After the revolution, the house of Sánchez and Thompson became a center for artistic meetings. At her *tertulias*, her guests danced, played cards, listened to music, discussed business, books, religion, and politics. After marrying Mende ville, she continued to host *tertulias* in her house, continuing her home's status as a center for "music, plastic arts, and welfare work as well as politics." In 1823, she worked with [President Rivadavia](#) and founded the "[Sociedad de Beneficencia](#)" the first philanthropic institution run by Buenos Aires women to protect and educate women, which allowed them to participate in public life. During the dictatorship of Juan Manuel de Rosas, the Sociedad de Beneficencia was dismantled and Sánchez went into exile in Montevideo, during which she wrote a significant portion of her letters and recorded works. In 1846, Sánchez went to Rio de Janeiro, and when she returned to Montevideo she wanted to go to Europe, but she ultimately decided to settle down. She died in Buenos Aires on October 23, 1868.

Tertulianos in café de Levante (1839) by Leonardo Alenze. Galdos in a literary tertulia, 1897

A **tertulia** is a social gathering with literary or artistic overtones, especially in [Iberia](#) or in [Latin America](#). Tertulia also means an informal meeting of people to talk about current affairs, arts, etc. A tertulia is rather similar to a [salon](#), but a typical tertulia has been a regularly scheduled event in a public place, although some tertulias are held in more private spaces, such as someone's living room. Participants, share their recent creations such as [poetry](#), [short stories](#), and even artwork or songs. The aristocracy gathered in their homes' salons to differentiate themselves from the bourgeois tertulias in cafes. At the end of 19th century tertulias started at the private hotel of the barons del Castillo de Chirel. On Mondays the de Bauers received in their calle San Bernardo Palace, on Fridays at the house of marquesa de Bolaños, Wednesdays at the house of marquesa de Esquilache, who invited Eduardo Datao, Emilia Pardo Bazan... The invitations were in French. In the 19th and 20th century tertulias were held at the Sevillian Palace of [Juan Pérez de Guzmán y Boza](#), with [Manuel Gómez Imaz](#), José María de Hoyos y Hurtado, [Luis Montoto](#), [José Gestoso y Pérez](#), [Francisco Rodríguez Marín](#), Enrique Rasco and [Marcelino Menéndez Pelayo](#). In Salamanca since 1905 were held at Café Novelty tertulias with [Miguel de Unamuno](#), [Ortega y Gasset](#), [Torrente Ballester](#), [Víctor García de la Concha](#). In [Granada](#) at the [tertulia del Rinconcillo](#), met at the [café Alameda](#), [Federico García Lorca](#) and [Manuel de Falla](#). In the 1920s gathered at the [tertulia de San Gregorio](#) in [Segovia](#) [Antonio Machado](#), [Blas Zambrano](#), [Emiliano Barral](#). In 1862 gathered at tertulias in the cafes in Madrid Galdos and his friends. One of the most important tertulias described by Galdos in his memories (1915-1916) was at the Ateneo in calle de la Montera. At the [café del Gato Negro](#) in calle del Principe was held a modernist tertulia with Jacinto Benavente and at the [Café del Prado](#) met [Gustavo Adolfo Bécquer](#), [Ramón y Cajal](#), [Menéndez Pelayo](#), [Buñuel](#), [Lorca](#), [Melchor Fernández Almagro](#). At the Europeo met Manuel and Antonio Machado with friends. Jose Ortega y Gasset met friends in 1931 at the [café Granja El Henar](#). All this ended during the Civil War of 1936/9.

Ulrika Ulla Sofia De Geer, nee Sprengtporten (1793-1869)

Ulrika "Ulla" Sofia De Geer, née *Sprengtporten* was a politically influential Swedish countess and salon holder. She was married to the politician count [Carl De Geer](#), over whom she is believed to have exerted influence, and was a central figure in the Stockholm high society in the mid-19th century. Ulla De Geer was a leading member of the Stockholm high society life and hosted a salon which was a center of political discussions. She used the ritualized system of visits and regular receptions to create valuable contacts which could be used to gather information and wield influence. She adhered strictly to ceremony, and it is described how her guests were to pass through three salons before reaching her, where she greeted them ceremoniously. She rivaled [Claire Lucie Mouradgea d'Ohsson](#) (1776-1861), in whose salon foreign diplomats were to be introduced to the Swedish aristocracy, but Ulla De Geer has been described as the leading Swedish society hostess of her generation: through her connections, she belonged to those who set the tone for what was acceptable, and was described as a "powerful person in high society". [Carl Gustaf von Brinkman](#) was known to frequent her salon. When she was widowed in 1861, she retired from social life and stopped entertaining: her position as leading society hostess being taken over by the stepdaughter of her rival, Aurore Palin (1837-1909), and she restricted herself to socializing with her family and her English lady's companion Miss Carus. F. U. Wrangel described her as: "the only one, who upheld the tradition with regular evening receptions within the Stockholm aristocracy. In her home, the *crème de la crème* of the highest society gathered, where the same cultivated conversation and manner thrived as in its role model in [Faubourg Saint-Germain](#) in Paris... she was in my opinion Sweden's last [grande dame](#) in the true meaning of the word."

Magdalena Sofia "Malla" Silfverstolpe, nee Montgomery (1782-1861)

Magdalena Sofia "Malla" Silfverstolpe (*née* [Montgomery](#)) was a [Swedish](#) writer and [salon](#) hostess. Her house in [Uppsala](#) was a meeting place for many prominent writers, composers and intellectuals. Her diaries, published in four parts between 1908 and 1911, offer a unique insight into the lives of those who formed part of her circle. Silfverstolpe's father, Robert Montgomery, was commissioned into the French army in 1754 and by 1777 had achieved the rank of [colonel](#). Serving in the [County of Nyland and Tavastehus](#), in modern-day [Finland](#), he married Charlotte Rudbeck in 1781. Rudbeck died in April 1782, two months after their daughter was born; Montgomery returned to Sweden with his daughter in 1783. Montgomery was held in high regard by [Gustav III](#) at the time of his return. Silfverstolpe was married to David Gudmund Silfverstolpe, a colonel in the Swedish [General Staff](#), in 1807; the marriage was not a happy one. Her husband suffered from [depression](#). The couple moved to [Uppsala](#) in 1812 and Silfverstolpe was widowed in 1819. In 1820, Silfverstolpe, inspired by the prominent women of [Paris](#), began running her Friday night [salon](#). Silfverstolpe's salon welcomed leading figures in Swedish science, literature and high society and even hosted influential foreign visitors to the country. The salon was a powerful presence within the culture of Sweden for two decades and was the centre of the country's [romantic](#) movement. Aside from her support for romantic poets and novelists, Silfverstolpe was also a [patron](#) to a number of songwriters, including [Per Ulrik Kernell](#) and [Adolf Fredrik Lindblad](#). Silfverstolpe, who had kept diaries throughout her life, began writing her memoirs from 1822 following Kernell's insistent suggestion. Excerpts from these were eventually released in four parts from 1908 to 1911, a second edition was published in 1914. The memoirs are rich in personal and historical detail. Silfverstolpe described Sweden and many of her most famous contemporaries with great tact and familiarity. Her writings provide an important contemporary account of figures such as [Carl Jonas Love Almqvist](#), [Per Daniel Amadeus Atterbom](#), [Erik Gustaf Geijer](#), [Lindblad](#), [Anders Fredrik Skjöldebrand](#), [Esaias Tegnér](#), [Adolf Törneros](#) and [Johan Olof Wallin](#). Numerous contemporaries of Silfverstolpe dedicated poetry to her.

Catharina Frederika Linnell nee Forssberg (1816-1897)

Catharina Frederika Linnell was a [Swedish](#) philanthropist, [mecenate](#), [feminist](#) and [salonist](#). Fredrika Forssberg was born in [Härnösand Municipality](#) in [Västernorrland County](#), Sweden, as the daughter of [lektor](#) Olof Fredrik Forssberg and Catharina Margareta Svedbom. Fredrika Linnell was raised in a literary home and had the ability to cultivate her interests in literature and music. In 1842 in Stockholm, she married her cousin, [Per Erik Svedbom](#) (1811–1857), headmaster at Nya Elementar in Stockholm and editor of [Aftonbladet](#) with whom she had two sons. After the death of her first husband, she was married in 1858 to [Carl Abraham Linnell](#) (1823–1882), a lieutenant in the Civil Engineering Corps and later office manager at the Swedish Royal Railway Board. Together with Carl Linnell, she built *Villa Lyran*, an exclusive summer villa in the district [Bredäng](#), a suburb in south-west Stockholm. The couple also maintained a winter residence at Gustav Horns palats at Fredsgatan 2 in Stockholm, today the site of the [Medelhavsmuseet](#). Already during her first marriage, she moved to the capital of Stockholm, where she became the center of a literary salon. She was a benefactor of artists: she partially financed [Fredrika Bremer](#)'s trip to Palestine, and supported [Selma Lagerlöf](#) economically so she could concentrate on her writing. She held a salon for the artist elite, and gathered artists as guests at *Villa Lyran*, her country villa on [Lake Mälaren](#) from May–September, where [Jenny Lind](#), [Gunnar Wennerberg](#), [Victoria Benedictsson](#), [Carl Snoilsky](#), [Carl David af Wirsén](#), [Emil Sjögren](#), [Christina Nilsson](#) and [Henrik Ibsen](#) were among the guests. King [Oscar II of Sweden](#) also visited it. The so-called Linnellska salongen (The Linnell Salon) was particularly popular during the 1870s- and 1880s, and known as a hospitable center of the Swedish cultural elite. Among her guests were [Björnstjerne Björnson](#), W F Dalman, [Ivar Hallström](#), L J Hierta, [Elise Hwasser](#), [Henrik Ibsen](#), [Carl Snoilsky](#), [Sophie Adlersparre](#), [Amanda Kerfstedt](#) and [Anna Hierta-Retzius](#). Her son, the composer [Vilhelm Svedbom](#) (1843–1904), arranged soirees at her salon, and [Pontus Wikner](#) held lectures in philosophy. She also arranged for new authors to read their work in her salon, or have actors to read their works for them in her salon. She herself read aloud poems from [Werner von Heidenstam](#) before he became known, and [Selma Lagerlöf](#) read excerpts from her novel [Gösta Berlings saga](#) in her salon before it was printed and published.

*Miss Mary Wigham
Mentia Taylor*

Clementia Taylor (1810-1908)

Clementia Taylor (née Doughty) was an English women's rights activist and radical. Clementia (Mentia) was born in Brockdish, Norfolk, 1 of 12 children. Her family was Unitarian. Clementia became the governess to the daughters of a Unitarian minister who ran a boys' boarding school at Hove. In 1842 Clementia married Peter Alfred Taylor, the cousin of her pupils. Taylor was later the Liberal Member of Parliament for Leicester. In 1863, Peter Taylor bought Aubrey House in the Campden Hill district of Holland Park in West London. The Taylors opened the **Aubrey Institute** in the grounds of the house; the institute gave young people the chance to improve a poor education they might have had. The lending library & reading room of the institute had 500+ books.

Taylor, Mary Estlin and Eliza Wigham were active in anti-slavery movement in England and in 1863 they all served on Ladies' London Emancipation Society which Taylor led. The Taylors were also closely involved in the movement for Italian unification and Giuseppe Mazzini was a frequent visitor to Aubrey House. During his celebrated 1864 visit to London, a reception was held at Aubrey House for Giuseppe Garibaldi and after Garibaldi visited Mazzini. Noted radical figures at the reception included feminist Emilie Ashurst Venturi; Aurelio Saffi, Karl Blind, Ferdinand Freiligrath, Alexandre Auguste Ledru-Rollin and Louis Blanc. In Moncure D. Conway's autobiography he describes the Taylor's salon at Aubrey House, and Clementia's "Pen and Pencil Club" at which the work of young writers and artists was read and exhibited. Conway, an American abolitionist and clergyman, moved to Notting Hill to be near the Taylors at Aubrey House. The Taylor's social gatherings were also noted by the American author Louisa May Alcott. Attendees of the "Pen and Pencil Club" included the diarist Arthur Munby, and many poets and authors who later achieved fame. Aubrey House was also visited by feminists Barbara Bodichon, Lydia Becker, Elizabeth Blackwell, and Elizabeth Malleson.^[4] Clementia Taylor was on the organizing committee of the 1866 petition in favour of women's suffrage that John Stuart Mill presented to the British parliament; the 1499 signatures were collated in Aubrey House. It was in the house that the Committee of the London National Society for Women's Suffrage, held its first meeting in July 1867. In 1873, the Taylors sold Aubrey House due to Peter's ill health, established an apartment near parliament house for when the Commons sat, and moved to Brighton. Mentia Taylor died in Brighton in 1908.

Florine Stettheimer (1871-1944), American artist in her Bryant Park Garden, Spring Sale at Bendel's, 1920, oil on canvas by Stettheimer

Florine Stettheimer was an [American modernist](#) painter, [feminist](#), theatrical designer, poet, and [salonnière](#). Stettheimer developed a feminine, theatrical painting style depicting her friends and experiences of [New York City](#). She painted the first feminist nude self-portrait, executed paintings depicting controversial issues of race and sexual preference, depicted the leisure activities and parties of her family and friends. With her sisters, she hosted a salon that attracted members of the avant-garde. In the mid-1930s, Stettheimer created the stage designs and costumes for [Gertrude Stein](#) and [Virgil Thomson's](#) avant-garde opera, [Four Saints in Three Acts](#). She is best known for her four monumental works illustrating what she considered to be New York City's "Cathedrals": [Broadway](#), [Wall Street](#), [Fifth Avenue](#), and New York's three major art museums. Stettheimer exhibited her paintings at more than 40 museum exhibitions and salons in New York and [Paris](#). In 1938, when the curator of the [Museum of Modern Art](#) sent the first exhibition of American art to Europe, Stettheimer and [Georgia O'Keeffe](#) were the only women whose work was included. A book of her poetry, *Crystal Flowers*, was published by her sister Ettie Stettheimer in 1949.

Florine Stettheimer was born in [Rochester, New York](#), on August 19, 1871. Her mother, Rosetta Walter, was one of nine daughters from a wealthy German-Jewish family in New York. Stettheimer's father, Joseph, had five children with Rosetta Walter but deserted his family for [Australia](#). Stettheimer grew up in between New York City and [Europe](#), in a matriarchal family. By the time Stettheimer was ten, Rosetta and her five children spent part of every year in Europe. The four Stettheimer women moved in 1914 into an apartment on West 76th Street in Manhattan, where they began holding [salons](#), inviting recent expatriate artists such as Marcel Duchamp, [Albert Gleizes](#), and [Francis Picabia](#), as well as members of [Alfred Stieglitz's](#) circle, such as [Marsden Hartley](#) and Georgia O'Keeffe, and other musicians, writers, poets, dancers, and members of New York's avant-garde. A unique aspects of the Stettheimer salon was that their numerous gay, bisexual, and lesbian friends and acquaintances did not need to disguise their sexual orientation at the gatherings as they did at other salons (such as the [Arensberg](#) Salon). Stettheimer often previewed her newest paintings to her friends at her salons, as in her painting *Soirée* (1917–19). During the summers, the Stettheimers often held day-long, salon-like parties for friends at rented summer houses. Stettheimer painted these gatherings of her family members and friends enjoying outdoor festivities, including *Sunday Afternoon in the Country* (1917).

Maryana Marrash (1848-1919)

Maryana bint Fathallah bin Nasrallah Marrash was a [Syrian](#) writer and poet of the [Nahda](#) or the Arab Renaissance. She revived the tradition of [literary salons](#) in the Middle East and was the first Syrian woman to publish a collection of poetry. She may have been the first woman to write in the [Arabic-language daily newspapers](#). Maryana Marrash was born in [Aleppo](#), a city of [Ottoman Syria](#) (present-day [Syria](#)), to an old [Melkite](#) family of merchants known for their literary interests. Aleppo was then a major intellectual center of the [Ottoman Empire](#), featuring many thinkers and writers concerned with the future of the Arabs. Although she had many suitors, she initially wished to remain single. However, she was persuaded to marry after her mother's death, and chose for husband Habib Ghadban, a scion of a local Christian family. They had one son and two daughters. As early as 1870, Marrash started contributing articles and poems to journals—especially [Al-Jinan](#) and [Lisan al-hal](#), both of Beirut. In her articles, she criticized the condition of Arab women, urging them, regardless of their religious affiliations, to seek education and express themselves on matters of concern to them. Her collection of poetry *Bint fikr* (A Daughter of Thought) was published in Beirut in 1893. Sami Kayyali said about Marrash: The emergence of a woman writing in the press and composing poetry in this dark era was a significant event. Our recent history shows that it was rare for even men to read and write; her appearance in these dark nights was thus like a bright star in the center of heavens. Her non-fiction works include a history of late Ottoman Syria, the first book on the subject.

Marrash was famous for the salon she held in the home she shared with her husband. She had travelled to Europe once, and was impressed by what she saw of life there. As related by Joseph Zeidan: Upon her return in Aleppo, Maryana Marrash turned her house into a gathering place for a group of celebrated writers who met there on a regular basis to cultivate each other's friendship and discuss literature, music, and political and social issues. However, according to Joseph Zeidan, there are no proofs supporting whether or not she created her salon after seeing similar ones in Europe; in any case, it did not start from scratch, since "most of the participants were regular visitors to her family's home, where they used to meet with her father and two brothers." The members of Maryana's salon included prominent Aleppine intellectuals of both sexes, in addition to politicians and members of the foreign diplomatic corps. Marrash was fully engaged in the intellectual discourse and would also entertain her guests by playing the *qanun* and singing. Antun Sha'arawi has described typical evenings spent at Marrash's salon: Wearing either all black or all white dresses ordered from Paris, Marrash hosted the mixed evening get-togethers in which literary topics as varied as the [Mu`allaqat](#)—a cycle of seven pre-Islamic poems—or the work of Rabelais were discussed. Chess and card games were played, and complicated poetry competitions took place; wine & ['araq](#) flowed freely; participants sang & danced.

Princess Nazli Fazil (1853-1913)

Princess Zainab Nazlı Khanum Effendi was an Egyptian princess from the dynasty of [Muhammad Ali of Egypt](#) and one of the first women to revive the tradition of the [literary salon in the Arab world](#), at her palace in Cairo from the 1880s until her death. Of [Turkish](#) origin, Princess Nazlı Fazıl was born in [Constantinople, Ottoman Empire](#), in 1853, the eldest child of [Mustafa Fazıl Pasha](#), son of [Ibrahim Pasha of Egypt](#) and brother of the future Khedive [Isma'il Pasha](#), and Dilazad Hanim. Her mother was Dazad Hanim. At the age of 13, she left Egypt for Constantinople upon her father's falling out with his brother, the [Khedive](#), in 1866. In Constantinople, she was highly educated, against prevailing tradition, and entertained foreign visitors. She was a well educated and cultured lady who spoke Turkish, Arabic, French and English, and also Italian and German. In December 1872, she married Turkish ambassador [Halil Şerif Paşa](#) (Khalil Bey), and moved briefly to Paris with him on his last post there. It was not a happy marriage, and her one daughter, Hayya Khanum, died in infancy. Upon his death, she moved back to [Cairo, Khedivate of Egypt](#), and settled in a palace located nearby to the royal [Abdeen Palace](#), named "Villa Henry". In this palace, she began hosting [soirees](#), and was friendly with the intellectual elites of her day, including the Egyptians, [Muhammad Abduh](#), [Saad Zaghloul](#), and [Qasim Amin](#), and the British, [Lord Cromer](#) and [Herbert Kitchener](#). It is rumored that she was the individual who encouraged Saad Zaghlul to learn French in order to disseminate his writings more widely and also arranged his marriage to [Safiyya Zaghlul](#). Additionally, it was at her insistence that Lord Cromer coordinated 'Abduh's return from exile in 1888. She married [Khelil Bouhageb](#), son of [Salem Bouhageb](#) and eventual Prime Minister of [Tunisia](#). In memoirs of her acquaintances, it is said that she had a quick wit and loved photographs, champagne, cigarettes and her [pianola](#). She died from cardiac failure and was buried at the Fazil Mausoleum, *Imam al-Shafi'i*.

May Elias Ziadeh (1886-1941)

May Elias Ziadeh was a [Lebanese-Palestinian](#) poet, essayist and translator, who wrote different works in [Arabic](#) and in [French](#). After schooling in her native [Nazareth](#) and in Lebanon, Ziadeh immigrated with her family to Egypt in 1908, and started publishing her French works (under the pen name **Isis Copia**) in 1911. [Kahlil Gibran](#) entered into a well-known correspondence with her in 1912. A prolific writer, she wrote for Arabic-language newspapers and periodicals besides publishing [poems](#) and books. She held one of the [most famous literary salons in the modern Arab world](#). She called upon Arab women to aspire toward freedom, as in a 1921 conference. After suffering personal losses at the beginning of the 1930s, she returned to Lebanon where her relatives placed her in a psychiatric hospital. However she was able to get out of it, and left for [Cairo](#), where she died later. Ziadeh is considered to have been a key figure of the [Nahda](#) in the early 20th-century Arab literary scene, and a "pioneer of Oriental feminism." Ziadeh was born to a [Lebanese Maronite](#) father and a [Palestinian](#) mother in [Nazareth, Palestine](#). Her father, Elias Ziadeh, was editor of *al-Mahrūsah*. Ziadeh attended primary school in [Nazareth](#). She is reported to have published her first articles at age 16. In 1908, she and her family emigrated to [Egypt](#). Ziadeh never married, but from 1912 onward, she maintained an extensive written correspondence with one of the literary giants of the twentieth century, the Lebanese-American poet and writer [Khalil Gibran](#). Although the pair never met, as he was living in [New York City](#), the correspondence lasted 19 years until his death in 1931. Ziadeh was completely bilingual in [Arabic](#) and [French](#), and had working knowledge of [English](#), [Italian](#), [German](#), [Spanish](#), [Latin](#) as well as [Modern Greek](#). Ziadeh was well known in Arab literary circles, receiving many male and female writers and intellectuals at a literary salon she established in 1912 (and which Egyptian poet [Gamila El Alaily](#) attempted to emulate after Ziadeh's death). Among those that frequented the salon were [Taha Hussein](#), [Khalil Moutrane](#), [Ahmed Lutfi el-Sayed](#), [Antoun Gemayel](#), Walieddine Yakan, [Abbas el-Akkad](#) and [Yacoub Sarrouf](#). Ziadeh is credited with introducing the work of Khalil Gibran to the Egyptian public. Unlike her peers [Princess Nazli Fazil](#) and [Huda Sha'arawi](#), Mayy Ziyadah was more a 'woman of letters' than a social reformer. However, she was also involved in the women's emancipation movement. Ziadeh was deeply concerned with the emancipation of the Arab woman; a task to be effected first by tackling ignorance, and then anachronistic traditions. She considered women to be the basic elements of every human society and wrote that a woman enslaved could not breastfeed her children with her own milk when that milk smelled strongly of servitude. She specified that female evolution towards equality need not be enacted at the expense of femininity, but rather that it was a parallel process. In 1921, she convened a conference under the heading, "Le but de la vie" ("The goal of life"), where she called upon Arab women to aspire toward freedom, and to be open to the [Occident](#) without forgetting their [Oriental](#) identity. Her writings still represent the ideals of the first wave of Lebanese feminism.

Portrait of Adele Bloch-Bauer (1881-1925) no. I, 1907 & no. II, 1912, by Gustav Klimt, photo 1915, detail of Judith I (1901) by Klimt for which Adele modeled, & a public poster concerning the restitution of the painting by Austria

Adele Bloch-Bauer was an Austrian socialite, from a wealthy Jewish Viennese family, and is remembered by all because of the famous painting “Golden Adele” or Adele Bloch-Bauer I by Gustav Klimt, 1907, one of the best paintings of the Wiener Art Nouveau. She was the daughter of Moritz Bauer (1840-1905), director of the [Großbank Wiener Bankverein](#), the seventh largest bank in [Austria-Hungary](#), and the general director of Oriental Railroads. She married in 1899 the banker and sugar manufacturer Ferdinand Bloch. She was 18 and he was 35. The couple, who had no children, both changed their surnames to Bloch-Bauer. Adele and Ferdinand met in their salon of the Jewish high society in Vienna artists, authors and social democratic politicians such as Karl Renner, who later became the first prime minister of the young republic, Julius Tandler, and many prominent people. Socially well-connected, Adele brought together writers, politicians and intellectuals for regular [salons](#) at their home. The couple shared a love of art, and patronised several artists, collecting primarily nineteenth-century Viennese paintings and modern sculpture. Ferdinand also had a passion for [neoclassical](#) porcelain, and by 1934 his collection was over 400 pieces and one of the finest in the world Maria Altmann, her niece, described Adele from her childhood impressions as “sick, suffering, always with a headache, smoking like a chimney, terribly tender, dark. A completely spiritual face,

slim, elegant, smug, arrogant... Always looking for spiritual stimulation.” Gustav Klimt was a friend of the family and Adele modeled for him in several pictures, although opinion is divided on whether they had an affair. Adele died in 1925 from meningitis. In mid-1903 Ferdinand Bloch-Bauer commissioned Klimt to paint a portrait of his wife. The Lady in Gold was completed between 1903 and 1907. The painting was [stolen by the Nazis](#) in 1941 and displayed at the [Österreichische Galerie Belvedere](#). The portrait is the final and most fully representative work of Klimt's [golden phase](#). It was the first of two depictions of Adele by Klimt—the [second](#) was completed in 1912; these were two of several works by the artist that the family owned. In 1998 [Hubertus Czernin](#), the Austrian [investigative journalist](#), established that the Galerie Belvedere contained several works stolen from Jewish owners in the war, and that the gallery had refused to return the art to their original owners, or to acknowledge a theft had taken place. One of Ferdinand's nieces, [Maria Altmann](#), hired the lawyer [E. Randol Schoenberg](#) to make a claim against the gallery for the return of five works by Klimt. After a seven-year legal claim, which included a hearing in front of the [Supreme Court of the United States](#), an arbitration committee in Vienna agreed that the painting, and others, had been stolen from the family and that it [should be returned](#) to Altmann. She sold it the same year for \$135 million, at the time a [record price for a painting](#) to the businessman and art collector [Ronald Lauder](#), who placed the work in the [Neue Galerie](#), the New York-based gallery he co-founded. A novel and a film describe this saga.

Nazi plunder was [stealing of art](#) and other items as a result of the [organized looting of European countries](#) during the time of the [Third Reich](#) by agents acting on behalf of the ruling [Nazi Party](#) of [Germany](#). Plundering occurred from 1933 until the end of [World War II](#), particularly by military units known as the [Kunstschutz](#), although most plunder was acquired during the war. In addition to [gold](#), [silver](#) and currency, cultural items of great significance were stolen, including paintings, ceramics, books and religious treasures. Although most of these items were recovered by agents of the [Monuments, Fine Arts, and Archives program](#), on behalf of the [Allies](#) immediately following the war, many are still missing. There is an international effort underway to identify Nazi plunder that still remains unaccounted for, with the aim of ultimately returning the items to the rightful owners, their families or their respective countries. [Adolf Hitler](#) was an unsuccessful artist who was denied admission to the [Vienna Academy of Fine Arts](#). Nonetheless, he thought of himself as a connoisseur of the arts, and in [Mein Kampf](#) he ferociously attacked modern art as degenerate, including [Cubism](#), [Futurism](#), and [Dadaism](#), all of which he considered the product of a decadent twentieth century society. In 1933 when Hitler became [Chancellor of Germany](#), he enforced his aesthetic ideal on the nation. The types of art that were favored amongst the Nazi party were classical portraits and landscapes by [Old Masters](#), particularly those of Germanic origin. Modern art that did not match this was dubbed [degenerate art](#) by the Third Reich and all that was found in Germany's state museums was to be sold or destroyed. With the sums raised, the Führer's objective was to establish the European Art Museum in [Linz](#). Other Nazi dignitaries, like [Reichsmarschall Hermann Göring](#) and Foreign Affairs minister [von Ribbentrop](#), were also intent on taking advantage of German military conquests to increase their private art collections. Art collections from prominent Jewish families, including the [Rothschilds](#), the Rosenbergs, the Wildensteins and the Schloss Family were the targets of confiscations because of their significant value. Also, Jewish art dealers sold art to German organizations – often under duress, e.g. the art dealerships of [Jacques Goudstikker](#), Benjamin and Nathan Katz and [Kurt Walter Bachstitz](#). Also non-Jewish art dealers sold art to the Germans. By the end of the war, the Third Reich amassed hundreds of thousands of cultural objects.

On November 21, 1944, at the request of [Owen Roberts](#), [William J. Donovan](#) created the Art Looting Investigation Unit (ALIU) within the [OSS](#) to collect information on the looting, confiscation and transfer of cultural objects by [Nazi Germany](#), its allies and the various individuals and organizations involved; to prosecute war criminals and to restitute property. The ALIU compiled information on individuals believed to have participated in art looting, identifying a group of key suspects for capture and interrogation about their roles in carrying out Nazi policy. Although most of the stolen artworks and antiques were documented, found or recovered "by the victorious Allied armies ... principally hidden away in salt mines, tunnels, and secluded castles", many artworks have never been returned to their rightful owners. Approximately 20% of the art in Europe was looted by the Nazis, and there are well over 100,000 items that have not been returned to their rightful owners. But the process is time-consuming and slow, and very few disputed works have been found in public collections.

Alma Mahler (1879-1964), photo 1908, painting by Oskar Kokoschka, 1912

Alma Maria Mahler Gropius Werfel (born **Alma Margaretha Maria Schindler**) was a Viennese-born composer, author, editor and socialite. Alma Maria Schindler was born on 31 August 1879 in Vienna, Austria to the famous landscape painter [Emil Jakob Schindler](#) and his wife Anna Sofie. She was tutored at home and brought up in the Roman Catholic Church. After her father's death, Alma focused on the piano. As she grew older, a case of childhood measles left her with decreased hearing. At fifteen, she was mentored by [Max Burckhard](#). Musically active from her early years, she was the composer of at nearly 50 songs for voice and piano, and works in other genres as well. Alma met [Gustav Klimt](#) through Carl Moll. Moll and Klimt were both founding members of the [Vienna Secession](#). Klimt fell in love with Alma. While she initially was interested in Klimt her desire cooled soon after. Klimt and Alma were friends until Klimt's death. In her early years, she fell in love with composer and conductor [Alexander von Zemlinsky](#), but their relationship did not last long. **On 7 November 1901 she attended [Zuckermandls'](#) salon where she began a flirtation with [Gustav Mahler](#).** On 9 March 1902, she married Gustav Mahler, who was 19 years her senior and the director of the Vienna Court Opera. [Gustav Mahler](#) insisted (as a condition of their marriage) that she give up composing. Eventually she fell into depression from being artistically stifled. While her marriage was struggling, she had an affair with [Walter Gropius](#). Gustav started to encourage Alma's composing and helped prepare some of her compositions for publication, but died soon after this attempted reconciliation in 1911. After Gustav's death, Alma did not immediately resume contact with Gropius. Between 1912 and 1914 she had a tumultuous affair with the artist [Oskar Kokoschka](#), who created works inspired by his relationship with her, including his painting [The Bride of the Wind](#). Kokoschka's possessiveness wore on Alma, and the emotional vicissitudes of the relationship tired them both. Alma subsequently distanced herself from Kokoschka and resumed contact with Walter Gropius, who was also serving in combat at that time. Alma married Gropius in 1915 and the couple had a daughter together, [Manon Gropius](#). During her marriage to Gropius, Alma had an affair with [Franz Werfel](#). Alma and Werfel were eventually married after Alma separated from Gropius. In 1938, after the [Anschluss](#), Werfel and Alma were forced to flee Austria as it was unsafe for Jews. Eventually the couple settled in Los Angeles, where he died in 1945. Alma Mahler's salon became part of the artistic scene, first in Vienna, then in Los Angeles, **Alma continued her role as a hostess, bringing together [Arnold Schoenberg](#), [Igor Stravinsky](#), [Thomas Mann](#), and many artists.** Several years later she moved to New York, where she remained a cultural figure, meeting [Leonard Bernstein](#), who was a champion of Mahler's music, Alma's 2 books on Gustav Mahler influenced studies of the latter.

NEW CENTURY'S EVE WITH THE CREATIVE PARAGONS: CULTURAL FIREWORKS AT THE PARISIAN SALON OF ERNESTA STERN ON A 31/12/1899 REVEILLON – A PLAY

BY JACQUES CORY ALIAS JACQUE COROT

DRAMATIS PERSONAE

In order of appearance

Ernesta Stern, 45, French, Salonniere, Author – Host

Jacque Corot, 80, French, Witness – (Greek) Chorus

Émile Zola, 59, French, Author and Journalist

Lev Tolstoy, 71, Russian, Author

Henrik Ibsen, 71, Norwegian, Playwright

Georges Clemenceau, 58, French, Statesman and Journalist

Oscar Wilde, 45, Irish/British, Playwright

* Oscar Wilde recites from his poem The Ballad of Reading Gaol

George Bernard Shaw, 43, Irish/British, Playwright and Polemicist

Claude Monet, 59, French, Painter

* Monet's paintings are screened, while Claude Debussy plays on the piano his Arabesques

Claude Debussy, 37, French, Composer

Giacomo Puccini, 41, Italian, Composer

Enrico Caruso, 26, Italian, Operatic Tenor

* Enrico Caruso sings 12 opera arias by Puccini, Verdi, Donizetti, Leoncavallo, Gounod, Bizet

Edmond Rostand, 31, French, Playwright

Sarah Bernhardt, 55, French, Stage Actress

* Sarah Bernhardt plays Duke Reichstadt's monologues from Edmond Rostand's L'Aiglon

Louis Lumière, 35, French, Engineer, Industrialist, Inventor of the Cinematograph

* 10 short films by Lumiere are screened accompanied by Scott Joplin's ragtime piano music played by Arthur Rubinstein, who continues with a recital by Chopin, Brahms, Mendelssohn

Theodor Herzl, 39, Austrian Jewish Journalist, Playwright, Writer, Father of Political Zionism

José Echegaray, 67, Spanish, Civil Engineer, Mathematician, Statesman, Playwright

Gustave Eiffel, 67, French, Civil Engineer

Jules Chéret, 63, French, Painter and Lithographer

* Photos & films of Paris around 1899 are screened, as well as Jules Cheret's posters, with a performance of a Moulin Rouge can-can show and scenes from famous French operettes

Marcel Proust, 28, French, Author

Marie Curie, 32, Polish/French, Physicist and Chemist

Ragnar Sohlman, 29, Swedish, Chemical Engineer, Manager, Creator of Nobel Foundation

Wilhelm Röntgen, 54, German, Mechanical Engineer, Physicist

Sigmund Freud, 43, Austrian, Neurologist and Founder of Psychoanalysis

Mark Twain (Samuel Langhorne Clemens), 64, American, Author and Humorist

Yvette Guilbert, 34, French, Cabaret Singer and Actress

* Yvette Guilbert sings 10 French Belle Epoque's songs, as well as traditional songs

Henri de Toulouse-Lautrec, 35, French, Painter, Printmaker and Caricaturist

W.S. (William Schwenck) Gilbert, 63, English, Dramatist, Librettist, collaborated with composer Arthur Sullivan

* 4 actors play famous scenes from The Mikado, The Pirates of Penzance, H.M.S. Pinafore...

Jules Verne, 71, French, Author and Futurist

Isadora Duncan, 22, American, Dancer, Mother of Modern Dance

* Isadora Duncan dances, accompanied by the piano music of Reynaldo Hahn

Eça de Queirós, 54, Portuguese, Author and Diplomat

Richard Strauss, 35, German, Composer and Conductor

Camille Saint-Saens, 64, French, Composer, Conductor, Organist, Pianist, Writer, Critic

* Armand Silvestre recites his poem Les fils de Promethee, accompanied alternately by piano extracts from Le feu celeste by Camille Saint-Saens, performed by him & Arthur Rubinstein

Joseph Joachim, 68, Hungarian, Violinist, Conductor, Composer and Teacher.

* Joseph Joachim & Edvard Grieg play a recital of piano and violin compositions by Chopin, Saint-Saens, Grieg, Fauré, Brahms, Liszt, Beethoven, Schubert, Schumann & Mendelssohn

Georges Feydeau, 37, French, Playwright

* Potpourri of 1899 Georges Melies films, including a film on the Dreyfus Affair. Accompanied by Bronislaw Huberman on the violin in a classical, sacred and popular recital

Auguste Rodin, 59, French, Sculptor

Dmitri Mendeleev, 65, Russian, Chemist

Emile Durkheim, 41, French, Sociologist

Ernesta Stern

* Jeanne Hugo recites a poem from *La Legende des Siecles* by Victor Hugo, her grandfather

* Jose-Maria de Heredia recites poems by the Spanish poet Pedro Antonio de Alarcon

* Olga Knipper plays Tatiana writing to Eugene Onegin by Pushkin and Tchaikovsky's opera

* A concert of compositions by composers who died recently, with Orchestre Lamoureux ensemble and soloists Pablo Casals, Bronislaw Huberman, Lionel Tertis and Maurice Ravel

* Arias & ballets with Garnier Opera group and Adelina Patti, Antonio Paoli, Karl Mantzius, Luisa Tetrazzini, Leon Rothir, Edyth Walker, Francesco Tamagno, Clara Butt

* Isaac Albeniz, Francisco Tarrega and Pablo de Sarasate give a recital of their compositions

* Standing ovation to Giuseppe Verdi, while singing a cappella *Va Pensiero* from *Nabucco*. The opera singers sing arias from Verdi's operas, ending with *Triumphal March* from *Aida*

* The actors, musicians and guests sing and play the *Ode to Joy* from Beethoven's Ninth Symphony, while the Parisian New Century fireworks outside the windows are seen & heard

Jacque Corot

* Screening of the 1900 Paris World Exposition's new buildings/monuments, John Philip Sousa enters with his March Band performing American, English & French military marches

Others - Guests, actors, musicians, et al: Gabriele d'Annunzio, Anton Chekhov, Konstantin Stanislavski, Olga Knipper, Arthur Schnitzler, Henry James, Machado de Assis, Arturo Toscanini, Constant Coquelin, Rosemonde Gerard, Arthur Rubinstein, John Philip Sousa, Charles Lecocq, Robert Planquette, Andre Messager, Ludovic Halevy, Aristide Bruant, Reynaldo Hahn, Armand Silvestre, Max Bruch, Edvard Grieg, Georges Méliès, Bronislaw Huberman, Jeanne Hugo, Jean-Baptiste Charcot, Isaac Albeniz, Pablo de Sarasate, Francisco Tarrega, Jane Avril, Camille Pissarro, Gustave Kahn, Alfred Jarry, Willy, Colette, Marguerite Durand, Gustav Mahler, Alexander Glazunov, Antonin Dvorak, Tomas Masaryk, Marcellus Emants, Ion Luca Caragiale, Tevfik Fikret, Ahmed Shawqi, Khalil Mutran, Giuseppe Verdi, Sholem Aleikhem, Hayim Nahman Bialik, Elia Carmona, Jacob Chemla, Kostis Palamas, Pierre de Coubertin, Henryk Sienkiewicz, Selma Lagerlof, Georg Brandes, Johan Jacob Ahrenberg, Pablo Casals, Camille Chevillard, Lionel Tertis, Maurice Ravel, Adelina Patti, Antonio Paoli, Karl Mantzius, Luisa Tetrazzini, Edmond de Rothschild, Maurice de Rothschild, Zoe de Rothschild, Leon Lambert, Fernand Halphen, Sophie Croizette, Manuel de Falla, Carl Spitteler, Janko Veselinovic, Rabindranath Tagore, Lie Kim Hok, Koda Rohan, Maurice Maeterlinck, Antun Gustav Matos, Anna de Noailles, Leon Bonnat, Carolus-Duran, Paul Adam, Camille Flammarion, Jose-Maria de Heredia, Joseph Reinach, Jean Richepin, Henri de Regnier, Marie de Regnier, Pierre Louys, Ferdinand von Zeppelin, Camille Jenatzy, et al; Moulin Rouge can-can show, 4 actors of the Gilbert show, ensemble of musicians from the Lamoureux Orchestra, ensemble of singers and dancers from the Garnier Opera in Paris.

New Year's eve, 31/12/1899 at Ernesta Stern's Parisian Salon, located at 68, rue du Faubourg Saint-Honore, Paris. On the tables foie gras, champagne, oysters, wines. Through the open windows of the hotel particulier one can see and hear fireworks to celebrate the new year, the new century, the new era, at the height of Parisian Belle Epoque. Ernesta Stern's Salon is the most exclusive in Paris, where the cultural crème de la crème has gathered: authors, playwrights, actors, scientists, inventors, politicians, composers, painters, sculptors, dancers... When the name of a protagonist is mentioned we see projected on a screen photos and events.

Jacque Corot sees and hears everything but cannot be seen by the other protagonists, he likes all the celebrities, understands them, envy or pity them, with hindsight of what might or will happen. A feeling of insouciance is in the air, we are on top of the world, living in the cultural world's capital, where every important event occurs, and this Belle Epoque will last forever.

To my beloved wife Ruthy Cory, my inspiration, every atom of your flesh is as dear to me as my own: in pain and sickness it would still be dear, fogata de amor y guía, razon de vivir mi vida, der du von dem Himmel bist, alles Leid und Schmerzen stillest, yet I see you, like the sun, even without looking, come Dante ti dico - l'amor che move: i sole e l'altre stelle, car vois-tu, chaque jour je t'aime davantage, aujourd'hui plus qu'hier et bien moins que demain.

When the guns roar and the missiles fly over our heads, when buildings collapse and the dead pile up on all sides, when a pandemic rages and slays millions all over the world, paralyzes the economy, culture and life, when society disintegrates and the regime is in existential crisis, when incited rioters rave freely in our towns, reminding me of childhood traumas, of the vandals setting fire to entire neighborhoods, butchering and wounding without mercy, almost burning me alive, while I was reading Alice in the Wonderland, about the Queen of Hearts screaming COUPEZ LUI LA TETE – Off with his head; I find myself balm, bibliotherapy, writing catharsis, immersing in culture at its best, as the muses are not silent but speak or rather whisper to my deaf ears: get up, shake off, sail on the wings of the imagination, on the wings of time, to another reality in another place, to the most creative century in culture, innovation, spiritual life, literature, arts, music, theater, cinema, inventions, science, democracy & human rights, write about it, about the cultural paragons, the premieres of the best plays, operas and exhibitions, the fascinating and interesting salons, in order to heal my ailing soul, to cure the physical and mental pain of my beloved readers. 13/5/2021

Ernesta Stern – Chers amis, dear friends, thank you for coming tonight to celebrate the new century that will be even better than the former one. We'll spend together the whole night, with speeches by the best cultural figures of the fin du siècle, with a sumptuous dinner of course, with opera arias, chansons, scenes from plays, with famous dancers, recitals, paintings, photos & posters exhibitions, with films. We'll end well after midnight with a ball.

We are all friends here, we probably don't agree on everything but on the key issues we share the same opinions, of humanism and justice, of culture and education, we oppose any form of racism and anti-Semitism, and we are dedicated Dreyfusards. That is why I first of all would like to welcome here our dear friend Emile Zola, the conscience of our nation, who has returned to Paris from his London exile on June 4 and has published since then his new masterpiece *Fecondite* at Fasquelle. Cher Emile, vous nous avez manqué, we missed you so much, and we are happy to have you here with, this time forever I hope. I propose that at his solemn moment, at the dawn of a new century, each one will share with us his thoughts and wishes for the next 50, 100, 120 years... Anyhow, we'll not live to see if you were right.

Jacque Corot (aside) – And I'll share with you, dear audience, in aside remarks, my insights on the *dramatis personae*, as if I was the Greek Chorus, but I don't sing and am all by myself.

Emile Zola – Thank you my dear Ernesta, you are a true friend, it is indeed the first evening that I allow myself to celebrate because the tides are at last on our favor, not personally as I know that I'll never be elected to the Academie Francaise after 25 times that I tried, but at the national level, with the fulfillment of my wishes and of many others in France, as the Dreyfus Affair was only a symptom of the ailments of our nation, of Europe, of the world, the lack of justice, equality, freedom, fraternity, all the ideals of our centennial revolution, that are far from being achieved. What I mean is that on 9/9/99, a really historic date, the court rendered its verdict that Alfred Dreyfus had extenuating circumstances for his alleged treason and after our dear friend Alfred filed an appeal for a retrial he was released 12 days later. We are continuing to fight for an acquittal but in the meantime France needs civil peace and harmony, on the eve of the Universal Exhibition of 1900, don't forget that the whole world is looking at us and we cannot afford to be divided. We'll continue to fight for what we really aspire for – freedom of association and secularism, justice and equality. If you shut up truth and bury it under the ground, it will but grow, and gather to itself such explosive power that the day it bursts through it will blow up everything in its way. We've proved in the last few years that *la verite est en marche*, we've started our journey towards truth and freedom, and we shall overcome some day, if not today, in 100, 120 years from now. I believe in a better future, because when there is no hope in the future, the present appears atrociously bitter. I have but one passion: to enlighten those who have been kept in the dark, in the name of humanity which has suffered so much and is entitled to happiness. My fiery protest is simply the cry of my very soul. Actually, those are the subjects of my next novels and what I intend to write in the next 30 years will eclipse what I have achieved in the previous 30 years, the *Rougon-Macquart*, *les trois villes*, my essays. I am not even 60 and I have so much to do!

Jacque Corot (aside) – L'homme propose et Dieu dispose, Mann tracht und Gott lacht, my dear Emile... not 30, not 20, not 10, not even 5, you'll be assassinated because of your beliefs within a couple of years and it will be such a loss for humanity, for culture, for France!

Ernesta Stern – As you all know, our Salon is cosmopolitan and we try to gather here, if they live in Paris or visit it, prominent authors, artists and composers from all over Europe. I am honored to have with us here one of the best authors in the world - Lev Tolstoy. He loves us so much that half of his novel *War and Peace* is written in French, but his other novels are no

less brilliant Anna Karenina, the Death of Ivan Ilyich, Childhood, Boyhood and Youth. He is an author, a philosopher, a historian, but most of all he is the personification of humanity.

Lev Tolstoy – I wanted to tell you about my last book Resurrection published recently which exposes the injustice of man-made laws and the hypocrisy of the institutionalized church, but as far as I have heard I'll be preaching to the choir. That is why I want to travel into the past. I traveled many times to Europe but the trip which influenced me most was in 1860-1861 when I met Victor Hugo, his novel *Les Misérables* was a revelation to me, my meeting with Proudhon contributed much to my vision on education, and following this visit I returned to Yasnaya Polyana and founded 13 schools for the Children of Russia's peasants who had just been emancipated from serfdom in 1861. You mentioned War and Peace as a novel but it is not at all a novel, it is a historical canvas where hundreds of characters are being depicted, many historical and others fictional. France is not only like a mother tongue, when I wrote this book I really thought like a Frenchman and Russian as I understand both people perfectly well and I have empathy for both of them, although we were allegedly enemies. I believe that Napoleon and Alexander I were completely insignificant as compared to the historic perspective. I write my books primarily for the examination of social and political issues, because everyone thinks of changing the world, but no one thinks of changing himself, and that is what matters after all. And if I have influenced thousands of people to start changing the world by reading my books I have accomplished my task on earth. Don't try to be perfect, because otherwise you'll never be content. I think that most of you here are freethinkers because you are willing to use your minds without prejudice and without fearing to understand things that clash with your own customs, privileges, or beliefs. Wrong does not cease to be wrong because the majority shares in it in France, in England, in Italy, in Germany and especially in Russia. You Zola, Shaw and Wilde, each in his own way, are individuals who think differently from the majority, and this does not mean that you are wrong, on the contrary it may prove that you are right, as a very wise man present here, Henrik Ibsen, said in *An enemy of the people*. And so Zola was right when he wrote his article *J'accuse*. And I think that I am right too, although I have much more influence and adherence outside Russia than in my own country, but Hugo had to go on exile, and so Proudhon, Wilde, Ibsen & Zola. You asked me to try and forecast what will be the fate of humanity, that I don't know, but what I do know is that the sole meaning of life is to serve humanity. Without knowing what you are and why you are on earth life is impossible, and finally, the changes in your life must come from the impossibility to live otherwise than according the demands of your conscience.

Jacque Corot (aside) – You are so wise Tolstoy that you stand above all of us, you know it all, and you have achieved in your life more than whole nations did. It is however a pity that such Russian giants as you, Chekhov and Dostoevsky have not managed to influence your own people, as much as Ibsen has influenced Norwegians or Zola has influenced his compatriots.

Ernesta Stern – You mentioned Ibsen dear Tolstoy and indeed we have tonight a miraculous mixture of giants, older and wise men as Tolstoy, Ibsen, Clemenceau, Jose Echegaray, Monet and Zola, with young and brilliant people as Rostand, Wilde, Shaw, Puccini, Caruso, Debussy and Herzl. Henrik Ibsen is one of us, he spent 27 years most of his adult life in Italy and Germany far away from his Norway. He wrote there his masterpieces *A doll's house*, *An enemy of the people*, *The pillars of society*, *Ghosts*, *The Wild Duck*, *Hedda Gabler*. He returned triumphantly to Kristiania in Norway in 1891, where he has written additional masterpieces, the latest was published recently – *When we dead awaken*. His plays are staged all over Europe, the festivities of his 70th birthday a year ago were endless. It is a cliché if I would say that Henrik Ibsen is the conscience of Europe, so I would confine myself into saying that he is the conscience of the family, of society, of us women whom he knows best.

Henrik Ibsen – It is amazing how great minds think alike. You called your new book, dear Tolstoy, Resurrection, and this is exactly the name of my last play The Resurrection Day which finally I called “When we dead awaken”. And indeed I fully agree that although we are thinking on resurrection being old as we are, a miracle has happened and we met here and elsewhere young and talented authors who resurrect us, and who will be more pioneering than us. I was always perceived to be controversial because I tackled the most important dilemmas of family and society, which are today revolutionary but in 50 or 100 years will become the consensus. What we think today that they are social questions will be perceived tomorrow psychological issues, as has explained to me the young Sigmund Freud tonight. Women liberation or Nora’s identity dilemmas will be no more an issue 100 years from now, as it will be selbstverständlich that women are entitled to their own career and care of the children and the house has to be divided equally between men and women. We Scandinavians will start with it but all Europe will rally and maybe even Asia and Africa as well if they will set free from fundamentalism. Not that I am a great believer in democracy, as I believe that at present the stupid people are in absolute majority all over the world, the majority is never right until it does right. I have arrived to all these insights being in exile, but mostly being alone, as the strongest men are those who stand alone. All the pioneers, the social reformers will continue to be perceived as enemies of the people even in 120 years from now and they will pay the price, as you should never wear your best trousers when you go out to fight for freedom and truth. I am more optimistic about women liberation than about democracy and social justice. The world will no more be able to overlook the fact that women have duties to themselves, not only to their husbands and children. It took 20 years before the authorities allowed Ghosts to be performed in Norway and each new play that I wrote had an explosive effect on intellectual circles. That is why my plays were promptly translated into German, French and English, during the decade following the initial publication. The topics that I raise in my plays are so relevant and explosive that they became the centre of every conversation at every social gathering in Kristiania, and the hostess begged her guests not to mention Ibsen’s new play.

Jacque Corot (aside) – Ibsen is probably the best playwright ever, he sounds modern in 1900 as in 2000, but so do Shakespeare and Moliere. He proves that you don’t need to come from one of the leading cultures in order to become immortal, even a small country as Norway can contribute to world culture as large countries like Russia, England and France. However, this is true only in a few exceptions as small countries may contribute giants like Ibsen, Strindberg, Andersen, Munch, Grieg, or Kafka, but those will be rare cases for each of the countries as compared to the hundreds of prominent authors and artists in the larger countries.

Ernesta Stern – Emile Zola mentioned before that we share so much in common, that it will be a waste to remain divided. Actually, this is the motto of our dear President Emile Loubet and our beloved Prime Minister Pierre Waldeck-Rousseau, who settled at last the Dreyfus Affair. I have invited both of them to our reveillon but Pierre and Marie, his sculptor wife that you all know, as well as Emile and his wife Marie-Louise, preferred to celebrate in private, they are so modest these two couples, completely the opposite of our late president Felix Faure, to whom you addressed your famous article J’accuse in L’Aurore, dear Emile. No need to remind you in what circumstances our Felix died, we all know that he was with his mistress Meg – Marguerite Steinheil, both of them were with us last year, they came for just a few moments, because as you know le palais de l’Elysee is just en face. Anyhow, tonight we have another friend, who retired from politics in 1893 but I am convinced that when he’ll return it will be as prime minister, but in the meanwhile he contributes immensely to France with his newspaper L’Aurore, taking an active & courageous part as a supporter of Dreyfus, Zola and the Dreyfusards, an opponent to the anti-Semitic and nationalist campaigns, in hundreds of articles, at the detriment of his political career but at the benefit of the conscience of France.

Georges Clemenceau – I mourn as you do our dear friend Felix Faure who was with us last year but unlike you I think that he had the best of deaths, probably shouting “Heaven, I’m in Heaven” until God, in whom I don’t believe being a mecreant as you all know, complied to his wishes, taking him to Heaven. The only obituary that I can think of is: «Il se voulait César, mais ne fut que Pompée », but I don’t want to corrupt young Edmond Rostand.

Oscar Wilde – Don’t you worry Edmond, I can explain it to you later if you wish so.

Georges Clemenceau – Personally I believe that by entering nothingness, he must have felt at home. However, dear Ernesta, to answer your question, I do believe that within a few years church will be separated from the state, we’ll recover Alsace and Lorraine, and France will have a brilliant future, but for that you have to be strong, to stand firm on your principles, implement social reforms and passing a law on 8-hour-day work to all workers. Because, whether we like it or not, whether it pleases us or shocks us, the French Revolution is a bloc from which nothing can be separated, because historical truth does not permit it. The Revolution is not finished, it is still continuing, we are actors in it, the same men are still in conflict with the same enemies. The struggle will go on, until the final day of victory, and until that day we will not allow anyone to throw mud at the Revolution. I believe in revolution, in a secular republic, in patriotism not nationalism. I’m not like the jury of the tribunal that accused you, my dear Emile, as I told them: “Your verdict will be less upon us than upon yourselves. We appear before you, you appear before history!” and indeed history has proved who was right and who was wrong. It’ll be a catastrophe to leave to those military officers the fate of France, as we might lose the war against the Germans when it will occur and it will occur. We are the true patriots, they are just a caricature that will crumble in front of the enemy, they are “courageous” towards Dreyfus, towards the weak, but cowards towards the strong enemy! Finally, we have to find the middle way between pacifism and militarism.

Jacque Corot (aside) – A day will come that you’ll be remembered as the best prime minister of France’s third republic, you’ll be called The Tiger, win the war, quite the opposite of the weaklings in France’s late thirties, you’ll become also the role model of Churchill.

Ernesta Stern – As Wilde intervened, I’ll present you to those guests who don’t know you yet if it’s at all possible. So, Oscar Wilde thanks for coming from Saint-Germain to our Faubourg, as you have chosen to live in France, even writing your fantastic play Salome in French, which was produced only in Paris, I wonder if it is because of the dance of the seven veils.
